192. Though a Bill be not indorſed, or the Indorſement not right, but ſomething wanting in it, yet the Poſſeſſor is allowed to demand Payment, and the Acceptor is obliged to make it, upon Delivery of the two Bills, if he will under his Hand and Seal oblige himſelf to procure the third properly and truly indorſed.

193. If, through Miſtake, the Words and Figures deſcribing the Sum in a Bill of Exchange differ, the former are to be preferred, until further Advice clear up the Diſagreement; as it is more natural to ſuppoſe that a Man may miſtake in making a few Figures than in Writing ſeveral Words, and the former at the Top of the Bill only ſerving to expreſs an Abbreviation of the latter wrote at Length in the Body, and are indeed the very Subſtance of it, and therefore more particular Regard ought to be had to them than the others; and for the ſame Reaſon, though the Sum figured in the Letter of Advice and Bill do agree, the Words in the Body of the Bill ſhould determine the Affair, at leaſt till the Certainty can be known.

194. And if the Name of the Perſon to whom the Bill is payable ſhould be altered, eraſed, or interlined before Acceptance, this will not juſtify the Acceptor's Refuſal to pay it when due to the Perſon whoſe Name has been ſo mended or interlined, as he muſt or ought to have taken Notice of ſuch an eſſential Particular, when he accepted the Bill, and ſhould have ſtarted the Objection and ſatisfied himſelf about it before accepting, as this obliges him to a Compliance, even though he ſhould aver that the Amendment or Interlining was made after, except he can prove it, which it will lie upon him to do.

195. If the Direction on a Bill of Exchange be forgot, but the Remitter adviſe his Correſpondent on whom it was intended to be drawn, the Poſſeſſor may demand Acceptance, and in Caſe of Refuſal proteſt againſt the Drawer, and recover the Charges of him; and in Caſe the Perſon drawn on have a Letter of Advice from the Drawer, deſiring him to accept ſuch a Bill, he may ſafely do it, though it comes without a Direction.

196. Another Method of exchanging, very different from all thoſe beforementioned, is *that* by Bills on Marts and Fairs, and though the *Engliſh* have very little Concern in theſe Negociations, I have thought it not foreign to my Deſign of giving my Readers a general Notion of Exchanges, to deſcribe the Nature of thoſe particular ones; which I ſhall do in ſpeaking of a few of the moſt conſiderable, and from theſe a juſt Idea may be formed of all the Reſt.

197. There are many Fairs in *Europe*, where Buſineſs for very great Sums is tranſacted; as at *Lyons*, *Rheims*, *Rouen*, *Bourdeaux*, *Troyes*, *St. Denis*, *Dieppe*, *Toulon*, &c. in *France*; *Francfort*, upon the *Main*, *Leipzick* and *Naumbourgh*, in *Germany*; *Bolzano*, in the *Ferol*; and *Novi*, ſubject to the *Genoeſe*; with divers others unneceſſary to be mentioned here; and, as I propoſed, I ſhall limit what I have to ſay concerning them in Regard of Bills, to thoſe of *Lyons*, *Frankfort*, *Leipzick*, or *Leipzig*, and *Naumbourg*, being the moſt conſiderable of all others.

198. There are yearly four Fairs at LYONS, in which each hath his Payment of Bills, bearing the Name of the preceding Fair; the *firſt* is that of the *Epiphany* which alway begins in *January*, the *Monday* after *Twelfth-Day*; the *ſecond* is *Eaſter* Fair, beginning on St. *Niſier's* Day, in *April*; the *third* is *Auguſt* Fair, which begins on St. *Dominick's* Day in that Month; and the *fourth* is the Fair of *All-Saints*, beginning on St. *Hubert's* Day, in *November*; and as each Fair has its Payment, the major Part of the Bills on this City are not made payable in Fair Time; and though they ſhould be, they will only be diſcharged afterwards in the Payment of that Fair, which Payments are regulated as follows, *viz.*

199. The Payment of the *Epiphany* begins the firſt, and ends the laſt of *March*; that of *Eaſter* begins the firſt, and ends the laſt of *June*; that of *Auguſt*

begins the firſt, and ends the laſt of *September*; and that of *All-Saints* begins the firſt, and ends the laſt of *December*; ſo that when Bills are drawn to be paid at one of theſe appointed Times at *Lyons*, that is not yet begun, the Drawer ſays, *Pay this my firſt of Exchange*, &c. *in the next* Epiphany *Payment*, *or in the next* Eaſter *Payment*, &c. but if the Payment is already begun, the Bill muſt then be drawn payable *in this current*, or Preſent *Payment of* Epiphany, *or this current Payment of* Eaſter, *&c.*

200. It was cuſtomary formerly to make the Bills drawn from *Amſterdam* and elſewhere, on the Payments of *Lyons*, in golden Crowns of the Sun; but as this Specie has been long ſince decried in *France*, the preſent uſage in Exchange is to draw for the Payments of *Lyons*, as is practiſed on all other Parts of that Kingdom, *viz.* in Crowns of ſixty Sous.

201. The Bills, drawn in the above Manner, are to be accepted in the ſix firſt Days of the Payment they are made payable in, and the Perſon they are drawn on is not obliged to declare whether he will or will not accept till the ſixth Day, but after that Day, the Bearer may proteſt them for Non-acceptance, though he ſhould detain them during the whole Time of that Payment, to ſee whether any one offers to diſcharge them; however the Proteſt ſhould immediately be forwarded to the Remitters; and if any one pays a Bill of Exchange in the Time of the Payment, before the ſixth Day, or if this be a Feaſt the Day following, it will be at his own Riſque.

202. The Bearers of Bills not ſatisfied by the laſt Day of any Payment, muſt proteſt them on the third Day after the Payment finiſhes, otherwiſe they will loſe their Right againſt the Drawers; but if this is done in Form and in the Time preſcribed, the Holder may afterwards refuſe Payment from any one that offers it, and take his Reimburſements on the Drawer, both for Principal and Charges.

203. And the ſaid Poſſeſſors of Bills are obliged to take their Reimburſement on the Drawers or Indorſers in a Time limited, *viz.* For all Bills drawn from any Part of *France*, in *two Months*; thoſe which are from *Italy*, *Switzerland*, *Germany*, *Holland*, *Flanders*, and *England*, in *three Months*; and thoſe which are drawn from *Spain*, *Portugal*, *Poland*, *Sweden*, and *Denmark*, in *ſix Months*, to be counted from the Date of the Proteſt; and in Default thereof they will loſe their Rights againſt the Drawers or Indorſers.

204. FRANCFORT has two annual Fairs of great Reſort, *viz.* the *firſt* is the Fair of *Eaſter*, beginning the *Sunday* before *Palm-Sunday*, that is, fifteen Days before *Eaſter*; and the *ſecond* is the *September* Fair, which commences the *Sunday* preceding the Birth of the Virgin *Mary*, which is the 8th of *September*, if this Feaſt happens on *Monday*, *Tueſday*, or *Wedneſday*; but if it falls out on *Thurſday*, *Friday*, or *Saturday*, then the Fair does not begin till the *Sunday* following, or on the *Sunday* which that Feſtival may fall on.

205. Each of theſe Fairs laſts fifteen Days or a Fortnight; the firſt Week is appointed for accepting, and the ſecond for paying the Bills of Exchange; the Acceptance payable in Fair-Time is made from the *Monday* of its Opening to the *Tueſday* of the ſucceeding Week at nine o'Clock in the Morning, after which Hour, the Poſſeſſor of a Bill is no longer obliged to wait for Payment, but ſhould proteſt, or at leaſt note it for Non-acceptance, which indeed he may do from the Moment that Acceptance is denied.

206. Bills on theſe Fairs were formerly accepted verbally, but they muſt now be accepted in Form as other Bills are, by Subſcription of the Acceptor's Name, with the Day of its Acceptance; and when a Bill thus accepted is not ſatisfied before *Saturday* Noon in the Week of Payment, the Bearer is obliged to proteſt it for Non-payment, by carrying it to the Notary eſtabliſhed for that Purpoſe, between two o'Clock and Sun-ſet, that he may note it, after which he muſt ſend the Proteſt *per* firſt Poſt.

207. LEIPZICK has three Fairs yearly; the *firſt* being called the *New-Year's* Fair, commences on the firſt of *January*, or on the 2d, if the firſt be on a *Sunday*; the *ſecond* is at *Eaſter*, beginning always on the *Monday* three Weeks from that

Feaſt; and the *third* begins the firſt *Sunday* after St. *Michael*, whether that Day happens on a *Sunday* or not.

208. Theſe Fairs are opened on the appointed Days by the ringing of a Bell, and which rings again eight Days after to finiſh them; ſo that theſe eight intermediate Days between the two Ringings is properly the Fair, and the Acceptance of Bills is demanded on the firſt or ſecond of theſe Days; but if the Perſons on whom they are drawn have a Mind to defer their Acceptance till the Week of Payment, they may; which Week begins immediately after the Bell has rung to end the Fair, and laſts till the fifth Day following incluſive; ſo that the Bills on the *New-Year's* Fair ought to be paid the 12th of *January*, and thoſe on the Fairs of *Eaſter* and *Michaelmas*, the *Thurſday* in the Week of Payment, otherwiſe to be duly proteſted.

209. It is permitted to the Holders of the Bills to proteſt them for Non-acceptance, immediately on Refuſal, but not to return them; on the contrary, they are obliged to keep them till the Fair is entirely finiſhed, to ſee if any one offers Payment; and as what is called the *Convoy of Nuremberg* departs from *Leipzick* at ten at Night of the proteſting Day, there is no Room to make one after that Hour, and the Poſſeſſors will forfeit their Right againſt the Drawers if they let the Time ſlip.

210. NAUMBOURG holds a very conſiderable Fair yearly on the Feaſt of St. *Peter* and St. *Paul*, which is commonly reckoned as the fourth of *Leipſick*, becauſe the Generality of the Merchants attending the one have Recourſe to the other: This Fair begins on the Feſtival of the ſaid two Saints, being always the 29th of *June*, and it only laſts eight Days; Bills are accepted on the firſt and ſecond Days of the Fair, and ought to be paid on the 3d of *July* at furtheſt, or proteſted for Non-payment; but it is not cuſtomary to return them with the Proteſt till after the 5th of the ſaid Month, on which Day the Fair ends; and if the Bills are not then paid, the Holder may ſend them back by the firſt Poſt.

211. As the preceding Exchanges differ from all others, I ſhall here add a few neceſſary Obſervations for the Government of thoſe who engage therein; as it is certain that the greateſt Part of thoſe who take Bills on Fairs do it with the lucrative View of employing their Money to greater Advantage than common, either by negociating the ſaid Bills when the Time of the Fairs or Payments approaches, or by ſending them to the Places drawn on to be recovered and remitted them, which is commonly done with a conſiderable Profit; but as there is indiſputably a much greater Riſque in taking Bills on Fairs, than on Places where their Goodneſs or Validity muſt be immediately known, thoſe who take them on the former, cannot act with too much Caution in Regard of the Drawers.

212. And the Reaſon is very apparent to any one who ſeriouſly reflects on ſuch Negociations; for ſuppoſe I take a Bill of Exchange upon *Lyons*, payable at three Uſances, dated the 22d of *April*, I can immediately ſend it forward, and in a little Time have the Advice of its Acceptance, when I have two Debtors or Securities, *viz.* the Drawer and Acceptant; whereas if I take a Bill of the ſame Date, payable in the Payment of *Eaſter* Fair which finiſhes the 31ſt of *July*, and is the ſame Day, as the laſt of Grace or Reſpite to the above mentioned Bill taken at three Uſances, and whoſe Succeſs, whether it will be accepted or not, I cannot learn till about the 13th or 14th of *July*, becauſe, as I have before obſerved, *the Bills drawn upon the Payments of* Lyons *are only accepted during the ſix firſt Days of Payment*; now if from the 22d of *April* to the Beginning of *July* the Drawer of my Bill fails, I have great Reaſon to beleive it will neither be accepted nor paid; whereas if that drawn at the three Uſo's is not accepted, I ſhall know towards the 8th or 9th of *May*; and may have my Recourſe againſt the Drawer, who may be in a better Condition then to give me Satisfaction or Security than on the 13th or 14th of *July*, or the 10th or 11th of *Auguſt*, after getting my Bill with Proteſt for Non-payment; and this may ſuffice for what regards the Payments and Exchanges on Fairs.

213. I have already quoted ſundry Acts of Parliament in Force, relative to Inland Bills of Exchange, which have greatly altered their Nature from what it was before their Exiſtence; I ſhall now introduce ſome new Caſes which have been

been tried in our Courts of Law, in which very ſingular and unprecedent Circumſtances have occurred; and have ſo greatly perplexed not only the Gentlemen at the Bar, but even the learned Judges on the Bench, that final Deciſions will be ſollicited, upon Caſes made out expreſsly for that Purpoſe, from the ſupreme tribunal of the Kingdom, the Houſe of Lords. But before we proceed to theſe recent Trials, it will be neceſſary to notice in their Order, a few Deciſions prior to them; and which are nevertheleſs of the firſt authority, and of unſhaken Validity.

214. A Writ of Error was brought on a Judgment by *nil dicit* in an Action againſt the Drawer of an Inland Bill of Exchange, and it was objected that ſince the Act of 9 *Will.* III. no Damage ſhall be recovered againſt the Drawer upon a Bill of Exchange, without a Proteſt, and therefore the Action lies not, there being no Proteſt.

But *Holt* C. J. The Statute never intended to deſtroy the Action for Want of a Proteſt, but only to deprive the Party of recovering Intereſt and Coſt upon an Inland Bill againſt the Drawer without Notice of Non-payment by Proteſt: For before the Statute, there was this Difference between Foreign and Inland Bills of Exchange; if a Bill was Foreign, one could not reſort to the Drawer for Non-acceptance or Non-payment without a Proteſt, and reaſonable Notice thereof: But in Caſe of an inland Bill, there was no Occaſion for a Proteſt; but if any Prejudice happened to the Drawer, by the Non-payment of the Perſon drawn upon, and that for Want of Notice of Non-payment, which he to whom the Bill is made ought to give, the Drawer was not liable; and the Word *Damages* in the Statute, was meant only of Damages that the Party is at of being longer out of his Money by the Non-payment of the Drawer, than the Tenor of the Bill purported, and not of Damages for the original Debt: And the Proteſt was ordered for the Benefit of the Drawer; for if any Damages accrue to the Drawer for Want of Proteſt, they ſhall be borne by him to whom the Bill is made; and if no Damage accrue to him, then there is no Harm done him, and a Proteſt is only to give a formal Notice that the Bill is not accepted, or is accepted and not paid; and if in ſuch Caſe the Damage amount to the Value of the Bill, there ſhall be no Recovery, but otherwiſe he ought not to loſe his Debt; but that ought either to appear by Evidence upon *Non Aſſumpſit*, or by ſpecial Pleading: and the Act is very obſcurely and doubtfully penned, and we ought not by Conſtruction upon ſuch an Act to take away a Man's Right. And the Judgment was affirmed *per totam Curiam*.

215. In an Action on the Caſe on an Inland Bill of Exchange brought by the Indorſer againſt the Drawer, it was objected, that there was no Averment of the Defendant's being a Merchant; but it was anſwered and reſolved by the Court, that the Drawing of the Bill was a ſufficient Merchandiſing and Negociating to this Purpoſe. *Salk.* 125.

216. Acceptance of a Bill of Exchange after the Day of Payment paſt is uſual. L. *Raymond*, 364, 474.

So Acceptance for the Honour of the Drawer, *&c.*

217. To intitle the Party to an Action at Law in *England* againſt the Acceptor of a Bill, it matters not whether there be a Proteſt; but to intitle the Party to a Recovery againſt the Drawer beyond the Seas or elſewhere, there muſt be a Proteſt before a Notary Publick.

218. A Bill may be accepted for Part, when the Party on whom it was drawn had no more Effects of the Drawer's in his Hands; though whenever this happens, there muſt be a Proteſt for Non-acceptance, if not for the whole Sum, yet at leaſt for the Reſidue; and after Payment of ſuch Part there muſt be a Proteſt for the Remainder, as the receiving Part of the Money upon a Bill does no Ways weaken it. *Trin.* 20 *Car.* II. in *B. R.*

219. It is aſſerted by *Marius*, *Scarlet*, *Molloy*, and others that have treated of Bills of Exchange, that any Time before the Money comes due, the Drawer of a Bill may countermand the Payment although it hath been accepted, and this is uſually made before a Notary, though if it comes only under the Party's Hand, they allow it to be ſufficient, and in Caſe of Diſcount, or Payment before it is due, they ſuppoſe the Acceptor liable to pay it again in Caſe of a Countermand; from

from all which I muſt diſſent, as this abſolutely overſets the Validity of all Acceptances.

220. When a Bill beyond Seas is accepted, and not complied with when due, the Proteſt for Non-payment by a Notary is ſufficient to ſhew in Court here, without producing the Bill itſelf ; but if a Bill in *England* be accepted, and a ſpecial Action grounded on the Cuſtom be brought againſt the Acceptor, at the Trial the Plaintiff muſt produce the Bill accepted, and not the Proteſt, otherwiſe he will fail in his Action at that Time; therefore it is moſt ſecure that a Bill once accepted be kept, and only the Proteſt for Non-payment be remitted abroad.

221. If a Bill is not accepted to be paid when due, but for a longer Time, the Perſon to whom the Bill is made payable muſt proteſt the ſame for not being accepted according to the Tenor, yet he may however admit the Acceptance; nor can the Acceptor, if he once ſubſcribes the Bill for a longer Time, revoke his Acceptance, or blot out his Name, although it is not according to the Tenor of the Bill; for by this Act he hath made himſelf Debtor, and owns the Draught made by his Friend upon him, whoſe Right another Man cannot give away, and therefore cannot diſcharge the Acceptance ; and this Caſe will admit of two Proteſts, if not three, *viz.*

1. One Proteſt muſt be made for Non-acceptance, according to the Time the Bill is payable at.
2. For Non-payment when due according to the Bill's Tenor.
3. If the Money be not paid according to the Time that the Acceptor ſubſcribed for.

Per L. C J. *Pemberton* inter *Price* & *Shute*. *Paſc.* 33 *Car.* II. in *B. R.*

222. A Bill was drawn payable on the 1ſt of *January*, and the Perſon to whom it was directed accepts it to pay on the 1ſt of *March*, with which the Servant returns to his Maſter, who, perceiving this enlarged Acceptance, ſtrikes out the 1ſt of *March*, and puts in the 1ſt of *January*, and at that Time ſends the Bill for Payment, which the Acceptor refuſes; whereupon the Poſſeſſor ſtrikes out the 1ſt of *January*, and inſerts the 1ſt of *March* again : In an Action brought on this Bill, the Queſtion was, Whether theſe Alterations did not deſtroy the Bill ? and ruled, that it did not.

1 *Salk.* 126.

223. A Bill of Exchange, payable to a Perſon or Bearer, is not aſſignable, ſo as to enable the Indorſee to bring an Action, if Payment be refuſed; but when it is made payable to a Perſon or Order an expreſs Power is given thereby to aſſign, and the Indorſee may maintain an Action; and the firſt is a good Bill between the Indorſer and Indorſee.

Carthew's Rep. 460.

224. The Acceptance of a Bill, although after it is become due, is binding to the Acceptants, an Action is maintainable thereon ; the Effect of the Bill being the Payment of the Money, and not the Day of Payment.

2 *Show.* 1.

225. When a Bill of Exchange is accepted, it is good Ground for a ſpecial Action upon the Caſe, but it doth not make a Debt, *&c.*

1 *Salk.* 23.

226. *Indebitatus Aſſumpſit* doth not lie againſt the Acceptor of a Bill of Exchange, becauſe his Acceptance is a collateral Engagement, though it will lie

Ibid. 125.

againſt the Drawer ; and a general *Indebitatus Aſſumpſit* will not lie on a Bill of Exchange for Want of a Conſideration ; and therefore there muſt be a ſpecial Action upon the Cuſtom of Merchants, or an *Indebitatus Aſſumpſit* againſt the Drawer for Money by him received to the Plaintiff's Uſe.

227. In the Caſe of *Bromwich* and *Lades*, it was ſaid by the chief Juſtice *Treeby*, that Bills of Exchange were of ſuch general Uſe and Benefit, that upon an *Indebitat. Aſſumpſit*, a Bill of Exchange may be given in Evidence to maintain the Action ; and by Mr. Juſtice *Powel*, that upon a general *Indebitat. Aſſumpſit*, for Monies received to the Uſe of the *Plaintiff*, ſuch Bill may be left to the Jury to determine whether this was for Value received or not. In this Caſe the Declaration was on the Cuſtom of Merchants, and a general *Indebitat. Aſſumpſit* thereon. See the Declarations and Exceptions to it, in Caſe of *Bellaſis* and *Heſter*, in 1 *Lutwich*, 1589.

228. If a Bill of Exchange is drawn on two or more Perſons in theſe Terms *To Mr.* A, B. *and* C. D. *Merchants*, in London, they oughtboth to accept the Bill; for the Acceptance of only one is not complying with its Tenor, and it ſhould be proteſted; but if it come directed to *A. B.* and *C. D.* or to either of them; or thus, To *A. B.* or in his Abſence to *C. D.* in this Caſe, the Bill being accepted by either, it is ſufficient.

229. Bankers' or Goldſmiths' Notes are not to be accounted Caſh till received. *Luc.* 109. As for Example, *A.* draws a Note upon a Goldſmith, and ſends a Servant to receive the Money, and to inveſt it in Exchequer Bills; the Servant got *B.* to give him Money for the Note, with which he purchaſed the Exchequer Bills ordered; and two Days afterwards the Goldſmith failed; it was adjudged that *A.* muſt anſwer the Money to *B.* as the Property of the Note was not transferred to *B.* there being no Indorſement; and he could not have ſued upon it, it being only in the Nature of a Pledge or Security to him.

It was the received Opinion, and certainly founded on the Cuſtom of Merchants in the City of *London*, that Draughts on Bankers, payable to *A. B.* or Bearer on Demand, ought to be carried for Payment on the very Day they are received, and when it is conſidered that great Part of the Payments for the Purchaſe of Shares in the public Funds or Stocks are paid by the Purchaſers in Draughts upon their Bankers at the Inſtant of making the Transfer of the Stock, I ſtill think it adviſeable to take the Draughts for Payment without Delay, and not to part with the Receipt for the Transfer till the Banker has honoured the Draught.

But in Point of Law, it has been lately ſaid from the Bench, that if the Poſſeſſor of a Draught on a Banker does not keep it longer than *twenty-four Hours* after he receives it, before he tenders it for Payment, and within that Time the Banker ſtops Payment, the Drawer is obliged to pay the Money. The Caſe was as follows. The Plaintiff took the Defendant's Draught on his Bankers, *Brown and Collinſon*; the next Morning they ſtopt Payment, and the Defendant refuſes to give Caſh for his Draught, alledging, that if the Plaintiff had preſented it for Payment as ſoon as poſſible after he received it, the Bankers would have paid it. *Earl Mansfield* obſerved, that the Whole reſted upon Cuſtom; and the Queſtion to be determined was, Whether the Plaintiff was obliged to go to the Bankers on the Day he received the Draught, for if he had, it appeared he would have been paid? His Lordſhip ſaid, it was unreaſonable to ſuppoſe, that a Tradeſman ſhould be compelled to run about the Town with half a Dozen Draughts from *Charing Croſs* to *Lombard Street*, and other Places, on the ſame Day. The Jury were to conſider that *twenty-four* Hours was the uſual Time allowed, and the Plaintiff kept it no longer from being paid, for the next Morning the Town was alarmed by the Bankers ſtopping Payment. The Jury however found for the Defendant.—*Sittings at Guildhall after Eaſter Term*, 1782. And upon a new Trial, the Court of King's Bench confirmed the Verdict.

230. A Note is no Payment where there was an original and precedent Debt due, but ſhall be intended to be taken upon Condition that the Money be paid in a convenient Time; but the taking a Note in Writing for Goods ſold may amount to Payment of the Money, becauſe it is Part of the original Contract. *Mich.* 2 *Ann.* 3 *Salk.* 118.

231. A Servant of Sir *Robert Clayton* and Mr. Alderman *Morris*, but at that Time actually gone from their Service, took up two hundred Guineas of Mr. *Monck*, a Goldſmith (who knew nothing of his being diſcarded) without any Authority from his *quondam* Maſters, who refuſing to ſatisfy Mr. *Monck* for the ſame, he brought an Action againſt Sir *Robert* and Mr. *Morris*, and being tried at *Guildhall*, it was ruled *per Keeling* Chief Juſtice, that they ſhould anſwer, and there was a Verdict for the Plaintiff; and though there were great Endeavours uſed to obtain a new Trial, yet it was denied; the Courts at *Weſtminſter* being fully ſatisfied that they ought to anſwer, for this Servant had frequently received and paid Caſh for them; and they were obliged to comply, and paid the Money.

2 *Vent.* 310. *Witherley* v. *Sarsfield.*

232. A Person who is no Merchant, drawing a Bill of Exchange, makes him within the Custom of Merchants as to that Bill.

1 *Show.* 125.

233. If the Drawer mentions, *for Value received*, he is chargeable at Common Law; but if no such Mention, then you must come upon the Custom of Merchants only.

2 *Vent.* 310. *Carth.* 5. *Show.* 264. *Hawkins* v. *Gardner.*

Carth. 466. Cases *B. R.* 213.

235. Part of a Bill of Exchange cannot be assigned so as to entitle the Indorsee to an Action; if it were otherwise the Party might be vexed with as many Actions as the Holder of the Bill should think fit.

3 *Sal.* 70.

236. It is not necessary to prove a Protest made by a Publick Notary, for that would tend to destroy Commerce, and publick Transactions of that Nature.

Cases *B. R* 346. Cases *B. R.* 380. Ditto, 517.

237. *I promise to pay the Bearer so much Money on Demand*, is no Bill of Exchange, and declaring on the Custom will not make it so.

238. A Goldsmith or Banker's Note, accepted in Payment, shall not be a Payment, if the Party who gave it knew the Goldsmith to be in a failing Condition, for such Knowledge makes it a Fraud.

Williams v. *Harrison.* *Carth.* 160. 3 *Salk.* 197.

239. Infancy pleaded by the Drawer of a Bill of Exchange and held a good Bar, being drawn in the Course of Trade, and not for Necessaries.

Pearson v. *Garret,* 4 *Mod.* 242. *Comb.* 227. *Skin.* 398.

240. An Action was brought upon a Note, for the Payment of sixty Guineas when the Defendant should marry such a Person, in which the Plaintiff declared as upon a Bill of Exchange, setting forth the Custom of Merchants; and it was held, that to pay Money upon such a Contingency cannot be called Trading, and therefore not within the Custom of Merchants; and Judgment was given for the Defendant.

Buller v. *Crips.* 6 *Mod.* 29.

241. A Note was in this Form: *I promise to pay* J. S. *or Order, the Sum of one hundred Pounds, on Account of Wine had of him.* J. S. indorsed it, and the Indorsee brings an Action against the Drawer, and declares upon the Custom of Merchants; and doubted by *Holt* whether Action would lie, and advised with Merchants, who declared that such Notes had been in Use thirty Years, and that they looked upon them as Bills of Exchange, but *Cur. advisare vult.*

Ibid. *Williams* v. *Williams.* Carth. 269.

Holt declared he remembered when Actions on Bills of Exchange first began.

242. A Note drawn by *J. P.* whereby he promised to pay 12*l.* 10*s.* to *J. W.* on a Day certain; and he indorsed the Note for Value received to *D. F.* who indorsed it to the Plaintiff for Value received, who brought an Action against *J. W.* setting forth the Custom of Merchants; *and held the Action lay.*

2 *Geo.* II. Cap. 25. S. 1.

243. By this Statute it is enacted, that if any Person shall forge, or procure to be forged, or assist in forging, any (*inter alia*) Bill of Exchange, Promissory Note for Payment of Money, Indorsement, or Assignment of any Bill of Exchange, or Promissory Note for Payment of Money, or any Acquittance, or Receipt for Money or Goods; or shall utter or publish, as true, any such forged Bill, *&c.* knowing the same to be forged, with an Intent to defraud any Person, every such Offender shall be guilty of Felony without Benefit of Clergy. And,

7 *Ge.* II. Cap. 22.

244. By this Statute, if any Person shall falsly make, alter, forge, or procure to be falsly made, *&c.* or assist in falsly making, *&c.* any Acceptance of any Bill of Exchange, or the Number or principal Sum of any accountable Receipt for any Note, Bill, *&c.* or any Warrant, or Order for Payment of Money, or Delivery of Goods, or shall utter or publish any such false Acceptance, Bills, *&c.* with Intent to defraud any Person; every such Offender shall suffer as a Felon, without Benefit of Clergy.

Notwithstanding these positive Laws, the absurd and mischievous Custom of making inland Bills payable to fictitious Persons; that of one Person indorsing another's Name; and even drawing in feigned Names had prevailed so generally, and got to such a Height, probably from an Idea that an Indictment for Felony would be easily quashed, upon proving that no Fraud was intended—as to make it necessary to proceed with the utmost Caution, and at the same Time with becoming Firmness in the Courts of Law, to support the Honour and Credit

dit of mercantile Tranſactions within the Realm, and the Dignity of the Legiſlature, whoſe Statutes were thus openly violated with Impunity.

From the Rule in Law therefore, that in an Action againſt a Drawer or Acceptor of a Bill, payable to Order, there muſt be Proof of the Signature of the firſt Indorſer, and of all thoſe to whom an Indorſement has been ſpecially made: has ariſen the Queſtion which has ſo long agitated the commercial World on the Subject of *Indorſements, in the Name of fictitious Payees.* *Kyd.* p. 137.

A BILL payable to the Order of a fictitious Perſon, and indorſed in the fictitious Name, is not a Novelty among Merchants and Traders. A Caſe of that Kind appears to have been brought to Trial upwards of twenty Years ago. It was an Action by the Indorſee againſt the Acceptor of a Bill of Exchange, payable to *Butler* and Co. and their Order, and indorſed in that Name. The Plaintiff was ſo far from proving it to have been indorſed by any Perſons uſing that Firm, that his own Witneſſes ſaid, they believed it was indorſed by *Cox*, the Drawer. It alſo appeared, that there was a Houſe of *Butler* and Co. with whom *Cox* had Dealings; but it was proved that the Bill in Queſtion, had never been in their Hands; it was admitted that the Bill was a true one, and the Defendant had regularly accepted it; it appeared further, that the Acceptor had *expreſsly promiſed to pay*, at the Time the Holder had diſcounted the Bill; but it was inſiſted, that the Indorſement being fictitious, the Plaintiff had failed in making out an eſſential Part of his Title. *Lord Mansfield* obſerved, that the intent of the Bill was only to enable *Cox* to raiſe Money, and the reaſon why it was not made payable to his Order, was, that there were other Bills payable at that Time to his Order, and if this had been ſo too, there would have been too many in the ſame Name in Circulation at the ſame time, which would have had the Appearance of *fictitious Credit*; that Names were often uſed of Perſons who never exiſted: the Defendant, by his Acceptance, and promiſing expreſsly to pay the Bill, had enabled *Cox* to put it in Circulation, and having ſo done, he ſhould not avail himſelf of an Objection that the Plaintiff had not completely made out his Title. *Stone* v. *Freeland*, *B. R.* Sittings at Guildhall after *Eaſter* Term, 1769.

But in the Years 1786, 1787, and 1788, two or three Houſes, connected together in Trade, entering into Agreements far beyond their Capitals, and apprehending that the Credit of their own Names would not be ſufficient to procure Currency to their Bills, adopted, in a very extenſive degree, a Practice, which before had been found convenient on a ſmaller Scale. So long as the Acceptors or Drawers could either procure Money to anſwer their Bills, or had Credit enough with the Holder to have them renewed, the Subjects of theſe fictitious Indorſements never came in Queſtion. But when the Parties could no longer ſupport their Credit, and a Commiſſion of Bankruptcy became neceſſary, the other Creditors felt it their Intereſt to reſiſt the Claims of the Holders of theſe Bills, and inſiſted that they ſhould not be admitted to prove their Debts; becauſe they could not comply with the general Rule of Law, which requires Proof of the Hand-writing of the *firſt* Indorſer. The Queſtion came before the Lord Chancellor by Petition: He directed Trials at Law, and ſeveral have been had: Three againſt the Acceptors in the King's Bench, and one againſt the Drawer in the Common-Pleas; though not all expreſsly by that Direction.

In the firſt Caſe againſt the Acceptor, beſides the general Counts for Money *paid* by the Plaintiff to the Defendant's Uſe, and *Money had and received* by the Defendants to the Plaintiff's Uſe, there were alſo two ſpecial Counts laid on the Bill itself. The firſt was in the Terms of the Bill—"that the Defendant and others drew a Bill of Exchange on the Defendant, payable to *Grigſon* and Co. or Order, three Months after Date, which the Defendant accepted; and that *Grigſon* and Co. indorſed it to *Lewis* and *Potter*, who indorſed it to the Plaintiff. "The ſecond Count ſtated it to be, "a Bill drawn as above in Favour of certain Perſons trading under the Firm of *Lewis* and *Potter*, or Order, and indorſed by *Lewis* and *Potter* to the Plaintiffs." The Circumſtances proved at the Trial were theſe—That there was a Houſe of Trade at *Nottingham* under the Firm of *Harris*, *Harries* and *Plant*, of which the Defendant was one of the Partners; and that the Defendant *alone* carried on Buſineſs in *Wood-Street*, and reſided in *London*; that the Body of the Bill, as well as the Signatures of the Drawers and Acceptors, were in the *Hand-writing* of the Defendant; *Tatlock* v. *Harris*. 3 Term Rep.

that no ſuch Houſe of Trade as that of *Grigſon* and Co. was concerned in the Tranſaction, but that the Defendant had drawn the Bill payable to *Grigſon* and Co. at the Requeſt of *Lewis* and *Potter*; that the Indorſement in the Names of *Grigſon* and Co. was fictitious, and that before the Bill came due, the Defendant knew that to be the Caſe; but it did not expreſsly appear, whether he knew it, at the Time the Bill was drawn: that the Indorſement of *Lewis* and *Potter* was in the Hand-writing of one of the Partners of that Houſe, and that they received the Bill from the Defendant and delivered it to the Plaintiffs: that the Value of the Bill was paid to the Houſe of *Lewis* and *Potter* in Draughts on Bankers, which were afterwards paid in Caſh; and that the Defendant had Credit given him in Account with *Lewis* and *Potter* for the Value of the Bill.

To this Evidence, the Defendant's Counſel *demurred*, as not ſupporting any Count in the Declaration.

Lord Kenyon, in giving the Opinion of the Court, ſaid, that in deciding this particular Caſe, they did not wiſh to have it underſtood that they meant to infringe on the Rule as applicable to Caſes in general; for that generally ſpeaking, there was no Doubt but the Indorſee of a Bill of Exchange, payable to Order, muſt in deriving his Title, prove the Hand-writing of the firſt Indorſer. But that this Deciſion proceeded on the ſpecial Circumſtances of this particular Caſe; that the Defendant, at the Time of entering into this Engagement, knew that there were no ſuch Perſons as *Grigſon* and Co. and, therefore, that in Point of formal Derivation of Title, that which is uſually done, could not be done in this Caſe. That on the firſt Count of this Declaration, the Opinion of the Court did not proceed, neither was it neceſſary to ſay anyThing on the ſecond; though if it had been neceſſary to reſort to that, he himſelf had an Opinion on it. But the Counts on which the Judgement of the Court was given, were thoſe for *Money paid* and *Money had and received*. In Lord Chief Juſtice *Raymond's* Time it had been decided, that a general *Indebitatus Aſſumpſit* might be maintained to recover Money for the Value of a Bill of Exchange, which was not paid. That Caſe, indeed, had been on a Bill payable to Bearer; but the Doctrine of that Caſe was a ſufficient Foundation for the Opinion of the Court in the preſent, and had been recognized in a ſubſequent Caſe, by each of the Judges of this Court. "That to give ſuch a Bill is, as it were, an Aſſignment of ſo much Property, which becomes Money had and received, to the Uſe of the Holder of the Bill." Here the Defendant, being a Debtor to the Houſe of *Lewis* and *Potter*, drew a Bill, which he delivered to them, and drew it in Terms, which could not be proved in a formal Manner: he was not only privy to the Tranſaction, but the very Negociator of it; and by drawing it, put himſelf into a *Situation* to pay, what he was in Conſcience *bound* to pay; therefore it was an Appropriation of ſo much Money to be paid to the Perſon who ſhould become the Holder of the Bill.

Grant v. *Vaughan.*

Vere v. *Lewis* In the next Caſe, the firſt Count ſtated the Bill of Exchange to be drawn by *Liveſay* and Co. on the Defendants in favour of *Lawrence Aſhworth*, who was alſo a fictitious Perſon, and by him indorſed to the Plaintiffs. The ſecond Count ſtated the Bill to be payable to the *Bearer*; the third payable to the Order of the Drawers, and indorſed by them to the Plaintiffs; then followed the Money Counts. An Attempt was made on Behalf of the Defendants, to diſtinguiſh this Caſe from the former, becauſe there was no Evidence that in Point of Fact, they received any Value for the Bill, and that therefore, they could not be liable on the Money Counts. But the Court ſaid, that the Acceptance of the Defendants was alone Evidence that they had received Value from the Drawers, and that on the Demurrer to Evidence, the Court might draw the ſame Inference which would have been drawn by the Jury. Three of the Court alſo *thought*, that the Plaintiffs might recover on the ſecond Count, which ſtated the Bill as drawn payable to *Bearer*.

Minot v. *Cibſon.* The next Caſe was againſt the Acceptor, having alſo a Count in which the Bill was ſtated to be drawn payable to *Bearer*; and the Court being of Opinion that it was decided by the foregoing, gave Judgement for the Plaintiff without hearing any Argument, and added, they underſtood it had been agreed to turn it into the Shape of a ſpecial Verdict, that it might be carried up to the Houſe of Lords. On the Authority of theſe two laſt Caſes againſt the Acceptor in the King's Bench,

was decided the Caſe againſt the Drawer in the Common Pleas, the Circumſtances of which we ſhall here recite.

Collins v. *Emett.*

The Plaintiff ſtated that the Defendant, on the 5th of *April* 1788, drew a Bill of Exchange, directed to *Liveſay* and Co. by which he required them, three Months after Date, to pay to *Mr. George Chapman* or *Order* 1551*l.* Value Received, and delivered the ſaid Bill to them, and "authoriſed them to negociate and indorſe the ſame, in the Name of *George Chapman*, and thereby to raiſe Money thereon," for the Uſe of the ſaid Perſons ſo uſing the Names, Stile, and Firm of *Liveſay* and Co. and then averred, that when the ſaid Bill was ſo made as aforeſaid, or at any Time afterwards, "there was no ſuch Perſon as *George Chapman*, the ſuppoſed Payee in the ſaid Bill of Exchange, but that the ſaid Name was merely fictitious," to wit, at *London*, &c. which ſaid Bill of Exchange afterwards, to wit, *&c.* by one "*Andrew Goodrick*, being a Perſon thereunto in that behalf lawfully authorized by *Liveſay* and Co. upon Sight thereof was accepted," according to the Uſage and Cuſtom aforeſaid. And the ſaid Perſons ſo uſing the Names of *Liveſay* and Co. being ſo authorized as aforeſaid, afterwards and before the Payment of the Sum of Money therein contained, or if any Part thereof, and before the Time thereby appointed for ſuch Payment, to wit, *&c.* "negociated and indorſed the ſaid Bill of Exchange, in and with the Name of the ſaid *George Chapman*, and by that Indorſement, in the Name of the ſaid *George Chapman* appointed the Contents of the ſaid Bill of Exchange to be paid to the ſaid Plaintiffs, and thereby raiſed Money thereon, for the Uſe of the ſaid Perſons ſo uſing the Names, *&c.* of *Liveſay* and Co." and then and there delivered the ſaid Bill of Exchange ſo indorſed to the ſaid Plaintiffs, "who thereupon on the Credit thereof, advanced to the ſaid Perſons," ſo uſing the Name, *&c.* of *Liveſay* and Co. the Sum of Money in the Bill mentioned.

The Circumſtances ſtated in a ſpecial Verdict on this Caſe were theſe, that *Emett*, who was a Partner with *Liveſay* and Co. in the ſpinning of Cotton at *Clithero*, wrote his Name on a Blank Piece of Paper, with a Shilling Stamp on it; and delivered it to *Liveſay* and Co. for the Purpoſe of drawing a Bill of Exchange, for ſuch Sum, payable at ſuch Time, and to ſuch Perſon or Perſons as they ſhould think fit.

That *Liveſay* and Co. on the 5th of *April*, 1788, drew on this Paper, above the Name of *Emett*, a certain Writing, directed to *Liveſay* and Co. in Words and Figures following, *viz. Clithero*, *April* 5th. 1788, 1551*l.* "Three Months after Date, pay to Mr. *George Chapman* or Order, Fifteen hundred and fifty one Pounds, value received, as adviſed, *John Emett*." That the Occaſion and Manner of giving this Paper Writing were as follow: on the fifth of *April*, *Liveſay* and Co. were indebted to *Thomas Jeffery* in the Sum of 1512*l.* 9*s.* on a Bill of Exchange, which became due that day, and which had been previouſly given for Goods ſold by *Jeffery* to them. One *Richard Collis*, Clerk to *Jeffery*, on that Day applied to the Houſe of *Liveſay* and Co. for Payment of that Bill: he there ſaw *Anſtie*, one of the Partners, who informed him, that they could not conveniently then pay the Money, but requeſted him to take a Bill on their Houſe for the Sum, at three Months Date, and the Intereſt in the mean Time, and gave him the Blank above-mentioned, with the Name of *Emett* written on it, to be filled up by one of the Clerks of the Houſe.

That one *Ludlow* a Clerk to *Liveſay* and Co. filled up the Paper, in the Manner as above ſet forth, that immediately afterwards it was carried to *Andrew Goodrick* another Clerk of the Houſe, who was authoriſed by *Liveſay* and Co. to accept it, which he accordingly did, in the Names of *Liveſay* and Co. that with the Authority of *Liveſay* and Co. the Name of *George Chapman* was then indorſed on the ſaid Paper Writing, which being ſo filled up, accepted, and indorſed was then delivered to the ſaid *Collis*, who then delivered up the Bill for 1512*l.* 9*s.* to the ſaid *Liveſay* and Co. That the ſaid *Thomas Jeffery* afterwards negociated the ſaid Paper Writing with the Plaintiffs, and received the full Amount from them, only deducting a Diſcount at four and a half *per Cent.* and delivered the ſame to the ſaid Plaintiffs. That the ſame was duly preſented for Payment to *Liveſay* and Co. who refuſed to pay it, of which *Emett* had due Notice. That

there was no ſuch Perſon as *George Chapman*, the ſuppoſed Payee of the ſaid Paper Writing, being merely fictitious: That *Emett* gave no further or other Authority than as before ſet forth, and knew nothing of this Tranſaction; That the Plaintiffs had then no Knowledge, that the ſaid *George Chapman* was a fictitious Perſon, or of the Circumſtances under which the ſaid Paper Writing was drawn, accepted and indorſed; but that the ſaid *Thomas Jeffery* had full Knowledge of the whole of the ſaid Tranſactions.

In the pronouncing the Judgment of the Court of Common-Pleas on this Caſe, Lord *Loughborough* ſaid, the ſpecial Circumſtances above ſtated in the Declaration would, in his Opinion, have been ſufficient to have entitled the Plaintiff to recover, if the Caſe ſtated in the ſpecial Verdict had not in two or three Inſtances, varied from them.

The Caſe of *Minet* and *Gibſon* has been argued before the Houſe of Lords, and now waits the Opinion of the Judges. The Circumſtances ſtated in the ſpecial Verdict are theſe:

Liveſay and Co. made a certain Inſtrument in Writing directed to the Defendants, requiring them, three Months after Date to pay to *J. White* or Order, 721*l.* 5*s.* *Liveſay* and Co. knew, at the Time of making it, that no ſuch Perſon exiſted as *J. White*, mentioned in the Bill; an Indorſement in Writing was afterwards made by *Liveſay* and Co. purporting to be the Indorſement of *J. White*, and requiring the Contents of the Bill to be paid to *Liveſay* and Co. or their Order: *Liveſay* and Co. afterwards indorſed, by *A. Goodrick*, by Procuration of *Liveſay* and Co. to the Plaintiffs for a full and valuable Conſideration, when the Plaintiffs became the Holders of the Bill; the Defendants afterwards accepted, with the full Knowledge that no ſuch Perſon as *J. White*, mentioned in the Bill, exiſted, and that the Name of *J. White*, ſo indorſed thereon, was not in the Hand-writing of any Perſon of that Name. The Defendants at the Time of making and accepting the Bill had not, nor had they at any Time ſince, any Money, Goods, or Effects, of or belonging to *Liveſay* and Co. or of the Plaintiffs in their Hands.

Beſide the Money Counts, the Declaration contained ſeven ſpecial Counts on the Bill. The firſt, ſtated that *Liveſay* and Co. made a Bill of Exchange, directed to the Defendants, requiring them, three Months after Date, to pay 721*l.* 5*s.* to *John White*, or Order; *Liveſay* and Co. well knowing that no ſuch Perſon as *J. White* exiſted; on which Bill an Indorſement was made, purporting to be the Indorſement of *J. White* named in the Bill, requiring the Contents to be paid to *Liveſay* and Co. or Order; that *Liveſay* and Co. by one *Abſalom Goodrick*, by Procuration of *Liveſay* and Co. indorſed to the Plaintiffs, and that the Defendants accepted it; knowing that no ſuch Perſon as *J. White* exiſted, and that the Name of *J. White*, ſo indorſed, was not the Hand-writing of any Perſon of that Name.

The ſecond Count, after ſtating the Drawing of the Bill as in the firſt, proceeded thus; *Liveſay* and Co. knowing that *J. White* was not a Perſon dealing with or known to *Liveſay* and Co. and uſing the Name of *J. White* on the Bill as a nominal Perſon only, and intending not to deliver the ſame to him, or to procure the ſame to be actually indorſed by him: on which Bill a certain Indorſement was made, requiring the Payment to be made to *Liveſay* and Co. and that *Liveſay* and Co. indorſed to the Plaintiffs, without having delivered the Bill to *J. White*, and without any actual Indorſement or Aſſignment of the Bill by *White*.

The third Count ſtated, that the Bill was made payable to themſelves, *Liveſay* and Co. by the Name and Deſcription of *J. White*.

The Fourth, treated it as a common Bill, payable to *J. White*, or Order, and ſtated that *J. White* indorſed it to the Plaintiffs.

The Fifth, as payable to Bearer, and that the Plaintiffs were the Bearers.

The ſixth payable to *J. White*, or Order, with an Averment that, when the Bill was made, there was no ſuch Perſon as *J. White*, the ſuppoſed Payee, but that Name was merely fictitious; by Reaſon whereof the Sum mentioned in the Bill became and was payable to the Bearer thereof; according to the Effect and Meaning

Meaning of the Bill, averring alſo; that the Plaintiffs were the Bearers and Proprietors thereof.

The Seventh Count ſtated, that there was a Partnerſhip, or Houſe, of certain Perſons uſing Trade, as well in the Name and Firm of *Liveſay* and Co. as in the Name and Firm of *J. White*; that the laſt-mentioned Perſons made a certain other Bill, the Hand of one of them on their joint Account, and in their Copartnerſhip Name and Firm of *Liveſay* and Co. being thereto ſubſcribed, and directed it to the Defendants, requiring them, three Months after Date, to pay to the ſaid laſt-mentioned Copartners, by the Name of *J. White*, or Order; 721*l*. 5*s*. and that the ſaid laſt-mentioned Copartners afterwards, by a certain Indorſement in Writing, appointed the Contents to be paid to the Plaintiffs, and delivered the Bill, ſo indorſed to them.

One Obſervation naturally preſents itſelf to the Mind on the Inſpection of this Record: The two firſt Counts ſtate in Subſtance, all the Circumſtances found by the ſpecial Verdict, yet Judgement was given for the Plaintiffs, not on one of theſe, but on the fifth Count, which ſtates the Bill as payable to Bearer: It appears ſingular, that a Court of Juſtice ſhould decide, that a Man ſhould have a Right to recover on a general Count, ſupported by ſpecial Circumſtances given in Evidence, and that theſe very Circumſtances, when ſtated ſpecially on the Record, ſhould not be conſidered as ſufficient to ſuſtain the Action.——It ſeems impoſſible to account for this apparent Inconſiſtency in any other Way than by adverting to the Declaration in the Caſe of *Vere* and *Lewis*, and the Judgement given upon it; in that, there is no Count which ſtates the Circumſtances ſpecially; but the Court being of Opinion, that the Plaintiff was entitled to recover, thought the Count which ſtates the Bill as payable to Bearer, was a ſufficient Foundation for their Judgement, and a like Count appearing in the Caſe of *Minet* and *Gibſon*, they gave Judgement on that, without adverting to the two Counts, which ſtated the ſpecial Circumſtances of the Caſe.

This Inconſiſtency being pointed out by the Counſel for the Plaintiff in Error, in the Houſe of Lords, as one Ground of impeaching the Judgement of the Court below, it was obſerved in Anſwer, that there being in Fact, but one Cauſe of Action, the Plaintiff could have Judgement only on one Count, and conſequently Judgement was neceſſarily entered for the Defendant on all the reſt; and if upon the whole Record there appeared a ſufficient Cauſe of Action, but the Judgement was entered on the wrong Count, the Court of Error would rectify it.

Independently of the Rule which requires the Proof of the Hand-writing of the firſt Indorſer, one preliminary Objection has been made to the Holder's Right of Recovery in any Form of Action againſt the Drawer or Acceptor: The very Act of indorſing on a Bill, a Name which belongs to Nobody, is, it is ſaid, in itſelf a *Felony*; it has a general Tendency to defraud, though the Fraud be pointed againſt no particular Individual; and in all Caſes which have ariſen, has actually defrauded the Holder of the Bill, by impoſing on him the Idea of a Security which does not exiſt. The Act too of ſending the Bill into Circulation with a fictitious Name on it, it is ſaid, is a Felony in him, who is privy to the Tranſaction.

Whether each or either of theſe Acts be in Reality a Felony, admits of conſiderable Doubt, and is one Point "On which the Opinion of the Judges is required by the Houſe of Lords." Should that Opinion be given in the Affirmative, the Advocates on the Part of the Defendant to the Action inſiſted, that the Holder of the Bill could not recover againſt either the Drawer or the Acceptor, becauſe he could not make Title, through the Medium of a Felony in another: a Felony contaminates a Tranſaction, and the Civil Remedy is completely merged in it, by the Policy of the Law, to prevent, as much as poſſible, Crimes from going unpuniſhed.

The Caſe of *Peacock* and *Rhodes*, they ſaid, could not be cited in Oppoſition to this Doctrine; for in that Caſe, the Bill having been regularly indorſed by the Payee, and having, though after having been ſtolen, come to the Hands of the Plaintiff for a good Conſideration, he was only under the Neceſſity of proving the Hand-Writing of the firſt Indorſer, and was not bound to make any Part of

his Title through the Perſon who ſtole the Bill: But here the Plaintiff deriving his Title through the Indorſement which was a Forgery, was neceſſarily barred of his Action. To this it was anſwered, that this Propoſition with reſpect to the Effect of the Felony was not true to ſuch an Extent; it was true indeed, that a civil Action could not be maintained, where the Cauſe of Action was grounded wholly on an Act of Felony; as if one ſtole a Horſe or Money, the Owner could not maintain Trover, or Money had and received againſt him, becauſe the civil Remedy was merged in the Felony; If the Horſe came into the Hands of another Perſon, under Circumſtances which would not amount to a Change of Property, the original Owner might recover him from that Perſon; though, therefore, the Felony might be an Anſwer to an Action againſt either the Drawer or Acceptor, where it appeared the Defendant was guilty of the Felony; yet that would not preclude the Plaintiff from recovering againſt the other, if he did appear to be guilty.

The Advocates on the other Side of the Queſtion in the Houſe of Lords, profeſſing not to impeach the Judgement of the Common-Pleas, in the Caſe of *Collins* and *Emett*, in which the Defendant was perfectly innocent of the ſuppoſed Felony, were ſatisfied to maintain, that where the Fact of the Felony could be fixed on the Defendant, that was a Bar to a civil Action.

In a Tranſaction of this Kind, it is apprehended, that, whoever in Fact makes the fictitious Indorſement, both the Drawer and Acceptor muſt in general be guilty of publiſhing the Bill with that Indorſement on it, knowing it to b efictitious.

In ſuch a Caſe, whether this amounts to a Felony, is certainly a preliminary Queſtion; for, though independently of that Queſtion, the Plaintiff might be intitled to recover, yet if in Fact, it ſhall be decided to be Felony, he muſt neceſſarily be precluded from his Action, becauſe if he were to recover at all, he muſt recover againſt the Felon himſelf.

But it may happen that the Acceptor may not know that the Bill he accepts, is attended by any Circumſtance different from thoſe attending Bills in the uſual Courſe of Buſineſs; as where the Bill is brought him for Acceptance by a third Perſon, either before the Indorſement is made or afterwards, without Intimation of the Payee's being fictitious: The Drawer too, even in common Caſes, may be ſo far unaffected with the Felony, that he may not be guilty of publiſhing the Bill with a falſe Indorſement on it, knowing it to be falſe, for it may be carried out of his Hands before the Indorſement is made: and in ſome Caſes, as in that of *Collins* and *Emett*, the Perſon appearing as the Drawer may be perfectly ignorant of the Tranſaction.

In any of theſe Caſes therefore, in which the Defendant may appear to have acted without Knowledge of the Circumſtances, the Queſtion of Felony cannot be conſidered as preliminary to the Deciſion on the Plaintiff's Right of Action: If the Adherence to the Rule which requires Proof of the Hand-writing of the firſt Indorſer, be ſo rigid, that the Plaintiff can in no Form of Action recover without it, that is, of itſelf ſufficient without the Intervention of the Felony: If an Action in any Form can be ſuſtained, in which that Rule may be diſpenſed with, then it is not through the Felony that the Plaintiff derives his Title, and conſequently he cannot be affected by the Deciſion of that Queſtion.

If this reaſoning be well founded, it follows that whatever that Deciſion may be, the general Queſtion is ſtill open to Diſcuſſion; if in the Affirmative, then in thoſe Caſes only where the Defendant is innocent; if in the Negative, then in all Caſes.

In Support of the Judgement on the fifth Count, which ſtates the Bill as being drawn payable to Bearer, it has been urged that in ſtating an Agreement or a Deed in pleading, it is ſufficient to ſtate the legal Operation of it, though there might be a verbal Variance between that and the Inſtrument itſelf: as where a Leaſe is made jointly by *B.* Tenant for Life of *C.* and him in Remainder or Reverſion, in Fee; during the Life of C. this may be ſtated as the Leaſe of Tenant for Life, and the Confirmation of him in Remainder or Reverſion; that being then the legal Operation of the Deed: and, for the ſame Reaſon, after the Death of *C.* it may be ſtated as the Leaſe of the Perſon in Remainder or Reverſion, and the Confirmation of *B.*

So

So here, it was ſaid, though the Bill appeared on the Face of it, to be payable to Order, yet as no Body exiſted who could give ſuch Order, the Engagement muſt be to pay the Bill, which was, in Effect, to render it payable to the Bearer.

If, however, Recourſe muſt be had to the Intention of the Parties, it would ſeem that it is only in the Caſe of a blank Indorſement in the Name of the fictitious Payee, that the Bill muſt be conſidered as in Effect payable to Bearer; where the Indorſement is ſpecial, as it was in the preſent Caſe, the Intention to be attributed to the Parties is, that it ſhould be payable to the Order of him to whoſe Order it is made payable by the fictitious Indorſement, and then the third Count would have been better adapted to ſupport the Judgment than the fifth.

But it was objected that this Argument was not applicable to the preſent Caſe; for though it muſt be admitted that a Deed nuſt be ſtated according to it's legal Operation; yet that Operation muſt appear on the Face of the Deed itſelf, without any collateral Circumſtances to explain it, contrary to the evident meaning of the Words.

With reſpect to the joint Leaſe of Tenant for Life, and him in Remainder or Reverſion, if the ſeveral Intereſts which they had in the Land did not appear in the Deed, yet the operative Words of the Leaſe were not of that fixed and determinate meaning that they could not admit of a different Conſtruction, if collateral Circumſtances require it, in Order to give them Effect: But the Words "payable to Order" and "payable to Bearer" were ſo peculiarly appropriated to the diſtinct Species of Bills in which they were reſpectively uſed, that the one could by no Poſſibility be conſtrued to mean the other.

A ſtill ſtronger Objection to the Judgment's being ſupported on this Count, ariſes from a Queſtion put to the Counſel by the Lord Chancellor, whether an Action could be maintained on this Bill againſt an Indorſer. That an Action may be maintained againſt an Indorſer of ſuch a Bill can admit of no Doubt: It is from the Frame of it payable to Order, and transferable by Indorſement: and in an Action againſt an Indorſer, no Queſtion could ariſe about the fictitious Payee, hecauſe, as will be ſeen hereafter, in that Action the Plaintiff derives no Part of his Title, through any of the Parties to the Bill who proceeds the Defendant: But a Bill payable to Bearer, being transferable by Delivery, cannot regularly be indorſed; and it ſeems, from the Queſtion, to have been ſuppoſed that no Action could be maintained againſt the Indorſer; though no Doubt was entertained but that it might, even when it was held that a Bill payable to Bearer could not be the Subject of an Action by the Indorſee, againſt the Acceptor or Drawer. If therefore, the Judgment were affirmed on this Count, it would follow that the ſame Inſtrument muſt, in one Caſe, be conſidered as a Bill payable to Bearer, and in another, as a Bill payable to Order, both of which it cannot be: But the Difficulty ſuggeſted with Reſpect to the Period when the Bill ſhall be ſaid to ceaſe to operate as payable to Bearer, and aſſume the Character of a Bill to Order, admits of an eaſy Solution: As againſt the Drawer and Acceptor it operates as the one; as againſt the Indorſer, it operates as the other.

So general ſeems to be the Opinion that there ought to be a ſtrict Adherence to the Rule which has given riſe to this Queſtion, that the Count which ſtates the Bill in it's own Terms, appears to have been abandoned on all Sides: The Plaintiff's Counſel in the Caſe of *Tatlock* and *Harris* abandoned it; the Advocates on the ſame Side in the Houſe of Lords abandoned it: The Court of King's-Bench profeſſed, that on it their Opinion did not proceed; and the Lord Chancellor in his Addreſs to the Houſe on the Subject of the Queſtions to be referred for the Opinion of the Judges, ſeemed to think it could not be ſupported by the ſpecial Verdict.

One general Objection was made to all thoſe Counts which were founded on the Bill itſelf: It is only in Favour of the Cuſtom of Merchants that the Practice is founded of declaring on thoſe Inſtruments as Specialties, and if ſuch a Bill was not within the Cuſtom of Merchants, then the Plaintiffs could not recover on thoſe Counts: That ſuch a Bill was not within the Cuſtom of Merchants, it was argued, appeared from this; that in no Book on the Subject was there to be found any Alluſion to a Bill of this Kind; the Uſage had provided, and the Law had acknowledged two Sorts of Bills, which were ſufficient to anſwer every Purpoſe of Trade, where the Parties had no ſiniſter View; if it was wiſhed to facilitate the

Circulation of the Bill, it might be made payable to Bearer; if to confine it within certainLimits, it muſt be made payable to Order; but this was a new Invention to enable Men to raiſe Money by a Fraud, and it could not be pretended, that this was within the Cuſtom of Merchants.

To this it was anſwered, that the Cuſtom of Merchants is not to be confined to thoſe Particulars which are to be found in any mercantile Book; nor is the Novelty of the Thing a ſufficient Reaſon to reject it; it had not been doue all at once; that every Thing which makes a Part of the Law and Cuſtom of Merchants at this Day, was eſtabliſhed: it was not without conſiderable Struggles that Bills, payable to Bearer; obtained the ſame Privileges as thoſe payable to Order: new Facts laid the Foundation of new Rules; and unleſs the Deciſion on the Queſtion of Felony could preclude all further Diſcuſſion, there could be to Inconvenience in its being determined now for the firſt Time, that where a Bill was drawn in the Name of a fictitious Payee, and accepted, the Drawer and Acceptor ſhould by the Cuſtom of Merchants, be anſwerable for the Money to a Holder by a fair Conſideration.

That ſuch a Holder, in ſubſtantial Juſtice, ought to recover againſt either the Drawer or the Acceptor, there can be nò Doubt: He has parted with his Property, on the Faith of their Security; and it is not very gracious in them to tell him, that becauſe, by their Contrivance perhaps, he has one Security leſs than he ſuppoſed, he ſhall not have the Advantage of thoſe which really exiſt.

Such is the Subſtance of the Arguments on both Sides of this important Cauſe, and as far as I can recollect, the Points propoſed for the Opinion of the Judges are theſe *.

Firſt, Whether the Publication of the Bill by the Defendant with the fictitious Indorſement on it, he knowing at the Time that it was fictitious, amounts to a Felony?

Secondly, if that be not Felony, whether the Facts found by the ſpecial Verdict ſupport the Judgment on the Count, which ſtates the Bill as payable to Bearer?

Thirdly, if Judgment on that Count cannot be ſupported, whether it can be ſupported by any other Count founded on the Bill as a Specialty?

Fourthly, Whether on any of the other Counts which ſtate all the particular Circumſtances of the Caſe, the Plaintiff be entitled to recover?

It was alſo ſuggeſted by the Lord Chancellor, that if on the firſt Point, the Opinion of the Judges ſhould be in Favour of the Defendant in Error, and on the others againſt him, another Queſtion might not ſtill be conſidered, whether, when the Defendant to the Action was privy to the Fraud, the Plaintiff might not recover in an Action of Deceit?

245. LETTERS OF CREDIT being a Species of Bills of Exchange, and equally binding with them, I ſhall ſpeak of them under this Head, as the proper Place for it; and preſume it will be needleſs to counſel my Readers to be very circumſpect in giving them, as their Honour and Credit is as much concerned for the punctual Re-payment of whatever Sums are advanced in Conſequence thereof, as they would be for the Diſcharge of a Bill of Exchange.

246. Theſe Letters are of two Sorts, *viz.* *General* and *Special*, and both given to furniſh travelling Perſons with Caſh as their Occaſions may require; they are commonly open or unſealed, and contain an Order from the Writer to his Correſpondent or Correſpondents, to furniſh the Bearer with a certain Sum, or an unlimited one; and the Difference between them is, that the former is directed to the Writer's Friends at all the Places where the Traveller may come (though it is not cuſtomary to give ſeparate Letters to each Place) and the other directed to ſome particular one; obliging himſelf for the Re-payment of whatever Monies ſhall be advanced in Compliance with the Credit given, on producing a Receipt or a Bill of Exchange, which he thinks proper to have, from the Perſon credited.

247. If any Money is advanced on either Species of theſe Letters and Bills of Exchange given for the Sum on the Perſon who wrote them, he is obliged to accept and pay the ſame; and in Caſe of Refuſal he may be compelled thereto, rather

* *Kyd* on the Law of Bills of Exchange, 8vo. *London*, 1790. A moſt valuable Tract, as it includes the Arguments in the lateſt Caſes decided by our Courts of Juſtice.

rather than the Drawer, as the Remitter in the Loan of his Caſh had more Regard to his Correſpondent's Sufficiency than the Drawer's, whom it is probable he knew nothing of; therefore, in this Reſpect, the Perſon giving the Credit is to be reputed as the Drawer,

248. And as the Giver of theſe Letters is ſo obliged for the punctual Repayment of the Money advanced, I repeat that he ought to be very cautious to whom he gives them, more eſpecially thoſe without Limitation, as, in the Hands of a diſhoneſt Perſon they may prove his Ruin; and as it is hardly poſſible that he that requeſts the Credit ſhould be ignorant of what Caſh he ſhall want, at leaſt with a little Difference, I think the Compliment, for it can be nothing elſe, of an unbounded Credit ſhould be excuſed, being really of no Service either to him that pays, or him that receives it.

249. Advice by Poſt ſhould always follow a Letter of Credit, and Duplicate of it accompany ſuch Advice; and it would be prudent therein to deſcribe the Bearer, with as many Particulars as poſſible, for Fear he ſhould loſe, or be robbed of his Credentials, and a Stranger reap the Effects of them. Theſe Letters are wrote in various Forms, and though a Copy may be ſuperfluous to moſt of my Readers, yet the Proſpect of its being ſerviceable to ſome few, I hope, will plead my Excuſe for adding it here.

S I R, *London*, the 3d of *January*, 1791,

THIS is deſigned to accompany (*or kiſs your Hands by*) Mr. *John Steevens*, and to requeſt your furniſhing him with a thouſand Doliars of your Money (*or with as much Caſh as he ſhall require of you, if you give an unlimited Credit*) for which pleaſe to take his Bills on me, or on any other he ſhall think proper to draw them; and I do hereby oblige myſelf for the punctual Diſcharge, and remain,

Sir, your moſt humble Servant,

To Mr. Thomas Richardſon, *Merchant, in* Leghorn. W. B.

250, The Time of paying Bills is always ſettled between the Drawer and Remitter, ſometimes on a certain fixed and appointed Day, or at Sight, or ſo many Days after Sight, or ſo many Days, Weeks, or Months after Date; at Uſance, half Uſance, Uſance and half, and two or three Uſos or Uſances.

251. A Bill payable at a certain Day, is due on the Day mentioned, according to the Stile of the Place it is drawn on, not where it is drawn from; ſo that a Bill from *Amſterdam*, made payable at *Hamburgh* on the laſt Day of *November*, is to be underſtood that Day of *Old Stile*, and *vice verſa* for a Bill drawn in the ſame Manner from *Hamburgh* to *Amſterdam*,

252. If Bills are made payable at ſome Days after Sight, their Acceptance is dated on the Day they are preſented, and from thence the Days of their running are counted; but, if they are made payable at Sight, they are to be ſatisfied without any Days of Grace to be allowed.

253. If a Bill be made payable ſome Weeks after Date or Sight, the Weeks muſt be reduced into Days, and in counting theſe, the Almanack ſhould be conſulted; and if a Bill is drawn to be paid one or two Months after Sight or Date, then the Day of Payment falls on the ſame Day in the ſucceeding Month, *&c.* from that in which the Bill was preſented or dated, although the Months differed in the Number of their Days. *As for Example*, A Bill dated the 7th of *January*, and payable a Month after Date, is payable the 7th of *February*, not the 8th, and a Bill dated the 30th of *January*, to be paid a Month after Date, becomes due on the laſt Day of *Febuary*, though this Month hath not ſo many Days in it as the other.

254. And when a Bill is dated according to the *Old Stile*, payable a Month after Date in a Place where the *New Stile* is obſerved, it does not always fall due a Month after the *Old Stile* Date, as will be proved by ſuppoſing the Bill dated the 25th of *April*, O. S. payable a Month after Date, in a *New Stile* Country, and it does not fall due on the 25th of *May*, O. S. which is the 5th of *June*,

N. S. but on the 6th, for when the Bill was dated it was the 6th of *May*, N. S. which ought to be well obſerved, as this will make a Difference of two Days in Leap-Years, and of three in others.

255. A Bill made payable a Month after Date from the 28th of *February*, falls due on the 28th of *March*; but if it be dated *ultimo Feb.* then it is not due till the *ultimo March*, and the ſame in *June* and *July*, as the one hath 30, and the other 31 Days.

256. Bills made payable here at Sight have no Days of Grace allowed; but if it is but one Day after Sight; the Acceptor may claim them, though this ought not to be practiſed in Countries where the Reſpite Days are many.

257. To reckon the preciſe Time of a Bill's Payment, made payable after Date, it is neceſſary to calculate the Difference between the Old and New Stile, and to know what Uſance is in every Country; and for my Reader's Information herein, the following Places obſerve the *New Stile*, viz. *London*, *Amſterdam*, *Dordrecht*, *Haerlem*, *Leyden*, *Rotterdam*, and all the *United Provinces* of *Holland*; as alſo *Middleburgh*, *Ulliſſingen* in *Zealand*; *Antwerp*, *Brüges*, *Dornick*, *Ghent*, *Ryſſel*, *Bruſſels*, *Valenciennes*, and all *Brabant*, *Flanders*, and *Artois*; *Paris*, and all *France*; *Spain*, *Portugal*, and all *Italy*; *Augſburgh*, *Crembes*, *Lints*, *Vienna*, and ſeveral Places of the Empire; *Breſlaw*, and all *Sileſia*; *Colne*, *Dantzick*, *Koningſburgh*, *Thorne* and all *Poland*.

258. The Places that obſerve the *Old Stile* are,

Ruſſia, the Electorate of *Bradenburgh*, *Denmark*, *Eaſt-Friezeland*, *Francfort* on the *Main*, *Geneva*, and the Proteſtant Cantons of *Switzerland*, *Hamburgh*, and all *Holſten*; *Lubeck*, and all *Mechlenburgh*; *Leipzick*, *Magdeburgh*, *Naumbourgh*, and all *Saxony*; *Riga*, *Stockholm*, and all *Sweden*; *Straſburgh*, &c.

The *Popiſh* Electorates and Principalities of *Germany* obſerve the *New Stile*, and the *Proteſtant* ones continue the *Old*; and as the Reaſon of this Difference may not be ſo generally known, I beg leave to intrude ſo much on the Patience of that Part of my Readers who are acquainted with it, as to inform thoſe that are not, which I will do in a few Words.

JULIUS CÆSAR, deſirous of rectifying the erroneous Computation of Time that had prevailed till then, undertook the Reformation; and as the Year was corrected by him, the *Vernal Equinox*, which reduces Day or Night to an equal Length all over the Globe, except juſt under the Pole, happened in 325 to fall upon the 21ſt of *March*; and from this the *Nicene* Council, being then ſitting, regulated the Terms for the Obſervance of *Eaſter*. But Pope *Gregory* XIII. obſerving in the Year 1582, that the *Equinox* was changed from the 21ſt to the 11th of *March*, ordered ten Days to be deducted from the Calendar. and the 11th to be counted the 21ſt; which Edict was generally obſerved by the Nations acknowledging the Supremacy of the See of *Rome*, but it did not obtain univerſally, as moſt of the *Proteſtant* Countries continued to reckon their Time as formerly; and this gave Riſe to the different Ways of Computation that now obtain in *Europe*, diſtinguiſhed by the *Julian* and *Gregorian* Calendars; and I have only to add, that ſince the Time of Pope *Gregory*, the *Equinox* has changed a Day, *viz.* from the 11th to the 10th of *March*, ſo that the Difference between *Old* and *New Stile* is eleven Days. *Great-Britain* and *Ireland* adopted the *New* or *Gregorian Stile* by Act of Parliament, in the Year 1752.

259. USANCE from *London* to any Part in *France* is thirty Days, this being declared to be a Month in Regard of Exchanges in that Kingdom, whetheer the Month has more or fewer in it.

Uſance from *London*, to *Hamburgh*,
Amſterdam,
Rotterdam,
Middleburgh,
Antwerp,
Brabant,
Zealand,
Flanders,—And from theſe Places to *London*, is one Calendar Month after the Date of the Bill.

Uſance from *London* to *Spain*,
Portugal,——And from theſe Places to *London*, is two Calendar Months after Date.

Uſance from *London* to *Genoa*,
Leghorn,
Milan,
Venice,
Rome—And from theſe Places to *London*, is three Months.

The Uſance of *Amſterdam*,

Upon *Italy*, *Spain*, and *Portugal*, two Months.

Upon *France*, *Flanders*, *Brabant*, *Geneva*, and upon any Place in the Seven *United Provinces*, is one Month.

Upon *Frankfort*, *Nuremberg*, *Vienna*, *Augſburgh*, *Cologn*, *Leipzick*, and other Places in *Germany*; upon *Hamburgh* and *Breſlau*, is fourteen Days after Sight, two Uſances twenty-eight, and half Uſance ſeven.

Uſance from *Dantzick*, *Koningſberg*, and *Riga*, upon *Amſterdam*, is at one Month's Sight, though it is common to draw from the firſt at forty Days' Date, and from the others at forty-one, but oftener at ten and eleven.

And from *Amſterdam* on the ſaid Places, at a Month's Date, without mentioning Uſance; though ſometimes at forty and forty-one Days; and ſometimes on *Breſlau* at ſix Weeks Date.

260. Moſt Nations have generally agreed to allow the Acceptor of a Bill ſome ſmall Time for Payment, beyond that mentioned in the Bill, termed Days of Grace, or Reſpite: but they as generally diſagree in the Number, and Commencement of them.

At *London*, *Bergamo*, *Vienna*, three Days are allowed; at *Francfort*, out of the Fair Time, four; at *Leipzick*, *Naumbourgh*, and *Augſburgh*, five; at *Venice*, *Amſterdam*, *Rotterdam*, *Middleburgh*, *Antwerp*, *Cologn*, *Breſlau*, and *Nuremberg*, ſix; at *Naples*, *Denmark*, and *Norway*, eight; at *Dantzick*, *Koningſberg*, and in *France*, ten; at *Hamburgh* and *Stockholm*, twelve; in *Spain*, fourteen; at *Rome*, fifteen; at *Genoa*, thirty. At *Leghorn*, *Milan*, and ſome other Places in *Italy*, there is no fixed Number of Reſpite Days. *Sundays* and other Feſtivals are included in theſe Days at *London*, *Naples*, *Amſterdam*, *Rotterdam*, *Antwerp*, *Middleburgh*, *Dantzick*, *Koningſberg*, and in *France*; but not at *Venice*, *Cologn*, *Breſlau and Nuremberg*: At *Hamburgh* and in *France*, the Day on which the Bill falls due makes one of the Days of Grace, but no where elſe.

261. At *Venice* no Bills are permitted to be paid by Indorſement, ſo that they muſt be payable to a certain Perſon, and not to Order, or to the Procuration of him intended to receive them; and in Places where there are Banks, if Bills fall due when theſe are ſhut, there are always ſome Days of Grace allowed the Acceptor after their Opening.

262. It was formerly agreeable to the Laws of *Portugal*, and I believe is ſtill ſo to thoſe of *Italy*, though certainly quite contrary to Juſtice and Honeſty, for an Acceptor to be freed from this Obligation in Caſe of a Drawer's Inſolvency before Payment; but as ſome remarkable Trials on this Subject in the firſt-mentioned Kingdom ſeem to have altered the Laws for the better, I ſhall acquaint my Reader both with the Occaſion and Succeſs of them.

263. Some few Years ago, a Gentleman from the City of *London*, drew ſome Bills on his Correſpondent at *Liſbon*, and died two or three Days after inſolvent; the Bills were accepted, but on Advice of the Drawer's Death and Inſolvency, Payment was refuſed; and the Acceptor, ſheltering himſelf under the then ſubſiſting Law, ſtood a Trial on being ſued; but the Judge, having a Regard to the Cuſtom of Merchants, gave a Sentence againſt him, and he paid accordingly. However, ſome Time after a Merchant at *Amſterdam* drew two Bills on another at *Liſbon*, which were indorſed by one here, to two ſeveral ones there, and were both punctually accepted; but the Drawer failing, and the Indorſer likewiſe, the Acceptor refuſed Payment, which obliged the Poſſeſſors to ſue him for the Value,

and this they did in ſeparate Suits, carried on before different Judges, whoſe Opinions were ſo oppoſite, that one of the Holders had a Sentence in his Favour, and the other againſt him; upon which new Suits were commenced, and finally determined for them, who accordingly recovered not only the Principal and Charges of the Bills, but thoſe of the Law-Suits alſo; which ſeems to have fixed the Point before conteſtable, and now placed it on a Par with what is obſerved in the other Parts of *Europe*. And though there are ſome few in *Italy* who value themſelves on the Protection of the Laws to ſcreen them from a Payment under the afore-mentioned Circumſtances, yet they thereby irreparably prejudice their Character, and muſt not expect any future Credit; ſo that thoſe who have any Regard for either, act more like Merchants and honeſt Men, and diſcharge their Acceptances whilſt they are able.

264. In the Territories of the King of *Denmark*, no Bills muſt be made payable after Sight for a longer Term than two Months; and whatever proteſted Bills are not ſued for in ſix Months from the Proteſt's Date, ſhall loſe their Right as Bills of Exchange, and thenceforward be only regarded as a Book Debt; and all Law-Suits concerning them muſt be concluded within a Year. It hath long ſince been determined by a ſettled Rule among the Merchants at *Copenhagen*, and confirmed by a Judgment in the higheſt Court, that the Charges on all proteſted Bills ſhall be ſix *per Cent.* for Exchange and Re-exchange, with $\frac{1}{2}$ *per Cent*, for Proviſion; and by a Placard of the 26th of *Nov.* 1731, Bill-Bonds, which are a Sort of Inland Bills, and ordered in Lieu of Notes of Hand, were introduced; they muſt be on ſtamped Paper, and drawn at three Months, but not to continue longer than four; they have a Right when proteſted like Foreign Bills of Exchange, to bear an Intereſt of $\frac{1}{2}$ *per Cent.* Monthly, and muſt be ſued for within a Month after due.

265. Since I began on this Subject of Bills, a ſmall Diſpute has happened at *Leghorn* about their Payment, which I ſhall juſt mention for my Reader's Information. It has always been cuſtomary at that Place to pay them in Gold; but Zechins have lately been ſo ſcarce there, as to bear a Premium of two or three *per Cent.* above Silver; to avoid which Expence ſeveral tendered Payment of their Bills in the laſt-mentioned Metal, and not being admitted, ſome of them were returned proteſted, which occaſioning a little Confuſion in their Commerce, an Application was made to the Regency, who, as I underſtand, determined that Bills ſhould be paid as uſual; however, ſome here ſtill pretend to have an Inſertion in all they take for their Payment in Gold, which Innovation I preſume will wear off, as the Cauſe that occaſioned it ceaſes. And having treated of every Particular relative to Bills, but their Form, that now naturally challenges a Remark.

266. Bills of Exchange ſhould be written in a fair Hand, cleanly, and without Miſtakes: their Stile admits of ſeveral Variations; as one or more Bills are granted of the ſame Tenour; Difference in the Time and Place of Payment; or according to the Species it is to be made in; which the following Forms may ſerve to illuſtrate.

London, the 18th of *January*, 1791. Exchange for 50*l.* Str.

AT Sight of this my only Bill of Exchange, pay to Mr. *John Rogers*, or Order, fifty Pounds Sterling, Value received of him, and place the ſame to Account, as *per* Advice (or *without further Advice*) from

Samuel Skinner.

To Mr. *James Jenkins*,
Merchant at *Briſtol.*

London, the 18th of *January*, 1791. Exchange for 10,000 Liv. *To.*

AT fifteen Days after Date (or *at one*, *two*, &c. *Uſos*) pay this my firſt *per* Exchange, to Meſſ. *John Rogers* and Comp. or Order, ten thouſand Livres *Tournois*,

Tournois, in Specie known to us this Day, Value of Dittos, and place the ſame to Account, as *per* Advice from

Thomas Bancraft.

To Mr. *Henry Kendrick*,
Banquier, in *Paris*.

The ſecond

London, the 18th of *January*, 1791, Exchange for 10,000 Liv. *To.*

AT fifteen Days after Date (or *at one, two*, &c. *Uſos*) pay this my ſecond *per* Exchange (firſt or third not paid) to Meſſ. *John Rogers* and Comp. or Order, ten thouſand Livres *Tournois*, in Specie known to us this Day, Value of Dittos and place the ſame to Account, as *per* Advice from

Thomas Bancraft.

To Mr. *Henry Kendrick*,
Banquier, in *Paris*.

2)

and in the third write (*firſt or ſecond not paid*) which Example may ſerve for all Bills.

London, the 18th of *January*, 1791. Exchange for D. 1000.

AT Uſance pay this my firſt *per* Exchange to Mr. *Ignatio Teſtori* (or *to the Procuration of Mr.* Ignatio Teſtori) one thouſand Ducats Banco, Value of Mr. *Gregory Laman*, and place it to Account, as *per* Advice from

Nicholas Reubens.

To Mr. *James Robottom*,
Merchant in *Venice*.

London, the 18th of *January*, 1791. Exchange for 1600 *per* 000 Rs

AT thirty Days Sight (or *Uſance*, &c.) pay this my firſt *per* Exchange to *Samuel Fairfax*, Eſq. or Order, one thouſand ſix hundred Mil Reis, Value of Ditto, and place it to Account, as *per* Advice from

Jeremiah Tomlinſon.

To Meſſ. *Brown* and *Black*,
Merchants, in *Liſbon*.

London, the 18th of *January*, 1791.
Exchange for 273*l.* 15*s.* St. at 35 Sc. 7 G. *per £.* St.

AT two Uſos and a half, pay this my firſt *per* Exchange, to Mr. *Joſeph Jacobs*, or Order, two hnndred and ſeventy-three Pounds fifteen Shillings St. at thirty-five Shillings and ſeven Groots *per* Pound Sterling, Value of Mr. *James Merryman*, and place it to Account, as *per* Advice from

John Johnſon.

To Mr. *David Hill*,
Merchant, in *Amſterdam*.

London, the 18th of *January*, 1791. Exchange for 2000 Dollars.

Jean Martel.

A Monſieur
Monſ. *Jacob Geraers*,
A *Hamburgh*.

The Indorſements are as follow:

Pay to Mr. *James Trotter*, or Order, Value in Account. *Stockholm*, the 3d of *November*, 1790.

John Jacobſon and Sons.

Pay to Mr. *Levi Solomon*, or Order, Value received. *London*, the 2d of *December*, 1790.

James Trotter.

The following is a ſecond Bill, in *Italian*.

Londra, 24 *Feb.* 1791. *per* 600 d'8 *r.*

AD Uſo pagate *per* queſta ſeconda di Cambio, una ſol Volta, al mio Ordine, pezze ſei Cento di otto Reale, Valuta Contoci, or *Avuta del Medeſſimo*, ponendole come *per* la d'Aviſo addio

Thomas Deacon.

Al Sar. *Pietro Cambanelli*, à *Livorna*.
La prima *per* accettaz. in Mano di *Sr. Fralli*, &c.

London, the 18th of *May*, 1791. Exchange for 3000 D.

AT Uſance pay this my firſt *per* Exchange to yourſelves, or *to your own Order*, three thouſand Dollars of eight Rials each, Gold or Silver, of the Currency known to us this Day, Value of Mr. *John Crew*, which place to Account, as *per* Advice from

Richard Bingham.

To Meſſ. *Patrick Janſen* and Co.
in *Madrid*.

Patrick Janſen and Co.

When Bills are drawn at Uſance, or ſo many Days Date, the Acceptance muſt be at the Bottom of the Bill, as in that immediately preceding; but when they are drawn payable at ſo many Days ſight, the Acceptance muſt expreſs the Day it is made; and an Indorſer may divide a Bill, and make Part of it payable to one, and Part to another, which is done in the following Manner: *A.* poſſeſſing a Bill for 200*l.* Sterling, indorſes on the firſt 122*l.* payable to *B.* and on the ſecond 78*l.* payable to *C.* and ſends the firſt to *B.* and the ſecond to *C.* ſo indorſed, and on their preſenting them to the Party the Bill is drawn on, he accepts the firſt for the 122*l.* and the ſecond for the 78*l.* in Conformity to their Indorſements.

In *France*, by an Ordinance of the King, in *March*, 1673, it is directed, that the Nature of the Value received for Bills of Exchange ſhall be inſerted in them, and expreſsly mentioned, whether it was in Money, Merchandize, or other Effects, to prevent ſeveral Abuſes that had crept into this Branch of Commerce, by the bare Inſertion only of Value received; for it was common to give a Note, in Payment of a Bill of Exchange, both expreſſing Value received. And this Method was found to be of great Prejudice to Trade, by occaſioning many Failures, which the afore-mentioned Arret was intended to prevent. And in Conſequence thereof, there are four Sorts of Bills of Exchange in that Country, *viz.* the firſt expreſſing ſimply, *Value received*; the ſecond, *Value received in Merchandize*; the third, *Value in himſelf*; and the fourth, *Value underſtood*. The firſt and ſecond need no Paraphraſe, being both alike in their Negociation, and their Diſtinction only anſwering ſome Ends that may occur between the Drawer and Deliverer, in Caſe of any Failure or Fraud. The third Sort is, when a Merchant draws a Bill of Exchange on one who owes him Money, which he ſends to his Friend or Factor, to procure Acceptance and Payment; and as the Acceptor is a Creditor of his, an Inconvenience might accrue to him, ſhould he inſert Value received, as his Friend or Factor might pretend that it belonged to him, appearing by the Bill that the Drawer had received the Value. The fourth is, when a Perſon taking a Bill of Exchange from one on whoſe Credit he cannot rely, gives the Drawer his Acknowledgement of receiving the Bill, whoſe Value he obliges himſelf to ſatisfy, on having Advice that the Bill is paid; but if the Bill returns proteſted, it is again exchanged for the Note, the Drawer defraying the Charges. The Times for which Bills are made payable are alſo four, *viz.* At ſo many Days Sight, eight, ten, fifteen, *&c.* and the Time does not commence running till the Day after it is preſented and accepted; ſo that a Bill drawn payable at ten Days Sight, and accepted the laſt Day of *April*, is not demandable till the 11th of *May*, and the Reaſon is, that the Day of Acceptance which is the 30th of *April*, is not counted, but the Reckoning begins only on the 1ſt of *May*; the 10th of *May*, on which the Bill expires, is not counted neither, becauſe that the 10th does not finiſh till Midnight, and conſequently an Action cannot be brought againſt the Acceptor till the 11th of *May*, which begins the Moment ſucceeding that on which the 10th finiſhes; and in Effect, if one begins to count from the 1ſt of *May*, and continues to the 10th at Midnight incluſive, there will be found no more than ten whole Days, which is the Time the Acceptor had to pay the Bill in.

The ſecond Method of drawing Bills, is to make them payable at a Day certain. For Example—a Drawer gives his Bill to be paid on the 1ſt of *May*, which, according to what is ſaid in the preceding Caſe, is not demandable till the ſecond, as the Day of its falling due is never counted.

And there is no Obligation to procure Acceptance to a Bill of this Tenour, as the Time goes on whether accepted or not; but it is otherwiſe with the foregoing, payable at ſo many Days Sight; though it is certainly more adviſeable to get it accepted, as by this Means another Debtor is added to the Drawer, which becomes a new Security.

The third Time of Bills is at Uſance, which is according to the Places drawn on, double Uſance, or two Uſances, *&c.* and tho' there is no more Obligation to procure Acceptance to this than to the preceding one, as the Time runs on from the Day of its Date, yet the ſame Reaſons ſubſiſt for ſolliciting its Acceptance as occurred then.

And there having been formerly many Diſputes about the Time of Bills falling due that were drawn payable at Uſance, double Uſance, &c. the King by this Ordinance has regulated it for the future, by making Uſance to be thirty Days, whether the Months have more or leſs in them, the thirty Days to be counted from the Day the Bill is dated, and not to be demanded till that ſucceeding the Expiration of the thirtieth, as has been obſerved in thoſe Bills payable at ſo many Days Sight, and at a Day certain; but theſe Laws are only binding in *France*, on ſuch Bills as are payable there, but not on thoſe drawn from thence on other Countries, where different Uſages and Cuſtoms are practiſed.

The fourth Sort of Terms of Bills, is, when Merchants draw them payable at *Lyons* in the Fair-Time, which they term Payment, and which they have four Times a Year, as has been before mentioned.

When Honeſty reigned among the Merchants, theſe Bills payable in Payment at *Lyons*, were never accepted by Writing, he on whom they were drawn only ſaid verbally, SEEN, and the Bearer noted it in his Book accordingly. The *Lyonnois* practiſed this for a long Time without any Accident; but Integrity became ſlack by the Corruption of the Times, and ſome Bankers having denied that Bills had been preſented them, the Merchants for a greater Security now have them accepted in Writing.

It was neceſſary that the Bankers and Merchants of *Lyons*, to eſtabliſh this Diſpoſition in the Acceptations, and to reſtrain many other Abuſes committed in their City, ſhould ſeek a Remedy, and therefore they propoſed a Regulation to the Governor, &c. thereof, the which was approved of, and allowed by an Arret of Council, and regiſtered in the Parliament of *Paris* in the following Words, *viz.* " That the Acceptations of the ſaid Bills of Exchange ſhall be made by " Writing, dated and ſigned by thoſe on whom they are drawn, or by Perſons " duly empowered by a Procuration, of which the Minutes ſhall remain with " the Notary; and all thoſe which ſhall be made by Factors, Deputies, and others, " not furniſhed with Procurations, ſhall be null and of no Effect againſt him on " whom they are drawn, ſave the Recourſe againſt the Acceptor."

This Regulation, which was only for the City of *Lyons*, proved a ſufficient Remedy for the Abuſe that was committed by the Want of Acceptance to Bills; but this did not in any Shape remedy thoſe ariſing from a conditional Acceptance in theſe Words, *Accepté pour repondre au Temps*, accepted to anſwer in Time, for this is the ſame as ſaying nothing, and is contrary to the publick Surety; becauſe a Merchant of *Paris* or other Places, drawing a Bill of Exchange on his Correſpondent at *Lyons*, who ſhall have no Effects of his in Hand, and who only accepting it with the Circumſtance, *To anſwer in Time*, not being willing to advance for his Friend, when the Seaſon of the Fair, or Payment is come, if Remiſſes are made to him, he pays a Creditor with a Debt, if he has the Opportunity, or elſe the Contents of the Bill are diſcharged at the End of the Payment; but, if he has no Proviſion made him, he lets the Bill be proteſted; ſo that a Merchant who does not underſtand this Cuſtom, and who has paid his Money three Months before, comes upon the Drawers or Bearers of Orders, who very often have failed in the mean Time; whereas if he on whom the Bill is drawn, accepts purely and ſimply when it is preſented him, he in whoſe Favour it was, would have had immediate Security, and its Payment when fallen due.

And however ſuitable to the Intereſt of the *Lyonnois* this Practice might be, as they generally accepted without Effects in Hand, yet as it placed them on a different Footing from every other Trader in the Kingdom, it was judged but reaſonable by other Merchants to find out a Method that ſhould put them all on a Level, and oblige thoſe of *Lyons* to a pure and ſimple Acceptation; but though this was obſervedby ſome conſiderable Bankers, who drew their Bills, or took them with the Inſertion of ſuch Words as would not admit of Evaſion in the Acceptor, yet this did not anſwer the Intent, as many of *Lyons* would not accept the Draughts on them in any other Manner than that formerly mentioned; therefore to remedy the Inconvenience and Diſorders which this occaſioned in Trade, and to place all his Majeſty's Subjects on a Level, he directed by his Ordinance, " That all Bills of Exchange ſhall be accepted by Writing purely and ſimply; " abrogating the Cuſtom of a verbal Acceptance, orby theſe Words, *Veu ſans* " *accepter*,

" *accepter*, ſeen without accepting, or *accepted to anſwer in Time*, and all other " conditional Acceptations, which ſhall be deemed a Refuſal, and the Bills may " be proteſted."

I mention thoſe Circumſtances, in which I think moſt *European* Nations are intereſted, as there is hardly one from whence a conſiderable Trade is not carried on with *Lyons*, either in the Commercial or Banking Way.

And though the happy Improvement of our own Silk Manufactures has very conſiderably leſſened for ſome Years paſt, our trading Engagements with that powerful City, yet there ſtill remains ſuch an Intercourſe, that the Knowledge of tranſacting Buſineſs there may occaſionally concern many of my Readers.

I have now done with Bills of Exchange, and exerted my Endeavours to reduce every neceſſary Obſervation on them into as ſmall a Compaſs as the Nature of the Subject would permit, conſiſtent with rendering myſelf intelligible, and the Rules, I have laid down, clear and practicable; and though I might, without incurring an Imputation of Prolixity, have ſwelled a Diſcuſſion of this important Article into a Volume inſtead of a Chapter, I hope, I have left nothing unſaid that could contribute to my Purpoſe of clearing up every Difficulty which might ariſe to my Readers in their Exchanging Buſineſs; having carefully collected and communicated the Sentiments of the beſt Writers in all Languages on this Topick, ſo far as they were agreeable to that Experience which a long Practice in this Branch of Buſineſs has furniſhed me with; and I flatter myſelf that I ſhall not be accuſed of Vanity if I aſſert, that my Labours herein, and Endeavours to have every Section ſuch as to ſtand the ſtricteſt Scrutiny, have by far exceeded thoſe of other Writers that have gone before me, who either have ſuperficially run over the Matter, or blindly propagated the Errors of one another, through Ignorance or Sloth, which I have ſtudied to rectify, and I flatter myſelf with Succeſs.

Before I treat of Arbitrations, I ſhall ſay ſomething of *Brokers*, as a proper Appendage to the preceding Diſcourſe, though they are not ſo much concerned in the Exchanges of Money and Bills as they were formerly; the Revolutions that happen in Commerce as well as Politicks, having thrown the greateſt Part of that Buſineſs into the Hands of the Bankers in *London*, and in moſt of the capital Cities of *Europe*.

Of Brokers.

BROKERS are Perſons ſworn and authoriſed by the Magiſtracy of the Place where they act, and ſuch are always regarded in Preference to others, who interfere in theſe Negociations without being licenſed; as Credit is given to the perſonal Evidence, and to the Books of ſworn Brokers in all Courts of Juſtice, and out of Court, in all Caſes of Arbitration or Compromiſe, though it is not admitted from the others; and in moſt Places, thoſe who illegally exerciſe the Function, are fined for acting without Permiſſion.

The Number of Sworn Brokers in *London* is unlimited; at *Amſterdam* there are three hundred and ſeventy-five *Chriſtians*, and twenty-two *Jews*, acting in Trade and Exchanges; beſides which, there are many who practiſe, as they do here, unſworn and unlicenſed. The Number of theſe at *Amſterdam*, is more than double that of the *Sworn* Brokers, and they go by the Name of *Ambulatory* Brokers, and it is to be obſerved, that a Merchant runs great Riſks in employing them, for in Caſe of Ligitation, the Bargains and Contracts they have made are liable to be rendered null and void.

It is the Duty of Brokers to be *diligent*, *faithful*, and *ſecret*, whether their Dealings be in Exchange, or Purchaſes and Sales, as they are Mediators in all Negociations; and thoſe licenced may properly be called Publick ones, from the Nature of their Buſineſs, which leads them to a general Employ between Merchants, Traders, and Remitters. They are called at *Amſterdam*, as well as here, *Brokers*, Courtiers or Mackelaers, though on the Coaſts of *Provence*, and

up the *Levant*, they are termed *Cenſals*: and at *Paris*, the Exchange Brokers have, for about a Century paſt, bartered this Appellation for that of Agents; and to render the Office yet more honourable, about fifty Years ago the Quality of King's Counſellor was added to it, though the Buſineſs is the ſame, however the Denomination may differ.

Thoſe who exerciſe the Function of Brokers ought to be Men of Honour, and capable of their Buſineſs; and the more ſo, as both the Credit and Fortune of thoſe that employ them may in ſome Meaſure be ſaid to be in their Hands, and therefore they ſhould avoid Babbling, and be prudent in their Office; which conſiſts in one ſole Point, that is, to hear all, and ſay Nothing; ſo that they ought never to ſpeak of the Negociations tranſacted by Means of their Invention, or relate any ill Report, which they may have heard againſt a Drawer, nor offer his Bill to thoſe who have ſpread it.

Before offering any Bills of Exchange, which a Broker is commiſſioned about, he ought to aſk the Perſon he applies to, whether he wants Bills for ſuch a Place, or hath Money to diſpoſe of? and if the Merchant queries whoſe the Bills are which he has to negociate, he ought not to inform him, till his Reply lets him know whether he wants any or not.

When a Merchant has diſcovered his Intentions to draw, or that he has Bills to negociate, the Broker ſhould offer them, purely and ſimply, without any Exaggeration in their Favour or Diſfavour; and if he to whom they are propoſed refuſes them, with ſaying thay do not ſuit him, it would be not only improper, but impertinent in the Broker, to aſk the Reaſon of ſuch a Refuſal, and the Heighth of Imprudence in him to amplify their Goodneſs, or the Solvency of their Owner, in Order to induce the Refuſer to change his Intentions, and take them; on the contrary, he ought to take Care never to deceive the contracting Parties, but to be ſincere in all his Actions, without uſing any Artifice to attain his purpoſed End in his Negociations; and above all, he ſhould avoid offering Things for which he has no Authority, as he may be taken at his Word, and have the Negociation remain for his own Account, to his no ſmall Diſadvantage, if known, both of Purſe and Credit; and the ſame may happen in Purchaſes and Sales, as in Exchanges.

A Broker ſhould take Care in making an Agreement between two Perſons, to be well aſſured of the Place to be drawn on, and when it is; where there is a ſettled Uſance, he has Nothing to treat of but the Price; though, in Caſe the Parties agree on an Exchange for a Place where the Time of the Bill's Running is uncertain, that of Payment muſt be fixed, with every other Requiſite to conclude the Bargain.

When a Broker has adjuſted a Remittance, he muſt enquire of the Remitter to whom he will have the Bills payable, and ſhould always carry ſome Slips of Paper on a Poſt-Day in his Pocket, on which to note it, as alſo the Sum agreed for, the Time of Payment, to whom payable, from whom the Value is to be received, at what Price the Exchange was concluded, and the Day it was agreed on, which Memorandum he muſt give the Drawer, and enter a Duplicate thereof in his Book, that may ſerve as a Teſtimonial, in Caſe of any Diſpute between the contracting Parties.

It is the Broker's Obligation to call for the Bills, and carry them in Time to the Remitter, though this is a good Deal out of Uſe in this great Metropolis, where the Merchant commonly ſends a Clerk with them, to leſſen the Broker's Trouble.

A prudent Merchant will never attach himſelf entirely to one Broker for fixing the Price of the Exchange, nor will prefer one to another in the Execution of his Commiſſion, either though Favour or Friendſhip, but he who offers the moſt beneficial Terms ſhould be the Agent on that Occaſion; and by ſuch Behaviour he diſobliges Nobody, but rather ſtimulates an Emulation in them to procure his Advantage.

It is a great Fault in a Merchant whoſe Credit is not well eſtabliſhed, when he has a Mind to draw, to make Uſe of a Broker who is but young in, or ignorant of his Buſineſs; and he who draws in Virtue of a Letter of Attorney

for another's Account is obliged to declare it to the Broker, who muſt in Conſequence contract in the Name of the Conſtituent, and not in his who gave the Order.

An Exchange once concluded with the Broker, or by his Mediation, ought to be carried into Execution; as it is both unfair and illegal for either the Drawer or Remitter to retract their Words given. And if a Broker concludes any Thing either without or exceeding Orders, more eſpecially at an inferior Price, the Merchant has juſt Reaſon to reſent it, though the Broker offers Satisfaction, as his Credit is concerned, and may be hurt beyond a Poſſibility of Reparation.

The Bills of young Beginners may be offered by a Broker, but if he frequently tenders ſuch as are notoriouſly in Diſrepute, he muſt greatly ſuffer in his Reputation; more eſpecially if he takes on him to recommend them; and if he ſubmits to be employed by one he knows to be inſolvent, or near being ſo, and endeavours to draw or remit for him, when certain that his Bills will not be anſwered, or he as a Remitter not comply with his Engagements, he ought to be ſeverely puniſhed for his Knavery; and his being deprived of any future Buſineſs is the leaſt he can expect, though the Puniſhment is not adequate to his Deſerts.

A Broker ſhould never aſk more, nor admit leſs, than what the Law and Cuſtom allows him; this for Exchanges in *London* is always one *per Mil.* for each of the Parties concerned, though on Purchaſes or Sales *per Cent.* and at *Amſterdam* the Tariff is ſettled at three Stivers for a hundred Guilders, the Half payable by the Drawer, and the other Moiety by the Remitter, as follows, *viz.*

	l.	*s.*	*d.*
A thouſand Ducats on *Venice*	4	0	0
A thouſand Dollars on *Genoa* or *Leghorn*	4	0	0
A thouſand Ducats on *Madrid*, or any other Part of *Spain*	4	0	0
A thouſand Cruſados on *Liſbon*, or any other Part of *Portugal*	4	0	0
A hundred Pounds Sterling on *London*, or any other Part of *England*, *Scotland*, or *Ireland*	1	10	0
A thouſand Crowns on *Paris*, or any other Part of *France*	1	10	0
Though when the Exchange was very high, Brokerage was in Proportion, and formerly Guild. 4. 10 St. *were paidon negociating the thouſand Crowns.*			
A thouſand Rixdales on *Francfort*, *Leipzick*, or *Breſlaw*	3	10	0
A hundred Livres de Groſs, or ſix hundred Guilders, on *Dantzick*, *Koningſberg*, *Anvers*, *Liſle*, and all *Flandkrs* and *Brabant*	0	18	0
A thouſand Daelders on *Hamburgh*, computed 1666$\frac{3}{4}$ Guilders,	2	10	0
A thouſand Guilders on *Rotterdam*, and other Parts of *Holland*	1	10	0
A thouſand Guilders Bank Money changed into Current	1	0	0
A thouſand Guilders of Gold changed into Silver, and *per coutra*	1	0	0
Five hundred Livres de Gros for an *Eaſt-India* Action	6	0	0

And in Proportion on other Places of Exchange; not but that ſome Brokers impoſe on People they find ignorant of the above-mentioned Regulations and Cuſtoms, but this is a Fraud, which no honeſt Man will be guilty of.

At *Paris* Brokerage is $\frac{1}{4}$ *per Cent.* and at *Lyons* forty Sols is commonly given for three thouſand Livres *Tournois*, Half by the Taker and half by the Giver of the Bill; and at this laſt Place, any one is permitted to exerciſe the Function of a Broker, it being a free City.

At *Venice* Brokerage is $\frac{1}{2}$ *per Mil.* at *Genoa* $\frac{1}{3}$ *per Cent* at *Leghorn* $\frac{1}{2}$ *per Mil.* at *Bologne* 1 Sol *per* hundred Crowns; and in all other Banking Cities according to what Government has ſettled.

What we have already advanced, is ſufficient with Reſpect to the Tranſactions of Exchange Brokers in general, and to give an Idea of the Nature of their Buſineſs in foreign Countries, which is all that is neceſſary; for every Merchant travelling to or reſiding in any great mercantile City in *Europe* muſt

make himſelf Maſter of the local Laws and Regulations of the Place with reſpect to Brokers, and act accordingly: for theſe are liable to vary with the Policy and Circumſtances of every Country, and therefore all printed Treatiſes upon ſuch Subjects may become obſolete and uſeleſs. But the ſame Reaſons ſhould oblige the BRITISH MERCHANT to ſtudy all the Laws and Regulations reſpecting Brokers in his own Country, on which Account we ſhall enter into a Detail on that Head, and give ample Information to the very Time of our Publication: What Alterations happen afterwards, it will be eaſy for him to add, and thereby to make this Treatiſe, the Standard for his Tranſactions with Brokers.

Of Exchange and Stock Brokers in England.

VARIOUS Claſſes of Brokers are comprehended under the general Title of EXCHANGE BROKERS, *viz. Inſurance* Brokers, *Ship* Brokers, *Eaſt-India* Brokers, *Stock* Brokers, *Auctioneers*, &c. all of whom, if they tranſact Buſineſs within the Juriſdiction of the City of *London*, muſt be duly ſworn and admitted to act as Brokers by the Lord-Mayor and Court of Aldermen, otherwiſe they are liable to a Fine and Suſpenſion, upon Information given to the ſaid Court, that they tranſact Buſineſs without being ſo duly admitted.

Having already treated of Exchange Brokers, in the limited Senſe of that Title, we ſhall proceed to INSURANCE BROKERS, whoſe peculiar Buſineſs it is to bring together the Parties wanting to inſure Ships and Merchandiſe from the Perils of the Sea, and the Inſurers or Underwriters: to ſettle the Premium, to pay or receive the ſame for the Parties concerned, to fill up the Policies, atteſt them, *&c.* They are likewiſe often called upon to draw up Charter-Parties, particularly when they are to contain any ſpecial Conditions, as thoſe Conditions often relate to, and are connected with the Inſurance.

SHIP BROKERS are employed in buying and ſelling Ships and Cargoes, either by private Contract, or by public Sale, the latter is ſaid to be by CANDLE, on Account of the Cuſtom of lighting an Inch of Candle at theſe public Sales, and ſuffering the Bidders to bid no longer than till the Candle is burnt out, in other Reſpects they do not differ from common Auctions. In Time of War, the Buſineſs of Ship Brokers is conſiderably increaſed by the Sale of Prizes taken from the Enemy.

EAST INDIA BROKERS tranſact the Buſineſs by Commiſſion of purchaſing the Commodities ſold at the Company's public Sales, and they are enployed by the Wholeſale Dealers in Linen, Silk, Teas, Spices, Drugs, China, *&c.*

STOCK BROKERS are Perſons who confine their Tranſactions to the buying and ſelling of Property in the public Funds, and other public Securities for Money; and they are employed by the Proprietors or Holders of the ſaid Securities. Of late Years, owing to the prodigious Increaſe of the funded Debt of the Nation, commonly called the STOCKS, they are become a very numerous and conſiderable Body, and have built, by Subſcription, a Room near the Bank, wherein they meet to tranſact Buſineſs with their Principals and with each other, and to prepare and ſettle their Proceedings before they go to the Transfer-Offices at the Bank, the South-Sea and India-Houſes, thereby preventing a great deal of Confuſion at the public Offices, where the Concourſe of People is ſo great during the Hours of transferring Stock, that if the Buſineſs was not prepared before-hand, it would be impoſſible to tranſact it within the given Time.

But if the Buſineſs of Stock Brokers, was confined ſolely to buying and ſelling the real Property of their Employers in the Funds, there would not be Half the Number that now follow this Profeſſion. It is therefore neceſſary to take Notice that the Intereſt which Foreigners have in our Funds, particularly the DUTCH, gave riſe to Time Bargains, that is to ſay, to Contracts for purchaſing and ſelling any Quantity of Stock to be delivered or adjuſted at a future Time. The uſual Times for which Bargains, founded on real Property, and intended to be ſettled *bona fide*, were made, were from three Months to three Months, four

Times within the Year, *viz.* in *February*, *May*, *Auguſt*, and *November*; and theſe Periods of ſettling the Accounts of ſuch Time Bargains were called the RESCOUNTERS, from a *Dutch* mercantile Term for adjuſting Accounts Current between Merchant and Merchant. The Impoſſibility of aſcertaining whether the Commiſſions from Abroad given by Letters from Foreigners, or by their Correſpondents here, to Brokers to buy and ſell Stocks for Time, were founded upon real Property or not, gave Birth to *Stock-jobbing*, or Dealing in the Funds upon Speculation, and the Perſons that play at this Game, for Gaming it is of the firſt Magnitude, whether Principals or Brokers, are called Stock-jobbers.

They purchaſe or ſell for a given Time, frequently without being poſſeſſed of any Property in the Funds they bargain for, merely upon Speculation. For inſtance: A. imagines that a Peace, or ſome other advantageous national Event will raiſe the Price of any given Fund within the Space of three Months conſiderably above the Price of the Day on which he makes his Time Bargain: On this Principle he gives his Broker Orders to buy a large Quantity to be taken and paidfor three Months from that Date; when the Time expires, if the Stock has riſen according to his Expectation, inſtead of taking it, for probably it has been bought of a Perſon who had it not to deliver, he receives from the Broker the Difference in Money, between the Price on the Day the Bargain was made, and the Price at the Expiration of the three Months, and this is his Profit: If, on the contrary, the Stock has fallen below the Price of the Day on which he purchaſed for three Months, he muſt pay the Difference, and this will be a loſing Account. It is computed that the Bargains on Stock-jobbing Accounts made in the Courſe of a Year, exceed by many Millions, the Transfers made at the Books of real Property, and the Concluſion is apparent, that great Fortunes are made and loſt by Stock-jobbing. It is to be obſerved likewiſe, that the Brokers job for their own Account, which occaſions frequently Failures at the Stock-Exchange.

The whole Buſineſs of Stock-jobbing being contrary to Law, and many Perſons acting as Brokers therein, who have never been admitted as Exchange Brokers by the Lord-Mayor and Court of Aldermen, it is our Duty, in the next Place to give the Form of Admiſſion of regular Brokers, the Regulations to which they are ſubject, and Abſtracts of the Laws in Force concerning them, and Stock-jobbing; after which, if any further Information is wanting, we muſt beg Leave to refer the Reader to a well-known Treatiſe on the Funds, entitled, *Every Man his own Broker* *, as it would far exceed our Limits, and go beyond the Plan of this Work, to diſcuſs the whole Art and Myſtery of Stock-jobbing.

All Perſons, who ſhall act as Brokers within *London*, ſhall be admitted by the Court of Mayor and Aldermen, under ſuch Directions for their good Behaviour as the Court ſhall think fit; and ſhall, upon their Admiſſion, pay to the Chamberlain *forty Shillings*; and ſhall alſo Yearly pay *forty Shillings* upon the 29th of *September*, for the Uſe of the Mayor and Commonality and Citizens of the City of *London*. 6 *Ann*-C. 16. S. 4.

The principal Regulations eſtabliſhed by the ſaid Court, in Virtue of the Powers veſted in them by the ſaid Statute are,

That every Broker upon his Admiſſion is ſolemnly ſworn, truly and faithfully to execute and perform the Office and Employment of a Broker between Party and Party, in all Things appertaining to the Duty of the ſaid Office and Employment, without Fraud or Colluſion; to the beſt of his Skill and Knowledge.

That he do enter into a perſonal Bond, under the Penalty of five hundred Pounds, the Condition of which Bond recites the Duties ſworn to in the Oath of Admiſſion, which, if well and truly performed, then the Obligation is void, otherwiſe it remains in full Force.

A Silver

* Every Man his own Broker; or, A Guide to Exchange-Alley, explaining the Nature of the Funds, the Art and Myſtery of Stock-jobbing, &c. by *T. Mortimer*, Eſq. the Eleventh Edition, *London*, printed for *Robinſon*, 1791.

A Silver Medal is likewiſe delivered to him, having the King's Arms on one Side, and the Arms of the City of *London* on the Reverſe, with the Broker's Name, and he is ordered to produce the ſame upon every Occaſion, when he is required to ſhew his Qualification.

6 *Ann.* C. 16. Sect 5. If any Perſon ſhall take upon him to act as a Broker, or employ any under him to act as ſuch within the ſaid City, not being admitted, every ſuch Perſon ſhall forfeit to the Mayor and Commonalty, *&c.* for every Offence twenty-five Pounds, to be recovered by Action of Debt in the Name of the Chamberlain, in any of her Majeſty's Courts of Record.

Sect. 10. Every Perſon employed as a Broker, Sollicitor, or otherwiſe, in behalf of any other Perſon, to make any Bargain, or contract for the buying or ſelling of any Tallies, Orders, *&c.* or Intereſt in any joint Stock erected by Act of Parliament, or Letters Patent, or Bonds of any Company thereby erected, who ſhall take any Money or Reward exceeding *two Shillings and Sixpence* for every hundred Pounds, and ſo in Proportion, for his Service in ſolliciting or procuring ſuch Contract or Bargain, ſhall forfeit *Twenty Pounds* with Coſts, to ſuch Perſon as will ſue for the ſame in any of her Majeſty's Courts of Record at *Weſtminſter*.

7 *Geo.* II. C. 8. S. 1. All Contracts upon which any Premium ſhall be given for Liberty to put upon, deliver, accept, or refuſe, any public Stock or Securities, and all Wagers, Puts, and Refuſals, relating to the preſent or future Stock or Securities, ſhall be void: and all Premiums upon ſuch Contracts or Wagers ſhall be reſtored to the Perſon who ſhall pay the ſame, who ſhall be at Liberty, within ſix Months from the Making of ſuch Contract, or laying ſuch Wager, to ſue for the ſame, with double Coſts; and it ſhall be ſufficient for the Plaintiff to alledge, that the Defendant is indebted to the Plaintiff, or has received to the Plaintiff's Uſe, the Money or Premium ſo paid, whereby the Plaintiff's Action accrued according to the Form of this Statute, without ſetting forth the ſpecial Matter.

Sect. 2. Perſons, who by this Act ſhall be liable to be ſued, ſhall alſo be obliged to anſwer upon Oath ſuch Bill as ſhall be preferred againſt them in Equity, for diſcovering any ſuch Contract or Wager, and the Premium given.

Sect. 4. Every Perſon who ſhall make any ſuch Contract, upon which any Premium ſhall be given for Liberty to put upon, deliver, accept, or refuſe any public Stock or Securities, or any Contract in the Nature of Puts and Refuſals, or ſhall lay any Wager, except ſuch who ſhall *bonâ fide* ſue, and with Effect proſecute, for the Recovery of the Premium paid by them, and alſo except ſuch as ſhall diſcover ſuch Actions in any Court of Equity, ſhall forfeit *Five hundred Pounds*. And all Perſons negociating or writing ſuch Contracts, ſhall likewiſe forfeit *Five hundred Pounds*, which Penalties may be recovered by Action of Debt or Information, in any of his Majeſty's Courts of Record at *Weſtminſter*; one Moiety to his Majeſty, and the other Moiety to them who ſhall ſue for the ſame.

Sect. 5. No Money or other Conſideration ſhall be voluntarily given or received for the compounding any Difference, for the not delivering or receiving any public Stock or Securities, but all ſuch Contracts ſhall be ſpecially executed; and all Perſons who ſhall voluntarily compound ſuch Difference, ſhall forfeit *One hundred Pounds*, one Moiety to his Majeſty, and the other Moiety to them who ſhall ſue for the ſame.

Sect .6. No Perſon who ſhall ſell Stock to be delivered and paid for on a certain Day, and which is refuſed and neglected to be paid for, ſhall be obliged to transfer the ſame; but it ſhall be lawful for ſuch Perſons to ſell ſuch Stock to any other, and to receive or recover from the Perſon who firſt contracted for the ſame, the Damage which ſhall be ſuſtained.

Sect. 7. It ſhall be lawful for any Perſon, who ſhall buy Stock to be accepted and paid for on a future Day, and which ſhall be refuſed or neglected to be transferred; to buy the like Quantity of ſuch Stock of any other Perſon, at the current Market Price, and to recover and receive from the Perſon who firſt contracted to deliver the ſame, the Damages ſuſtained.

All Contracts which ſhall be made for the buying or transferring of Stock, whereof the Perſon on whoſe Behalf the Contract ſhall be made to transfer the ſame, ſhall not, at the Time of making ſuch Contract, be actually poſſeſſed in his own Right, or in the Name of Truſtees, ſhall be void: and every Perſon on whoſe Behalf, and with whoſe Conſent any Contract ſhall be made to ſell Stock, whereof ſuch Perſon ſhall not be actually poſſeſſed in his own Name or in the Name of Truſtees, ſhall forfeit *Five hundred Pounds*, one Moiety to his Majeſty, and the other Moiety to them who ſhall ſue for the ſame; and every Broker, or Agent, who ſhall negociate any ſuch Contract, and ſhall know that the Perſon, on whoſe Behalf ſuch Contract ſhall be made, is not poſſeſſed of Stock, ſhall forfeit *One hundred Pounds*, one Moiety to his Majeſty, and the other Moiety to them who ſhall ſue for the ſame. 7 *Geo.* II, C. 8. S. 8.

Every Perſon receiving Brokerage in the buying and diſpoſing of Stocks, ſhall keep a Broker's Book, in which he ſhall enter all Contracts, with the Names of the principal Parties; and ſuch Broker, who ſhall not keep ſuch Book, or ſhall wilfully omit to enter any ſuch Contracts, ſhall forfeit *Fifty Pounds*, one Moiety to his Majeſty, and the other Moiety to them who ſhall ſue for the ſame. Sect. 9.

Nothing in this Act ſhall extend to any Contracts for the Purchaſe or Sale of Stock, to be made with the Privity of the Accountant General of the Court of Chancery, in Purſuance of any Decree or Order of the ſaid Court. Sect. 10.

Nothing in this Act ſhall hinder any Perſon from lending Money on Stock, ſo as no Premium be paid more than legal Intereſt, Sect. 11.

The above Act was made perpetual by 10 *Geo.* II. C. 8.

It was hardly poſſible to frame an Act, better calculated to ſuppreſs the pernicious Practice of Stock-jobbing; yet it is ſhamefully violated, and that daily, with Impunity, juſtifying the Remark made by Foreigners, "That we have the beſt Laws of any Nation in the World, and the worſt executed." However, the Merchant and the monied Man may learn one uſeful Leſſon from attending to the Regulations concerning Brokers, and the Statute againſt Stock-jobbing, which is, that he can have no Remedy whatever for any Fraud or Colluſion, unleſs he employs a licenſed Broker. And that he may know which are licenſed, he need not have Recourſe to a Sight of the Silver Medal, a Liſt of the admitted Brokers being annually printed by Order of the Lord-Mayor and Court of Aldermen, which is hung up in one of the Walks of the *Royal Exchange*, and in *Guildhall* and at moſt of the reputable Coffee-houſes near the Exchange.

Of the Par of Monies.

MOST of what has hitherto been written concerning the Par of Coin is obſcure and confuſed: the greateſt Part of the Authors who have publiſhed any Thing about it give the Par of Monies no longer current; however it is a Thing not over difficult, as it only conſiſts in making the Compariſon between the intrinſick Value of the Gold and Silver Coins of each Country, and the Price they paſs current at; it is therefore neceſſary that the exact Weight and Standard of ſuch Monies be firſt known. The celebrated Sir *Iſaac Newton* publiſhed a Tract of the Standard of foreign Coins, which was printed at the End of Mr. *Arbuthnot's* Work; but ſo many Alterations have ſince been made in the Monies of *France*, *Spain*, and ſome other Countries, that it is neceſſary to examine the laſt Arrets that have been publiſhed about them to clear up this Particular. As for Example: The King of *Spain*, by a Royal Decree, raiſed the Piſtole from thirty-two to thirty-ſix Rials of Plate, and by a ſubſequent Decree, it was ordained that the Dollars ſhould be current in his Dominions at nine and $\frac{1}{2}$ Rials inſtead of eight, which they paſſed at before, and theſe have ſince been raiſed to ten, and the Piſtole to forty Rials: Which Obſervation might be extended to ſeveral other Species, but this would be both

tedious and uſeleſs, we ſhall therefore give ſuch Examples only as will ſufficiently and clearly demonſtrate the Method by which all others may be found out.

The Par of Gold Coin between London *and* Amſterdam.

Of $1\frac{1}{2}$ Mark of Gold of the Standard of 22 Carats are made in *England* $44\frac{1}{2}$ Guineas, as Sir *Iſaac Newton* demonſtrated to the Lords of the Treaſury on the 21ſt of *September*, 1717; each Guinea being then current at 21 Shillings and Sixpence Sterling, but ſince it has been lowered to 21 Shillings. At preſent 1000 new *Holland* Ducats weigh 14 Marks 1 Ounce and $11\frac{3}{8}$ Engels; each Mark is of the Standard of 23 Carats and a little more than 7 Grains, from whence it follows, that there is as much pure Gold in 1000 Ducats as in $451\frac{6}{9\,1}$ Guineas. Commonly in the Payments that are made among the Citizens, a Ducat paſſes in *Holland* for 5 Guilders and 5 Stivers current Money, and according to this Proportion, an *Engliſh* Guinea, or 21 Shillings Sterling, is worth 11 Guilders and 12 Stivers current Money, of *Holland*; or $9480\frac{9}{1\,3}$ Shillings Sterling are equal in Value to 5250 Guilders; or one Pound Sterling to about 36*s*. 11*d*. de Gros current Money; or if the Agio be reckoned at $4\frac{3}{4}$ *per Cent*. it will be found very near 35*s*. 3*d*. de Gros Bank Money.

The Par between London *and* Amſterdam *of Silver Money.*

According to the afore-mentioned Report made by the ſaid Sir *Iſaac Newton*, in the Year 1717, $11\frac{1}{1\,0}$ Ounces of pure Silver, and $\frac{9}{1\,0}$ of an Ounce of Alloy made 62 Shillings Sterling; in *Holland* 200 Pieces of 3 Guilders weigh 25 Marks, 5 Ounces $11\frac{5}{8}$ Engels, and are of the Standard of 11 Penny-weights; or in $1052\frac{2\,0\,0}{1\,3\,3}$ Shillings Sterling there is as much fine Silver as there is in the ſaid 200 Pieces of 3 Guilders, and the Value of 20 Shillings Sterling in 1717, was near to 38 Sch. current Money of *Holland*.

If the Compariſon be made by Ducatons, or by *Holland* Rixdales, inſtead of 3 Guilder Pieces, it will be found very near the ſame Value; for if it be true, as I am informed, that 200 Ducatons weigh 26 Marks 3 Ounces 15 Engels, and their Standard is $11\frac{1}{4}$ Pennyweight; and if 200 Rixdales weigh 22 Marks $6\frac{1}{2}$ Ounces of the Standard of $10\frac{1}{2}$ Pennyweight; when the 3 Guilder Pieces are fixed at 60 Stivers, the intrinſick Value of the Ducaton will be 63 Stivers $3\frac{2}{1\,7}$ Deniers, and the Rixdales 50 Stivers and almoſt 2 Deniers.

The Par between France *and* Holland *for the Gold Coin.*

A Mark of Gold Money, worth at preſent in *France* 720 Livres, is exactly 30 Louidors, and the Standard 21 Carats 7 or $7\frac{1}{2}$ Grains, we will take the Medium when, at 21 Carats $7\frac{1}{2}$ Grains, each Louidor ought to weigh $5\frac{1}{3}$ Engels; thoſe coined in the Year 1731 weigh 5 Engels and 10 Axen, which we may deem the true Weight. In 1000 *Holland* Ducats there is then as much pure Gold as in $466\frac{2\,9}{4\,0}$ Louidors. If the Ducat is counted at 5 Guilders 5 Stivers current Money, a Louidor, or 24 Livres *French*, is worth of *Dutch* Money 11 Guilders 5 Stivers, and the 3 Livre Crown almoſt $56\frac{1}{4}$ de Gros current Money; or 64 *French* Livres were, in 1731, of an equal Value with 30 *Dutch* current Guilders, and 16 *French* Crowns of 6 Livres are at a Par with 15 three Guilder Pieces; or 30 Ducats of *Holland* are worth 14 Louidors. The Proportions I here give are ſufficiently exact; for if 1000 current Guilders are reduced into *French* Money, there will be found by the ſaid Proportions only $\frac{1}{9\,0}$ of a Louidor, or $\frac{4}{1\,5}$ of a *French* Livre, leſs than by the intrinſick Value; $\frac{4}{4\,5}$ of a *French* Livre are $\frac{1}{3}$ of a Guilder.

If the Agio of $\frac{1}{4\,2}$ *per Cent*. upon the Bank Money be taken, the Value of 3 *French* Livres will be a ſmall Matter leſs than $53\frac{7}{8}$ de Gros Bank Money.

The Weight of 1000 Louidors of the Sun is 33 Marks, 1 Ounce of the Standard of 21 Carats, 7 Grains, *Koophandel van* Amſterdam, *2de Deel, pag*. 111. *ed*. A. 1727.

A. 1727, by which it is ſeen that they are near of equal Value with the new Louidor.

The Par between France *and* Holland *of the Silver Money.*

The King of *France*, by an Arret of the 25th of *May* 1726, fixed the Mark of Silver Money at 49 Livres 16 Stivers, and ſince that Time, I believe no Alteration has been made, the Standard is almoſt 11 Pennyweights, and that of the ancient Crown of 9 to the Mark was of 10 Pennyweights and 22 Grains, *Traité des Changes Etrangers, par Mr.* Dernis, Paris 1726. At preſent in *France* there are 6 Livre Crowns of $8\frac{3}{10}$ to the Mark, and it is ſaid that the Standard is 11 Pennyweights. In making the Calculation it will be found, that in 200 three Guilder Pieces there is as much pure Silver as in $213\frac{93}{320}$ *French* Crowns of 6 Livres, or each of theſe Crowns is worth pretty near $56\frac{1}{4}$ Stivers current Money of *Holland*; this is very near the ſame Value which we have found in the Gold.

The Silver Pieces of 24 Sols, coined in *France* 1726 and 1727, only weigh $3\frac{3}{4}$ Engels, and the Value in *Dutch* Money is $10\frac{15}{16}$ current Stivers.

Almoſt all Authors who have treated of a Par, have taken for a Foundation that the ancient Crown of 3 Livres or of 9 in a Mark, *by the Arret of the 16th of* September, 1666, *Mr.* Dernis, *Pag.* 4. was worth 100*d.* de Gros of *Holland*, or that the Mark of 11 Pennyweights *French* Money was worth 22 Guilders 10 Stivers; but at preſent by the Pieces of 3 Guilders the Value of the ſaid Mark is found to be 23 Guilders 7 Stivers, or that of a Crown of 3 Livres $103\frac{7}{9}d.$ de Gros current Money; upon which Footing the Calculation may be made in the preſent Time; for it ſhould be ſtated by the Rule of Three inverted; if, when the Mark of Money is fixed at 27 Livres, the Par is $103\frac{7}{9}d.$ de Gros, how much will the Par be if the Mark is worth $49\frac{4}{5}$. But it is eaſier to make the Calculation by the Crowns, becauſe it is found at preſent that there are $16\frac{3}{5}$ Crowns, of 3 Livres in a Mark; ſo it is ſaid if $16\frac{3}{5}$ Crowns are worth 23 Guilders and 7 Stivers current *Dutch* Money, how much ſhall one Crown be worth; and it will be found as aforeſaid, a little more than $56\frac{1}{4}d.$ de Gros. In the Beginning of the Year 1726 the Par was at $67\frac{1}{2}d.$ de Gros; it may be ſeen then, that it is very eaſy to find the Par, whether the King of *France* riſes or falls the Price of the Coin. In Caſe that it changes not only the Weight but the Standard, the direct Rule of Three ought to be ſtated by ſaying, The ancient Standard is to the Par that is found, as the new Standard is to the Par ſought for.

The Par between Liſbon *and* Amſterdam *for the Gold Coin.*

By an Ordinance of Monſ. the Count de *Daun*, it is ſeen, that the old Louidor of *France* weighed at *Milan* 5 Pennyweights and 12 Grains, and the Cruzado of *Liſbon* 8 Pennyweights and 18 Grains; 1000 of the ſaid Louidors weighed in *Holland* 21 Marks 1 Ounce and 15 Engels, or each Louidor 4 Engels $11\frac{1}{3}$ Azen; according to this Proportion, the Cruzado ought to weigh 6 Engels $29\frac{2}{3}$ Azen; if the Standard is reckoned, with Sir *Iſaac Newton*, at 21 Carats 7 Grains, as the ancient Piſtoles of *Spain* and *France* were, *Koophandel van* Amſterdam, *2de Deel, Pag.* 111 *and* 831, there will be found as much pure Gold in $358\frac{206}{729}$ Cruzados as in 1000 Ducats of *Holland*; and putting the Ducat at 5 Guilders and 5 Stivers, the Value of a Cruzado will be 14 Guilders 13 Stivers and 1 Denier current Money; and becauſe the Cruzado paſſes at *Liſbon* for 4800 Reis, 400 Reis are worth $48\frac{27}{32}d.$ de Gros current Money, or a little more than $46\frac{1}{2}d.$ de Gros Bank Money, if the Agio be taken at 5 *per Cent.* or 47*d.* de Gros, if the Cruzado weigh 7 Engels, as it is commonly reckoned. This may be done by a yet ſhorter Method; for by the Ducat it is found, that a Mark of the ſaid Cruzados is worth in *Holland* 338 Guilders 9 Stivers; and it is ſaid, if 160 Engels are worth 338 Guilders 9 Stivers, how much ſhall 7 Engels and 29 $\frac{2}{3}$ Azen be worth? *In a Book printed at* Amſterdam, 1630, *intitled*

titled, Sleutel des Koopmans, *Pag.* 318, *it is ſaid that the Par is* $63\frac{1}{16}$ *d. de Gros.*

A new Method to avoid the great Fractions.

In calculating the Par, or in making the Compariſon between Coins, great Fractions frequently intervene. As for Example: We have found in $210\frac{866}{1065}$ *Engliſh* Crowns of 5 Shillings Sterling, as much pure Silver as in $213\frac{93}{320}$ *French* Crowns of 6 Livres, or 1 Crown of 6 Livres has as much fine Silver as $\frac{224320240}{227282496}$ of an *Engliſh* one of 5 Shiillings, but the working of this with ſo great a Fraction being very troubleſome, it may be changed for a leſs Fraction that ſhall be almoſt of the ſame Value, which may be expreſſed as in the following Problem,

PROBLEM.

A great Fraction being given to find another, whereof the Denominator is leſs than a certain Number given, ſo that the Value of the Fraction that has been found, is the neareſt that can be to that given.

I change the Fraction given into another whoſe Numerator is Unity, and I do the ſame with the Fraction which is found in the Denominator, and ſo on.

I neglect for a Moment the Fractions of Fractions that are found at the End, and by that will be had all ſimiliar Fractions, which are alternatively the one too big and the other too little, as may be ſeen in the ſubſequent Example.

The Fraction given being $\frac{3147}{7793}$, it is demanded which is the Fraction moſt like it whoſe Denominator is leſs than 100.

But as I think our Author's Solution of his Problem is neither ſo correct nor clear as it ſhould be, I have attempted to make it plainer and more exact, though before I proceed to the Operation, it will be neceſſary to premiſe the following Lemma.

To find a Denominator to a given Numerator which ſhall make it the neareſt Fraction to a larger Fraction before given, let the firſt given Fraction be denoted by $\frac{n}{d}$, and the Numerator to the new Fraction be a, and its Denomiuator x, then we have $\frac{a}{x} = \frac{n}{d}$ therefore $nx = ad$ and $x = \frac{ad}{n}$ which put into Words gives this

Rule.

Multiply the Numerator of the new Fraction into the Denominator of the large one, which then divide by the Numerator of the great Fraction, and you will have the Denominator you ſought for your new Numerator: Now in Regard to the Problem, firſt find the Fraction whoſe Numerator is Unity, that ſhall be equal to $\frac{3147}{7793}$, which by the foregoing Lemma will be expreſſed $\frac{1}{1\times\frac{7793}{3147}} = \frac{1}{2\frac{1493}{3147}}$ if now you reject from the Denominator, the Fraction of Fractions, there is $\frac{1}{2}$ the neareſt (though too great) to $\frac{1147}{7793}$ when the Denominator muſt not exceed 4. But as the Problem admits an higher one, we repeat the Operation, thus $\frac{1}{2\frac{1}{2\frac{149}{1499}}}$ where you only ſubſtitute for $\frac{1499}{1147}$ its Value altered by the ſaid Lemma to $\frac{1}{2\frac{149}{1499}}$ and rejecting $\frac{149}{1499}$ we have $\frac{1}{2\frac{1}{2}} = \frac{2}{5}$ which is too great, but the neareſt of any whoſe Denominator does not exceed 50, to the given Fraction; but the Work may be by the Condition of the Problem repeated again $\frac{2}{5\frac{149}{1499}}$ and for $\frac{149}{1499}$ writing $\frac{1}{10}$ found as before, we have $\frac{2}{5\frac{1}{10\frac{9}{149}}}$ from which leaving out $\frac{9}{149}$, there is $\frac{2}{5\frac{1}{10}} = \frac{2}{\frac{51}{10}} = \frac{20}{51}$ which is too big, though it

is the Fraction ſought: for if the Work be again repeated, you will have a Denominator which ſhall be 817.

N. B. It appears by Inſpection that the higher the Denominator is, the near you approach to the Truth, for there is leſs omitted in the Denominator, ſo at laſt the Work would converge into the given Fraction.

Note alſo, that by the ſaid Lemma you may find a Fraction of a given Denominator, which ſhall be neareſt equal to a higher given Fraction; and as this is of a peculiar Uſe in fractional Works, I ſhall give the Rule it may be performed by.

Multiply the new Denominator into the Numerator of the firſt given Fraction, then divide by the great Denominator, and rejecting the Remainder as inconſiderable, your Quotient ſhall be your new Numerator. By this you may prove the foregoing Work, for if you chuſe a Denominator 51 and would find a Numerator to make it neareſt to $\frac{1147}{7793}$, then $\frac{51 \times 3147}{7793}$ gives 20, as before found.

A Compariſon of ſome COINS.

Of SILVER.

Though *Mr. Ricard* has not explained the foregoing Tables, I have judged it neceſſary to do it, that they may thereby be rendered uſeful.

In the firſt Line, the 20 *Engliſh* Crowns are not worth quite 57 Guilders, therefore at that Rate 100*l.* Sterling muſt produce leſs than it would have done had the 100 Shillings and 57 Guilders been exactly equal, and for the ſame Reaſon muſt make ſomething more Sterling Money; and to calculate the Deficiency of the Guilders, firſt find what Part of a Guilder $\frac{2}{3}$ of a Stiver is, which is eaſily diſcovered to be $\frac{2}{3}$ of $\frac{1}{20}$, or $\frac{2}{60}$, or $\frac{1}{30}$, and then the Stating will be,

As 100*l.* —— $\frac{1}{30}$ —— 5*l.*

Or as 20*l.* —— $\frac{1}{10}$ —— 1*l.* to $\frac{1}{600}$.

Therefore the Guilders are only $56\frac{599}{600}$. And by the ſame Reaſoning, the true Differences of the 2d Line in the *firſt*, and of the third Line in the *ſecond* Table may be diſcovered; but the others being of a different Nature; the Method for them may be demonſtrated by the third Line in the *firſt* Table, where 76 *French* Crowns of 6 Livres are worth a little more than 375*s.* Sterling; therefore 100*l.* Ster. muſt accordingly make the *French* Money leſs, and to find the real Value of 456 Livres in Shillings Sterling, ſay,

Fr. Cro.	*d.*	*Fr.* Cro.
As 1000 of 3 Liv.	—3¼ or $\frac{13}{48}$ of a Shill.	—76 of 6 Livres to the Sum ſought.
3		6
3)3000		3)456
8)1000		8)152
125		19

Then $\frac{13 \times 19}{125 \times 48} = \frac{247}{6000}$ which muſt be added to 375 Shillings to make the true Value of 456 Livres.

A Compariſon between fine Gold and Silver.

I ſhall not treat here of the Compariſon made between Gold and Silver by the ancient *Greeks* and *Romans*, but commence my Account of it much nearer our own Times. *Agricola* [a] ſays that a hundred Years before he wrote, or about 1440, one Part of pure Gold was given in *Germany* for thirteen ſimilar Parts of pure Silver [b]. In the Year 1457, it was regarded as a ſettled Price, that had, notwithſtanding the ſeveral Alterations in the Coins, ſubſiſted for ſome Time; the giving 84 Pennings of *Landſberg* Money for a Guilder of the *Rhine* [c], 100 of theſe Pennings weighing a Mark of *Erfurt*, the Standard was 2½ Pennyweights [d]; if the Mark of *Nuremberg* weighed at that Time 152 Engels [e], the Mark of *Erfurt* would be about 149 Engels that Weight [f], or the Guilder of the *Rhine* 23$\frac{1}{37}$ of fine Silver. In the Year 1461, the Mark of Silver at *Erfurt* contained 7$\frac{1}{37}$ *Rheniſh* Guilders [g], or the Value of the ſaid Guilder a little leſs than 21$\frac{1}{3}$ Engels pure Silver. In the Year 1528, a Mark of fine Gold of *Nuremberg* was worth 95 Guilders of the *Rhine*, and a Mark of fine Silver a little more than 8$\frac{1}{2}$ Guilders of the *Rhine* called golden Ones not coined [h]; ſo that 11 Marks of pure Silver were worth one Mark of pure Gold. In the golden Guilder of the *Rhine* there were 2$\frac{1}{16}$ Engels that Weight, of fine Gold [i], or the Guilder of the *Rhine* at that Time was eſteemed as 1$\frac{1}{8}$ Ounce of pure Silver; from that Time to the preſent, the Price of Gold in Regard to that of Silver is augmented in theſe Parts, about $\frac{1}{3}$: An Author aſſerts, that in 1390, Gold, in Reſpect to Silver, had four Times leſs Value than in 1687 [k], but the Error proceeded from this, that he made no Difference between the preſent *Holland* Guilder and the ancient one of the *Rhine*.

In 1717, the coined Silver in *England* was on ſuch a Footing, that 15$\frac{181}{320}$ Marks of pure Silver was of the ſame Value with a Mark of pure Gold; in *France* 15 Marks of fine Silver was reckoned as a Mark of fine Gold; in *Holland* 14$\frac{7}{9}$ Marks: in the *Eaſt-Indies*, in ſome Places, 12 Marks; as in the Kingdom of *Siam* in 1688. *Deſcription du dit Royaume par* M. de la Loubere, P. 221, *Amſt.* 1770. And in *China* and *Japan* about 10 Marks. Suppoſing the Value of Silver to be ſettled, that of Gold it is ſeen was greater in *England* than elſewhere; Strangers made their Payments in that Metal; but becauſe Silver was more valuable abroad, the *Engliſh* ſent their's to Foreigners; and for this Reaſon the Silver Coin became ſo ſcarce at Home, as to occaſion the diminiſhing the Value of the Guinea, by lowering it to 21 Shillings, as has been before obſerved; for by Trade, Gold and Silver would naturally paſs from thoſe Countries where their Value was leſs, to them where it was higher.

In 1000 *Dutch* Ducats there are 334 Carats 9½ Grains of pure Gold, and *if theſe are worth* 5250 *Guilders, how much ſhall* 24 *Carats be worth?* and the Anſwer will be 367 Guilders and 7 Stivers, the Value of a Mark of pure Gold in Coin. We have before found by the *Dutch* 3 Guilder Pieces that a Mark of 11 Pennyweights pure is worth 23 Guilders and 7 Stivers current Money; and the Mark of fine

[a] Dan. Angelocra. doctri. de ponder. Monet. Cap. 2. Pag. 28 and 29 Francf. *A.* 1628. [b] Id. de pretio Metallorum, P. 29. [c] *Hartungi Kamermeiſteri* Annales *Erfurtenſes* col. 1223. Vide *Menkenii* Scriptor. Rerum German. Tome 3. *Leipſ*: *A.* 1730. [d] Id. Col. 1186 [e] Angelocra. P. de pretio Metal. Pag. 47. [f] Id Pag. 26. ex *Agricol.* [g] Annal. *Erfurt.* Col. 1231. [h] Angelocrat. P. 65. ex Bilib. *Pirkheim.* Æſtimatio priſcorum Nummorum. [i] Angelocra. ex *Agricol.* & *Airckh.* P. 34 and 65. [k] *Simon de Uries* Groot. Hiſtoriſch Magazyn, Pag. 580, *Amſt.* P. 1688.

Silver has been found worth a little leſs than 25 Guilders and 9½ Stivers. In the ſame Manner it is ſaid, *if* 21½ *Carats of pure Gold are eſteemed in* France *at* 720 *Livres, how much ſhall* 24 *Carats be worth?* and, *if* 11 *Pennyweights of fine Silver are worth* 49⅘ *Livres, how much ſhall* 12 *Pennyweights be worth?* By Diviſion it will be found as follows; ſuppoſing that in the *Engliſh* Silver Coin there had been no Alteration made ſince 1717.

In { *England* 15 Marks 1 Ounce 13½ Engels, / *France* 14 Marks 5 Ounces 13⅜ Engels, / *Holland* 14 Marks 6 Ounces 4 Engels, } fine Silver for 1 Mark of fine Gold.

From whence it is ſeen that Mr. *Dernis*, Page 2, and Mr. *Wiertz* are not exact, becauſe they ſay, that the Proportion between pure Gold and Silver in *Holland* is fixed at 14⅓; and it is alſo found in this laſt-mentioned Author, Pag. 491, that the Mark of fine Gold is fixed in *Holland* at 355 Guilders current Money, which is very true, but if the Value of a Ducat is taken to be 5 Guilders 5 Stivers, as it commonly paſſes, there is an Agio of 6 *per Cent.* in the Specie of Ducats; I know very well that theſe riſe and fall a Trifle; but the Agio on Gold muſt not be neglected, otherwiſe the Ducat is never worth above 4 Guilders 19 Stivers.

This I think ſufficient to give an Idea of the Par of Monies, and I ſhall finiſh it with an Inſtance of an arithmetical Queſtion abbreviated, concerning *Spaniſh* Wool; as it is ſometning curious, and may be inſtructive.

It is known to all concerned in that Trade, that the Wools of *Germany* and *Poland* are ſold at *Amſterdam* with an Allowance of fifteen Months' Diſcount, and one *per Cent.* for prompt Payment; for which the Merchants deduct exactly a Tenth; and for thoſe of *Spain* 24 lb. are always allowed for Tare on 175lb. beſides a Deduction of twenty-one Months' Diſcount, and one *per Cent.* for prompt Payment; and in Order to inveſtigate a ſhorter Method for calculating theſe Abatements on the *Spaniſh* Wools than has hitherto been practiſed, without neglecting the Fraction which is often found in the Tare, our Author, Mr. *Samuel Ricard*, invented the following Rule.

Rule.

1ſt. Multiply the Pounds by the Price, and from the Product ſubtract a quarter Part, and the Remainder will be expreſſed by *A*.

2d. Take 1 *per Mil.* from *A.* and the 10th muſt be deducted; the Remainder will be *B.* The Difference of *A. B.* will be the Sum ſought for, which will ſurpaſs the true Anſwer upon 11000 Guilders about half a Stiver.

3d. To correct this, there muſt be taken away from the Guilders of *B.* ⅕. and ſubtract as many Deniers as there are of Guilders for the Remainder, and it will come to about 1⅓ Denier too little on 1,000,000 Guilders' Worth of Wool.

Example.

It is demanded how much ought to be paid for ſome Bales of Wool, which weigh, after the Tare marked on the Bales is deducted, 9975lb. Tare 24lb. on 175lb. and each lb. at 31½ Stivers, with twenty-one Months' Diſcount, and one *per Cent.* for prompt Payment? The Anſwer is 11,772 Guilders, 6 Stivers, and 12 Deniers.

Of Arbitrations of Exchange.

Monſ. *De la Port, Science des Negocians. Sam. Ricard, Traité gen. de Commerce. J. Laru.* P. 545. Monſ. *de Mondotteguy Traité des Arbitrages.* Mr. *J. P. Ricard, le Négoce d'Amſterdam*, P. 640.

ARBITRATION, a Conſtruction of the *French* Word *Arbitrage*, in Exchanges, has been variouſly defined by the ſeveral Authors who have treated of it.

One ſays it is a Combination or Conjunction made of many Exchanges, to find out what Place is the moſt advantageous to remit or draw on.

Another deſcribes it, by ſaying it is only the Foreſight of a conſiderable Advantage which a Merchant ſhall receive from a Remittance or Draught, made on one Place preferably to another.

A third conſtrues it to be a Truck which two Bankers mutually make of their Bills upon different Parts, at a conditional Price and Courſe of Exchange.

According to a fourth, it is the Negociation of a Sum in Exchange, once or oftener repeated, on which a Perſon does not determine till after havinig examined by ſeveral Rules, which Method will turn beſt to Account.

And though theſe ſeveral Diſtinctions are couched in different Terms, they ſeem, if rightly conſidered, to have the ſame Meaning, whereof ſome may be counted the Text on which the others ſerve as Comments or Expoſitions.

Before any Perſon applies himſelf to the Study of this Subject, it is neceſſary that he ſhould be well ſkilled in all the practical Operations, in Regard to the reducing of the Sterling Money of *England* into the foreign Monies of Exchange, and of Account of all Places of *Europe*, according to the direct Courſes of Exchange eſtabliſhed for theſe Purpoſes, and *vice verſâ*.

Alſo, that he ſhould be acquainted with the Methods of converting Sterling Money into the Monies of Exchange, and of Account, of all other Places of Commerce, wherewith *England* has no direct eſtabliſhed Courſes of Exchange, but is under the Neceſſity of making Uſe of the intermediate Exchange of other Places: Together with the Nature of the *Agios*, and the Manner of converting their Bank Monies into Current, and the Reverſe.

That he ſhould be able to calculate the Par of all foreign Monies throughout *Europe* with thoſe of every diſtinct Country, either according to the direct, or intermediate Exchange, which makes a much greater Variety of Caſes, than thoſe who are not thoroughly acquainted with this extenſive Subject can imagine.

It is neceſſary likewiſe, as a preliminary to the Practice of Arbitration of Exchanges, to know the intrinſic Value of foreign Coins, according to the moſt accurate *Aſſays* which have been made for that Purpoſe.

Finally

Finally, it is requiſite to underſtand the general natural Cauſes of the Riſe and Fall of the Courſes of Exchange between Nation and Nation, or between one trading City and another in the ſame Nation.

Arbitrations are divided by the Writers on them into Simple and Compound, of which I ſhall ſuccinctly give ſome Examples, and endeavour, as plainly as I can, to illuſtrate ſuch Rules for their Operation as may render it eaſy both to the Apprehenſion and Performance; my Predeceſſors having conſigned me this Taſk by unamiouſly leaving the Solution of their Queſtions too much in the Dark to be comprehended by moſt of their Readers, as they have contented themſelves with replying to the Queries, without ſhewing their Method of performing, and have thereby rendered abortive their pretended Deſign of conveying Inſtruction; which could no otherwiſe be done than by a Delivery of their Ideas and Conceptions in ſuch a Manner as might leave them open, and eaſy to be followed and practiſed.

A Simple, or Single, *Arbitration*, is to be wrought by the Direct, or Inverted, Rule of Three; and to diſtinguiſh which of theſe Rules is to be uſed in working any Queſtion relative thereto, it muſt be obſerved:

1. That an Arbitration muſt be cyphered by the direct Rule of Three when the *firſt* Term of Stating is more than the *third*, and that the Quotient is leſs than the middle Term. And,

2. This Rule muſt be uſed when the *firſt* Term is leſs than the *third*, and the Quotient is more than the middle one.

And the two following Remarks will ſhew when the Indirect, or Inverted Rule, is to be followed.

1ſt. The Queſtion muſt be worked by the Inverted Rule of Three when the *firſt* Term is leſs than the *third*, and the Quotient leſs than the middle Number.

2d. The Operation muſt be by this Rule, when the *firſt* Term is more than the *third*, and the Quotient more than the middle Term.

And whether the Arbitrations be ſimple or compound, a Price of Exchange muſt always be ſuppoſed, when a Reimburſement is ordered on any other Place than that from whence it is directed.

Whatſoever Number of Figures enter into a compound Arbitration Queſtion, the firſt and laſt muſt be of the ſame Species, and the Rules muſt be commenced by the Species ſought for.

Theſe Maxims being well underſtood, and applied to the Examples, will facilitate the Operation of the Rules of Arbitration to thoſe who pay any Attention to them.

And as the Uſe of ſome Characters inſtead of Words will conſideably abbreviate the Work in the Solution of the ſubſequent Examples, I have employed them to this Purpoſe, and ſhall here explain them once for all.

× ſignifies multiplied by, as 10 × 54, is 10 multiplied by 54.

A Number above a Line, with another under it, ſpecifies that the uppermoſt muſt be divided by that beneath, or the Numerator by the Denominator, from whence $\frac{24 \times 67 \times 19}{15 \times 28 \times 12}$ ſignifies, that 24 multiplied by 67, multiplid by 19, muſt be divided by 15 multiplied by 28, multiplied by 12; and $\frac{54}{234\frac{1}{793}}$ denotes, that 54 is to be divided by 234, increaſed by $\frac{1}{793}$.

= ſignifies, equal to, as $10 = 5 \times 2 = 8 \times \frac{5}{4}$.

This premiſed, I proceed to my propoſed

Firſt Example.

A. of *Lyons* orders *B.* of *Cadiz* to draw upon him at 76 Sols *per* Dollar, provided at the ſame Time he can remit him on *London*, at 42*d.* Sterling alſo *per* Dollar, but as *B.* drew at $75\frac{1}{2}$, it is demanded at what Exchange he may remit on *London* to complete this Order; and this is anſwered by the Direct Rule of Three as follows:

If 76 Sols give 42*d*. Sterling, what ſhall $75\frac{1}{2}$ Sols give?

42
150
300
21
76)3171(41 $\frac{5}{6}$ *d*. Ster. Anſwer.
304
131
76
55

Second EXAMPLE.

A. of *Oporto* had Orders to draw on *Rouen*, at 490 Rees *per* Crown of 60 Sols, provided he could at the ſame Time remit on *Leghorn* at 770 Rees *per* Dollar; but as on Receipt of the ſaid Order he could get no more for his Bill than 488 Rees, it is demanded at what Price he ought to remit on *Leghorn*, to recompenſe the ſaid Diminution in his Draughts; which is ſolved by the Inverted Rule of Three, in the following Manner.

If 488 Rees——770——490
770
34160
3416
490)375760(766 $\frac{42}{490}$ or $\frac{6}{7}$, the Anſwer.
343
327
294
336
294
42

Third EXAMPLE.

To be anſwered by the Double Rule of Three.

A. of *Amſterdam* orders his Friend at *Madrid* to remit him upon *Lyons*, at 64 Sols *Tournois* for a new Dollar of 340 Maravadis, and to draw upon him at 100*d*. de Gros *per* Ducat of 375 Maravadis. It is demanded at what Price the Exchange turns out to him between *Amſterdam* and *Lyons*.

The common Way of Working it.

64 Sols——340 Marav.
375 Marav.——100*d*.——60 S.
320
448
192
24000
Dv ſor.
34000
60
2040000
Dividend, therefore $\frac{2040000}{24000} = \frac{204}{24}85 =$ Groots.

And

And the moſt compendious Method by abridging the Numbers I ſhall thus ſhew.

If $\left.\begin{matrix}64\\374\end{matrix}\right\}$ are equal to $\left\{\begin{matrix}340\text{ Mar.} & 16\text{ Sols}\\100\text{ Groots} & 15\text{ Mar}\end{matrix}\right\}$ muſt be equal to $\left\{\begin{matrix}85\text{ Maravadis.}\\4\text{ Groots, then}\end{matrix}\right.$

Quere 60 Sols as before. But to reduce the Work lower ſtill, it appears that you may divide a Member on each Side of the laſt Equation by 4. and another on each Side alſo by 5, therefore feu will have 4 Sols 17 Mar.

3 Mar. 1 Groot, wher

4 multiplied by 3 is in the ſame *Ratio*, or Proportion, to 17×1 or 17, as 64×375 is to 340×100. But as the Anſwer was found by multiplying 60 into the laſt *Ratio* $\left(\text{or }\frac{340\times100}{64\times375}\right)$ ſo it may be likewiſe had by multiplying the 60 into the foregoing *Ratio*, *viz.* $\frac{17}{12}$ whence we have the Work brought into this ſmall Compaſs $\frac{60\times17}{12}$, which may be yet more contracted, as 60 and 12 are commenſurable by 6, and will become $\frac{10\times17}{2}=85$, the ſame as before. This well obſerved fully explains the Method for contracting the moſt extenſive compound Arbitrations, as well as theſe ſimple ones. The Manner of ſtating the compound ones I ſhall give in another Place.

Fourth Example.

B. of *Amſterdam* gives an Order to *E.* at *Cadiz*, to remit on *Hamburgh* at 124 Gros Lubs for 1 Ducat of 375 Maravadis, and to draw for him at 126 Groots de Gros for the ſaid Ducat. It is demanded at what Price the Exchange will be between *Amſterdam* and *Hamburgh?* Anſwer at $32\frac{16}{31}$ Stivers *per* Daalder of 32s. Lubs.

For $\frac{31}{124}$ Gros Lubs = 1 Ducat.

1 Ducat = 126 Groots of *Amſterdam* — 31s. Lubs.

8 — 8

31)1008(32$\frac{16}{31}$ Anſwer.
93.
78
62
16

The four preceding Examples may ſuffice to ſhew the different Methods of Working by the Direct, Inverted, and Double Rule of Three; but thoſe that follow being more complex, and their Operations more difficult to be reduced into as ſmall a Cyphering as what has been juſt now done, and the common Practice ſhews, I have borrowed the Aſſiſtance of the following Tables from Mr. *Samuel Richard*, as he did the Principles of them from another, of which he himſelf gives the ſubſequent Account.

" It is ſome Years ſince, that Monſieur *John Henry Laſkoſky* delivered a Me-
" morial into the late Duke of *Orleans's* Hands, then Regent of France, ſuc-
" ceeded by a Second, preſented by the Marquis *de Grancey*; in both which he
" offered to communicate to the Publick a very ſhort and uſeful Method for
" calculating of Arbitrations, which he termed *The principal Part of Arithmetick*;
" provided his Royal Highneſs would be pleaſed to appoint him Secretary to the

" Council of Trade. In the mean Time, he kept the Demonſtration of his Pro-
" blem a Secret, though with Offers to diſcloſe it, if the Regent would conde-
" ſcend to grant him a private Audience. In the firſt Memorial there was a
" Fragment of three Tables for the Exchanges, between *France*, *Spain*, and
" *Holland*; and in the ſecond there was alſo a Part of three other Tables, for the
" Exchanges of *Genoa*, *Lyons*, and *Venice*; but whether a Want of Friends or
" other Reaſons impeded his Succeſs, he never was able to obtain his Requeſt.
" The Copy of theſe Memorials is fallen into our Hands, and we have diſco-
" vered the true Foundation, not very difficult to be found out: I obſerve in this
" Method, 1ſt, That the Author from the over Care he took to hide the Origin
" of his Tables, fell into an Inconvenience, that induced him to alter or change
" his own Rule. 2dly, That it requires more Tables, and theſe greatly extended,
" to ſuffice for Uſe on the principal Places of Exchange. 3dly, If any one would
" calculate with Exactneſs, he cannot expect Profit and Loſs in the ſame Table,
" and to remedy theſe Defects, we have compoſed the following Tables, which
" may ſerve for all Parts, that can be propoſed, if the Trouble is only taken to
" put them into the Table Number IV. which is no ways difficult to be effected;
" and not to make a Secret of this Projection, we have placed the Numbers
" ſo clearly, that a Mathematician will immediately perceive the Source.
" Our Manner then is ſuch, that all Perſons may do it, without over much
" Attention, provided they are Maſters only of the firſt four Rules of Arith-
" metick, and it will even ſuffice that they know Addition and Subſtraction in
" entire Numbers. If any one is deſirous of extending or making the Table
" Number I. greater, it is only neceſſary for him that makes the Calculation
" to have a Knowledge of the Coins uſed in Exchanges."

A Rule for what is received, and for what is given.

If the Money of the Place remitted to is fixed, and the Exchange varies in that from whence the Remittance is made, then it muſt be written *given*; as for Example, a Merchant at *Amſterdam* remits on *London*, *Paris*, *Cadiz*, &c. in which three laſt Places, the Coin is fixed, with Reſpect to the firſt; but if the Specie of the Place remitting is fixed, and that the Exchange of thoſe, where the Remittance is made to, riſes and falls, as from *Amſterdam* on *Dantzick*, *Coningſbergh*, &c. it ought to be written *received*.

11	506	511	516	521	526	531	535	540	545	550

An Explanation of the Tables.

N°. II. is for *London*; N°. III. is for *Hamburgh*; if the Exchange is found in the 8ths and 16ths: N°. I. is for all other Places; and for *Hamburgh* when the Exchange is in Shillings, $\frac{1}{2}$ Shillings, and $\frac{1}{4}$ Shillings, N°. IV. ſerves to ſhew the Numbers that muſt be added together, *viz.* all thoſe that are found on the ſame Side.

The 5th and 6th are for Profit and Loſs. If it is found that the Sum of the Addition of the Side in which to find that given is leſs than the other Sum of the Side where what is received is, it muſt be ſought for in the Table of Profit, N°. V. and when there is a Loſs, in that of N°. VI. And that the Uſe which may be made of theſe Tables may the eaſier be comprehended, I ſhall here add ſome Examples.

First EXAMPLE.

A. of *Amſterdam* remits on *London* to *B.* at 34*s.* $5\frac{1}{2}$ Groots, what *B.* remits for the Account of *A.* to *Cadiz* at $49\frac{3}{4}d.$ Sterling *per* Dollar. If the Merchant at *Cadiz* remits the Produce on *Amſterdam* at $121\frac{1}{2}$ Grts. of *Holland per* Ducat of 375 Maravedis; it is demanded how much *A.* hath gained or loſt excluſive of the Charges.

Solution by the Tables.

He gives		He receives	
34*s.* $5\frac{1}{2}$ Grts.	2654	$121\frac{1}{2}$	7335
$49\frac{3}{4}d.$	3457		7215
Fixed Number	1104		
	7215		120

$2\frac{4}{5}$ *per Cent.* gained.

The Operation.

d,	Maravedis.	*d.*
If $49\frac{3}{4}$	272	240 will give $1312\frac{32}{199}$ Maravedis.
Mar.		
If 375	$121\frac{1}{2}$ Grts.	$1312\frac{32}{199}$
	2	199
	243	11810
	2	11821
		1312
		261120
		199

Now

Now the 2d and 3d Terms multiplied, and divided by the firſt in the Order they now ſtand, will be expreſſed as follows:

$\frac{243 \times 261120}{2 \times 199 \times 375}$, which gives 425 Groots.

Now the Difference between 34*s*. 5 Gts. $\frac{1}{2}$ and 425 Gts. is 11 $\frac{1}{2}$ Gts. therefore

$\frac{11\frac{1}{2}\text{ Gts.}}{34s.\ 5\frac{1}{2}\text{Gts.}} \times 100 = \frac{23}{827} \times 100 = 2\ \frac{8}{10}$ nearly.

By the Double Rule of three

d.	M.	*d.*	Groots.	Mar.
$49\frac{3}{4}$	375	240	$121\frac{1}{2}$	272
4			2	
199			243	
4			2	

You may now expreſs the laſt three Terms divided by the firſt two, thus,

$\frac{240 \times 243 \times 272 \times 4}{199 \times 375 \times 2} = 425$, as before.

Second EXAMPLE.

A. of *Amſterdam* remits to *B.* of *Dantzick*, at 276 Groſs of *Poland*, for one Livre of Groſs, the which *B.* remits on *Hamburgh* at $115\frac{1}{2}$ Groſs for 148 Shillings Lubs; if *Hamburgh* remits what it amounts to, to *A*, at $33\frac{3}{10}$ Stivres *per* Daalder of two Marks Lubs: it is demanded how much *per Cent*. *A.* has gained or loſt, omitting the Charges.

Solution by the Tables.

A. gives $115\frac{1}{2}$	7115	*A.* receives	
N°. fixed	2510	$\frac{1}{2}$ 276 is 138	7888
		$33\frac{3}{10}$	1699
	9625		
	9587		9587

39 or $\frac{9}{10}$ *per Cent*.

By the Rule of Three.

Groſs	Shillings Lubs	Groſs
If $115\frac{1}{2}$	48	276 will give $114\frac{54}{77}$, then
Shil. Lubs	Sti. of *Amſterd.*	S. Lubs
If 32	$33\frac{3}{10}$	$114\frac{54}{77}$

This ordered according to the foregoing Example will produce $118\frac{9}{10}$ Stivers, which taken from the 120 Stivers firſt given, there remains $1\frac{1}{10}$ Stivers, therefore

S.	S.	S.
as 120	$1\frac{1}{10}$	100 to $\frac{11}{12}$, the Loſs *per Cent*.

By the Double Rule of Three.

Groſs	S. L.	Groſs	Stivers of *Amſterd.*	S. L.
$115\frac{1}{2}$	32	276	$33\frac{3}{10}$	48

The fractional Terms being reduced into improper Fractions, as theſe in the firſt Example, the Operation then will be entirely ſimilar to the laſt in the ſaid Example, and gives $118\frac{9}{10}$ Stivers, as before.

Third Example.

Two Perſons *A.* and *B.* at *Paris*, have Occaſion for Money at *Cadiz*; *A.* remits directly, and gives 18 Livres 3 Sols *per Spaniſh* Piſtole; *B.* chuſes the Way of *Holland*, and orders to be remitted him from *Amſterdam* at 121 $\frac{1}{4}$ Groots for a Ducat of 375 Maravedis; *Amſterdam* reckons $\frac{1}{2}$ *per Cent.* Charges, and draws for his Reimburſement at the Rate of 56 $\frac{1}{4}$ Groots *per French* Crown of 60 Sols; it is demanded which of the two Methods proved moſt advantageous.

Anſwer; his who remitted directly.

Operation by the Tables.

A. gave 56 $\frac{1}{4}$	3990	*B.* gave 121 $\frac{1}{4}$ Groots	7326
$\frac{1}{4}$ of 36 Sols is 90 $\frac{3}{4}$	6067	$\frac{1}{2}$ *per Cent.*	22
	10057	Fixed Number	2876
			10224
			10057
		Seek in Number VI.	167

$3\frac{4}{5}$ *per Cent.*

Otherwiſe,

By reflecting on the Nature of the Queſtion, it appears, that what *Amſterdam* reckons for Charges may be conſidered to increaſe the Number of Sols ſo much more than *B.* would otherwiſe have paid for the 375 Maravedis; therefore firſt ſay, if 100 —— $\frac{1}{2}$ ——60, or if 10 —— $\frac{1}{2}$ —— 6, or if 5 —— $\frac{5}{100}$ ——3 muſt give $\frac{3}{100}$, which *B.* muſt pay at *Amſterdam* for his Charges for every 60 Sols in the Value of the 375 Maravedis. But inſtead of finding the Sols *B.* muſt pay, excluding the Charges, and then computing the Charges, and adding them to the Sols laſt found for *B*'s whole Payment, you may by Parity of Reaſon ſay,

	Groots	Sols	Groots	
As	56 $\frac{1}{4}$ ——	60 $\frac{3}{100}$ ——	121 $\frac{1}{4}$	to 129 $\frac{29}{50}$ Sols paid by *B.* for a Ducat.

Laſtly, to compare whether *A.* or *B.* has ſucceeded beſt, ſay,

	£. s.	the Maravedis in a Piſtole	Sols	
If	18—3 ——	1088 ——	129 $\frac{29}{50}$	will give 389 Maravedis, which *B.* would have got inſtead of 375, had he changed as *A.* did; therefore it is manifeſt, that in receiving only 375 he had leſs than *A.* for the ſame Sum of *Paris* Money by 14 Maravedis; and to make a Calculate *per Cent.* it will

	Mar.	Mar.	
be as	375 ——	to 14 ——	100 to $3\frac{7}{10}$, the Anſwer.

Fourth Example.

A Merchant of *Hamburgh* orders us to draw for his Account on *Dantzick*, at 270 Groſs of *Poland* for 1 Livre de Groſs, and to remit the Amount on *London* at 35 Schillings *per* Pound Sterling, or at other Rates' which may be more advantageous for him, provided he can draw on *Dantzick* at 261 Groſs of *Poland*; it is demanded at how much he ought to remit to follow the laſt Order? Anſwer, at 36 Schillings 2 $\frac{1}{2}$ Groots.

Solution

Solution by the Tables.

Take the Half of the Groſs of *Poland* according to the Order, and the Exchange will be 135 and $130\frac{1}{2}$

Order { 135 — 7793
35 Schil. 2721

10514
$130\frac{1}{2}$ 7645

2869 this muſt be ſought for in the Table for *London*; and the Schillings and Groots of Groſs, which correſpond with this Number will be found to be 36 Schillings $2\frac{1}{2}$ Groots.

By the Rule of Three

In this Queſtion it is obvious that as the Groſs of *Poland* given for a Livre de Groſs decreaſe, the Schillings given for a Pound Sterling muſt proportionably increaſe, to follow the Condition of the laſt Order; hence the Queſtion is an inverted one in the Rule of Three, and thus ſtated.

Groſs of *Poland* — Schillings — Groſs of *Poland*
If 270 ——— 35 — 261, wherefore

$\frac{270 \times 35}{261}$ gives 36 Schillings, and the Remainder multiplied by 12 for Groots, and the next by 2, for half Groots, at each Time dividing by 261, brings out $2\frac{1}{2}$ Groots nearly.

Fifth Example.

There is an Order to *A.* of *Amſterdam* to draw on *Paris* at $53\frac{3}{4}$ Groots *per* Crown, and remit on *London* at 34 Schillings 1 Groot *per* Pound Sterling, or at other Prices which might be as profitable to him who gave the Order. If they can draw at $56\frac{1}{4}$ and remit at 34 Schillings $7\frac{1}{2}$ Groots; it is demanded whether he can comply with this Commiſſion, and how much this differs *per Cent*. Anſwer, our Correſpondent receives more than he firſt ordered about 3 *per Cent*.

Solution by the Tables.

		S.	Groots	
34 Schil. 1 Groot	2606	34	$7\frac{1}{2}$	2675
$56\frac{1}{4}$ Pence	3990	53	$\frac{1}{4}$	3793
A. receives by the Exchange	6196	and by the Order		6468

6468

128 ſeek in the Table of Profit, and you will find about 3 *per Cent*.

By the Rule of Three.

Groots — S. Groot — Groots Sch. — Groots
As $53\frac{3}{4}$ ——— 34 — 1 ——— $56\frac{1}{4}$ to 35 — 8 — the Rate at which *A.* might remit *per* Pound Sterling to *London*, when he drew on *Paris* at $56\frac{1}{4}$ Groots *per French* Crown; but he only remitted at 34*s*. $7\frac{1}{2}$ Gts. therefore in remitting this laſt Sum he gained 1 Schil. $\frac{1}{2}$ Grt. the Difference between 35 Schil. 8 Gts. and 34 Schil. $7\frac{1}{2}$ Grts. and to find what that comes to *per Cent*, ſay,

Sch. — Grts. — Grts. — Grts.
If 34 — $7\frac{1}{2}$ — $12\frac{1}{2}$ — 100 will bring out the Anſwer.

Sixth

Sixth Example.

There is an Order to draw on *Frankfort* 100 Rixdollars current Money of *Amſterdam* for $128\frac{1}{4}$ Rixdollars of *Frankfort*, and to remit on *London* at 35 Schillings Bank Money *per* Pound Sterling, on Condition that the *Agio* ſhall be 5 *per Cent.* If after this our Correſpondent writes to us, to omit executing his Order, if not already done, unleſs he receive 2 *per Cent.* more from *London* than he had ordered: If they can only draw on *Frankfort* at 135 Rixdollars that Money for 100 Rixdollars of *Amſterdam*, it is demanded, at how many Schillings the Remits muſt be made to follow the laſt Order? Anſwer, 34 Schillings $4\frac{1}{3}$ Groots.

Solution by the Tables.

$128\frac{1}{2}$	7586	135	7793
5 *per C.*	212	2 *per C.*	86
35 Schil.	2721		
	10519		7879
	7879		
	2640		

This Number ſeek in the Table for *London*, and you will find 34 Schillings $4\frac{1}{3}$ Groots correſpond thereto.

For a different Solution, it is eaſy to conceive that when the *Agio* is high the leſs *Frankfort* Money is given for current Money of *Amſterdam*, the Exchange being by Banco Money, conſequently the leſs Banco Money muſt be remitted to *London per* Pound Sterling; whence it is clear, that the Way to get 2 *per Cent.* from *London* by remitting at the ſame Rate as before, you muſt conſider the *Agio* as ſo much leſs; therefore inſtead of 95, we have 97 Rixdollars Banco Money of *Amſterdam* for $128\frac{3}{4}$ Rixdollars of *Frankfort*, at which Rate I find the Bank Money of *Amſterdam* equal to 135 Rixdollars of *Frankfort*; thus,

Rixd. of *Frank.*	Rixd. Banco of *Amſt.*	Rixd. *Frank.*
If $128\frac{3}{4}$	97	135 will give

$101\frac{73}{103}$. But by the Queſtion there are only 100; therefore the Remittance on *London* muſt be made accordingly leſs, by ſaying,

	Schil. Banco	Rixd.
As $101\frac{73}{103}$	35	100 to the Sum ſought.
103		
306		
1017		
		Sch. Groots.
10476	Now $\frac{35 \times 100 \times 100}{10476}$ will give	34 $4\frac{2}{11}$ the Anſwer.

Seventh Example.

T. of *Berlin* remits for his proper Account to *U.* of *Amſterdam*, a certain Sum of Bank Money, at 133 Rixdollars for 100 Rixdollars Bank Money of *Amſterdam*, ordering him to remit the nett Produce to *A.* of *Genoa*; *U.* effects it at 96 Groots *per* Dollar of 5 *Genoeſe* Livres. *A.* on his Part remits this to *B.* who lives at *Turin*, at 128 Sols of *Piedmont* for one Crown of *Genoeſe* Money of $7\frac{3}{5}$ Livres, who takes Bills on *Geneva* at 84 *Piedmont* Sols for one Crown current of *Geneva*, and remits them to *C.* who in his Turn remits the Amount on *Frankfort* to *D.* at 130 Rixdollars of *Frankfort* for 100 Crowns current of *Geneva*, who finally takes Bills at 132 Batz Money of *Frankfort* for one Pound Sterling, 1 Rixdollar at *Frankfort* makes $22\frac{1}{2}$ Batz, the which he remits to *T.* himſelf: If the five Commiſſioners,

namely, *U. A. B. C.* and *D.* deduct each $\frac{1}{3}$ *per Cent.* for their Proviſion; it is demanded at what Rate the Exchange muſt be between *Berlin* and *London* ſo that *T.* gains 3 *per Cent.* Anſwer, $6\frac{1}{48}$ Rixdollars *per* Pound Sterling.

Solution by the Tables.

133	7728		128	7561
96	6312		130	7628
84	5732		Numb. fixed	8193
132	7695			
3 *per C.*	128			23382
5 Proviſions at $\frac{1}{4}$ *per C.* each	73			
	27668			
	23382			
	4286			

This ſought in Table I. there will be found $60\frac{5}{24}$, wherefore take $\frac{1}{10}$ and it ſhall be your Anſwer, $6\frac{1}{48}$ Rixdollars.

Otherwiſe.

The general Method for ſuch extenſive Queſtions is as follows: The Inveſtigation whereof I ſhall clearly ſhew before I conclude this Subject.

1 Pound Sterling at *London*	= 132 Batz Money of *Frankfort*.
$22\frac{1}{2}$ Batz Money of *Frankfort*	= 1 Rixdol. Money of *Frankfort*.
100 Rixdol. Money of *Frankfort*	= $99\frac{2}{3}$ Rixdol. Mon. the Proviſion deducted.
130 Rixdol. Money of *Frankfort*	= 100 Crowns current of *Geneva*
100 Crowns current of *Geneva*	= $99\frac{2}{3}$ Crowns current at *Geneva*, the Proviſion deducted.
1 Crown current of *Geneva*	= 21 84 Sols of *Piedmont* at *Turin*.
100 Sols of *Piedmont*	= $99\frac{2}{3}$ S. of *Piedmont*, the Proviſion deducted.
4 112 Sols of *Piedmont*	= 1 Crown of *Genoa*.
1 Crown at *Genoa*	= 152 Sols of *Genoa*.
20 Sols at *Genoa*	= 1 Livre at *Genoa*.
100 Livres at *Genoa*	= $99\frac{2}{3}$ Livres at *Genoa*, the Proviſion deducted.
5 Livres at *Genoa*	= 3 90 Groots Banco of *Amſterdam*.
100 Groots Banco of *Amſterdam*	= 1 Crown of *Amſterdam*.
100 Crowns Banco of *Amſterdam*	= $99\frac{2}{3}$ Crowns Banco of *Amſterdam*, the Proviſion deducted.
100 Crowns Banco of *Amſterdam*	= 133 Rixdol. of *Brandenburgh* at *Berlin*.
how much	= 1 Pound Sterling at *London*.

Eighth EXAMPLE.

C. of *Genoa* remits for his own Account to *D.* of *Venice*, a certain Sum at 104 Marchetti for 4 Livres of *Genoa*, ordering him to remit the nett Produce to *E.* at *Florence*; *D.* effects it at 75 Crowns d'Or of *Florence* for 100 Ducats of *Venice*. *E.* takes Bills on *Leghorn* at 119 Sols for 6 Livres of *Florence*, which he remits to *F.* who takes others on *Novi*, at 175 Dollars for 100 Crowns de Marc of *Novi*, who remits them to *G.* who in his Turn remits them to *H.* of *Milan* at 180 Sold. Imp. for a Crown de Marc, who makes a Remiſs at *Amſterdam* to *I.* of 52 Sols of *Milan*, whereof 140 are worth 106 Soldi Imp. for a Guilder of *Amſterdam*, who finally takes Bills on *London* at 34 Sch. *per* Pound Sterling, which he remits to *C.* himſelf, for whoſe Account all theſe Negociations were made. If ſix of the Correſpondents deduct each 1/2 *per Cent.* for Charges, it is demanded at what Price the Exchange was between *Genoa* and *London*, if *C.* finds that the Money he has been in Diſburſe for 6 Months has brought him in an Intereſt after the Rate of 8 *per Cent. per Annum.* Anſwer, 55 89/100 *d.* Sterling *per* Dollar of 5 Livres.

Solution

Solution by the Tables.

$\frac{1}{2}$ of 175 is $87\frac{1}{2}$	5909	114	6659
52	3649	75	5240
34	1804	119	7244
Fixed Number	9549	$\frac{1}{2}$ of 180 is 90	6031
6 Proviſions at $\frac{1}{2}$ *per Cent.* each	$130\frac{1}{2}$		
4 *per Cent.* gain	170		25174
			$21211\frac{1}{2}$
	$21211\frac{1}{2}$		

$3962\frac{1}{2}$ which anſwers to $55\frac{89}{160}$.

After having found the Exchange, which is here between *London* and *Genoa* 58$\frac{13}{100}$*d.* Sterling for a Dollar, it muſt be ſeen how much *per Cent.* ought to be gained by the Exchange, which the Example tells us is 8 *per Cent. per Annum.* We ſee, beſides this, that *C.* has been in Diſburſe 6 Months; ſo it ought to be worked by the direct Rule of Three, and ſay,

If 12 Months gain 8, how much ſhall 6 gain?

2 4

The Anſwer will be 4, that is to ſay 4 *per Cent.*

Afterwards there is to be obſerved what has been ſaid before of the certain and uncertain Price, and of the direct and indirect Rule in our Example. *Genoa* gives the Price certain, then it muſt give to *London* 4 *per Cent.* leſs than it has received, and conſequently it muſt be wrought by the indirect rule of Three, and ſay,

If 100——give 58$\frac{13}{100}$*d.*——how much ſhall 104 give?

100

104)5813(Anſwer, 55$\frac{92}{104}$*d.* Sterling for a *Genoa* Dollar.

Having

Having ſolved the two preceding Problems in the moſt conciſe Method that I believe is poſſible, except by Tables; I ſhall now demonſtrate in their Explanation how to perform, in the ſame Manner, all Queſtions relative to Arbitrations. And firſt, I ſhall deduce the Rule for ſtating them from the ſecond Example of the Double Rule of Three preceding the Tables, where the firſt Term is fixed; the ſecond ſhewing what different Money was given for it; the third, how much of the ſame Specie as the ſecond is given for the fourth; then what Quantity of the Specie of the fourth, for a fifth Term given, which is of the ſame Name as the firſt Term. Now as all ſuch Queſtions, exceeding five given Numbers, may according to that Exceſs be called Queſtions of the Treble, Quadruple, Quintuple, *&c.* Rule of Three, for whoſe Stating I derive the Rule from the foregoing Remark, which will be exactly ſimilar or agreeable to it; only I ſhall, for Brevity's Sake call the firſt Term, the firſt Antecedent; the ſecond Term, the firſt Conſequent; the third Term, the ſecond Antecedent; the fourth Term the ſecond Conſequent, *&c.* and now expreſs the Rule.

The firſt Antecedent muſt be a fixed Exchange, and of the ſame Denomination with the laſt Conſequent; the ſecond Antecedent muſt be of the ſame Name as the firſt Conſequent; the third Antecedent of the ſame Specie as the ſecond Conſequent, and ſo on, always making the Antecedents of the ſame Name or Specie as their preceding Conſequent, which you cannot but do if you follow the Conditions of a given Queſtion, and if you have ſo done you will find your laſt Term of the ſame Specie with the firſt, and then the Demand or Anſwer will be of the ſame Name as the laſt Conſequent but one: if you find your Work ſtand otherwiſe, moſt likely you have miſtaken the firſt Term. The Queſtion being thus prepared, it is plain that the Sum of the Antecedents muſt be regarded as equal to the Sum of their Conſequents, as each Antecedent is ſuppoſed equal to its reſpective Conſequent; therefore their Products muſt be accordingly ſo; for Inſtance, if

5 = 2 more 3, and
6 more 4 = 10, and
7 more 5 = 8 more 4

then 5 × by both 6 and 4, × by both 7 and 5 = 600 = 10 × by both 2 and 3, by both 8 and 4;

but as one of the Antecedents in every Queſtion is unknown, whilſt all the Conſequents are otherwiſe, we have an unknown, though ſuppoſed, Quantity multiplied by the known Antecedents, = to the Product of the Conſequents, therefore the unknown Quantity, or Anſwer, is found by dividing the Product of the Conſequents, multiplied by one another, by that of the Antecedents, multiplied in the ſame Manner. For Example; ſuppoſe the Caſe were, what unknown Quantity × by 59 would be equal to 472, then I ſay 472 divided by 59 gives the ſought Quantity, *viz.* 8. Now in order to contract the Work, it is plain that it is the ſame thing whether you divide a Product, which had divers Multiplicators, or you divide one of the Multiplicators, which will admit it, by *that* Number, and then multiply by the reſt $\left(\text{Inſtance } \frac{2 \times 3 \times 12}{6} = 12 = \frac{12}{6} \times 2 \times 3\right)$ It is likewiſe evident, that if any two Numbers be divided by the ſame Number, their Quotients will be in the ſame Proportion as the Numbers were. Inſtance 12 divided by 4 is 3, and 20 divided by 4 is 5; wherefore as 3 is to 5, ſo is 12 to 20; which was to be ſhewn. Hence it follows, that, if when a Queſtion is ſtated you can divide any Antecedent and Conſequent, though they are not Oppoſites, by the ſame Number, the Equality is ſtill kept up; and thus you muſt continue to do, till you can find no Antecedent and Conſequent commenſurable by the ſame Number, then ordering this laſt Equation as above directed, you will have the Solution; and *note*, that the laſt Conſequent, to which the Anſwer is ſought, is ſubject to the Diviſion as the reſt; for the Product of the laſt, multiplied by the other Conſequents, is ſtill the ſame, whether the laſt or any other is divided by the ſame Number; this may be ſeen by the laſt Inſtance but one, if you call 12 the laſt Conſequent; and from what has been ſaid, I infer, that every Antecedent after the firſt muſt be of the ſame Denomination, as

well as the ſame Specie, as its preceding Conſequent; and that if any Antecedent or Conſequent conſiſts of different Denominations, you muſt, to retain the Equality, either reduce both them and their reſpective Conſequents and Antecedents into the ſame Denomination, or otherwiſe make the lower Denomination an aliquot Part or Parts of the higher, as 3*l.* 3*s.* Sterling would be $3\frac{3}{20}$ and then the others remain unaltered; and *note*, that in the ſecond given *Examples*, where the Antecedents and Conſequents are ſcratched, they have been divided, and the Quotients ſtand towards the left, ſeparated by a point, *thus*, 4. 11 8; and what has been here ſaid in Regard to the Queſtions of Money, holds good alſo for thoſe concerning Weights and Meaſures, which may be wrought exactly by the foregoing Rules.

EXAMPLE.

If 100lb. at *London* be equal to 106lb. at *Lyons*, and 30lb. at *Lyons* are worth 32lb. at *Paris*, and 113lb. at *Paris*, made 90lb. at *Frankfort*, and 12lb. at *Frankfort* are given for 18lb. at *Venice*, and 125lb. at *Venice* are the Value of 97lb. at *Cadiz*; then how many lb. at *Cadiz* are equal to 60lb. at *London*? Anſwer $51\frac{7}{10}$

Being ſtated and contracted according to the preceding Rules, the Work will ſtand thus.

100	lb. at *London*	=	106	lb. at *Lyons*.
5. 30	lb. at *Lyons*	=	4. 32	lb. at *Paris*.
113	lb. at *Paris*	=	3. 90	lb. at *Frankfort*.
1. 4. 12	lb. at *Frankfort*	=	3. 18	lb. at *Venice*.
19. 125	lb. at *Venice*	=	97	at *Cadiz*, then
how many	lb. at *Cadiz*	=	60	at *London*.

With the preceding, I finiſh the Examples of Arbitrations, having therein given an Inſtance of every Caſe that can happen in this curious Branch of Arithmetick, ſo that any Addition would be ſuperfluous, and unneceſſarily encroach on my Reader's Time, without adding any thing to his Inſtruction; which I believe he will find more truly promoted in this ſhort Tract, than he would by conſulting the many Volumes publiſhed on the Subject; as he has here the Reaſons for all the Operations propoſed, added to the Solutions, which other Authors have contented themſelves with giving alone.

I have only one Remark to add to this Chapter, which is, that thoſe who are well ſkilled in this Buſineſs generally agree to ſupport their Correſpondent's Commiſſion free on all Sides; wherefore, when it is conſidered what Opportunities the Merchant, or Remitter of general Credit and Correſpondence has, the Benefits, by a judicious Combination, or Compariſon of the Exchange throughout *Europe*, are far more conſiderable than moſt People imagine. Thoſe, who are ſhrewd Exchangers themſelves, generally make Choice for theſe Negociations of Correſpondents not leſs ſo; and then they are certain of the Profits they have in View, for they know that their Orders will lie by unexecuted till the advantageous Criſis arrives.

Concerning Bankruptcy.

Felix quem faciunt aliena pericula cautum

THE preceding Chapters contain the whole Theory and Practice of Commerce; and I hope I have been ſo plain and explicit in them as to render myſelf intelligible, and to anſwer my Deſign of conveying Inſtruction to thoſe who have given themſelves the Trouble of ſeeking it in this Work.

I have now gone through every Branch of Commerce, and purpoſely reſerved this Cataſtrophe of an imprudent or miſtaken Conduct to the laſt, as the propereſt Place for it. And I could wiſh that the Misfortunes, conſequent to an ill judged and indiſcreet Courſe or Management, did not render this additional Chapter neceſſary for the Guidance of thoſe who have unhappily incurred the Want of it, through the gloomy Vale of Trouble: For could Trade be always carried on with that Credit which is neceſſary to ſupport it, and with that Succeſs which every one hopes for, by adventuring in it, it would be the moſt pleaſant as well as the moſt beneficial Employ that any could undertake; but as we are all ſubject to the uncertain fluctuating State of Humanity; our Serenity will ſometimes be interrupted, and our Calms and Sunſhine be obſcured and ruffled by the Clouds and Tempeſts of Adverſity, as well in this as in all other Walks of Life, and the ſmooth Paths of Buſineſs will often become rugged and ſtrewed with thorny Troubles, to the utter Change of the pleaſing Scene, by introducing inevitable Loſſes and Misfortunes, inſtead of the Advantages we flattered ourſelves with the Hopes of reaping from our commercial Engagements. Thus the beſt-laid Scheme may be overſet by ſome intervening Occurrence, for a trifling Accident frequently demonſtrates the Weakneſs of our Judgement, and the Shallowneſs of our Deſigns; though whilſt we ſubmit our Actions to the Directions of Prudence, and ſuffer our Steps to be guided by *her*, we may juſtly be ſaid to act like reaſonable Men; and however Providence, for our Puniſhment, may diſpoſe otherwiſe, we certainly take the beſt and likelieſt Method of ſecuring to ourſelves that Succeſs and Proſperity which we are ſolliciting: and in Order to guard againſt their Reverſe, permit me to intrude ſo long on your Patience as to expatiate a little on the Subject of Bankruptcy, and to ſhew you the Cauſes which naturally drive Men to ſplit on that Rock, where ſo many Thouſands have been wrecked, reminding you of my Motto, where you will ſee the great Poet from whom I have taken it, pronounced that Man happy who has been made wiſe by the Misfortunes of others.

Mr. *Savary* ſays, in his *Parfait Negociant*, that the Failures of Merchants oftener proceed from *Ignorance*, *Imprudence*, and *Ambition*, than from *Malice* and *Deſign*; aud I am entirely of his Opinion, more eſpecially in this Kingdom: For, whoever reflects on the Conſequences of Fraud and Deceit under a Statute of Bankruptcy here, I ſhould think would avoid it with the utmoſt Care; as he not only expoſes himſelf to the Penal Laws, but can never expect to be cleared by his Creditors, though he ſhould not be convicted under the former, and conſequently is rendered incapable of making any Thing his own for the future. But as I hope none of my Readers are of this Number, I ſhall direct my Advice to thoſe on whom I am in Hopes it may prevail, and endeavour to guide them from running on the aforementioned Shoals, by perſuading them to aim at the Diſſipation of the Fogs of *Ignorance* by the Sunſhine of Learning; to correct *Imprudence*, and to baniſh *Vain-Glory* or *Ambition*. The firſt may be done by a ſtrict Application to Buſineſs, whilſt under the Tuition of a Merchant in an Apprenticeſhip; or if this has been neglected, and my Reader comes into Trade without ſuch uſual Form and Inſtruction, I hope this Work will ſupply the Deficiency, not only by teaching every one how to act in the Branch of Commerce he has elected, but by diſplaying to him a general Trade, that he may have all the Variety poſſible to chuſe out of: Sound Judgement and common

Senſe

Senſe duly applied, will be too hard for *Imprudence*; and *Ambition*, I ſhould think, would be checked by diſplaying the fatal Conſequences of it; and thus a Failure proceeding from all or any of the above-mentioned Cauſes may be prevented; though ſtill there remains one, from which no Foreſight or Care can defend us, I mean the immediate Diſpoſitions of Providence; whereas the above are but ſecondary, to which we ought chearfully to ſubmit with a perfect Reſignation, and never murmur nor repine at any of his Diſpenſations, in a full Aſſurance that he will afford Support and Comfort under the Affliction, to every one who ſincerely truſts in him, and, when he ſees convenient, will give a happy Releaſe from it. It is true theſe are hard Leſſons to Mankind, and rendered more irkſome by the barbarous Treatment the Unhappy too commonly meet with; for though it is natural to imagine, that a Man who has been truly honeſt in all his Dealings, and eſteemed for his Integrity, ſhould on a Reverſe of Fortune meet with that Pity and kind Uſage he has ſhewn to others under ſimilar Diſtreſſes; yet Experience convinces us that this is rarely the Caſe; on the contrary, it is generally found that though Friends may ſeem many and ſtaunch in the time of proſperity, yet on a Change of Circumſtances they will drop off like blaſted Fruit, quite forgetful of Favours ſhewn to and Kindneſſes done them, and at the Time you become Bankrupt in your Fortune, you will certainly find them ſo in Affection and Returns of Gratitude: Favours ſeem no longer regarded than while you are in a Capacity to continue them, and Obligations are thruſt among the Number of the Non-entities, or at leaſt are become ſuch unfaſhionable Things, as only to be owned by the Conſcientious and Benevolent.

Acts of Beneficence are not to be expected from Creditors, whoſe Loſſes generally ſour their Tempers, and keep their Reſentments warm againſt the unhappy Occaſion of them, even to the Extinction ſometimes of Humanity. But one ſhould think that the Lamentations of a fallen Familiar and Intimate, frequently heightened by the Tears of a tender Wife, and affecting Cries of their innocent Children, would be prevailing Objects to excite Compaſſion from thoſe who have always experienced a courteous and gentle Treatment from the unhappy Sufferers; but Philanthrophy is almoſt loſt among us, and Mankind are grown ſo degenerate, as to become inſenſible to the Diſtreſſes of others; the unfortunate Man is now equally ſhunned with the infected one, and the beſt Uſage he finds is Coldneſs and Reſerve from almoſt every individual of his Acquaintance, whilſt the worſt is ſwelled to an immoderate Height by the Inſults offered him; Contumelies and Reproaches are thrown out againſt him; and Abuſes, Invectives and unmerited Aſperſions are frequently added to complete the Catalogue, and augment his Miſeries; few regard him, fewer ſtill careſs him, and the Paucity of thoſe who protect or aſſiſt him, is reduced to the loweſt Degree of Compariſon. This is generally the Caſe with thoſe whom Fortune has proſtrated and laid low; though there is ſtill a ſmall Remnant of Men among us, who are actuated by every tender Sentiment of Humanity, and, as Opportunities offer, exerciſe every ſocial Virtue; whoſe Compaſſion at leaſt is extended to all afflicted Objects, and their Charity ſtretched to the utmoſt Limits that Prudence and Diſcretion can warrant; they remain uninfluenced by the Example of their Neighbours, and continue fixed and immoveable in the Principles of Goodneſs and Benevolence; but theſe Guardian Angels are ſcarce, and even when found can, at beſt, only alleviate, and in ſome Degree mitigate and take off the ſharp Edge of Affliction, but they cannot reſtore loſt Credit and Reputation; this is only to be done by the Man himſelf, and the ſole means is the making all the Satisfaction to his Creditors that his Abilities will permit, either at preſent or in future, till his whole Debts are diſcharged; for ſo long as any Part of theſe remain unpaid, that Obligation ſubſiſts. This Leſſon, Honeſty and a juſt Reflection on Things will teach men; and as the Miſeries ſubſequent to, and attendant on a Failure, are extenſive, it is natural to ſuppoſe the bare Deſcription will render every other Perſuaſive ſuperfluous, for avoiding the Cauſes of ſuch great Unhappineſs; therefore, I ſhall conclude this Introduction with my beſt and ſincereſt Wiſhes, that none of my Readers may ever experience it, by adding one to the Number of the Unfortunate.

Of Bankruptcy in *England.*

The Derivation of the Word *Bankrupt* I have given under that of *Banks* and *Bankers*; and though, according to our Laws ſuch Inſolvents are generally eſteemed a crafty, fraudulent, deceitful, and extravagant Sort of Perſons, yet Experience evinces the Unjuſtneſs of this Aſſertion, and that many unhappily fall into this Dilemma through the Badneſs of Trade, or ſome inevitable Accident, without bringing it on themſelves either by Extravagance or Knavery. The Laws of Bankruptcy in England are therefore juſtly conſidered as Laws calculated for the Benefit of Trade, and founded on the Principles of Humanity as well as Juſtice; and to that End, they confer ſome Privileges not only on the Creditors, but alſo on the Bankrupt himſelf. On the Creditors, by compelling the Bankrupt to give up all his Effects to their Uſe, without any fraudulent Concealment: On the Bankrupt, by exempting him from the Rigour of Common Law, whereby his Perſon might be confined at the Will of his Creditor, though in Reality he had no Effects to ſatisfy the Debt: Whereas the Law of Bankrupts, taking into Conſideration the ſudden and unavoidable Loſſes to which Men in Trade are liable, has given them the Liberty of their Perſons, and ſome pecuniary Allowances, upon Condition they ſurrender up their whole Eſtate to be divided among their Creditors*. But ſtill it is cautious of encouraging Prodigality and Extravagance by this Indulgence to Debtors, and therefore it allows the Benefit of the Laws of Bankruptcy to none but actual Traders; ſince that ſet of Men are, generally ſpeaking, the only Perſons liable to accidental Loſſes, and to an Inability of paying their Debts, without any Fault of their own. I ſhall give a Tranſcript of the Acts now in Force, and of the beſt Reports and Pleadings I can collect on the Subject; and ſhall in the firſt Place ſhew,

What Perſons may, *or* may not, *be Bankrupts.*

13 *Eliz.* C. 7. Any Perſon uſing the Trade of Merchandize by Way of
Bargaining, in Groſs or Retail,
Exchange,
Rechange,
Bartery,
Cheviſance,
or otherwiſe,

21 *Jac.* 1. C. 19. Or, ſeeking his Trade or Living by buying and ſelling, being a natural-born Subject;

21 *Jac.* 1. C. 19 S. 15. Or, an Alien, or being a Denizen, may become Bankrupts.

5 *Geo.* II. C. 30 S. 39. Bankers, Brokers, and Factors, may be Bankrupts.

An Inn-keeper as ſuch can be no Bankrupt.

Nor one victualling the Fleet, though he ſells the Overplus to Merchants.

Skinner, 276. 291. 3. Mod. 327. 328. 1 *Show.* 96, 268. 3 *Lev.* 309. *Mich.* 1 *W.* and *M.* in *B. R.* A meer buying and ſelling brings not a Man within the Statute (for buying and ſelling of Land will not make a Man liable to be a Bankrupt) but it is intended of ſuch who gain the greateſt Part of their Living both by buying and ſelling of perſonal Effects. Having a Share in a Ship; being a Farmer, or keeping a Boarding-School, makes not a Bankrupt; Buying only, or ſelling only, makes not a Bankrupt, but buying in *England*, and ſelling in *Ireland* does.

The Caſe of Sir *Thomas Littleton*, Mr. *Papillon*, & al. 1 *Vern.* 687. *Raym.* 375. 1 *Syd.* 411 per *Hardw.* Chan. *Mich.* 1737. 1 *Sal.* 110. *John Aſhley* went from *England* in 1720, and reſided in *Barbadoes* till 1735, where he was a Factor and a Planter, and traded to *England*, by ſending Goods, from his Plantation, and receiving Goods back again bought in *England*, and he diſpoſed of Goods ſent from *England* in *Barbadoes*, for Merchants in *England* as a Factor, and being greatly indebted came to *England* in 1737, and committing an Act of Bankruptcy, a Commiſſion iſſued, and upon a Queſtion, *whether he was within the Statutes of Bankrupts*; upon the Authority of *Bird* and *Sedgwick* (where a Gentleman of the *Temple* going to *Liſbon*, turning Factor, trading to *England*, and breaking) was adjudged a Bankrupt.

* Blackſtone's Comment. Vol. II. P. 472.

Where a Man buys and ſells under a particular Reſtraint, as a Commiſſioner of the Navy, or a Farmer, he is not a Seller within the Statute. 1 *Sal.* 110. *Mar.* 35. *Criſp. and Pratt.*

Sir *Anthony Bateman* had been a great Merchant, and was Mayor of *London*, but had left off Trade fifteen Years; the Court held he could not be a Bankrupt upon a Debt contracted after; but the Jury found him ſo upon ſuch Debt, and a new Trial was refuſed. *Cro. Car.* 549.

If a Trader contracts Debts and leaves off his Trade, he is ſtill liable to be a Bankrupt for thoſe Debts, but not for thoſe he ſhall contract afterwards. 1 *Syd.* 411. 1 *Vent.* 29. S. C. 166.

If a Man whilſt a Trader owes a Debt of 100*l.* to *A.* and leaving off his Trade borrows another 100*l.* of the ſame perſon, and then pays him one of the 100*l.* without mentioning, whether in Satisfaction of the former or the latter Debt, yet it ſhall be applied to the former, and the Creditor ſhall never charge him with a Commiſſion of Bankruptcy for that which remains. Reſolved *per Holt*. *Comb.* 463.

A Farmer, as ſuch, cannot be a Bankrupt; but if he deals in buying and ſelling Potatoes, Wool, *&c.* as a Trader in thoſe Commodities, he may be a Bankrupt. *Cro. Car.* 549.

No perſon who ſhall adventure any Money in the *Eaſt-India* Company, or *Guinea* Company, or any joint Stocks of Money by them raiſed for carrying on the Trade by the *Eaſt-India* Company or *Guinea* Company to be managed; or who ſhall adventure any Money in any Stocks for managing the Fiſhing Trade, called the Royal Fiſhing Trade; nor any Member of the Bank of *England*, on Account of his Stock; nor Perſons having Shares in the *London* or *Royal Exchange* Inſurance Companies, ſhall be Bankrupts in Reſpect thereof. 13 and 14 Caſes C. 24 S. 3, *Geo.* I. C. 18. S. 10.

No Farmer, Graſier, or Drover of Cattle, or any Receiver-General of Taxes granted by Act of Parliament, ſhall be deemed a Bankrupt. 5 *Geo.* II. C. 30. S. 40.

Thoſe Perſons who live on their Manual Labour only, as Huſbandmen, Labourers, bare Handicrafts-men, *&c.* are not within the Statutes; but ſuch as buy Wares, and convert them into ſaleable Commodities, and ſo get their Living by Buying and Selling, may be Bankrupts; as a Shoemaker, who buys Leather and ſells it in Shoes; an Ironmonger, buying Iron and cauſing it to be wrought into Wares; a Nailer, Lockſmith, *&c.* *March.* Rep. 37. *Cro. Car.* 31.

A Carpenter in *London* has been adjudged a Bankrupt, but not as a working Carpenter. *Chapman* v. *Lampſhire.*

A Clothier that buys Wool, and has it made up into Cloth, or works it into Cloth himſelf, may become a Bankrupt; but a Taylor who makes Garments only, as a Servant to his Cuſtomers, cannot be a Bankrupt, though a Saleſman may. *Crump's* Caſe.

It is held, that a Vintner, Brewer, Baker, Weaver, Dyer, Tanner, *&c.* may be Bankrupts.

Members of Parliament, being Merchants within the Deſcription of the Statutes relating to Bankrupts, are made ſubject to the Bankrupt Laws; but are not liable to Arreſt, except in Caſes made Felony by thoſe Laws. 4 *Geo.* III. C 3.

An action of the Caſe will lie, for ſaying, of a Merchant, Mercer, Grocer, Shoemaker, Dyer, Weaver, Corn-Maſter, or Baker in *London*, a Milliner, or any other Tradeſman that gets his Living by Buying and Selling, that he is a Bankrupt. *Noy* 158. 4 Rep. 19. 1 Ro. Abr. 61.

What makes a Man a Bankrupt.

1ſt, To depart the Realm, or 13 *Eliz.* C. 11
2d, To begin to keep Houſe, or otherwiſe,
3d, To abſent himſelf. 1 *Jac.* 1 C. 15.
4th, To take Sanctuary.
5th, To ſuffer himſelf wilfully to be arreſted, for any Debt or Thing not grown due, or for a juſt Conſideration.
6th, To ſuffer himſelf to be outlawed.
7th, To yield himſelf to Priſon; and
8th, To depart from his Dwelling-houſe to the Intent or Purpoſes to defraud or hinder a juſt Creditor or Creditors of his or their juſt Debts or Duty.

9th, Willingly or fraudulently to procure himſelf to be arreſted, or his Goods, Money, or Chattels, to be attached or ſequeſtered.

21 *Jac.* I. C. 15. 10th, To make any fraudulent Grant or Conveyance of his Lands, Tenements, Goods or Chattels, to the Intent, or whereby his Creditors may be defeated or delayed in the Recovery of their juſt Debts.

21 *Jac.* I. C. 19. 11th, Being arreſted for Debt, ſhall after his Arreſt lie in Priſon two Months upon that or any other Arreſt or Detention for Debt. Theſe to be Lunar Months.

12th, Procuring any Protection; as that of Foreign Ambaſſadors, the Verge of the Court, or any other than that of Privilege of Parliament.

13th, Being arreſted for 100*l.* or more, of juſt Debt or Debts, and eſcaping out of Priſon.

Palm. 325. 14th, If a Man conceals himſelf in his Houſe but a Day or an Hour, to delay or defraud his Creditors, it makes him a Bankrupt.

15th, If a Merchant-Trader indebted keeps in another Man's Houſe, or on Ship-board; it is adjudged a keeping in his Houſe; but the withdrawing muſt be on Purpoſe to defraud Creditors; and if a Man goes ſometimes at large ſo as he may be met with one Time or other, it will excuſe him.

16th, Neglecting to make Satisfaction for any juſt Debt to the amount of one hundred Pounds, within two Months after Service of legal Proceſs for ſuch Debt, upon any Trader having Privilege of Parliament.

5 *Geo.* II. C. 30. S. 24. 17th, Paying or giving Security to a petitioning Creditor whereby he ſhall privately have more in the Pound than the other Creditors, conſtitutes a freſh Act of Bankruptcy, ſuperſedes the Commiſſion obtained by ſuch favoured Creditor; and another Creditor by Petition, ſhall have a new Commiſſion granted; and the firſt petitioning Creditor ſhall be obliged to refund the Sum or Sums he had partially received from the Bankrupt, and ſhall be excluded from all Benefits whatever under the ſecond Commiſſion; his whole Debt being forfeited.

4 *Geo.* III. C. 35. 18th, Any Member of Parliament being a Merchant and owing more than 100*l.* to any one Creditor, and not paying, receiving, or compounding with ſuch Creditor, or not giving Bond with two ſufficient Sureties to be approved by a Judge of the Court in which the Action is brought, within two Months after he has been ſerved with a Summons for that Purpoſe, ſhall be accounted a Bankrupt.

1 *Sal.* 110. If a Man commits a plain Act of Bankruptcy, as keeping Houſe, *&c.* though he after goes abroad, and is a great Dealer, yet that will not purge the firſt Act of Bankruptcy: but if the Act was not plain, but doubtful, then going abroad, and trading, will be an Evidence to explain the Intent of the firſt Act; for if it was not done to defraud Creditors, and keep out of the Way, it will not be within the Statute.

Hopkins v. *Ellis*, on an Iſſue directed.

If after a plain Act of Bankruptcy committed, he pays off, or compounds with all his Creditors, he is become a new Man.

Sal. 109. *Came* v. *Coleman.* Adjudged in *B R.* and confirmed Exh. C. Lying in Priſon makes a Man a Bankrupt from the firſt Arreſt, that is from the time of his firſt Arreſt, upon which he lies in Priſon, and not where he puts in ſufficient Bail, for that might be infinitely prejudicial and miſchievous, and no Man would ever ſafely pay or receive from a Tradeſman.

Sal. 110. The laſt Reſolution is contradicted by that in *Smith* and *Stracy*, where it is held by *Holt*, that if a Defendant renders in Diſcharge of his Bail, and lies two Months, he is a Bankrupt from the firſt Arreſt, and not from the Render only,

2 *Show.* 519. but the Commiſſion being taken out before the two Months were expired, it was held ill taken out.

Hope v. *Gill.* adjudged by Lord *Raym.* at *Guildhall*, *Mich.* 5 *Geo.* II. The lying in Priſon two Lunar Months makes a Man a Bankrupt from the firſt Arreſt, and although the Commiſſion was taken out before the two Months were expired, yet he appearing afterwards to be a Bankrupt by a Relation to a Time before the taking out the Commiſſion, it was held ſufficient.

1 *Keb.* II. *Bradford's* Caſe. Acts of Bankrupts muſt be *in fraudem Creditorum*, as if a Man be outlawed it muſt be *in fraudem Creditorum*.

Hutt. 42, 43. *Cartwright* v. *Underhill.* though darkly reported. A fraudulent Deed, made long before any other Act of Bankruptcy committed, ſhall not be deemed an Act of Bankruptcy.

If after a Commiſſion is iſſued, the Bankrupt ſhould pay, or ſatisfy, or ſecure, the petitioning Creditor his Debt, ſuch Payment, Satisfaction, or Security

ſhall

ſhall be an Act of Bankruptcy, and the firſt Commiſſion ſhall be ſuperſeded, and a new one granted. 5 *Geo.* II. C. 30. S. 24. 21 *Jac.* I. C. 19. S. 1.

To prefer a Bill or Petition to the King, or any of his Courts, to compel the Creditors to compound, or give further Time, is an Act of Bankruptcy. But theſe Sort of Bills will not now lie and therefore are diſuſed.

In Reſpect to the Attachments and Sequeſtrations, they muſt be of the Party's immediate procuring, and not by his mere *Default* or *Laches* to make him a Bankrupt within the Stat. 1 *Jac.* I. C. 15. And what Sales and Conveyances made by Perſons, ſhall be deemed fraudulent within the Statute to make them Bankrupts may be conſidered two Ways;

1. Either ſuch as are made long before a Perſon becomes a Bankrupt, &c. or;

2. Such as are made ſome ſhort Time before; for what is done after the Time of Bankruptcy is totally void. *Gooding* 30, 31.

If a Trader finding himſelf in a ſinking Condition with Reſpect to his Fortune makes a Conveyance of all his Land and Goods to Truſtees, for the Payment of his real Debts, and then abſconds; this Conveyance, though it may be truly and honeſtly intended, ſhall not excuſe him, for his very abſenting makes him a Bankrupt; but if he does not abſcond, and declares his Intention to pay his Debts, and the Truſtees act accordingly, paying proportionably as far as it will go; ſuch a Conveyance, without other Act, ſhall not make him a Bankrupt, as here is no Fraud.

Before the making the Statute 5 *Geo.* II. C. 30. one *Norcourt*, who had long followed the Buſineſs of a Goldſmith, on *Michaelmas* Day 1726, after ſhutting up his Shop, and contemplating his Inability to pay what he owed, made an Aſſignment to one *Small*, of two Leaſes, and alſo of two Thirds of his Stock in the Wine Trade, which he was concerned in with one *Oudley*, being about the Value of 300*l.* and this he did to give a Preference to his Creditor *Small* (though without his Knowledge) and to ſecure his Debt, who in Friendſhip had then lately advanced him a conſiderable Sum of Money. *Norcourt* never opened his Shop again, but went off the very next Day, and was afterwards found a Bankrupt, and to have become ſuch the Day after *Michaelmas* Day; and on taking out the Commiſſion all his Eſtate was aſſigned by the Commiſſioners to one *Man*, an Aſſignee.

On this, *Small*, who was the Aſſignee of theſe Leaſes, and likewiſe of the two Thirds in the Wine Trade, brought his Bill againſt *Man*, the Aſſignee in the Commiſſion, and againſt *Oudley*, the Partner in the Wine Trade, to oblige them to account; it was here objected for the Defendants, that this Aſſignment made by the Trader when it was reſolved by him that he would be a Bankrupt the next Day, and to prefer this Creditor to all others, by which the equal Diſtribution of his Effects intended by the Statute is prevented, muſt be a void Aſſignment; beſides it being made without the Privity of *Small*, &c. is therefore fraudulent; after all which, *Small* comes to have this eſtabliſhed, and through Partiality to be aſſiſted in a Court of Equity, which, if allowed, will effectually ſet aſide ſuch Parts of ſeveral Statutes as give an equal Diſtribution of the Bankrupt's Eſtate to all his Creditors.

Maſter of the Rolls. This is a Caſe of Conſequence, as it affects Trade in general, and as it tends to fruſtrate the Statutes made for the equal Diſtribution of Bankrupts' Effects; but I ſtill think the Aſſignment made by *Norcourt* to *Small* the Plaintiff is good, and that he is entitled to an Account of this Wine Trade againſt the Defendant *Oudley*,

As to the Matter of Bankruptcy, that is a Term not known to our commen Law, but introduced by Statutes; the 3d of *Hen.* VIII. C. 4. which is the firſt, is very imperfect, the next of the 13th of *Eliz.* C. 11. is more large, and that Statute has been ſince enlarged by ſeveral ſubſequent ones: Now theſe Statutes do aſcertain what Acts make a Bankruptcy, and there can be no ſuch Thing as an equitable Bankruptcy, it muſt be a legal one.

There may be juſt Reaſon for a ſinking Trader to give Preference to one Creditor before another; to one that has been a faithful Friend, and for a juſt Debt, for Money lent to him in Extremity, when the reſt of his Debts might be due from him as a Dealer in Trade, wherein his Creditors may have been Gainers; whereas the other may not only be a juſt Debt, but all that ſuch a Creditor has in the World to ſubſiſt upon; in this Caſe, and ſo circumſtanced, the Trader honeſtly

may, nay, ought to give the Preference; and in ſuch Caſe, it is not the Time when the Aſſignment was made by the Trader that is material, provided it be before the Bankruptcy, but the Juſtneſs of the Debt is very material.

The Objection, that *Small* the Aſſignee did not know of this Aſſignment ſeems rather an Advantage to him, for this ſhews, that there was no Fraud nor Importunity uſed by the Aſſignee; and oftentimes, upon the Account of mere Importunity, a Trader has, when in Trouble, been prevailed upon to make ſuch Aſſignment.

And as to the Creditor, the Aſſignee's coming into Equity, I admit that every Perſon who comes here, ought to come with an innocent and juſt Cauſe; and the now Plaintiff, for what appears, does ſo; however, what diſtinguiſhes the preſent Caſe in his Favour is, that the Aſſignment being of a *Choſe in Action*, he could in the Nature of the Thing apply no where elſe for Relief, or to have the Benefit of the Aſſignment, but in Equity.

As to Precedents, the ſame was done in the Caſe of *Cock* and *Goodfellow*, where the Aſſignment was made by Mrs. *Cock*, juſt before her Bankruptcy, and in Truſt for her own Children; and as to Part, it was but a Direction to the Truſtee to aſſign her Stock in the Bank, *&c.* and Lord *Macclesfield* declared, that this was ſo far from being an Act of Fraud in Mrs. *Cock*, though it was for her own Children, that it ſeemed to be juſt and commendable. So in the Caſe of *Jacob* and *Shepherd*; the Trader *Shepherd* was on the Brink of Bankruptcy, and the Deed brought ready engroſſed to him, which he executed a little before his Bankruptcy, to give a Preference to ſome of his Creditors; indeed I doubted this, but on an Appeal, the Lord Chrncellor *Macclesfield* ordered a Trial, to be informed when the Trader became a Bankrupt: and the Execution of the Deed being found to have been before the Bankruptcy, the Decree was in Favour of the Deed. The like happened in Sir *Stephen Evans's* Caſe, who having executed a Deed immediately before his Bankruptcy, and with a View to prefer ſome Creditors, the ſame prevailed. So that according to theſe Precedents, I muſt decree in Favour of this Deed, giving a Preference to the Plaintiff.

Norcourt's Caſe, *Mich.* 1727.

With reſpect to plain Acts of Bankruptcy, after what has been ſtated, no Doubts can ariſe; but there are ſome delicate Circumſtances, to which it is highly neceſſary for all Merchants and Traders to pay ſtrict Attention, leſt they ſhould inadvertently commit an Act of Bankruptcy, which may ſubject them to temporary Diſgrace; and conſiderable Expence before the Commiſſion can be ſuperſeded.

Any keeping Houſe for the Purpoſe of delaying a Creditor, even for a very ſhort Time, will be an Act of Bankruptcy.

Colkett v. *Freeman*

Thus upon a Rule to ſhew Cauſe why a new Trial ſhould not be granted, it appeared that at the Trial, the only Queſtion that aroſe was concerning the Act of Bankruptcy alledged to have been committed by *Falch*; as to which the Facts were as follows: *Falch* being in bad circumſtances, on the Evening of the 7th of *January*, 1786, expreſſed his Concern to his Clerk, and his Fears that he ſhould not be able to anſwer a Bill which would become payable the next Day; and deſired him to come earlier than uſual the next Morning, and be in the Way; in Caſe the Holder of that Bill ſhould enquire for him, to deny him. In Fact, that Bill-holder did call the next Morning before nine o'Clock, and preſented a Bill for Payment, when the Clerk gave him the Anſwer as he was directed, that his Maſter was not at home. Afterwards however, in the Courſe of the ſame Day, *Falch* appeared in Public, and having procured ſome Money from a Friend whom he met, he ſent for the Bill and paid it before five o'Clock that Day. The learned Judge directed the Jury to find their Verdict for the Plaintiffs, in as much as the Act of Bankruptcy was compleat, by the Denial of a Creditor with Intent to delay him, notwithſtanding the Jury, which was a ſpecial one, ſuggeſted to him at the Time, that by the Practice of Merchants in the City of London, the Payer of the Bill has the whole of the Day on which it becomes due till five o' Clock to pay it in. However, the Judge repeating to them his Opinion upon the Point of Law, they found their Verdict accordingly.

The Court of King's Bench in delivering Judgement againſt the Rule for a new Trial argued the Point of Law very amply, each of the Judges aſſigning his Reaſons

Reaſons for ſupporting the Direction of *Judge Buller*, who tried the Cauſe, to the Jury; and the Sum of the whole Argument appears to have been compriſed in the following Obſervations of Judge *Aſhhurſt*. "I have always underſtood the general Rule to be, that when a Trader commits an *unequivocal* Act of Bankruptcy, nothing that paſſes afterwards can explain it away." The Converſation with the Clerk on the Evening preceding the Denial, and the Denial conſequent upon it, clearly proved an Intention to delay the Creditor; and Earl *Mansfield's* Opinion was cited, who had directed the Jury to find a Verdict for the Plaintiff in a Caſe ſtill more remarkable, with Reſpect to the Delicacy of mercantile Credit, than the preſent. The Circumſtances were theſe: A Bill having become due, and the Acceptor being preſſed for Payment, deſired the Holder to call upon him the next Morning at a Friend's Houſe in *Bridge-Street*, and he would pay him; the Holder went accordingly, and the Acceptor, at his own Requeſt, was denied to him. Upon being aſked by his Friend, if he was aware that he had been committing an Act of Bankruptcy; he anſwered with Surpriſe in the Negative, and ſaid that he did not mean to do ſo, and went afterwards and paid the Bill. His Lordſhip ſaid, that if the Jury were ſatisfied that the Denial had been with a View to delay the Creditor at the Time, it was an Act of Bankruptcy, and if ſo, it could not be purged by paying the Bill afterwards.

It was obſerved alſo by the Court, that the Term of "purging an Act of Bankruptcy" is frequently perverted, and had often been complained of by Lord *Mansfield*, who, on ſeveral Occaſions, took the Opportunity to declare, that it can only mean, that, if the Act done be in itſelf *equivocal*, other Circumſtances may be called in to explain it; but, if the Act be a clear *unequivocal* Act of Bankruptcy, it cannot be purged or explained away by ſubſequent Circumſtances. See the Speeches of the Judges, in a valuable Treatiſe intitled, *The Bankrupt Laws*, by *William Cooke, Eſq.* Second Edition, 2 Vols. 8vo. London, 1788.

Of the Commiſſion and Commiſſioners, and how they may examine the Bankrupt, his Wife, and others.

A Commiſſion of Bankruptcy can iſſue only upon the *Petition* and *Affidavit* of a Creditor or Creditors, and not unleſs the ſingle Debt of ſuch Creditor, or of two or more, being Partners, petitioning, amounts to 100*l.* or unleſs the Debt of two Creditors, ſo petitioning, ſhall amount to 150*l.* or unleſs the Debt of three or more Creditors, ſo petitioning, ſhall amount to 200*l.* and alſo upon ſuch Creditors, giving Bond to the Lord Chancellor, Keeper, or Commiſſioners of the Great Seal, in the Penalty of 200*l.* conditioned for proving their Debts, as well before the Commiſſioners, as on a Trial at Law, as alſo for proving the Party Bankrupt at the Time of taking out the Commiſſion, and farther to proceed on ſuch Commiſſion as by the Statute directed. 5 *Geo.* II. C. 30. S. 23.

One petitioned for a Commiſſion of Bankrupt againſt *Lee*, and his Debt (amounting to 100*l.*) appeared to conſiſt of Notes, made payable by the Bankrupt to other Perſons, who had indorſed them to the Petitioner, and to have been bought in by him at ten Shillings in the Pound; upon which it was objected, that a Creditor coming by his Debt in this Manner was not entitled to ſue out a Commiſſion; but Lord Chancellor *Macclesfield* ruled, that though the Petitioner had thus gained the Notes, he was a Creditor for the full Sums of them, and may ſue out a Commiſſion accordingly. 1 *Peer Will.* 782. Hil. Term 1721. ex Parte *Lee*.

A Commiſſion of Bankruptcy is not a Matter diſcretionary, but to be granted *de Jure*; and it has been adjudged, that if all the petitioning Creditors for a Commiſſion ſhould agree to have it diſcharged or ſuperſeded, it may be granted; and in Caſe other Creditors, that were not Petitioners, ſhould pray a Renewal of the Commiſſion, or a Revocation of the *Superſedeas*, it may be granted. 1 *Vern.* 152. Alderman *Backwell's* Caſe.

After a Commiſſion is iſſued forth, and dealt in by the Commiſſioners, they may proceed though the Bankrupt die. 1 *Jac.* I. C. 15. S. 1.

The Commiſſion ſhall not abate by the Death of the King; and Commiſſions ſhall be renewed on the Death of the Commiſſioners, upon paying half Fees. 2 *Show.* Caſes 193. 5 *Geo.* II. C. 30. S. 45.

The

13 *Eliz.* C. 7. The Commiſſioners are appointed under the Great Seal, and ought to be Men, as the Lord *Coke* ſays, of Wiſdom, Honeſty, and Diſcretion; as they have Power over the whole Eſtate, Freehold, Copyhold, Goods, Debts, Chattels, and Effects of the Bankrupt.

Ditto. 1 *Vent.* 360. The Commiſſioners may ſell the Bankrupt's Land by Deed inrolled; they may ſell his Goods without Inrolment, but not Land.

13 *Eliz.* C. 7. S. 5. The Commiſſioners may ſend for and examine ſuch Perſons as have, or are ſuſpected to have, any of the Bankrupt's Goods, Wares, or Debts in their Cuſtody, Power, or Uſe, and who are, or be ſuſpected to be indebted to the Bankrupt, and to examine them on their Oaths, or otherwiſe, as they ſhall think fit, touching the Premiſes; and if any refuſe to be examined, or do not diſcover the whole Truth, they ſhall forfeit double the Value of the Goods concealed, to be diſtributed by the Commiſſioners, as the reſt of the Bankrupt's Eſtate.

1 *Jac.* I. C. 15. S. 10. The Commiſſioners have Power to commit Perſons refuſing to appear to be examined, or appearing, who refuſe to be examined on Interrogatories.

5 Mod. 308. *Comb.* 390. S. C. Sett & Rem. 234. S. C. 1 *Sal.* 348. One *Bracey* was committed by the Commiſſioners for refuſing to be examined, and the Warrant concluded, that he ſhall be committed until he conform to the Authority of the Commiſſioners; the Words of the Statute 1 *Jac.* I. C. 15 are "*until he ſubmit to the Commiſſioners*, and be by them examined."

This was held to be a void Commitment, and *Bracey* was diſcharged upon an *Hab. Corp.*

1 *Jac.* I. C. 15. S. 11. Witneſſes to have their Charges, to be taxed by the Commiſſioners, and paid out of the Eſtate; and being guilty of Perjury, or Subornation of Perjury, indictable and puniſhable according to the Stat. 5 *Eliz.* againſt Perjury.

S. 15. The Commiſſioners ſhall declare to the Bankrupt how they have beſtowed his Lands and Goods.

21 *Jac.* I. C. 19. The Commiſſioners empowered to examine the Bankrupt's Wife, touching the Eſtate.

They may by their Warrant appoint their Officers to break open the Bankrupt's Houſe, Shop, *&c.*

5 *Geo.* II. C. 30. S. 16. 17. 18. Commiſſioners may examine all Perſons, as well by Word of Mouth, as on Interrogatories; relating to the Trade, Eſtate, and Effects of the Bankrupt, or any Act or Acts of Bankruptcy committed, and may reduce into Writing the Anſwers on verbal Examinations, which ſhall be ſigned by the Examinant, and in Caſe of a Refuſal to anſwer, or not fully anſwering all lawful Queſtions, or refuſing to ſign the Examination, not having a reaſonable Objection to the Wording thereof, or otherwiſe to be allowed by the Commiſſioners, they may commit till the Party complies; but the Queſtion refuſed to be anſwered muſt be ſtated in the Warrant of Commitment.

If a Warrant of Commitment be inſufficient in Form, and a *Hab. Corp.* be brought; the Court or Judge before whom the *Hab. Corp.* is brought, ſhall make a new Commitment to the ſame Priſon, unleſs it appears that the Party had before complied.

5 *Geo.* II. C. 30. S. 43. Commiſſioners are incapable of acting till they have taken an Oath that they will faithfully, impartially, and honeſtly behave in the Execution of the Commiſſion, which Oath they are to adminiſter to each other, and keep a Memorandum thereof by them, ſigned, among the Proceedings.

The Oath is as follows:

I A. B. *do ſwear, that I will faithfully, impartially, and honeſtly, according to the beſt of my Skill and Knowledge, execute the ſeveral Powers and Truſts repoſed in me, as a Commiſſioner in a Commiſſion of Bankrupt, againſt* E. F. *late of,* &c. *and that without Favour or Affection, Prejudice, or Malice.*

So help me God.

No Time is generally limited for the taking out the Commiſſion, though the ſooner doubtleſs the better for the Creditors; and the *Proviſo* in the Stat. 21 *Jac.* I. C. 19. as to particular Caſes, mentions, that the Commiſſioners muſt be ſued within five Years after the Time when the Party became a Bankrupt.

A. took

A, took out a Commiſſion of Bankruptcy againſt *B*. and kept it for ſix Months without doing any Thing therein; he then executed it, and the Party was found a Bankrupt: On a Petition to ſuperſede this Commiſſion, it was ſaid by *A*. in Excuſe for keeping it ſo long by him unexecuted, that he was not at firſt certain his Proof was ſufficient to find *B*. a Bankrupt; but it appeared afterwards there were good Grounds for a Commiſſion, and that he was found to be a Bankrupt accordingly.

In this Caſe the Lord Chancellor ſaid that it was very wrong in *A*. to keep the Commſſion thus long in his Pocket; and until he had ſufficient Proof of the Bankruptcy he ought not to have taken out the Commiſſion, which, by having been kept ſo long private, might have been the Means of drawing in Multitudes of People to give Credit to the Bankrupt, and of furniſhing him with Opportunities of defrauding many; wherefore he ſuperſeded the Commiſſion; and it being objected that this would only bring a freſh Expence upon the Bankrupt's Eſtate by the Charge of another Commiſſion; his Lordſhip replied, he would take Care that the former Commiſſion ſhould not be at the Charge of the Bankrupt's Eſtate. 2 *Peer Will:* Rep. 545, 546.

A Commiſſion, at the Complaint of 15 Creditors, was iſſued on the Statute of Bankrupts, againſt Alderman *Backwell*, who died ſhortly after; and theſe Creditors having a Judgment, and ſuppoſing thereon they might have better Remedy than their Proportion would amount to on the Commiſſion, they ſtuck to that, and the Heir of the Bankrupt paid their Debts; and no other Creditors appearing then to proſecute, the Commiſſion by their Conſent was ſuperſeded; after which, thirty other Creditors ſued for a Diſcharge of the *Superſedeas*, which, after being argued before Lord Chancellor *Jefferies*, was done, and his Lordſhip renewed the Commiſſion; for the Reaſons, that when a Commiſſion is granted, it is not for the Benefit of the Petitioners only; but expreſsly for the Benefit of all the Creditors. 2 Chan. Caſe 143, 191.

If there is a joint Commiſſion againſt two Partners, though one of them ſhould die, the Commiſſion may ſtill proceed; but if one of the joint Partners be dead at the Time of taking out the Commiſſion, it abates, and is abſolutely void, becauſe they muſt be each found Bankrupts. And where a joint Commiſſion is proſecuted all the Partners muſt be included, for a joint Commiſſion againſt two of ſeveral Partners cannot be ſuſtained; *Beaſley* v. *Beaſley* 1. Atk. 97.

Therefore, in an Action brought by *Allan* and others, as Aſſignees of *Marlar* a Bankrupt, together with *Down* ſurviving Partner of *Pell*, againſt *Hartley* and *Francis*, upon a Bill of Exchange due from the Defendants to the Houſe of *Marlar*, *Pell* and *Down*, an objection was taken at the Trial to the Mode of proving the Aſſignee of *Marlar* intitled to join in the Action with *Pell*, the Solvent and ſurviving Partner. To ſupport their right they firſt produced a Commiſſion againſt *Marlar*, *Stewart*, and *Boyd* as Partners, but that failed them, becauſe on the evidence it appeared that the Commiſſion as to *Boyd* was fraudulent, he not having committed any Act of Bankruptcy, but by Contrivance. The Plaintiffs next produced a Commiſſion againſt *Marlar* and *Stewart* only, to which it was objected that there was no ſuch Partnerſhip, the Firm being *Marlar*, *Stewart* and *Boyd*. The Plaintiffs then offered in Evidence, a Plea in an Action brought three Years before, upon the ſame Bill againſt the preſent Defendants, in which they had pleaded that *Marlar* was a Bankrupt, and therefore the Action not maintainable by *Marlar*, *Pell* and *Down*. To this Plea there had been a Demurrer, but upon the Argument, the Parties conſented that no Judgment ſhould be given, and the Plaintiffs diſcontinued. *Allan* v. *Hartley* Mich. Term 25. *Geo.* 3. B. R.

It was contended by the Plaintffs' Counſel that the Defendant having pleaded that *Marlar* became a Bankrupt, and the Demurrer having admitted that Fact, it was Evidence againſt the ſame Defendants, being in Truth their own Allegation. Mr. Juſtice *Buller*, who tried the Cauſe, non-ſuited the Plaintiffs. The Court was moved to ſet aſide the Non-ſuit; and after hearing the Argument of Counſel, Lord *Mansfield* ſaid, the Plaintiffs came as Aſſignees, and to ſupport their Claim they ſet up two Commiſſions. There is no Doubt there may be a Commiſſion

againſt one Partner ſeparately, without making the Reſt of the Partners Bankrupts. So there may be a Commiſſion againſt all the Partners in a Houſe, and under ſuch Commiſſions both the joint and ſeparate Eſtate will be aſſigned, and the different Claſſes of Creditors will have the Shares alloted to each. But the Objection to one of the preſent Commiſſions is, that it was taken out againſt three Partners, and only two are found to have committed Acts of Bankruptcy. Such a Commiſſion is void to all Purpoſes, for it cannot be void as to one, and valid as to the Reſt, and no Inſtance is cited to the Contrary. The Objection to the other is, that it is a Commiſſion againſt two of three Partners. A Commiſſion may be joint or ſeveral, but this is neither; on the Ground of the Plea, it appears that no Judgment was given, and no uſe made of the Plea. There is no Caſe to ſhew that the Pleadings of Counſel are Evidence of the Facts alledged. An Anſwer in Chancery is Evidence, for there it is preſumed a Man ſpeaks upon Deliberation, what is true and upon Oath; but a Bill is fictitious, it does not aver Facts as true, but ſuggeſts them, and calls for Anſwers to aſcertain them. It may be withdrawn or amended, and decides nothing: "Let the Rule for ſhewing Cauſe why the Nonſuit ſhould not be ſet aſide, be diſcharged."

A Commiſſion having iſſued againſt one *Hughes*, on a certain Day at eleven o'Clock in the Morning, the Commiſſioners met, and proceeded to declare him a Bankrupt, and the Declaration was ſigned by them between three and four o'clock in the Afternoon, and the Aſſignment of the Bankrupt's Goods executed by Six, at which Inſtant the Commiſſioners had Notice, that the Bankrupt died that Day at one in the Afternoon, which was the firſt Notice they had of his Death: On a Bill brought againſt an Aſſignee under the Commiſſion, for an Account of ſuch Goods of the Bankrupt, as had come to his Hands, the Defendant pleaded the Commiſſion, and the Proceedings thereon; and the Lord Chancellor *Talbot* held the Plea to be good.

Talbot's Chan. Caſe. 184. *Hill.* 1735.

For the Meeting of the Commiſſioners in Order to declare the Party a Bankrupt, and whatever is done in Purſuance of the Commiſſion, ſhall be taken to be a Dealing in it, if never ſo minute; and the rather, for that the Statutes of Bankrupts, being remedial Laws, are to be beneficially conſtrued in Favour of the Creditors; and therefore my Lord would not overthrow this Commiſſion, and all the juſt Right of the Creditors claiming under it.

Mich. 1726.

A Commiſſion of Bankruptcy was taken out againſt a Perſon, and upon the Bankrupt complaining, that one of the Creditors had come in under the Commiſſion and proved his Debt, yet he had arreſted the ſaid Bankrupt, who in his Petition prayed to be diſcharged; and here Lord Chancellor *King* obſerved, that it had been the Conſtruction of the Court of Equity upon the latter Statute, which diſcharges the Bankrupt of his Debts, on his procuring a Certificate, ſigned by four Fifths of his Creditors and allowed by the Chancellor, that where a Trader becomes a Bankrupt, and any one of his Creditors comes in on the Commiſſion, to prove his Debt, though with Deſign only to oppoſe the Bankrupt's Certificate, nevertheleſs this Proceeding of the Creditor is an Election to take his Remedy for his Debt under the Commiſſion; and, if pending that, the Creditor ſues and arreſts the Bankrupt, it is taken to be an Oppreſſion: Therefore he ordered the Creditor at his own Expence to diſcharge the Bankrupt out of Cuſtody. But he ſaid, if ſuch Creditor would wave having any Benefit under the Statute, ſtay a reaſonable Time, and there was an Improbability of the Bankrupt's being able to gain his Certificate, ſigned by four Fifths, in Number and Value, of his Creditors, or allowed by the Court; in ſuch Caſe, if the Creditor ſhould apply to the Court, declaring his Conſent to wave any Right or Share of the Bankrupt's Eſtate under the Commiſſion, and praying that he might ſue the Bankrupt; it would be reaſonable and proper for the Court to give Leave to ſuch a Creditor to proceed at Law againſt the Bankrupt for his Debt.

Salkeld's Caſe. 1 *Peer Will.* Rep. 560. *Trin.* 1729. L. C. *Parker.*

One *Salkeld*, a Clothier in Town, was indebted to one *Hale*, for Cloths which *Salkeld* made over to a Relation for a pretended Debt; on which *Hale*, brought an Action againſt him, and having obtained Judgment, took him in Execution on a *Capias ad Satisfaciendum*, about two Years after the Act 5 *Geo.* I. C. 24. was made. The Relation took out a Statute againſt *Salkeld*, in Order

to ſerve him, and *Hale* was prevailed on to be an Aſſignee, though the Bankrupt's Eſtate proved to be only a few Shillings, and ſome deſperate Debts.

Salkeld thereupon petitioned that he might be diſcharged out of Execution, ſince *Hale*, at whoſe Suit he was taken, had come into the Commiſſion and proved his Debt, and not only ſo, but was the Aſſignee under it. That though *Hale* had propoſed waving all Benefit and Advantage accruing from the Commiſſion, yet this was now too late, he having come in under it, proved his Debt, and conſented to be an Aſſignee, which was a plain Election to proceed this Way, and ſuch Election being once made, could not be waved afterwards. But by Lord Chancellor *Parker*: This Commiſſion was plainly ſued out fraudulently by the Bankrupt's Relation, to diſcharge the Bankrupt out of Cuſtody; the Propoſal is fair on the Creditor's Side to wave any Benefit under the Commiſſion, and therefore ought to be accepted; and the Creditor cannot be ſaid to elect to be ſatisfied out of an Eſtate, when there is no Eſtate, which more particularly diſtinguiſhes this Caſe. I will not diſcharge this Bankrupt to the Prejudice of a Creditor, where it appears, on the Face of the Thing, that the Commiſſion was ſued out in Favour of the Bankrupt himſelf, by his Relation, and not for the Service and Advantage of the Creditors.

Of the Bankrupt's Surrender, Examination, Diſcovery, Allowance, and Certificate; and of entering the Proceedings, &c. of Record.

AFTER the Commiſſioners named in a Commiſſion of Bankruptcy ſued for, have, in Conſequence of Proofs made to them, found any one to be a Bankrupt; they make and ſign the following Declaration, *viz.*

'WE whoſe Names are hereunto ſubſcribed, or underwritten, being the 'major Part of the Commiſſioners appointed for the Execution of the 'Commiſſion of Bankruptcy, awarded againſt *C. D. &c.* upon the Oath and Ex-'amination of divers Witneſſes, do conceive, or have found, that the ſaid *C. D.* 'the —— Day of *January* laſt, or before the ſuing forth of the ſaid Commiſſion, 'was and did become a Bankrupt, within all or ſome of the Statutes, made 'concerning Bankrupts; and accordingly we declare him to be a Bankrupt, and 'to have been ſo from that Time.

G. H.
I. K.
L. M.

But the Commiſſioners are generally cautious in declaring the Bankruptcy from a certain Time, but leave it to a Trial at Law, in Caſe there be any Queſtion or Doubt of it; and this is to ſecure themſelves from Actions that may be brought againſt them.

Alſo it is here obſerved, that the Declaring of the Commiſſioners, whether he be a Bankrupt or not, doth not acquit or charge him, unleſs in Truth it were ſo.

And after they have declared the Party a Bankrupt, they then make out the following Warrant for ſeizing his Effects.

'WHEREAS the King's Majeſty's Commiſſion under the Great Seal of *Great-'Britain*, grounded upon the ſeveral Statutes made concerning Bankrupts, 'bearing Date at *Weſtminſter* the ſame Day with this our Warrant [or *according to 'the Date*] had been awarded againſt *A. B.* of, *&c.* Dealer and Chapman, di-'rected to us who have hereunto ſet our Hands and Seals, together with *F. C.* Eſq; 'and *D. S.* Gentlemen; and we being the major Part of the Commiſſioners 'named and authoriſed by Virtue of the ſaid Commiſſion, having begun to put 'the ſaid Commiſſion in Execution, upon due Examination of Witneſſes, or other 'good Proof upon Oath before us taken, have found that he the ſaid *A. B.* did 'for ſeveral Years laſt paſt trade and deal as a Chapman, and by ſuch his Dealings 'became indebted to *C. D.* of, *&c.* Hatter, in the Sum of one hundred and eighty

'Pounds; and being ſo indebted as aforeſaid, he the ſaid *A. B.* became Bankrupt 'to all Intents and Purpoſes, within the true Intent and Meaning of the ſeveral 'Statutes made againſt Bankrupts, ſome or one of them, before the Date and 'ſuing forth of the ſaid Commiſſion; theſe are therefore, by Virtue of the ſaid 'Commiſſion, and the ſeveral Statutes therein mentioned, to will and require, 'authorize and impower, you, and every of you, to whom this our Warrant is 'directed, forthwith to enter into and upon the Houſe and Houſes of him the 'ſaid *A. B.* and alſo into all other Place or Places, belonging to him the ſaid '*A. B.* where any of his Goods are, or are ſuſpected to be, and there ſeize all the 'ready Money, Jewels, Plate, Houſehold Stuff, Goods, Merchandize, Books 'of Account, and all other Things whatſoever belonging to him the ſaid *A. B.* and 'ſuch Things as you ſhall ſo ſeize you ſhall cauſe to be inventoried and appraiſed, 'by honeſt Men of Skill and Judgment, and the ſame you ſhall return to us 'with all convenient Speed, and what you ſhall ſo ſeize you ſhall ſafely detain 'and keep in your Poſſeſſion until we ſhall give you Order for the Diſpoſal 'thereof; and in Caſe of Reſiſtance, or of not having the Key or Keys, of any 'Door or Lock belonging to any Place or Places of him the ſaid *A. B.* where 'any of his Goods are, or are ſuſpected to be, you ſhall break open, or cauſe 'the ſame to be broken open, for the better Execution of this our Warrant. 'Given under our Hands and Seals this 24th Day of *January*, in the Year of 'our Lord 1791.

5 *Geo.* II. C. 30. S. 2. And likewiſe ſend a Summons to the Bankrupt, which is alſo his Warrant of Protection from Arreſts during the forty-two Days allowed for his Examination, or the farther Time granted for finiſhing it, being forty-nine Days, the Form of which is as follows:

'WHEREAS a Commiſſion of Bankrupt on the 24th Day of *January*, '1791, iſſued under the Great Seal of *Great Britain*, againſt you *A. B.* of '*&c.* Dealer and Chapman; and whereas the major Part of the Commiſſioners 'in the ſaid Commiſſion named and authorized, have declared you to be a Bank-'rupt; We the ſaid Commiſſioners do hereby ſummon and require you the ſaid '*A. B.* perſonally to be and appear before the Commiſſioners in the ſaid Com-'miſſion named, or the major Part of them, on the Day of In-'ſtant, at nine in the Morning, and on the and Days of next, 'at three in the Afternoon, at *Guildhall, London*, then and there to be examin-'ed, and to make a full and true Diſcovery and Diſcloſure of all your Eſtate and 'Effects, according to the Direction of the Acts of Parliament now in Force 'concerning Bankrupts; and particularly the Act paſſed in the fifth Year of his 'late Majeſty's Reign, entitled, *An Act to prevent the committing of Frauds* '*by Bankrupts*; and herein fail not at your Peril. Given under our Hands 'Day of 1791.

J. H.
J. W.
A. H.

To A. B. *the Bankrupt.*

As ſoon as the Warrant of Seizure is executed, and the Bankrupt has received his Summons from the Commiſſioners, he ought in Prudence to ſurrender himſelf at their firſt Meeting, as well to ſhew his Willingneſs of complying with the Statute as to ſecure himſelf from Arreſts and Impriſonment, though his appearing at the ſaid Time is not abſolutely required.

And

And after ſuch Surrender, the Bankrupt ſhall, at all reaſonable Times, before the Expiration of the forty-two Days, or ſuch further Time as ſhall be allowed him to finiſh his Examination, be at Liberty to inſpect his Books, Papers, Writings, and Accounts, in the Preſence of his Aſſignee or Aſſignees, or any Perſon appointed by them, and ſhall have Liberty to bring with him ſuch Perſons as he ſhall think fit, not exceeding two at a Time, to make out ſuch Extracts and Copies from thence as he ſhall think fit, the better to enable him to make a full and true Diſcovery of his Eſtate and Effects; and in Order thereto the ſaid Bankrupt ſhall be free from all Arreſts, Reſtraint, or Impriſonment of any of his Creditors in coming to ſurrender, and from the actual Surrender of ſuch Bankrupt for and during the ſaid forty-two Days, or ſuch farther Time as ſhall be allowed him for finiſhing his Examination. 5 *Geo.* II. C. 30. S. 5.

Provided the Bankrupt was not in Cuſtody at the Time of ſuch Surrender, and in Caſe he ſhall be arreſted for Debt, or on any Eſcape Warrant in coming to ſurrender himſelf, or after his Surrender within the Time afore-mentioned, that then upon producing ſuch Summons, under the Hands of the Commiſſioners or Aſſignees, to the Officer who ſhall arreſt him, and making it appear to ſuch Officer, that the Summons was ſigned by the Commiſſioners or Aſſignees, and giving the Officer a Copy thereof, he ſhall be immediately diſcharged; and in Caſe any Officer ſhall detain ſuch Bankrupt, after he ſhall have ſhewn ſuch Summons to him, and made it appear it was ſigned as aforeſaid, in his Cuſtody, ſuch Officer ſhall forfeit and pay to the Bankrupt for his own Uſe, the Sum of five Pounds for every Day the Officer ſhall detain him, to be recovered by Action of Debt in any of his Majeſty's Courts of Record at *Weſtminſter*, in the Name of the Bankrupt, with full Coſts of Suit.

A Commiſſion of Bankrupt iſſued againſt *Philips de Fries* in the Month of *July* 1732, and he was declared a Bankrupt, and required to ſurrender himſelf to the Commiſſioners; and when the Meſſenger executed the Warrant of Seizure, the Bankrupt, without Reſiſtance, delivered up his Keys and Effects to him, and promiſed to ſubmit to the Commiſſioners, and comply with the Directions of the Act.

The Summons was not ſerved upon him till the firſt Day mentioned for his Surrender in the *Gazette*, and three Days after executing the Warrant of Seizure, and about an Hour after the Service of the Summons, and before he ſurrendered himſelf, he was arreſted, and thereupon he petitioned the Lord Chancellor, amongſt other Things, to be diſcharged; and the Petition came to be heard before he had ſurrendered himſelf; and upon the Hearing, Lord Chancellor *King* ſo far conſidered what he had done, and which was all that he could then do, as a Compliance with the Act, that he held he ought to be diſcharged, but diſſuaded the Bankrupt from ſuing the Officer for the Penalty; and thereupon an Order was made accordingly by Conſent.

Every ſuch Bankrupt, after Aſſignees ſhall be appointed, is to deliver upon Oath or Affirmation, before one of the Maſters of Chancery, or Juſtice of Peace, unto ſuch Aſſignees, all his Books of Accounts and Writings, not ſeized by the Meſſenger of the Commiſſion, or not before delivered up to the Commiſſioners, and then in his Power, and diſcover ſuch as are in the Power of any other Perſon, that any Ways concern his Eſtate; and every ſuch Bankrupt, not in Priſon, ſhall after ſuch Surrender be at Liberty, and is required to attend ſuch Aſſignees upon Notice in Writing, in Order to aſſiſt in making out the Accounts of the Eſtate. Ditto, S. 6.

If the Perſon againſt whom the Commiſſion is taken out, is in Priſon or Cuſtody, the Commiſſioners grant their Warrant to the Warden of the *Fleet*, or Marſhal of the King's Bench, or to any Perſon who has the Bankrupt's Body in Cuſtody on meſne Proceſs, to bring him to be examined before them.

But if the Bankrupt is in Execution, and cannot be brought before the Commiſſioners, then the acting Commiſſioners ſhall from Time to Time attend the Bankrupt in Priſon or Cuſtody, and take his Diſcovery as in other Caſes.

It

It is undoubtedly the Obligation of every Perſon, who is ſo unfortunate as to have a Commiſſion of Bankruptcy taken out againſt him, to behave in every Reſpect with the greateſt Integrity, and to do all Things in his Power to ſerve his Creditors, as well by his Aſſiſtance in ſettling his Accounts, which he ſhould carefully place in the cleareſt and trueſt Light, as by his diligent Attendance on the Aſſignees, and putting them in the beſt Method of ſecuring and recovering his Effects; for the Loſs of his Creditors ſhould not be augmented through his Neglect, as a Man has it always in his Power to be honeſt, though he cannot command Fortune, or very often prevent Misfortune; however, as Honeſty is not a conſtant Attendant on all Bankrupts, the Law has furniſhed the Commiſſioners with a ſufficient Power to oblige them to ſubmit to an Examination, and to make them be juſt in it. For

13 *Eliz.* C. 7. 1 *Jac.* I. C. 15. 21 *Jac.* I. C. 19. If the Bankrupt ſhall refuſe to be examined, or not give a full and ſatisfactory Anſwer to every Interrogatory miniſtered to him by the Commiſſioners, it ſhall be lawful for them to commit the ſaid Offender to ſome ſtrait or cloſe Impriſonment, there to remain until he ſhall better conform himſelf. And,

5 *Geo.* II. C. 30. S. 1. If the Bankrupt ſhall not, within forty-two Days after Notice for his Surrendering in Writing, left at the uſual Place of his Abode, or on Perſonal Notice if the Bankrupt be in Priſon, and Notice given in the *London Gazette*, that ſuch a Commiſſion is iſſued, and of the Time and Place of Meeting of the Commiſſioners, ſurrender himſelf to them, and ſign ſuch ſurrender, and ſubmit to be examined from Time to Time upon Oath, by and before ſuch Commiſſioners, and in all Things conform to the ſeveral Statutes already made and now in Force concerning Bankrupts, and alſo upon ſuch his Examination, fully and truly diſcloſe and diſcover all his Effects and Eſtate, real and perſonal, how and in what Manner, and to whom and upon what Conſideration, and at what Time or Times he hath diſpoſed of, aſſigned or transferred any of his Goods, Wares, Merchandizes, Monies, or other Eſtate and Effects, and all Books, Papers, and Writings relating thereto, of which he was poſſeſſed, or in, or to which he was any Ways intereſted or intitled, or which any Perſon or Perſons had or hath, or have had in Truſt for him, or for his Uſe, at any Time before or after the iſſuing of the ſaid Commiſſion, or whereby ſuch Perſon, or his Family, hath, or may have, or expect any Profit, Poſſibility of Profit, Benefit, or Advantage whatſoever, except only ſuch Part of his Eſtate and Effects as ſhall have been really and *bona Fide* before ſold or diſpoſed of in the Way of his Trade and Dealings, and except ſuch Sums of Money as ſhall have been laid out in the ordinary Expences of his Family; and alſo upon ſuch Examination, deliver up to the ſaid Commiſſioners all ſuch Part of his Goods, Wares, Merchandizes, Money, Eſtate, and Effects, and all Books, Papers, and Writings relating thereto, as at the Time of ſuch Examination ſhall be in his Poſſeſſion, Cuſtody or Power, his neceſſary Wearing-Apparel, and that of his Wife and Children only excepted, then he, the ſaid Bankrupt, in Caſe of any Default and wilful Omiſſion, in not ſurrendering and ſubmitting to be examined as aforeſaid, or in Caſe he ſhall remove, conceal, or embezzle any Part of ſuch his Eſtate, real or perſonal, to the Value of twenty Pounds, or any Books of Accounts, Papers, or Writings relating thereto, with an Intent to defraud his Creditors, and being thereof lawfully convicted by Indictment or Information, ſhall be deemed and adjudged to be guilty of Felony, and ſhall ſuffer as a Felon, without Benefit of Clergy, or the Benefit of any Statute made in Relation to Felons; and in ſuch Caſe, ſuch Felon's Goods and Eſtate ſhall go and be divided among the Creditors, ſeeking Relief under Commiſſion.

Ditto, S. 3. Though it is lawful for the Lord Chancellor, Lord Keeper, or Commiſſioners of the Great Seal, to enlarge the Time for ſuch Perſon's ſurrendering himſelf, and diſcovering his Effects, as the ſaid Lord Chancellor, *&c.* ſhall think fit, not exceeding fifty Days, to be computed from the End of the ſaid forty-two Days; ſo as ſuch Order for enlarging the Time be made by the Lord Chancellor, *&c.* ſix Days, at leaſt, before the Time on which ſuch Perſon was to ſurrender himſelf, or make ſuch Diſcovery as aforeſaid.

When the Bankrupt has paſt his laſt Examination, and his Certificate is ſigned by four Fifths of his Creditors in Number and Value, who have proved their Debts, and have each owing to them 20*l.* or upwards, the Commiſſioners then certify to the Lord Chancellor, that the Bankrupt hath in all Things conformed to the ſeveral Statutes made and now in Force concerning Bankrupts, and the ſaid Bankrupt having made Oath that the ſigning his Certificate was obtained fairly and without Fraud, and due Notice having been given of his ſaid Conformity in the *London Gazette*, and no Objection made by any of the Creditors to the Allowance thereof, his Lordſhip is pleaſed to allow the Certificate in the following Manner: 5 *Geo.* II. C. 30. S. 10.

May 10, 1791.

'WHEREAS the uſual Notice hath been given in the *London Gazette* of *Tueſ-*
'*day* the Day of and none of the Creditors of the above-named
'*A. B.* have ſhewn any Cauſe to the contrary, I do allow and confirm this
'Certificate.

Thurlow, C."

When ſuch Certificate is allowed, the Bankrupt is diſcharged of his Debts, and is not liable to be ſued or arreſted for any one entered into before his Failure, although he ſhould be taken in Execution or detained in Priſon in Conſequence of a Judgement obtained before his Certificate was allowed and confirmed; and it ſhall be lawful for any one or more of the Judges of the Court wherein Judgement has ſo been obtained, on the Bankrupt's producing his Certificate allowed and confirmed, to order any Sheriff, Bailiff, or Officer, Gaoler or Keeper of any Priſon, who hath or ſhall have ſuch Bankrupt in his Cuſtody, by Virtue of any ſuch Executions, to diſcharge him without Payment of any Fee or Reward. Ditto, S. 13.

A Bankrupt having his Certificate allowed, and having ſlipt his Time of Pleading at Law to a Debt precedent to the Bankruptcy, is not to be relieved in Equity. Ex Parte *Goodwin* 2 *Vern.* 696.

A Bankrupt after his Certificate was allowed, was ſued for a Debt due before his Bankruptcy; the Court on the Circumſtances of the Caſe did relieve, though it will not relieve on a Matter purely of miſpleading. *Trin.* 1715. *Blackwall* v. *Combs.*

A Certificate diſcharges not only the Perſon of the Bankrupt but alſo his Eſtate ſubſequently accrued. *Tr. Atk.* Rep. 257. Pl. 138.

The Preamble to this Act ſtates, That many Bankrupts are confined in Priſon, notwithſtanding they have delivered up their Effects. And, that Bankrupts; for Fear of being arreſted and thrown under long Impriſonment, abſcond and ſecrete themſelves from their Homes, or go abroad into foreign Parts, to the great Diſtreſs of their Families, and the Detriment of the Kingdom: For Remedy whereof it is enacted, 12. *Geo.* III. C. 47.

That Bankrupt who was in Cuſtody on or before 25th *March*, 1772, for any Debt due before Commiſſion iſſued, and who conforms to the Bankrupt Laws, and never was committed for Contumacy, or Non-compliance with theſe Laws; any Judge of the Court whence the Proceſs iſſued againſt the ſaid Bankrupt, on his Petition may ſummon Plaintiff to appear to ſhew Cauſe, why he ſhould not be diſcharged from his Impriſonment; Bankrupt firſt making Oath that Debt did not accrue before iſſuing Commiſſion, and Plaintiff not appearing, or not proving that Bankrupt concealed any of his Effects, or did not conform himſelf to the Laws againſt a Bankrupt, the Judge ſhall by Warrant or other Inſtrument, diſcharge him from Impriſonment for any Debt due before Commiſſion iſſued; and he ſhall not be liable to be arreſted for any Debt due or contracted before ſuch Commiſſion iſſued. And, if arreſted, ſhall be diſcharged in like Manner as aforeſaid from every ſuch Arreſt. Sect. 3

Bankrupts included in Stat. 12 *Geo.* III. C. 47. S. 3. having not as yet returned Home, or not being able to Act in their Occupations, from ſome certain Circumſtances of their Caſe, ſuch Perſons, though they have not gained a total Diſcharge from their Creditors, or their Debts under their Commiſſions, may apply by Petition or Motion to the Court of *Chancery*, ſetting forth ſuch Grievance and Circumſtance they may lie under, relative to ſuch Commiſ- 14 *Geo.* III. C. 77. Sect. 63.

ſion, which Petition, &c. the Court is to refer to a Maſter; and, upon Report or Hearing thereof, ſhall direct the Commiſſioners to certify the Proceedings under the Commiſſion, and Court ſhall make ſuch Order thereupon for the Relief of ſuch Bankrupts, as ſhall ſeem proper.

16 *Geo.* III. C. 38. S. 69. Bankrupts on or before the 22d *Jan.* 1776, who have duly conformed, ſurrendered, and ſubmitted, and who have not been guilty of Contumacy, nor diſcharged under their Commiſſions, may petition and move the Court of Chancery, upon this Grievance of the Caſe: Which Matter the Court may refer to a Maſter, and, upon Report, the Chancery may direct the Commiſſioners to certify Proceedings, and order their Diſcharge or Relief.

18 *Geo.* III. C. 52. S. 75. Bankrupts who have not obtained their Certificates, and Diſcharge from their Debts under the Bankrupt Acts, or being impriſoned before the 28 *Jan.* 1778, and againſt whom Commiſſions have been awarded, who have duly conformed, and not been committed by Commiſſioners for Contumacy, and are in Priſon for Debt, or ſecrete themſelves for Fear of their Creditors, and ſhall be ſued, may apply to the Judge of the Court where Proceſs iſſued, to ſummon Plaintiffs, to ſhew Cauſe why Bankrupts ſhould not be diſcharged, on making Oath that the Debt accrued previous to the Commiſſion; and on ſatisfying the Judge, that they fully diſcloſed and delivered up their Eſtate and Effects, and upon alſo making it appear to him, that they had duly conformed, and that the Commiſſions were not fraudulently obtained, hereupon, the Plaintiffs not proving any Concealment, the Judge may diſcharge Bankrupts, on their entering common Appearances; and if they be afterwards arreſted, ſuch Judge may order them, upon Summons, to be diſcharged, which Sheriffs and their Officers are to do on Notice; but Bankrupts in all other Reſpects remain ſubject to the Law.

Sect. 76. Bankrupts before 28 *Jan.* 1778, who have conformed, and not been committed for Contumacy, and yet not diſcharged, for Want of their Certificate, may, within twelve calendar Months from the Date of the Commiſſion, petition or move the Court of Chancery, on the true Circumſtances of the Caſe; which Court may order the Commiſſioners to certify Conformity, or Non-conformity; whereupon Court of Chancery is to direct an Advertiſement in the Gazette for allowance of *Certificate* (though ſame be not ſigned by four-fifths in Number and Value of Creditors) and if no ſufficient Cauſe be ſhewn within the Time limited by the Advertiſement, the ſame is to be allowed and the Bankrupt ordered Relief and Diſcharge *.

2 *Peer Will.* 70. *Trin. Term.* 1722. *Lewis* v *Chaſe.* A Creditor petitions againſt the Allowance of a Bankrupt's Certificate, upon which the Bankrupt gives him a Bond for Payment of his whole Debt, in Conſideration of withdrawing his Petition, and in Conſequence of his ſo doing the Bankrupt obtains his Certificate; but refuſing afterwards to comply with his Bond, the Creditor put it in Suit againſt the Bankrupt, who pleaded the Act of Parliament, and that the Bond was obtained in Order to procure his Diſcharge; but he could not be relieved in Equity againſt the Bond.

1 *Peer Will.* 181. L. C. *Parker*, *Eaſter* Term. 1720. *Howard* v. *Poole.* *Mich.* 8 *Geo.* II. in B. R. before Lord *Hardwicke.* *Page*, *Probyn*, and *Lee.* A joint Commiſſion was taken out againſt the Defendant and Partner, and their Certificate was allowed; and the Defandant was now ſued by the Plaintiff for a Debt due on his ſeparate Account, and arreſted; to which the Plaintiff pleaded, that the Cauſe of Action aroſe before that of Bankruptcy, and therefore moved that he ſhould be diſcharged out of Cuſtody, upon filing common Bail, which was allowed; it being held, that the Statute of the 5th of *Geo.* II. which ſays, *that in Caſe in any ſuch Bankrupt ſhall afterwards be arreſted, proſecuted, or impleaded for any Debt due before ſuch Time as he became Bankrupt, ſuch Bankrupt ſhall be diſcharged upon common Bail*, is in general Words, that the Bankrupt ſhall be diſcharged on common Bail, from all Debts owing by him before the Bankruptcy, and makes no Diſtinction between a joint and ſeparate Commiſſion.

Three Commiſſions of Bankrupt iſſued at the ſame Time, one againſt *A.* ſeparately, one againſt *B.* ſeparately, and a joint one againſt *A.* and *B.* as Partners in Company; and the Certificates on the two ſeparate Commiſſions were confirmed

* Theſe are the moſt recent Statutes made in Favour of Bankrupts.

by the Lord Chancellor, and delivered to the Bankrupts, and four Fifths in Number and Value of the Company Creditors ſigned a Certificate for the Bankrupt's Diſcharge on the joint Commiſſion:

But at the Time the joint Certificate was to have been confirmed, one of the joint Creditors applied by Petition to the Lord Chancellor; ſuggeſting that *A.* had loſt more than five Pounds at Gaming in one Day, within the Year before the Commiſſion iſſued, and therefore was not entitled to be diſcharged; and the Lord *Macclesfield* not only refuſed to confirm the joint Certificate, but ordered the former ſeparate Certificate of *A.* to be recalled and diſallowed, and allowed the joint Certificate as to *B.* only.

And being a Matter of great Conſequence to *A.* who as ſoon as his Certificate was allowed, had engaged very conſiderably in Trade, he ordered his Caſe to be ſtated, and took the Opinion of the moſt eminent Counſel thereon; and the Queſtions ariſing from this Caſe, were,

1ſt, Whether it was in the Power of the Lord Chancellor, after a Certificate was duly allowed and delivered to the Bankrupt, and enjoyed by him for ſeveral Months, to recall the ſame *ex Officio*, and deprive the Party of the Benefit of the Diſcharge.

If the Bankrupt has loſt five Pounds at one Time, and the Fact ſhall be proved before the Allowance of the Certificate, I think the Certificate ought not to be allowed by the Commiſſioners of Bankruptcy, or by the Great Seal; but if the Bankrupt hath conformed in all Things, and his Certificate hath been allowed, without any Objections made upon the Account of Gaming by the Creditors, I conceive there is not a Power given to the Great Seal to recall the Certificate.

Spencer Cowper's Anſwer.

S. Cowper, 14 *June*, 1725.

2dly. Whether a ſeparate Certificate diſcharged the Partner from joint Debts; and the Anſwer of a great and learned Perſon, was this,

I was clearly of Opinion at firſt, that the Bankrupt's ſeparate Certificate, ſo long as it continued in Force, diſcharged the Bankrupt, not only from ſuch Debts as were owing from the Bankrupt on the ſeparate Account, but likewiſe ſuch as were owing on the Partnerſhip Account; ſo I continue in the ſame Opinion. I alſo concur in Opinion with Mr. *Cowper*, that the Lord Chancellor cannot legally recall the Certificate after it is once confirmed, upon the Account of a Fact which was never proved, or ever objected, before the Allowance of the Certificate.

The Anſwer of another great Counſellor.

The Opinion of another moſt eminent Perſon to theſe Queſtions, was as follows:

1ſt. As to the Chancellor's Power of recalling the Certificate, he ſays thus—This is a Queſtion of conſiderable Difficulty; but I am rather of Opinion that ſuch a Confirmation cannot be revoked, ſo as to prevent the Bankrupt's Diſcharge; becauſe, by the Statutes, conforming to the Acts, and a Certificate confirmed, is made an actual Diſcharge of the Bankrupt's Debts due at the Time of his Bankruptcy; and a Revocation, after the Debts are once extinguiſhed, ſeems to come too late.

The Anſwer of another eminent Lawyer.

And as to the ſecond Queſtion, whether a ſeparate Commiſſion diſcharged joint Debts? his Anſwer was this:

As the Statute extends expreſsly to all Debts, I am of Opinion that Partnerſhip Debts, being Debts of *A.* the Certificate is equally a Diſcharge to thoſe Debts as well as others.

There was another Queſtion which aroſe on this, and being equally intereſting with the preceding ones, I have choſen to give the whole at large, for the Satisfaction and Information of my Readers, and it was this, *viz.*

The ſaid *A.* before his Bankruptcy being a Merchant in *London*, and in the Way of his Trade, at the Time he became a Bankrupt, was indebted to ſeveral Perſons in *Virginia*, and other Plantations: And the Queſtion was, whether his Certificate when confirmed here, would diſcharge him againſt ſuch Debts, in Caſe he went into thoſe Parts?

And the Opinion of the late Lord *Talbot*, when he was a Counſellor, was as follows:

The

Lord *Talbot's* Opinion, when Counſel, as to Plantation Debts.

The Effects of *A.* in the Plaintations are liable to the Commiſſion here, and the Right to them is veſted in the Aſſignees; and it ſeems reaſonable that this Certificate ſhould be equally extenſive as to his Diſcharge: However as the Laws of *England*, made ſince *Virginia* and the other Plantations were ſettled, do not extend to them unleſs they are expreſsly named, and as the Laws relating to Certificates do not expreſsly extend to the Plantations, I am of Opinion, that a Certificate confirmed here will be no Diſcharge to *A.* if a Suit is commenced againſt him in *Virginia*, or the other Plantations.

C. *Talbot*, *Dec.* 24, 1723.

Another Opinion.

And there was alſo the Opinion of another great Man to this Purpoſe:

I am of Opinion, that the Act of Parliament will not extend to any of the Plantations, unleſs they had been particularly mentioned; they being governed by particular Laws and Conſtitutions of their own making.

In the Year 1732, a Commiſſion of Bankruptcy iſſued aaginſt *Richard Jackſon*, Tea Merchant, and an Aſſignment was made of his Eſtate to *Thomas Wright* and *James Huey*, in Truſt for his Creditors.

ExParte *Jackſon*, before Lord *Hardwicke*, in 1744.

Upon his Examination he made a Diſcovery of his Eſtate and Effects, and four Parts in five of his Creditors ſigned his Certificate; but the Commiſſioners did not think proper to ſign it.

Afterwards he ſet up the Trade of a Diſtiller, and in Conſequence of ſuch Trading, he became indebted to ſeveral Perſons, and particularly to one *Thomas Sorrel* in 100*l.* and upwards.

On the 31ſt of *June* 1739, *Sorrel* ſued out another Commiſſion of Bankruptcy againſt him, and he ſubmitted to ſuch ſecond Commiſſion, and obtained his Certificate, which was allowed by the Lord Chancellor on the 5th of *June*, 1740.

He then returned to his firſt Trade, of a Tea Merchant, and contracted Debts to the Amount of ſeveral hundred Pounds.

In *May* 1740, *Wright* and *Huey*, the Aſſignees in the firſt Commiſſion preferred a Petition, in the Names of themſelves and all the Reſt of the Creditors under the ſaid firſt Commiſſion, in order to ſet aſide the ſecond Commiſſion and his Certificate, which was advertiſed in the *Gazette* to be allowed, unleſs Cauſe was ſhewn to the contrary.

And pending this Petition, *viz* 24 *May* 1740, a Notice was publiſhed in the *London Gazette*, for a Meeting of the Creditors under the firſt Commiſſion, who afterwards met thoſe under the ſecond Commiſſion; and theſe latter agreed to give the former a Sum of Money to withdraw their Petition, which they accepted, and withdrew their Petition accordingly; and the Bankrupt having had his Certificate confirmed, continued his Buſineſs as before.

But two of his Creditors under the firſt Commiſſion, on the 17th of *December* 1743, preferred a Petition to the Lord Chancellor, ſetting forth the Matters before mentioned, and that *Jackſon* had not made a fair Diſcovery of his Eſtate, and had prevailed on the Aſſignees under the firſt Commiſſion not to attend their Petition, by Means whereof the ſaid Bankrupt, to their great Surprize, had obtained his Certificate.

That they were adviſed, that the ſecond Commiſſion was obtained fraudulently, and that the iſſuing of the ſame under thoſe Circumſtances was irregular, and that the ſaid Certificate was obtained in order to prevent the Creditors under the firſt Commiſſion from recovering their Debts, though they were aſſured the Bankrupt was then able to pay them.

They therefore prayed that the Commiſſion might be ſuperſeded, and that all Proceedings under the ſame, with the Bankrupt's Certificate, might be ſet aſide.

But his Lordſhip ordering the Parties to attend, and that the Proceedings under both Commiſſions ſhould be produced; and the Petition coming on before his Lordſhip, after being learnedly argued by the Gentlemen at the Baron both Sides, he, was pleaſed for the following Reaſons, among others, to diſmiſs the Petition:

1ſt. Becauſe the Parties had acquieſced in the Allowance of the Certificate under the ſecond Commiſſion, from the 5th of *June* 1740, being the Time of *Jackſon's* obtaining

obtaining ſuch Certificate, to the 17th of *December* 1743, and had never made any Complaint of the ſame.

2dly. That there had been a Meeting between the Aſſignees and ſeveral of the Creditors, under the firſt and ſecond Commiſſion; and that the Petition, which was intended to be preſented to the Court for ſtaying the Bankrupt's Certificate under the ſecond Commiſſion, was by the Conſent of the Aſſignees and Creditors under the firſt Commiſſion, who were preſent and had publick Notice in the *Gazette* to meet the Aſſignees and Creditors under the ſecond, and circular Letters ſent them for that Purpoſe; and that they had agreed, that ſuch Petition ſhould be withdrawn, in Conſideration of a Sum of Money paid by the Creditors under the ſecond Commiſſion, to the Creditors under the firſt Commiſſion; and that this was in the Nature of an Acquieſcence and Conſent from the Creditors of the firſt Commiſſion, that *Jackſon* ſhould have his Certificate under the ſecond Commiſſion.

3dly. That it did not appear to him, but that the Petitioners were well acquainted with the Steps that were taken by the Aſſignees and Creditors in the firſt Commiſſion, in Regard that they had not denied the ſame by their Affidavit, but had only ſwore that they did not know, remember, or believe, that they ever conſented to the withdrawing of the Petition, preferred by the Aſſignees as aforeſaid, to ſet aſide the Certificate under the ſecond Commiſſion; and that if the Aſſignees had done amiſs, the Creditors had a Remedy againſt them.

4thly. That *Jackſon* had, under the Sanction of the Court, carried on a conſiderable Trade, and that it would be contrary to the Juſtice of a Court of Equity, to prejudice innocent Perſons, who might have been induced to give future Credit, believing him to be a free Perſon, on having ſuch Certificate; and the Conſequence would be, that all his Dealings from that Time muſt opened and unravelled.

When a Bankrupt has in all Things conformed himſelf to the Acts made concerning Bankruptcy, he ſhall be allowed by the Aſſignees 5*l. per Cent.* out of the nett Produce of all the Eſtate that ſhall be recovered in and received; provided the ſaid nett Produce, after ſuch Allowance, ſhall be ſufficient to pay the Creditors ten Shillings in the Pound, and ſo as the ſaid 5*l. per Cent.* ſhall not amount in the whole to above 200*l.* and in Caſe the nett Produce, after deducting the following Allowance, ſhall be ſufficient to pay the Creditors twelve Shillings and Sixpence in the Pound, the Bankrupt in this Caſe ſhall be allowed 7*l.* 10*s. per Cent.* ſo as that ſuch Allowance ſhall not amount in the whole to above 250*l.* And in Caſe the nett Produce, after the following Allowance is deducted, ſhall be enough to pay the Creditors fifteen Shillings in the Pound, the Bankrupt ſhall be allowed 10*l. per Cent.* provided it does not amount in the whole to above 300*l.* But if the ſaid Bankrupt's Eſtate is not ſufficient to pay the Creditors ten Shillings in the Pound nett, as aforementioned, then, and in ſuch Caſe, the Bankrupt ſhall only be allowed ſo much as the Aſſignees and Commiſſioners ſhall think fit, not exceeding 3*l. per Cent.* 5 *Geo.* II C. 30. S. 7.

The Commiſſioners ſhall, upon lawful Requeſt made to them by the Bankrupt, not only make a true Declaration to him of the employing and beſtowing all his Lands, Tenements, Hereditaments, Offices, Fees, Goods, Wares, Money, Chattels, and Debts paid and ſatisfied to his Creditors; but alſo make Payment of the Overplus of the ſame, if any ſuch ſhall be, to the ſaid Bankrupt, his Executors, Adminiſtrators, or Aſſigns; and the Bankrupt, after full Satisfaction of his Creditors, ſhall have full Power and Authority to recover and receive the Reſidue and Remainder of the Debts to him owing. 1 *Jac.* I. C. 15. Sect. 15

Lord Hardwicke directed, that a Bankrupt who had paid 14*s.* 6*d.* in the Pound, who had his Certificate, and a Releaſe from his Creditors of all further Demands, ſhall ſtand in the Place of the Aſſignees to get in the Remainder of the Debts, on giving a proper Indemnity to the Aſſignees, that they might not be called to an Account for ſuch Money ſo received. *Tr. Atk.* Rep. 145. Pl. 84.

And though the Bankrupt ſhall have obtained his Certificate, and the ſame has been duly confirmed, it does not put an End to his Duty of Attendance, as he is obliged to give it upon every reaſonable Notice in Writing delivered to him, or left at his uſual Place of Abode, by the Aſſignees, thereby requiring him to attend them, 5 *Geo.* II. C. 30. S. 8.

them, in Order to make up, adjuſt, or ſettle any Account or Accounts between ſuch Bankrupt, and any Debtor to, or Creditor of him, or to attend any Court or Courts of Record, in Order to be examined touching the ſame, or for ſuch other Buſineſs as the Aſſignees ſhall judge neceſſary, for getting in the Bankrupt's Eſtate and Effects; and for which Attendance the Bankrupt ſhall be allowed the Sum of two Shillings and Sixpence *per Diem* by the Aſſignees, to be paid out of the Eſtate; and in Caſe ſuch Bankrupt ſhall neglect or refuſe to attend, or on ſuch Attendance ſhall refuſe to aſſiſt in ſuch Diſcovery, without good Cauſe to be ſhewn to the Commiſſioners for ſuch his Neglect or Refuſal, to be by them allowed as ſufficient, ſuch Aſſignees making due Proof thereof upon Oath, before the ſaid Commiſſioners, they the ſaid Commiſſioners are hereby impowered and required, to iſſue a Warrant directed to ſuch Perſon or Perſons as they ſhall think proper, for apprehending ſuch Bankrupt and him committing to the County Jail, there to remain in cloſe Cuſtody without Bail or Mainprize, until he ſhall duly conform to the Satisfaction of the ſaid Commiſſioners, and be by them, or the ſpecial Order of the Lord Chancellor, or otherwiſe by due Courſe of Law diſcharged; and the Jailor is thereby required to keep ſuch Perſon in cloſe Cuſtody within the Walls of the Priſon, until he be duly diſcharged as aforeſaid.

5 *Geo.* II. C. 30. S. 9. In Caſe any Commiſſion of Bankruptcy ſhall iſſue againſt any Perſon, who after the 24th of *June*, 1732, ſhall have been diſcharged by Virtue of this Act, or ſhall have compounded with his Creditors, or delivered to them his Effects, and been releaſed by them, or being diſcharged by any Act for Relief of Inſolvent Debtors, then the Body only of ſuch Perſon conforming, ſhall be free from Arreſt and Impriſonment; but the future Eſtate of ſuch Perſon ſhall remain liable to his Creditors; the Tools of Trade, neceſſary Houſehold Goods, and neceſſary Wearing Apparel of ſuch Bankrupt, and his Wife, and Children excepted, unleſs the Eſtate of ſuch Perſon ſhall produce clear fifteen Shillings in the Pound.

Ditto, S. 12. Nothing in this Act ſhall give any Advantage to any Bankrupt, who ſhall upon Marriage of any of his Children have given above the Value of 100*l.* unleſs he ſhall prove by his Books, or otherwiſe, upon his Oath or Affirmation before the Commiſſioners, that he had remaining other Eſtates ſufficient to pay every Perſon to whom he was indebted their full Debts; or who ſhall have loſt in one Day the Value of 5*l.* or in the whole the Value of 100*l.* within twelve Months next preceding his becoming Bankrupt, at Cards, Dice, Tables, Tennis, Bowls, Billiards, Shovel-board, or Cockfighting, Horſe-races, Dog-matches, or Foot-races, or other Game, or by bearing a Share in the Stakes, or betting; or that within one Year before he became Bankrupt, ſhall have loſt 100*l.* by Contracts for Stocks, or Shares of any publick Funds, where ſuch Contract was not to be performed within one Week from the Making, or where the Stock was not actually transferred.

Ditto, S. 14. Upon Certificate under the Hands and Seals of the Commiſſioners, that ſuch Commiſſion is iſſued, and ſuch Perſon proved before them to become Bankrupt, it ſhall be lawful for any of the Juſtices of any of his Majeſty's Courts of King's Bench, or Common Pleas, or Barons of the Exchequer, *&c.* and they are required, upon Application made, to grant their Warrants for apprehending ſuch Perſon, and him to commit to the common Jail of the County, where he ſhall be apprehended, there to remain until he be removed by Order of the Commiſſioners; and the Jailer to whoſe Cuſtody ſuch Perſon ſhall be committed, is required to give Notice to one of the Commiſſioners, of ſuch Perſon being in his Cuſtody; and the Commiſſioners are impowered to ſeize the Effects of ſuch Bankrupt, the neceſſary Wearing-Apparel of ſuch Bankrupt, or of his Wife or Children, excepted, and his Books of Writings, which ſhall be then in the Cuſtody of ſuch Bankrupt, or of any other Perſon in Priſon.

Ditto, S. 15. If any Perſon ſo apprehended ſhall, within the Time allowed, ſubmit to be examined, and conform as if he had ſurrendered, ſuch Perſon ſhall have the Benefit of this Act, as if he had voluntarily come in.

Ditto, S. 41. Upon Petition of any Perſon, the Lord Chancellor may order ſuch Commiſſions, Depoſitions, Proceedings, and Certificates to be entered of Record; and in

Caſe of the Death of the Witneſſes, proving ſuch Bankruptcy, or in Caſe the ſaid Commiſſions or other Things ſhall be loſt, a Copy of the Record of ſuch Commiſſions or Things ſigned and atteſted as herein is mentioned, may be given in Evidence to prove ſuch Commiſſions, and Bankruptcy, or other Things; and all Certificates, which have been allowed, or to be allowed, and entered of Record, or a true Copy of every Certificate ſigned and atteſted, as herein is mentioned, ſhall and may be given in Evidence in any Courts of Record, and without further Proof taken to be a Bar and Diſcharge againſt any Action for any Debt contracted before the iſſuing of ſuch Commiſſion, unleſs any Creditor of the Perſon that hath ſuch Certificate ſhall prove ſuch Certificate was fraudulently obtained; and the Lord Chancellor ſhall appoint a Place near the Inns of the Court, where the Matters aforeſaid ſhall be entered of Record, where all Perſons ſhall be at Liberty to ſearch; and the Lord Chancellor ſhall by Writing appoint a proper Perſon, who ſhall, by himſelf, or Deputy to be approved by the Lord Chancellor by Writing, enter of Record ſuch Commiſſions, and other Things, and have the Cuſtody of the Entries thereof; and alſo appoint ſuch Fee for his Labour therein, as the Lord Chancellor ſhall think reaſonable, not exceeding what is uſually paid in like Caſes; and the Perſon ſo to be appointed, and his Deputy, ſhall continue to enter of Record all the Matters aforeſaid, and to have the Cuſtody of the ſame, ſo long as they ſhall behave themſelves well; and ſhall not be removed but by Order in Writing, under the Hand of the Lord Chancellor, on good Cauſes therein ſpecified.

Contingent Debts not proveable under the Commiſſion are *not* diſcharged by the Certificate. *Bur.* Rep. 2446.

It does not diſcharge Bankrupt from Bond of Indemnity, where the Breach was after the Bankruptcy.

Bankrupt's Certificate will not diſcharge him from a Debt which he owes as *Executor*. *Tr. Atk.* Rep. 101.

Nor, according to *Lord Mansfield*, from a Judgement *de bonis teſtatoris ſi*, &c. and *de bonis propriis* for the Coſts, obtained between the Commiſſion and Certificate, on a falſe Plea of no Aſſets, in an Action on Teſtator's Bond. Pl. 50, 51. *Bur.* Rep. 1368.

Bankrupts not obtaining their Certificates, are excepted from the Act for the Benefit of Inſolvent Debtors, unleſs they are relieved by Conformity, *&c.* according to 12 and 14 *Geo.* III. 28 *Geo.* II. C. 13. S. 22. 1 *Geo.* III. C. 17. S. 80.

Of the Aſſignment, and Bargain and Sale of the Bankrupt's Eſtate. Of the Inrolment, and what ſhall paſs thereby, or be ſuch an Intereſt as the Commiſſioners may aſſign.

THE Commiſſioners may ſell by Bargain and Sale, all the Lands, Tenements, Hereditaments, as well Copy as Freehold, which the Bankrupt had in his own Right, before he became Bankrupt; and alſo all ſuch Lands, Tenements, and Hereditaments, as he ſhall have purchaſed or obtained by Money, or other Recompence, jointly with his Wife or Children, to the only Uſe of ſuch Offender, and all ſuch Uſe, Intereſt, Right, or Title as he ſhall have in the ſame, which he may part withall. This muſt be by Deed indented and inrolled; and Bargainee may not enter till *compoſit*, with the Lord and Admittance. 13 *Eliz.* C. 7. S. 2. Bargain and Sale of a Copyhold by Commiſſioners paſſes the Eſtate, and veſts it in the Aſſignees withont Admittance. *Cro. Car.* 569

The Commiſſioners may likewiſe aſſign all the Bankrupt's Fees, Annuities, Offices, Goods, Chattels, Wares, Merchandizes, and Debts. 13 *Eliz.* C. 7. S. 3.

If a Bankrupt after his Bankruptcy purchaſe any Lands, Tenements, or Hereditaments, Free or Copy; Offices, Fees, Goods, or Chattels; or in Caſe any of them ſhall deſcend, revert, or by any Means come to any Bankrupt before his Debts are paid, ſuch future Acquiſitions are made ſubject to the Commiſſion, and may be aſſigned. *William Jones* 451. S. C 13 *Eliz* C. 7. S. 11. *Moyſes* v. *Little.* 2 *Vern.* 194.

The Father, on the Marriage of his Son, covenants, during his own Life, to pay him fifteen Pounds *per Ann.* the Son becomes a Bankrupt; and the Aſſignee files a Bill againſt the Father, to have the Benefit of the Agreement, and to compel Payment of the fifteen Pounds *per Ann.* It was held that the Aſſignee is not entitled to have a Performance of an Agreement made with the Bankrupt.

A Le-

Toulſon v. *Grant.* 2 *Vern.* 432. But he had obtained a Decree for ſuch Legacy before his Bankruptcy, and was reported due. C. 637.

A Legacy given to a Bankrupt before his Bankruptcy was aſſigned.

If a Bankrupt convey to his Children, or other Perſons, any of his real or perſonal Eſtate, except the ſame ſhall be purchaſed, or conveyed, or transferred to his Children in Conſequence of Marriage, or ſome valuable Conſideration, the Commiſſion ſhall over-rule.

Commiſſioners may aſſign all Debts, due, or to be due to the Bankrupt, which ſhall fully veſt the Property in the Aſſignee, and he may ſue in his own Name.

1 *Jac.* I. C. 15. S. 5. Ditto, S. 11. 21 *Jac.* I. C. 19. S. 12, 13.

The Commiſſioners by Bargain and Sale, indented and inrolled in one of the Courts of Record at *Weſtminſter*, may grant any Lands or Hereditaments, of which the Bankrupt hath an Eſtate in Tail, in Poſſeſſion, Reverſion, or Remainder, except whereof the Gift of the Crown, the Reverſion or Remainder ſhall be in the King, and the Commiſſioners may redeem Mortgages upon Lands or Goods.

Abr. Equity Caſes, 54.

A Man deviſed his Lands in Mortgage to be ſold, and the Surplus to be paid his Daughter, who married a Man who ſoon after became Bankrupt and died; upon a Bill brought by the Aſſignees againſt the Wife, to have the Land ſold and the Surplus paid to them, the Court diſmiſſed the Bill.

Allen's Caſe.

As to the Sale of Lands in a Bankrupt's own Poſſeſſion at the Time of his Failing, the Caſe of *Allen*, in the *Chancery*, 1 *Jac.* I. is a very remarkable one; and was as follows: *Edwards*, a Citizen of *York*, who had ſerved the Office of Sheriff there, being indebted to *Allen*, *Haberſley*, and others of *London*, for Wares ſold, became a Bankrupt; upon which *Allen* and *Haberſley*, and ſome other Creditors of *London*, by a Petition to the Lord Chancellor, procured a Commiſſion of Bankruptcy againſt the ſaid *Edwards*, to certain Commiſſioners therein named; who, by Deed of Bargain and Sale inrolled, ſold all the Bankrupt's Lands, to *Allen* and *Haberſley* for 400*l.* the Land being then worth 2400*l.* but was ſold ſo cheap on account of many Incumbrances on it, made long before *Edwards* was a Bankrupt, or became indebted to *Allen*, or any of the *Londoners* who ſued out the Commiſſion.

After this Sale, the Commiſſioners, *Allen*, and the other petitioning Creditors, upon full Conſideration had of the Bankrupt's Eſtate, which ſtood encumbered with a Mortgage, Statute, and Leaſes, made an Agreement with the Bankrupt and his Friends to this Effect; *viz.* That the Creditors would take ten Shillings in the Pound for their due Debts, and *Smith* and *Wood* were the Bankrupt's Securities for Payment of the ſame; and it was agreed, that *Allen* and *Haberſley* ſhould convey the Bankrupt's Land to them for their Security, which Agreement was certified by the Commiſſioners: and they did alſo certify, that *Allen*, after this Agreement refuſed to comply therwith, and ſought the Advantage of Law, to the great Loſs and Hindrance of the reſt of the Creditors, and to the Undoing of *Edwards*, his Wife, and Children.

In Execution of this Agreement, twelve Pounds ten Shillings was paid to one of the Creditors, and Books were drawn and ingroſſed by one of the Commiſſioners ready for perfecting the Aſſurance; notwithſtanding all which, *Allen* refuſing the Agreement with *Haberſley*, preferred a Bill againſt *Edwards* and others, complaining, that the Mortgage, Statute, and Leaſes were all fraudulent, and the Money being paid was kept on Foot by Practice, to prejudice the Creditors, and the Sale made by the Commiſſioners: Wherupon *Edwards*, *Smith*, and *Wood*, preferred a croſs Bill againſt *Allen* and *Haberſley*, for the Performance of the Agreement of ten Shillings in the Pound, and to convey the Land to *Smith* and *Wood* according to the Agreement.

At the Hearing of the Cauſe upon *Allen's* Bill, the Lord Chancellor, finding it confeſſed, that of the Mortgage Money there was but thirty Pounds unpaid, ordered that *Allen*, paying the thirty Pounds, ſhould have the ſame conveyed to him and *Haberſley & al.* and the Statute to be diſcharged, which was done accordingly and a Decree made, that *Allen* and *Haberſley*, and their Heirs, ſhould enjoy the Lands according to the Sale of the Commiſſioners, free from the Incumbrances and Charges of the Statute, and the Perſon who had it was left to the

the Law; but upon another Motion, his Lordſhip had ſtayed the *Liberate*, after Extent upon that Statute; and ſo it reſted.

Allen having gotten the Incumbrances thus cleared by the Court of *Chancery*, ſought to hold the Lands for the 400*l.* only, which were worth 2400*l.* although he had covenanted with the Commiſſioners in the Bargain and Sale, that if the Lands were ſold for more than 400*l.* within three Years, he would pay the Overplus towards the Satisfaction of the Creditors; and all Incumberances being diſcharged within the three Years, as aforeſaid, yet he would hold the Land for 400*l.* and pay no more for it.

In another Term, *Allen* gets a Commiſſion out of *Chancery*, to the Sheriffs of *York* there, to put him in Poſſeſſion of the Land, upon the firſt Decree in *Chancery* made for him; and *Allen*, with the Under-Sheriff, caſt *Edwards's* Children all out of Doors in Froſt and Snow, that they were inforced to ſuccour themſelves in a Maſh Fat, and when ſome of the Tenants of the Land would have taken them in, and relieved them, *Allen* threatened to turn them out of their Tenements if they did ſo; and did turn one of the Tenants out of his Houſe, who entertained them but one Night. Alſo *Allen* took divers Cattle and Goods that were *Edwards's* Father's, and not the Bankrupt's; and the old Man ſueing for them in the *Kings-Bench* Court, *Allen* procured an Injunction out of *Chancery*, and ſtaid all the Suits as long as the old Man lived, who ſhortly died; and *Edwards* and his Wife at *London*, following the Suit to be relieved againſt *Allen*, died both together of the Plague, leaving ſeven poor Children behind them.

The Lord Chancellor, being informed of this Extremity by Petition and Affidavit, gave Direction that the Bill which *Edwards*, *Smith*, and *Wood* preferred upon the Agreement of ten Shillings in the Pound, ſhould be revived in Behalf of the poor Children; and his Lordſhip aſſigned *Wood* their Guardian to proſecute, and *Francis Moore* he aſſigned to be of their Counſel *in Forma Pauperis*.

This Cauſe coming to Hearing, and the Agreement appearing confeſſed by *Allen's* Anſwer, and proved by the Certificate of the Commiſſioners, and divers Witneſſes; the covetous and unconſcionable Dealing of *Allen* likewiſe appearing plainly, by the Covenant which they took of *Allen*, the Lord Chancellor decreed *Allen* ſhould pay the Overplus of the Value of the Lands above 400*l.* if they ſhould be ſold for more; and the uncharitable and unchriſtian Uſage of *Allen* towards the poor Children of *Edwards*, being all Infants not able to help themſelves, conſidered, did decree, that *Allen* and the Reſt ſhould be ſatisfied with ten Shillings in the Pound for their Debts, according to the Agreement certified by the Commiſſioners; but no Abatement to be made of the 400*l.* paid for the Land, nor of the 30*l.* paid for the Mortgage; and withall, that *Allen* ſhould have reaſonable Allowance for Coſts of Suit; and for this Purpoſe his Lordſhip made a Reference to Sir *John Tindal*, a Maſter in *Chancery*, to caſt up the Eſtate of the Bankrupt and the Debts, and to certify what Overplus he found for the Relief of the poor Children.

Sir *John Tindal* often heard the Cauſe, and the Allegations of *Allen* and his Counſel, and in the End made a Certificate of the Eſtate real and perſonal of the Bankrupt, and of the Debts, and made all Allowances as by the Order was directed, and gave to *Allen* for Coſts of Suit two hundred Marks, and to *Haberſley* a hundred Marks, and ſeventy Pounds to all the Creditors that ſued out the Commiſſion; and for the Reſidue, did propoſe it as his Opinion, that *Allen* ſhould keep the Land, and pay the Overplus of the Value thereof above the 400*l.* or part with the Land to *Smith & al.* who would pay *Allen* and the other Creditors according to the Report. and yield the Overplus to the Children, amounting to 600*l.* or thereabouts.

On reading the Maſter's Report, the Lord Chancellor gave Time to *Allen* to make his Election, whether he would keep the Land and pay the Money, or part with the Land and receive the Money; And as *Allen* made no Election, but inſiſted upon the Advantage, to have the Land for 400*l.* worth 2400*l.* and would render nothing to the Creditors, nor to the poor Children;

The Lord Chancellor did now decree, that *Allen* ſhould receive the Money mentioned in the Report, which was much more than in Equity was any Ways due unto him, and convey the Lands according to the Report; and for not performing this Decree, *Allen* was committed to Priſon. *This Cauſe began the* 1 *Jac. and ended* 11 *Jac.* I.

W. Jones, Rep. 203. 4 *Car.* I. *B.R. Audley* and *Halſey.*

It is laid down as a Rule, that where the Owner of Lands, *&c.* by his own Act may not controul a Gift or a Charge; there, if he becomes a Bankrupt, the Gift or Charge may not be defeated: ſo that if a Man bargain and ſell Lands, and before Inrolment becomes a Bankrupt; and the Deed afterwards is inrolled; in that Caſe, the Land may not be ſold by the Commiſſioners of Bankrupts, but the *Bargainee* ſhall hold the Land diſcharged from the Commiſſioners. And where a Perſon gives Lands, upon a precedent Condition, to be performed by the *Donee*, and becomes a Bankrupt, after which the Condition is performed, this defeats the Power of the Commiſſion.

Although the Commiſſioners in the aforementioned Caſe cannot ſell the Land, where the Party before Inrolment becomes a Bankrupt, according to the Rule laid down by *Jones*, yet it is ſaid, if he makes a Feoffment of Lands, and a Letter of Attorney to give Livery, and then becomes Bankrupt before the Seiſin is delivered, theſe Lands may be ſold by the Commiſſioners. The Reaſon of the Difference is, in the firſt Caſe the *Bargainee* is in by the Bargain and Sale, by Relation from the Execution thereof, and not by the Inrolment; and the Bankrupt could not by his own Act defeat this; but no Eſtate in the other Caſe paſſeth at all till the Livery be executed; and then in this laſt Caſe, his Letter of Attorney is revocable, and his becoming a Bankrupt before the Eſtate is executed, is *quaſi* a Countermand or Revocation in Law.

In Ejectment, upon a ſpecial Verdict, the Queſtion was, whether the *Vendee* or *Bargainee* of the Commiſſioners upon the Statute of Bankrupts, of Lands by Deed indented, may by his Leſſee maintain an Ejectment before the Inrolment of the Deed, although it be inrolled after the Action brought; Here it was ſaid by the Court, that there is a great Difference between this Caſe and the Caſe of a Bargain and Sale by the Statute 27 *Hen.* VIII. Cap. 10. of Uſes; for the Eſtate there paſſeth by the Contract, and the Uſe is executed by the Statute: Then comes the Statute of Inrolments, Cap. 16. of the ſame Year, which enacts, That *no Eſtate ſhall paſs without Inrolment of the Deed indented, and that within ſix Months*, the Words of the Act being, *unleſs it be by deed indented and inrolled*, and therefore the Contract is with the Party that had the Eſtate, and the Deed is appointed to be inrolled within a certain Time.

Perry v. *Bowes.* 1 *Jones* 196, 197.

But here the Commiſſioners have not any Eſtate, only a Power whichought to be executed by the Means preſcribed by the Statute, with the Circumſtances thereby directed; that is, not only by the Deed indented, but inrolled alſo: And if they do not purſue the Act according to their Power, there is no Execution or Effect to paſs the Eſtate; and it would be very dangerous to make any other Conſtruction, as no Time is limited by the ſaid Act for the Inrolment; for it were inrolled any Time after ſeven, or twenty Years, or a longer Time, it ſhall relate as well to the making of the Deed, as any ſhorter Time; and Judgment was given for the Defendant.

1 *Vent.* 361.

The Caſe being argued by *Saunders*, as reported in *Ventris*, he pleaded, that in the Caſe of Inrolment of a Bargain and Sale, the Deed itſelf paſſeth the Uſe, and the Statute of Inrolment obſtructs the Operation of it till Inrolment; but when that is done, it paſſeth by the Deed: That here needs no Relation to avoid the Miſchief of mean Aſſignments from the Bankrupt, becauſe he is reſtrained from the Time of his firſt Act of Bankruptcy; and on the other Side, the Miſchiefs would be very great, if there ſhould be a Relation from the Inrolment, in Regard the Statute limits no Time for the doing of it, ſo that it may be inrolled many Years after; and if this ſhould relate to puniſh *meſne Treſpaſſes* the Inconvenience would be very great, for ſuch Treſpaſſes are, until the Inrolment, expoſed to the Actions of the Bankrupt.

That generally in Caſes of common Law, there is no Relation, as in the Caſe of Feoffment and Livery, but ſtronger in Caſe of a Grant of a Reverſion, where the

the Attornment is but the Aſſent of the Tenant; yet it ſhall not relate to the Grant: It would be hard if Relation ſhould be admitted to make a Man liable to Treſpaſs; and it has been much doubted, whether a Bargainee before an actual Entry can maintain Action of Treſpaſs.

Per Curiam, where Executors ſell by Authority given by Will, the Vendee is in the *Per* from the *Diviſor*, but here in the *Poſt*, and by the Statute; and it muſt be very inconvenient to admit of Relation, becauſe no Time is fixed for the Inrolment.

The Judges in this Caſe afterwards gave their Opinions, that Sale by Commiſſioners of Bankrupts, if of Lands, ought to be by Deed inrolled, and is void if otherwiſe; and that this depends upon the different Penning of the Statute from that of Inrolment; they likewiſe held, that here ſhall be no Relation. *Skin.* 30.

A Sale of intailed Lands by the Commiſſioners ſhall be good againſt the Bankrupt and his Iſſue, and bar Perſons in Remainder or Reverſion, as much as if himſelf had ſuffered a common Recovery. A Caſe has been put on this Clauſe of the Statute 21 *Jac.* I. If Lands are ſettled on *A.* and *B.* his Wife, before Marriage, for their Lives; and after their Deceaſes, to the Uſe of the firſt Son of their Bodies lawfully begotten, and to the Heirs Male of ſuch firſt Son; and for Want of ſuch Iſſue, to the Uſe of the ſecond Son, *&c.* in Tail Male, and ſo to the tenth Son; *A.* becomes a Bankrupt before he hath a Son; whether the Commiſſioners may ſell theſe Lands, and make a good Eſtate to the Purchaſer? It is held they may; for though *A.* is here not Tenant in Tail, but a bare Tenant for Life, the Words in the Statute being, that the *Bargain and Sale ſhall be good againſt all and every other Perſon or Perſons whatſoever, whom the Bankrupt might cut off and debar by common Recovery, or otherwiſe from any Remainder, Reverſion, Rent, Profit, Title, or Poſſibility:* It ſeems this Bargain and Sale ſhall be good; for *A.* the Father, before Iſſue, by his bare Feoffment, might deſtroy the contingent Eſtate; as it is in *Archer*'s Caſe, 1 Rep. 67. But was the Settlement made ſo, as to ſupport the contingent Remainder, as is uſually done, ſo that the Father could by no Means debar it by any Act he could do, then it would make a greater Queſtion; and yet if the Commiſſioners could not ſell in ſuch Caſe, as Settlements are generally made now, the Act in this Point might be eaſily eluded: However this is to be underſtood in voluntary Settlements.

In Conſideration of Marriage, a Man makes a Conveyance to the Uſe of himſelf and his Wife; afterwards he becomes a Bankrupt, on which a Commiſſion is taken out, and the Lands are ſold by the Commiſſioners; the Sale has been adjudged good. It is obſerved in this Caſe, that within half a Year after the Settlement, the Party became Bankrupt; ſo as there ſeems to be a Fraud in the Conveyance; but it is not expreſſed in the Pleading, as it might have been; and this is not in Diſpute upon a ſpecial Verdict, but comes in Queſtion on a Point of Pleading, which is to be ſtrongly taken againſt him that pleads it; and he does not expreſs any valuable Conſideration, as he might have done; as Conſideration of a Portion, or Performance of Articles made on Marriage, or that the Wife had joined in ſelling ſome Part of the Land. *Gooding.* 82.

A Settlement was made by the Huſband, for a Jointure of his Wife, reciting, that the Wife had joined with the Huſband to ſell Part of her former Jointure, in which he and ſhe were Tenants for Life, the Remainder in Tail to the firſt and tenth Son, Remainder to his Heirs: By *Hale* C. J. at a Trial at Bar, this is not fraudulent, though he alone, having no Iſſue, might bar this contingent Remainder. *Stile*'s Rep. 288. *Tucker* v. *Cloſh.*

And a Man may ſettle Lands on his Son, before he be a Bankrupt; and if it be not by Frand and to deceive Creditors, it ſhall be good, and the Fraud muſt be found by the Jury. The Statute ſaith, *The Sale of the Commiſſioners ſhall be good againſt ſuch Offenders*, and he is no Offender till he is a Bankrupt. *Scot* v. *Bill.* 3 *Keb.* 82

If a Man purchaſes Lands after the Time of his Trading, and his being in Debt, and doth purchaſe it in the Name of his Wife or Children fraudulently, this will be liable to Sale by the Commiſſioners: Though it is otherwiſe, if it be purchaſed before he comes to be a Merchant. Alſo any Sale of Lands or Goods by a Bankrupt before he comes to be in Debt, or before his Trading, *Jones* 438.

is

March Rep. 34. *Stone* 163. is without Queſtion good; and ſo are all the Acts he doth, before he comes to appear to be a Bankrupt.

174. *Langham* v. *John Bew-tt's Wife.* 1 *Cro.* 68. In Caſe a Bankrupt hath Lands in Right of his Wife, they may be ſold during the Coverture; and if ſhe be a *Feme Sole* Merchant in *London*, ſhe becoming Bankrupt, the whole ſhall be ſold; and it ſhall be counted the Huſband's Folly to ſuffer her to trade, and her Trading ſhall be looked upon as his; ſo that ſhe and her Eſtate in Trade ſhall be affected by his Bankruptcy. But the Dower of a Bankrupt's Wife ſhall never be ſold, unleſs ſhe marries one that is a Bankrupt.

1 *Jac.* I. It is clearly held, that if two Perſons are jointly ſeiſed of Lands, and one becomes a Bankrupt, his Moiety may be ſold by the Commiſſioners: even though he be dead, and the Survivorſhip ſhall not take Place.

Gooding, 89. 90. And where two Women are joint Tenants of a Leaſe for Years, and one takes a Huſband who becomes a Bankrupt; the Commiſſioners may ſell the Intereſt of a Moiety: And yet this has been queſtioned; for Chattels real are given to the Huſband, if he ſurvive; but if he die before the Wife, ſhe ſhall have them. If two joint Tenants are diſſeiſed, it is likewiſe a Queſtion, whether the Commiſſioners ſhall ſell on the Bankruptcy of one of them; for before Entry he could not grant his Moiety, though he might releaſe it.

Stone 147. As to Lands *deſcended* or *deviſed* to the Bankrupt after his Bankruptcy, the Commiſſioners may ſell the ſame: as they may all Offices of Inheritance, ſuch as Warden of the *Fleet*, Keeper of a Foreſt, *&c.* but no judicial Office, or Office of Truſt which is annexed to the Perſon, and may not be executed by a Deputy; for if ſuch Officer abſents, he forfeits his Office, and then the King's grant is over.

Billingburſt, 116. As for Lands mortgaged, or Eſtates on Condition, by 21 *Jac.* I. Chap. 19. if a Merchant makes a Feoffment on Condition, *that upon paying a certain Sum he may re-enter*, and then becomes a Bankrupt, the Commiſſioners may tender the Money at the Day, and make Sale of the Land. But where Lands are mortgaged to a Bankrupt, as of a Feoffment in Fee, in Conſideration of a Sum of Money, to be paid to him and his Heirs, provided that if the Feoffor do not pay ſuch a Sum on ſuch a Day, then the Feoffor is to make it an Eſtate abſolute: The Feoffee becomes a Bankrupt, and the Money is not paid on the Day; the Commiſſioners cannot by this Act force the Feoffor to make an abſolute Fee, though *Chancery* will compel him.

1 Chan. Caſe. 71. 2 *Vern.* 97. By the Statute, the Commiſſioners are enabled to perform the Condition, *&c.* of a Mortgage; but if the Mortgage is forfeited, it has been formerly a *Quere* whether the Commiſſioners might diſpoſe of the Equity of Redemption; but Serjeant *Newdigate* ſaid it had been ruled in *Chancery*, that Commiſſioners may aſſign an Equity of Redemption.

Where the Equity of Redemption of Lands mortgaged was conveyed over to a third Perſon by a Bankrupt, after his Bankruptcy, though before the Aſſignment of his Eſtate by the Commiſſioners; Lord Chancellor *Talbot* held that nothing paſſed by this Conveyance; for Creditors after Bankruptcy are in Nature of Purchaſers, and have a prior Equity to any other Perſons.

Talbot's Caſe, 68. 69. And as the Statutes concerning Bankruptcy are found on ſuppoſed Frauds of the Bankrupts; and conſequently intended to put them under Diſabilities to prejudice their Creditors; ſo his Lordſhip decreed, that the Mortgagee ſhould re-convey to the Plaintiff, the Aſſignee, upon Payment of the Principal and Intereſt.

Barnardiſt. Rep. 30. 32. *Paſch.* 1740. In general, no Perſon ſhall be allowed to come into Equity for a Redemption, but he that has no legal Eſtate of the Mortgager; and where there are proper Perſons as Aſſignees to get in the Eſtate of a Bankrupt, a Court of Equity will not ſuffer the Creditors to bring in a Bill in order to redeem or recover that Eſtate, unleſs the Aſſignees under a Commiſſion make Default or collude with a Debtor, when a Creditor may bring his Bill, in order to take Care of the Eſtate, and charge the Aſſignee with ſuch Colluſion.

21. *Jac.* I. C. 15. S. 11. If a Bankrupt, before his Bankruptcy, ſells his Goods to other Perſons, and yet keeps and diſpoſes of the ſame as if they were his own, ſuch Goods ſhall be ſold by the Commiſſioners; and accordingly it hath been always ſo adjudged:

And if a Man, with an Intent to ſupport the Credit of a Bankrupt, ſuffers him to have his Goods in his Cuſtody, and to diſpoſe of them, the Property of theſe Goods ſhall be accounted to be in the Bankrupt, and not in the true Owner; for the Owner ſhall loſe his Right, as a Puniſhment for his falſe Dealing herein, and of the Miſchiefs that may grow by ſuch Devices to evade the Laws; and the Law cannot take Notice of ſuch private Things done between the Parties, but will judge of them as they appear to be.

If one becomes a Bankrupt after an *Extent* and before the *Liberate*, and the Commiſſioners ſell the Goods to the Creditors; it has been adjudged they cannot be ſold. Though the Words of the Statute are, *That the Commiſſioners have Power to ſell the Goods which were his at the Time that he became a Bankrupt*; notwithſtanding he becomes a Bankrupt before the *Liberate*; and although the Property remains in the *Conuſor* until the Delivery by that *Writ*; yet the *Extent* has bound the Goods ſo, that when the *Liberate* comes it defeats this, and diveſts the Property of the Goods out of the *Conuſor*, as to any mean Act or Incumbrance, from the Time of the *Extent*. 1 *Lill.* Abr. 195.

In this Caſe, all the Court reſolved, and ſeverally delivered their Opinions, that thoſe Goods extended before the Party became a Bankrupt, and delivered by the *Liberate* after he was a Bankrupt, could not be ſold by the Commiſſioners; becauſe they being extended, are *quaſi in Cuſtodiâ Legis*, ſo as the *Conuſors* have not any Power to give, ſell, or diſpoſe of them; and they are as Goods gaged or diſtrained, which cannot be forfeited by Outlawry, or taken in Execution, from the Perſon that has them in Gage, or by Way of Diſtreſs, without Payment of the Money, for the Goods are bound by the Teſt of the Writ of Extent or Execution ſued. *Cro. Car.* 149; *Audley* v. *Halſey*.

They alſo held, when the Writ of *Liberate* is ſued out, it has Relation to the Writ of Extent, and they are as but one Extent; and the Goods are ſo bound by the Extent and Appraiſement, that the *Conuſor* hath no more Property in them but *ſecundum quid*, that is, if the *Conuſee* refuſe to accept them; for it is a conditional Writ to deliver the Goods to the *Conuſee*, if he will accept thereof, and when he accepts them, they are bound *ab initio*. And they all conceived, that the Statute being with an Exception, when Execution or an Extent is ſerved or executed; that this is to be accounted the Execution of an Extent, when the Goods are appraiſed, and the Writ returned; but ſo long as they remain in the Hands of the *Conuſor*, they may be ſold; but when they are delivered by the *Liberate*, and the Extent is returned ſerved, the Goods are not ſubject to any other Execution, nor the power of the Commiſſioners, to meddle with them.

An Execution was ſued by a Perſon, the Money levied, and in the Sheriff's Hands, and the Man became a Bankrupt: *By the Court*; the Money recovered in the Hands of the Sheriff is not aſſignable by the Commiſſioners to the Creditors, for it is *in Cuſtodia Legis*. 1 *Jones* 202. *Cro. Car.* 166 176. *Benſon* v. *Flower* and *Blackwell*.

But it is nevertheleſs held, that the Aſſignees of the Commiſſioners may bring a *ſcire facias* againſt the Defendant, in Caſe the Money lie in his Hands, in Order to try the Bankruptcy, and ſo gain the Money recovered by the Bankrupt. See the Caſe of *Monk* v. *Morris* and *Clayton*.

One *Thompſon* had a Judgement againſt *Watkins* for 600*l.* and the 19th of *June* ſued out a *fieri facias* thereupon, which the 30th of *June* was delivered to the Sheriff in the Morning, and *Watkins* having Notice thereof, in the Night of the ſame Day departed from his Houſe, and thereby became a Bankrupt; the 1ſt of *October* the Sheriff levied 400*l.* of the Goods of *Watkins*, and paid it to *Thompſon*, and the Commiſſioners aſſigned it in the Hands of *Thompſon* to the Plaintiff, as the Goods of *Watkins* in his Hands, for which an Action on the Caſe was brought, and a ſpecial Verdict on it found; and being learnedly argued on both Sides, a Judgement was finally given for the Defendant. 1 *Vent.* 193. 1 *Mod.* 93.

In an Action of Treſpaſs brought by the Aſſignees of Commiſſioners of Bankruptcy, for taking of their Goods; on Not guilty pleaded, the Jury found a ſpecial Verdict, the Subſtance of which was as follows, *viz.* One *Toplady*, a Vintner, on the 28th of *April* became a Bankrupt, againſt whom a Judgement was formerly obtained; the Judgement Creditor ſued out a *fieri facias*, and the Sheriffs of *London* by Virtue thereof, on the 29th of *April* ſeized the Goods of the ſaid *Toplady*; and after the Seizure, but before any *Venditioni exponas* came, an Extent, *Phillips* v. *Thompſon*. 3 *Lev.* 69, 191.

tent, which is a Prerogative Writ, iſſued out of the *Exchequer*, againſt two Perſons who were indebted to the King, and by Inquiſition, this *Toplady* was found to be in Debt to them, whereupon Part of the Goods mentioned in the Plaintiff's Declaration, were ſeized by the Sheriff, and ſold, and the Money paid, *&c.* but before the ſaid Sale, or any Execution of the *Exchequer* Proceſs, a Commiſſion of Bankruptcy was had againſt *Toplady*, and the Commiſſioners aſſigned the Goods to the Plaintiff.

The Queſtion here was, whether this Extent did not come too late? Or whether the *fieri facias* was well executed, ſo that the Aſſignees of the Bankrupt's Eſtate could not have a Title to thoſe Goods, which were taken before in Execution, and ſo in Cuſtody of the Law? The Court adjudged, That the Extent, though a Prerogative Writ, and likewiſe the Aſſignment by the Commiſſioners of Bankrupt, came too late, becauſe the Execution being well executed, the Goods were made liable to the Judgement Creditor.

Lechmere v. *Thorowgood* & al. 3 *Mod.* 236.

A Perſon that is a Bankrupt, becomes *Felo de ſe*; it has been a Queſtion, whether the Commiſſioners may aſſign the Goods to be ſold for the Creditors, or if the King ſhall have them? And it was reſolved for the Creditors: For though it is adjudged in Lady *Hale's* Caſe, in *Plowden*, that when two Titles come together, *viz.* the King's and that of a Subject, the King's Title ſhall be preferred; yet the King by the Acts of Parliament has given away his Title to the Creditors: And nevertheleſs this may admit of a Diſpute, the Judges never conſtruing a Statute to give away the King's Right, but wherein he is mentioned. In a Queſtion whether the Creditors by a Commiſſion ſhall have the Goods of a Perſon outlawed; It is conceived the King ſhall have them by Outlawry, *&c.* where he has a Title at common Law.

See *W. Jones* Rep. 203. and Sir *Simon Nevil's* Caſe, *Hil.* 3 *Car.* I.

In the *Chancery*, it has been decreed, that Money overpaid on an uſurious Contract, as where a Sum is lent to a Perſon in neceſſitous Circumſtances, at ſix or eight *per Cent.* who afterwards becomes a Bankrupt, ſhall be accounted for and refunded, notwithſtanding the Agreement of the oppreſſed Party to allow ſuch Payment, and the Securities therefore to be delivered up. But in the Caſe of Money loſt at Gaming and paid, the Court will refuſe Relief, where it cannot be recovered at Law; for there the Plaintiff in Equity is *particeps Criminis*.

Boſanquet v. *Daſhwood.* *Talbot's* Caſe, 38, 41.

Of uncertain and contingent Eſtates, and which do or do not centre in the Bankrupt.

THESE are ſeveral, which I ſhall mention in Order, beginning with the Bankrupt's Wife; and, firſt, concerning her *Dower*.

Dower is a Portion which a Widow hath of the Lands or Houſes of her Huſband after his Deceaſe; and by the common Law it is a third Part of the Lands which the Huſband died ſeiſed of, either in *Fee Simple* or *Fee Tail*, which ſhe is to enjoy during Life.

By the Cuſtom of *Kent* called *Gavelkind*, the Widow is entitled to the half Part of the Huſband's Eſtate, either in *Fee Simple* or *Fee Tail*, *quamdiu remanet Sola et Caſta*, ſo long as ſhe remains ſingle and continent; but if ſhe marries, or is guilty of Incontinency, then ſhe forfeits ſuch Eſtate.

1 Inſt. 33. b. 2 *Peer Will.* 634.

Lord *Coke* ſays, that all Kinds of Dower were inſtituted for the Wife's Subſiſtance during her Life; which Right of Dower is not only a *legal* but a *moral* Right, as it was held by Sir *John Trevor*, Maſter of the Rolls, in the Caſe of Lady and Lord *Dudley*.

Sir *Joſ. Jekyl's* Argument and Reſolution.

Secondly, the Relation of Huſband and Wife, as it is the neareſt, ſo it is the earlieſt; and therefore *the Wife is the proper Object of the Care and Kindneſs of her Huſband. The Huſband is bound, by the Laws of God and Man, to provide for her during his Life; and after his Death the moral Obligation is not at an End, but he ought to take Care of her Proviſion during her own Life.* This is the more reaſonable, as during the Coveture, the Wife can acquire no Property of her own. If before the Marriage ſhe had a real Eſtate, this by the Coverture ceaſes to be her's and the Right thereto, whilſt ſhe is married, veſts in the Huſband; her perſonal Eſtate becomes his abſolutely, or at leaſt is ſubject to his Controul; ſo that unleſs ſhe has a real Eſtate of her own, which is the Caſe but of few, ſhe may, by his

Death, be deſtitute of the Neceſſaries of Life, unleſs provided for out of his Eſtate by a Jointure or Dower. As to the Huſband's perſonal Eſtate, unleſs reſtrained by ſpecial Cuſtom, which very rarely takes Place, he may give it all away from her; *ſo that his real Eſtate, if he had any, is the only Plank ſhe can lay hold of to prevent her ſinking under her Diſtreſs.* Thus is the Wife ſaid to have a moral Right to her Dower.

The Huſband, on the Contrary, has no Right to a Tenancy by the Courteſy, but from poſitive Inſtitutions or Proviſion of the Laws: His Right does not ariſe from the Relation of Huſband and Wife, for then every Huſband would have it, which is not ſo; nor doth he want it, if it be not his own Fault, or at leaſt his Misfortune. During the Coverture, he is Maſter not only of his own, but of his Wife's Eſtate; and by his Induſtry and provident Care, may acquire Property ſufficient, without any Part of her Eſtate, to maintain himſelf after her Death: So that the Huſband's Tenancy by the Courteſy hath no moral Foundation, and is therefore properly ſtiled Tenancy by the Courteſy of *England*; that is, an Eſtate by Favour of the Law of *England*.

Dower alſo is a legal Right created by Law, which ſettles the Quality of the Eſtate out of which the Wife's *Dower* ariſes, and likewiſe aſcertains the *Quantum* thereof. The common Law ſays, the third Part is *rationabilis Dos*; and a ſpecial Cuſtom, which is *lex loci*, enlarges or abridges the common Law of Dower, and gives the Whole, Half, or leſs than a Third.

The common Law likewiſe aſcertains Dower, with reſpect to the Nature and Quality of the Huſband's Eſtate. 1 Inſt. 33, b.

It ſays, the Wife's Dower muſt come out of ſuch an Eſtate as would deſcend to the Iſſue of the Huſband by that Wife; and gives Dower of the Huſband's *Seiſin*, though not actual, or reduced into Poſſeſſion; it annexes Privileges to Dower as not to be liable to Diſtreſs for the Huſband's Debts to the King, much leſs for any due to the Subject; with ſeveral other Privileges. Again, the Law fixes the Age when a Woman is dowable; and, by the Way, fixes it at ſuch a Time, as, by the Courſe of Nature, at leaſt in this Part of the Word, it ſeems impoſſible ſhe ſhould have Iſſue, or be pregnant, *viz.* at nine Years old. But it is not ſo favourable to a Tenancy by the Courteſy, which it allows only in the Caſe of a *Seiſin* in Deed; it annexes no Privileges thereto. And though the Huſband may be Tenant by the Courteſy of a common Sans Number, of which the Wife is not dowable, yet that is becauſe of its Indiviſibility; in which Caſe if Dower was allowed, it would be injurious to other Perſons, and the Lands be doubly charged. Thus the Law, where it can juſtly do it, prefers the Title of Dower to that of Courteſy.

Dower is alſo an equitable Right, and ſuch a one as is a Foundation for Relief in a Court of Equity. It ariſes from a Contract made upon a valuable Conſideration, Marriage being in its Nature a Civil, and in its Celebration a ſacred Contract; and the Obligation is a Conſideration moving from each of the contracting Parties to the other; from this Obligation ariſes an Equity to the Wife in ſeveral Caſes, without any previous Agreement, as to make good a defective Execution of a Power, a defective Conveyance, or ſupply the Defect of a Surrender of a Copyhold Eſtate; in all which the Court relieves a Wife, and makes a Proviſion for her, where it is not unreaſonable, or injurious with Reſpect to others. Indeed in the Caſe of the Huſband, Marriage, as it is a legal Conſideration, ſo it is an equitable one; but then it is not carried ſo far in his Favour, as in her's; and in the Caſes before-mentioned, the Court would not ſupply a defective Title for the Huſband; at leaſt it has not been done.

A Bill was brought by a Widow, to be endowed of an Equity of Redemption, though the Mortgage was made in Fee before the Marriage, upon her paying a Third of the Mortgage Money, or keeping down a Third of the Intereſt. And his Honour the *Maſter of the Rolls*, after citing ſeveral Authorities, *declared*, that the Plaintiff, being the Widow of the Perſon entitled to the Equity of Redemption, of the Mortgage in Queſtion, which was a Mortgage in Fee, hath a Right of Redemption; and accordingly decreed her the Arrears of her Dower from the Death of her Huſband, ſhe allowing the Intereſt of the Third of the Mortgage Money, unſatisfied at that Time, and the Dower to be ſet out if the Parties differed.

A Wo-

Caſes in Chancery. Lord *Talbot*, 138. Attorn. Gen. v *Scot. Mich.* 9 *Geo.* II. 1 *Vern.* 356. Lady *Bodmyn* v *Vandebendy.*

A Woman is not entitled to Dower where the Huſband purchaſes an Eſtate with a Truſtee; but if the Truſtee die in the Life-Time of the Huſband, the Joint Tenancy between the Huſband and the Truſtee will ſurvive to the Huſband, and then the Wife will be entitled to Dower.

The Defendant for 4400*l.* purchaſed of Lord *Bodmyn* the Reverſion after the Death of Lord *Warwick*, of Lands of near 1000*l. per Ann.* and for Protection of the Eſtate, and to prevent the Plaintiff's Dower, the Defendant upon his Purchaſe took an Aſſignment of a Term for Years, which was veſted in Truſtees to ſecure the Payment of certain Annuities, and afterwards in Truſt to attend the Inheritance, and likewiſe took an Aſſignment of an ancient Statute that had been kept on Foot for the Protection of the Eſtate.

The Plaintiff had recovered Dower at Law, but was prevented from taking out Execution by Reaſon of the Term and Statute.

To be relieved againſt which, and to be let into the Poſſeſſion of her Thirds, was the End of the Plaintiff's Bill.

The Defendant inſiſted he was a Purchaſer, and that he ought to have the Benefit of this Term for the Protection of his Purchaſe.

Caſes in Parl. 69.

But the Plaintiff's Bill was diſmiſſed, and upon an Appeal to the Houſe of Lords, the Decree of Diſmiſſion was affirmed.

The Wife of a Bankrupt, of a Perſon *non compos mentis*, or of an outlawed or excommunicated Perſon, or of a Perſon committing Felony, is not barred of her Dower.

And in Caſe of the Bill for taking away the Eſtates of the *South Sea* Directors in the Year 1720, all the Wives of their Huſbands were entitled to their Dower, and received Satisfaction for the ſame.

But the Wife of a Perſon guilty of High-Treaſon, or of an alien *Jew*, is not dowable; and if the Wife herſelf commits High-Treaſon, or Felony, or if ſhe elope from her Huſband, and lives with the Adulterer willingly, without being reconciled to her Huſband, ſhe ſhall loſe and forfeit her Dower; but if the Huſband be reconciled, and ſhe live with him again, ſhe ſhall be endowed.

If a Wife levies a Fine with her Huſband, and they join in the Sale of an Eſtate to a Purchaſer, ſhe is barred of her Dower.

By the Statute of the 27 *Hen.* VIII. Cap. 10. Sect. 6. it is enacted, that where Perſons have purchaſed, or have Eſtate made of Lands and Hereditaments, *&c.* to them and their Wives, and to the Heirs of the Huſband, or to the Huſband and to the Wife, and to the Heirs of their two Bodies begotten, or to the Heirs of one of their Bodies to be begotten, or to the Huſband and to the Wife for Term of their Lives, or for Term of Life of the Wife, for Jointure of the Wife; every Woman having ſuch Jointure ſhall not claim any Dower of the Reſidue of the Lands that were her Huſband's.

S. 7. And then it provides, that if any ſuch Woman ſhould be lawfully evicted from her Jointure, or any Part thereof, ſuch Woman ſhall be endowed of as much of the Reſidue of her huſband's Tenements, as the Lands ſo evicted ſhall amount unto.

S. 9. Provided alſo, that if any Wife ſhall have Lands, aſſured after Marriage in Jointure, except the Aſſurance be made by Act of Parliament, ſhe may at her Liberty, after the Death of her Huſband, refuſe the Lands, to her aſſured in Jointure, and demand her Dower according to the common Law.

Wife's Title to her Free-Bench.

FREE-BENCH, is that Eſtate in Copyhold Lands which the Wife hath on the Death of her Huſband for her Dower, according to the Cuſtom of the Manor; and in ſeveral Manors there are various Cuſtoms with Reſpect to ſuch Eſtate; and in ſome Places the Wife hath the Whole of the Lands, in others the Half, and in others the Third: and I ſhall cite the following Caſe:

Parker v. *Edith Bleeke.* *Hil.* 15 *Car.* 13 *Car. Roll.* 1002. 3 *Cro.* 568.

This was an Action of Treſpaſs, and upon a ſpecial Verdict it was found, that the Land was Copyhold of Inheritance of the Manor of *Cheltenham* in *Glouceſterſhire*, whereof *Arthur Bleeke*, late Huſband of the Defendant, was ſeiſed in Fee.

And in this Manor there was a Cuſtom, that if a Copyholder, ſeiſed in Fee of a Copyhold Tenement, died, leaving a Wife at the Time of his Death ſurviving him, that ſhe ſhould hold the ſaid Copyhold Land during her Life, and for twelve Years after.

And by Virtue of the Stat. 13 *Eliz.* he was found Bankrupt; and by Indenture dated the 5th of *April* 10 *Car.* and inrolled within the ſix Months, they ſold the Copyhold Lands to the Plaintiff *Alexander Parker* and to *William Sotherne* and their Heirs, for 600*l.* paid for the Uſe of the Bankrupt's Creditors.

And the Jury by Virtue of a private Act of Parliament, made 1 *Car.* found, that by the Cuſtom of that Manor, the Wife of the Copyholder ſhould have Dower, and may have a Jointure aſſigned for her Life; and that a Copyholder of Inheritance may grant for his Life, and twelve Years after.

And that all Women then living, and late the Wives of any of the Copyholders of the ſaid Manor, dying Tenants, ſhould and may enjoy the cuſtomary Lands of their now, or late Huſbands, and be Tenants for their Lives, and twelve Years after, as if that Act had never been made.

And that all the Cuſtoms and Uſages heretofore uſed and allowed within the ſaid Manor concerning the enjoying any cuſtomary Lands, *&c.* by any Widow of any cuſtomary Tenant, or any after-taken Huſband of ſuch Widow, or the Heir or Heirs of ſuch Wife, hereafter taking Huſband, or concerning the Deſcending of any ſuch Lands to any other Perſon or in any other Form than is before expreſſed, ſhall be void; and that all other lawful Uſages and Cuſtoms, heretofore uſed within the ſaid Manor, which were not repugnant and contrary to the true Meaning of that Act, ſhould be and remain good and effectual to be ratified by that Act.

And the Jury found, that at a Court Baron of the ſaid Manor, held the 1ſt of *April* 12 *Car.* it was found by the Homage, that *Edith* ſurvived her Huſband, and ought to enjoy the ſaid Tenements for her Life, and for twelve Years after; and that upon a Preſentment the 1ſt of *April*, 12 *Car.* and before the Admiſſion of *Alexander Parker* and *William Sotherne*, the ſaid *Edith* was admitted Tenant of the Tenements aforeſaid, according to the Cuſtom of the Manor, and by Virtue of ſuch Admiſſion ſhe entered.

And this was very well argued at the Bar by *Glyn* for the Plaintiff, and *Moreton* for the Defendant, where two Points were inſiſted on.

1ſt. Whether by the Bargain and Sale made by the Commiſſioners, by Virtue of the Statute of Bankrupts, the Eſtate of the Copyholder was veſted in the Bargainee before Admittance; for then the ſaid *Arthur Bleeke* did not die Tenant, and ſo it is not within the Cuſtom, that his Wife ſhould have Widow's Eſtate.

2dly. Admitting he died Tenant, and the Widow had ſuch an Eſtate veſted in her, whether the Vendees, by the Bargain and Sale to them before made, ſhall not afterwards diveſt the Eſtate of the *Feme* by Relation, and then the Plaintiff hath a good Title.

And it was argued that the Bargain and Sale binds the Copyholder, and bars his Eſtate; and that he is no Copyholder after the Bargain and Sale enrolled; and the Bargainee by the Statute is only barred to take the Profits until Admittance, which is for the Lord's Benefit, in Reſpect to the Fine due to him thereupon. 2dly, It was held, when the Bargainee is admitted by the Lord, it ſhall veſt in the Bargainee, and ſhall have Relation to the Bargain and Sale, and ſhall diveſt the Eſtate which the *Feme* claimed by the Cuſtom, as in the Caſe of 7 *Edw.* VI. *Brook*, Title *Inrolments*. Where one Joint Tenant bargains and ſells, and before the Inrolment the other dies, and afterwards the Deed is inrolled within the ſix Months, yet the Moiety only paſſed. And it is like the Caſe where one bargains and ſells by Indenture, and takes a Wife and dies, and afterwards the Deed is inrolled within ſix Months, the *Feme* ſhall not have her Dower; and ſo the Caſe 22 *Eliz.* where a Mortgagee dies, his Heir being in Ward to the King, the Condition is afterwards performed, the Wardſhip ſhall be diveſted. *Jones* and *Bramſton* doubted of the Point, until they ſaw the Record finds the Act to be particularly, that ſhe ought to be the Wife of a Tenant, and it is not intended, that, after the Sale of a Copyhold he ſhould die Tenant, and he did not die Tenant, becauſe the Bargain and Sale took his Eſtate from him, and ouſted him of

the Copyhold. Wherefore they agreed Judgement ſhould be entered for the Plaintiff.

Having exhibited theſe Caſes concerning the Wife's Dower and Free-Bench, I ſhall now mention ſome concerning *ſeparate Settlements* before Marriage, and Proviſions of Parents after.

Separate Settlements

ARE frequently made before Marriage; and the fitteſt and ſecureſt Manner of making them is as follows:

The intended Wife names Truſtees of her own; and that Part of her Fortune or Eſtate, which ſhe or her Friends think fit to ſettle for ſuch ſeparate Uſe, is, with the Privity and Conſent of the intended Huſband, and who ought always to be made a Party to the Deed, conveyed or aſſigned to ſuch Truſtees for her ſole and ſeparate Uſe and Benefit, and to and for ſuch Uſes, Intents, and Purpoſes, as the ſaid intended Wife, by Deed or Deeds in Writing, or by her laſt Will, ſhall direct or appoint: And there is a particular Agreement that ſuch ſeparate Eſtate ſhall not be ſubject in any Reſpect to the Debts, Control, or Engagements of the Huſband; but that the Truſtees are to pay and apply ſuch ſeparate Eſtate, or the Rents or Intereſt thereof, into her own proper Hands, or to permit her, or her Aſſigns, to receive the ſame for her own ſeparate Uſe, excluſive of her Huſband, as ſhe ſhall appoint.

And by this Deed the intended Huſband uſually covenants with the Truſtees, that they ſhall quietly enjoy ſuch ſeparate Eſtate or Money; and he conſents to the Settlement; and he agrees that any Deed or Will that ſhe may make, according to that Deed, ſhall have its full Effect; and that he will not obſtruct the Execution of the ſame.

Theſe ſeparate Proviſions are alſo frequently made by Deed or Will, by Parents to their Daughters that are married, as a Proviſion for their Support and Maintenance, in Caſe any Misfortunes or Loſſes may happen to their Huſbands; and if they are ſecured in this Manner, they are effectual againſt any of the Huſband's Creditors, or any Incumbrance or Act of Bankruptcy.

And the Reaſon why Settlements ſhould be made in this Manner will appear from the following Caſes.

2 Chan Rep. 18. *Howard* and *Hooker*. A Widow makes a Deed of Settlement of her Eſtate, and marries a ſecond Huſband, who was not privy to that Settlement; and it appearing to the Court, that it was in Confidence of her having ſuch an Eſtate that the Huſband married her, the Court ſet aſide the Deed as fraudulent.

2 Chan. Rep. 79. So where the intended Wife the Day before her Marriage entered into a Recognizance to her Brother, it was decreed to be delivered up.

2 *Vern.* 17. *Carleton* and the Earl of *Dorſet*. *Hil.* 1688. So where a Conveyance was made by the Wife before her Marriage to Truſtees in Truſt, that they ſhould permit her to receive the Rents and Profits of the Eſtate, and act in every Thing as ſhe, whether Sole or Covert, ſhould appoint; the Lady being crazed in her Underſtanding, endeavoured to run away from her Huſband, and ſtirred up her Creditors to ſue him; and the Conveyance appearing to be without the Huſband's Privity, the Lord Chancellor held it to be in Derogation of the Rights of Marriage; and decreed the Poſſeſſion of the Eſtate to the Huſband, and a Conveyance from the Truſtees to the Six Clerks, that it might be Subject to the Order of the Court.

2 *Vern.* 17. *Edmonds* and *Dennington*. A Woman, on Agreement before Marriage with her Huſband, being to have a Power to act as a Feme Sole; and the Huſband dying, and ſhe marrying again, the ſecond Huſband, not being privy to the Settlement on the firſt Marriage, it was decreed, that the ſecond Huſband ſhould not be bound by the Settlement made on the former Marriage. A Caſe cited to be decreed.

1 *Vern.* 408. *Hunt* and *Matthews*. *Mich.* 1689. But when a Widow, before her Marriage with a ſecond Huſband, aſſigned over the greateſt Part of her Eſtate to Truſtees, in Truſt for Children by her former Huſband; and though it was inſiſted, that this was without the Privity of her Huſband, and done with a Deſign to cheat him, yet the Court thought that a Widow may thus provide for her Children, before ſhe put herſelf under the Power of an Huſband; and it being proved that 800*l.* was thus ſettled, and that

that the Huſband had ſuppreſſed the Deed, he was decreed to pay the whole Money, without directing any Account.

William Daviſon having deviſed a Legacy of 600*l.* to his Son, payable at twenty-one, for which he had obtained a Decree, and 637*l.* reported due; before he received the Money he became a Bankrupt, and the Commiſſioners aſſigned the Legacy and Benefit of the Decree. *Toulſon* v. *Grout.* 2 *Vern.* Rep. 432. *Hil.* Term. 1701. in *Cur. Can.*

The Bill was brought by the Aſſignees to have the Benefit of the Decree; to which the Defendants, the Executors, demurred, inſiſting that a Legacy was not within the compaſs of Proviſion of any of the Acts made againſt Bankrupts, to be aſſigned to the Creditors.

But the Demurrer was overruled; and ſaid that the Act of Parliament ought to be taken in the moſt beneficial Senſe for the Advantage of the Creditors.

Wills in Favour of a Bankrupt's Wife, &c.

J. S. Married his Daughter to one *Bennett*, a Tradeſman in *London*, who was extravagant and in Debt; the Father makes his Will, and deviſes the Premiſes in Queſtion, being Lands in Fee, to his Daughter, the Wife of *Bennett*, for her ſeparate Uſe, excluſive of her Huſband, to hold to her and her Heirs; and that her Huſband ſhould not be Tenant by the Courteſy, nor have theſe Lands for his Life in Caſe he ſurvived his Wife, but they ſhould, upon the Wife's Death, go to her Heirs. *Bennett* v. *Davis.* 2 *Peer Wil.* 316. *Mich.* 1725, at the *Rolls.*

Soon after this, the Teſtator dies, and *Bennett* becoming a Bankrupt, the Commiſſioners aſſign the Lands to the Defendant *Davis*, in Truſt for the Creditors; and upon *Davis's* bringing his Ejectment, the Bankrupt's Wife, by her next Friend, prefers her Bill againſt *Davis*, the Aſſignee and Huſband, to compel them to aſſign over his Eſtate to her ſeparate Uſe.

It was objected on Behalf of the Defendant, that he being a Creditor, and having the Law on his Side, it would be hard to take that Benefit from him; and that, though the Teſtator might intend theſe Lands for the ſeparate Uſe of his Daughter, yet that this Intention was not executed according to Law, as the Premiſes were not deviſed to Truſtees for the ſeparate Uſe of the Wife, and according to Law the Huſband, during the Coverture, was entitled to his Wife's Eſtate in her Right; and it was farther urged, that the Caſe of a Deviſe of a Legacy or of a Term to the Wife for her ſeparate Uſe might be good, becauſe theſe remained in the Executor until Aſſent, and Equity would not compel the Executor to aſſent, whereby the Intention of the Teſtator ſhould be diſappointed, but would continue the Executor a Truſtee for the Feme Covert. Whereas in the preſent Caſe, the Deviſe being of Lands in Fee to the Wife, who by the Will only had an immediate Title thereto, the Huſband muſt conſequently be entitled to the Profits in her Right.

That there was no Truſt, the Teſtator never having intended to truſt the Huſband, and the Wife could not be a Truſtee for herſelf; beſides, the Huſband could not be a Truſtee for the Wife, they both being but one Perſon.

On the other Hand, the Plaintiff's Counſel would have read *parole Evidence*, to prove that the Teſtator did not intend theſe Lands ſhould be liable to the Huſband's Debts; but the Court would not permit ſuch Evidence to be read, it being in the Caſe of a Deviſe of Land, which by the Statute muſt be all of it in Writing.

As to the chief Point, the Maſter of the *Rolls* took it to be a clear Caſe, that it was a Truſt in the Huſband, and that there was no Difference where the Truſt was created by an Act of the Party, and where by the Act of Law.

If I ſhould deviſe that my Lands ſhould be charged with Debts or Legacies, my Heir, taking ſuch Lands by Deſcent, would be but a Truſtee; and no Remedy for theſe Debts and Legacies but in Equity: So in the principal Caſe, there being an apparent Intention that the Wife ſhould enjoy theſe Lands to her ſeparate Uſe: By that Means, the Huſband, who would otherwiſe be entitled to take the Profits in his Right during the Coverture, is now declared and made a Truſtee for his Wife; and admitting the Huſband to be a Truſtee, then the Argument of the Creditors having the Law on their Side, was immaterial; as if the Bankrupt had been a Truſtee for *I. S.* his Bankruptcy ſhould not in Equity affect the Truſt Eſtate;

Eſtate; and that though the Huſband, the Bankrupt, might be Tenant by the Courteſy, yet he ſhould be but a Truſtee for the Heirs of the Wife. Alſo when the Teſtator had a Power to deviſe the Premiſes to Truſtees, for the ſeparate Uſe of the Wife, this Court, in Compliance with his declared Intention, will ſupply the Want of them, and make the Huſband Truſtee. And the Defendant, the Aſſignee, who claiming under the Huſband can have no better Right than the Huſband, muſt join in a Conveyance for the ſeparate Uſe of the Wife, which was *decreed accordingly*.

2 *Vern.* 96. *Eaſt.* Term. 1689.

The Defendant's Teſtator by his Will deviſed 800*l.* to be paid within ſix Months after his Death to one Mr. *Define*, in Truſt, that he ſhould lay it out and inveſt it in a Purchaſe for the Benefit of the Wife of *I. S.* and to ſettle it ſo, as after the Death of his Wife it might come to her Children, and the Intereſt in the mean Time to be paid to ſuch Perſons as ought to receive the Profits. *I. S.* becomes a Bankrupt, and the Plaintiff, as Aſſignee under the Statute, would have the Intereſt of this Money decreed to him, during the joint Lives of Baron and Feme.

Vandenanker v. *Deſbrough.*

Per Curiam: This not being any *Truſt created by the Huſband, or any Thing out of his Eſtate*, but given by a Relation of the Wife's, and intended for her Maintenance, it is not liable to the Creditors of the Huſband, and the Plaintiff hath no Title thereto as Aſſignee of the Commiſſion of Bankruptcy; and therefore *decreed* it ſhould be paid to *Define* the Truſtee, to be laid out in Land, and ſettled according to the Will.

The Caſe of *Drake* and the *Mayor of Exeter* was cited, where there was a Leaſe for twenty-one Years, with a Covenant for Renewal at the End of the Term; the Leſſee became Bankrupt; adjudged, the Aſſignee under the Statute ſhould have no Benefit of that Covenant.

Jacobſon & al. v. *Williams.*

Walter Wallinger by his Will left to his Niece *Elizabeth Tayleur*, an Infant, 1000*l.* payable after the Death of the Teſtator's Wife, and at his ſaid Niece's Age of twenty-one Years, if ſhe ſhould ſo long live.

1 *Peer Will.* 383. Caſe 100. *Mich.* Term. 1717 L. C. *Cowper*, Abr. Caſes in Eq. 54.

The Niece married *I. S.* without the Knowledge or Conſent of her Father; *I. S.* being at that Time much in Debt by Judgment and otherwiſe; and gained the young Gentlewoman's Conſent by the Influence of a Maid Servant, whom he had bribed to his Intereſt. The Niece was about eighteen Years of Age.

Soon after the Marriage, *I. S.* became a Bankrupt, and the Commiſſioners of Bankruptcy aſſigned over all the Eſtate and Effects of the Bankrupt to the Plaintiffs, in Truſt for the Creditors, who brought their Bill for this Legacy; the Teſtator's Widow being dead, and the Niece being about twenty-one Years old, and conſequently the Legacy due; and the Bankrupt had two Children by his Wife then living.

This Cauſe coming on before Baron *Price*, in the Abſence of the Lord Chancellor, the Baron, in Regard to the Creditors, did decree the Legacy and Intereſt to be paid to the Plaintiffs.

But upon an Appeal from that Decree to the Lord Chancellor, his Lordſhip declared, that foraſmuch as the Plaintiffs, the Aſſignees of the Commiſſion, claimed under the Bankrupt, they ought not to be in a better Caſe than the Bankrupt himſelf; and ſince, if he had brought a Bill for his Legacy, the Court would not have allowed it him, without obliging him at the ſame Time to make ſome Proviſion for the Wife and Children; ſo, for the ſame Reaſon, when theſe claiming under the Bankrupt, and who muſt be exactly in the ſame Caſe as he himſelf would have been in, come for Equity, they ought to do Equity, which would be to provide for the Wife and Children of the Bankrupt, from whom they derived their Claim. But with Regard to the Intereſt of the Money, as the Bankrupt commonly was allowed to receive that, ſo the Aſſignees ought to receive the ſame during the Bankrupt's Life; alſo if the Bankrupt's Wife ſhould die without Iſſue, then the Bankrupt would have been allowed to receive the whole Money, and therefore in ſuch Caſe the Aſſignees ſhould be allowed to receive it alſo.

However his Lordſhip ſaid, that as a Judge had been of a contrary Opinion, he would take Time to conſider of it.

And on the Cauſe coming on again, the Caſe of *Taylor* and *Wheeler* was cited; and it was moreover obſerved to the Court, that the Bankrupt had in this Caſe gained his Certificate and was diſcharged, and that the Aſſignment made to the

Complainants being before the Legacy was veſted, if they could not now ſupply the Aſſignment, by making a new one, the Conſequence was that the Legacy was veſted in the Bankrupt.

But the Lord Chancellor replied, that this not appearing in the Pleadings, he would take no Notice of it; nevertheleſs at another Day, the Fact being made to appear by a Petition with the Certificate of the Commiſſioners, and the Allowance of the Lord Chancellor *Harcourt* annexed, the Court ſaid it was clear, the Commiſſioners could not aſſign this Poſſibility of Right which the Bankrupt had to the Portion, and conſequently the Aſſignees being Plaintiffs in the Bills, and entitling themſelves under this Aſſignment, and this Aſſignment being void, with reſpect to ſuch Poſſibility *, therefore the Bill muſt be diſmiſſed, but without Coſts, becauſe the Plaintiffs were Creditors.

* *But the Reaſon given above,* viz. *becauſe the Bankrupt, the Huſband, could not have come to his Wife's Portion without the Aſſiſtance of a Court of Equity, which would not have decreed it to him, but on his making ſome Proviſion for his Wife, ſeems to have been the beſt Foundation for this Decree; ſince a Poſſibility or contingent Intereſt is certainly aſſignable by the Commiſſioners. Thus in the Caſe of* Higden verſ. Williamſon, *firſt heard at the* Rolls, Mich. 1731, *and afterwards affirmed by Lord Chancellor* King, *in* Mich. 1732. *The Caſe in Effect was, an Eſtate was deviſed to be ſold, and the Monies ariſing from ſuch Sale to be divided among ſuch of the Children of* A. *as ſhould be living at his Death:* A. *had ſeveral Children, one of whom,* viz. B. *became a Bankrupt, and the Commiſſioners aſſigned over his Eſtate; after which* B. *got his Certificate allowed; and then* A. *died: Declared that his Share of this Money, which on* A.'s *Death belonged to* B. *ſhould be paid to the Commiſſioners; for that not only the latter Statutes relating to Bankruptcy mentioned the Word* Poſſibility, *but alſo becauſe the* 13 Eliz. *Cap.* 7. *Sect.* 2. *empowers the Commiſſioners to aſſign all that the Bankrupt might depart with; and here* B. *in the Life-time of* A. *might have releaſed this contingent Intereſt. Beſides, the* 21 Jac. I. *Cap.* 19, *enacts, that the Statutes relating to Bankrupts ſhall be conſtrued in the moſt beneficial Manner for Creditors.*

Afterwards, in Trinity Term 1718, the Wife of *I. S.* by her next Friend, having brought a Bill, ſetting forth her having been ſeduced into this Marriage, and the Huſband's Bankruptcy, together with the Certificate for his Diſcharge, prayed that the Money might be put out to her ſeparate Uſe for her Life, and afterwards for her Children; to which the Huſband putting in his Anſwer, and declaring himſelf ſenſible of his having injured his Wife, in Manner as above, ſubmitted to what was deſired by the Bill, only prayed the Arrears of Intereſt.

On the other Hand, the Aſſignees oppoſed the Bill, inſiſting, that the Commiſſioners might ſtill make a new Aſſignment of this which was now and not before veſted.

But by Lord Chancellor *Parker*, the Commiſſioners have executed their Power, and the Debts which the Huſband, the Bankrupt, owed to the Creditors before the Bankruptcy, are now extinct by Act of Parliament; and this Portion is as a new-acquired Eſtate by the Huſband in Right of his Wife; wherefore ſince the Huſband agreed to this Prayer of his Wife's Bill, which is but a reaſonable Reparation for the Wrong he had done her, *decree* the Huſband the Arrears of Intereſt, deducting the Coſts, and let the Legacy be laid out in a Purchaſe; and in the mean Time let the Wife have the Intereſt for her ſeparate Uſe, *&c.* by which Means the whole Legacy was ſaved to the Wife, and to her ſeparate Uſe.

Of Marriage Bonds, and Articles before Marriage.

MARRIAGE BONDS are frequently given before the Eſpouſals, by Perſons who are engaged in Trade or Buſineſs, and where it would be inconvenient to lay out the Portion in Land, becauſe the Woman's Fortune is ſuppoſed to be added to the Huſband's, and to be inveſted in the Stock in Trade, in Order to be there managed by the Huſband for the mutual Support of themſelves and their Children.

And theſe Bonds muſt be given to two Truſtees, to be named and appointed by the intended Wife, or one of them by her, and the other by the Man, and according to the Portion or Fortune, which the Woman brings her Huſband, the Huſ-

band becomes bound, to pay at his Deceaſe, to the Truſtees, or the Survivor of them, or the Executors or Adminiſtrators of ſuch Survivor, the Sum agreed between them in Truſt, and for the ſole Uſe and Benefit of the Wife, in Caſe ſhe ſhall ſurvive him; or Part for the Wife, and Part for the Children, as the Parties ſhall agree between themſelves; and in Caſe the Wife ſhall not ſurvive the Huſband, and there ſhall be no Children, then the Bond is uſually declared to be void.

The Reaſon of giving this Bond to Truſtees is in Order to ſupport the Demand againſt the Eſtate of the Huſband; and it is effectual againſt his real as well as perſonal Eſtate, but it muſt not be made to the intended Wife in her Name, before Marriage, becauſe upon the Marriage, the Huſband and Wife are become one Perſon in Law; and whatever Securities might be given to her before Marriage, unleſs they were ſupported by Truſtees, would, on ſuch Marriage, revert back again, and be merged in the Huſband's Fortune, and be unſafe for the Wife.

A Marriage Bond is of no greater Effect or Force than any other Bond Debt; but as the Wife is frequently Executrix to her Huſband, and the Law uſually throws the Right of Adminiſtration upon her, whenever ſhe is either Executrix or Adminiſtratrix, ſhe as well as any other Executor or Adminiſtrator has a Right to pay her Bond Debt firſt, and preferable to all other Bond Debts, or Debts of an equal or inferior Degree.

But if the Huſband becomes a Bankrupt in her Life-time, this has been adjudged to be ſuch a contingent or uncertain Debt, that her Truſtees cannot come in as Creditors to prove ſuch Debt under ſuch Commiſſion, which the following Caſes will illuſtrate:

A Huſband who was a Trader, in Conſideration of a Marriage, and of a Portion, gave a Bond to his Wife's Truſtees, to leave the Wife, if ſhe ſurvived him, 1000*l.* The Obligor became a Bankrupt; and it was objected, that in Lord *Cowper's* Time it had been ordered, in Caſe of Bond given on ſo valuable a Conſideration, that the Money computed upon the Diſtribution to be the Share of the Obligee in this Bond, ſhall be put out at Intereſt, and the Creditors have ſuch Intereſt during the Life of the Huſband, the Bankrupt; and if the Huſband ſhould die, leaving the Wife, the Money to be paid to the Wife; but, if the Wife ſhould die in the Life-time of her Huſband, then the Money to be paid to the Creditors.

2 *Vern.* 663. *Holland* v. *Calliford.*

On the other Hand, Lord *Macclesfield* was ſaid to have doubted of this, wherefore this Caſe coming again in Queſtion before the then Lord Chancellor *King*, his Lordſhip ordered the Precedents made in Lord *Cowper's* Time to be left with him.

Ex Parte *Bayly* in *Hil.* Vac. 1720. 2 *Peer Will.* 497. *Mich.* T. 1728. L. C. *King.*

And his Lordſhip was of another Opinion, conceiving, that no Part of the Bankrupt's Eſtate ſhould wait, or be deferred from being diſtributed; the Act ordering that the Bankrupt's Eſtate ſhould be diſtributed within Months; eſpecially that the Diſtribution ſhould not wait, as in the preſent Caſe, for a Debt which was neither *debitum in preſenti*, and never might be *debitum in futuro*, in regard the Wife might die in the Life-time of her Huſband; beſides the Huſband, after his Certificate allowed, might go to his Trade again, and become a ſolvent Perſon able to pay off his Bond: The Court reſolved, that the contingent Creditor ſhould not come in for a Diſtribution, neither ſhould the Money be reſerved in Favour of ſuch Contingency.

But his Lordſhip declared, that though the Debt was contingent when the Obligor became a Bankrupt, yet if the Contingency happen before the Diſtribution made, then ſuch contingent Creditor ſhould come in for his Debt; ſo if ſuch Contingency happened before the ſecond Dividend made, the Creditor ſhould come in for his Proportion thereof, though after the firſt Dividend.

The Obligor on a Bottomree Bond became Bankrupt before the Return of the Ship, and the Ship did not return before the Diſtribution made; whereupon it was held that the Obligee ſhould have no Benefit of the Diſtribution upon the Commiſſion. And,

Whereas it was objected, that this Bond would be barred, after the Bankrupt's Certificate allowed, which could not be unleſs it was then done;

Note, The cautious Way of declaring in ſuch Caſe.

Per Curiam: This cannot be, if the Obligor is careful in declaring upon his Bond; indeed if the Party declares upon the Bond only, he ſhall be barred; otherwiſe, if he ſets forth as well the Condition as the Bond in the Declaration; for then

then it muſt appear, that the Cauſe of Action did not accrue at the Time of the Obligor's becoming a Bankrupt.

But the above Caſe is ſince altered, and the Obligee in any Bottomree Bond ſhall be admitted to claim, and after the Loſs or Contingency ſhall have happened, to prove his Debt or Demands in Reſpect of ſuch Bond, in like Manner as if the Loſs had happened before the Time of the iſſuing of the Commiſſion of Bankruptcy againſt the Obligor, and ſhall be entitled unto, and have and receive a proportionable Part, Share, and Dividend of the Bankrupt's Eſtate, in Proportion to the other Creditors of ſuch Bankrupt, and in like Manner as if ſuch Loſs and Contingency had happened before ſuch Commiſſion iſſued. 19 *Geo.* II.

And this Act makes it the ſame with the Obligors and Obligees on a Policy of Inſurance.

One *Blanchard*, a Cabinet-Maker, married the Siſter of *Calliford*, who had 500*l.* Portion ſecured by Land. *Blanchard*, on his Marriage, gives a Bond to leave his intended Wife, if ſhe ſurvived him, 500*l.* or a third of his Eſtate, at her Election. *Blanchard* v. *Calliford.*

Blanchard became a Bankrupt; Bill by the Aſſignees to have the 500*l.* raiſed by a Sale; and decreed accordingly: But with this, that the Wife ſhould come in as a Creditor upon the 500*l.* Bond; and what ſhall be paid in Reſpect thereof, to be put out at Intereſt, and received by the Creditors, during the Life of the Huſband, and if the Wife ſurvived then the Money to be paid to her.

I. S. indebted by Bond to the Wife of *A.* became a Bankrupt; the Huſband comes in and claims the Debt, pays the Contribution-Money, but dies before any Dividend was made; the Wife ſurvives, but dies alſo before any Diſtribution. *Mich.* 1719. 2 *Vern.* 707.

Lord Chancellor directed the Diſtribution to be made to the Executors of the Wife, and not to thoſe of the Huſband; repaying to the Huſband's Executors what he had advanced for Contribution.

The Huſband's paying the Contribution-Money did not alter the Property of the Debt, but it remained a Choſe in Action, and ſurvived to the Wife.

The Plaintiff brought an Action of Debt againſt the Defendant for 800*l.* wherein the Plaintiff declared, that *William Donalſon* in his Life-time, *viz.* the 6th of *May*, 1704, by his Bond then dated, obliged himſelf, his Heirs, *&c.* to the Plaintiff *Tully*, and one *Philip Ruſby*, whom the Plaintiff ſurvived, in the ſaid Sum of 800*l.* *&c.* with Condition, that if the Heirs, *&c.* of the ſaid *William* ſhould pay to the ſaid Plaintiff *Tully* and *Philip*, or the Survivor of them, or the Executors, *&c.* of the Survivor of them, 400*l.* within two Months after the Death of the ſaid *William*, in Caſe one *Martha Latimer* ſhould marry the ſaid *William*, and ſhould happen to ſurvive him; in Truſt for the Benefit and Behoof of the ſaid *Martha*, her Executors, *&c.* then the Obligation ſhould be void, *&c.* and the Plaintiff in Fact ſays, that after the making the ſaid Bond, the ſaid *Martha* married the ſaid *William Donalſon*, and that after the ſaid Marriage, the ſaid *Philip Ruſby* died, and the Plaintiff ſurvived him; and that the ſaid *William* made his Will, and appointed the Defendants his Executors; and afterwards, the ſaid Will not being revoked, died; and the ſaid *Martha* ſurvived him, and is yet alive: and that after the Death of the ſaid *William Donalſon*, the Defendant *Frances* proved the ſaid Will in due Form of Law; that the ſaid *Frances* and *Chriſtopher*, or either of them, did not pay to the Plaintiff the ſaid 400*l.* within two Months after the Death of the ſaid *William*, according to the ſaid Condition, whereby the Bond became forfeited; and the Action aroſe to the Plaintiff, to demand of the ſaid Defendants the ſaid 800*l.* but the Defendants the ſaid 800*l.* though often requeſted, have not yet paid, *&c.* *James Tully* v. *Frances Sparks* and *Chriſtopher May*, Executors of *William Donalſon.*

The Defendants, after praying Oyer of the Bond and Condition, which was granted, plead in Bar, that the ſaid *William Donalſon*, after making the Bond, for ſeven Years, before and after that Time, exerciſed the Trade of a Biſcuit Baker, and got his Living thereby, and became indebted to Sundries in the Sum of 200*l.* and more, and became a Bankrupt, and was declared ſuch by the Commiſſioners, and had his Certificate allowed.

This Caſe was learnedly argued both for the Plaintiff and Defendant, and the Cauſe coming on in *Michaelmas* Term 1728, *Judgement was given by the whole Court*

upon the Merits, that the Plaintiff's Debt was not barred by the Matter compriſed in the Plea, becauſe it was not within the 7 Geo. I. *Cap.* 31.

In the Matter of James King, *a Bankrupt, on the Part of* Ann King *his Wife.*

The ſaid *Ann King*, by her Petition in *January* 1742, ſet forth, that on the 16th of *Feb.* 1731, by Articles tripartite made before her Marriage with *James King*, between *James King* the elder, and the Bankrupt, of the firſt Part; *James Sutton*, and the ſaid *Ann King*, by the Name of *Ann Sutton*, his Daughter, of the ſecond Part, and *Robert Sutton* and *John Complin*, of the third Part; reciting the intended Marriage, it was, amongſt other Things, covenanted and agreed, that the ſame *James Sutton* ſhould, within three Months after the Marriage, pay the ſaid *James King* the younger 1000*l.* as her Marriage Portion; and if *James* and *Ann* ſhould have Iſſue living at the Death of *James Sutton*, that then his Heirs, *&c.* ſhould pay to the ſaid *James King* the younger, the further Sum of 1000*l.* if he ſhould be then living; but if *King* ſhould die before the laſt 1000*l.* became payable to him, then the ſame ſhould in like Manner be paid to the ſaid *Robert Sutton* and *John Complin*, &c. in Truſt, to place out the ſame at Intereſt, on ſuch Securities as the Truſtees, with the ſaid *Ann King*, ſhould approve of, and ſhould pay the Intereſt to be made thereof to her, during her Life; and after her Deceaſe, for the Maintenance and Education of the Children of the ſaid *James* and *Ann King*, till they ſhould attain twenty-one, and then to be paid to them in ſuch Parts and Proportions as the ſaid *James* and *Ann King* ſhould appoint; and for Default of ſuch Appointment, to be divided equally between them.

And in Caſe they had no Iſſue, then to ſuch Perſon or Perſons as the ſaid *James King* the younger ſhould by Deed or Will give or appoint the ſame unto; and in Default thereof, the ſame was to be paid to the Executors or Adminiſtrators of the ſaid *James King*.

And by the ſame Articles, *James King* the younger covenanted, that if he received the ſaid 1000*l.* payable after *James Sutton's* Death according to ſuch Covenant, that then the Heirs, *&c.* of the ſaid *James King* the younger, would, within three Months after his Deceaſe, pay to the ſaid *Robert Complin* and *John Sutton*, &c. 1000*l.* to be by them employed in ſuch Manner and Form, and for ſuch Uſes, Intents, and Purpoſes as were before expreſſed and limited, touching the 1000*l.* payable after the Death of *James Sutton*.

The Articles were executed by all Parties, and the Marriage ſoon after took Effect.

In *January* 1739, *James Sutton*, the Father died; and *James* and *Ann King* having Iſſue a Daughter named *Ann*, who was then living, *James King* became entitled to the 1000*l.* after *James Sutton's* Death, and the Executors of *Sutton* accordingly paid him the ſame; and he gave them a Diſcharge for it.

In *January* 1741, *Robert Sutton*, one of the Truſtees, died; and a Commiſſion of Bankruptcy iſſued againſt *James King*, and he was duly found a Bankrupt, and his Eſtate was aſſigned to *Edward Grace*, *Thomas Garaway*, and *Timothy Denham*.

That ſhe apprehended that *John Complin*, the ſurviving Truſtee, ought to be allowed the 1000*l.* ſo paid to her Huſband *James King*, by *Sutton's* Executors, in the Nature of a Debt under the Commiſſion, by Virtue of the Covenant in the Articles, and that a proportionable Part of *King's* Eſtate, in proportion to what was to be paid to his other Creditors, might be paid to the Truſtees, to be diſpoſed in ſuch Manner as might anſwer the Intention of the ſaid Articles.

That ſhe had applied to *Complin*, and had requeſted him to prove the ſaid Debt of 1000*l.* before the Commiſſioners, and to be admitted a Creditor for the ſame; but that he pretended, though his Name was mentioned as a Truſtee in the Articles, yet that he had never executed them; and refuſed to act in the Truſt, whereby ſhe and her Daughter were in Danger of being totally deprived of the Benefit of the 1000*l.* intended as a Proviſion for her by the ſaid Articles.

She therefore prayed his Lordſhip, that ſhe might be at Liberty to name a new Truſtee in *Complin's* room; and that ſuch new Truſtee might be admitted a Creditor under the ſaid Commiſſion for the ſaid 1000*l.* and might be paid a Dividend

in Proportion with the Reſt of *James King's* Creditors, and that the Money to be received by ſuch new Truſtee, by Virtue of ſuch Dividend, might be placed out at Intereſt, in ſuch Manner as that ſhe might receive the Intereſt thereof during her Life, in Caſe ſhe ſurvived her Huſband; and that the principal Monies to be received for ſuch Dividend might go and be paid to ſuch Child or Children of her by *James King*, as ſhould happen to be living at the Death of the Survivor of them, in Caſe there ſhould be any ſuch Iſſue; and in ſuch Manner as was directed by the Articles; or that his Lordſhip would make ſuch other Order, as to him would ſeem meet.

And on the 21 *Jan.* 1742, this Petition came on to be heard before his Lordſhip, and was learnedly argued by Counſel on both Sides: And the Caſes of *ex parte Cazalet*, *Holland* and *Calliford*, *Tully* and *Sparks*, were cited; and on the firſt Hearing, his Lordſhip gave the Gentlemen who were Counſel for the ſaid *Ann King*, further Time to ſpeak to it, and in the mean Time to ſearch for Precedents; and upon this Petition coming on again before his Lordſhip, and no other Precedents to the Point appearing, his Lordſhip was pleaſed to be of Opinion, that he could not relieve the Petitioner *Ann King*; and therefore he ordered ſuch Petition to be diſmiſſed.

Debts due to, and from the Wife, when ſingle.

MILES brought Debt againſt Huſband and Wife, upon a Bond entered into by the Woman when ſingle. The Defendants jointly plead in the Bar, that the Plaintiff ought not to have his Action, *&c.* and ſay, that after the Intermarriage, *Williams* the Huſband became a Bankrupt, and a Commiſſion iſſued againſt him, and he ſubmitted, and in all Things conformed himſelf to the Statute of the 4 *Anne*, and to all other Statutes relating to Bankrupts; and therefore the aforeſaid *John* and *Eleanor*, by Virtue of the aforeſaid Statute, ſay, that the Action aforeſaid aroſe to the ſaid *Miles*, before the ſaid *John Williams* became Bankrupt; and that they were ready to verify, and therefore they demanded Judgment, if the ſaid *Miles* ought to maintain his Action. The Plaintiff demurred, and ſhewed for Cauſe, that the Debt ariſing upon the Bond made by the Wife ſolely, was not diſcharged by the Statute mentioned in the Defendant's Plea; and alſo that the Plea ought to have concluded to the Country. The Defendants joined in Demurrer. And after ſeveral Arguments in this Caſe, *Parker* Chief Juſtice, having ſtated the Record at large, delivered the Reſolution of the Court. *Miles* v. *Williams & Ux.*

The two great Queſtions which have been made in this Caſe are theſe:

1. Whether this, being a Bond given by the Wife *dum ſola*, be ſuch a Debt as ſhall be diſcharged by the Bankruptcy of the Huſband, by Virtue of the Statute of 4 *Anne*, Cap. 17. mentioned in the Plea?

2. Whether the Defendants have well concluded their Plea or not; it being to the Judgment of the Court, and not the Country?

As to the firſt we are all of Opinion that it is a Debt within the Act.

The Words of the Clauſe upon which it depends, are, *That the Bankrupt ſhall be diſcharged from all Debts by him due and owing, at the Time he became Bankrupt*; and then in Caſe he be ſued for any ſuch Debt, the Act directs, that he ſhall, and may plead in general, that the Cauſe of Action did accrue before he became a Bankrupt. S. 7.

Upon theſe Words the immediate Queſtion is, whether this was a Debt due, and owing by the Huſband, at the Time he became Bankrupt?

It was ſaid, and, I think, admitted at the Bar, *That a Debt due by the Wife, and one due to the Wife, dum ſola*, muſt fall under the ſame Conſideration.

This is very reaſonable, and therefore I have conſidered how far a Debt due to the Wife would be within this Act, to be aſſigned by the Commiſſioners of Bankruptcy. And in Order to underſtand this, it is neceſſary to go back to the former Acts.

And thoſe of 13 *Eliz.* Cap. 7. and 1 *Jac.* I. Cap. 15. give the Commiſſioners Power over the Bankrupt's Body, Lands, *&c.* and to aſſign all Debts due, or to be

due, to and for the Benefit of the Bankrupt, and the ſame to be recovered in the Name of the Aſſignees.

Now I take the Intention of theſe Laws to have been, that the Bankrupt having been guilty of a Fraud ſhould not be truſted any more with the Management of his Eſtate, *&c.* So that upon this Intention, all thoſe Effects and Debts, which he could take in, or turn into Money, the Aſſignees were deſigned to have in as full a Manner, either by Action or otherwiſe, and that in their own Names.

The beſt Rule of conſtruing Acts of Parliament, is by the common Law, and by the Courſe which that obſerved in like Caſes of its own, before the Act.

Thus it is in the Statute *de Donis*, which enacts, that Tenant in Tail *non habeat poteſtatem alienandi Tenementa*, to prevent their coming to the Iſſue; and that a Fine levied by him, *ipſo jure ſit nullus*. Now,

The Effects of this Statute being a Diſability to alien to the Prejudice of others, therefore the Law ranks the Perſon incapacitated thereby, *with Biſhops, and other Eccleſiaſtical Perſons, and with Huſbands*, who were by the Common Law diſabled to alien to the Prejudice of their Succeſſors and Wives.

And, therefore, though the Words be, that the Tenant in Tail ſhall not have Power to alien, and that his *Fine* ſhall be void, yet it has been conſtrued, *that a Fine by Tenant in Tail is not merely void, but makes a Diſcontinuance*, thereby putting the Iſſue to his *Formedon*; and that other Alienations either put the Iſſue to his Action, or allow of his Entry, juſt as the Law ſtood before in Relation to Biſhops, *&c.*

At Common Law it is a general Rule, *that no body can have an Action but a Creditor*, or, if he be dead, *his Repreſentative:* But there are two Caſes wherein this Rule fails, *viz.* in the Caſe of Forfeiture, and of an Aſſignment to the King. For though a *Choſe in Action* cannot be aſſigned to a common Perſon, yet it may to the King. And in both theſe Caſes, the King, or his Grantee or Aſſignee, may ſue for theſe Duties in their own Name, 21 *Hen.* VII. 19. Though generally the Grantee ſued in the King's Name; but that was only in order to take Advantage of the King's Prerogative.

Now let us ſee, how far the Wife's Debts were liable in theſe Caſes.

In the Caſe of Forfeiture, as by Outlawry, *&c.* the Debts of the Wife were always extended and ſeized.

The Caſe of Aſſignment of Debts to the King, in *Hob.* 2. 253. is an Authority in Point; and notwithſtanding the 7 *Jac.* I. Cap 15. which makes Aſſignment of Debts void, other than ſuch as grew due originally to the King's Debtor *bonâ fide*. For the Purpoſe of that Law was, that no Debtor of the King ſhould procure another Man's Debt to be aſſigned, which was the common Practice. But this ſays the Book, is his own Debt, though not to his own Uſe, which he may himſelf releaſe and diſcharge, and by the ſame Reaſon may aſſign. This proves two Things.

Firſt, That the Huſband might aſſign theſe Debts by the common Law.

Secondly, That he was not reſtrained from doing it, by the Statute, becauſe they were the Huſband's own Debts.

This Reaſon concludes to the Caſe at Bar.

Firſt, As it is the Huſband's own Debt within the Words of the Act.

Secondly, That as the Huſband might aſſign it, *ergo*, ſo might the Commiſſioners.

Beſides, it is to no Manner of Purpoſe, and can ſerve no good End, to ſay, that ſuch Debts are not aſſignable: For if they ſhould be left in the Huſband, as ſoon as he recovers them, the Commiſſioners muſt have the Money. and apply it to the Uſe of the Creditors.

But in Order to confine the Senſe of the Words, *Debts due and owing to him*, it has been objected,

Firſt, That the Statute does not extend to Debts due to a Bankrupt, as Executor.

Reſponſ. This is true; but it is for this particular Reaſon, becauſe they are appropriated to pay the Debts of the Teſtator: And if they were aſſigned, it would be a Wrong, *viz.* a *Devaſtavit*.

Secondly

Secondly, It has been objected, that the Statute does not extend to Debts due to the Bankrupt jointly with another.

Reſp. The Caſe cited for that Purpoſe from 1 *Lev.* 17. is not determined; ſuch Debt might be aſſigned to the King by any one of the Creditors; and ſo it is adjudged, *Mich.* 19 *Hen.* VI. And it would be forfeited by the Outlawry of one.

However, that Caſe is not before us. Thus far is plain, that a Debt due from him and another would be within this Act of 4 *Anne*, for it is ſo declared by the declaratory Act of 10 *Anne*, which provides at the ſame Time, that the Diſcharge of the Bankrupt ſhall not extend to diſcharge the other joint Debtor. Cap. 15 S. 3.

But this of a Huſband and Wife is a different Caſe; for it is his Debt, as he is one with her.

But it is contended, that the Bankruptcy ought not to give the Huſband a better Right to his Wife's Debt, and bar her of her Contingency by Survivorſhip.

Reſp. It does not give him a better Right; for his Releaſe for a Conſideration to himſelf alone would have barred her of the Contingency; and this is a Conſideration in Law, and amounts to the ſame Thing.

Beſides, that is anſwered by the Fiction of Law whereby the Statute of 1 *Jac.* Cap. 15. and this Statute has made it as a Debt, and new Security to the Aſſignees. Suppoſe a Bond was made to *A.* in Truſt for *B.* who becomes a Bankrupt, the Aſſignees may bring the Action in their own Name, though B. muſt have brought it in the Name of his Truſtee.

Objected. The Huſband muſt join with his Wife in this Action, but the Aſſignees cannot do it.

This is anſwered as before, and by the Caſes of Forfeiture and Aſſignment to the King. But to put another Caſe:

Suppoſe a Bill of Exchange be made to the Wife, *dum ſola*, the Huſband may aſſign it, and the Aſſignee ſhall bring the Action in his own Name.

This Reaſoning holds ſtronger, in the Caſe of Debts due from the Wife; for,

Firſt, Certainly it is the Huſband's Debt, and the Action muſt be brought in the *Debet* and *Detinet*. It is admitted to be the Huſband's Debt after Judgement; and it were hard to ſay, that a Judgment of Law charges a Man with a Debt, who was not chargeable with it, when that Judgment was given againſt him.

Secondly, If the Intent of that Act be conſidered, and the Queſtion aſked, *Cui bono*? it will appear ſtill ſtronger. The Perſons concerned in this Matter, are *Firſt*, The Bankrupt; *Secondly*, the Creditors; *Thirdly*, the Wife.

As to the Bankrupt, if an Action be brought againſt him on ſuch Bond, what Execution can the Plaintiff have? If he takes a *Fieri facias*, or *Elegit*, as ſoon as he finds Goods or Lands, the Commiſſioners ought to ſeize them; this would be wholly in effectual; and if he takes a *Capias*, it will only ſerve to lay the Bankrupt up in Priſon, when all his Eſtate wherewith he ſhould make Satisfaction, and deliver himſelf, is taken out of his Power. And that is the Reaſon of his being diſcharged, *viz.* becauſe his Ability to pay is entirely taken from him.

And this diſtinguiſhes it from the Caſe of an Executor, and ſhews that he ought not to be diſcharged as to the Teſtator's Debts, for he retains his Ability to pay them, by keeping the Effects which he has as Executor; and the Commiſſioners cannot meddle with them, becauſe they are appropriated.

It was inſiſted at the Bar, that he ought to be diſcharged from all his Debts, becauſe he is not only obliged to part with all his Eſtate, liable to pay thoſe Debts, but all whatſoever wherewith he might pay his Debts; as for the Purpoſe, *Copyhold Lands, which are liable to no Execution.*

Secondly, As to the Creditor:

It cannot be for his Benefit that this Debt ſhould not be within the Act; for the Bankrupt's whole Eſtate will be otherwiſe diſpoſed of, and his Action againſt the Bankrupt can be worth nothing; but if this Debt be within the Act, then may he come in for his Dividend.

The Conſequence of the contrary Opinion is, *that you take from him every Thing wherewith his Debts may be paid, and at the ſame Time will not let him in for a Share.*

Thirdly,

Thirdly, As to the Wife:

It will be a Diſcharge to her, at leaſt a temporary one; *viz.* during the Huſband's Life. But though it be not neceſſary to give any Opinion upon that, yet I think it will amount to a perfect Releaſe, and the Wife will be diſcharged for ever.

But no Harm can ariſe from this, for the Creditor is ſuppoſed to have had his Dividend, and the Debt is paid in Conſideration of Law.

A Caſe may poſſibly be put, where a Woman being in Debt may make over all her Effects in Truſt, and then marry a Bankrupt, and by that diſcharge all her Debts, and yet preſerve her Eſtate; but that would be a fraudulent Conveyance, as againſt Creditors, *quoad* as much of the Eſtate as would ſatisfy their Debts, and for that they might have Remedy.

It was objected, that this Diſcharge is a perſonal Privilege, and not communicable to the Wife.

Reſp. It is a neceſſary Conſequence that it muſt extend to her, becauſe every Thing in the Huſband's Power is aſſignable, and all her Eſtate is in his Power.

1 Inſt. 46. b. *If the Huſband be poſſeſſed in a Term for Years in the Right of his Wife, it may be ſold on a* Fi. Fa. *and yet it is not actually transferred to the Huſband by Intermarriage.*

For theſe Reaſons, *we are all of Opinion, that this is the Huſband's Debt, within the Meaning of the Statute.*

As to the ſecond Queſtion, *viz.* whether the Plea be good or not? We are likewiſe all of Opinion, that it is ill, *not to conclude to the Country.*

A Liberty of Pleading generally is given to the Bankrupt, and ſo he may avoid the Hazard of pleading ſpecially; but then he muſt take upon him the Proof of his Conformity to the Statute in every Particular: Or if he thinks fit to plead the Matter ſpecially, then he muſt ſet forth every Point; and by it he has every Advantage againſt the Plaintiff, that he muſt reply to one Particular only, upon which Iſſue muſt be taken. Here the Defendant has pleaded the Matter ſpecially, but not ſet forth the Whole, and therefore it is ill for that Reaſon; for by the expreſs Words of the Act, this is to be pleaded, ſo as that the whole Merits may be tried.

There are ſeveral Caſes at common Law, where a Man ſhall conclude his Plea to the Country, though there be no Affirmative and Negative, to prevent the Inconvenience that would ariſe by going on to a Replication, as in 33 *H.* VI. 21. *to a Fine, quod Partes finis nihil habuerunt; & de hoc ponit ſe ſupra Patriam.*

So in Dower, *ne unques ſeiſie de Dower, & de hoc*, &c.

And the Reaſon of this is, for that it would be inconvenient to go on to a Replication, becauſe to reply generally would leave it too large and comprehenſive, and to reply any particular Kind of Eſtate, would be too narrow, and conſequently immaterial.

This Statute has found a new general Iſſue in this Caſe; and this was the Foundation of Judgement in *Bird* and *Lacy*'s Caſe, *Mich.* 6 *Anne*, *C. B. Rot.* 321. that a Plea upon this Act was well concluded to the Country; and if ſo, it cannot conclude to the Court.

It may be obſerved on the Statute of Sewers, 23 *Hen.* III. Cap. 5. that by theſe Words of that Act, a general Replication is expreſſly given, to avoid the Forcing the Plaintiff to a ſingle Point; and ſo the Miſchief which would be in this Caſe is prevented; thus it muſt have been in this Act, if it had not been the Intention of it to make the Plea a general Iſſue.

For this Fault in the Plea, which is ſhewn for Cauſe of Demurrer, and which would put a Difficulty upon the Plaintiff, not intended by the Statute, Judgement muſt be given for the Plaintiff.

Boſwill v. *Brander.* 1 *Peer Will.* 458. Caſe 131. at the *Rolls.*

A *Feme ſole* is a Mortgagee in Fee for 800*l.* and marries a Tradeſman, who becoming a Bankrupt, a Commiſſion of Bankruptcy is taken out againſt him, and the Commiſſioners aſſign over all his Eſtate, real and perſonal; afterwards the Huſband dies, and the Writings relating to this Mortgage being in the Aſſignees' Hands, the Widow of the Bankrupt brings a Bill in Equity againſt the Aſſignees, for theſe Writings, and to have the Benefit of the Mortgage.

This Cauſe came on to be heard, and, for its Difficulty, was ordered to be

ſpoke to again, when his Honour delivered his Opinion ſolemnly for the Plaintiff, the Wife.

But afterwards, being diſſatisfied with that Opinion, he ordered the Decree to be ſtayed, and to be attended again by Counſel.

Whereupon his Honour gave his Opinion, that if there had been any Articles before the Marriage, purporting, that this Mortgage Money ſhould continue in the Wife, as her Proviſion, or ſhould be aſſigned in Truſt for her, there would have been a ſpecifick *Lien* upon the Mortgage, and have preſerved it from the Bankruptcy.

Alſo it might have been a Matter of different Conſideration, if the Aſſignees had been Plaintiffs in Equity, and deſired the Aid thereof, to ſtrip an unfortunate Widow of all that ſhe had in the World; towards the doing of which, Equity would hardly have lent any Aſſiſtance; becauſe the Aſſignees claiming under the Bankrupt Huſband, could be in no better Plight than the Huſband would have been; and if the Huſband had in Equity ſued for the Money, or elſe prayed that the Mortgage might be foreclоſed, Equity, probably, would not have compelled the Mortgageor to have paid the Money to the Huſband, without his making ſome Proviſion for his Wife, by an Application to the Court againſt the Huſband, and the Mortgageor might have prevented the Payment of the Money to the Huſband, unleſs ſome Proviſion were made for her.

But in the preſent Caſe, the Widow was Plaintiff againſt the Aſſignees, ſo that ſhe, and not the Creditors, ſought the Aid of Equity.

And here being in the Mortgage Deed, a Covenant to pay the Mortgage Money to the Wife, this Debt, or *Choſe in Action*, was well aſſigned by the Commiſſioners to the Aſſignees, and veſted in them, like the Caſe of *Miles* and *Williams*, laſt cited, where a Bond made to the Wife, *dum ſola*, was adjudged to be liable to the Huſband's Bankruptcy, and aſſignable by the Commiſſioners.

Wherefore if the Right of the Debt was veſted in the Aſſignees, as plainly it was, though the legal Eſtate of the Inheritance of the Lands in Mortgage continued in the Wife, yet this was not material; it being no more than a Truſt for the Aſſignees, like the common Caſe where there is a Mortgage in Fee, and the Mortgagee dies; here the Mortgage Money belonging to the Executors, though the Heir takes the legal Eſtate by Deſcent, yet he is but a Truſtee for the Executor, for the Truſt of the Mortgage muſt follow the Property of the Debt, elſe the Mortgageor would be in a very hard Caſe, liable to be ſued by the Aſſignees of the Commiſſioners upon the Covenant; and alſo in an Ejectment by the Wife of the Mortgagee; whereas the latter Suit would be enjoined in Equity.

Then it was inſiſted, that here were Articles entered into before the Marriage of the Bankrupt and his Wife, by which the Huſband covenanted to ſettle the Wife, in the Manor of *Dale*, or to leave her 1000*l.* within three Months after his Death.

But in this Agreement it appeared, that the Huſband had his Election all his Life-time, and that if the Wife had brought her Bill in Equity againſt the Huſband, ſhe could not have compelled him to do the one or other; neither could ſhe, upon ſuch Bill, or otherwiſe, have compelled him to give any farther or better Security for the Payment of this 1000*l.* becauſe ſhe had that Security which ſhe at firſt agreed to take, and the Court could not better it againſt her own Agreement.

But upon another Point, *viz.* as to 200*l.* Part of the Wife's Portion, on a Note given by the Huſband at his Marriage, ſignifying his Conſent that the Wife ſhould have this 200*l.* the Court held the ſame was ſpecifically bound thereby; ſo that with Reſpect to this only, the Plaintiff was relieved, and the Bill, as to the Reſt, diſmiſſed.

Of the Rights which are veſted in the Bankrupt's Children by Virtue of Marriage-Settlement, and Truſtees for ſupporting contingent Remainders.

IF a Man before Marriage with his Wife makes a Settlement, or enters into Articles with Truſtees to make ſuch Settlement upon his Wife, and conveys, or agrees to convey, ſuch Eſtate to Truſtees, to the Uſe of himſelf or his Aſſigns,

for the Term of his Life, without Impeachment of Waſte; and, after the Determination of that Eſtate, to the Uſe and Behoof of *A. B.* and *C. D.* and their Heirs during the Life of the Huſband, upon Truſt, to preſerve the contingent Uſes and Eſtate therein after limited, from being barred, deſtroyed, or prevented; and for that Purpoſe to make Entries and bring Actions as Occaſion ſhall require; but, nevertheleſs, to permit and ſuffer the Huſband and his Aſſigns, during his Life, to receive and take the Rents, Iſſues, and Profits of the ſame Premiſes to his and their own Uſes; and from and after the Deceaſe of the Huſband, to the Uſe of the Wife for Life; and afterwards to the Uſe of the firſt and other Sons of their Bodies according to Priority, and their Heirs Male; and for Default of ſuch Iſſue, to the Daughters and their Heirs equally; with proper Proviſions for raiſing Portions for Daughters and younger Children, as is uſual in Marriage Settlements; though the Remainder in Fee is limited to the Bankrupt, for Want of Iſſue Male or Female; yet if ſuch Perſon becomes a Bankrupt, and has a Wife and Children, or Children and no Wife, though this is an entailed Eſtate, yet it is not ſuch an Eſtate as he can lawfully or equitably bar by a Fine or common Recovery, and conſequently he will be only Tenant for Life, and his Wife will enjoy the Jointure, and his Children his Eſtate after his Death; and the Creditors cannot defeat ſuch an Eſtate.

But if he dies without Children, and becomes a Bankrupt, and there are no Remainders over, but the Remainder in Fee is in him, *Query*, whether a Court of Equity would not, after confirming his Wife's Jointure, direct and enable the Truſtees, in Conjunction with him, to bar the Eſtate Tail, for the Benefit of his Creditors: But there have been Inſtances where Truſtees have joined with the Huſband, and defeated the legal Eſtate by a Recovery; but Acts of this Kind have been always looked upon as the higheſt Breaches of Truſt; and if a Purchaſer was to buy the Eſtate, or a Mortgagee to lend any Money upon it, with Notice of the Truſt, he would be unſafe in ſo doing. And as this is a Matter of great Conſequence to Families, I ſhall for that Reaſon cite the following Caſes.

See the ſubſequent Caſe of *Baſſet* v. *Chapman*.

Pye v. *George*, 1 *Peer Will.* Rep. 128. *Salk.* 680. *Mich.* 1710.

It was declared by the Lord Keeper *Harcourt*, that where there were Truſtees appointed by Will to preſerve contingent Remainders, and they, before the Birth of a Son, joined in a Conveyance to deſtroy the Remainders, this was a plain Breach of Truſt, and any Perſon taking under ſuch Conveyance, if voluntarily, or having Notice, ſhould be liable to the ſame Truſts.

And though it was objected, that this had been only *obiter* ſaid in Equity, and that there never was any Precedent of a Decree in ſuch a Caſe:

Lord Keeper ſaid, it was ſo very plain and reaſonable, that if there was no Precedent in this Caſe, he would make one.

But this was the principal Caſe, which was, that there was a Son born before the Conveyance by the Truſtees, and the Eſtate being in Mortgage, the Son came into Equity, after the Death of Tenant for Life, to redeem.

Agreeably to what was thus declared by Lord *Harcourt*, it has been ſince expreſſly decreed by Lord Chancellor *King*, aſſiſted by Lord *Raymond* and Chief Baron *Reynolds*, in the Caſe of *Manſell verſ. Manſell*, *December* 1732, hereafter mentioned; which was the Caſe of a voluntary Settlement, and where the Court unanimouſly delivered it as their Opinion, that Nothing in common Juſtice, Senſe, and Reaſon, could be a plainer Breach of Truſt, than that thoſe who were appointed Truſtees, to the Intent to preſerve the Eſtate to the firſt Son, and for that Purpoſe only, ſhould directly contrary to their Truſt, join in the Deſtruction of the Settlement.

But where there is Tenant for Life, Remainder to the firſt Son, *&c.* and no Truſtees to preſerve contingent Remainders, in ſuch Caſe, if Tenant for Life by Fine or Feoffment deſtroys the Remainders, there being no Truſtee, there can be, conſequently, no Breach of Truſt; and this being the Law, Chancery will not interpoſe.

But then as this was a Hardſhip at Law, to prevent which the Method of appointing Truſtees was invented, ſo it is reaſonable that the Truſtees, when they let in this Hardſhip by violating the Truſt repoſed in them, ſhould themſelves be liable for the ſame; but if the Conveyance be voluntary, or if there be Notice of the Truſt, ſuch Truſt ſhall follow the Land.

One after Marriage makes a voluntary Settlement of his Lands to himſelf for Life, Remainder to Truſtees to ſupport contingent Remainders, Remainder to his firſt, *&c.* Son in Tail ſucceſſively, Remainder to himſelf in Fee; and contracting Debts, he after makes a Conveyance of his Eſtate to other Truſtees, for Payment of theſe Debts. *Trin.* Term. 1717. *Baſſet* v. *Clapham*, 1 *Peer Will.* 358.

The Creditors bring a Bill, and, *int' al*, inſiſt, that the Truſtees for preſerving contingent Remainders ſhould join in the Sale to deſtroy the contingent Remainders: And this came on by Conſent before Sir *Joſeph Jekyl*, who took Time to conſider of it, alledging, that though in the Caſe of Sir *Thomas Tippin*, where Truſtees had joined in cutting off Remainders created by a voluntary Settlement, the Court, on a Bill brought by a remote Relation, had refuſed to puniſh them, as diſtinguiſhing betwixt a voluntary Settlement, and one made on a valuable Conſideration; yet he had not known a Precedent where the Court ever decreed the Truſtees to join in deſtroying the contingent Remainders; this being the Reverſe of the Purpoſe for which they were at firſt inſtituted. *Tippin* v. *Pigot*, *vide poſtea*.

But this Cauſe coming on in *Auguſt* 1717, and a Precedent being ſhewn where ſuch a Decree was pronounced, his Honour decreed, that the Truſtees ſhould join to deſtroy the contingent Remainders, and be indemnified, it being at the Suit of the Creditors, and for raiſing of Money for Payment of Debts.

NOTE, Sir *Thomas Tippin*'s Caſe was, where, upon a Marriage, Settlement was made by a third Perſon to the Uſe of the Huſband for ninety Years, Remainder to Truſtees, during the Life of the Huſband, to ſupport contingent Remainders; Remainder to the Wife for Life, Remainder to the Firſt, *&c.* Son of the Marriage, Remainder to the Heirs of the Body of the Huſband, Remainder to the right Heirs of the Huſband: There was no Iſſue of the Marriage, and the Remainder in Fee being contingent, in Regard the Limitation to the Huſband was for Years only, and the Eſtate not moving from the Huſband (for if it had, the Remainder limited to the right Heirs of the Huſband, would have been the old Reverſion) the Truſtees joined to deſtroy this contingent Remainder.

And on this Caſe being cited, it was ſaid by the Maſter of the *Rolls*, that if a Son had been afterwards born, it would have been a Breach of Truſt; but this Remainder to the right Heirs of the Huſband, being a remote Limitation, and not within the Conſideration of the Settlement, and voluntary, Equity would not puniſh it as a Breach of Truſt.

This Cauſe came on, upon an Appeal to my Lord Chancellor *King*, from the Decree of the *Maſter of the Rolls*. *Trin.* Term, 1732.

Edward Vaughan ſeiſed in Fee in 1683, deviſed Lands to his Siſter *Dorothy*, afterwards the Plaintiff's Mother, for Life, Remainder to Truſtees to preſerve contingent Remainders, Remainder to the Uſe of her firſt, and other Sons in Tail Male, Remainder to the Uſe of his Couſin *Edward Manſell* in Fee, and charges the Eſtate with a Debt of 1200*l.* and dies. *Manſell*, v. *Manſell.*

The Plaintiff's Mother intermarried with Sir *Edward Manſell*, and in 1685, they, with the Remainder-man in Fee, joined in a Feoffment, with a Covenant to levy a Fine to Truſtees to the Uſe of the Plaintiff's Father in Fee; and this is expreſſed to be to the Intent that the Fee ſimple might be veſted in him, for the raiſing of Money for the Payment of the Debts of *Edward Vaughan* the Teſtator, whoſe Inheritance it was, by demiſing, ſelling, or mortgaging the Eſtate, or any Part thereof, and for other good Cauſes and Conſiderations; a Fine is levied accordingly at the grand Seſſions in *Caermarthenſhire*, where the Lands lay. About a Year after, the Truſtees to preſerve contingent Remainders, reciting the Will, Feoffment, and Fine, convey the whole Eſtate by Leaſe and Releaſe to the Plaintiff's Father in Fee, *Dorothy* being then with Child, and then the Plaintiff is born; after, the Father makes the Plaintiff Tenant for Life, *&c.* and then dies.

The Plaintiff brought his Bill to have the Benefit of Mr. *Vaughan*'s Will, and inſiſted on the Breach of Truſt; and that the Parties who claim under the Fine and Feoffment, being Parties to the Breach of Truſt, ought not to take Advantage of it.

The Defendant in his Anſwer inſiſted on the Fine and Feoffment.

The *Maſter of the Rolls* decreed for the Plaintiff for ſo much as was not alienated *bonâ fide*; and this Decree was confirmed in *Mich.* Vacation, 6 *Geo.* II. by

Lord Chancellor *King*, aſſiſted by Lord Chief Juſtice *Raymond*, and Lord Chief Baron Reynolds, as before mentioned.

At the *Rolls*, *Mich.* 1698. *Parker* v. *Dyke.*

A Man had deviſed Lands, which were in Mortgage to be ſold, and the Surplus of the Money to be paid to his Daughter; the Daughter married a Man who ſoon after became a Bankrupt, and the Commiſſioners aſſigned this Intereſt of the Wife's. The Huſband died, and the Aſſignees brought this Bill againſt the Wife and Truſtees, to have the Land ſold, and the Surplus of the Money paid to them. But the Court would not aſſiſt in ſtripping the Wife, who was wholly unprovided for, of this Intereſt, but diſmiſſed the Bill.

Of Poſſibilities.

5 *Geo.* II. S. 1.

BY this Statute it is enacted, that the Bankrupt is to diſcover to the Commiſſioners upon Oath, ſuch Eſtate and Effects as he may have any Profit, or Poſſibility of Profit, Benefit, or Advantage whatſoever by.

1 *Peer Will.* 382.

And a Poſſibility is defined to be ſuch an uncertain Thing as may or may not happen; but it muſt be ſuch a Right, according to the Caſe of *Higden* and *Williamſon*, as a Perſon may lawfully depart withal, and which, by ſome Deed or Writing, he may have a Poſſibility one Time or other to enjoy.

But if a Bankrupt has Relations, who may poſſibly provide or not provide for him, as they ſhall think fit; this uncertain Poſſibility is no Part of the Bankrupt's Eſtate: and if he obtains his Certificate, will not paſs to his Creditors; becauſe he had it not in his Power to part with his Relation's Fortune, nor could he tell what his Will or Intention might be, or whether he would give him any Thing or no.

Hil. Term. 1701. *Taulſon* v. *Grout.* 2 *Vern.* Rep. 432.

William Davidſon having deviſed a Legacy of 600*l.* to his Son, payable at twenty-one, for which he had obtained a Decree, and 637*l.* reported due; before he received the Money he became a Bankrupt, and the Commiſſioners aſſigned the Legacy and Benefit of the Decree.

The Bill was brought by the Aſſignees to have the Benefit of the Decree; to which the Defendants, the Executors, demurred; inſiſting that a Legacy was not within the Compaſs or Proviſion of any of the Acts made againſt Bankrupts, to be aſſigned to the Creditors.

But the Demurrer was over-ruled; and ſaid, that the Act of Parliament ought to be taken in the moſt beneficial Senſe for the Advantage of the Creditors.

Of Intereſts which have been determined not to center in the Bankrupt.

Mich. 1690. *Moyſes* v. *Little.* 2 *Vern.* Rep. 194.

THE Defendant, upon Marriage of his Son, ſettles Lands upon himſelf for Life, Remainder to his Son for Life, *&c.* and covenants, during his own Life, to pay his Son 15*l. per Ann.* The Son becomes a Bankrupt; the Plaintiff, as an Aſſignee, brings the Bill againſt the Defendant, the Father, to have the Benefit of this Agreement, and to compel Payment of the 15*l. per Ann.*

Per Curiam: An Aſſignee, under a Statute of Bankrupt, is not entitled to have the Performance of an Agreement made with the Bankrupt; and that it was ſo adjudged in the Caſe of *Drake* and *the Mayor of Exeter*. And therefore diſmiſſed the Bill.

Coates, poſſeſſed of a Leaſe for Years, contracted with the Committee of the Company for a new Leaſe, and paid Part of the Fine; and, by *Coates*'s Conſent, a new Leaſe was made to *Moſſe* by the Company, and to him executed. *Coates* was at the Time of Treaty a Bankrupt. The Queſtion was, whether the Commiſſioners could aſſign the Leaſe to the Prejudice of *Moſſe*, and *Drake*'s Caſe was cited.

The Lord Keeper ordered that the Plea and Demurrer be ouſted, and the Benefit thereof ſaved till the Hearing; he doubted of the Leaſe: There were other Matters for the Benefit of *Moſſe* alſo in the Plea.

Of the Creditors, who are ſuch; and therein of proving their Debts, and how Notice of their Meeting is to be given; and of Debts due to the Crown.

EVERY one to whom the Bankrupt is indebted, either on Bonds and Notes, or by Book-Debts or ſimple Contracts, by Recognizances, Statute Staple, or Judgments, Specialities with Penalties, Attachments, and Securities where no Execution is ſued out, is a Creditor, and has a Right to a Share in the Bankrupt's Eſtate.

Creditors on Bonds or Notes, by Book-Debts or ſimple Contracts, are equally entitled to a Dividend under a Commiſſion of Bankruptcy, with Creditors by Judgment, Statute, *&c.* and Creditors that have Debts due to them payable at a future Day, may petition, or join in petitioning, for a Commiſſion. 5 *Geo.* II. C. 30, S. 22.

But Creditors upon contingent or uncertain Debts, or upon Bottomree Bonds, could not come in as Creditors, or prove their Debts, till ſuch Contingency happened, before paſſing the ſubſequent Act, *viz.*

And as Merchants and other Traders frequently lend Money on *Bottomree*, or at *Reſpondentia*, and cauſe their Veſſels with their Cargoes to be inſured; and where Commiſſions of Bankruptcy have iſſued againſt the Obligor, or the Aſſurer, *&c.* before the Loſs of the Ship or Goods has happened, it hath been made a Queſtion whether the Obligee, or the Aſſured, ſhould be let in to prove their Debts, or be admitted to have any Benefit under ſuch Commiſſion, which may be a Diſcouragement to Trade: For Remedy whereof, *it is enacted*, that from the 29th of *October*, 1746, the Obligee in any Bottomree or Reſpondentia Bond, and the Aſſured in any Policy of Inſurance made *bonâ fide* upon a valuable Conſideration, ſhall be admitted to claim; and after the Loſs or Contingency, to prove the Debt thereon, in like Manner as if the ſame had happened before the Iſſuing of the Commiſſion of Bankruptcy; and ſhall receive a proportionable Dividend with the other Creditors of the Bankrupt's Eſtate; and after the ſaid 29th of *October*, every Bankrupt ſhall be diſcharged from the Debt on ſuch Bond and Policy of Inſurances as aforeſaid, and ſhall have the Benefit of all the Statutes againſt Bankrupts, in like Manner as if ſuch Loſs or Contingency had happened, and the Money payable thereon had become payable before the Time of the iſſuing of ſuch Commiſſion. 19 *Geo.* II.

Creditors may come in within four Months after iſſuing the Commiſſion, and until a Dividend be made, and ſhall be at Liberty to prove their Debts under the Commiſſion, without paying any Contribution or Sum of Money whatſoever, for or on Account of ſuch Debt. 1 *Jac.* c. 15. S. 4.

Creditors, upon what Securities ſoever they be, come in equal, *unleſs* ſuch as have obtained actual Execution, or taken Pledges for their juſt Debts before the Bankruptcy. *Bacon's* Abr. 258.

A Creditor, though he hath Security, may come in and prove his Debt, becauſe poſſibly his Security may prove deficient; and every Creditor is to ſwear, whether he has a Security, or not; and if he has a Security, and inſiſts upon proving his Debt, he muſt deliver up the Security for the Benefit of the *Creditors at large, under the Commiſſion, unleſs* it be a joint Security for the Bankrupt and another Perſon; for then he may come in for his whole Debt under the Commiſſion, without being compelled to deliver up ſuch joint Security, as he is intitled to get in what he can from the Co-Security. 7 Vin. abr. pl. 8.

Where a Creditor proves a Debt under the Commiſſion, and alſo proceeds at Law for the Recovery thereof, and detains the Bankrupt in Cuſtody on the Action; his only Relief is to petition the Chancellor, that the Creditor or Plaintiff may make his Election, either to abide by the Commiſſion, or to proceed in his Action; whereupon he will be ordered to make ſuch Election within a limited Time, uſually about a Week; and whichever Remedy the Creditor chuſes, he will be at liberty to aſſent to, or diſſent from the Certificate: But if the Election be to proceed by Law, the Creditor muſt wave all Dividends under the Commiſſion. *See Greene's Spirit of the Bankrupt Laws.*

If a Man trade with a Bankrupt between the Act of Bankruptcy and the Commiſſion ſued out, whether by Delivery of Goods, or Payment of Money, without 7 Vin. Abr. 69 pl. 6.

without Notice of the Act of Bankruptcy, the Bankrupt keeping open Trade, ſuch Perſon ſhall come in as a Creditor for ſuch Goods or Money.

Special Caſes of Debts that may be proved under the Commiſſion.

2 *Vez.* Rep. 489. *ANNUITY.* Lord *Hardwicke* referred it to the Commiſſioners to ſettle the Value of an *Annuitant*'s Life, and that ſhe be admitted a Creditor for ſuch Valuation, and the Arrears of the Annuity, and not for the whole Purchaſe Money.

Apprentice. The Commiſſioners may allow a groſs Sum out of the Eſtate for binding him to another Maſter, but the Court alone can order him to be admitted a Creditor; accordingly, Lord Chancellors, *King*, *Talbot*, and *Hardwicke*, ordered an *Apprentice*, whoſe Maſter became a Bankrupt, to be admitted as a Creditor under the Commiſſion, on Account of the Apprentice-Fee received by the Maſter, only for the remaining Sum thereof, after deducting for the Time he lived with the Bankrupt.

Bail. If *A.* is Bail for *B.* either to bring his Body, or to pay the Condemnation Money, and *B.* becomes Bankrupt, he may come in as a Creditor.

If the Bail be liable, that is, if he has juſtified himſelf as ſuch, before his Principal becomes Bankrupt, though he be not *fixed* till *after*, yet it ſeems he is well entitled to make his Claim forthwith, and to *prove*, as ſoon as he has paid the Condemnation Money.

Children. A Child living with and maintained by a Parent, who receives the Earnings of the former, may be admitted a Creditor under her Father's Commiſſion, but with Caution:

Ex parte *Macklin* 2 *Vez.* 675. Thus, upon a Petition on the Part of Miſs *Macklin* to be let in as a Creditor on the Eſtate of her Father a Bankrupt, for the Money he had received from the Managers of the Threatres on her Account, offering an Allowance thereout for living with, and being maintained by him, during the Time of her acting upon the Stage: It was alledged on her Part, that the Court is ſo far from giving the Father all the Earnings of the Child, as not to ſuffer a Father to be eaſed of the Maintenance of a Child, who has a Fortune, but will let the whole Intereſt accumulate, and the Father maintain the Child, unleſs unable to do ſo.

The Lord Chancellor ſaid, he was under ſome Difficulty for the Sake of the Precedent; for if it is true, that this Queſtion is the ſame as it would have been between the Daughter and the Father, if he had not been a Bankrupt, and could anſwer to an Action for himſelf; whether after all this Tranſaction the Daughter could in an Action have recovered againſt the Father all this Money, as Money had and received to her Uſe? He ſaid, it might be dangerous in *London* to lay it down as a general Rule, that if a Father having ſeveral Children, who earn Money which he receives, becomes Bankrupt, every Child can come and claim his Debt for that Money ſo had and received while they lived together, and were Part of his Family. A Father frequently ſends out his Son to work as a Journeyman, and his Earnings are taken to be his Father's. Here, ſaid his Lordſhip, the Father, Mother, and Daughter were all Actors and lived together; the Father received the whole. It is extraordinary to ſay, that after a Length of Time, this ſhall be all called back, becauſe of an Act of Bankruptcy. He reſerved it therefore to the Commiſſioners to inquire, how much the Father received to the Child's Uſe, unleſs as to ſo much as was a Covenant with the Daughter herſelf.

Relations. Debts of near Relations to the Bankrupt, eſpecially Securities, as Bonds, Bills, *&c.* are generally looked upon with a jealous Eye by the other Creditors, therefore great Care ſhould be taken by the Commiſſioners to be ſatisfied of the Validity of the Demand. And ſuch Creditors ſhould take every Precaution to eſtabliſh the Validity by proper Vouchers, if called upon. *Green's Spirit of Bankrupt Laws.*

Servants. The Commiſſioners generally recommend to the Aſſignees to pay the Whole of the Wages of menial Servants; but where the Wages of Clerks, and other ſuperior Servants are very large, and the Arrears long, they ſhould prove their Debts, and come in as common Creditors. *Ibid.*

One

One ſeized of Lands in Fee, owes a Debt by Statute, and afterwards becomes a Bankrupt, and the Creditor by Statute extends the Lands; then a Commiſſion of Bankruptcy is ſued out; and whether the Lands ſhould be liable to the Statute Creditor, was the Queſtion.

Sir *George Rowland*, & al. againſt — 1 *Peer Will.* 92. *Eaſter* Term, 1706.

This was referred by Lord Chancellor to the Judges of the *Common Pleas*, who held that a Creditor by the Statute, and a Statute not ſued, and executed before the Bankruptcy ſhould come in only *pro rata*, though there were Lands in Fee bound by the Statute.

In *February* 1716, the Defendant *Fletcher*, being ſeized in Fee of ſome Lands in *Bedfordſhire*, borrowed 1500*l.* of the Plaintiff *Orlebar*, one of the Maſters in *Chancery*. On a Judgement afterwards, *viz. Auguſt* 20, 1717, the Defendant *Fletcher* articled with the other Defendant, the Duke of *Kent*, to ſell the Premiſes to the Duke in conſideration of 5000*l.* to be paid down, and 650*l.* to be paid at *Chriſtmas* then next; the Duke to be let into Poſſeſſion at *Michaelmas*; ſubſequent to which Tranſactions, the Defendant *Fletcher* becoming a Bankrupt, the Plaintiff Mr. *Orlebar*, brought his Bill againſt the Duke of *Kent*, *Fletcher* the Bankrupt, and the Aſſignees under the Commiſſion, praying that the 650*l.* remaining in the Duke's Hands might be paid to the Plaintiff towards Satisfaction of his Judgement.

Mich. 1721. *Orlebar* v. *Fletcher* and the Duke of *Kent*. 1 *Peer Will.* 737. Caſe 212.

In the principal Caſe the Court ſaid that the Duke could not be deemed a Purchaſer until he had paid the 650*l.* which remaining in the Duke's Hands, was Part of the perſonal Eſtate of the Bankrupt, and muſt be liable to his Creditors.

Wherefore, *per Curiam*, let the Aſſignees convey the Premiſes in Fee to the Duke of *Kent*, in the ſame Manner as the Bankrupt had articled to do, they ſtanding in his Place; and in Conſideration of this, let his Grace pay the 650*l.* to the Aſſignees, for the Benefit of the Creditors; and as to the Plaintiff Mr. *Orlebar*, the Judgement Creditor, he muſt come in for a Proportion only with the Reſt of them.

A. draws a Bill payable to *B.* on *C.* in *Holland* for 100*l.* *C.* accepts it; afterwards *A.* and *C.* become Bankrupts, and *B.* receives 40*l.* of the Bill out of *C.*'s Effects, after which he would come in as a Creditor for the whole 100*l.* out of *A*'s Effects. *B.* permitted to come in as a Creditor for 60*l.* and the Maſter directed to ſee whether the other 40*l.* was paid out of *A*'s Effects in *C*'s Hands, or out of *C*'s own Effects; if the latter, then *C.* is a Creditor for this 40*l.* alſo, but if out of *A.*'s Effects, then the 40*l.* of the 100*l.* is paid off.

Ex parte Roſwicke. 2 *Peer Will.* 89. *Hil. T.* 1728, Lord *Macclesfield.*

A. gives a Promiſſory Note for 200*l.* payable to *B.* or Order; *B.* endorſes it to *C.* who indorſes it to *D.* *A. B.* and *C.* become Bankrupts, and *D.* receives five Shillings in the Pound, on a Dividend made by the Aſſignees againſt *A*; *D* ſhall come in as Creditor for 150*l.* only out of *B*'s Effects, and if *D.* paid Contribution-Money for more than 150*l.* it ſhall be returned.

Ex parte Lefebure. 2 *Peer Will.* 407. Eaſter Term, 1727. L. C. *King*

Francis Venaker, Eſq. Son and Heir, and alſo Executor of *Nicholas Venaker*, his Father, Plaintiff, ſued the Commiſſioners and Aſſignees of a Statute of Bankruptcy againſt one *Shelbury*, to be let in to pay his Contribution Money, and to have a proportionable Benefit of the Bankrupt's Eſtate with the Reſt of the Creditors.

Francis Venaker, Eſq. v. *Edw. Naſh.* Eſq. & al. *Finch's* Rep. in *Chan.* S. 60. Hil. 1672. 25 *Car.* II.

The Caſe was, that *Shelbury*, who was a Scrivener, and Agent for the Plaintiff's Father, had got ſeveral thouſand Pounds of the Father's Money in his Hands, for which he had only *Shelbury*'s ſingle Bonds, on ſome of which he got Judgement and Execution on *Shelbury's* Goods, which were appraiſed, and Part thereof came to the Father's Poſſeſſion in his Life-time, or to his Bailiff after his Death, and were ſold by them. That a Commiſſion of Bankruptcy was ſued out againſt the ſaid *Shelbury* by the Defendants, who pretended that *Shelbury* had committed an Act of Bankruptcy before the Father had obtained any Judgement againſt him.

That *Leeſon* and *Naſh* had brought ſeveral Actions againſt the now Plaintiff and his Truſtees, in three of which Actions they were non-ſuited; that in another Action he had obtained a Verdict for 920*l.* ſince which the Plaintiff, before any Aſſignment of the Bankrupt's Eſtate, hath offered to pay his Contribution Money, being a Creditor for above 6000*l.* The Commiſſioners inſiſt that they found *Shelbury* a Bankrupt before the Father's Judgement, and the Aſſignees ſay that they have recovered againſt the Plaintiff 53*l.* Damages, in an Action of *Trover*, for *Shelbury*'s

Goods

Goods in his Hands, &c. But now the Counſel for the Plaintiff offering that he ſhould ſtand in his Father's Stead, and be accountable for all that the Father had received of the Bankrupt's Eſtate, and that he ſhould pay a reaſonable Proportion of Contribution-Money, ſo that he may be let into the Statute, which Offers *the Court decreed* ſhould be accepted, and he admitted a Creditor accordingly.

Ebſworth & al. v. *John Kent* & al. *Finch's* Rep. 316. *Mich.* 1677. 29 *Car.* II.

The Plaintiffs lived in *Glouceſterſhire*, where alſo one *Blithe* lived, who owed them Money, and having committed ſome Acts of Bankruptcy, he afterwards came to an Account with the Plaintiffs, and ſold them ſeveral Parcels of Goods in Satisfaction of their Debts.

The Defendants lived in *London*, to whom alſo the ſaid *Blithe* was indebted; and they having employed a Perſon to diſcover his Eſtate in the Country, and how it had been diſpoſed of, and to procure the ſame to be diſtributed equally amongſt all his Creditors; it was at laſt agreed amongſt them, that the Plaintiff ſhould wave the Diſpoſal of the Goods to them already made by the ſaid *Blithe*, and that they ſhould have an equal Diſtribution with the Defendants, in Proportion to their reſpective Debts; and for that Purpoſe, that a Commiſſion of Bankruptcy ſhould be taken out at *London*, and executed there, and all the ſaid Debts put in *Hotchpot*.

Accordingly a Commiſſion was executed at *London*, but without giving Notice thereof to the Plaintiffs, or any Commiſſioners ſent into the Country, to join with the others therein, in Order to a perfect Diſcovery of the ſaid *Blithe*'s Eſtate, as agreed on.

And afterwards the Defendants prevailed with the Commiſſioners in *London*, within a Month after the Execution of the Commiſſion, to make an Aſſignment and Dividend of the ſaid Bankrupt's Eſtate, contrary to the ſaid Agreement: intending thereby to exclude the Plaintiffs; and now refuſe to let them come in for their Shares, though they have offered to pay their Contribution-Money, and Proportion of the Shares of Commiſſion; but have brought Actions of *Trover* for the Goods ſo ſold and delivered by the ſaid *Blithe*.

To be relieved againſt which Actions, the Plaintiffs have brought this Bill; and that the ſaid Agreement might be performed, and the Dividend made amongſt the Defendants be ſet aſide, and that the Plaintiffs may be let in to have an equal Diſtribution with them.

All which Matters appearing to the Court, though the Defendants denied the ſaid Agreements, yet ſuch Relief was decreed, as the Plaintiffs had prayed.

Mich. 7. *Geo.* II. *Braſſey* v. *Dawſon*, K. B before Lord *Raymond*.

An Action was brought by the Plaintiff, an Aſſignee under the Commiſſion of Bankruptcy, againſt the Commiſſioners of Land-Tax. In this Caſe, one *Farlow* was a Collector of the Land-Tax, and had collected a great deal of Money for the publick Uſe, and on *July* 7, 1731, abſconded and became a Bankrupt; and on the 16th of the ſame Month and Year, the Commiſſioners brought their Warrant, and ſeiſed his Goods, &c. after a Commiſſion was taken out, and the Aſſignees appointed. This Caſe was tried before Lord *Raymond*, and Verdict given for the Plaintiff, ſubject to the Opinion of this Court.

Serjeant *D.* The only Queſtion in this Caſe is, whether the Act of Bankruptcy ſo took away the Property of the Goods before Aſſignment, as to make them ceaſe to be his?

C. J. If an Extent be iſſued out, nay, only one *teſted*, before the Goods, &c. are aſſigned, that Extent will be good.

D. That is a Prerogative Caſe, but this is in the Caſe of a private Perſon. In *C. B.* in *London*, 3 *Geo.* II. *Andrews* and Sir *Matthew Decker*'s Caſe was tried at *Niſi Prius*, before Chief Juſtice *Eyre*, and the Action was brought againſt Sir *Matthew* for a falſe Return to a *Fieri Facias*, *viz. nulla bona*. It appeared on Evidence, that Goods of the Defendant were in the Houſe at the time of the *Return*, but that the Party whoſe Goods were to be taken, became a Bankrupt before the Writ was delivered to the Defendant, and that a Commiſſion was iſſued againſt him, but his Goods were not aſſigned over by the Commiſſioners. Here the Commiſſion was held to be ſufficient Proof of his being a Bankrupt.

Serjeant *E.* This Caſe concerns the Crown, and therefore the Property is not altered till Aſſignment, and an Extent in Aid executed before the Aſſignment is good; ſo in 3 *Keb.* 14. The Crown is not bound by Statutes relating to Bankrupts; ſo Sir *William Jones* 203. An Extent and a Warrant from the Commiſſioners of the Land Tax, alters only the Manner of collecting the Money of the Crown. By the Statute of 3 *Geo.* II. fol. 25. if any Collector refuſes to pay the Money which he has collected, any Commiſſioner may commit him, and ſeize his Eſtate; and this is a new Law, and ſhall control all the former Reſolutions. 3 *Lev.* 69. 191, *S. C.*

D. This Caſe does not concern the Crown; for by the Statute 3 *Geo.* II. fol. 18. it appears that the Seizure of the Collector's Eſtate is for the Benefit of the Pariſh, which is anſwerable for the Money at all Events; therefore the Pariſh is to return to the Commiſſioners ſubſtantial Men to be Collectors and Aſſeſſors, and the Money collected comes not to the Crown till it is paid into the Hands of the Receiver.

C. J. In this Caſe are two Queſtions; the firſt is, whether, if this be the Caſe of a private Perſon, what Effect an Act of Bankruptcy has on the Goods, in that Caſe, before an Aſſignment? In the Caſe of a private Perſon, there is no actual veſting the Bankrupt's Eſtate before Aſſignment, becauſe the Commiſſioners have only a Power of Diſpoſal; but after Aſſignment they veſt to many Purpoſes by Relation from the Time of the Bankruptcy, as to avoid the Acts done by the Bankrupt himſelf; and therefore I think, if a Judgment be given againſt one before a Bankruptcy, and the Execution be completely executed by Sale of the Goods and Payment of the Money over before the Aſſignment, that the Execution will be good. But here, in a Caſe of a private Perſon, the Execution would not be completed, for the Goods were not diſpoſed of by the Officer before the Aſſignment; and then I think this Commiſſion will over-reach it. So the Queſtion is, whether this is a Prerogative Caſe? And it ſeems to me that it is; for though the Money when levied is to be applied to the public Uſe, yet it is always conſidered as Money of the Crown; therefore it is always recovered by the Prerogative Power; and I think it hard to imagine that the ſummary Remedy given to the Commiſſioners by the Statute of 3 *Geo.* II. ſhould put the Crown in a worſe Caſe than it was before; and if an Extent in this Caſe had been ſued out, the Goods would have been bound even from the *Teſt* of it; and there could be no Relation.

The Queſtion here is, whether this Warrant can have the ſame Effect as an Extent would have had? As to the Pariſh being liable, that makes it not leſs the Money of the Crown than before, for that is only giving the Crown a double Security for the Money. And in the Caſe of *Box* and *Norton*, it was held that an Extent and Execution, after Aſſignment, would be good. The other Judges ſaid little to it. See *Salkeld* 111. contrary to *Andrews*'s Caſe cited by *Darnall*, and *per Curiam*. It was ordered to ſtand over.

A. ſells Land to *B.* who afterwards becomes a Bankrupt, Part of the Purchaſe Money not being paid. *A.* ſhall not be bound to come in as a Creditor under the Statute, but the Land ſhall ſtand charged with the Money unpaid, though no Agreement for that Purpoſe. 1 *Vern.* 267. *Mich.* 1684. *Chapman* v. *Tanner.*

If there be an Act of Bankruptcy committed, and a Creditor obtains a Judgment ſubſequent to it, the Judgment is hereby avoided. *Eaſter* Term. 13 *W.* III.

A. and *B.* were Sureties for *C.* for the Payment of ſome Money, and had Counter-Bonds to ſave them harmleſs; the Money was not paid at the Day, and the Sureties paid it, and afterwards *C.* became Bankrupt; the Queſtion was, whether they were Creditors within the Statute, and it was reſolved that they were; and ſo it has been determined in ſeveral ſubſequent Caſes. *Holt* at *N. P.* 2 *Cro.* Rep. 127. *Oſborn & al.* v. *Churchman.*

No Commiſſion of Bankruptcy can remove or carry away any Goods belonging to a Bankrupt, till all the Rent due to a Landlord is paid, although there be ſeveral Years in Arrears, provided the Landlord ſeizes for Rent before the Goods are removed; but if the Landlord does not ſeize before the Commiſſion takes the Goods off the Premiſes, he muſt then come in as a Creditor with the Reſt of the Bankrupt's Creditors.

Alſo if there are not ſufficient Goods upon the Premiſes to pay the Landlord's Rent, he can only take what Goods there are, and after they are appraiſed and ſold,

as the Law in Caſes of Diſtreſs for Rent directs, then the Landlord may come in as a Creditor for the Rent remaining due, with the Reſt of the Creditors.

All Debts due to the Crown are preferable, and to be paid before any others, except where an Eſtate or Intereſt is incumbered, conveyed, or conſigned, prior to ſuch Debts due to the Crown; and in the Caſe of a Landlord, where a Year's Rent is to be retained before an Extent can take Place.

And in the Caſe of a Commiſſion of Bankruptcy, if an Extent is taken out the ſame Day and executed with the Commiſſion, the Extent ſhall take Place, and carry away the Effects before the Commiſſion; and according to the Caſe of *Braſſey* and *Dawſon*, hereafter mentioned, an Extent ſhall take Place before the *Teſte* of the Writ, though not executed till ſome Days after a Commiſſion of Bankruptcy; and notwithſtanding an immediate Aſſignment has been made of the Eſtate and Effects.

But if an Aſſignment is made before the Execution, or the *Teſte* of the Extent, ſuch Aſſignment takes Place before the Crown, and the Crown can then only come in as a Creditor, *pari paſſu*, with the Reſt of the Bankrupt's Creditors; which the following Caſes will make appear.

Monk v. *Clayton*. 3 *Keb*. 14. *Eaſter*. 24. *Car*. II. *Mod*. Rep. 93. pl. 1.

Mr. Sollicitor prayed the King's Proceſs might take Place againſt the Aſſignee of Commiſſioners, the Defendant being a Bankrupt; which by the Court cannot be, unleſs Seizure be made and returned by Inqueſt before the Aſſignment; alſo this being not an immediate Debt, but in Aid of Receivers, who were jointly bound with *Monk*, the Court refuſed to deliver Money, till an Inqueſt be returned of this particular Debt, though *Clayton* himſelf was Sheriff, and would return none; and an *Adjournatur* till Notice to the King's Attorney.

Monk v. *Clayton*. *Mich*. 24. *Car*. II.

Mr. Attorney *Finch* prayed, that Money of the Plaintiff's, being a Bankrupt and an immediate Debtor to the King by Returns of Money from the Commiſſioners of the Exciſe, which in Truth was from one *Thiſtlewait*, a Collector, might not be delivered out of the Court to the Aſſignees of the Commiſſioners. On *Norwich*'s Caſe, 4 *Car*. I. in the *Exchequer*, that the King in ſuch Caſe ſhall be firſt ſatisfied; contrary, where his Debt is but in Aid of another. But it was not allowed, but the Money ruled to be delivered to the Aſſignees, and that the King may, by *Scire Facias* againſt them, recover it.

Special Caſes of Debts that cannot be proved under the Commiſſion.

3 *Wilſ*. Rep. C. B. 270. 7 *Geo*. I. C. 31.

DEBTS payable upon a Contingency, which may poſſibly never happen, cannot be proved.

One having only a Cauſe of Action, cannot come in and prove it as a Debt.

3 *Wilſ*. Rep. C. B. 272.

Creditor, during Bankruptcy, having a Verdict with Damages and Coſts, in Aſſault and Battery, *before* Bankruptcy, but not Judgment till *after* Certificate, cannot, in the Opinion of the Court of *C. B.* come *in* under the Commiſſion; ſuch Demand not being a proveable Debt, becauſe not due at Time of Bankruptcy.

Ibid. 13. 530.

Reſolved, that the Acceptor of a Bill of Exchange, drawn on him by Bankrupts, who promiſed to indemnify him, before their Bankruptcy, could not, on his being ſued and charged in Execution, come in as a Creditor under the Commiſſion; becauſe no Debt was due or owing from the Bankrupts to the Acceptor, until he was charged in Execution; and his Body being in Priſon upon Judgment and Execution for a certain Sum, was held by the Court of Common Pleas to be the ſame Thing as if the Acceptor had paid the Debt and Coſts due on the Bill; and *then*, and not before, the Bankrupts became indebted to the Acceptor, which was after the Bankruptcy.

Ibid. 270.

If *A*. has a Bond of Indemnity from *B*. and the Condition be broken, and afterwards *B*. becomes Bankrupt before *A*. has been ſued or damnified, though *A*. had a good Cauſe of Action againſt *B*. before the Act of Bankruptcy; yet as *A*. had not been damnified by paying any certain Sum of Money, by Reaſon of *B*.'s Breach of the Condition, *A*. cannot poſſibly ſwear to any Debt due and owing from *B*. at the Time of the Act of Bankruptcy.

Leſſor cannot prove a Penalty incurred by his Leſſee for ploughing up Meadow Ground, as a Debt under a Commiſſion of Bankruptcy.

Obligee

Obligee cannot prove Penalty in an Obligation forfeited for Breach of Covenant by Obligor, before he became Bankrupt, as a Debt under the Commiſſion.

Aſſignor cannot prove Damages ariſing from a Breach of a collateral, independent, expreſs Covenant by the Aſſignee of a Leaſe to indemnify the Aſſignor, as a Debt under the Commiſſion.

One guilty of Uſury cannot come in to prove his Debt as a *bonâ fide* Creditor under the Commiſſion, for the whole Debt is void. 2 *Vez.* 489. *Tr. Atk.* Rep. 125.

The Commiſſioners ſhall forthwith, after they have declared the Perſon a Bankrupt, cauſe Notice thereof to be given in the *Gazette*, and ſhall appoint Time and Place for the Creditors to meet, which Meeting for the City of *London*, and all Places within the Bills of Mortality, ſhall be at *Guildhall*, in Order to chuſe Aſſignees; at which Meeting the Commiſſioners ſhall admit the Proof of any Creditor's Debt that ſhall live remote from the Place of ſuch Meeting, by Affidavit or ſolemn Affirmation, and permit any Perſon duly authorized by Letter of Attorney (Oath or Affirmation being made of the Execution thereof, either by an Affidavit ſworn, or Affirmation made before a Maſter in *Chancery*, ordinary or extraordinary, or before the Commiſſioners *vivâ voce*; and in Caſe of the Creditor's reſiding in Foreign Parts, ſuch Affidavits or Affirmations to be made before a Magiſtrate where the Party ſhall be reſiding, and ſhall, together with ſuch Creditor's Letters of Attorney, be atteſted by a Notary Publick) to vote in the Choice of Aſſignees, in the Place of ſuch Creditor. 5 *Geo.* II. C. 30. S. 26.

An Oath of a Creditor for proving his Debt before the Commiſſioners.

'YOU ſhall ſwear that *C. D.* late of, *&c.* at the Time of his becoming a Bankrupt, was juſtly and *bona fide* indebted to you in the Sum of, *&c.* and that you have not ſince that Time been any Ways paid or ſatisfied for the ſame, or any Part thereof.'

Note, every Man is to ſubſcribe his Debt, and the Commiſſioners are to enquire whether the Debts were contracted during the Trade.

Where Copartners are Bankrupts, having joint and ſeparate Eſtates and Creditors.

OF two Partners, Brewers, the one becomes Bankrupt, and the whole Debt was aſſigned over; but it was reſolved that the Aſſignee ſhould only recover a Moiety, becauſe only one Moiety paſt by Aſſignment. *Ruſhworth* v. *Hodſon.* 2 *Show.* Rep. 103. *Eaſter* Term. 32 *Car.* II. *Nelſon. Lutw.* 85. 219 135. *Gibſon.* Peer *North* C. J 1 *Mod.* Rep. 215.

If there are Accounts between two Merchants, and one of them becomes Bankrupt, the Courſe is not to make the other, who perhaps, upon ſtating the Accounts, is found indebted to the Bankrupt, to pay the whole that was originally intruſted to him, and to put him, for the Recovery of what the Bankrupt owes him, into the ſame Condition with the Reſt of the Creditors, but to make him pay that only which appears due to the Bankrupt on the Foot of the Account, *otherwiſe it will be for Accounts betwixt them, after the Time of the other's becoming Bankrupt*, if any ſuch were. *Trin.* Term, 28 *Car.* II. in *B. R.*

If there be ſeveral joint Partners, and a Perſon has Dealings generally with one of them in Matters concerning their joint Trade, whereby a Debt becomes due to the ſaid Perſon, *it ſhall charge them jointly, and the Survivors of them:* But if in Caſe the Perſon had rather deal with one of them upon his own ſeparate Account, he muſt make his Agreement ſpecially; in which Caſe the Debt ſhall be only his and his Executors, and ſhall not ſurvive. At *Niſi Prius*, C. *J. Holt.* 13. *Will.* III. C. in *B. R.* 446.

If one or more of the joint Traders become Bankrupt, his or their Proportions only are aſſignable by the Commiſſioners, to be held in common with the Reſt who were not Bankrupts.

If there be an Act of Bankruptcy committed, and a Creditor obtains Judgment, ſubſequent to it, then a Commiſſion is taken out; now the Judgment is thereby avoided.

If there be ſeveral joint Traders, Payment to one of them is Payment to all. So if they all, except him to whom the Payment was made, were Bankrupts, the Payment is only unavoidable as to his Proportion. And if there be four Partners, whereof three are Bankrupts, and their Shares aſſigned, and a Payment is made to him

him that was no Bankrupt, it is a Payment to all the Aſſignees, for now they are all Partners.

Whitacre v. *Pawlin.* 2 *Vern. Eaſter* Term, 1691.

A. and *B.* became Partners in ſome Iron-Mills, and ſome Time after *A.* alledged that *B.* had not brought in his Proportion of the Stock, and had waſted the joint Stock, for which he brought a Bill againſt him to be relieved, and the Matter by Conſent was referred, and the Referree awarded that B. ſhould, in Conſideration of the above Allegations being proved, deliver to *A.* what remained of the Joint-Stock, and the Leaſe of the Iron-Mills to be by him enjoyed to his own Uſe, and general Releaſes to be given; which award, after Exceptions taken to it, was afterwards confirmed and decreed by the Court. *B.* was afterwards found a Bankrupt, and the Plaintiff, being a Creditor to him by Bond, had an Aſſignment made to him by the Commiſſioners, and brought a Bill to have an Account of *B.*'s Eſtate that came to the Hands of *A.* and alledged, if any ſuch Award was made, it was after ſuch Time as *B.* became a Bankrupt; but there appearing no Fraud in the obtaining of the Award, and the ſame being in an Adverſary Cauſe, and the Award afterwards excepted to, *&c.* although *B.* might be then a Bankrupt, yet not being known ſo to be at the Time of the Award, the Court decreed ſuch Award ought to ſtand. *Quere*, if the Decree upon a Rehearing was not reverſed?

Richardſon v. *Goodwin*, &c. 2 *Vern.* 292. *Trin.* Term, 1693. See the Caſe of *Goſs* and *Dufreſnay* poſt.

A. B. and *C.* were Partners in Trade, and *C.* embezzles the Joint-Stock, contracts private Debts, and becomes a Bankrupt: The Commiſſioners aſſign the Goods in Partnerſhip, and *A.* the Plaintiff, brought a Bill for an Account, and to have the Goods ſold to the beſt Advantage, and inſiſted that out of the Produce of them, the Debts owing by the Joint-Trade ought firſt to be paid; and that out of *C.*'s Share, Satisfaction muſt be made for what he had waſted; and that the Aſſignees could be in no better a Caſe than the Bankrupt, and were entitled only to what this third Part would amount unto, clear, after Debts paid, and Deductions for his Embezzlement. And the Court ſeemed to be of that Opinion; but ſent it to a Maſter to take the Account, and ſtate the Caſe.

A. and *B.* being joint Traders, a Commiſſion of Bankruptcy iſſued againſt them; their ſeparate Creditors applied by Petition, that they might be let in for their Debts upon the reſpective ſeparate Eſtates of the Bankrupts under that joint Commiſſion, as the ſeparate Eſtates were of ſmall Value, and would not bear the Charge of taking out two new Commiſſions againſt them reſpectively.

Ex parte Crowder. 2 *Vern.* 706. *Mich.* Term, 1715.

The Lord Chancellor ordered them to be let in to prove their ſeparate Debts, upon the joint Commiſſion, they paying Contribution to the Charge of it; and directed, that as the joint or Partnerſhip Eſtate was firſt to be applied to pay the Partnerſhip Debts; and as ſeparate Creditors are not to be let in upon the joint Eſtate, until all the joint Debts are firſt paid; ſo likewiſe the Creditors to the Partnerſhip ſhall not come in for any Deficiency of the joint Eſtate, upon the ſeparate Eſtate, until the ſeparate Debts are firſt paid.

Ex parte Cook. 2 *Peer Will.* 500. *Mich.* Term, 1728. L. C. *King.*

Two joint Traders becoming Bankrupts, there is firſt a joint Commiſſion taken out, and the Commiſſioners aſſign the real or perſonal Eſtate of them both, or either of them; and afterwards ſeparate Commiſſions are taken out againſt them, and an Aſſignment is made by the Commiſſioners of theſe Commiſſions to other Aſſignees, and theſe apply by Petition to the Court, that they might be at Liberty to ſue at Law for the ſeparate Eſtates; but the Lord Chancellor decreed, that the Aſſignment made by the Commiſſioners upon the joint Commiſſion, paſſes as well the ſeparate as the joint Eſtate of the two Bankrupt Partners; therefore the Aſſignees on the ſeparate Commiſſions can make nothing of their Action at Law, and he would not ſuffer them to ſpend the Eſtate in vexatious Suits there; but if they would join in a Bill in Equity for an Account of the ſeparate Eſtates, he would not hinder them.

2 *Vern.* 7. 6. *Ex parte Crowder*, as mentioned before.

It is ſettled, and is a Reſolution of Convenience, that the joint Creditors ſhall be firſt paid out of the Partnerſhip or joint Eſtate, and the ſeparate Creditors out of the ſeparate Eſtate of each Partner; and if any Surplus of the joint Eſtate, beſides what will pay the joint Creditors, it ſhall be applied to pay the ſeparate Creditors; and if a Surplus of the ſeparate Eſtate, beyond what will ſatisfy the ſeparate Creditors, it ſhall go to ſupply any Deficiency that may remain as to the joint Creditors; but, for the Eaſe of both Parties, let it be referred to a Commiſſioner

in each Commiſſion, to take an Account of the whole Partnerſhip Effects, and the ſeparate Eſtate and Effects of each of the Partners; and if the Commiſſioners find any Thing difficult, they are to ſtate it ſpecially; and with Regard to the Surplus of the Partnerſhip Effects, beyond what will pay the Partnerſhip Debts, and the Surplus of the ſeparate Effects, if any, above what will pay the ſeparate Debts, each Side to apply to the Court for ſuch Surpluſſes.

If there are two joint Traders, and one of them becomes a Bankrupt, the Commiſſioners cannot meddle with the Intereſt of the other, for it is not affected by the Bankruptcy of his Companion. *Holt.* Rep. 2. *Sal.* 59. 61. *Eaſter*, 7 *W* III.

The Defendant *A.* being indebted to the Plaintiffs, became bound to them in ſeveral Bonds; and the ſaid *A.* and the Defendant *B.* were for ſeveral Years Copartners, by whoſe Articles of Copartnerſhip, *A.* was entitled to two Thirds of the whole Stock, and *B.* to one Third: The ſaid *A.* and *B.* became Bankrupts, and a Commiſſion was awarded againſt them; the Commiſſioners of the ſaid Bankrupts aſſigned all their Eſtate to the Defendant *C.* and others, refuſing to let the Plaintiffs, Creditors of the Bankrupts, come in, and intend to divide the Eſtate among the joint Creditors of both the Bankrupts, by Reaſon whereof the Plaintiff's Debts will be utterly loſt. per *Holt.* C. J. *Widdows* and *Berman.* *Craven & al.* and *Knight.* *Chan.* Rep. *Eaſter* Term, 25 *Car.* II.

The Defendant inſiſts, that it was agreed by Indentures of Copartnerſhip, that all ſuch Debts as ſhould be owing on the joint Account, ſhould be paid out of the joint Stock, and at the End of the Partnerſhip, each Copartner take and receive to his own Uſe his Share of the joint Stock; and that the joint Stock or Trade ſhould not be charged with the private or particular Debts of either of the Partners, but that each ſhould pay their private Debts out of their particular Eſtates not included in the joint Stock; that if both of the ſaid Parties ſhould be living at the End of the firſt three Years, of the ſix Years, that the ſaid *B.* ſhould come in joint Partner accordingly; and during the ſaid joint Trade, the Copartners became jointly indebted to the other Defendants, *C. &c.* in 6000*l.* and that *A.* became indebted to the Plaintiffs as aforeſaid, without the Conſent of *B.* and the Money due upon the ſaid Bonds was not brought into the Account of the joint Stock; and the ſaid *A.* was only a Surety, and received none of the Money; and the Defendant inſiſted that the joint Creditors ought firſt to be paid out of the Eſtate in Partnerſhip, and that the Commiſſioners have no Power to grant the joint Eſtate to pay the Plaintiffs, they being ſeparate Creditors of *A.* and if a Surplus of the joint Eſtate, after the joint Creditors paid, then the Plaintiffs can have but a joint Moiety of ſuch Surplus towards their Satisfaction, the ſaid *B.*'s Moiety not being liable to pay the ſaid *A.* his ſeparate Debts; and the Debts then claiming were the proper Debts of the ſaid *A.* and yet, after all the joint Debts are paid, there will be an Overplus, ſo that thereby the ſaid *B.* will be diſcharged, and have Money paid unto him; but if the Plaintiff and other ſeparate Creditors of *A.* be admitted to the joint Eſtate, there will not be ſufficient to pay the joint Creditors, ſo that thereby not only *B's.* Eſtate will be applied to pay *A.'s* Debts, but will be liable to the joint Creditors. But there can be no Diviſion of the joint Eſtate, whereby to charge any Part thereof with the private Debts of either Party; and till the joint Debts are paid, and till Diviſion made of the Surplus, both Parties are alike intereſted in every Part of the ſaid joint Stock; that the Commiſſioners have no Power by the Commiſſion to adminiſter an Oath to the Plaintiffs for Proof of their Debts, they claiming Debts from the ſaid *A.* only, and the Commiſſion is againſt *A.* and *B.* jointly, and not ſeverally; and therefore cannot admit the Plaintiffs Creditors.

The Court declared, that the Eſtate belonging to the joint Trade, as alſo the Debts due from the ſame, ought to be divided into Moieties, and that each Moiety of the Eſtate ought to be charged, in the firſt Place, with a Moiety of the ſaid joint Debts; and if there be enough to pay all the Debts belonging to the joint Trade, with an Overplus, then ſuch Overplus ought to be applied to pay the particular Debts of each Partner; but if ſufficient ſhall not appear to pay all the joint Debts, and if either of the ſaid Partners ſhall pay more than a Moiety of the ſaid joint Debts, then ſuch Partner is to come in before the ſaid Commiſſioners, and be admitted as a Creditor for what he ſhall ſo pay over and above the Moiety; and was decreed accordingly.

28 *March*, 1734. *Peter Goſs* and *John Neaulme* Plaintiffs. *Sam. Duſreſnay & al.* Complainants.

Four Bookſellers entered into Partnerſhip for carrying on a joint Trade, and being then all in *Holland*, according to the Cuſtom of the Country, appeared before a Notary, and executed Articles of Copartnerſhip, declaring jointly and ſeparately, that each had advanced 24600 Guilders, Total 98400 Guilders, which Sum was to pay all the Debts they had then contracted, as mentioned in an Inventory; but no Debts ſhould be paid not mentioned in the ſaid Inventory, nor any Debts which either of the Copartners might contract on his own private Account; that a Sum agreed on between them ſhould be allowed for Maintenance; and that all Loſs and Gains ſhould be equally ſhared and borne, with other uſual Covenants.

The Copartnerſhip was carried on from *November* 1725 to *May* 1728, when one of the Partners, for a Sum agreed on to be paid him, quitted and releaſed his Claim to the other three, between whom the Articles were continued and carried on, on the firſt Conditions, and one of them was intruſted with the Goods in Shop and Warehouſe.

But he became profuſe, and embezzled the Copartnerſhip Stock, and applied the ſame to his own Uſe, and ſuffered the Partnerſhip Debts to be unpaid; and having contracted private Debts on his own Account, became a Bankrupt, and a ſeparate Commiſſion was taken out againſt him.

The Meſſenger took Poſſeſſion of the Partnerſhip Goods, and the Commiſſioners executed an Aſſignment to the Defendants, who in Conſequence thereof took Poſſeſſion of the Partnerſhip Goods and Books, and received ſeveral of the Partnerſhip Debts, and were getting in the Reſt, with an Intention to apply them to the Payment of the ſeparate Creditors, whereas the Goods are Copartnerſhip Goods, and ought to be applied to the Copartnerſhip Debts; and to make the Plaintiffs Satisfaction for what the Bankrupt had embezzled for his own ſeparate Uſe, and the Reſidue to be divided into equal Parts, two Thirds to the Plaintiff, and one Third to the Bankrupt, to which he is entitled, and is to be Part of his ſeparate Eſtate, this was the Prayer of the Plaintiff's Bill, as that the Defendants may be reſtrained from ſelling any Part without the Plaintiff's Concurrence.

The Aſſignees admit the Bill, and the Articles, that they have taken Poſſeſſion and ſold ſome of the Stock without Conſent of the Plaintiffs, and have ſet forth an Account in the Schedule to their Anſwer, of the Stock, and ſubmit to apply the Eſtate as the Court ſhall direct; and his Lordſhip was pleaſed to decree as follows:

Lord *Talbot's* Decree.

1. That it ſhould be referred to Mr. *Lightbourn* to take an Account of the Partnerſhip Debts received by the Plaintiffs in *Holland*.

2. To take an Account of the Partnerſhip Eſtate in *England*, received by the Aſſignees, or any for their Uſe.

3. To take an Account of the Partnerſhip Debts owing by the Bankrupt and the Plaintiffs.

4. To cauſe an Advertiſement for the joint Creditors of the Bankrupt and Plaintiffs to come in and prove their Debts.

5. To take an Account of what Embezzlements the Bankrupt has made of the Copartnerſhip Eſtate; and in taking Accounts, Plaintiffs and Defendants to be examined on Oath, to produce all Books, *&c.* and to have all juſt Allowances.

6. That what the Maſter ſhall certify the Copartnerſhip Debts ſhall amount to, ſhall, in the firſt Place, be paid by the Plaintiffs and Defendants to the joint Creditors, in Proportion to their Debts, as far as the Copartnerſhip Eſtate in their Hands will extend.

7. That if it ſhall appear any of the Partnerſhip Eſtate remains in the Plaintiffs and Defendant's Hands after the Partnerſhip Debts are paid, then the Maſter to divide the ſame into three Parts.

8. And the Plaintiffs are to take two Thirds; and out of the Bankrupt's one third Part, they are to take what it ſhall appear he has embezzled of the Partnerſhip Eſtate.

9. And if there ſhall be any Reſidue of the Bankrupt's third Part, after the Partnerſhip Debts, and the Bankrupt's Embezzlements are ſatisfied, then the ſame is to be paid to, or retained by, the Aſſignees, for the Benefit of the Bankrupt's ſeparate Creditors.

10. The Maſter may ſtate any Thing ſpecially; and all Parties are to be paid their Coſts of this Suit out of the copartnerſhip Eſtate, to be taxed by the Maſter.

On the 11th of *September*, 1742, a joint Commiſſion iſſued againſt *Peter Powell* and *Peter Powell* the Younger, of *Exeter*, and the Commiſſioners executed an Aſſignment of the Eſtate and Effects to the Aſſignees that were choſen, and they, by Virtue of the ſaid Aſſignment, poſſeſſed themſelves of all the joint and ſeparate Eſtate of the Bankrupts. *Dec.* 23, 1742, Lord *Hardwicke's* Order.

And the ſaid Bankrupts, having ſeveral ſeparate Creditors, they the ſaid Creditors, in a Petition to the Lord Chancellor, ſet forth their ſaid ſeveral ſeparate Debts, and that they had applied to the Commiſſioners to be admitted Creditors, which they refuſed, as this was a joint Commiſſion, and they therefore prayed, that they might come in and prove their Debts under the ſaid joint Commiſſion, and that the Commiſſioners might take joint and ſeparate Accounts of the joint and ſeparate Eſtates; and that what ſhould be found on ſuch Accounts to belong to the ſeparate Eſtates, might be applied by the Aſſignees towards Satisfaction of the reſpective ſeparate Creditors; and that the Petitioners might be paid their Coſts of the Application by the Aſſignees.

Upon which Petition, his Lordſhip ordered as follows:

1. Let the Commiſſioners give Notice in the *London Gazette*, appointing a Time and Place, when and where the ſeparate Creditors of each of the Bankrupts are to be at Liberty to prove thoſe Debts under the joint Commiſſion.

2. Let the Commiſſioners take ſeparate Accounts of the joint and reſpective ſeparate Eſtate of the Bankrupts, come to the Aſſignee's Hands, or of any others by their Order, or for their Uſe, diſtinguiſhing the joint and ſeparate Eſtate of *Peter Powell*, as alſo the joint and ſeparate Eſtate of *Peter Powell* the younger, from each other.

3. That what on ſuch Account ſhall belong to the Bankrupt's joint Eſtate, ſhall be employed by the Aſſignees towards Satisfaction of the joint Creditors; and in Caſe there ſhall be any Surplus of the joint Eſtate, after all the joint Creditors ſhall be paid their whole Demands, then the Moiety of the Surplus is to be carried to the Account of the ſeparate Eſtate, and to be applied to ſatisfy the ſeparate Creditors reſpectively.

4. And if there is any Surplus of the ſeparate Eſtates, after all the ſeparate Creditors ſhall be paid their whole Demands, then ſuch Surplus of the ſeparate Eſtates, or either of them, is to be carried to the Account of the joint Eſtate, and to be applied towards Satisfaction of the joint Creditors; and let the reſpective ſeparate Eſtates bear a proportionable Part of the Charge of ſuing out the Commiſſion, and executing it, to be appointed by the Commiſſioners; and let the Coſts of this Application be paid the Petitioners by the Aſſignees out of the Bankrupt's ſeparate Eſtate; and let it be referred to Mr. *Bennett* to tax the Coſts, if the Parties cannot agree.

On this Day a ſeparate Commiſſion of Bankruptcy was taken out againſt *William Criſpe*, by *William Perritt*, Plaſterer. *Criſpe* was a Partner with *Edward Burnaby*, Eſq. and Captain *Barbett*, in the Undertaking of building *Ranelagh* Amphitheatre; and this Debt which amounted to 426*l.* or thereabouts, was Part of a Sum of Money due to *Perritt*, for Plaſterer's Work done in and about the ſaid Amphitheatre. 2 *Feb.* 1742. The Caſe of Mr. *William Criſpe*.

Criſpe petitioned the Lord Chancellor to ſuperſede the Commiſſion, inſiſting that this was a joint Debt, and that he did not owe *Perritt* any Thing on his ſeparate Account; and on the 18th of *Feb.* 1742, this Petition was heard before his Lordſhip, and on hearing Counſel on both Sides, and it not then appearing to his Lordſhip whether *Criſpe* was, or was not, a Bankrupt, his Lordſhip did order the Commiſſioners to execute a proviſional Aſſignment, and did direct an Iſſue to be tried in an Action of Trover before Lord Chief Juſtice *Willes* in *London*, wherein the ſaid *William Criſpe* was to be Plaintiff, and ſuch Aſſignee Defendant, and in which the Point of Bankruptcy would come in Queſtion.

And on the 19th of *June*, 1743, the Cauſe was tried at the Sittings in *London*, and by a ſpecial Jury, between the ſaid *William Criſpe*, Plaintiff, and *William Perritt*, who was choſe Proviſional Aſſignee, Defendant.

And the iſſuing the Commiſſion, the joint Debt of *Perritt*, the Aſſignment, and an Act of Bankruptcy committed by *Criſpe*, were proved: And after his Lordſhip

ſhip had clearly and fully ſummed up the Evidence to the Jury, it appearing to them to be a joint Debt, they were pleaſed to give a Verdict for the Plaintiff *Criſpe*, with 10*l.* Damages, and 40*s.* Coſts, and did not find him Bankrupt for this Debt. But a Point of Law ariſing, the laſt Clauſe made in the 10th Year of Queen *Anne* was read, which declares, that the Diſcharge of any Bankrupt by Force of any Acts relating to Bankrupts, from the Debts owing by him, at the Time he became Bankrupt, ſhall not be conſtrued, nor was intended or meant, to releaſe or diſcharge any other Perſon or Perſons, who was or were Partner or Partners with the ſaid Bankrupt in Trade, at the Time he became Bankrupt, or then ſtood jointly bound with him for the ſaid Debts, from which he was diſcharged; but that notwithſtanding ſuch Diſcharge, ſuch Partners or joint Obligors with ſuch Bankrupts, ſhall be and ſtand chargeable with, and liable to pay ſuch Debts, and to perform ſuch Contracts, as if the ſaid Bankrupt had never been diſcharged for the ſame.

And the Caſe was drawn up, and approved of by the Lord Chief Juſtice for the Opinion of the Court of *Common Pleas*.

Where the Queſtion was, whether a ſeparate Commiſſion can be taken out for a joint Debt, which was learnedly ſpoke to on both Sides, but the Court came to no Opinion.

Feb. 1743. And it came again to be argued before the Lord Chief Juſtice *Willes* on the ſame Queſtion; when after hearing the Reaſons offered *pro* and *con*, by the learned Counſel, the Court gave Judgement, and the Lord Chief Juſtice delivered his Opinion, and his Lordſhip, Mr. Juſtice *Abney*, and Mr. Juſtice *Burnet*, were all of Opinion, from the Caſes which had been cited, and the Reaſons and Precedents that had been laid before them, that the Commiſſion was regularly iſſued, and that a joint Creditor had a Right to take out a ſeparate Commiſſion, and therefore made the following Rule:

May 1743. *William Criſpe* againſt *William Perritt: Ordered*, that the Verdict found for the Plaintiff be void, and that a Verdict be entered for the Defendant.

And on the 11th of *May*, 1744, *Perritt* preferred his Petition to the Lord Chancellor, ſetting forth the ſeveral Steps and Proceedings, and the Determination of the Court in this Caſe, and *Criſpe* having, purſuant to his Lordſhip's Order of the 18th of *Feb.* 1742, depoſited 100*l.* in the Bank, in the Name of the Accomptant-General, to be placed to the Credit of this Matter, and in Order to ſtay all Proceedings under the Commiſſion, he therefore prayed his Lordſhip to diſcharge his Order of the 18th of *Feb.* 1742, and that the Commiſſioners might be at Liberty to proceed in the Execution of the Commiſſion, and that the 100*l.* paid into the *Bank* by *Criſpe*, might be paid to him towards the Coſts which he had been put to, on Account of ſuing out the Commiſſion, and Proceedings at Law.

And on the 24th of *May*, 1744, ſuch Petition was heard before his Lordſhip, and his Lordſhip after hearing Counſel on both Sides, ordered that the major Part of the Commiſſioners named in the ſaid Commiſſion ſhould be at Liberty to proceed in the Execution thereof, and that the 100*l.* paid into the *Bank* of *England* ſhould be paid to *Perritt*, as Part of the Bankrupt's Eſtate and Effects.

And on the 26th of *May*, 1744, *Criſpe* was declared a Bankrupt in the *Gazette*.

How far the Commiſſioners ſhall overreach the Acts of a Bankrupt, from the Time of the Act of Bankruptcy committed.

1ſt, AS to the Bankrupt's receiving Debts due to him from his Debtors.
2dly, As to his ſelling his Goods *bonâ fide*.
3dly, As to his ſelling and mortgaging his Lands.
4thly, As to his mortgaging or pledging his Goods.
5thly, As to his paying Debts.

1 *Jac.* I. C. 15. And, firſt, A Bankrupt may receive his Debts after the Act of Bankruptcy, from ſuch Debtors as do not know him to be a Bankrupt, and the Payment will be good.

2 *Show.* 522. Cafes in *Chan.* 156. *Wagſtaff* and *Read.* 2dly, All Perſons buying Goods of a Bankrupt, not knowing him to be ſo, and paying for them *bonâ fide*, ſhall be received in the Equity of the *Proviſo*, 1 *Jac.* I. Cap. 15.

And Contracts, where there is *quid pro quo*, the Bankruptcy ſhall not over-reach.

72. *Parrat* v. *Ballard*. Where it ſeems to be taken, that though Goods were bought and paid for, they may be recovered at Law, though not in Equity. *Fowel's* Caſe cited by Lord *North. Skin.* 149. 3 *Lev.* 58. 21. 19 *Geo.* II. P. 515.

And the Reaſon is, that if it was otherwiſe, it would be a great Prejudice to Trade, inſomuch that it could not be carried on with Safety, and the Law would be a Snare for the innocent and fair Contractor, who cannot poſſibly have any Notice of the Act of Bankruptcy; as the following Abſtract clearly determines.

The Preamble obſerves, that many Perſons within the Deſcription of, and liable to the Statutes concerning Bankrupts, frequently commit ſecret Acts of Bankruptcy unknown to their Creditors, and other Perſons with whom they have Dealings; and after committing thereof, continue to appear publickly, and carry on Buſineſs, by buying and ſelling Goods, drawing, accepting, and negociating Bills of Exchange, and paying and receiving Money on Account thereof in the uſual Way of Trade, and in the ſame open Manner as if they were ſolvent and not become Bankrupt: And as the permitting ſuch ſecret Acts of Bankruptcy to defeat Payments really made in the Caſes and Circumſtances above-mentioned, where the Perſons receiving the ſame had no Notice of, or were privy to their having committed any Act of Bankruptcy, will be a Diſcouragement to Trade, and a Prejudice to Credit in general: *It is therefore enacted*, that after the 29th of *October*, 1746, no real Creditor of a Bankrupt, in Reſpect to Goods ſold to, or Bills of Exchange really drawn, negociated, or accepted by ſuch Bankrupt in Courſe of Dealing, ſhall be liable to refund to the Aſſignees of the Bankrupt's Eſtate, any Money, which before the ſuing forth of ſuch Commiſſion was really in the Courſe of Trade received by him of ſuch Bankrupt, before he had Knowledge or Notice of his becoming a Bankrupt, or being in inſolvent Circumſtances. P. 516.

3dly, If a Man ſells or mortgages his Lands, the Bankruptcy will over-reach it, although the Purchaſer had no Notice of the Bankruptcy, if the Commiſſion iſſued within five Years after the Act of Bankruptcy, becauſe this is a Miſchief which does not immediately concern Trade, and he who buys Lands, does it at his Peril, ſubject to all ſuch Incumbrances as Lands are liable to. 2 *Show.* 522.

4thly, If a Man mortgages or pledges his Goods after an Act of Bankruptcy, the Commiſſion will over-reach it, becauſe the Mortgage or Pawning Goods does not immediately concern Trade as Buying and Selling does, and he who takes a Pawn does it at his Peril.

5thly, If a Bankrupt pays Debts after the Bankruptcy, the Aſſignee may recover the Money again, if it were otherwiſe, it would be in the Power of the Bankrupt to prefer ſuch Creditors as he ſhould think fit, which is contrary to the Deſign of the Statutes concerning Bankrupts, which is to put all Creditors upon a Footing.

A remarkable Caſe, tried under a ſecond Commiſſion of Bankruptcy.

ON this Day a Commiſſion of Bankruptcy iſſued againſt *William Kell* of *London*, Merchant, who was found a Bankrupt, and ſubmitted to the Statutes, and finiſhed his laſt Examination, but never obtained his Certificate under ſuch Commiſſion. 17 *May*, 1735.

Afterwards he ſet up the Trade of a Diſtiller near *Maidenhead* in *Berkſhire*; and becoming acquainted with one *Aſhley*, they entered into Copartnerſhip, on the 1ſt of *Auguſt*, 1741, to carry on the Trade of diſtilling and rectifying Melaſſes Spirits, for five Years or thereabouts, and during this Copartnerſhip, *Aſhley* took off all, or moſt of the Spirits which *Kell* diſtilled.

Afterwards ſome Diſputes ariſing between them, and *Kell* being Debtor to *Aſhley* on a ſeparate Account, excluſive of the Copartnerſhip, *Aſhley*, on the 2d of *July*, 1742, took out a ſecond Commiſſion againſt *Kell*, and was choſe ſole Aſſignee of his Eſtate and Effects; but *Kell* having in all Reſpects ſubmitted to the Statutes relating to Bankrupts, *Aſhley* and the Reſt of *Kell's* Creditors ſigned his Certificate under this ſecond Commiſſion, which was duly confirmed and enrolled; and *Aſhley* ſold back to *Kell* ſeveral Parcels of his Houſehold Goods, and Part of his Stock in Trade, as a Diſtiller; for Part of which Goods *Kell* paid *Aſhley* in Money, and for the Remainder, amounting in Value to 100*l.* or thereabouts

abouts, *Kell* gave *Aſhley* a Bond for 100*l.* dated the 28th of *October*, 1742, payable in ſix Months with Intereſt, at five *per Cent.* and *Aſhley* promiſed to deal with *Kell* afterwards.

Then *Kell* again ſet up the Trade of a Diſtiller on his own Account, and *Aſhley* dealt with him, and paid him for two Parcels of Spirits, after the Rate of 4*s.* *per* Gallon to the amount of 88*l.* 16*s.*

On the 4th and 28th Days of *April*, 1743, *Kell* ſent *Aſhley* two other Parcels of Spirits, at the ſame Price, amounting to 184*l.* 4*s.* and *Kell's* Bond of 100*l.* being then due to *Aſhley*; and *Kell* being unwilling that his Bond ſhould be out againſt him, he deſired *Aſhley* to pay himſelf out of the Goods, for the Bond and Intereſt due to him, and only give him the Balance for the Spirits.

But inſtead of ſo doing, *Aſhley* in *Eaſter* Term, 1743, brings an Action againſt *Kell* for the 100*l.* and Intereſt due on the Bond, and holds *Kell* to Bail; and at the ſame Time by the Meſſenger under the Commiſſion, ſeizes the Spirits, amounting to 182*l.* 4*s.* as Aſſignee under the ſecond Commiſſion, and he inſiſted to retain the ſame, in Truſt for himſelf and the other Creditors of *Kell*, under the ſecond Commiſſion, by Virtue of the ninth Clauſe of 5 *Geo.* II. *Aſhley* proceeded in his Action, and *Kell* by Way of Set-off to the Debt pleaded, that before the bringing of this Action, *Aſhley* was indebted to him in a much larger Sum, *viz.* in 184*l.* 4*s.* for Goods ſold and delivered, out of which Sum *Kell* was willing to allow the Principal and Intereſt due to *Aſhley* on his Bond; and upon this Iſſue was joined.

Mich. Term. 1743. Pending this Action *Kell* filed a Bill in Chancery againſt *Aſhley*, and prayed that *Aſhley* might diſcover, whether he had not agreed to purchaſe ſuch Goods of him, and if ſuch Goods did not come to his Poſſeſſion; and to be relieved in ſeveral other Matters complained of in ſuch Bill, and that *Aſhley* might be enjoined from proceeding in ſuch Action.

To this Bill *Aſhley* put in his Anſwer, in which he denied the Spirits were ever ſold to him, or that he ever promiſed to pay for them, and he inſiſted upon his Right of retaining them as Aſſignee under the ſecond Commiſſion by Virtue of the above-mentioned Clauſe; *Kell's* Effects under the ſecond Commiſſion not amounting to pay fifteen Shillings in the Pound; but whether ſuch Goods were, or were not, rightly ſeized, he was adviſed was a Matter ought to be tried at Law, where *Kell*, if at all, had his Remedy; and the Court did not think proper to grant an Injunction, but ſent the Parties to Law, and then *Aſhley* proceeded in the Cauſe.

And on the 30th of *November*, 1743, it was tried before the Lord Chief Juſtice *Lee*, at *Guildhall*.

And upon the Argument of this Caſe, it was inſiſted by the Counſel for *Aſhley*, that theſe Goods were not the Property of *Kell*, and therefore that he could not ſell them; but that they came to *Aſhley*, as Aſſignee under the ſecond Commiſſion.

That *Aſhley* had the Spirits, but not as a Buyer, and that by the afore-mentioned Clauſe *Kell's* future Effects were liable, he not having paid fifteen Shillings in the Pound; and conſequently that the Goods belonged to the Aſſignee, either under the firſt, or ſecond Commiſſion.

But by *Kell's* Counſel, it was inſiſted that *Kell* was never diſcharged by the Act of 5 *Geo.* II. after 24 *June*, 1732, except by the laſt Commiſſion, and therefore poſſibly could not be within the Intent of that Act, having but once had the Benefit of it.

That ſuppoſing *Kell's* future Effects had been liable to his Creditors by the aforeſaid Clauſe, that *Aſhley* could not in any Manner ſeize them as Aſſignee under the ſecond Commiſſion; and if he had a Right, he muſt have proceeded in a legal Way, and have brought his Action againſt *Kell*; and then *Kell* would have pleaded his Certificate in Diſcharge of his Perſon, and let *Aſhley* have taken Judgement againſt his Goods, as in the Caſe of an inſolvent Debtor; but that this was by no Means *Kell's* Caſe, he not being within the Meaning of the Clauſe of the Act, as having but once had Relief.

And his Lordſhip, after having with great Judgment ſtated the Caſe, and ſummed up the Evidence, to the Jury, was clearly of the ſame Opinion with the

the Gentlemen who were Counſel for *Kell*, that his Caſe was not within the Intent and Meaning of that *Clauſe*, and that the taking of the Goods by *Aſhley*, as Aſſignee, was illegal; and the Jury, concurring with his Lordſhip, found the Plea of the Defendant *Kell* to be true, as was alledged, and therefore gave a Verdict for him.

But the L. C. J. gave *Aſhley* Leave to move, if he thought proper, in Arreſt of Judgment, within ſix Days of *Hilary* Term then next; and *Aſhley* not moving in Arreſt of Judgment in all *Hilary* Term, the L. C. J. ordered the *Poſtea* to be delivered to the Defendant *Kell's* Attorney, who thereupon taxed the Coſts at 30*l.* and took out Execution againſt *Aſhley* for ſuch Coſts, which *Aſhley* paid the ſaid Attorney.

And after *Aſhley* had paid *Kell's* Coſts, in *Eaſter* Term following, *Aſhley* moved in Arreſt of Judgment, and a Rule was made for *Kell's* Attorney to attend with the *Poſtea*.

And the ſame Arguments were made uſe of before the Court of *King's-Bench*, by the Counſel on both Sides, as were at the Trial of the Cauſe; but the whole Court were alſo of Opinion that the Verdict was right, and entirely concurred with the L. C. J. *Lee* in his Judgment, and therefore they diſcharged the Plaintiff's Rule.

And in *Trinity* Term, 1744, *Kell* brought an Action in the Court of *Common-Pleas* againſt *Aſhley*, for the Balance of the Sum of 184*l.* 4*s.* due for the Spirits.

And on the 23d of *June*, 1744, this Cauſe was tried at *Guildhall*, before the L. C. J. *Willes*, where the ſame Arguments were made uſe of by the Counſel both for Plaintiff and Defendant, as were inſiſted on before the L. C. J. *Lee*, at the firſt Trial, and before the Court of *King's-Bench*, on the ſpecial Argument of this Caſe; but the L. C. J. *Willes*, upon ſtating it, and fully ſumming up the Evidence to the Jury, was clearly of the ſame Opinion with the L. C. J. *Lee*, and the Court of *King's-Bench*, and was pleaſed to make this Obſervation, *viz.* That by the very Clauſe in the Act of Parliament, the Effects of a Bankrupt that had received the Benefit of the Act, according to that Clauſe, remained liable to his Creditors, as before the making of the Act; but that it could never be ſuppoſed that they were liable to be ſeized in a ſummary Way, without a legal Trial, by an Aſſignee, becauſe nothing was veſted in the Aſſignee but what the Bankrupt had before he was a Bankrupt, and *Kell* had not received the Benefit of the Act.

And the Jury being of the ſame Opinion, they therefore gave a Verdict in this Action for the Plaintiff *Kell*, for 54*l.* 18*s.* beſides Coſts of Suit; being what was proved to be the Value of the Spirits, after ſome Allowances were made for Waſte and Leakage, and after the Bond of 100*l.* and Intereſt was paid by *Kell* to *Aſhley*.

Of Factors and Executors becoming Bankrupts, having Effects of other Perſons in their Hands.

IF a Bankrupt is a Factor, although he has the Poſſeſſion of the Goods of his Principal, and the Power of immediately ſelling them and taking the Money; yet that is not a Poſſeſſion within the Meaning of the Statute of 21 *Jac.* I. C. 19. S. 11. nor will the Caſe be altered, if the Factor acts upon a *del Credere* Commiſſion.

The *Bonnels* were conſiderable Merchants in *London*, and had two Bales of Silk conſigned to them by *Altenory* and *Alteory* from *Leghorn*; but before the Ship ſailed, Advice arrived there, that the *Bonnels* had failed; and thereupon *Altenory* and *Alteory* altered the Conſignment of the Silk, and made it to the Defendant. *Wiſeman* v. *Vandeput* 2 *Vern.* 303. *Hill.* 1690.

On which the Plaintiffs, being Aſſignees under the Statute againſt the *Bonnels*, brought their Bill for a Diſcovery and Relief.

Upon the firſt Hearing, the Court ordered all Letters, &c. to be produced, and that the Parties proceed to a Trial in Trover, to ſee whether the firſt Conſignment, notwithſtanding the altering thereof, and new Conſignment made before the

the Ship ſailed, veſted the Property of thoſe Silks in the *Bonnels*; and upon the Trial and Verdict being given for the Plaintiffs, the Cauſe now came on upon the Equity reſerved.

The Court declared, the Plaintiffs ought not to have had ſo much as a Diſcovery, much leſs any Relief in this Court, in Regard that the Silks were the Goods of two *Florentines*, and not of the *Bonnells*, nor the Produce of their Effects; and therefore, they having paid no Money for the Goods, if the *Italians* could by any Means get their Goods again into their Hands, or prevent their coming into the Hands of the Bankrupts, it was but lawful for them ſo to do, and very allowable in Equity.

And it was decreed, that if any Thing was due from the *Italians* to the *Bonnels*, that ſhould be paid the Plaintiffs; but they ſhould not have the Value of the Silks, by Virtue of the Conſignment or Verdict, and put the *Italians* to come in as Creditors under the Statute of Bankrupts.

Eſcot v. *Milward.* Sittings after *Mich.* Term, 1783.

An Action was tried at *Guildhall*, before Mr. Juſtice *Buller*, in which it appeared the Plaintiffs were Merchants in *London*, and in *June*, 1783, had a Quantity of Wheat conſigned to them from *Oſtend*; the Sale of which they intruſted to one *Farrer*, as their Factor.

The Factors in the Corn Trade, like thoſe in the Linen Trade, receive a *del Credere* Commiſſion, beſides their Factorage, and never communicate the Names of the Purchaſers to the Owners, except in Caſe of the Factor's Failure. *Farrer*, on the 9th of *June*, 1783, ſold 211 Quarters of the Plaintiff's Wheat to the Defendant *Milward*. On the 16th of *June*, *Farrer* being about to ſtop Payment, gave up the Wheat under his Care to the Plaintiffs, and ſent them the Names of the Buyers. On the 20th of *June*, *Farrer* ſtopt Payment; and, a ſhort Time afterwards, his Creditors executed a Deed of Compoſition. On the 21ſt of *June*, the Plaintiff delivered the Defendant *Milward* a Bill of Parcels of the Wheat ſold to him by *Farrer*, as their Factor; and deſired him to accept a Bill, at a Month, for the Amount, which he refuſed, inſiſting that he had a Right to ſet off a Debt due to him from *Farrer*, againſt the Price of the Wheat.

Mr. Juſtice *Buller*, in his Charge to the Jury, declared the Doctrine laid down by Lord Chief Juſtice *Lee*, in *Scrimſhire* v. *Alderton*, to be Law; and the Plaintiff recovered a Verdict.

Again, one *Murray*, of *Belfaſt* in *Ireland*, in 1782, conſigned a Quantity of Linens to *Bate* and *Henkell*, of *London*, to be diſpoſed of by them, as his Factors, upon a *del Credere* Commiſſion. *Bate* and *Henkell* ſold the Linens for 192*l.* 14*s.* and, before they received the Money, became Bankrupts. The Aſſignees afterwards received the Money of the Purchaſer, which *Murray* demanded of the Aſſignees, who refuſed to pay it, inſiſting that he ſhould come in as a Creditor under the Commiſſion. *Murray* preſented a Petition to the Lord Chancellor, praying that the Aſſignees might be ordered to pay him the Money the Linens ſold for, after deducting the Commiſſions and Charges, and a ſmall Sum due from *Murray* to the Bankrupts, on another Account.

His Lordſhip, after hearing the Point of Law argued, was clearly of Opinion, that the Purchaſer not having paid for the Linens previous to the Bankruptcy, *Murray*, the Conſignor, was intitled to receive the Price of the Linens; and accordingly ordered the Aſſignees to pay him the Money.

Copeman v. *Gallant*, before Lord *Cowper*. 1 *Peer Will.* 314. *Trin.* Term. 1716.

A. made a Bill of Sale of ſome Leaſes and perſonal Eſtate to *B.* and *C.* in Truſt to pay *A.'s* Debts; *B.* at firſt acted in the Truſt, but afterwards *C.* took the whole into his Poſſeſſion, and acted alone, and became a Bankrupt.

And *A.* brought a Bill againſt *C.* and others, to bring *C.* and his Aſſignees to an Account, touching the perſonal Eſtate of *A.* ſo aſſigned, in Truſt for the Payment of his Debt as aforeſaid.

And his Lordſhip, declaring that he thought the 21 *Jac.* I. S. 10. to govern this Caſe, diſmiſſed the Plaintiff's Bill with Coſts.

But further Argument being granted on the Caſe, his Lordſhip held that it was not within the above-mentioned Clauſe and Statute, in Regard this Aſſignment was with an honeſt Intent, *viz.* for the Payment of the Debts of the Aſſignor.

And therefore he ordered the Aſſignees of *C.* to account for all the Eſtate of *A.* which the Court declared ſhould not be liable to the Bankruptcy of *C.*

Jonathan Scott and *Francis Richardſon*, Plaintiffs, *Robert Surman & al.* Defendants. In the *Common Pleas.*

The Plaintiffs brought an Action againſt the Defendants for Money had and received to the Plaintiffs' Uſe; and the Caſe was as follows:

The Plaintiffs being concerned as Partners in a large Quantity of Tar, conſigned it to *Richard Scott*, who was their Factor, and Brother to one of the Plaintiffs, between which two Brothers there had been mutual Dealings, and Accounts which were at that Time unſettled.

The Ship arrived in the *Thames*, with the Goods from *Carolina*, on the 22d of *May*, 1739, of which the Factor had before received a Bill of Lading; and on the 28th of *March* following, he ſold the ſaid Tar to Meſſ. *Cornelius* and *Jeremiah Owen*, who agreed to pay for it in Promiſſory Notes, payable in four Months after the Delivery of the ſaid Goods, and that a Debt of 31*l.* at that Time owing to the Buyers from the Factor, upon his own private Account, ſhould be deducted out of the Purchaſe Money.

On the 1ſt of *April*, 1740, the Owners paid the Factor in Part, by giving him one Promiſſory Note of 66*l.* 13*s.* 4*d.* and another of 102*l.* 6*s.* 8*d.* which, with the 31*l.* due to them from the Factor, amounted to 200*l.*

On the 3d of *April* following, the Factor, *Richard Scott*, committed an Act of Bankruptcy, and on the 4th a Commiſſion iſſued againſt him, on the Petition of one of the Defendants, and the three Defendants were choſen Aſſignees, to whom the Bankrupt delivered up the ſaid two Notes, received from the Buyers in Part of Payment for the Tar, and the ſaid Aſſignees afterwards received the Money for them.

The Defendants, as Aſſignees, likewiſe confirmed the Sale of the Tar to the ſaid *Owens*, and ſettled the Account with them, and received the Balance, being 378*l.* 4*s.* and there being a Bounty allowed by Act of Parliament, at ſo much *per* Ton, payable to the Importer of this Tar, the Defendants, as Aſſignees, did alſo receive that Bounty, amounting to the Sum of 299*l.* 8*s.*

The Aſſignees inſiſted that they, as ſuch, were entitled to all this Money, and that the Plaintiffs muſt come in as Creditors under the Commiſſion; and the Plaintiffs inſiſted, that the Bankrupt, being their Factor, *could be only conſidered as a bare Truſtee*, and therefore that the Notes delivered up to them by the Bankrupt, though payable to him or Order, were the Notes of the Plaintiffs, and that the Defendants receiving the Money for thoſe Notes, and alſo the remaining Part of the Money for the Tar, and the Bounty due to the Importer of that Tar, they received thoſe Monies for the Uſe of the Plaintiffs.

This Cauſe was tried by a ſpecial Jury, and the Damages were computed at 358*l.* 10*s.* and a Verdict was given for the Plaintiffs, ſubject to the Opinion of the Court upon this Queſtion:

Whether the Plaintiffs were entitled to ſuch Sum of 358*l.* 10*s.* given by the Verdict, or to any, or what Part thereof?

And the principal Caſes which were cited by the Plaintiffs, were thoſe of *Copeman* and *Gallant*, herein before-mentioned; the Caſe of *L'Apoſtree* v. *Le Plaiſtier*, which was tried before Lord *Holt*, where an Action of Trover was brought againſt an Aſſignee in a Commiſſion againſt one *Levi*, to whom the Plaintiff had delivered ſome Diamonds to ſell; and this being a Queſtion depending upon the Clauſe of 1 *Jac.* c. 19. S. 10 and 11, it was made a Caſe for the Court of *King's-Bench*; and it appearing that the real Property of the Diamonds belonged to the Plaintiff, and that the Bankrupt had only a bare Authority to ſell them for his Uſe, therefore the Court were of Opinion they were not liable to his Bankruptcy.

The Caſe of *Burdett* and *Willett* was alſo cited, where, in the Court of *Chancery*, it was decreed, that the Factor was only in the Nature of a Truſtee for his Principal, and that delivering Goods to him did not alter the Property of the real Owner; and upon the Argument of this Caſe, the Court took Time to conſider of it, and ſome Time afterwards gave their Judgment for the Plaintiffs, *viz.* That the Plaintiffs ſhould be at Liberty to enter up that Judgment for the Debt and Coſts, deducting thereout the 31*l.* due from the Factor to the *Owens*.

In like Manner, if Bills of Exchange or Goods are ſent to a Merchant for a particular Purpoſe, and the Merchant breaks, having the Bills of Exchange or the Goods in his Poſſeſſion, they do not paſs by the Aſſignment.

Neither does the Statute extend to the Caſe of an Executor or Adminiſtrator becoming Bankrupt; for the Property they may poſſeſs as ſuch, cannot be aſſigned by the Commiſſioners.

Hill v. *Mills*. *Holt* Rep. *Mich.* 3 *W.* and *M.* Com. 185. 1 *Show.* 223.

Motion for a Prohibition to the Eccleſiaſtical Court from granting Adminiſtration to *A.* where *B.* was named Executor by the Teſtator, for that *B.* was a Bankrupt.

Holt C. J. The Ordinary is not to grant Adminiſtration, where an Executor is named; and Bankruptcy is no material Diſability; he acts *en autre Droit*, and the Teſtator had intruſted him; but in Caſe of *non ſane Memory*, there is no abſolute Neceſſity to grant Adminiſtration.——A Prohibition granted.

If an Executor becomes Bankrupt, a Legatee is to be Creditor.

Neither does Aſſignment paſs Property which may be ſtopt in *Tranſitu*.

If a Merchant conſigns Goods to a Trader, and before their Arrival the Conſignee becomes a Bankrupt; if the Merchant can prevent the Goods getting into the Bankrupt's Hands, the Commiſſioners' Aſſignment will not affect them.

If Goods are delivered to a Carrier or Hoyman, or the Maſter of a Veſſel, to be delivered to *A.* and the Goods are loſt by the Carrier, the Conſignee can only bring the Action; which ſhews the Property. But, though ſuch Goods are actually delivered to a Carrier to be delivered to *A.* and while the Carrier is upon the Road, and before actual Delivery to *A.* by the Carrier, the Conſignor hears that *A.* his Conſignee, is likely to become a Bankrupt, or is actually one, and countermands the Delivery, and gets them back into his own Poſſeſſion again, no Action of *Trover* would lie for the Aſſignees of *A.* becauſe the Goods, while they were in *Tranſitu*, might be ſo countermanded.

The Commiſſioners cannot aſſign the Benefit of an Agreement made with a Bankrupt.

Moyſes v. *Little*, 2 *Vern.* *Sed quære.*

Where the Defendant, on Marriage of his Son, ſettles Land on himſelf for Life, Remainder to his Son for Life, *&c.* and covenants, during his own Life, to pay his Son 15*l. per Annum*; the Son becomes a Bankrupt; the Plaintiff, as Aſſignee, brings a Bill againſt the Father, to have the Benefit of this Agreement, and to compel Payment of the 15*l. per Annum*. *Per Cur.* An Aſſignee under a Statute of Bankruptcy is not entitled to have the Performance of an Agreement made with the Bankrupt; and ſaid that it was ſo adjudged in the Caſe of *Drake* v. the *Mayor* of *Exeter*; where the Court held, that, if a Leſſor covenants with his Leſſee and his Aſſigns to renew his Leaſe, and the Leſſee becomes a Bankrupt, and the Commiſſioners aſſign this Covenant, the Aſſignees cannot have any Relief againſt the Leſſor.

Commiſſioners cannot aſſign future Earnings ariſing from the Labour of the Bankrupt.

Chippendale v. *Tomlinſon*. *B. R. Trin.* 25 *Geo.* III.

Chippendale brought an Action of *Aſſumpſit* for Work and Labour as an Attorney. The Defendant pleaded that the Plaintiff was a Bankrupt, and averred that the Commiſſion was ſtill in Force.

The Plaintiff replied, that the Work and Labour was done after the Commiſſioners' Aſſignment, and for the neceſſary Support of himſelf and Family. Rejoinder, that the Plaintiff had not obtained his Certificate; and thereupon a Demurrer.

Lord *Mansfield* ſaid, the only Queſtion is, whether the Aſſignees of a Bankrupt are entitled to the Profits ariſing from his perſonal Labour?

1 *Atk.* 253.

Mr. Juſtice *Buller* obſerved, that the Caſe in *Atkins* did not ſupport the Doctrine laid down at the Bar; for Lord *Hardwicke* there ſays, "All his future perſonal Eſtate is affected by the Aſſignment;" by which he evidently meant, that, if the Aſſignees claim it, the Bankrupt muſt deliver it up; and ſo far the Aſſignment affects it: But no other Perſon can have the ſame Plea. It is certain, Lord *Hardwicke* meant to go no further than the Caſe in *Strange*, which is deciſive of his Meaning; therefore he was of Opinion with the Plaintiff, for whom Judgment

on the Demurrer was accordingly pronounced. See the Caſe referred to by Judge *Buller*, 2 *Strange* 1207, *Aſhley* v. *Kell.*

Of chuſing Aſſignees, and of their Power and Duty.

WHEN any Commiſſion of Bankruptcy is iſſued out, the Commiſſioners therein named, or the major Part of them, ſhall forthwith, after they have declared the Perſon Bankrupt, cauſe Notice to be given in the *London Gazette*, and ſhall appoint a Time and Place for the Creditors to meet; which for the City of *London*, and all Places within the Bills of Mortality, ſhall be at *Guildhall*, in order to chuſe an Aſſignee, or Aſſignees, of the Bankrupt's Eſtate and Effects; at which Meeting the Proof of any Creditor's Debt, that ſhall live remote from the Place of the ſaid Meeting, ſhall be admitted by Affidavit, or if Quakers, by Affirmation, or if from abroad, by Letters of Attorney; and all Creditors who ſhall ſo prove their Debts at this Meeting, and whoſe Debts amount to 10*l.* or upwards, ſhall be qualified to vote in the Choice of Aſſignees; and he, or they, that ſhall be ſo choſen by the major Part in Value of the Creditors then proving their Debts, ſhall have an Aſſignment from the Commiſſioners, or the major Part of them, of the Bankrupt's Eſtate and Effects. 5 *Geo.* II. C. 30. S. 26, 27.

The Commiſſioners have Power immediately to appoint one or more Aſſignees, if they ſee Cauſe, for the better ſecuring and preſerving the Bankrupt's Eſtate; which Aſſignee, or Aſſignees, may be removed or diſplaced at the Meeting of the Creditors for the Choice of Aſſignees, if the major Part of them then met, and duly qualified, ſhall think fit; and ſuch Aſſignee, or Aſſignees, as ſhall be removed or diſplaced, ſhall, within ten Days after Notice given in Writing by the Aſſignee or Aſſignees choſen by the Creditors of the ſaid Choice, make an Aſſignment and Delivery to the ſaid Aſſignee or Aſſignees of all the Bankrupt's Eſtate and Effects which ſhall have come to their Hands and Poſſeſſion, on Penalty of 200*l.* each, to be diſtributed among the Creditors, in the ſame Manner as the Bankrupt's Eſtate ſhall be. And the Lord Chancellor has Power, on the Petition of any Creditor, to remove ſuch Aſſignees as ſhall have been choſe by the Commiſſioners, to vacate the Aſſignment, and to cauſe a new one to be made. Ditto, S. 30.

Aſſignees have Power to order the Bankrupt's Attendance on them as often as they think convenient for the Benefit of the Eſtate, and may have ſome ſkilful Accomptants to ſettle his Books of Accounts, and employ ſome faithful Perſon to collect and get in the Debts; but for this laſt they ought to have Security.

Aſſignees may bring Actions at Law without the Conſent of the Creditors; though, if the Suit in Law is a Matter of Conſequence, or which may produce a Suit in Equity, they ſhall ſummon all the Creditors to a Meeting, by Notice in the *London Gazette*, and lay before them the true State of the Caſe, and take the Conſent of the major Part in Value of the ſaid Creditors in Writing, to the bringing ſuch Suits, and that a ſufficient Sum remain in the Aſſignees' Hands to defray the Charges; and in Caſe they apprehend that they ſhall not have ſufficient, they may take an Agreement under the Creditors' Hands to indemnify them, and oblige themſelves every one to pay his Share, in Proportion to their reſpective Debts; for Aſſignees are not obliged to bring any Suit in Law or Equity, though the Creditors vote that they ſhould, unleſs they are indemnified, where there is any Appearance of a Hazard. Ditto, S. 38.

And the Aſſignees may, with the Conſent of the major Part in Value of the Creditors who ſhall have duly proved their Debts, and be preſent at any Meeting of the ſaid Creditors, purſuant to Notice to be for that Purpoſe given in the *London Gazette*, ſubmit any Difference or Diſpute between the Aſſignees and any Perſon or Perſons whatſoever, relating to the Bankrupt's Effects, to Arbitration; the Arbitrators to be choſen by the Aſſignees, and the major Part in Value of ſuch Creditors, and the Party or Parties with whom they have the Difference, and to perform the Award of ſuch Arbitrators, or otherwiſe to compound and agree the Matters in Diſpute, in ſuch Manner as the Aſſignees, with ſuch 5 *Geo.* II. C. 30. S. 34.

ſuch Conſent as aforeſaid, ſhall think fit; and the ſame ſhall be binding to all the Creditors.

5 *Geo.* II. C. 30. S. 35. The Aſſignees, by and with the Conſent of the major Part of the Creditors in Value, who ſhall be preſent at a Meeting to be had for that Purpoſe, of which Notice ſhall be given in the *London Gazette*, may make Compoſition with any Perſon or Perſons, Debtors or Accomptants to the Bankrupts, where the ſame ſhall appear neceſſary and reaſonable, and to take ſuch reaſonable Part as can upon ſuch Compoſition be gotten in full Diſcharge of ſuch Debts and Accounts.

Ditto, S. 28. Aſſignees ſhould be careful in examining the Nature of the Bankrupt's Debts, to prevent the Statute of Limitation from taking Place. Where it ſhall appear to the major Part of the Commiſſioners, that there has been mutual Credit given by the Bankrupt and any other Perſon, or mutual Debts between the Bankrupt and any other, at any Time before he became Bankrupt, the major Part of the Commiſſioners, or the Aſſignees of the Eſtate, may ſtate the Account between them, and one Debt may be ſet againſt another, and what ſhall appear to be due on either Side, on the Balance of ſuch Account, and on ſetting ſuch Debts one againſt another, and no more, ſhall be claimed or paid on either Side reſpectively.

Ditto, S. 32. Before the Creditors ſhall proceed to the Choice of Aſſignees, the major Part in Value of the Creditors preſent, ſhall, if they think fit, direct how, and with whom the Monies to be received out of the Bankrupt's Eſtate ſhall remain, until the ſame be divided; to which Rule ſuch Aſſignees ſhall conform as often as 100*l.* ſhall be got in.

Ditto, S. 33. Aſſignees are obliged, at ſome Time after the Expiration of four Months, and within twelve Months from the Time of the Commiſſion's iſſuing, to cauſe at leaſt twenty-one Days public Notice to be given in the *London Gazette*, of the Time and Place they and the Commiſſioners intend to meet, to make a Dividend or Diſtribution of the Bankrupt's Effects; at which Time the Creditors who have not before proved their Debts, ſhall then be at Liberty to prove them; which Meeting, for *London* and all Places within the Bills of Mortality, ſhall be at the *Guildhall*; and at ſuch Meeting the Aſſignees ſhall produce to the Commiſſioners and Creditors then preſent, juſt and fair Accounts of all their Receipts and Payments touching the Bankrupt's Eſtate and Effects, and the Particulars of all that ſhall remain outſtanding, and ſhall, if the major Part of the Creditors then preſent require it, be examined upon Oath before the Commiſſioners, touching the Truth of ſuch Accounts. And the Aſſignees ſhall be allowed to retain all ſuch Sums as they ſhall have paid or expended in ſuing out and proſecuting ſuch Commiſſion, and all other juſt Allowances on Account of their being Aſſignees; and the major Part of the Commiſſioners ſhall order ſuch Part of the nett Produce of the Bankrupt's Eſtate, as by ſuch Accounts, or otherwiſe, ſhall appear to be in the Hands of the Aſſignees, as they ſhall think fit to be divided forthwith among ſuch of the Creditors who have duly proved their Debts under the Commiſſion, in Proportion to their ſeveral and reſpective Debts; and they ſhall make ſuch their Order for a Dividend in Writing under their Hands, and ſhall cauſe one Part of ſuch Order to be filed amongſt the Proceedings under the Commiſſion, and ſhall deliver unto each of the Aſſignees a Duplicate of ſuch their Order, likewiſe under their Hands; which Order of Diſtribution ſhall contain an Account of the Time and Place of making ſuch Order, and the Sum total or *Quantum* of all the Debts proved under the ſaid Commiſſion; and the Sum total of the Money remaining in the Hands of the Aſſignees to be divided, and how much in particular in the Pound is then ordered to be paid to every Creditor under the Commiſſion; and the ſaid Aſſignees, in Purſuance of ſuch Order, and without any Deed or Deeds of Diſtribution to be made for that Purpoſe, ſhall forthwith make ſuch Dividend and Diſtribution accordingly, and ſhall take Receipts in a Book to be kept for that Purpoſe for each Creditor, for the Part or Share of ſuch Dividend or Diſtribution, which they ſhall make and pay to each Creditor reſpectively; and ſuch Order and Receipt ſhall be a full and effectual Diſcharge to ſuch Aſſignees.

And the Aſſignees are further obliged within eighteen Months after iſſuing of the Commiſſion, to make a ſecond Dividend of the Bankrupt's Eſtate and Effects, in Caſe the whole was not divided on the firſt Dividend, and ſhall cauſe Notice to be inſerted in the *London Gazette* of the Time and Place the Commiſſioners intend to meet to make a ſecond Dividend, and for the Creditors who ſhall not before have proved their Debts, to come and prove them; and at ſuch Meeting the Aſſignees ſhall produce upon Oath their Accounts of the Bankrupt's Eſtate and Effects; and what upon the Balance thereof ſhall appear to be in their Hands, ſhall by the like Order of the major Part of the Commiſſioners be forthwith divided among ſuch of the Bankrupt's Creditors, as ſhall have made due Proof of their Debts, in Proportion to their ſeveral and reſpective Debts; which ſecond Dividend ſhall be final, unleſs *any Suit at Law or in Equity ſhall be depending, or any Part of the Eſtate ſtanding out that cannot have been diſpoſed of, or that the major Part of the Creditors ſhall not have agreed to be ſold or diſpoſed of in Manner aforeſaid; or unleſs ſome other or future Eſtate or Effects of the ſaid Bankrupt ſhall afterwards come to, or veſt in the ſaid Aſſignees*; in which Caſe the Aſſignees ſhall, as ſoon as may be, convert ſuch future or other Eſtate or Effects into Money in Manner aforeſaid, and ſhall within two Months next after the ſame ſhall be converted into Money, by the like Order of the Commiſſioners, divide the ſame amongſt the Creditors who ſhall have made due Proof of their Debts. 5 *Geo.* II. C. 30. S. 37.

It is the Duty of the Aſſignees to make a Dividend as early as poſſible after the Time given by the Statute for Creditors to come in, and prove their Debts. And if they neglect making a Dividend and keep the Money in their own Hands, they will be liable to pay intereſt for it.

This Queſtion as to Intereſt aroſe in a Caſe where a Commiſſion iſſued in 1766, againſt *Beale* and others, Copartners; and *Townſhend*, *Ruſſel* and another were choſen Aſſignees. *Beale* and his Partners having carried on the Negociation of Bills of Accomodation to a very large Amount, with ſeveral Perſons who were alſo Bankrupts, the Aſſignees of *Beale* deferred proceeding under the Commiſſion, in Order that the ſeveral Holders of the Bills might prove their Debts and receive Dividends under the other Commiſſions, before they made any Claim on the Eſtate of *Beale*. In Fact, no Dividend was ever made. The Clerk of the Commiſſion was dead and all the Papers were loſt. *Townſhend* had received a conſiderable Part of the Bankrupt's Effects. *Ruſſel* had alſo received ſome ſmall Part, but he died in 1773. *Treves* v. *Townſhend* in Chan, Nov. 17. 1783.

In 1782, the Creditors renewed the Commiſſion, and this Bill was brought by the Creditors againſt *Townſhend* and the Executors of *Ruſſel*, for a Diſcovery of the ſeveral Facts, and for an Account of the Money received by them.

It appeared by *Townſhend's* Anſwer, that he kept the Money he received as Aſſignee, in common with his own at his Banker's; but he ſwore that he generally had there more than the Amount of ſuch Receipts; and the only Queſtion in the Caſe was, whether *Townſhend* and the Executors of *Ruſſel* ſhould be charged with Intereſt for the Money kept in their reſpective Hands.

Lord *Loughborough*, the Seals in Commiſſion, "As to *Ruſſel's* Executors, they cannot be looked upon in the Light of Aſſignees, and as Executors, are not required to pay till called upon; and though the Plaintiffs might charge *Ruſſel's* Eſtate in Reſpect of the Money retained in his Hands in his Life-time, yet, as the Sum is comparatively ſmall, it is ſcarcely an Object. But with Regard to *Townſhend*, I was ſurpriſed to hear it argued that the Aſſignees were not to make a Dividend, or to take an active Part in ſettling the Bankrupt's Affairs, unleſs called upon by the Creditors. And as to the Idea of diſcouraging honeſt Men from taking upon themſelves the Office of Aſſignees, no honeſt Man can ever have any Difficulty. The Effect of giving in to ſuch Doctrine would be, that it would be canvaſſed for as an Office, and no honeſt Man would ever be appointed. There is nothing ſo likely to make the Bankrupt Laws reprobated, or to bring about their Annihilation. This is the groſſeſt Caſe that Imagination can make. The Aſſignees' only Excuſe is, that they could not make a Dividend, becauſe they had been ſo very negligent. They never called upon the Clerk of the Commiſſion, and he is now dead, and all the Papers are loſt. And the Expences of a Suit are brought upon the Eſtate by their Neglect. Now what Ground is there for not

charging them with Intereſt? The Money being mixed by *Townſhend* with his own, it is juſt as clear that a Profit has accrued, as if it had been ſpecially placed out. *Townſhend* was employed in Trade, and knew how to make the moſt of Money. Money is Part of a Merchant's Stock in Trade: a circulating Capital on which Profit ariſes. The Sum in the Banker's Hands was fluctuating, and he muſt have been an unthrifty Merchant if he did not make great Profit of the Money by diſcounting Notes, *&c.* Since the Year 1768, the Sum of 1936*l.* has been ſo employed by him. If the Court ſhould ſuffer him to do this, when the very Nature of the Truſt repoſed in him, required that he ſhould not keep it in his Hands, when will there be a ſufficient Ground to charge Aſſignes? *Townſhend* muſt therefore pay the Intereſt at 5 *per Cent.* and pay all the Coſts of this Suit, and alſo all the ſubſequent Coſts ariſing from the Enquiry in the Maſter's Office, which has been occaſioned by his Neglect.

Let this Caſe ſerve as a Precedent and a Warning to tardy Aſſignees, who but too frequently deſerve the ſevereſt Cenſures, and even Puniſhnment, for delaying Dividends to the great Injury of the poorer Claſſes of Creditors under Commiſſions of Bankruptcy.

If Creditors want to inſpect the Aſſignees' Accounts, and are refuſed by them, the Court, on Petition, will oblige the Aſſignees to ſhew their Accounts according to the Directions of the Statutes.

If an Aſſignee is guilty of a Breach of Truſt, by miſapplying the Creditor's Money or keeping the Money in his Hands, when he ought to have divided it, the Court, on a Petition and Proof being made, will Order an Account to be taken before the Commiſſioners, and a Dividend to be made; and if any manifeſt Delay or Neglect appears in them, will oblige them, as we have ſeen to pay Intereſt and Coſts.

If Aſſignees attempt to ſell Eſtates at an under-Value, or enter into any clandeſtine Agreement either with the Bankrupt or any other Perſon, the Court, by Application, will by Order reſtrain them from ſelling ſuch Eſtates or Intereſts, or remove them.

If Aſſignees have had Suits in Law or Equity, on Application to the Court the Court will Order the Commiſſioners to ſettle the Accounts, allowing them all reaſonable Coſts and Charges, and direct the Aſſignees to make a Dividend of the Reſidue.

The Court on a Petition will Order the Commiſſioners to enquire into the real Conſideration of Debts and Notes, and of uſurions Contracts; and will Order the Aſſignees to be reſtrained from making any Dividend, till the Commiſſioners ſhall have made their Certificate to the Court; and if there appears to have been more than legal Intereſt received, or any unfair Tranſactions, with Regard to the obtaining or ſwelling ſuch Debt, the Court, on bringing a Bill, will, by Decree, reduce ſuch unconſcientious Demand to the Sum which is really due.

If an Aſſignee dies, the Truſt devolves to the ſurviving Aſſignee, or to ſuch new Aſſignee as the Court ſhall join to the ſurviving Aſſignee, if the Creditors ſhall petition for the ſame; and the Executor or Adminiſtrator of the deceaſed Aſſignee muſt pay the Money in his Hands to the ſurviving Aſſignee, and ſuch additional Aſſignee, if appointed; or account before a Maſter in *Chancery* for Aſſets come to his or her Hands becauſe the Commiſſioners cannot take an Account of Aſſets.

But if the Bankrupt's real Eſtate is conveyed to Aſſignees, and one of them dies, this is a Joint-Tenancy, and goes to the Survivor; and he may alone ſell ſuch an Eſtate to the Purchaſer; but if both die before any Conveyance is made, then the Heir at Law of the Survivor muſt convey to ſuch new Aſſignees as the Court ſhall appoint, or join with ſuch new Aſſignees in Conveyance to a Purchaſer.

Ld. *Talbot*, *Mich.* Term. 1 *Geo.* II. 11 *Nov.* *Beſanquett* v. *Daſhwood.*

If Money is overpaid in Purſuance of an uſurious Contract, the Aſſignees have a Right to demand and recover it, notwithſtanding the Agreement of the oppreſſed Party to allow ſuch Payments. The two *Cottons* became Bankrupts, and their Aſſignees brought a Bill againſt *Daſhwood*, as Executor of Sir *Samuel Daſhwood*, who had in his Life-time, lent ſeveral Sums to the Bankrupts upon Bonds bearing 6 *per Cent.* Intereſt, and had taken Advantage of their neceſſitous Circumſtances,

pp. 38 to 41.

cumſtances; and compelled them to pay 10 *per Cent.* to which they ſubmitted, and entered into other Agreements for that Purpoſe, and continued paying at the ſaid Rate of 10 *per Cent.* from the Year 1710 to 1724; it was decreed at the *Rolls*, that the Defendant ſhould account; and that for what had been really lent, legal Intereſt ſhould be computed and allowed; and what had been paid, over and above legal Intereſt, ſhould be deducted out of the Principal at the Time paid, and the Plaintiffs to pay what ſhould be due on Account; and if the Teſtator had received more than was due with legal Intereſt, that was to be refunded by the Defendant, and the Bonds to be delivered up.

Aſſignee's Right to a Mortgage made by a Bankrupt. *Chapman* v. *Tanner.* 1 *Vern.* 276. *Mich.* Term. 1684.

A Bankrupt, before he became ſuch, having made a Mortgage of his Eſtate, the Aſſignees of the Statute bring an Ejectment for the Recovery of the Lands compriſed in the Mortgage; the Mortgagee refuſes to enter, but ſuffers the Bankrupt to take the Profits, and to fence againſt the Aſſignees with this Mortgage. Ld. Keeper ordered, the Mortgagee ſhould be charged with the Profits from the Time of the Ejectment delivered.

An Aſſignee dying in Debt by Bond.

Ex parte *Markland.* 2 *Peer Will.* 546. *Trin.* Term, 1729. L. C. *King.*

THE Aſſignees under a Commiſſion taken out againſt *I. S.* petitioned that *I. N.* the Daughter and Adminiſtratrix of *I. D.* who was the ſurviving Aſſignee under the Commiſſion, ſhould account before the Commiſſioners, for the Bankrupt's Effects come to her Hands; and an Affidavit was made, that *I. N.* had confeſſed ſhe believed that her Inteſtate, the Aſſigneee, kept the Bankrupt's Money in a ſeparate Bag, with a Note in it, ſhewing it to be ſuch; and alſo that the Aſſignee left Lands of Inheritance, deſcended to *I. N.* the Heir, which would be Aſſets by Deſcent, to anſwer the Covenant entered into by the Aſſignee for himſelf and Heirs, with the Commiſſioners, duly to account for the Bankrupt's Effects.

But againſt the Petition it was urged, that this Matter was not fit to be ended in a ſummary Way, but by a Bill to determine it; for that *I. N.* the Heir and Adminiſtratrix of the Aſſignee, had made an Affidavit, that ſhe never confeſſed the Aſſignee, her Father, kept the Bankrupt's Money in a ſeparate Bag or Place, nor did ſhe believe the Fact to be ſo; that the Aſſignee the Father, died indebted by Specialty and otherwiſe ſeveral thouſand Pounds beyond all his Aſſets: that ſhe has paid ſome Bonds, and Actions were depending upon others; that it was in her Election to prefer which of the Specialties ſhe pleaſed, and the Commiſſioners were not proper to determine in a ſummary Way, whether the Payments already made by the Adminiſtratrix, or which ſhe ſhould make, were, or would be, good and legal; or if they ſhould make ſuch Determination, this could be no way binding to the other Creditors; therefore the Order now deſired, that the Daughter and Adminiſtratrix of the Aſſignee ſhould account with the Commiſſioners, would be of no Uſe; ſince the Creditors might bring their Action, or Bill in Equity againſt the Daughter and Adminiſtratrix of the Aſſignee; for which reaſon Ld. Chancellor ordered the Petition of the new Aſſignees to be diſmiſſed, and directed them to bring their Bill.

Though Aſſignees are generally choſen from among the Creditors, and thoſe commonly to whom the Bankrupt is moſt indebted, yet they may be made, notwithſtanding they are no Creditors, nor any Ways concerned in the Commiſſion, provided the major Part in Value of the Creditors appoint them.

2 *Cro.* 105. 1 *Saund.* 37. *Jones* v. *Pope.*

And Aſſignees may bring Actions for Debts due to the Bankrupt in their own Names, *&c.* for they ſhall have the ſame Remedy as the Bankrupt himſelf might have had againſt his Debtors. But if the Commiſſion of Bankruptcy be not taken out within ſix Years, the Time directed by Law for ſuing of Debts, then the Defendant in an Action may plead the Statute of Limitations: In Caſe the Commiſſion be taken out within ſix Years, and the Aſſignment made within that Time, the Statute preſerves the Debt by the Aſſignment, it being to relieve Creditors againſt Fraud.

1 *Salk.* 108, 111.

It is a conſtant Practice to make an Aſſignment of the Debts and Eſtate of the Bankrupt to Aſſignees in Truſt for themſelves, if Creditors, and the other Creditors; it has been held, that where a Commiſſion of Bankrupt is taken out, the Bankrupt's Goods do not thereupon belong to the Commiſſioners, for until

an

an Aſſignment thereof is made, the Property is not transferred out of the Bankrupt; but it is ſaid, the Aſſignee is in by Relation from the Time of the Bankruptcy, ſo as to avoid all *meſne* Acts, but not ſo as to be actually inveſted with the Property.

Of Removing Aſſignees.

5 *Geo.* II. C. 39. S. 31. IF an Aſſignment of a Bankrupt's Eſtate already made by the Commiſſioners, or hereafter to be made, purſuant to the Choice of Creditors ſhould be found neceſſary to be vacated, and a new Aſſignment made of the Debts and Effects unreceived, and not diſpoſed of by the then Aſſignees, to other Perſons, to be choſen by the Creditors as aforeſaid, it is lawful for the Lord Chancellor, Lord Keeper, or Commiſſioners of the Great Seal, upon the Petition of any Creditor, to make ſuch Order therein as he or they ſhall think juſt and reaſonable; and in Caſe a new Aſſignment ſhall be ordered to be made, then ſuch Debts, Effects, and Eſtate of the Bankrupt ſhall be thereby effectually and legally veſted in ſuch new Aſſignee or Aſſignees, and it ſhall be lawful for him or them to ſue for the ſame in their Names, and to diſcharge any Action or Suit, or give any Acquaintance for ſuch Debts, as effectually to all Intents and Purpoſes as the Aſſignees in the former Aſſignments might have done; and the Commiſſioners ſhall cauſe publick Notice to be given in the two *London Gazettes* that ſhall immediately follow the Removal of ſuch Aſſignees; and the Appointment of ſuch others as aforeſaid, that ſuch Aſſignees are removed, and ſuch others appointed in their ſtead, and that ſuch Perſons as are indebted to the Bankrupt's Eſtate do not pay any Debts to the Aſſignees removed; and if an Iſſue is directed to be tried in the Time of the old Aſſignees, the Court, on Petition, will order the ſame Iſſue to be tried by the new ones.

If an Aſſignee himſelf become Bankrupt, that will be a ſufficient Ground for his Removal. Or if the Commiſſioners act improperly in the Choice of Aſſignees.

And where an Aſſignee is removed on Account of his own Bankruptcy, Lord *Hardwicke* was of Opinion, that he and his Aſſignees muſt join with the Commiſſioners in executing an Aſſignment to the new Aſſignees.

If there is any Injuſtice committed by Aſſignees, and that they, with the Bankrupt's Conſent, will admit of ſham Debts being proved, the Court will remove ſuch Aſſignees, and order the Conſideration of ſuch Debts to be inquired into, and all Parties to be examined upon Interrogatories, and appoint new Aſſignees, and direct the Commiſſioners to ſee what is really due from the Bankrupt's Eſtate to his Creditors; and after the Aſſignees are choſen, will order Coſts of the Parties ſo unjuſtly acting, to be taxed by a Maſter and be paid by them.

If Aſſignees live at a great Diſtance from the Bankrupt's Eſtate or Effects, whereby ſuch Eſtate or Effects may be incumbered with heavy Charges, or occaſion a Neglect in getting in ſuch Effects; upon the Application of the Majority of the Creditors who have proved their Debt under the Commiſſion, and proving the ſame by Affidavit, the Court will diſcharge ſuch Aſſignees, and direct a new Aſſignment to be made to ſuch other Aſſignees as the Creditors ſhall appoint, and direct that the old Aſſignees ſhall join in ſuch new Aſſignment.

If it appears that there are Accounts between the Bankrupt and the Aſſignees, and although there may be Notes or Bonds ſubſiſting, ſo as to entitle them to prove their Debts, yet if upon the Balance of ſuch Accounts, the Aſſignees appear to be Debtors to the Bankrupt's Eſtate, the Court will for ſuch Reaſon remove them.

If there appears Partiality or Unfairneſs in the Choice of Aſſignees, the Court, on Petition will remove them.

If it appears that Aſſignees have prevented Creditors from proving their Debts, to make Number and Value for the Bankrupt's Certificate, and for that Purpoſe have conteſted ſuch Debts, and have refuſed to admit them; the Court will for ſuch Unfairneſs remove the Aſſignees, and admit ſuch Creditors to prove ſuch Debts as ſhall appear to be juſtly due to them.

Penalties

Penalties on Perſons concealing Effects, and pretended Creditors ſwearing falſely; and Allowances made to the Diſcoverers of Bankrupts' Effects.

BY this Statute it is enacted, for the better Diſcovery of a Bankrupt's Eſtate, that all and every Perſon who ſhall, after the Time allowed to ſuch Bankrupt, voluntarily make a Diſcovery of any Part of ſuch Bankrupt's Eſtate, not before come to the Knowledge of the Aſſignees, ſhall be allowed 5 *per Cent.* and ſuch further Reward as the Aſſignees, and the major Part of the Creditors in Value, preſent at any Meeting of the Creditors, ſhall think fit. 5 *Geo.* II. C. 30. S. 20, 21. 13 *Eliz.* C. 7. S. 6.

And every Perſon who ſhall have accepted of any Truſt, or Truſts, and ſhall wilfully conceal or protect any Eſtate, real or perſonal, of any Perſon or Perſons becoming Bankrupt, from his Creditors, and ſhall not, within forty-two Days next after ſuch Commiſſion ſhall iſſue forth, and Notice thereof be given in the *London Gazette*, diſcover and diſcloſe ſuch Truſt and Eſtate, in Writing, to one or more of the Commiſſioners or Aſſignees of ſuch Bankrupt's Eſtate, and likewiſe ſubmit himſelf to be examined by the Commiſſioners, in and by the ſaid Commiſſion authorized, if thereunto required, and truly diſcover the ſame, ſhall forfeit the Sum of one hundred Pounds of lawful Money of *Great Britain*, and double the Value of the Eſtate, either real or perſonal, ſo concealed, to and for the Uſe and Benefit of the ſaid Creditors.

And whereas many Abuſes have been committed by pretended Creditors of Bankrupts, be it enacted, by the Authority aforeſaid, that if any Perſon, at any Time hereafter, ſhall, before the acting Commiſſioners in any Commiſſion of Bankrupt, or by Affidavit or Affirmation exhibited to them, ſwear or depoſe that any Sum of Money is due to him or her from any Bankrupt, which Sum of Money is not really due or owing, or ſhall ſwear or affirm that more is due than is really due or owing, knowing the ſame to be not due or owing, and that ſuch Oath or Affirmation is falſe and untrue, and being thereof convicted by *Indictment* or *Information*, ſuch Perſons ſhall ſuffer the Pains and Penalties inflicted by the ſeveral Statutes made and now in Force againſt wilful Perjury, and ſhall moreover be liable to pay double the Sum ſo ſworn or affirmed to be due or owing as aforeſaid, to be recovered and levied as other Penalties and Forfeitures are upon penal Statutes, after the Conviction, to be levied and recovered; and ſuch double Sum ſhall be equally divided among all the Creditors ſeeking Relief under the ſaid Commiſſion. 5 *Geo.* II. S. 29.

Where any Perſon ſhall fraudulently ſwear, or being a *Quaker* affirm, before the major Part of the Commiſſioners in a Commiſſion of Bankruptcy, or by Affidavit or Affirmation exhibited to them, that a Sum of Money is due to him from any Bankrupt, which ſhall in Fact not be really and truly owing, and ſhall, in Reſpect of ſuch fictitious Debt, ſign the Certificate of ſuch Bankrupt's Diſcharge, in every ſuch Caſe, unleſs ſuch Bankrupt ſhall, before the major Part of the Commiſſioners have ſigned ſuch Certificate, by Writing ſigned by him, and delivered to one or more of the Commiſſioners, or of the Aſſignees of his Eſtate and Effects, diſcloſe the Fraud, and object to the Reality of ſuch Debt, ſuch Certificate ſhall be null and void, and the Bankrupt ſhall not be intitled to his Diſcharge, or to any of the Benefits or Allowances given to Bankrupts by the Act of 5 *Geo.* II. 14 *Geo.* II. P. 1157.

Where any Creditor of a Bankrupt reſides in foreign Parts, the Letter of Attorney of ſuch Creditor, atteſted by a Notary Publick in the uſual Form, ſhall be a ſufficient Evidence of the Power by which any Perſon thereby authorized ſhall ſign the Bankrupt's Certificate.

Of ſuperſeding Commiſſions.

THE Reaſons for ſuperſeding Commiſſions are many and various; as,

1ſt, If there is not a Debt due to the petitioning Creditor; in which Caſe the Court will order the Commiſſioners to enquire into the Nature of the Debt, and to certify the ſame to the Court; and if there is not a ſufficient Foundation for the Debt, the Court will ſuperſede it.

2dly, If the Party inſiſts he is no Trader, the Court uſually directs ſuch Facts to be tried; and if on ſuch Trial it appears to the Court that he is not a Trader, the Court will for ſuch Reaſons ſuperſede the Commiſſion.

3dly, If the Party againſt whom the Commiſſion is iſſued, appears to be an Infant, the Court, on full Proof of ſuch Infancy, will ſuperſede the Commiſſion.

4thly, If, after the iſſuing a Commiſſion, the Party makes a Satisfaction, or gives a ſufficient Security for performing it to all his Creditors, and they in Conſequence give him a Releaſe, theſe Motives, on Petition to the Court, will induce it to ſuperſede the Commiſſion.

5thly, If a Bankrupt conveys all his real Eſtate to Truſtees for the Benefit of his Creditors, and they accept of this Conveyance, the Court, in this Caſe, will order the Creditors to deliver up their Securities to the Bankrupt, and that the Bankrupt ſhall deliver up all the Title Deeds, and join in the Conveyances; and that the Truſtees ſhall proceed in the Truſt, and that the Bankrupt ſhall pay the Charges of the Commiſſion, deducting the Money out of the Aſſignees' Hands.

5 *Geo.* II. Fol. 128. 6thly, If a Bankrupt makes a private Agreement with his Creditor, and prevails on him to take out a Commiſſion, in Conſideration of being paid his whole Debt, or at leaſt more than the Reſt of his Creditors, the Court, on Proof made thereof, will order the Commiſſion to be ſuperſeded, and award a new one; and the Perſon receiving ſuch Goods, or Satisfaction, ſhall loſe his whole Debt and the Money received, and pay the ſame to ſuch Perſons as the Commiſſioners ſhall appoint, in Truſt for the Bankrupt's Creditors, in Proportion.

7thly, If a Perſon has not a Mind to be a Bankrupt, and is conſcious that he is no Trader, nor has committed any Act of Bankruptcy, or does not owe any Debt ſufficient whereon to ground a Commiſſion, he may, if he ſuppoſes a Commiſſion is going to be taken out againſt him, enter a Caveat in the Secretary's Office againſt it; or if it has iſſued, he may petition the Court that no ſuch Commiſſion may be executed againſt him, or that it may be ſuperſeded; and, upon hearing the Merits of ſuch a Petition, the Court in ſome Caſes determines the Point, and in other Caſes directs an Iſſue at Law to try the ſame.

8thly, If a Commiſſion taken out in an adverſe Manner is ſuperſeded, and the Party on the Trial is not found Bankrupt, the Court, according to the Nature of the Caſe, frequently will order Coſts to the Party againſt whom the Commiſſion is taken out, or may, if they think proper, aſſign over the Bond given to the Lord Chancellor.

Coſts of Commiſſions, how to be ſettled and paid.

5 *Geo.* II. C. 39. S. 25. THE Creditors who ſhall petition for a Commiſſion of Bankrupt, ſhall be obliged, at their own Coſts, to proſecute the ſame, until Aſſignees ſhall be choſen; and the Commiſſioners ſhall, at the Meeting appointed for the Choice of Aſſignees, aſcertain ſuch Coſts, and by Writing ſhall order the Aſſignees to reimburſe ſuch petitioning Creditors out of the firſt Effects of the Bankrupt that ſhall be got in; and every Creditor ſhall be at Liberty to prove his Debt without paying Contribution.

Ditto, S. 42. There ſhall not be paid out of the Eſtate of the Bankrupt any Monies for Expences in Eating or Drinking of the Commiſſioners, or of any other Perſons, at the Times of the Meeting of the Commiſſioners or Creditors; and no Schedule ſhall be annexed to any Deed of Aſſignment of the perſonal Eſtate of ſuch Bankrupt; and if any Commiſſioner ſhall order ſuch Expence to be made, or eat or drink at the Charge of the Creditors, or out of the Eſtate of ſuch Bankrupt, or receive above 20*s.* each Commiſſioner for each Meeting, every ſuch Commiſſioner ſhall be diſabled to act in any Commiſſion of Bankrupts.

Ditto, S. 46. All Bills of Fees or Diſburſements demanded by any Solicitor, employed under any Commiſſion of Bankrupt, ſhall be ſettled by one of the Maſters of Chancery; and the Maſter who ſhall ſettle ſuch Bill ſhall have for his Care in ſettling the ſame, as alſo for his Certificate thereof, 20*s.*

Concerning

Concerning the Duty of, and Remedy againſt Gaolers, where Bankrupts or Witneſſes are committed, and ſuffered to eſcape.

IN Caſe the Commiſſioners appointed in any Commiſſion of Bankruptcy, ſhould, in Virtue of their Power, commit the Bankrupt or any Perſon or Perſons to Priſon, for not conforming to the Acts relating to Bankrupts; and if the Gaoler or Keeper of the Priſon to which ſuch Bankrupt, Perſon, or Perſons ſhall be ſo committed, wilfully ſuffer ſuch Bankrupt, Perſon, or Perſons, to eſcape from ſuch Priſon, or to go without the Walls or Doors thereof, until he or they ſhall be duly diſcharged, ſuch Gaoler or Keeper ſhall, for ſuch his Offence, being duly convicted by Indictment or Information, forfeit five hundred Pounds, of lawful Money of *Great-Britain*, for the Uſe of the Creditors of ſuch Bankrupt. 5 *Geo.* II. C. 30. S. 18.

And the Gaoler or Keeper of ſuch Priſon as aforeſaid, ſhall, upon Requeſt of any Perſon, being a Creditor of ſuch Bankrupt, and having proved his Debt under the Commiſſion, and producing a Certificate thereof under the Hands of the Commiſſioners, which they are hereby required to give *gratis*, forthwith produce and ſhew ſuch Perſon or Perſons ſo committed as aforeſaid to any ſuch Creditor requeſting the ſame; and in Caſe ſuch Gaoler or Keeper of ſuch Priſon ſhall refuſe to ſhew, or ſhall not forthwith produce ſuch Perſon or Perſons ſo committed as aforeſaid, and being in his actual Cuſtody at the Time of ſuch Requeſt, to ſuch Creditor of the Bankrupt requeſting to ſee ſuch Perſon or Perſons committed as aforeſaid, ſuch Gaoler or Keeper of ſuch Priſon ſhall forfeit for ſuch his wilful Refuſal or Neglect, the Sum of 100*l.* of lawful Money of *Great-Britain*, for the Uſe of the Creditors of ſuch Bankrupt, to be recovered by Action of Debt in any of his Majeſty's Courts of Record at *Weſtminſter*, in the Name of the Creditor requeſting ſuch Sight of ſuch Priſoner. Ditto, S. 19.

And for every other ſuch Offence ſhall forfeit the Sum of 200*l.* for the Uſe of the Bankrupt's Creditors, as aforeſaid. 5 *Geo.* I. C. 24.

Concerning Privilege of Parliament.

BY Stat. 4 *Geo.* III. Cap. 36. the Stat. 5 *Geo.* II. Cap. 30. concerning Bankrupts is further continued to *September* 29, 1771, and from thence to the End of the then next Seſſion of Parliament. And with Reſpect to Perſons intitled to the Privilege of Parliament not paying their Debts, the following Act was made, intitled, 'An Act for preventing Inconveniences ariſing in Caſes of Merchants, and ſuch other Perſons as are within the Deſcription of the Statutes relating to Bankrupts, being intitled to Privilege of Parliament, and becoming inſolvent.'

Stat. 4 *Geo.* III. Cap. 33. Sect. 1. Whereas Merchants, Brokers, Factors, Scriveners, and Traders, within the Deſcription of the Statutes relating to Bankrupts, having Privilege of Parliament, are not compellable to pay their juſt Debts, or to become Bankrupts, by Reaſon of Freedom of their Perſons from Arreſt upon Civil Proceſs; and ſome Doubts have alſo ariſen, whether in Caſes of Bankruptcy, a Commiſſion can be ſued out during the Continuance of ſuch Privilege: To remedy which Inconveniences, and to ſupport the Honour and Dignity of Parliament, and good Faith and Credit in commercial Dealings, which require, that in ſuch Caſes, the Laws ſhould have their due Courſe, and that no ſuch Merchants, Bankers, Brokers, Factors, Scriveners, or Traders, in Caſe of actual Inſolvency, ſhould, by any Privilege whatever, be exempted from doing equal Juſtice to all their Creditors; be it enacted, *&c.* that from and after the 1ſt Day of *May*, 1764, it ſhall be lawful for any ſingle Creditor, or two or more Creditors, being Partners, whoſe Debt or Debts ſhall amount to 100*l.* or upwards, and for any two Creditors whoſe Debt ſhall amount to 150*l.* or upwards, or any three or more Creditors whoſe Debts ſhall amount to 200*l.* or upwards, of any Perſon or Perſons deemed a Merchant, Banker, Broker, Factor, Scrivener, or Trader or Traders, within the Deſcription of the Act of

Parliament relating to Bankrupts, having Privilege of Parliament, at any Time, upon Affidavit being made and filed on Record in any of his Majeſty's Courts at *Weſtminſter* by ſuch Creditor or Creditors, that ſuch Debt or Debts is or are juſtly due to him or them reſpectively, and that every ſuch Debtor, as he or they verily believe, is a Merchant, Banker, Broker, Factor, Scrivener, or Trader, within the Deſcription of the Statutes relating to Bankrupts, to ſue out of the ſame Court Summons, or any original Bill and Summons, againſt ſuch Merchant, Banker, Broker, Factor, Scrivener, or Trader, and ſerve him with a Copy thereof; and if ſuch Merchant, Banker, Broker, Factor, Scrivener, or Trader, ſhall not, within two Months after perſonal Service of ſuch Summons, Affidavit of the Debt or Debts having been duly made and filed as aforeſaid, pay, ſecure, or compound for, ſuch Debt or Debts, to the Satisfaction of ſuch Creditor or Creditors, or enter into a Bond in ſuch Sum, and with two ſuch ſufficient Sureties, as any of the Judges of that Court out of which ſuch Summons ſhall iſſue ſhall approve of, to pay ſuch Sum as ſhall be recovered in ſuch Action or Actions, together with ſuch Coſts as ſhall be given in the ſame, he ſhall be accounted and adjudged a Bankrupt from the Time of the Service of ſuch Summons; and any Creditor or Creditors may ſue out a Commiſſion againſt any ſuch Perſon, and proceed thereon in like Manner as againſt other Bankrupts.

Sect. 2. Provided always, and it is hereby declared, that this Act ſhall not extend, or be deemed or conſtrued to extend, to any ſuch Debt or Debts as aforeſaid contracted before the 8th Day of *March*, 1764; any Thing herein before contained to the contrary thereof in any wiſe notwithſtanding.

Sect. 3. And be it further enacted, by the Authority aforeſaid, that if any Merchant, Banker, Broker, Factor, Scrivener, or Trader, ſhall, after the laſt Day of this Seſſion of Parliament, commit any Act of Bankruptcy, that then, and in ſuch Caſe, any Creditor or Creditors as aforeſaid may ſue out a Commiſſion of Bankruptcy againſt any ſuch Merchant, Banker, Broker, Factor, Scrivener, or Trader; and the Commiſſioners in ſuch Commiſſion, and other Perſons, may proceed thereon in like Manner as againſt other Bankrupts; any Privilege of Parliament to the contrary notwithſtanding.

Sect. 4. Provided nevertheleſs, and be it enacted, that nothing in this Act ſhall ſubject any Perſon intitled to Privilege to be arreſted, or impriſoned during the Time of ſuch Privilege, except in Caſes made Felony by the Acts relating to Bankrupts, or any of them.

HAVING now made every neceſſary Remark on the Laws and Practice for and againſt an *Engliſh* Bankrupt, I ſhall add, how thoſe under ſuch unhappy Circumſtances are treated in *France* and *Holland*; as it may unfortunately happen for my Reader, that the Courſe of his Dealings may lead him into ſome unlucky Engagements with ſuch inſolvent Perſons; and it will then be natural for him to be deſirous of knowing how far the Laws of the Country will protect the Debtor from the Creditor's Suit, and what Steps theſe latter ought to take for the Securing or Recovery of their Property: In Order therefore to give my Reader this Satisfaction, I ſhall obſerve to him, that in *France* a conſiderable Diſtinction is made between a *Bankruptcy* and a *Failure*; the former being underſtood to be voluntarily and fraudulent, whilſt the other is ſuppoſed to be by Conſtraint and Neceſſity, cauſed always by ſome unforeſeen and unavoidable Accident; but as *Savary* has made a very juſt and nice Diſtinction between the Signification of theſe two Terms, I ſhall give my Reader the Senſe of his Obſervations thereon. He ſays, the Publick ſeldom makes the Difference it ought on theſe Occaſions, but confounds the Diſtinctions, which are in their Nature very apparent, and are made ſuch in all the King's Ordinances relative to thoſe Affairs. The Trader who has failed, or ſtopped by Reaſon of his Incapacity punctually to comply with his Notes of Hand, Bills due, or immediately to return the Money he had received for thoſe come back proteſted, and is obliged to this Demur by ſome unforeſeen Accident, or Loſs in Trade, and reduced to the Neceſſity of aſking Time of his Creditors for the Payment of the Whole, or what he can,

Parfait Negociant, P. 522.

of

of his Debts, is not to be placed on a Footing with the Bankrupt, who by Fraud and Treachery has ſecured to himſelf a Proviſion for Futurity, at the Expence of his Creditors, to whom he gives up the trifling Remains of his ranſacked Fortune in Payment of his Clearance; and though this Man's Villainy continues undiſcovered, he always remains infamous in the Eyes of the Publick; whilſt the other, who complies as far as he is able, is reſtored to Credit, though he continues incapable of enjoying any publick Poſt till the whole of his Debts are paid with Intereſt.

Although a Merchant be never ſo ſkilful and aſſiduous in his Buſineſs, though he keeps his Affairs under the beſt Regulation, and has ſet out in the World with a handſome Fortune; though he has obſerved all poſſible Application, and made Prudence his Guide in the Management of his Trade; and though he has omitted no Circumſtance that might naturally attract and ſecure Succeſs, yet if all is not accompanied by *good Luck*, he is not ſure to proſper in his Enterprize and Undertakings; for Fortune very frequently determines all contrary to Expectation, as ſhe is whimſical, and often favours the ſilly and ignorant, whilſt the beſt and moſt capable Men are experiencing her Frowns: This is what no one as yet has been able to account for; and Experience demonſtrates, that Miſfortunes are daily happening to Merchants, whoſe Probity, Expertneſs, Prudence, and Capacity, render them worthy of Compaſſion, and undeſerving this Reverſe of Fortune, that expoſes them to Miſery and Contempt. Though, ſeeing Men, who follow the moſt approved Maxims in their Buſineſs, do not always meet a correſpondent Succeſs, but on the contrary are expoſed to Miſhaps and Loſſes, or ſuppoſing them conſiderable Gainers by their Trade, and they have more than ſufficient to diſcharge their Debts, yet their Effects may undeſignedly be ſo diſperſed, that they may be incapacitated to anſwer an immediate Demand made by ſome inexorable Creditors, who will give no Quarter, or liſten to the Calls of Benevolence and Humanity; I ſay, ſeeing Men of Integrity are expoſed to theſe unjuſt Reſentments of uncompaſſionate Creditors, the *French* Laws have provided a Means, by granting Letters of Reſpite, or Arrets of Parliament, to protect them from theſe unrelenting Tempers; which I am now about mentioning.

Letters of Reſpite are always granted by the King, and *Arrets of general Protection* by the Parliament, and ſometimes by the King's Council, both tending to defend an honeſt Debtor from the Proſecutions of his Creditors, during the Term for which they are granted; and to allow him Time to liquidate his Effects, in Order to pay his Debts, or to agree with thoſe to whom he is indebted; and that he may obtain the ſaid Protection, he muſt ſtrictly obſerve and ſubmit to the King [*Lewis* XIV]'s. Ordinances of *Auguſt* 1669, and *March* 1673; and to his Majeſty's Declarations of the 23d of *December* 1699, and that of *September* 1664, which enjoin the following Particulars.

1ſt. *Letters of Reſpite* are never granted but on important Conſiderations, to begin with Proofs and authentick Accounts, which ought to be explained in the ſaid Letters, and affixed under the counter Seal; with a State of his Effects, which the *Grantee* muſt certify to be a true one, as well of his Moveables and Immoveables, as of Debts, under Pain of ſuffering the Penalties mentioned in the aforeſaid Ordinances; and he muſt take Care to be very exact herein, becauſe if he is found fraudulent in any one Particular he will forfeit the Protection of the ſaid Letters, although they have been granted peremptorily with all his Creditors, and he will not only be unable to procure others, but he ſhall not even after this be admitted to the Benefit of ceding or giving up his Effects to his Creditors, which is only denied to one convicted of Fraud and Deceit.

Dict. de Com- Word *Ceſſion*, p. 726. Vol. I. which ſee for Particulars.

2d. This State, ſo drawn up and certified, ought to be depoſited at the Regiſtry or Rolls of the Conſular Juriſdiction, if there is one at the Place of his, the Debtor's, Reſidence, if not, at the Town-Houſe; of which Depoſit he muſt take a Certificate, to be fixed to the Petition he preſents to the King, Council, or Parliament, for obtaining the *Letters of Reſpite* or *Protection*; and immediately after the Sealing and Expedition of the *Letters*, the *Grantee* ought to deliver into the Office, as well of the Judge to whom they are addreſſed, as that of the neareſt Conſular Juriſdiction, a Duplicate of that State, whoſe Truth has been ſo certified, of whoſe Depoſit he ought to procure Certificates from the

different Regiſters, and give a Copy to each of his Creditors, as well of the State as of the Certificates, at the Time of notifying the *Letters*, which are only valid in Regard of thoſe to whom a Copy has been given, and therefore he remains expoſed to the Proſecutions of them who have been forgotten or neglected in the Delivery of the ſaid Copies.

3dly. If he who obtains Letters is a Merchant, Banker, or Shopkeeper, he is obliged, beſides the Formalities before recited, and under the ſaid Penalties, to deliver into the Judge's Office to whom the Letters are addreſſed, his Books and Accouuts, of which he muſt take a Certificate from the Regiſter, and alſo give a Copy of it to each of his Creditors, when the Letters are notified to them; but previous to this Depoſit, he ought to ſhew them to his Creditors, that they may examine them if they pleaſe, and ſee whether the State of his Affairs delivered into the Office be a true one, and in all Reſpects conformable to his ſaid Books and Accounts; but he is not obliged to make this Offer till the Letters are notified, as it is only from the Moment of their Notification, that his Failure is eſteemed, known, or publiſhed, and that if he preſented his Books before having obtained and publiſhed the protecting Letters, his Creditors, knowing thereby the bad State of his Circumſtances, might Value themſelves on that Diſcovery, to make him Priſoner, even whilſt he was ſoliciting the Arret, which by this Means would be rendered unſerviceable, as the Violence offered him in the Arret could not be repaired by it, for Want of its having a retroactive Effect.

4thly. To enjoy the Benefit of the Time granted by the Letters, the Debtor ought to notify them to his Creditors, and others concerned in his Failure, who live in the ſame Place with him, in eight Days from their Date, but to thoſe reſiding at a Diſtance, to be counted from the eight, at one Day for every five Leagues; and, as was before obſerved, they only protect from the Suits of thoſe to whom they are intimated; not that the Omiſſion to notify them to ſome of the Creditors within the ſaid eight Days renders them null and void, but becauſe that in Regard to the Creditors neglected or forgotten, they are ineffectual till after their Notification; though the Vigilance which the other Creditors have uſed to preſerve the Effects of their common Debtor, is nevertheleſs equally ſerviceable to thoſe who are ignorant of the Letters, and to thoſe who have acted either by Oppoſition, or otherwiſe endeavoured to preſerve their Dues and make their Reaſons valid.

The Deſign of the Arret's being notified in eight Days from its Date, is to afford the Creditors an Opportunity of deducing and offering their Reaſons againſt it, if they have any; and that they may be admitted to make Proof of the Cheat, Fraud, and Knavery of their Debtor, if they ſuppoſe, and are capable of proving it; and it is not otherwiſe either reaſonable or juſt, that he who has obtained the Letters ſhould remain Maſter of the Time for notifying them, as he might greatly abuſe that Liberty, either by abſconding the beſt of his Effects, or making new Purchaſes, and then retiring with them into ſome foreign Part where his Creditors cannot reach him; and this he may eaſily do, if iniquitous enough to attempt it; as his Creditors not knowing that he was poſſeſſed of his Protection, and conſequently not ſuſpecting the bad State of his Affairs, would naturally take no Precaution to prevent either his Fraud or Flight.

5thly. A Merchant, after obtaining theſe Letters, is not at Liberty to pay any one Creditor in Preference to another; nor no longer Maſter, but a Depoſitary or Truſtee, of his Effects, which ought to be divided equally among them, and they participate of the bad Fortune of their common Debtor, without procuring an indirect and particular Advantage to any one of them; as this Preference is not only unjuſt and odious, but, if diſcovered, renders the Letters unprofitable to him that has obtained them, by their becoming null, for his having acted ſo contradictorily to the Intent and Purpoſe of them.

And beſides this Penalty ſo juſtly ordained againſt the Treachery of a Debtor, who, either through Inclination or Fear, ſo unequally treats his Creditors, to whom he owes an unbiaſſed Juſtice, and a Part of his remaining Effects proportionable to their Credits, the neglected or forgotten Creditors, and who have been only paid a Part, whilſt others have received their whole Debts, have a Right, if they have ſufficient Proofs, to demand a Drawback of as much as will be ſufficient to

putt hem all on a Level, according to the common Contract which has been regulated and agreed between them and their Debtor; for as the Ordinance diſpoſes, that thoſe Creditors who ſhall have received any Effects within a ſmall Space before a Bankruptcy, ſhall be obliged to reſtore them to the Stock; there is a much ſtronger Reaſon for their doing ſo who have received them after a Failure is become known and publick.

6thly. The Letters always order the Judge to whom they are directed, that in proceeding to their Accompliſhment, the Creditors being called, he give to the Grantee ſuch Time as he ſhall deem reaſonable for the Payment of his Debts; which however muſt not exceed five Years, except with the Conſent of two Thirds of the Hypothecated Creditors; and in the mean Time the Letters grant him ſix Month's Delay to ſolicit their Accompliſhment, during which Term the attempting his Perſon, or moveable Furniture ſerving his Uſe, is prohibited.

7thly. He cannot be excluded from obtaining the Arret under the Pretext of Renunciations, which he has or might make in paſt Acts and Contracts.

8thly. Thoſe who have obtained Letters of Reſpite, *&c.* cannot value on them when they are accuſed of Bankruptcy, when they are actual Priſoners, or that the Seal is put on their Effects.

9thly. Second Letters of Reſpite, or Arrets, are never granted, at leaſt without new and conſiderable Cauſes whereof he ought to make a Beginning with Teſtimonies and Proofs, as has been ſaid before.

10thly. There are many Caſes in which Letters of Reſpite, *&c.* are not to be obtained, *viz.* for Penſions, Aliments, Medicines, Houſe-hire, Crops of Corn, Servant's Wages, Hire of Workmen and Journeymen, Balances of Guardians' Accounts, neceſſary and voluntary Depoſits, Couzenage, Reparations, Damages and Intereſts adjudged in criminal Matters, Management of Publick Money, Bills of Exchange, Merchandizes ſeized at Marts, in Fairs, Markets, and publick Ports, Freſh-Water Fiſh, dry and ſalted, Securities judicial and extra-judicial, and of joint Bondſmen, Funeral Charges, Arrears of Ground-Rent, Obligations of Long Leaſes, Merchandizes and Effects bought of the *Eaſt-India* Company, or Things ſold of Uſe to it.

11thly. It muſt be remarked, that from the Moment the aforeſaid Letters are obtained and notified, the Grantee forfeits his Honour, and is thereby not only rendered incapable of aſpiring to any Poſt, or publick Employ, but is diſſeized of them all from that Period, if he is then in Poſſeſſion; and can only be reſtored to his loſt Credit and Reputation by Letters of Rehabitation, granted by the King, which places them in the ſame Condition with Regard to Honour, and Capacity of enjoying publick Employment, that they were in at the Time of their Miſfortunes; but theſe have never been obtained, as has been before obſerved, till their whole Debts are paid, with Intereſt; and under theſe Circumſtances they are ſometimes, though rarely, granted to Bankrupts alſo.

What I have ſaid concerning thoſe trading People, who have obtained Letters of Reſpite, or general Protection, will ſuffice to ſhew how far, and on what Conditions they are valid; and I ſhould now proceed to inform my Reader how thoſe Bankruptcies and Failures are treated in *France*, who have not been able, either through Surpriſe or Neglect, to obtain the ſaid Letters: But as the Wife's Fortune or Jointure is equally regarded under any of theſe Circumſtances, I ſhall mention the Proceedings thereabout, prior to the others, as the Knowledge of that Circumſtance makes a neceſſary Part of this Subject.

It is the Uſage and Cuſtom of ſome Places in that Kingdom, for Women on their Marriage with Men in Trade, to become Partners with their Huſbands for one-third or half the Fortunes they bring; except it is otherwiſe agreed in the Marriage Articles, and the Wife thereby expreſſly renounces the ſaid Uſe or Cuſtom; and ſuch Renunciations are regiſtered, and publiſhed, by fixing it in Writing to the publick View, at the Place of the Conſular Juriſdiction, if there be any there, if not, at the Town-Houſe, under the Penalty of its being null, as it is valid only from the Day of its Regiſtry and Publication; and that my Reader may judge of the Motives of the King's Ordinance enjoining this Circumſtance, he may pleaſe to obſerve that in Conſequence of the Copartnerſhip, the Woman, on the Huſband's

band's Failure, is obliged to come in as a Creditor in common with the others in this Manner, *viz.* Suppoſing ſhe brought a Fortune of 4000 Livres, the Half is put into the joint Stock, and the other Moiety ſecured to her own Uſe, by Marriage Articles, but remaining in the Huſband's Hands, and he failing, her 2000 Livres Stock ſinks with his, and ſhe comes in as a common Creditor, for the other 2000 Livres. On the contrary, a Woman renouncing the Copartnerſhip in the Manner above recited, and bringing 4000 Livres Dowry, generally has in Lieu of the expected Profits from Trade, a Sum, ſuppoſe 10,000 Livres, joined to her Fortune, and ſettled on her by Marriage Contract; and in Caſe the Huſband afterwards becomes a Bankrupt, ſhe is entitled to an equal Share of his Effects, with all his other Creditors, proportionable to the ſaid Sum, ſo that ſhe is greatly benefited by her Renunciation, in Caſe the Huſband proves unfortunate; but as the Publication of this Circumſtance was not formerly made obligatory, many People, knowing the Cuſtom of the Place, were drawn in to truſt a Man who had married a rich Woman, with much more than they would have done, had they been acquainted with her Renunciation; as they conjectured ſhe had greatly augmented his Stock, and conſequently that their Credit was well founded, and a Compliance from the Debtor would be both punctual and ſure; when, in Reality, the matrimonal Agreement was quite the Reverſe, and a Change of Circumſtances open to them the Fallacy of their Expectations, by expoſing the little Foundations they had to ſupport the Reaſon of what were only ideal and ill-grounded; and to avoid a Continuance of ſuch Deceptions, the King publiſhed the afore-mentioned *Arret* in *March* 1673, ſo that not one now can be impoſed on in this Matter except through Indolence, or wrong Information, but may take ſuch Steps in their Dealings with Traders under either of the aforeſaid Circumſtances, as they ſhall deem prudent, and not run any unwarrantable Lengths in their Credit, through a miſtaken Notion of a larger Fund for Payment than there truly is; and thus much I thought proper to mention on this Subject before I treated on the *French* Laws concerning *Bankruptcy* and *Failures*, where protecting Letters have not been obtained, which I ſhall now go through with as much Brevity as the Nature of the Thing will admit of.

It has been remarked, in a preceding Part of this Chapter, that from the Moment Letters of Reſpite, *&c.* are obtained and notified, the Grantee is deemed to have failed; and thoſe, whoſe unexpected Misfortunes have too ſuddenly reached them to leave Room for procuring ſuch a Safeguard, and obliged them to abſcond, their ſo doing, and the conſequent ſealing up of their Effects, by Order from the Judge, who has been petitioned ſo to do by ſome Creditor, is eſteemed a Declaration of their Stopping, or Failing; and as there is a Diſtinction made in all the King's Ordinances, before remarked, between the Man who has by a Chain of unhappy Events been reduced to theſe Diſtreſſes, and he who has brought them on himſelf through Debauchery or Deſign, I ſhall mention the Laws in Force, in Regard both to the one and the other, and begin with thoſe concerning the innocently unfortunate firſt, in whoſe Favour an Ordinance was made at *Paris*, the 12th of *March*, 1678, in the following Words, *viz.*

By Order of the King.

MONSIEUR the Provoſt of *Paris*, or Monſieur the Lieutenant Civil, upon what has been preſented to us, by the King's Attorney, that it has for ſome Months paſt been perceived, by the Requeſts that have been preſented us, that many Merchants, Bankers, and other Traders, have been obliged to retire from this City, and to abandon their Effects and Families, and have determined to know the true Cauſes of their Retreat, and examine whether it might be preſumed, that the Knavery and Deſign of committing fraudulent Bankruptcies had made them take that Reſolution, it has been found, that it has been more through ill Luck than Knavery; and that many foreign Bankers and Merchants, who have failed and broke, have carried away, and diverted large Sums, which were owing to the Bankers and Merchants of this and other Cities of the Realm, which has reduced and put them in a Condition, not to have ready Money ſufficient to

acquit the Bills of Exchange, daily falling due, although they have more, or as much in Effects, as in Debts: And as it is juſt, ſeverely to puniſh fraudulent Bankruptcies, according to the Rigour of the Ordinances, it is not leſs ſo to hinder that Merchants and Bankers who have truſted their Money with Strangers, under the good Faith or Credit of Trade, ſhould not be treated in the ſame Manner as if they had committed a Cheat; and that their precipitated Abſence to avoid a Priſon, and the conſequent Charges hindering their Return to Trade, and Reeſtabliſhment of their Credit, require that ſome Proviſion be made in it. And we, having Regard to the Requeſt of the King's Attorney, do ordain, that all Merchants, Traders, Bankers, and others, concerned in Commerce, who, without Fraud, find themſelves in a Condition unable to diſcharge their Debts, whether for Bills of Exchange or otherwiſe, by Reaſon of the Loſſes they have met with, may appear before us by Petition, to which they ſhall tack Duplicates of two Accounts, which they ſhall ſign and affirm to be true; the one of the Value of their Effects, and the other of their Debts; in Virtue of the Ordinance which ſhall be put at the Bottom of the Petition, they ſhall ſummon all their Creditors the following Day to appear before us, to agree among themſelves, or two Merchants, or other Perſons they know, who ſhall examine the Accounts, and make a ſummary Inventory, and value and appraiſe their Effects, in an amicable Manner; and to agree together on the Terms and Times of Payments, and Remiſſes if any are made, and ſell the ſaid Effects in a friendly Way, if poſſible; and after having heard the Merchants which ſhall have been named, proceed to the Confirmation of the Contract, which ſhall have been paſſed, in all Things appertaining to it, the Whole without Expence or Application of the Seal, though without Prejudice to the Creditors, who ſhall become Accuſers of a fraudulent Bankruptcy, and to the King's Attorney to proſecute extraordinarily, and demand the Sealing of the Effects of thoſe who ſhall have abſented themſelves, or become Bankrupts, embezzled, hid, and concealed their Effects in Prejudice to their Creditors, upon which Petition let Juſtice be done. And the preſent Ordinance ſhall be read, publiſhed, and affixed, where Need ſhall be, *&c.*

And in Conſequence of this Ordinance, a Merchant who finds himſelf in the unhappy Situation it treats of, and, to avoid the Violence which ſome of his Creditors may offer him, has abſconded, if prudently adviſed, will by ſome Friend ſolicit a ſafe Conduct from them for fifteen Days, or a Month, that he may appear and render an Account of his Actions; and after having obtained it from the greateſt Part, if there is any one who refuſes to ſign it, he ought, before diſcovering himſelf, to petition the Judge and Conſuls, or other Royal Judges, or even the Parliament; and it would be ſtill better, in order to evitate all Tricks and Shifts, to ſolicit the Confirmation with thoſe who have ſigned, and a Permiſſion to ſummon the Refuſers for to decree and ordain, that it ſhall be allowed by them, and in the mean Time they ſhall be prohibited attempting his Perſon or Effects; upon which Petition a Sentence or Arret will be given, granting his Demands; the which being carried to the Regiſtry, it ought to be noted to the diſſenting Creditors as ſoon as poſſible.

If all the Creditors are not reſident in the ſame Place with him, but ſeveral of them in other Towns of the Realm, he muſt write them to come, or ſend their Procuration to ſome one of their Friends to attend the Aſſemblies of the Creditors who are preſent, that they may have no Reaſon to complain of him. The ſecond Thing this unfortunate Trader ought to do on his Return Home, if he has the Seal put on his Goods and Effects, is to requeſt the taking it off in an amicable Manner; but if this is refuſed, it muſt be ordained by the Authority of Juſtice. And the third Thing is, that from the Moment he receives his Books again, he muſt make out a general State of all his Effects, as well what he owes as what is due to him, to deliver to his Creditors, when they aſſemble to examine his Affairs; and this is in Conformity with the ſecond Article of the Eleventh Title of the Ordinance in 1673.

Having drawn out his Accounts in the moſt exact Manner, he muſt put the following Certificate at the Bottom of them, *viz.*

I The underwritten do certify to all whom it may concern, that the State here above of all my Effects, as well Debtor as Creditor, contains the Truth; and that I have not omitted any Thing, or made Uſe of any Perſons, or Names in it, that are not my true and lawful Creditors; in Faith of which I have ſigned the Preſent, the 29th of May, 1750.

And it is not ſufficient that he has drawn out this State, but he muſt alſo ſtrike a Balance for the greater Eaſe of his Creditors, that they may ſee with a Caſt of an Eye the Truth of his Affairs, and what they have to expect; and he muſt likewiſe put underneath the ſaid State, an Account of all the Loſſes that have happened to him, whether by Shipping, Bankruptcies, or otherwiſe, the Intereſts that he has paid, and his Houſe Expences, that he may juſtify his Conduct to his Creditors, in Caſe he has not Effects ſufficient to pay them their whole Due, that they may have nothing to reproach him with.

When he is ready to render this Account to his Creditors, of his Conduct and their Eſtate, he muſt convoke an Aſſembly of them, by Summons ſent in Writing to each of them, and being all met, his Behaviour to them ought to be free from Affectation, either of too great Dejection or Arrogance, but with ſuch Concern and Humility as a juſt Reflection of his Circumſtances will naturally excite; and although ſome of them ſhould ſo far degenerate from Reaſon and good Manners as to be abuſive and ſlanderous in their Treatment of him, it ought not to exaſperate him to make correſpondent Returns; but command his Paſſion, by reflecting that it is not every one has Philoſophy enough to bear Loſſes with Temper and Equality of Mind; and it is probable what they ſuffer by him, though he could not help it, may reduce them to the ſame Condition with himſelf; therefore Allowances ought to be made, and no injurious Language returned from the unhappy Sufferer, though ſuch a Shock is certainly not the leaſt of his Misfortunes; however, he ought to ſubmit without murmuring; and, together with the State of his Affairs, he ought to deliver the Creditors his Books, that they may compare the one with the other; but in Caſe no one will take them under his Care, the Inſolvent may then deliver them into the Regiſtry, as was before ordered to be done, by thoſe who had procured Letters of Reſpite, *&c.*

At the firſt Meeting of the Creditors there is ſeldom much done, the greateſt Part of the Time being generally employed in Complaints and Injuries againſt the Failed; and, at moſt, Directors or Aſſignees are choſen to take Care of the common Intereſt of the Creditors, to ſee and examine the Books and Papers of the Debtor, and to fix the Days of Meeting to conſult about the Affair.

It is to be remarked, that while this is tranſacting, each Creditor in particular endeavours, as much as he can, to get himſelf paid the full of his Debt; the Engagement in which he ſtands with his Debtor, renders him ingenious and fertile in Inventions to incline him to conſent to his Demand; one by threatening to proſecute him as a fraudulent Bankrupt, and aſſerting that it will not be difficult to bring Proof of his Knavery; another menaces him with his Determination of hindering his Compoſition by his Influence and Intereſt; whilſt a third flatters and careſſes him, laments his Misfortunes, and affecting a Generoſity, offers him his Purſe, proteſts never to forſake him, that he may depend on his uſing all his Induſtry and Power to facilitate his Accommodation, that it is unreaſonable he ſhould be deſpoiled of all his Effects, and heartily pities both him and his Family; in fine, he makes Uſe of every ſoft and coaxing Expreſſion which he thinks may influence his Debtor, and incline him to diſtinguiſh this Flatterer from the Reſt of his Creditors, by ſatisfying him at their Expence. But if unable to prevail, and the Lamb's Skin has been of no Service to him, he quickly puts on the Lion's, and there are no Sorts of Threats or Injuries he leaves unuſed to the unhappy Debtor, who, combated by Hopes and Fears, ſometimes falls into the Snares laid for him, and quits thoſe juſt Rules of putting all his Creditors on the ſame Footing, and by ſo doing, completes his own Ruin; for the Fawnings and Menaces of Creditors can in no Shape operate to the Prejudice of an honeſt Bankrupt, who has punctually

punctually rendered an exact Account of his Conduct and Affairs as the Law directs.

But having hitherto only mentioned the Duty of the Debtor, I ſhall proceed to hint the Obligation of the Creditors; and the firſt Step they ought to take when aſſembled about their common Affairs, is to elect ſome among them for Aſſignees by the Plurality of Votes, who are Men of Probity and Capacity, to ſee and examine the State of their Debtor's Affairs, and to make their Report about them; and that they may proceed with the greater Order and Regularity, if the Failure is very conſiderable, it is adviſable that they chuſe a Notary to receive the Acts of the Creditors' Deliberations, and for this it is neceſſary to aſſign the Place, and Days of their Meeting, that no one may pretend Ignorance; and for the Security of thoſe elected, the Act of their Nomination ought to be approved and confirmed by the conſular Juriſdiction, if there is one, or in the Royal, or in the Parliaments if there is any in the Town or City where the Failure has happened.

The Power which the Creditors ordinarily gave to the Aſſignees, is

1ſt, To proceed in taking off the Seal, if it has been put on.

2d, To deſcribe and inventory all the Debtor's Effects, as well active as paſſive, which ſhall be found belonging to him; and alſo his Books, Letters, and other Papers and Inſtructions which can ſerve to the Eclairciſſement of his Affairs.

3dly, To ſee and examine the State which he ſhall have given in, in his Books and Accounts, and whether they have been regularly kept according to the Ordinance.

4thly, To ſell the Merchandize and Houſehold Goods of the Bankrupt, and pay the Money into the Hands of the Notary that ſhall have been choſen, or to any other that the Creditors ſhall direct.

5thly, To recover all the Debts, and to undertake all the neceſſary Proceedings towards it.

6thly, To examine the Tranſactions, Contracts of Compoſition, Bonds, Promiſſory Notes, Bills of Exchange, and other Proofs of thoſe who pretend themſelves Creditors of the Failed: From all which Things to make a good and faithful Report to the general Aſſembly of Creditors, which ſhall meet for that Intent.

And the Aſſignees of a Failure ought to obſerve the folllowing Maxims:

1ſt, They ought never to abuſe the Authority given them by the Creditors, in favouring the Bankrupt to their Prejudice, from a Motive of private Intereſt, as this would be wanting in that Honeſty which ought religiouſly to be obſerved by thoſe who are charged with the Management of joint Affairs.

2dly, As it often happens that the Creditors of a Bankrupt are not all Inhabitants of the Town of his Reſidence, but of ſeveral others in the Kingdom, who deſire their Friends to aſſiſt at the Aſſemblies, only to ſee what paſſes, without a Power of engaging them in the Reſolutions of the Creditors: This Maxim ought to be obſerved; *never to admit any one to their Meetings who are not Bearers of ſpecial Powers, for Conſent; and agreeing to all that ſhall be deliberated and done by Plurality of Votes; though this Plurality is not to be counted by the Number of Perſons, but the Import of their Debts; or in other Words, not by Number but Value, and the Creditors to whom three Fourths of the whole is owing, ſhall decide this and every other controverted Affair.*

3dly, The Aſſignees having got their Power authoriſed in the accuſtomary Manner, ought in the firſt Place to take with the Commiſſary a Copy of all the Opponents to what is ſealed of the Failure, and to make them aſſign a certain Day and Hour in his Houſe, for to come and ſee, and conſent to the taking it off; and whereas in theſe Meetings, each Opponent has his Attorney, ſo that ſometimes there may be thirty of them, it ought to be ſettled and ordained, that the ancienteſt ſhall plead for all the Opponents, in Order to evitate the great Expences that would otherwiſe occur, from each Opponent's having one to plead for him.

4thly, If, on inventorying, any Creditor claims the Merchandize that he ſhould have ſold to the Debtor he muſt give a Deſcription of it, as well in Reſpect to the Quality, as of the Quantity and Colours, whether both Ends are uncut, and the

Lead untouched whereon is imprinted the Mark and Tickett on which is wrote the Name of the Reclaimant, and which gives him a Right to the pretended Return; this being the Cuſtom always practiſed and obſerved on ſuch Occaſions, in Order to prevent unhappy Conteſts, which might ruin both the Debtor and Creditor in Expences.

5thly, The Inventory and Deſcription of the Merchandizes, Houſehold Goods, and Papers appertaining to the Failed being made, the Aſſignees ought diligently to ſee and examine the Books and Entries of the Bankrupt, in Order to find out whether the State which he has given in be conformable to them, before they proceed to the Sale; and they ſhould make a Calculation as near as poſſible of the Value of his Effects, which they ſhould report to the Creditors at the next Aſſembly, that it may there be diſcuſſed, whether it will be moſt for their Intereſt to put the Effects into the Debtor's Hands, under proper Clauſes and Conditions, or to diſpoſe of them entirely, and part their Produce among them.

6thly, But before they proceed to the ſaid Deliberation, the Debtor ought to juſtify his Conduct to them, and clearly prove how his Loſſes have ariſen; as it would be imprudent to truſt a Man with the Management of their Affairs, by returning him his Goods, of whoſe Integrity they ſhould have the leaſt Suſpicion.

7thly, After having examined the Conduct of the Debtor, they ought alſo ſtrictly to ſcrutinize the Pretenſions of every Creditor, to ſee that their Demands are juſt, as on theſe occaſions Tricks and Cheats are too frequent.

8thly, In examining the Books and Papers, the Aſſignees ſhould carefully remark, whether the Bankrupt has not made any illegal Sales or Ceſſions of his Effects; which becomes ſo, if they are not tranſacted at leaſt ten Days before the Failure is publickly known, and all Agreements or Conveyances whatſoever, made or done within theſe Limits, become null and void by all the King's Ordinances; although all the Acts and Obligations of them are paſt before a Notary Publick, and the Effects ſhall return again to the Stock, and be divided with it among his Creditors.

9thly, After the Aſſignees have exactly perſormed all Things before-mentioned, and made the neceſſary Remarks upon the Vouchers and Evidences concerning the Debt of each Creditor, they ought to draw out an exact Balance of all the Effects, in Order to give the Creditors an Inſight into the Debtor's Affairs, and thereby make them capable of judging how to act moſt for their mutual Benefit, and to determine whether it would be moſt advantageous for them to return him all, and wait a reaſonable Time for the Recovery of their entire Dues, or to adjuſt the Payment with a certain Loſs, or to ſell all and divide the Produce.

And the preſenting the ſaid Balance to the Aſſembly, which the Aſſignees ſhall convoke for that Purpoſe, ought to be done by the moſt capable among them for explaining it; and he ought to be ſo circumſpect in his Behaviour on the Occaſion, as to give no Offence by exclaiming againſt either the Bankrupt or any of the Creditors, for either real or imaginary Offences, as this is contrary to the Rules both of Prudence and good Manners; for theſe Complaints ſhould only be made to the ſuppoſed Offenders by themſelves, and not in a general Aſſembly, it being ſcandalous and may move the Paſſions of ſome, who may not have all the Honeſty and Civility that could be wiſhed, to be influenced by the Outcry and unreaſonable Violence, to turn the Meeting into a Crowd and Rout, and fruſtrate the Deſign of their aſſembling, by diſperſing them with Noiſe without coming to any Reſolution.

If it is judged neceſſary by a Majority of the Creditors to appoint ſome one to recover Debts that may appear to be in Danger, it is lawful for them to do it proviſionally, notwithſtanding any Oppoſition or Appeal by the fewer Number; and it is equally conformable to the King's Ordinances, to pay off any Mortgage or Rent-Charge, as theſe carry Intereſt, with the ready Money that ſhall be found in Caſh, although the Minority ſhould be againſt it; and this Minority is always to be underſtood not to exceed one Fourth Part of the Creditors in Value, ſo that when three Fourths of them conſent to any thing, the Oppoſition of the one Fourth is not to be regarded.

What has been ſaid hitherto, only regards the Perſon who breaks through adventitious Loſſes and Misfortunes, and who conſequently merits the charitable Attention of his Creditors; and I proceed to ſpeak of the Treatment that the fraudulent *French* Bankrupt has to expect from the Laws of his Country, and every one unhappily concerned with him.

The Bankrupt, who becomes ſo with the premeditated Intention to cheat, and unjuſtly riſe up with the Effects of thoſe who have truſted him, deſerves not only the Averſion of all his Creditors, but of the Publick, and merits an exemplary Puniſhment; a fraudulent Bankrupt being worſe and more infamous than a High-way Robber, as Travellers generally go provided to defend themſelves from theſe latter, though it is not ſo eaſy to guard againſt an Attack from the malicious Deſigns of ill-intentioned Men.

The fraudulent Bankrupts are *thoſe* who embezzle and convey away their Effects to feigned Creditors, that by their Means they may bring their real ones to greater Conceſſions, and benefit themſelves by the Sums thus iniquitouſly obtained; *thoſe* who put their Effects under Cover of fictitious Names, by falſe Sales of their Eſtates or Goods, and by pretended Ceſſions, or Conveyances of them; in fine, *thoſe* who deſtroy or hide their Books, Records, Papers, or Documents, to hinder an Account of their Effects from coming to the Knowledge of their Creditors, muſt alſo be reputed and counted among the Number of fraudulent Bankrupts.

There is nothing ſo pernicious or dangerous to the State and Publick, as fraudulent Bankrupts; for which Reaſon, a Puniſhment ſufficiently ſevere, and adequate to the Crime, is hardly yet diſcovered; notwithſtanding there are many Ordinances ſubſiſting, which decree exemplary Chaſtiſements to thoſe who maliciouſly, and in Fraud of their Creditors, become Bankrupts, though till the Time of *Henry* IV. this Crime was not puniſhable with Death; but the Frequency of it in that Prince's Reign, induced him to change the more lenitive Laws of his Predeceſſors, into the ſevere one now mentioned.

Of Bankruptcy in Holland.

EXPERIENCE daily demonſtrates that it is in Places of the greateſt Commerce that Failures and Bankruptcies moſt frequently happen; and the Reaſon is not difficult to be diſcovered, as it is clear that among a great Number of Merchants, it would be a Sort of Miracle if all of them were equally ſucceſsful in their Enterprizes; if it were otherwiſe, to commence Merchant, and lay a Foundation for Riches and Proſperity, would be the ſame Thing. But God has ſo diſpoſed the Affairs of this World, that we often ſee one Merchant ruined and undone by the ſame Trade which has enriched another; and on the contrary, that Traffick which has been productive of great Wealth to ſome, has proved ruinous and deſtructive to the Eſtates and Fortunes of others. But not to dwell on theſe Reflections, I ſhall mention the Diſtinction made here between two Sorts of Bankruptcies, Failures, or Breakings, which are three ſynonimous Words, and though they frequently expreſs the ſame Thing, the one however is more ſoft, and leſs heavy or burthenſome than the other; for the Name of a Bankrupt is opprobrious and odious to all honeſt Men, and is only applied to thoſe who become ſo to enrich themſelves at their Creditors' Expence, or thoſe who give Room to ſuſpect the Honeſty of their Intentions, when they ſtop lightly, or for trivial Cauſes; inſtead of its being only ſaid that ſuch a one has been unfortunate, or had the Misfortune to break, when it is ſeen that he is reduced by inſupportable Loſſes, which every honeſt Man is expoſed to, by a great Number of unforeſeen Accidents; but if he deſigns always to continue his Integrity, and not wound his Conſcience in detaining for himſelf his remanent Effects, which are juſtly his Creditors', he will make no Difficulty to deliver them up his Books, to communicate to them the true State of his Affairs, and to commit himſelf to their Mercy and Diſcretion.

So that in my Opinion the Chamber of the deſolate Funds, called in *Dutch, de Kamer van de deſolate Boedels*, which we have in this City, *Amſterdam*, was not eſtabliſhed for this laſt Sort of Perſons, but with the ſole View to prevent the

Knavery of thoſe who in Breaking would detain to themſelves the greateſt Part of the Effects they poſſeſs, and fruſtrate their Creditors' Endeavours to ſecure them; for when an honeſt Man has the Misfortune to fail, he makes no Difficulty of declaring it to his Creditors, and frankly to communicate the State of his Circumſtances and Effects; and if his Creditors find that the Loſſes and Diſaſters which he alledges to have been the Occaſion of his Stopping are true, and that his Integrity ſtands unimpeached, they frequently agree on Terms ſettled among themſelves, leaving him ſomething wherewith to endeavour his Re-eſtabliſhment; but if it happens that any of the Creditors refuſe to ſign this Agreement, he is obliged to declare his Affairs at the Chamber afore-mentioned, which, after the Formalities in the following Ordinance, will oblige the Refuſants to ſubſcribe the Agreement, if it has been ſettled between the Inſolvent and two Thirds of the Creditors for three Quarters of the Debt, or three Quarters of the Creditors for two Thirds of the Debt, as will be ſeen in the ſubſequent Ordinance.

Inſtructions and Orders for the Commiſſioners of the deſolated or ruined Eſtates.

THE *States of Holland and Weſt-Friſe* make known, that it has been remonſtrated to us by the Burgo-maſters and Regents of the City of *Amſterdam*, that they thought proper, ſome Years ago, to eſtabliſh in the ſaid City a Chamber for the deſolate Eſtates, under certain Regulations, as was then convenient; that they, the Remonſtrants, having ſeen ſuch abundant Fruits and good Effects, that they were in the Deſign, not only to continue it, but were deſirous alſo to provide for it by a more particular and ample Ordinance, drawn up on a Plan which the Commiſſioners of the ſaid Chamber have made, and which they have found to be advantageous and neceſſary, by the Experience they have had, according to the Terms of the Copy which has been delivered us, and hereafter inſerted; that to the End ſo good a Work might have a greater Force and Virtue, the Remonſtrants have prayed, that we would be pleaſed to give our Approbation and Grant, in the beſt and moſt ample Form, containing the ſaid Inſtructions and Order as follow:

I.

In the firſt Place, there ſhall be yearly appointed, on the 4th of *February*, by the Lord Juſtices, five fit Perſons, for the Direction of the Chamber, of which two ſhall be taken from among the old *Echivens*, which I think may be tranſlated *Aldermen*, and the others to be expert in Trade.

II.

Of theſe Commiſſioners there ſhall be at leaſt two continued for three ſucceſſive Years, but not for any longer Time; and touching the Election and Continuation of others, it ſhall be done as is cuſtomary in the other Banks and Chambers directed by Commiſſioners.

III.

The ſaid Commiſſioners ſhall aſſemble daily to attend all the Affairs which may happen in Relation to the inſolvent Funds or Eſtates.

IV.

When there are any inſolvent Eſtates in the ſaid City, or its Juriſdiction, either by Death, or Failure of ſome Perſon, and that it ſhall have come to the Knowledge of the ſaid Commiſſioners, they ſhall immediately go with their Secretary, who ſhall be ordered thereto, and in their Preſence, or others appointed thereto, exactly inventory all the Effects, and put them in good and ſafe Cuſtody, to the Creditors' greater Advantage, and as they judge they ought to be; they ſhall alſo ſecure, without Delay, the Books and Papers appertaining to the ſaid Eſtates.

V.

The Effects being ſo inventoried and ſecured, with the Books and Papers, they ſhall give Order, that two or more Perſons be appointed Truſtees of the ſaid Funds, who by Letters or Expreſs, if it is neceſſary, ſhall endeavour to ſecure all the Eſtates, Effects, and Debts, belonging to the ſaid Funds, whether within or without the Juriſdiction of that City, or of this Country.

VI.

This being done, there ſhall be let paſs at leaſt ſix Weeks, or more, at the Diſcretion of the Commiſſioners, without proceeding to the Sale of any of the Effects; but the ſame Time ſhall be left to the inſolvent Perſon, or to the Relations of the deceaſed, to the End that in the ſaid Space, they may find ſome Method to ſettle with the Creditors; nevertheleſs the ſaid Truſtees ſhall be uſing their Endeavours during that Time to recover whatſoever is due to the Inſolvent, and to procure and promote the Creditors' Advantage.

VII.

And to the End that in ſuch Compoſitions every Thing be done in Order, all Merchants or others who have already failed, or become inſolvent, or that ſhall hereafter fail or become inſolvent, and their Heirs, may convoke or ſummon all their Creditors before the Chamber of the deſolate Funds, by Citation of Bills fixed up, or by Letters of Advice to thoſe who live without the Diſtrict of this City; and that in Preſence of the ſaid Commiſſioners, or the greateſt Part of them, they may, after a ſincere Opening and Declaration of the State and Condition of their Stock, as alſo a true State of their Debts and Dues, undertake and draw up a Commiſſion or Agreement, for the Payment of what they owe, totally, or in Part, in ready Money, or in ſuch a Time, giving Security, as they are able, and that the Parties ſhall think reaſonable.

VII.

And the Minority of the Creditors ſhall be obliged to follow and conform themſelves to the Majority; the which ſhall be three Quarters of the Creditors for two Thirds of the Debt, or two Thirds of the Creditors for three Quarters of the Debt.

IX.

But thoſe who have Securities or Pledges, ſhall not be admitted to the Agreement; but only thoſe who have been Securities, who alone ſhall have a perſonal Action for their Indemnity, and the ſame Right, and of the ſame Nature with perſonal Creditors.

X.

All thoſe who pretend to be Creditors of an inſolvent Eſtate, ſhall alſo be obliged to juſtify their Debts before the Commiſſioners of the deſolate Funds, who in Caſe of Diſpute ſhall determine it, whether the Failed has agreed or not.

XI.

No Agreement begun between the Failed, or any one on his Part, and the Creditors ſhall be made nor concluded, but with the ſaid Commiſſioners' Conſent.

XII.

The Agreement between the Inſolvents, or their Heirs, on the one Part, and their Creditors on the other, being made under ſufficient Security, and ſigned by the

the Creditors, or the greateſt Part of them; the Parties agreed, and their Effects, ſhall be diſcharged from the ſaid Chamber, and reſtored to their former Liberty, to trade, receive, and pay, in the ſame Manner as before their Failure, after paying the ſaid Commiſſioners all the Expences occaſioned on Account of their ſaid Affairs, at their Diſcretion; ſo that in the mean Time they ſhall not ſatisfy any one of their Creditors to the Prejudice of the others, under Penalty of forfeiting the ſaid Agreement.

XIII.

And the Failed and his Securities ſhall be obliged to furniſh and put into the ſaid Commiſſioners' Hands, as ſoon as the Agreement ſhall have been paſſed as aforeſaid, on the Day and on the Terms therein contained, for the Security and Advantage of the Creditors, the Sums they ſhall have promiſed, *pro rata*, of what they owe, to the End that the ſaid Creditors may receive their Sum from the ſaid Commiſſioners when they ſhall come to ſign the Agreement.

XIV.

Nevertheleſs, if it is found that the Inſolvent or his Heirs have acted knaviſhly and fraudulently, in, or after making the Compoſition, either by having hid his Books, Letters, or Papers, removed their Effects, Merchandiſes, or Debts, conveying them away to defraud their Creditors; or that they have underhand agreed with ſome one of the Creditors on other Conditions: Such ſhall not only have their Agreement ſet aſide, but ſhall be corrected and puniſhed according as the Caſe requires.

XV.

And thoſe who ſhall pretend to be, and make themſelves paſs for Creditors, without being ſo, by an Underſtanding with the Inſolvents, or from their own Motive, againſt their Knowledge, or that demand a greater Sum than their Due, in order to wrong the Creditors, and Benefit the Inſolvent, they ſhall be puniſhed as Cheats, and beſides be condemned to pay, as their own Debt, all the Creditors.

XVI.

The aforeſaid Time of ſix Weeks, or more, at the Commiſſioners' Diſcretion, being paſt, without their having been able to mediate an Agreement, the Truſtees ſhall proceed directly to the Sale of the Effects, as well moveable as immoveable, as alſo the Stocks and Credits, provided that the Immoveables are not ſold without the Conſent of the Echevins, and between the 1ſt of *November*, and the 2d of *February*, *dans les douze Nuits*. But the Merchandizes, Furniture, and other Effects, may be ſold publickly, and at Auction, at the Diſcretion of the ſaid Commiſſioners, without Prejudice to the Rights of the Secretaries and Keeper. But in Caſe there ſhould be among the Effects ſome Merchandize, which it ſhould be thought proper to keep for ſome Time unſold, either upon Account of an apparent Riſe or Price, or for ſome other Reaſon alledged by the Truſtees to the Commiſſioners, then the Sale of the ſaid Merchandize, may be retarded for ſome Time, but not otherwiſe.

XVII.

All this being performed, the Commiſſioners ſhall appoint a Day for their Sitting on the Acts of Preference and Concurrence, by which Day all the known Creditors inhabiting this City ſhall be ſummoned by the uſual Citation, thoſe Abroad by Letters of Advice, and the unknown by Bills fixed up; with a convenient Interval of Time, to the End that on the ſaid Day they may come to give in their Names and their Acts of Pretenſion, whether they be for a Preference or Concurrence.

XVIII.

The fixed Day being come, the Commiſſioners ſhall firſt proceed to examine the Debt, and the Preference of every one of the Creditors preſent, who ſhall endeavour to agree on this Subject: If this cannot be done, the Creditors, who cannot agree together, ſhall each be ordered to deliver into the Commiſſioners' Hands, in the Space of fourteen Days, according to the State of Affairs, a diſtinct Demand, with the neceſſary Pieces and Documents properly inventoried, on Penalty, that if, in the aforeſaid Time, any one ſhall be found that has not furniſhed the ſaid Demand, he ſhall be held and regarded as deſiſting from his Pretenſion, and Right ſhall only be made on the Demand, and on the Evidences delivered by the other Pretenders: Thoſe alſo, who in the ſaid fourteen Days have furniſhed their Inſtruments and Proofs, may demand, in other fourteen Days after, a Copy of the Pretenſions and Deeds of every one of thoſe who have produced them, to the End that in other fourteen Days following, they may write to debate and contradict, without allowing any longer Time for it; but after the ſaid Time of twice fourteen Days, the Thing ſhall be held to be in a Condition to be judged, and the Commiſſioners ſhall decree upon the Inſtruments which ſhall be till then delivered.

XIX.

The Preference being regulated and determined, thoſe who think themſelves aggrieved thereby, may appeal in ten Days after the Publication, or after they have had Knowledge of it, to the *Eſchevins*, in Conformity with the thirteenth Article of the eighteenth Chapter of the Ordinance, and the Inſtruments ſhall remain in the Secretary's Hands until the ſaid Time is paſt, or till the Appeal is renounced; ſo that the Impetrant, or Petitioner, muſt, after having receiced Appointment from the Auditor, diſpoſe ſo, that they be put, all perfect and concluded, in ten Days after the Demand, into the *Eſchevin's* Hand, to be adjudged *ex iiſdem actis* A BENE VEL MALE, under Penalty of a Nonſuit, or dropping the Appeal; and the Sentence of the *Eſchevins* ſhall be proviſionally executed, without Diminution, and without Prejudice of more ample Pleadings.

XX.

The Commiſſioners ſhall afterwards proceed to a Repartition, without attending that all the Money be fallen due or come in; but thoſe who are to be preferred to others ſhall be admitted, in Order to receive their Debt, on giving an Acquittance and Security, or elſe on receiving it from the Hands of the Commiſſioners, according to the State of the Affairs of the Effects; and the remaining Money ſhall be diſtributed and paid to the other Creditors *pro rata*, under a parallel Security, which ſhall be given in the Secretary's Office. Nevertheleſs the Creditors, who in Right, as ſhall be found in the Sequel, ought to be firſt, as alſo thoſe who have not been able to learn the Settling of the Preference and Concurrence ſoon enough, may demand a freſh Day to appear in, to the End that they may be heard, at their Expenſe, on the Preference and Concurrence.

XXI.

If a Tenant of any Houſe he inhabits, happens to fail between the Month of *May* and the firſt of *December*, in this Caſe the Proprietor, or he that let the Houſe, ſhall retake it for the Years the Leaſe has yet to run, and ſo diſcharge the Eſtate; ſo that he ſhall only have the Right of Preference upon the Effects which ſhall be found in Kind in the Houſe, for the Hire of the current and preceding Year, and for no longer; and for what might be due to him before that Time, he ſhall equally concur with the other Creditors.

XXII.

But the Failure happening between the firſt of *December* and the Month of *May* following, the Rent ſhall remain for Account of the deſolate Funds for a Year, commencing from the Month of *May*, except the Proprietor ſhall think proper to retake upon him the ſaid Houſe for the ſaid Year.

XXIII.

And as the Advantage of the Creditors conſiſts in having the Affairs of an Eſtate ſoon finiſhed, and that honeſt Men may have their own the ſooneſt poſſible, the Creditors that would prove their Debts, or that would reclaim ſome Effects from the Eſtate as their Property, ſhall henceforth proceed in the firſt Inſtance before the ſaid Commiſſioners in the following Forms againſt the Truſtees, who in this Caſe ſhall be Defendants, and who on the contrary ſhall proceed as Plaintiffs againſt thoſe who ſhall be found to be Debtors, or reſponſible to the Eſtate.

XXIV.

The Creditors who would prove their Debts, and all others reclaiming any Effects of the Eſtate, as their own, ſhall be obliged to enter their Action againſt the Truſtees in the Time, or at lateſt before the Sitting for the Preference and Concurrence, and before the Sale and Removal of the ſaid Effects; and to this End they ſhall appoint the Truſtees three Days before by ſending them their Demands with the Citation, as alſo a Copy of all the Inſtruments and Papers of which they intend to make Uſe; and in Caſe the Plaintiffs do not appear on the Day appointed, they ſhall be nonſuited, and the Inſtance diſcharged with Condemnation of Charges, which the Plantiffs ſhall pay before they can make a new Inſtance.

XXV.

But if any one has arreſted the Effects, which he maintains to be his, he ſhall be obliged to cite the Truſtee within the third Day of the Arreſt, and to eſtabliſh his action under Penalty of a nonſuit.

XXVI.

The Truſtees being cited or appointed as before, and not appearing, there ſhall be Default againſt them; and on having a ſecond Citation, and not appearing, the Commiſſioners ſhall judge upon the Demands and Papers of the Party appearing alone, and thoſe ſummoned ſhall be condemned to the Expence of the Proceſs, *propter contumaciam*.

XXVII.

The Parties ſummoned appearing, the Cauſe muſt be pleaded and determined forthwith, without giving or taking a Day to reply, except ſome ſtrong Reaſons induce the Commiſſioners to permit it.

XXVIII.

If the Truſtees ſummon any one in the Manner aforeſaid, and afterwards they do not appear themſelves, they ſhall be nonſuited; with the ſame Advantages to the perſon ſummoned as is before mentioned; and in this Caſe the Truſtees ſhall be obliged to pay the Expence out of their own Pockets.

XXIX.

But the Parties ſummoned not appearing, the firſt Default ſhall be granted, with a ſecond Citation for the Week following, and on Non-appearance the ſecond Time, the Citation being duly made, a ſecond Default ſhall be granted, with a proviſional Aſſignment, and a third Citation to ſee to change the Aſſignment into a definitive Condemnation, or to eſtabliſh a Right in ſome other Manner.

XXX.

But if the Parties ſummoned appear, they may conclude and finiſh their Cauſe in Pleading, or take a Day in the following Week, on which Day the Cauſe coming again to be conſidered, it muſt of Neceſſity be then determined and concluded, if the Commiſſioners have not Reaſon to order otherwiſe.

XXXI.

The Truſtees having arreſted any Perſon or Effects, ſhall be obliged, at the Inſtance of the arreſted or intereſted Perſon, to bring the Proſecution in three Days before the Commiſſioners, to make their Demand and join Iſſue; upon which, the Perſon arreſted or intereſted muſt anſwer, or that he takes a Day to do it, without derogating from the proviſional Determination, under Security, if the Thing is found to be ſo diſpoſed; but the Perſon arreſted or intereſted, not making any Proſecution, the Arreſt ſhall be brought back and proſecuted the next *Vierſchar*, according to Cuſtom.

XXXII.

The Cauſe being prepared and pleaded, the Commiſſioners ſhall diſpoſe of the Proviſion, or Principal, according to the State wherein it is found, and if either the one or the other Party will appeal, the Cauſe ſhall be carried and proſecuted before the *Eſchevins*, on the *Rolle Privilegié*, privileged Liſt or Catalogue, who ſhall determine it, and the Execution ſhall be done by Proviſion, without Prejudice of more particular Pleadings.

XXXIII.

The Creditors of any inſolvent Funds, being diſcontented with the Proceedings and bad Management of the Truſtees, may make their Complaints to the ſaid Commiſſioners, who ſhall cite the Truſtees, hear them, and ſettle Affairs; proceeding according to the Exigency of the Caſe.

XXXIV.

The Perſons whom the ſaid Commiſſioners ſhall eſtabliſh Truſtees of the inſolvent Eſtates, ſhall be obliged to give them ſufficient Security for all their Adminiſtration, at the Diſcretion of the ſaid Commiſſioners, that they may have Recourſe againſt the Securities, in Caſe of any Miſdeameanor of the Truſtees, unleſs theſe latter were elected from among the Creditors.

XXXV.

The Truſtees, or Aſſignees from among the Creditors, having received any Money belonging to the Eſtate, muſt not keep it with them, but ſhall immediately deliver it to the ſaid Commiſſioners.

XXXVI.

XXXVI.

And thoſe who ſhall be called or advertiſed, ſhall be obliged to appear not only at the End of their Adminiſtration, but at all Times, before the ſaid Commiſſioners, to give in their Accounts and Proofs; and being called for this Purpoſe, they ſhall be obliged to appear on the firſt Order, on Pain of three Guilders Mulct if they have a ſecond Summons, and of ſix Guilders at the third; and if notwithſtanding they fail to appear, and do not give in any Account, they ſhall be called a fourth Time on Penalty of Impriſonment, after that the ſaid Commiſſioners have communicated it to the *Eſchevins*.

XXXVII.

And at the End of the Truſtees' Adminiſtration, when the Commiſſioners ſhall diſcharge them from their Truſteeſhip, they ſhall grant them what they think proper for their Trouble.

XXXVIII.

Any one of this City or its Juriſdiction, being deſirous to make a Ceſſion of his Effects, the ſaid Commiſſioners ſhall proviſionally put them in Security, under the Care of the Perſons whom they ſhall eſtabliſh for that Purpoſe, as ſoon as the Letters of Ceſſion ſhall have been delivered to the Creditors, and they ſhall have enquired about the Validity of the Ceſſion, to the End that they may give Advice to the *Eſchevins*.

XXXIX.

And to prevent as much as is poſſible, all the Abuſes and bad Practices which are daily perpetrated by many Perſons, in the Petition and Solicitation of the Letters of the Burgo-Maſters of this City, to the noble, high, and mighty Lords the States of *Holland*, to obtain the *Safety of the Body*, and the Continuation of it; the ſaid Commiſſioners ſhall make an exact information of the State and Condition of the Premiſes, to let the Burgo-Maſters know it, and to ſerve them for Information and Advice.

XL.

Any one being ſummoned, he ſhall be obliged to appear before the Commiſſioners, and in Default ſhall pay ſix Stivers Mulct for the firſt Time, twelve Stivers for the ſecond, and twenty-four Stivers for the third; after which the ſaid Commiſſioners ſhall acquaint the *Eſchevins* with it, and ſend to fetch the Perſons by one of their Subſtitutes.

The Remainder of this Ordonnance relates only to the Government of the Clerks and Truſtees belonging to the ſaid Chamber, and is immaterial to this Diſcourſe. The Laws concerning Bankrupts being but few, and generally ill obſerved in other Countries, I ſhall not enlarge on this Subject.

OF THE

GENERAL COMMERCE

OF THE

W O R L D.

THE Commerce of the Ancients was at firſt carried on by Barter, which ſtill ſubſiſts even in ſeveral Parts, though of the moſt uncultivated ones, of *Europe*; as in *Siberia*, and the *Daniſh* and *Muſcovite Laplands*; and it was but in the laſt Century, that the *Engliſh*, *French*, and *Dutch* Traders firſt carried their Merchandize to *Archangel*, and there trucked them with the *Ruſſians*, for the Products of that vaſt Empire. Many Nations on the Coaſt of *Africa*, almoſt all of *America*, and ſome of *Aſia*, have preſerved this Method of giving what is ſuperfluous to them, for that which they have not, or at leaſt not in Plenty.

It is not preciſely known when *Commerce* commenced by Purchaſe and Sales, or when it began to make Uſe of Gold, Silver, or Copper Money; as the firſt Species were thoſe of Wood, Leather, and Iron; and even at this Day a certain Value is fixed on different Shells and Cocoa-Nuts in ſeveral Parts of both *Indies*, and given in Payment of ſuch Merchandize, Drugs, and Commodities as they want.

The oldeſt Examples found of this Commerce in the Sacred Hiſtory are in the Time of the Patriarch *Abraham*; profane Authors place the *Epocha* under the Reigns of *Saturn* and *Janus* in *Italy*; and the ancient *Gauls*, as *Julius Cæſar* reports in his *Commentaries*, attribute the Invention to the God *Mercury*.

The *Egyptians*, *Phœnicians*, and *Carthaginians*, are cited as the firſt, ableſt, and moſt daring Traders of Antiquity, by many great Authors; but being conteſted by others, the Reader is referred, for their different Sentiments, to the hiſtorical Preface.

And it did not appear to the Ancients, that an Application to Commerce was unworthy the Attention of the moſt illuſtrious Perſons; even *Solomon*, that ſage and powerful Monarch, did not diſdain an Engagement therein, but often, as before mentioned, joined his Merchant Fleets with thoſe of the King of *Tyre*, in a Voyage to *Ophir*, from whence they brought him thoſe precious Metals and Commodities as rendered him, though governing but a ſmall State, the richeſt Prince in the World.

Under the *Aſiatick* and *Grecian* Monarchies, Ancient Hiſtory diſcovers to us, from Time to Time, the Traces of a Commerce cultivated by different Nations, though it ſeems principally to have flouriſhed under the *Roman* Government; and one may judge, by the Teſtimony of Hiſtorians, and that of antique Inſcriptions, how many conſiderable Colleges, or Companies of Merchants, were eſtabliſhed in different Cities. The Deſtruction of the *Roman* Empire by the Irruption of a Multitude of barbarous Nations, affected Commerce by ſuſpending its ordinary Operations for a Time; but it afterwards revived, and by little and little made a new Progreſs, more eſpecially in *Italy*.

It was from thence that the *Piſans*, *Genoeſe*, and *Venetians*, whoſe numerous Fleets ſpread themſelves in all the Ports of the *Levant* and *Egypt*, to load Silk,

Spices, and other Merchandiſes of thoſe Countries, which for a long Time poſſeſſed the almoſt ſole Diſtribution of them to *France*, *Germany*, and the other States of *Europe*.

About the End of the fifteenth Century, the greateſt Part of this Traffick paſſed from them to the *Portugueſe*, after theſe latter had opened a new Navigation in the Ocean, and were eſtabliſhed in divers Parts on the Coaſts of *Africa*, *India*, and *Arabia*.

The *Portugueſe* did not poſſeſs theſe different Branches of Commerce for above an hundred Years, or thereabouts; for the *Dutch*, at the Beginning of the ſeventeenth Century, ſhared them with them, and very ſoon after ſtripped them of them almoſt entirely.

The *Engliſh*, *French*, *Danes*, and even the *Hamburghers*, excited by the Example of their Succeſs, made alſo ſome Eſtabliſhments in the *Indies*, and on the Coaſts of *Africk*, though much leſs conſiderable ones, excepting thoſe of the *Engliſh*, who have a very extenſive Commerce in thoſe Parts.

In fine, *America*, which the *Spaniards* diſcovered a little While after the *Portugueſe* had ſecured a Way to the *Eaſt* by the *Cape of Good Hope*, became a freſh Object of a vaſt and important Trade to all the Nations of *Europe*, though it is true, that the firſt Conquerors of this New World have always poſſeſſed the beſt and richeſt Part of it, and preſerve the Traffick to themſelves with an extreme Jealouſy; but beſides that the *Engliſh*, *French*, *Portugueſe*, and *Dutch*, have many flouriſhing Colonies, as well among the Iſlands as on the Continent, it is certain that it is, though undeſignedly, full as much for other Nations as for themſelves, that the *Spaniards* ſend their Flota or Galleons yearly to load the Treaſure of *Mexico* and *Peru*.

Commerce is a Profeſſion, in general, not leſs honourable than profitable, and is at preſent divided into that by Land and by Sea, in Groſs and by Retail, for which every Country furniſhes ſomething peculiar to itſelf; as the various States, or even the different Provinces of them, have neither one Sun nor Clime equally ſuited to all Sorts of natural Productions; beſides, the Diverſity of Men's Genius, and Humour in general, and of Nations in particular, influences their Application to ſome Sorts of Works and Employs rather than to others; ſo that a mutual Communication becomes neceſſary by the Intervention of Commerce, that what is wanting to ſome, may by this Means be ſupplied by others; and it is of no ſmall Conſequence to thoſe who embrace the mercantile Profeſſion, to inform themſelves exactly of what is to be found among their Neighbours, as well as to make themſelves perfectly well acquainted with the Products and Manufactures of their own Country. But not to enlarge on the Merchant's Qualifications, which I have already ſpoke to, I ſhall proceed to open to him the promiſed Scene for Practice, and begin, as it is natural, with the Trade of my own Country, the Extent and Value of which may claim this Preference, at leaſt from an *Engliſh* Author.

The united Trade of *England*, *Wales*, *Scotland*, and *Ireland*, does jointly contribute to form that conſiderable Commerce which the Subjects of the *Britiſh* Crown carry on, whether domeſtick or foreign.

ENGLAND. The commodious Situation of our Country, both for long and ſhort Voyages; the many excellent Ports proper for the Conſtruction of an infinite Number of Veſſels built there; the Ability and Intrepidity of our Pilots and Sailors; a Soil fertile in Fruits, Corn, and Paſturage; our Hills encloſing Diverſities of Metals, and Minerals; Cattle of all Sorts; and more eſpecially the Sheep producing thoſe precious Wools, of whoſe Exportation we are juſtly ſo jealous; Manufactures of almoſt every Species, and the greateſt Part of them ſuperior to thoſe of other Countries; our Colonies in *America*, and our Settlements ſo rich and flouriſhing in the *Eaſt Indies*, give us at leaſt as much as to any other Nation, wherein to prove our Genius for Trade, and demonſtrate that we have not been idle in it.

Voltaire, in his tenth Letter concerning the *Engliſh*, ſays, that Trade which has enriched them, has contributed to make them free; and that this Freedom has in its Turn extended their Commerce.

This

This proves that the fundamental Maxim of our Country is a very juſt one, *viz.* that Trade is the Nurſery of Sailors, that Sailors are the Soul of the Navy, that the Navy is the Security of Commerce, and that theſe two united produce the Riches, Power, and Glory of *Great-Britain*.

Under *Henry* the VIIIth, the Trade and Navigation of theſe Kingdoms began conſiderably to augment, and has ſince always gone on increaſing. We then engaged in a conſiderable Commerce to the *Levant*, and made frequent Voyages to *Guinea* and *Braſil*; but the *Engliſh* were not ſenſible of what they were capable in commercial Affairs, till towards the Middle of Queen *Elizabeth's* Reign, whoſe Protection and Encouragement animated her Subjects to the Formation of different Trading Companies, and the Eſtabliſhment of divers Manufactures in her Capital, on the Ruins of thoſe of the *Low Countries*, which rendered the Traffick of *England* ſo flouriſhing as to have it ſoon carried to *Archangel*, and extended to all the Ports of the *Mediterranean*. It alſo reached the richeſt Coaſts of *Africk*, as well as the *Eaſt* and *Weſt-Indies*, and there took ſuch a deep Root, and was ſettled on ſuch ſolid Foundations, as to remain immoveable, and to ſtand in leſs Need of Aggrandiſements, than of Moderation.

Although our domeſtic Trade is very conſiderable, and of great Advantage to the Inhabitants, the foreign vaſtly exeeeds it; and it is not becauſe that *England* cannot ſubſiſt without it, Providence having abundantly bleſſed us with every Neceſſary of Life, but as foreign Trade occaſions an Employ for all Sorts of Artiſts, furniſhes Work for the Poor, and augments our Manufactures, proving an efficacious Means of enriching the Nation, ſtrengthening the State, and rendering it formidable to the neighbouring Powers, that we are animated to engage ſo deeply in it.

It is for this that the *Engliſh* extend their Traffick to all Parts of the World where any is carried on; and there is no Nation under the Sun that drives ſo great a Trade with their own Products and Merchandizes. This renders us powerful in our Marine, augments the Number of our Sailors, enriches our People, and procures us all that the Univerſe can furniſh to ſatisfy the Imagination, or content the Appetite. In a Word, it is by foreign Trade that *England* is become the Support of its Friends, and the Terror of its Enemies; and whilſt the Commerce of our Neighbours, the *Dutch*, conſiſts chiefly in the Tranſportation of Merchandizes, not their own, from one Country to another, our's is principally furniſhed and ſupported by the redundant Products of our Soil and Induſtry.

Our Commerce, like that of all other Kingdoms, is compoſed of Inland and Maritime, though with great Difference in Regard to the Profits it leaves, as our foreign Trade certainly exceeds that of any other State in the World, in the three Articles of which it conſiſts, *viz.* Exportation, Tranſportation, and Importation; *France* can pretend to little more than the Firſt of theſe; *Spain*, *Italy*, and the two Northern Crowns, to the Firſt and Third; and *Holland* only vies with us in the Second.

Exportation.

OUR Country furniſhes the exporting Branch of Commerce with Butter, Corn, Cattle, Cloth, and many other Woolen and Cotton Manufactures, Iron, Lead, Tin, Copper, Leather, Copperas, Coal, Allum, Saffron, *&c.* beſides a Variety of Fabrications of Linens, Steel, Paper, Crockery, and other Articles of modern Invention and Improvement.

The neighbouring Kingdoms have many Times owed their Preſervation to our Supplies of Corn, and our Horſes are generally eſteemed for their Beauty, Strength, and Paces; neither our own Fleets, nor thoſe of any Strangers at Amity with *Great-Britain*, want any foreign Supplies for their Victualling, having Abundance of Beef, Pork, Biſcuit, and freſh Proviſions always ready, beſides the vaſt Quantities carried to the *European* and *Weſt-Indian* Markets.

Our Iron is exported, manufactured in Guns, Carcaſſes, Bombs, *&c.* and our Cloths and Woollens are ſent to moſt Parts of the World, though not in thoſe Quantities as formerly; many Princes having ſettled Manufactories of their own, to the no ſmall Prejudice of our's; and the Value of our Exports in the Articles of Cloth, Northern Dozens, Raſhes, Kerſies, Bays, Serges, Flannels, Perpetuances,

Says, Stuffs, Frieze, Penniſtone, Stockings, Caps, Blankets, Rugs, &c. I fear does not exceed the two Millions *per Annum* that Dr. *D' Avenant* and Mr. *King* ſuppoſed ſome Years ago they amounted to; according to their Calculation, that the yearly Produce of Wool in *England* was about two Millions Sterling, and this worked up to produce in Exports eight Millions; of which they computed, ſix Millions for Home-Conſumption, and the other two for Exportation.

The other Exports from hence, of Hops, Flax, Hemp, Hats, Shoes, Ale, Beer, Cyder, Herrings, Pilchards, Salmon, Oyſters, Saffron, Liquorice, Optick Glaſſes, and Mathematical Inſtruments, Works of Horology, Ribbons, Toys, &c. are prodigious, and of a Value almoſt incredible.

The Veſtments, Shoes, Hats, and Houſehold Stuffs, carried from hence yearly, only to *America*, is ſuppoſed to be worth at leaſt 200,000*l.*—This muſt amount to a much larger Sum ſince the Conqueſts from the *French* in *America*.

England produces yearly 5,000,000 Chaldrons of Sea-Coal, and the Mines would furniſh much more if wanted, near a Million and a half Pounds of Tin, a thouſand Fodders of Lead, eight hundred Furnaces of Iron, and as many Tons of Allum; of all which great Quantities are exported, to the Value at leaſt of 500,000*l. per Annum*.

We tranſport alſo annually from our Plantations in *America*, beſides what we conſume ourſelves, of Sugar, Indigo, Tobacco, Cocoa-Nuts, &c. about 400,000*l.* and our Fiſh, Pipe-ſtaves, Maſts, Beaver, &c. from the Northern Parts do not produce a much leſs Sum.

It would be tedious and difficult to enumerate our Tranſportations and their Value from *Denmark*, *Sweden*, *Spain*, *Portugal*, and other Parts in the *Straits*, *Turkey*, *Guinea*, &c, but the moſt conſiderable of all is that of the Commodities brought from the *Eaſt Indies*, of which it is ſuppoſed of late Years, we have tranſported to the Value of 500,000*l. per Annum*, in Pepper, Salt-Petre, Callicoes, Muſlins, Silks, Drugs, Diamonds, &c. after having retained a Sufficiency for our own Uſe and Conſumption.

Importation. THE Article of IMPORTATION, or the bringing hither ſuch Goods as we conſume among ourſelves, is very great, though not equally advantageous from all Countries. But this will appear more evidently hereafter in the Statement of the Commerce carried on by *Great-Britain* with different foreign Nations. And that this Statement may be made with as much Accuracy as the Nature of the Subject, and the Secrecy of late Years ſo ſtrictly obſerved by the Adminiſtrators of our commercial Affairs, will admit.—I ſhall divide it into two Branches; *Domeſtic Trade* and FOREIGN COMMERCE and under each give a general Sketch of what each County in *Great Britain* and *Ireland* furniſhes towards, carrying on both; either by its natural Products or its Manufactures.

GREAT-BRITAIN was thought by the Ancients, to be the largeſt Iſland of the then known World; and though the latter diſcovered ones of *Madagaſcar* and *Japan* vie with, and by ſome are ſuppoſed to exceed it, yet the Uncertainty of their Dimenſions ſtill leaves a Doubt, whether the Magnitude of our Iſle is not ſuperior to them, and yet equal to what it was formerly accounted.

It was at firſt called *Albion*, and by the *Romans Britannia*, though I think the Etymology of both the Words is ſtill unſettled.

The Situation of its Southern Part, *viz. England* and *Wales*, is between the 17th and 22d Degrees of Longitude, and the 50 and 56th Degrees of Northern Latitude; being in Shape triangular, and the longeſt Side from *Berwick* North, to the *Land's End* S. W. three hundred eighty-ſix Miles; from *Sandwich* E. to the *Land's End* W. by S. two hundred ſeventy-nine Miles; and the Perpendicular from *Berwick* to *Portſmouth* N. and S. three hundred and twenty Miles; containing by Computation about 39,938,800 Acres, and 1,219,952 Houſes; is almoſt ten Times as big as the *United Netherlands*; leſs than *Italy* by near one Half, and in Compariſon with *France*, is as thirty to eighty-two.

According to a Catalogue exhibited by *Camden* to King *James* I. it was parcelled out into 6,284 Pariſhes; but Mr. *Chamberlaine*, in his *Magnæ Britanniæ Notitia*, ſays, there are, in all, nine thouſand nine hundred and thirteen Pariſhes, ſeven hundred and fifty great Towns, and twenty five Cities; though the anony-

mous Author of *The preſent State of Great-Britain* differs from both, by making the Cities to be twenty-eight, the Market Towns ſeven hundred and ninety, and the Pariſhes to be ten thouſand ſix hundred and three.

The Counties in this Diſtrict are fifty-two, forty in *England*, and twelve in *Wales*, whoſe Products ought now to be conſidered; but as our Wool and Woollens are the moſt ſtaple Commodities of our Iſle, and the Neglect or Abuſe of thoſe excellent Laws in Force concerning them has been ſo ineffectual to the keeping the one at home, and detrimental to the Sale of the other abroad, I ſhould, previous to my ſaid Intention, give ſome Account of the Statutes relating to the Cleanſing, Packing, Carding, *&c.* of the firſt, having at P. 78 and *ſeq.* done it for what regards its Running, and for the good Government of all Manufacturers and their Dependants, concerned in the latter; but as they are many and very extenſive, it is impoſſible to reduce them within thoſe ſmall Bounds I have limited myſelf to for the Remainder of this Work, ſo muſt content myſelf with obſerving, that the Legiſlature's Care of theſe Particulars began very early; for though formerly the Exportation of Wool was not only licenſed, but the principal Trade of this Country, and the greateſt Branch of our King's Revenues yet as ſoon as we had learnt the manufacturing of it ourſelves, and experienced the Advantages ariſing from this Improvement, by a comfortable Employ for our diſtreſſed Poor, and the Encreaſe of our Commerce, the Prohibition of its Export was judged neceſſary, and enforced by many good Laws, in Order to ſecure the Benefit to ourſelves, and prevent other Nations from reaping it, as they had ſo long done to our Prejudice; the Statute therefore of 27 *Edw.* III. declared the Tranſporting it Felony, and many others in ſucceſſive Princes' reigns have mitigated or enhanced the Penalties, as Circumſtances and the Times have required; they have alſo guarded againſt Frauds and Abuſes in the Combing, Spinning, Winding it, *&c.* that crept in, during its infant State; by ſeveral penal Laws to the guilty Tranſgreſſors of them.

In regard to Manufactured Wools, the *Acts* are ſtill more ample and extenſive, and regulate their Lengths, Breadths, Weights, *&c.* beſides the many other Particulars neceſſary to be obſerved in their Fabrication, as conducive to their Perfection and Goodneſs. Abſtracts of which have been given in their proper Place. I ſhall now begin my propoſed Deſcription of the Counties in the Manner following:

1. *Bedfordſhire.*

THE Products of this County are principally conſumed at Home, though it occaſionally furniſhes ſomething for abroad, in Corn and Woollen Manufactures. Its Manufactures of Straw Hats, and other Things made of that Material, at *Dunſtable* and *Luton*, and of Bone-Lace, employ ſeveral thouſands of the Inhabitants, and are worn by Multitudes of the principal Ladies in *England*; Fullers Earth is found at *Woburn* and *Aſpley*, and Butter made in many Places, and ſent up freſh in Lumps to *London*.

2. *Berkſhire*

Produces much more for Exportation than the preceeding County, as the Woollen Manufactures at *Reading*, *Farringdon*, *Newbury*, *&c.* are very conſide able in Cloth, Druggets, Duroys; Serges, Shalloons, and Stuffs; and at the firſt of theſe Towns has been eſtabliſhed for ſome Years paſt a moſt extenſive Fabrick of Canvas, or Sail Cloth, which is brought to ſuch Perfection as to equal in Goodneſs any that was formerly imported from *Holland* or *France*, to the no ſmall Advantage of the neighbouring Poor, who in large Numbers are thereby employed. And whilſt it ſo plentifully ſupplies the exporting Branch of Commerce, it is not barren in Products for Home Conſumption, as it has Corn, Cattle, and Wood, eſpecially Beech and Oak, in Abundance: This County, with *Glouceſterſhire* and *Wilts*, ſend yearly to *London* about ſix thouſand Ton of Cheeſe, the Half by Land Carriage, and the other Moiety by Barges, from *Lechlade*,

Abingdon, *Newbury*, and *Reading*, and in Return are furniſhed with Salt Butter in Firkins from that City to ſupply the Deficiency of their Dairies.

3. *Buckinghamſhire*

Affords but little for foreign Markets, as its ſole Manufacture is of Bone-Lace at *Olney* and *Newport-Pagnell*; and its Products confined to Corn, Cattle, and Wool, except ſome lump Butter ſent up freſh from hence, *Oxfordſhire*, *Northamptonſhire*, *Bedfordſhire*, *Hertfordſhire*, and *Eſſex*, and in Pots from *Derbyſhire*, to *London*, in ſuch Quantities as to amount in the whole at leaſt to 100,000 Firkins *per Annum*, which are conſumed within the Bills of Mortality.

4. *Cambridgeſhire*

Has no Manufacture except of Malt, Paper, and Baſkets, but its Growth of Corn, Hops, and Saffron is very conſiderable, and the latter eſteemed in Quality inferior to none. There is likewiſe found near *Sturbridge* very good Pipe and Potters Clay; and Cattle are plenty, though their Dairies produce no more Butter or Cheeſe than ſuffices for their own Conſumption, as that Butter called *Cambridge* Butter receives its Denomination only by coming from thence, being firſt brought there from other Parts.

5. *Cheſhire*,

So juſtly famous for its Cheeſe, of which, with *Lancaſhire*, Part of *Shropſhire*, and *Staffordſhire*, it ſends up to *London* yearly above ſeven thouſand Tons; all theſe are of a thick Make, yet very different in their Size and Quality, though all are without Diſtinction in Town called *Cheſhire* Cheeſes. Theſe Counties, but more eſpecially *Lancaſhire*, likewiſe ſell great Quantities for *Leeds*, *Sheffield*, *York*, and *Newcaſtle*, beſides what is conſumed in *Mancheſter*, and ſhipped at *Liverpool* for *Scotland*, the *Straits*, &c. being not leſs than fifteen or twenty hundred Tons. *Nantwich*, *Middlewich*, and *Northwich*, afford large Quantities of Salt; *Macclesfield* is noted for its Fabrick of Buttons, as *Congleton* is for Gloves; Cattle are plenty, Corn not ſcarce; and in many Parts of the County are found Metals and Millſtones. It has ſome Coal Mines, and Salt-Works.

6. *Cornwall*.

The hilly Part of this County appears unfruitful to the Eye, but encloſes great Treaſures in thoſe ſeemingly barren Mountains; as there is yearly dug out of them an immenſe Quantity of Tin and Copper, both excellent in Quality; and the latter is found to be as good and as fit for every Purpoſe as the *Swediſh*, or any other heretofore imported, and is as ſucceſsfully uſed in all our Battery Works as any foreign was formerly; which induced the Government to encourage their Proprietors by laying a Duty ſome Years ſince upon all outlandiſh black Laten, and Metal prepared, which are Plates of Braſs fitted for ſmall Manufactures of the Clock, Kitchen, *&c.* And our Tin, as well in Quantity as Quality, greatly exceeds all other Mines that have been yet diſcovered, though they have been worked from Time immemorial, as we read that the *Phœnicians* drove a very conſiderable Trade in it, with the then Inhabitants; and the Plenty of the Mineral, having continued equal through ſo many ages, ſeems to indicate the Stock to be inexhauſtible, and will in all Probability laſt till the general Conflagration melts that and all Things in a Maſs together: In the Interim, the Advantages it produces to the County, and indeed to the Nation, are very conſiderable, from the large Quantities exported; and for the better Regulation of a Buſineſs in which ſo great a Number of Men are employed, there are many ancient Laws in Force, firſt made, and Franchiſes granted by *Edw.* I. relating ſolely to them, by which they are incorporated in four Diviſions, *viz.* *Foymore*, *Blackmore*, *Trewarnaile*, and *Penwile*; in each of which ſtannary Courts are held, for the Deciſion of Diſputes and

Correction of Irregularities, and ſometimes Parliaments of the whole Society under the Lord Warden.——The Valleys are rich in Corn and Paſture, and its Seas afford almoſt all Sorts of Fiſh in the greateſt Plenty, more eſpecially Pilchards, taken on its Coaſts at two different Seaſons of the Year; and ſometimes in ſuch Abundance, that the Natives not having Salt ſufficient for their Cure, make uſe of great Quantities to manure their Grounds, beſides an annual Exportation commonly of fifty thouſand Hogſheads; and it is only in this County that I can remember to have ſeen or heard of any Conger being taken in *England*.

Here are ſome ſmall Quantities of Quickſilver found in the Mines, and Slates ſufficient to furniſh every Demand for them. Tin, Copper, and Slates are exported to foreign Countries.

7. *Cumberland*.

The Manufactures of this County are Rugs, Chair Seats, and Carpets in Imitation of *Turkey* Work, Penniſtons, Half-thicks, Duffels, *&c.* At *Penrith* are made large Parcels of Leather, and from *Whitehaven* are ſhipped great Quantities of Salt and Coals: Copper is found in Plenty at *Newland* and *Keſwick*, and at the latter there is black Lead; the only Place, as ſome ſay, though I believe erroneouſly, for it in *Europe*: Here are likewiſe good Lead Mines, and the plain Part of the Country produces Corn, as the hilly Part does Graſs; the celebrated Fiſh Charr, is caught in its Meer called *Ulles Water*, which alſo borders on *Weſtmorland*, and no where elſe but in *Lancaſhire*, in *England*. Here in ſeveral Parts are good Dairies, and this, with *Northumberland*, ſends up to *London* yearly about fifteen thouſand Firkins of Butter, which are chiefly ſhipped at *Newcaſtle*, though ſome from *Blyth*; and theſe two Counties produce beſides, between two and three thouſand Firkins, which are ſent directly into *Kent*. At *Carliſle* is a good Fabrick of fine Linen, in which about twenty-five Weavers are employed all the Year through; and large Parcels of Leather are alſo made in this City and Suburbs.

The *Iſle* of *Man* lies about ten Leagues diſtant from this County, in the *Iriſh* Sea, but furniſhes nothing for Trade.

8. *Derbyſhire*.

The Manufactures of this County are only woven Stockings of ſeveral Sorts, with ſome Felt, Caſtor, or Beaver Hats; it is very fertile in Corn and Cattle, ſending a good deal of Pot Butter to *London*, as mentioned under *Buckinghamſhire*; and jointly with *Nottinghamſhire*, and Part of *Staffordſhire*, about 2000 Ton of Cheeſe yearly; this is ſent down the *Trent*, from *Burton*, &c. and the *Derwent*, from *Derby* to *Gainſborough* into the *Humber*, being of a thin Sort, and ſold in *London* under the Denomination of *Warwickſhire* Cheeſe.——Here are Quarries of Free-Stone and Marble, Abundance of Mill, Lime, and Whet-Stones, with ſome Chryſtal and Alabaſter, green and white Vitriol and Alum. Its Mines are ſtored with Coal, Iron, principally uſed by the Nailers, and in the ſmall Manufactures in *Birmingham*, &c. and Lead, the latter being very plenty, and the beſt in *England*; the *Peak* is famous for producing it, and its other Wonders, as *Derby* is for Sir *Thomas Lombe's* Engines erected here on the River *Derwent*, for making organzined or thrown Silk, and for whoſe Introduction the Parliament in 1732 gave him 14,000*l*. It contains 26,586 Wheels, and 97,746 Movements, which works 73,726 Yards of Silk Thread every Time the Water-Wheel goes round, which is thrice in one Minute, and 318,496,320 Yards in the twenty-four Hours; one Water-Wheel gives Motion to all the other Wheels and Movements, of which any one may be ſtopped ſeparately, which is very extraordinary in ſo complicated a Machine; one Fire Engine conveys warm air to every individual Part of it, and one Regulator governs the whole Work.

9. *Devonſhire*

Affords many Things ſimilar to the Products of its adjoining County, *Cornwall*, as Tin, Lead, Copper, Pilchards, *&c.* though not in the ſame Abundance; and though it is more fruitful than that, yet its Riches are the Effects of its Manufactures, which conſiſts in Serges, Kerſeys, Druggets, Shalloons, Long-Ells, *&c.* and Bone-Lace; ſo great a Quantity of the firſt is made in the Neighbourhood of *Exeter*, as to furniſh the Market of that City with 10,000*l.* worth weekly; here are alſo made ſome Broad Cloth, mixt or Medleys, and from its Ports are ſent more Fiſhermen to *America* than from any other County in *England*.

10. *Dorſetſhire*

Is noted for its Beer, and yields great Plenty of Corn, Cattle, and Hemp, which latter was ſo abundant near *Bridport*, as to occaſion, many Years ago, a Fabrick of Cables for the Royal Navy to be erected there. The Iſles of *Portland* and *Purbeck* produce Free-Stone, Marble and Tobacco-Pipe Clay; and the Sheep bred in this County are innumerable, ſo that it is ſaid, that within the Circumference of ſix Miles round the Town of *Dorcheſter* only, there are ſix hundred thouſand conſtantly feeding. They are reckoned amongſt the largeſt and beſt brought to the *London* Market, and ſcarce inferior to the *Banſtead Downs* Mutton.

11. *Durham*

Produces great Quantities of Coals, ſhipped at *Sunderland*, ſome Lead, Iron, Allum, and Grindſtones; at *Darlington* it has a Fabrick of various Stuffs, and ſends yearly to *London* about ten thouſand Firkins of Butter.

12. *Eſſex*

Is a very fertile County, and very abundant both in its Products and Manufactures; the former conſiſting in Cattle, Corn, and Hops, but principally in Oyſters and Saffron, of both which it produces a great Quantity, and the beſt of the Sort in the World; it is likewiſe famous for ſuckling Calves, and from whence the *London* Markets are principally ſupplied with this agreeable Food; ſome Cloths, Stuffs, and Perpets are made here, but its Fabricks for Baize are unequalled in any Part; and moſt of the Inhabitants of *Bocking*, *Braintree*, *Coggeſhall*, *Chelmsford*, *Billerica*, *Biſhop-Stortford*, *Waltham*, *Rumford*, *Halſtead*, *Witham*, and innumerable ſmaller but populous villages, are chiefly employed in ſorting, oiling, combing, or otherwiſe preparing the Wool for the Looms, or manufacturing it.—At *Colcheſter* alone are made at this preſent from ſix to ſeven hundred Pieces of Baize Weekly, called therefrom *Colcheſter* Baize; and at *Bocking*, *Dunmore*, *&c.* about four hundred Pieces *per* Week of that Sort called *Bocking* Baize; extra of mock *Colcheſter*, which are not a few; and the former have been ſo much in Demand ſince the Peace with *Spain*, for whoſe Markets they are fitteſt, as the latter are for *Portugal*, as to occaſion a Riſe of ten Shillings *per* Piece in Price on the beſt Sort of them more than they uſually went at before the War. A large Quantity of freſh Butter is ſent to *London* from this County, and in Lieu thereof they take from thence, and from *Suffolk*, in Firkins, what ſuffices for their Conſumption.

13. *Glouceſterſhire*

Brings Sundries both to the home and foreign Trade, as it plentifully produces Cattle, Wool, Iron, Steel, Corn, Cyder, Salmon, Bacon, and Cheeſe, of which latter it clubs its Share to make up the ſix thouſand Tons mentioned in *Berkſhire*; and its Wool from the Sheep of *Cotſwold*, is the fineſt in *England*, and only inferior to that of *Andaluſia*; they are likewiſe in ſuch Quantities that even the Flocks, much leſs the Sheep, are hardly to be counted; from this Wool many plain white Cloths for Dying are made through all the County, as alſo Variety of worſted Stockings, beſides Yarn knit Hoſe. *Tewkſbury*, beſides its woollen

Fabricks (which are very conſiderable) is famous for Muſtard Balls, as *Stroud* is for its Fulling Mills and Scarlet Dye,

14. *Hamp* or *Hantſhire*

Is alſo very abundant in Sheep, which furniſh Wool for its many Fabricks of Shaloons, Kerſeys and other Stuffs; its Products are Iron, Corn, and Timber, and is more particularly noted for the Excellency of its Honey and Bacon.

15. *Hart* or *Hertfordſhire*.

The principal, and indeed almoſt the only Product of this County, is different Sorts of Corn, of which great Quantities are ground here into Meal, or made into Malt, and ſo ſent to ſupply *London* Markets; Manufactures it has none; and what the Dairy affords of Butter is brought to Town freſh, and Salt Butter purchaſed on cheaper Terms in its Room, as is practiſed in all the Counties circumjacent to *London*.

16. *Herefordſhire*.

Leominſter (or *Lempſter*) in this County is noted for its Wools, as *Kyneton* is for its Fabrick of narrow Cloths; its Product conſiſts of Corn, Wool, Salmon, and Cyder, of which latter great Quantities are conſumed both at home and abroad.

17. *Huntingdonſhire*

Affords but little matter to treat of, as it is deſtitute of Manufactures, and its Products limited to Cattle and Corn.

18. *Kent*.

The ſole Manufacture of this County I believe is Thread, except what is caſt of its Iron into Cannon, Bullets, Furnaces, Pots, Boilers, Plate Iron, Bomb-ſhells, Hand-Grenades, *&c.* and its Products are, ſome Corn, Woad, Madder, Hops, Fullers-Earth, Iron, Burſtone, Flax, and great Quantities of *Kentiſh* Cherries and Pippins.

19. *Lancaſhire*,

Being a County very fertile both in Wool and Flax, affords Employ for the Natives in large Manufactures of Cloths and Linens eſtabliſhed there, of which the principal ones are at *Mancheſter*, *Bolton*, and their Vicinage, where are likewiſe made Rugs, *Turkey*-work Chairs, Penniſtons, Duffels, *&c.* and at *Rochdale* and its Neighbourhood, as well as the aforementioned Towns, are alſo made Cottons and Fuſtians of various Sorts, Kerſeys, Tickings, and, above all, large Quantities of Baize, in Imitation of *Bockings*, and ſhipped off directly for the *Portugal* Markets as ſuch. Its Products are Rock Salt, ſome Black Lead, Charr, and Cannel Coal, which does not only ſerve for a delightful Fuel, but for making Utenſils and Toys, as fine to look on as the higheſt poliſhed Jet, and ſo free from leaving any Tinge, that the whiteſt Linen may be rubbed on it without receiving any Soil; this County and *Somerſetſhire* produce the largeſt Oxen in *England*, and its Dairies afford plenty of good Cheeſe, as has been mentioned in the Deſcription of *Cheſhire*.

20. *Leiceſterſhire*

Is famous for Sheep with the largeſt Wool in *England*, and though the Quantity of it is very great, yet it is here employed in no other Fabrick than that of a Variety of woven Stockings; beſides which, their ſole Manufacture is of Felt, Caſtor, and Beaver Hats. Its Products are Sea Coal; and Beans and Peas abound

here to a Proverb. It ſends, jointly with *Warwickſhire*, above five hundred Tons of Cheeſe by Land to *London*, and is ſuppoſed to produce above a thouſand Tons more, ſold to *Birmingham* and other large Towns, and ſent into *Northamptonſhire*, *Hertfordſhire*, *&c.* beſides two or three hundred Tons remitted from thence to *Sturbridge* Fair.

21. *Lincolnſhire*,

Though one of the largeſt Counties, is deſtitute of any Manufacture, as the Inhabitants ſell their Wool unwrought to their Neighbours, and principally employ themſelves in the grazing Trade, and fatting Cattle, with which the *London* Markets are plentifully ſupplied; it alſo ſends up annually, jointly with the Iſle of *Ely*, from *Holbeich*, about twenty-five thouſand Firkins of Butter, on the River *Cam*, to *Cambridge*, and from thence to *London* by Land Carriage; and there is likewiſe brought yearly in the ſame Manner to the ſaid City from *Spalding* and *Peterborough* about two thouſand Firkins, being the Produce of the Fens.

22. *Middleſex*,

In which is ſituated the celebrated City of *London*; and though it is the ſmalleſt County but four in *England*, it is certainly the richeſt and the moſt opulent in Trade, not only of this, but of every other Kingdom of *Europe*. This County has few Manufactures out of its Metropolis, though thoſe of *Spital-fields*, *&c.* are very extenſive, and brought to great Perfection; ſo that I may venture to aſſert, that our Artiſans now equal if not exceed the *French* in the Beauty of their Silk Fabrick, and ſtill continue their wonted Superiority in the Woollen ones; for though our Rivals can carry theſe cheaper to Market than we can, and conſequently rob us of a conſiderable Share of that Trade we ſhould otherwiſe poſſeſs alone, yet this does not proceed from any Defect in the Capacity of our Artificers, but from their working ſo much cheaper in that Kingdom, and the Neglect or Abuſe, as formerly obſerved, in the working up our Woollens here, which calls for a ſtrict Inſpection and Regulation. This great City is in a Manner the Centre of both the inland and foreign Trade, and conſequently the Tranſports to it by Land and Water are vaſt and inconceivable; the Concourſe of Waggons, Horſes, and other Carriages for the one, with Ships, Lighters, *&c.* for the other, continually coming in and going out, are innumerable, and muſt give a Foreigner a very exalted Idea of that Commerce which employs them.

23. *Monmouthſhire*

Is one of thoſe Counties that affords little worth Regard in Trade, as its only Manufacture is of Flannels at *Abergavenny*, and its Products nothing elſe but Cattle and Corn.

24. *Norfolk*

Has a juſtly celebrated Fabrick of all Sorts of Stuffs at *Norwich*, of which there is yearly ſold to the Value of 100,000*l.* beſides what the Manufacture of Stockings here and in other Parts of the County may import; its Products are Cattle, Corn, Wool, and Herrings, which latter abound like the Pilchards in the *Weſt*, and are taken in equal Quantities; ſo that commonly as many Barrels of theſe are ſhipped in a Year as there are Hogſheads of the others; theſe employ a great Number of Hands in their Cure, ſo that in Catching, Salting, Smoaking, *&c.* the greateſt Part of the Inhabitants of *Yarmouth* are engaged, and the Ships belonging to the Place find good Freights in carrying them abroad. This is a great Dairy County for Butter, making yearly about ſixty thouſand Firkins, which is ſent weekly to *Downham* upon the River *Cam*, and ſo by Water to *Cambridge*, from whence it is carried by Land to *London*.

25. *Northamptonſhire*,

25. *Northamptonſhire*,

Though one of the fineſt Counties in *England*, furniſhes but very little for Trade, as it has no Manufactures but of Worſted and Yarn Stockings, and its Products conſiſt of Corn, Cattle, Wool, Salt-petre, and ſome Butter ſent up freſh and in Lumps to *London*, as has been already mentioned.

26. *Northumberland*

Is ſo abundant in Coals, that all *Europe* might be ſupplied from it; *Newcaſtle* ſends yearly to *London* about ſix hundred thouſand Chaldrons, and for their Conveyance keeps upwards of five hundred large Ships continually employed, to the no ſmall Improvement of our Marine, as this dangerous Navigation proves a continual Fund of good Sailors, than which none are ſtouter not better. Here are large mines alſo of Lead and Iron, which latter is of the ſame Nature with what comes from *Derbyſhire*, and like that chiefly uſed by the Nailors, *&c.* Grindſtones are found in ſome Parts; and the River *Tyne* is ſo abundant in Salmon, that great Quantities are pickled and ſhipped off from *Berwick* and *Newcaſtle* for foreign Markets: I have already ſaid that this County, with *Cumberland*, ſends about fifteen thouſand Firkins of Butter to *London*, and between two and three thouſand more into *Kent*, the former ſhipped at *Newcaſtle* and *Blyth*.

27. *Nottinghamſhire*

Has no other Manufactures than ſome woven Stockings, but produces Corn and Coal in plenty, with ſome Lead. *Workſop* is noted for Liquoriſh; *Mansfield* for Malt; and near *Nottingham* is found Tobacco Pipe and Potters Clay. This Shire brews fine Ale in great Abundance, and clubs its *Quota* of the two thouſand Ton of Cheeſe, mentioned in *Derbyſhire*, to be ſhipped for *London*.

28. *Oxfordſhire*

Can boaſt of no greater Manufactures than the preceding County; it has only one at *Witney* for Blankets; *Banbury* is noted for its fine Cheeſe, *Henley* for Malt, and *Burford* for Horſe-Saddles. It is a very great Corn County, and one of thoſe that plentifully ſupply *London* with freſh Butter of an excellent Quality.

29. *Rutlandſhire*

Feeds an infinite Number of Sheep, whoſe Wool is ſaid to partake of the Redneſs of the Soil, and theſe are the only Commodities of the County.

30. *Shropſhire*, or the *County* of *Salop*,

Abounds in Corn, Coals, and Iron; has ſome Pipe and Potters Clay, and makes Flannels and plain white Cloths for Dying; the Fabricks of theſe are principally at *Shrewſbury*, where is alſo every *Thurſday* a Market held for *Welch* Cottons, of which great Quantities are bought for *London*, and a large Quantity of excellent Cheeſe is likewiſe ſent there, as hinted in the the Deſcription of *Cheſhire*.

31. *Somerſetſhire*.

Few Counties produce ſo great a Variety, both for home and foreign Markets, as here is Corn in Plenty; Lead, Copper, Lapis Calaminaris, Cryſtal, Coals, and Woad for dying. The Oxen in this County equal in Size thoſe of *Lincolnſhire*, and the Sheep are as numerous as in *Dorſetſhire*, *Wilts*, *&c.* which affords the Natives a ſufficient Supply of Wools for their large Manufactures of almoſt all Sorts of Woollens, ſuch as Broad Cloth, mixt, or Medleys, Serges, Druggets, Duroys, and Stuffs of many Denominations; Stockings, both Worſted and Yarn, Kerſeys, Shaloons, *&c.* At *Chedder* are made thoſe celebrated Cheeſes, which excel the *Parmeſan*, to an unprejudiced Taſte; and *extra* of theſe, this County with

the northern Part of *Wiltſhire* ſends yearly to *Morden*, or *Magdalen Hill* Fair near *Wincheſter*, about fifteen hundred Tons, which is ſold in one Day; this Fair is held annually on the 25th of *July*, and is the greateſt for this Commodity in *England*.

32. *Staffordſhire*

Produces Corn, Coals, Free-ſtone, Marble, Alabaſter, Copper, Lead, and Iron, of which latter, Nails, and other ſmall Wares are made: *Burton* is famous for its Ale; and this County does not contirbute the ſmalleſt Share to the two thouſand Ton mentioned under *Derby* and *Nottinghamſhires* to be ſent to *London*, beſides what its Dairies furniſh for *Yorkſhire*, *&c.* as is obſerved in deſcribing *Gheſhire*.

33. *Suffolk*

Is a great Dairy County, and ſends yearly to *London* forty thouſand Firkins of Butter upon an Average, which is ſhipped at *Ipſwich* and *Woodbridge*, and ſome few from *Aldborough*; beſides which it makes about ten thouſand Firkins more, that are ſold at *Colcheſter*, and other Parts of *Eſſex*. Of the Cheeſe it produces a thouſand Tons, a little more or leſs, is annually brought to Town, with which the Royal Navy is ſerved; ſome Part is ſold into *Kent* and *Suſſex*, and the Reſt to Shipping, *&c.* as none is eat in *London*; a great deal is ſent directly from hence to *Newcaſtle*, as ſome is alſo from that City. The Navy in Time of War takes yearly for Victualling from ten to twelve thouſand Firkins of Butter, and about five or ſix hundred Tons of *Suffolk* Cheeſe, though in Time of Peace the Conſumption is not above one Fourth of either: The Land Forces are fed with *Cheſhire*, *Warwick*, or *Glouceſterſhire* Cheeſe, of which between eighty and a hundred Ton was iſſued *per Annum* in the late War.——This County is very fruitful in Cattle, and feeds great Multitudes of Sheep, notwithſtanding which the Conſumption of Wool is ſo great in its Fabricks, as to oblige the Manufacturers to ſeek an additional Supply from *Lincolnſhire:* Cloths are made at *Sudbury*, and Variety of Stuffs at *Stow Market*; alſo Says and Perpets, beſides large Parcels of Linen; and its Products are Corn, Hemp, and Fullers-Earth.

34. *Surrey*,

Being very barren in the Middle, affords but few Products or Manufactures, though it is ſaid that ſome Broad Cloth, mixt, or Medleys, are made at *Ryegate*, and ſome Kerſeys at *Guildford* and in its Neighbourhood. Iron is found of the ſame Quality with that of *Suſſex*; and it is on a Hill near *Mickleham* that Box grows in greater Plenty that in any one Spot in *Europe* beſides.

35. *Suſſex*

Yields great Quantities of Iron, chiefly uſed in Founderies for Cannons, Bombs, *&c.* and it has ſome Manufactories of Glaſs. Its Products are Cattle, Wool, and Corn, more eſpecially Oats, of which its Crops are incredibly great. The *Engliſh* Ortolan (or Wheat Ear) is peculiar to this County; and a *Suſſex* Carp, *Arundel* Mullet, *Chicheſter* Lobſter, and an *Amerley* Trout, are ſo peculiarly noted for their Excellence, as to challenge a Remark in every Treatiſe on this Shire.

36. *Warwickſhire*

Feeds large Flocks of Sheep like thoſe of *Lincolnſhire*, though the greateſt Part of their Wool is ſold, and only ſo much retained as to manufacture ſome woven Stockings, and at *Coventry* Tammys, or *Coventry* Ware, and Plaiding; Hats of Felt, Caſtor, and Beaver, are alſo made here. *Birmingham* is famous for its curious Works in Iron and Steel, ſupplied by the Mines of this County, which alſo produces Coals, Corn, and Cheeſe in plenty. Of this latter, joined to what comes from *Leiceſterſhire*, above five hundred Tons are ſent yearly by Land to *London*, and ſome ſmall Quantities from hence by Barge to *Oxford* and *Abingdon*;

beſides which theſe two Counties produce at leaſt a thouſand Tons, which is diſpoſed of in the Manner mentioned under *Leiceſterſhire*.

37. *Weſtmorland.*

The Products of this County are but few, though what the Soil denies is ſupplied by the Induſtry of the Natives; as at *Kendal* and *Kirby-Lonſdale* the Manufactures of Cloths, Druggets, Serges, Rugs, Peniſtons, Duffels, Cottons, Hats, and Stockings, are very conſiderable; ſo that notwithſtanding its terrene Infertility, that of its Looms furniſhes a very handſome Part, both to the home and foreign Trade.

38. *Wiltſhire*

Being one of the principal Counties in *England* for the Woollen Manufactures, I ſhall here make a Summary of what I have ſaid concerning them in the others; and in doing it, ſhall join ſome of the celebrated Mr. *Daniel De Foe's* Remarks on theſe Fabricks, in his *Complete* Engliſh *Tradeſman*, to what Experience, and ſome other Authors have furniſhed me with.

This and the other large and populous Counties of *Somerſet*, *Glouceſter*, and *Devon*, have Manufactures ſo exceeding great as to employ above a Million of People in them; and this will appear to be far from an Exaggeration, if it is conſidered, that beſides the populous Cities of *Exeter*, *Saliſbury*, *Wells*, *Bath*, *Briſtol*, and *Glouceſter*, the largeſt Towns, and a greater Number of them than any other Part of *Great-Britain* can ſhew, and of which ſome exceed in Magnitude the great northern Towns of *Leeds*, *Wakefield*, *Sheffield*, *&c.* ſuch as *Taunton*, *Devizes*, *Tiverton*, *Crediton*, *Bradford*, *Trowbridge*, *Weſtbury*, *Froom*, *Stroud*, *Biddeford*, *Barnſtaple*, *Dartmouth*, *Bridgewater*, *Blandford*, *Wimbourn*, *Sherborn*, *Cirenceſter*, *Minehead*, *Pool*, *Weymouth*, *Dorcheſter*, *Honiton*, *Malmſbury*, *Warminſter*, *Tedbury*, *Tewſbury*, and many others too numerous to be inſerted, as they amount to about a hundred and twenty Market-Towns, and more than thirteen hundred Pariſhes, are all employed either in Spinning, Weaving, or ſome other preparatory Branch of the Woollen Manufactory; and notwithſtanding the Aſſiſtance is ſo great, and the Hands ſo many, yet it is by ſome affirmed that they purchaſe yearly thirty thouſand Packs of Wool, and twenty-five thouſand Packs of Yarn ready ſpun from *Ireland*.

It has already occaſionally been obſerved, that the interior or middle Parts of *England* do alſo ſupply their Share of Wool, as *Leiceſter*, *Northampton*, and *Warwickſhires* feed a prodigious Number of large Sheep, like thoſe of *Lincolnſhire*, for the *London* Market, whoſe Wool being of an extraordinary long Staple, and exceeding fine, is carried, or the greateſt Part of it, weekly, on *Tueſdays* and *Fridays*, to *Cirenceſter* Market, which borders on *Glouceſterſhire* and *Wilts*, being not leſs in Quantity than five hundred Packs *per* Week, and is there bought by the Combers, and Carders of *Tedbury*, *Malmſbury*, and moſt of the Towns on that Side of the aforeſaid two Counties, *extra* of what the Clothiers purchaſe themſelves, and diſtribute among the Poor of the neighbouring Parts for Spinning; which being performed, the Yarn is diſperſed as far as *Froom*, *Warminſter*, and *Taunton*, and ſo made to ſupply the Manufacturers of the Weſt Country.

That Part of the *Leiceſterſhire* Wool, which remains undiſpoſed of in this Manner, is carried northward to *Wakefield*, *Leeds*, *and Halifax*, where it is mixt and worked up with the Wool of thoſe Counties not eſteemed in general ſo fine as the ſouthern ones produce, though the Fleece from the Woulds, or Downs, in the *Eaſt* Riding of *Yorkſhire*, and the Biſhoprick of *Durham*, is an Exception to the above Remark, as it is very fine and of a good Staple, more eſpecially from the Banks of the *Tees*, which are for a conſiderable Space of a rich Soil, and the Sheep deemed the largeſt in *England:* It is hither that all the beſt Wool of the neighbouring Territories is brought; and the coarſer Sort, with that from *Scotland*, carried into *Halliſax*, *Rechdale*, *Bury*, and the manufacturing Towns of *Lancaſhire*, *Weſtmorland*, and *Cumberland*, and there employed in the coarſer Fabricks of thoſe Coun-

ties, as Kerſeys, Half-thicks, Yarn Stockings, Duffels, Rugs, *Turkey*-work Chairs, and many other uſeful Manufactures, which thoſe Parts abound in.

But it muſt not be underſtood from what I have here mentioned of the aforeſaid Manufactures, that they are confined to the Places there quoted, as they flouriſh in many other Parts of the Kingdom, and are taken Notice of in the ſeveral Counties and Places where they are eſtabliſhed. The Products of this Shire are, beſides its Sheep and Wool, a little Fullers-Earth, many of the famous Rabits of *Auburn* Chaſe, and a large Quantity of Cheeſe, as mentioned under *Berkſhire* and *Somerſetſhire*.

39. *Worceſterſhire*

Is not among the Number of the moſt conſiderable Counties, either for Products or Manufactures; it abounds in Corn, Cattle, Cyder, and Perry; at *Droitwich* are Salt Works; at *Stowerbridge* thoſe for Iron and Glaſs; Broad Cloth, mixt or Medleys, Frize, various Sorts of Stockings, *&c.* are made at *Worceſter*; Stuffs for Hangings and Printing, with ſome Linſey Woolſey at *Kidderminſter*, and Seamen's high crowned Caps, called *Monmouth* Caps, at *Bewdly*.

40. *Yorkſhire*,

The largeſt Shire in *England*, has a proportionable Share both of the foreign and home Trade of it, which it carries on from the ſeveral good Ports lying in the County: Its Products are various, according to the Difference of the Soil, which in ſo large a Tract muſt be much more fertile in ſome Parts than others. At *Wakefield* are Coals, at *Knareſborough*, *Ripley*, and *Pontefract*, Liquorice. In the *North-Riding*, the Hills encloſe Lead, Copper, and Pit Coal; in the *Eaſt-Riding* is Allum, and about *Sheffield* Iron, which is there wrought into various Cutlery Wares. At *Rippon*, *Leeds*, *Halifax*, *Wakefield*, *Bradford*, and *Huthersfield*, are large Manufactories of broad and narrow Cloth, mixt, called Dozens, Kerſeys, and ſome Shalloons; *Doncaſter* is noted for Stockings, Gloves, and knit Waiſtcoats, as *Rippon* is for Spurs; and in ſeveral Parts are found Freeſtone, Fullers-Earth and Jet. This is a great Dairy County, and ſends a hundred thouſand Firkins of Butter yearly to *London*, of which about fifteen thouſand are ſhipped on the River *Tees*, from the Port of *Stockton*; fifty-five thouſand is the average Quantity, one Year with another, brought into the City of *York*, and ſent down the *Humber* in Keels, to be reſhipped at *Hull*, and the remaining thirty thouſand are ſent from that Place, *Malton*, *Whitby*, and *Scarborough*. Among other Products of this County particularly, as well as others, that of Horſes ſhould not be forgot, which brings large Sums of Money into the Kingdom, there being few Princes in *Europe* who are not ſupplied from *England* with Saddle-Horſes for their own Uſe, and for the Officers of their Armies.

This finiſhes the Counties in *England*; and I now proceed to thoſe of *Wales*, of which the Commercial Deſcription will be ſhort, as they afford but very little towards the Support or Increaſe of Trade.

1. *Angleſey*

Is an Iſland encompaſſed on all Sides by the *Iriſh* Sea, except on the S. E. where it is parted from *Caernarvonſhire* by the River *Menay* or *Menia*; it produces Cattle and Corn in plenty, with good Store of Mill-Stones to grind it.

And within the laſt ſeven Years, a new Source of Wealth, highly profitable to the Individuals who are the Proprietors, and very beneficial to the Nation has ſprung up from the Soil of this Diſtrict, in the rich Mines of Copper which have been diſcovered, and wrought to ſuch Perfection, that this valuable Manufacture in Plates, or what they call Sheets, for ſheathing the Bottoms of Ships, and covering of Buildings in the Room of Slates is become a conſiderable Article of Exportation, and of Home-Conſumption.

The Rivalry between the new *Angleſey* Copper Company, and that of the *Corniſh* Miners, long ſince eſtabliſhed, occaſioned ſome ſharp Conteſts and Ligitations

at

at firſt; but they are now happily ſubſided and a Union of Intereſts has taken place, to the Advantage of both.

2. *Brecknockſhire*,

Like the preceeding, affords Cattle and Corn, with ſome Otter Furr; and *Brecknock* hath a good Trade for Clothing.

3. *Cardiganſhire*,

Beſides the afore-mentioned Products of Corn and Cattle, has good Mines of Lead, ſome Copper, and a little Silver, though no Manufactures of any Sort.

4. *Caermarthenſhire*

Affords more Plenty of all Things than the preceeding Counties, as it abounds in Corn, Cattle, and Salmon; has Pits of Coal, and Mines of the beſt Lead; beſides which the Dairying Buſineſs, having been greatly improved of late Years in *South-Wales*, but more eſpecially in this Part of it, the Town of *Caermarthen*, is become the Staple for it, and from thence are ſhipped about fifteen thouſand Firkins of Butter for *London* yearly.

5. *Caernarvonſhire*

Has plenty of Cattle and Corn, though no other Commodities, nor any Manufactures for Trade; ſo ſhall paſs on to

6. *Denbighſhire*,

Which in many Parts is very fruitful, more eſpecially in Rye, Goats, and Sheep. *Denbigh* is noted for Glovers and Tanners. Near *Moinglath*, and in ſeveral other Parts, are good Lead Mines; and large Parcels of Flannels are ſold at *Wrexham* Market, with Huckaback Linen to the Value of 500*l.* weekly: Blankets are alſo made in this Part of the Country, and ſome Stockings both of Worſted and Yarn.

7. *Flintſhire*.

This County has plenty of Cattle, which affords the Inhabitants greater Quantity of Milk for their Dairies than is poſſeſſed by their Neighbours, and of which they make more Butter and Cheeſe than they want. Here is likewiſe Lead, Pit Coal, almoſt ſufficient to ſupply *Dublin* Market; Mill Stones, and Honey enough to make good Store of *Metheglin*, a Beverage which the Natives are very fond of.

8. *Glamorganſhire*,

Of which the South Part is ſo fruitful as to be called the Garden of *Wales*, yet its Products are confined to Cattle and Corn, and the Natives' Attendance thereon is their ſole Employ.

9. *Merionethſhire*

Can boaſt only of Sheep for its Products, and wrought Cotton for its Manufactures; ſo that it affords nothing for Englargement in its Deſcription.

10. *Montgomeryſhire*

Is a delightful County, though noted for nothing but its Breed of Horſes and Goats; ſo that like many other Shires of this Country it might be paſſed over unremarked, did not my propoſed Method require the contrary.

11. *Pembrokeſhire*,

Though a very pleaſant County, and abounding with all the Neceſſaries of Life, brings nothing to Trade, except ſome of the largeſt Salmon in *Britain*, taken near

near *Cardigan*, in the River *Tyvy*, and conſequently affords no Room for enlarging.

12. *Radnorſhire*

Makes ſome Cheeſe, and breeds ſome Horſes, with which it drives a ſmall Trade, though hardly worth Regard.

To the preceeding Account of *England* and *Wales*, I muſt add this Obſervation; that beſides the Products and Manufactures therein mentioned, ſeveral of leſs Import are diſperſed in many Parts of the different Counties, as of Tanners, Potters, *&c.* which all together produce Commodities to a very conſiderable Value: More eſpecially the Manufactures of Porcelain at *Bow*, *Chelſea*, and *Worceſter*, the two latter for ornamental, and the former both for this, and uſeful China, which are brought to ſuch Perfection, as in many Reſpects to equal, and in ſome to exceed, the original Fabricks of the *Indies*.

Having finiſhed my promiſed Deſcription of the *Southern* Part of *Great-Britain*, with Reſpect to its Products and Manufactures, my intended Method now leads me to do the ſame by the *Northern* Part called *Scotland*, which is bounded on the *South* by the *Iriſh* Sea and *England*, from which it is divided by *Solway* Firth, and the Rivers *Eſk* and *Kerſop*, on the *Weſt* Border, by the *Cheviot* Hills, in the middle Marches; and by the lower Parts of the River *Tweed* on the *Eaſt* Border. On the *Eaſt* it is bounded by the *German* Sea; on the *North* by the *Deucalidonian* Sea: and on the *Weſt* by the great *Weſtern* Ocean.

Its Situation is by ſome ſuppoſed to be from 54°. 54′. to 58°. 32′. of Latitude, and from 158. 40′. to 17°. 50′. of Longitude; though by *Straloch's* Maps the Latitude is made to be from 55°. 11′. to 59°. 20′. and the Longitude from 10°. 5′. to 16°. 0′.

Authors likewiſe differ as much about its Extent as they do in Regard to its Situation, though the Generality of them conclude it to be from the *Mull* of *Galloway* in the *South*, to *Dungſbayhead* in *Cathneſs*, *North*, about 215 *Scots* and 257 *Italian* Miles; and between *Buchaneſs*, on the *Eaſt* Sea, and *Ardnamurchan* Point on the *Weſt*, near 140 *Scots* or 168 *Italian* Miles; and though it be thus long and broad, yet the Sea running up into the Land in ſome Places, and the Land thruſting out into the Sea in others, leaves no one Houſe above forty or forty-five Miles diſtant from the latter.

The Diviſion of it is into thirty-one Shires and two Stuarties, of which I ſhall briefly ſpeak in alphabetical Order, and then give an Account of their Products and Manufacturers together.

1. *Aberdeen.*

This Shire is far from being unfruitful, as the Plains produce all Sorts of Corn, and the Mountains good Paſturage; the neighbouring Sea affords Plenty of Fiſh, and a ſufficient Matter of Reproach to the Natives for their Negligence, in permitting the *Dutch*, for ſo many Years, uninterruptedly to reap thoſe immenſe Gains they have done from theſe Coaſts, without being animated by their Example, at leaſt to Share the Profits with them, which I hope they will now be taught to do, by the Eſtabliſhment lately made for this Purpoſe. Hitherto they have contented themſelves with the Salmon, Trout, and Perch Fiſhery, in which the Rivers of this Shire abound almoſt to a Prodigy; and here are likewiſe found many Shells with Pearls of a large Size and good Colour. The Women in this County are noted for ſpinning a fine Linen Yarn, which they ſell to the Fabricks of *Aberdeen* in great Quantities; and is there manufactured into Cloth of a very good Quality, as is alſo done at *Strathbogy*; large Parcels of worſted Stockings are alſo made here, and of theſe, ſome ſo fine, as have been ſold for fourteen, twenty, and thirty Shillings a Pair. They pickle and pack in Barrels great Quantities of Pork for Exportation, as they do Meal and Corn; and indeed the Inhabitants of this City may juſtly be deemed univerſal Traders.

2. *Aire*

Contains the three great Bailiwicks of *Scotland*, *viz. Carrick*, *Kyle*, and *Cunningham*, which differ in the Fertility of their Soil, though none of them are barren; they produce Corn and Cattle, as the preceding Shire does, but not in ſuch Plenty; and the Inhabitants, being an induſtrious People, are many of them employed by the Merchants of *Glaſgow* and other Places, in their Herring Fiſhery. The River *Aire* abounds with Salmon and Trout; as *Lady-Iſle*, about five Miles from the Town of *Aire*, does with Fowl and Rabbits; and from *Irwin* great Quantities of *Scotch* Coal are exported for *Ireland*.

3. *Argyle*.

This Shire is generally fitter for Paſture than Tillage, though it produces Corn in great Plenty; its Rivers afford Abundance of Salmon, as its Coaſts do of Herring, Cod, and Whitings; *Lorn* is the pleaſanteſt and moſt fruitful Part of it, and the Inhabitants are more given to Fiſhing and Hunting than to any Manufactures.

4. *Bamff*

Is very fertile, and the Generality of the Country well furniſhed with Graſs and Corn, as the Rivers are with Salmon, of which here is a very advantageous Fiſhery. In *Balvenie* is found the Stone of which Allum is made; and near *Strathyla*, ſuch a Quantity of thoſe for Lime, that they build their houſes with it, *extra* of what they ſell, which brings in great Profit; as their Commerce of fat Cattle, and fine Linen, diſpoſed of in their weekly Markets, does at the Village of *Keith*. In *Balvenie* there is a Rock of very good Whet-ſtones and Hones, ſufficient to ſupply the whole Iſle; and as they are ſo abundant, the Neighbours cover their Buildings with them inſtead of Slates.

5. *Berwick*

Was originally a *Scotch* Town, and has never to this Day been accounted any Part of *England*; it has divers Cuſtoms diſtinct from thoſe of either Kingdom; and is privileged as a Place of Liberty of itſelf; it was formerly the chief Town of the *Merſe*, or *March*, which is ſtill called the Shire of *Berwick*.

This County is very fruitful in Corn and Graſs, with the former of which and Salmon, *Berwick* carries on a great Commerce; as *Duns*, famous for the Birth of *John Duns Scotus*, does for a weekly Market for Cattle and other Things, ſo that it has the beſt Trade in this County.

6. *Buthe*, *Bute*, *Boot*

Is a ſmall Iſland near the Coaſt of *Argyle*, about ten Miles long, and a Shrievalty of itſelf, whoſe Sheriff has alſo under his Juriſdiction the Iſland of *Glotta* or *Arran*; both theſe Iſles are tolerably fertile, and their Produce of the ſame Nature with that of the other *Weſtern* Iſlands; *Bute* is beſides famous for its Herring Fiſhery, as *Arran* is for the Salmon, taken in its ſeveral Rivers, and for the Herrings, Cod, and Whitings on its Coaſts.

7. *Caithneſs*

Being the northernmoſt Part of *Scotland*, and lying low on the Coaſts, produces only Corn, though the Mountains abound with Sheep, Goats, and black Cattle; of which latter large Droves are ſent to *England*, and chiefly diſpoſed of in the Counties of *Norfolk*, *Suffolk*, and *Eſſex*; it is ſuppoſed by ſome that Lead, Copper, and Iron, may be found in theſe Parts, though as yet no Mines have been opened of either; and whatever the Indications may be of theſe Riches, no one has hitherto attempted a Search after them, either through a Want of Faith or Funds, or both.

8. *Clackmannan*,

Though but a ſmall, is a fertile County, both in Corn and Paſturage, and likewiſe abounds in Salt, and produces more Coals than any Part in *North-Britain*, which are exported to *England*, *France*, and *Holland*.

9. *Cromartie*

Is a woody Country, and noted only for the Pearls found in the Waters of *Corron*; ſo I paſs on to

10. *Dumbriton* or *Dumbarton*,

Of which as little can be ſaid, in Regard of its Products, as of the preceding County; the Lowlands yielding Corn, as the Uplands do Paſturage, beſides which nothing is found here to promote Trade.

11. *Dumfries*, with the Stewarty of *Annandale*.

The Soil of this County is more ſuited for the Graſier than the Farmer, and a tolerable Trade is carried on by the Natives in Cows and Sheep. Near *Wachopdale* the People make Salt of Sea Sand, which is a little bitteriſh, ſuppoſed to proceed from the Nitre with which it is impregnated. *Dumfries* is a conſiderable trading Town, well filled with Merchants, as its Port is with Shipping, though the Woollen Manufacture that formerly flouriſhed here is now decayed.

12. *Edinburgh*, or *Mid-Lothian*.

This Tract of Land is plentifully furniſhed with all Neceſſaries for Life, and ſome for Trade, as it produces Corn and Cattle of all Sorts, Abundance of Cod, Lime-ſtone, and Salt; and near the Water of *Leith* is a Mine of Copper. *Edinburgh*, the Capital of this Shire, and of *Scotland*, is a noble City, though built on a Spot incommodious for Trade, ſo that *Leith* is the Port to it, from whence, as may reaſonably be ſuppoſed, a very great Traffick is carried on; though this might be vaſtly increaſed, had the Temper of the People led them to the Continuance and Eſtabliſhment of Manufactures; but thoſe they had before the Union are moſtly laid aſide, as the Inhabitants are more conveniently ſupplied ſince with all Sorts of Commodities from *England*.

13. *Elgin*

Takes its Name from the *Royal Burgh* ſo called, and is a very fruitful Part of the Country, as well in Corn as Cattle; *Leſſie* may properly be called its Harbour, not lying far diſtant, and is a Place of good Buſineſs. At a Village called *Germach*, are annually pickled and exported from eighty to a hundred Laſts of Salmon, all taken in the few Summer Months, and within the Space of a Mile.

14. *Fife*

Is an excellent Spot of Ground, abounding with Grain and Paſture, and in ſome Places with Lead Ore and Coal; its Seas are well filled with Fiſh, as well thoſe guarded with Scale, as Shell. At *Dumfermline* is a Manufacture of Diaper and other Sorts of good Linen, which is the Sole Employ of its Inhabitants, and thoſe of the neighbouring Towns.

15. *Forfar*, or *Angus*,

Has ſeveral Quarries of Free-ſtone and Slate, with which a good Trade is driven; near the Caſtle of *Inner Markie*, are Mines of Lead; and Iron Ore is found in Plenty near the Wood of *Dalbogne*. The higher Ground, called the *Brae*, ſupports Abundance of red and fallow Deer, with Roebucks, and Fowls; and the Salmon Fiſhery here is very conſiderable.

16. *Had-*

16. *Haddington.*

Contains *Eaſt Lothian*, which, like the other Part of *Lothian*, is a fine Country; the chief Towns are *Dunbar* and *Haddington*, of which the former had once a large Herring Fiſhery, where they cured them in the ſame Manner as at *Yarmouth*, though not with the ſame Perfection for their Preſervation, ſo that this Buſineſs is now come to Decay; as has been the Fate of a conſiderable Woollen Manufacture that once flouriſhed at *Haddington*, when, before the Union, *Engliſh* Cloth was prohibited in *Scotland*; but when that was once concluded, the Clothiers from *Worceſter*, *Glouceſter*, *Wilts*, *Somerſet*, and *Devonſhire*, poured in their Goods ſo faſt, and underſold the *Scots* ſo much, as reduced them to a Neceſſity of quitting their Fabricks, for the greateſt Part; and at this Place to content themſelves with Spinning, Dying, and Weaving of another Sort.

17. *Inverneſs*

Abounds in Iron, and with it its neceſſary Concomitant, large Woods of Fir and Oak; other Parts of the Shire are very fertile; and at the Town of *Inverneſs*, there are Manufactures of Linen and Plaids, whoſe weekly Market is plentifully ſupplied with Butter, Cheeſe, and Goats Milk, though all very bad, and ſhamefully naſty in their Kinds; up the River is a very great Salmon Fiſhery, which, when cured, is embarked at this Town, being conveniently ſituated for Trade.

18. *Kincardin.*

This County is fruitful in Corn, Paſturage, and Timber, having above five Millions of Fir Trees, beſides vaſt Numbers of many other Kinds, planted in leſs than a Century paſt. *Paldykirk* has an annual Fair, continuing three Days, where the principal Commodity ſold is coarſe Cloth, commonly tranſported to the *Netherlands*.

19. *Kinroſs*

Is a ſmall Tract of Ground, in which there is nothing remarkable, but a Lough abounding with Pikes, Trouts, and all Sorts of Water-Fowl.

20. *Lanerk.*

The chief City of this Shire is *Glaſgow*, and the beſt Emporium of the Weſt of *Scotland*, though *Lanerk* is the County Town; the Country abounds with Coals, Peat, and Lime-ſtone, but moſt advantageouſly with the Lead Mines belonging to the *Earl* of *Hopton*, near which large Pieces of Gold have been found after haſty Showers, and Lapis Lazuli dug up without much Difficulty. *Glaſgow* is, in Regard of its Trade and Grandeur, only inferior to *Edinburgh*, having a conſiderable Number of Merchants reſiding here, and no ſmall Fleet of Ships belonging to them for executing their commercial Projects, as well in *America* as elſewhere. Their Share in the Herring Fiſhery brings great Advantages to the City, as they have a Method in their Cure that makes them equal to the *Dutch* ones; here are ſome Sugar-Bakehouſes, a Manufacture for Plaids, and another for Muſlins and various Linens, of which large Parcels are ſent abroad.

21. *Linlithgow*, or *Weſt-Lothian.*

This County in general abounds with Corn-Fields, Meadows, and green Hills, which afford Paſturage for large Flocks of Sheep and other Cattle; the Rivers and neighbouring Seas abound with Fiſh; and here is Plenty of Coals, for Fuel and Exportation; at *Preſton Pans*, and elſewhere are made great Quantities of Salt. At *Linlithgow* is a large Manufacture of Linen, and the Water is experienced to be of ſuch an extraordinary Nature for Bleeching, as to induce many People to bring their Linen for Whiting here, to the no ſmall Advantage of the Place.

22. *Nairn.*

The Soil of this County is fruitful and rich, the lower Part bearing Plenty of Corn, whilſt the upper Parts flouriſh with Paſtures fit to graze Cattle for fatting and the Pail; and indeed here is nothing wanting that any other Part of the Kingdom produces.

23. *Peebles*, or *Tweedale*,

Enjoys a temperate Climate and a clear Air; its Mountains are clothed in a beautiful Verdure that affords Paſture for large Flocks of Sheep, bearing an excellent Wool, of which the greateſt Part is ſold into *England*; the Rivers abound with Salmon, and the Vallies near them are fruitful in Corn and Graſs. Here are ſome Coal Mines, with Plenty of Turf for Fuel; and the Lake called *Weſt-Water* produces ſuch Quantities of Eels and other Fiſh, about *Auguſt*, that during a Weſt Wind they ſhoot in ſuch Shoals into a ſmall River running from the Lake, as ſometimes to overthrow the People who go in to catch them.

24. *Perth*

Is very fruitful in Grain, more eſpecially in that Part of it called *Gowry*, which is very remarkable for its noted Corn Fields, as the River *Keith* is for its fine Salmon Fiſhery. *Culroſs* is noted for its Trade in Coals, Salt, and Girdles. The *Ochil* Hills are ſaid to abound with Metals and Minerals, particularly with good Copper, and *Lapis Calaminaris*, and at *Glen Lion* with Lead. At *Perth*, the ſecond Town in *Scotland* for Dignity, is ſo conſiderable a Manufacture for Linen, as to ſupply all the neighbouring Territory in ſome Branch of it; and as the *Tay* navig a ble up to the Town for Ships of good Burthen, they here embark vaſt Quantities of it for *England*; this River alſo furniſhes the Town with fine Salmon in prodigious Quantities, which is carried to *Edinburgh*, and other Parts where this Fiſh is wanting, beſides barrelling up large Parcels for Exportation, as the Merchants of this Place carry on a very conſiderable foreign Trade.

25. *Renfrew.*

This is in general a more pleaſant than fertile County, though it furniſhes ſufficient Neceſſaries for the Natives, and that Part bordering on the *Clyde* is very fruitful. At *Greenock* is the chief Seat of the *Weſtern* Herring Fiſhery; and at *Paſly*, and for three Miles above it, in the River *Whitecart*, are found many Pearls eſteemed for their Size and Beauty.

26. *Roſs*

Is fertile in Corn, except toward the Shore next *Murray* Firth; though it abounds with Woods and Paſture, which furniſhes Food for its numerous Herds of Cattle, Goats, and Deer. At *Loch-ew* great Quantities of Iron were formerly made, and a little farther North *Loch-Brien* runs into this County, and is celebrated for its noble yearly Fiſhery of Herrings, whoſe Quantities are inconceivable, except by Eye-witneſſes of them: The Rivers of this County produce fine Pearls, and the Diſtrict of *Tayn* is a very fruitful pleaſant Country.

27. *Roxburgh*,

Fruitful in Corn and Paſturage, abounds alſo in Herds of Cattle of the beſt Breed in *Scotland*, both for Size and Goodneſs. *Kelſo* is a Town of good Trade, as are ſeveral others in this County.

28. *Selkirk*

Produces but little Corn, the Country being fitter for the Grazing Trade than the Plow; and accordingly the Inhabitants principally ſubſiſt by it, as they raiſe and feed great Quantities of Cattle, which they ſend to *England* for Sale.

29. *Stirling*, or *Striveling*

Is very fertile both in Corn and Graſs, which feeds and fattens large Flocks of Sheep and Black Cattle. Its Rivers very plentifully ſupply it with Salmon, as its Mines do with Peat and Coals; at *Stirling* there is a very conſiderable Manufacture of Serges and Shalloons, which in Make and Dye are very good, and proves a great Support to the poor People employed in it, as they are thereby enabled to live very comfortably.

30. *Sutherland*, including *Strathnavern*

Though a northern Province, is more fruitful in Corn and Paſturage than could be expected from its Situation; it abounds with Fiſh, Fowl, Sheep, black Cattle, Goats, and Deer; here is one Sort of Bird peculiar to the Country, which is called *Knag* by the Natives. This Shire abounds with Lakes and ſmall Rivers, in which are ſometimes found Pearls of great Value; as alſo in Silver, Iron, and Coal Mines, Quarries of Free-ſtone, *&c.* but all very much neglected: *Strathnavern* is Part of the County, and being very mountainous, produces but little Corn, yet is very abundant in all Sorts of Cattle, as its Lakes and Rivers are in Fiſh, more eſpecially Salmon; they have Iron alſo here, and both this and the other Part of the Shire export very conſiderable Quantities of Salt Beef, Hides, Deer, and Sheep Skins, Tallow, Butter, Cheeſe, Cod, Salmon, Wool, *&c.*

31. *Wigtoun*

Comprehends alſo the Weſt Part of *Galloway*, which produces excellent Wool, and briſk hardy little Horſes, called after the County, *Galloways*; the Rivers abound with Salmon, and both Parts having ſeveral good Harbours, they might carry on a much better Trade than they do, was the Induſtry of the Inhabitants correſpondent with the Products of the Country.

Beſides the thirty-one preceding Sheriffdoms, which ſend Members to Parliament, there are two Stewarties, *viz.* *Kirkcudbright* and *Orkney*, the former being in its Products ſimilar to *Wigtoun*, juſt now mentioned (of which it is a Part;) though the latter is very different, and conſiſts of the Iſles of *Orkney* and *Shetland*, which being many, their Soils are various, though in general they are fertile, notwithſtanding they lie ſo far North, and are fruitful in Corn and Cattle. The Author of *The preſent State of* Great-Britain, ſays, that in *Pomona* (the largeſt of the *Orcades*) there are ſeveral Mines of good white and black Lead, and that its Lakes and Rivulets abound with Salmon; Salt is made at *Sanda*, and from theſe Iſlands together are yearly exported large Quantities of Butter, Tallow, Hides, Barley, Malt, Oatmeal, Fiſh, ſalted Beef, Pork, Rabbit Skins, Otter Skins, white Salt, Stuffs, Stockings, Wool, Hams, Quills, Down, and Feathers. The Iſles of *Shetland* differ very much from the *Orkneys*, as they have but little Corn of their own Growth, ſo are obliged to import it from the others, though they have Abundance of Fiſh on their Coaſts, and an equal plenty of Cattle on their Lands: They have Manufactures of coarſe Cloths, Stockings, and knit Gloves for their own Uſe, and ſome they ſell to the *Norwegians*.

And from this Deſcription of the Products, and Manufactures of the different Shires may be collected, that *Scotland* furniſhes to the trade of *Great-Britain* large Quantities of Wool, wrought, and unwrought; Hemp and Flax, crude and worked up into Linens coarſe and fine; Hollands, Cambricks, Muſlins, Callicoes, Dornick, Damaſks, *&c.* Plaids (in which they excel all Nations both in Fineneſs and Colours) Iron, Copper, and Lead both white and black; Pearls, Coral, and ſometimes Ambergris; great Quantities of Fiſh, ſuch as Whales, Herring, Salmon, Cod, Ling, Turbots, Mackarel, and ſometimes Sturgeon; among theſe may alſo be reckoned Otters, as they are Amphibious Creatures, and produce a Wool which ſerves for various Uſes. *Scotland* alſo affords Fullers-Earth, ſome Sperma Ceti (found on the Coaſt of the *Orcades*) Coal, Marble, Agate, Cryſtal, *&c.* different Sorts of Grain, Cattle, Butter, Cheeſe, Timber, *&c.* of which ſome are ſent to different Markets, as will be remarked when I ſpeak of the Imports and Exports of this

Kingdom, which I ſhall do ſubſequent to the ſhort Deſcription I have to give of the Counties in *Ireland*, to which I am now led in the Proſecution of my Scheme.

IRELAND. *Ireland* is divided into four Provinces, *viz. Connaught*, *Leinſter*, *Munſter*, and *Ulſter*; and theſe again ſubdivided into Counties, of which *Connaught* contains *Gallway*, *Letrim*, *Mayo*, *Roſcommon*, *Slego*, and *Thomond*; *Leinſter* conſiſts of *Catherlagh*, *Dublin*, *Eaſt-Meath*, *Kildare*, *Kilkenny*, *King's County*, *Longford*, *Queen's County*, *Weſt-Meath*, *Wexford*, and *Wicklow*; *Munſter* is compoſed of *Cork*, *Kerry*, *Limerick*, *Tipperary*, and *Waterford*; *Ulſter* contains *Armagh*, *Antrim*, *Cavan*, *Down*, *Donnegal*, *Fermanagh*, *Londonderry*, *Louth*, *Monaghan*, and *Tyronne*; of all which briefly and in Order.

1. *Gallway*

Is a County very fruitful to the Farmer, and not leſs advantageous to the Shepherd; its chief City is called after the County, and is a Place of great Trade, being finely ſituated for carrying it on, in a Harbour capable of containing a large Fleet of Ships, called the Bay of *Gallway*.

2. *Letrim*,

Though a very hilly Country, produces Plenty of a rank Sort of Graſs, which feeds almoſt an infinite Number of Cattle, ſo that Grazing is here the principal and indeed almoſt ſole Employ.

3. *Mayo*.

A Diſtrict very different from the preceding, as it is very fertile, and remarkably rich in Cattle and Deer, beſides being celebrated for its producing a large Quantity of fine Honey.

4. *Roſcommon*,

Being a plain Country, is ſuited to the Plow, and with very little Labour becomes fruitful, and yieldeth Plenty of Corn.

5. *Slego*,

Though not abounding in Grain, is a very plentiful County both for breeding and feeding Cattle; ſo that beſides the Advantages ariſing from the fattening them, the Fleece and the Pail proclaim the Riches of the graſing and dairy Trade. *Slego* had in the Year 1723 eighteen Ships, with 880 Tons, belonging to its Port.

6. *Thomond*

Is a very fruitful Soil, abounding both in Tillage and Paſturage; beſides which it enjoys the Advantages of a commodious Situation for Trade and Navigation.

7. *Catherlagh*.

This County enjoys a Diverſity of Soil, all contributing as well to Pleaſure as Profit; its terrene Fertility being blended with the advantageous Products of the Woods; and the Beauties of *Ceres* and *Faunus* contributing by their Contraſt to form a delightful Landſkip.

8. *Dublin*

Produces Corn and Graſs in Plenty, and conſequently cannot be deſtitute of Cattle, though it is of Wood, ſo that the Fuel is only Peat dug here, and Coal brought from *Wales* and other Parts of *Great-Britain*. The City of *Dublin* is the Capital of *Ireland*, and eſteemed the beſt built of any one in the three Kingdoms, next to *London*; it carries on a great Trade, has large Manufactures, and in the aforeſaid Year 1723, had 1834 Veſſels, with 90,758 Tons, appertaining to it.

9. *Eaſt-*

9. *Eaſt-Meath*

Is a County very rich, pleaſant, and populous, affording an Employ for the Grazier, Farmer, and Manufacturer, carrying on a good Trade, more eſpecially from the chief Town of *Trim*.

10. *Kildare*,

Not unlike the preceding, being rich and abundant in all Neceſſaries of Life; and furniſhing Sundries for Trade.

11. *Kilkenny*,

In Plenty of all Things, is inferiour to no other Part in this Kingdom; the chief City, bearing the County's Name is very large and ſtrong, and the moſt populous, rich, and beſt trading inland Place in *Ireland*.

12. *King's-County*

Is a Spot not near ſo fertile as ſome others, and therefore affords but little to be ſaid in its Favour.

13. *Longford*,

Though a ſmall, is a very rich and pleaſant Country, abundant in Products, both for the home Conſumption and Sale.

14. *Queen's-County*.

This is a poor County, full of Woods and Bogs, productive of very little Corn, though it is ſomething more abundant in Cattle, to which its whole Riches are confined, with the Exception of what their Timber produces.

15. *Weſt-Meath*

Abounds in Plenty of all Things, and for Fertility and Populouſneſs is inferior to no County in this Kingdom, which enables it to furniſh Trade with ſeveral Commodities.

16. *Wexford*,

Like the preceding County is very fruitful, and produces Plenty of Corn and Graſs; it likewiſe abounds in Cattle; and *Wexford*, the Borough Town, was formerly reckoned the Chief City in all *Ireland*; and though it is not ſo now, it yet continues a Place of good Trade, having a very commodious Haven at the Mouth of the River *Urem* or *Slany*, to which belonged, in 1723, twenty-one Ships, with 640 Tons.

17. *Wicklow*

Muſt neither be counted fertile, nor barren, being of a middling Nature, and conſequently its Products do not greatly increaſe or improve Commerce; its Port, of this Name, however had appertaining to it, in 1723, twenty-one Ships, with 799 Tons.

18. *Cork*.

It is, including *Deſmond*, the largeſt County in *Ireland*, though counted very wild and woody; it has ſeveral good Trading Towns, as *Youghill*, *Kinſale*, *Roſſe*; *Baltimore*, but above all, the Capital of the County, *Cork*, which is a Place from whence great Exports are made, having a very Commodious Harbour, and being otherwiſe conveniently ſituated for that Purpoſe; it had, in the Year 1723, ſix hundred and ninety Ships, with 36,526 Tons, belonging to it; *Youghill* fifty-one Ships, with 2153 Tons; *Kinſale* forty-four Ships, with 2214 Tons; *Roſſe* twenty-ſeven Ships, with 1591 Tons; and *Baltimore* thirty-eight Ships, with 1193 Tons.

19. *Kerry*

Has its Mountains generally covered with Wood, and its Vallies enriched with Corn Fields; *Dingle* is the chief Town, well ſituated for Trade and Navigation, on a large Bay of the ſame Name, and the weſternmoſt of any Note in all the Kingdom, and had, in the above-mentioned Year, appertaining to it, ſix Ships, with 288 Tons.

20. *Limerick*

Is a fertile Country and well inhabited, being mountainous towards the Weſt, and the Reſt plain. *Limerick*, the Capital, is an elegant, rich, and populous City, whoſe trade is very conſiderable; for though its Diſtance from the Sea is about fifty Miles, yet Ships of Burthen may come up to the very Walls, and in the aforeſaid Year it had belonging to it ſeventy-one Veſſels, with 3443 Tons.

21. *Tipperary*

Towards the South is exceeding fruitful, though the other Parts of it not ſo; its Products furniſh ſomething towards Trade, though it has no Place well ſituated for carrying any on.

22. *Waterford*,

A moſt delightful Country, whether conſidered in Regard to Riches or Pleaſure; and *Waterford*, the chief City, and the ſecond for Bigneſs in the Iſland, is very wealthy, populous, and well ſituated for Trade, in which it is very conſiderably engaged; and its Exports are as large in Leather, Butter, *&c.* as moſt in the Kingdom; it ſtands at a good Diſtance from the Sea, yet Ships of a large Burthen may come up to, and ſafely lie at the Key, of which it had of its own, in 1723, 176, with 7554 Tons.

23. *Armagh.*

This County, for Richneſs and Fertility of Soil, is ſuppoſed to ſurpaſs any in *Ireland*, though being deſtitute of Places of Trade within itſelf, its Product ſerves to ſwell the Number of thoſe that integrate the Commerce of its better ſituated Neighbours; it is, however, fully employed in the manufacturing Linens, which ſupply its Want of the exporting Buſineſs.

24. *Antrim*

Is ſufficiently fruitful, and is one of the five Counties that are fully employed or embarked in making Linens: its chief Town *Carrickfergus*, or *Knockfergus*, is very rich, populous, and a Place of good Trade, being commodiouſly ſituated for it on a Bay of the ſame Name, with an excellent fine Harbour; to which we may add *Belfaſt*, about eight Miles diſtant, ſeated at the Mouth of *Lagen*-Water, as it is a thriving Town, and daily improving, having three hundred and ſeventy Sail of Veſſels, with 9180 Tons, appertaining to it in 1723.

25. *Cavan*

Affords little worth Regard in a Work of this Nature, as the ſole Employ of the Inhabitants is ſpinning Thread for the Linen Manufactures in other Parts.

26. *Down.*

A very fertile Spot in general, though ſome Parts are incumbered with Woods and annoyed by Bogs; here are ſome Towns with a pretty good Trade, lying on *Carrickfergus* Bay, *&c.* but the principal Employ of the Natives is the Linen Manufactre, carried on to as great a Height in this as in any other County of the Kingdom.

27. *Donnegal*

27. *Donnegal*

Is a fine champagne Country, and with many more Havens than any other Diſtrict in the Kingdom; ſo that its Situation for Trade naturally encourages the Inhabitants to improve and fall more into it, than other Parts deſtitute of ſimilar Advantages. *Killebegs* had ſix Veſſels, with 355 Tons, belonging to it ſo far back as the Year, 1723; and a large Quantity of Thread is ſpun in this County for making Linens in its Neighbourhood.

28. *Fermanagh.*

So like to *Queen's-County*, that one Deſcription may ſerve for both.

29. *Londonderry.*

A County ſomething champagne, and very fruitful in Corn, Cattle, *&c.* it has ſome Places of Trade, though none of ſo much Conſequence as *Londonderry*, which in 1723, had fifty-eight Ships, with 2281 Tons, belonging to it, and *Colerain* thirty-four, with 796 Tons: this is a Part of the Country very conſiderable for its Linen Manufactures, in which the major Part of the Inhabitants find a full Employ.

30. *Louth*

Is a County abounding in Forage, and otherwiſe ſufficiently fruitful, carrying on a very good Trade, from the many Towns it has well ſeated for commercial Engagements, as *Drogheda*, *Dundalk*, *Carlingford*, *&c.* of which the firſt had in the aforeſaid Year a hundred and eighty-five Veſſels, with 4715 Tons, and *Dundalk* two hundred and thirty-two Ships, with 4302 Tons, appertaining to them.

31. *Monaghan.*

Only to be mentioned for Method Sake, as it is a Territory covered with Hills, and theſe with Woods, without any Scite or Products for Trade, except what the Natives procure in ſpinning Thread for the Linen Fabricks of other Parts.

32. *Tyrone.*

This is a rough and rugged Country, but withal ſufficiently fruitful, though without affording any Thing particular to remark in Regard to Trade, except its extenſive Linen Manufacture, which affords the Natives a very comfortable Support.

From the preceeding Account of the Shires, may be collected that the Products and Commodities of *Ireland* are, Cattle, Hides, Tallow, Suet, great Quantities of Butter and Cheeſe, Wood, Salt, Honey, Wax, Furs, Hemp, Linen and Woollen Cloth, Frizes, vaſt Store of Wool, coarſe Rugs, Pipeſtaves, Hoops, Salmon, Herrings, Pilchards, Lead, Tin, and Iron, of all which I ſhall remark what ſerves for Exportation, when I come to ſpeak of the foreign Trade of this Kingdom in its proper Place; but ſhall, previous thereto, treat of the general Traffick of *Great-Britain*, in the Method I formerly propoſed, *viz.* by dividing it into the home and foreign; though in this ſome Difficulty occurs, as they are too much blended to admit of an eaſy and nice Separation. Our home Trade, which is certainly the greateſt in *Europe*, being conſiderably encreaſed by our Importation of many foreign Commodities, as Wines, and Brandies, Oranges, Lemons, Raiſins, Almonds, Figs, Spices, Anchovies, Capers, and Olives, all conſumed within Land, and moſtly by a retail Trade; raw and thrown Silk, Linen and Cotton Yarn, *Spaniſh* Wool, *&c.* all manufactured here; Materials for Dying, ſuch as Woad, Madder, Sumach, Orchil, Indigo, and Cochineal; Oil, both edible and for cleanſing our Woolens, *&c.* Theſe and many more imported Commodities, are mixed with our Products and Manufactures to the Supply of our Tradeſmen's Shops, and the conſtituting that one immenſe Article called the *home Trade*. I might here expatiate on the Subject;

ject; and add, that all thoſe Goods uſed in our Fabricks, do not only paſs through the Hands of the Weaver to that of the Shop-keeper, as raw Silks are firſt dyed, ſpun, and thrown, before they are woven, and ſo loſe their Species to become an *Engliſh* Manufacture; Cottons paſs pretty near the ſame Transformation; and almoſt all theſe conſumed amongſt us. But the principal Branch of our home Trade, and in which an infinite Number of Hands are employed, is our Woollen Manufacture, whoſe Importance will be demonſtrated, by explaining the many different Steps taken towards its Perfection; for though on a tranſient View it ſeems ſoon and eaſily performed, yet the *Apparatus*, rightly regarded, will be found to be very conſiderable, and almoſt equal to the Manufacture itſelf, as the Materials muſt be differently prepared, and paſs through ſo many Hands before they come to the Finiſher, and after him to the Tradeſman.

The Wool and Oil have been already mentioned as the great Principles of the Manufacture in general, as theſe are brought by different Channels to the Artiſan, and indeed paſs a long Way in the ordinary Channel of Trade, before they meet at the Clothier's Houſe.

The beſt Oil for this Purpoſe comes from *Gallipoli*, and moſt of the imported Wool from *Ireland* and *Spain*, the Quantity of that from *Turkey* and *Barbary* being but ſmall; though the principal Fund of this Manufacture is the Produce of our own Sheep. This Wool takes a great many different Turns through many Hands, and appears in a Variety of Shapes; ſuffers ſeveral Operations and Changes, before it arrives at the Clothier's; and in theſe various Alterations, or Mutations of its Species, it may juſtly be ſaid to be for ſome Time the Employ of different Tradeſmen, and thereby conſiderably to augment our home Trade.

The Wool is firſt taken from the Sheep's Back, either by the Shearer, Farmer, or Fellmonger, and generally ſold to the Staplers, who are a conſiderable Set of Tradeſmen ſcattered over the Kingdom in order to make theſe Purchaſes, and who afterwards convey it to the firſt Part of its Manufacture, by ſelling it for Combing and Carding. This Operation is ſucceeded by the next, that of Spinning; though previous hereto, an occaſional Branch of Buſineſs intervenes, I mean that of Carriage, which is far from being inconſiderable, as none of the Wool is ſpun where it grows; and thus it muſt be ſorted, oiled, combed, carded, ſpun, and otherwiſe prepared, before it becomes fit for the Loom, which I mention to ſhew the Greatneſs of this Buſineſs; though the whole muſt not be called a home Trade, as it furniſhes a principal Branch of our Exports to all Parts of the World.

Another Part of our home Trade is that inconceivable Branch of Land and Sea Carriage; the Proceſs of the Coal Trade from the Mine to the Conſumer: The Portage of Butter, Cheeſe, and all other Commodities, from Place to Place, but more eſpecially of Corn, Malt, and Meal is prodigious; and though this is neither Buying or Selling, Making or Manufacturing, Planting, or Reaping, yet it muſt be reckoned a Part of Trade, as carried on by thoſe who are juſtly called Tradeſmen; and were it poſſible to calculate the immenſe Sums of Money which this Buſineſs annually produces, the Number of Men, Cattle, and Ships that it conſtantly employs, with the conſequentially neceſſary Retainers, of Ship-Carpenters, Wheelwrights, *&c.* my Reader might form ſome Idea of the Vaſtneſs of this Commerce, and the Importance of the People who carry it on.

Beſides which, our Country furniſhes for home Conſumption, as well as Exportation, many Things too tedious to be enumerated in the Limits I have preſcribed myſelf, ſo ſhould now commence my Account of our foreign Trade: But as its Advantages to *England* have been conteſted, by Men even of Genius and Parts, and an extended Trade by them denied to be beneficial to us, I ſhall endeavour to prove the contrary, and to remove any Doubt that may ſtill remain with ſome People about it; though I ſhould have thought the ſucceſsful carying it on above two Centuries, ſhould have rendered this needleſs. The Author of *Ways and Means* has taken Notice of this Propoſition, and being more equal to the Taſk of Replying than I can preſume to be, I ſhall join his Sentiments to my own on the Subject, as I think they carry Conviction with them.

The Cavillers againſt Commerce ſeem to do it out of a bigotted Zeal for the landed Intereſt, aſſerting, that our own native Product is both ſufficient for our Support at home, and to defend us againſt our Enemies from abroad; they imagine, and therein

do

do not err, that our own Soil plentifully ſupplies us with the common Wants and Neceſſaries for Life, ſuch as Food or Raiment; they think, that extra of what we conſume at home, our Fiſhery, and the Exportation of our Woollens, Tin, Lead, Leather, *&c.* may fetch us ſuch Goods from abroad, as are of abſolute Uſe; and from theſe Conſiderations are always warm in what regards the Land, but more careleſs and indifferent in the Concerns of Trade, than is conſiſtent with the Welfare, and perhaps compatible with the Safety of the Kingdom.

If the following Particulars are duly conſidered and attended to, it will plainly appear, whether we are able to ſubſiſt by our own native Strength or not; as firſt, it ſhould be ſtrictly examined what is the real Value of the Fiſh we cure, either at home, or in our Plantations; and what our Woollen Manufactures, Tin, Lead, Leather, *&c.* may really yield us in the Markets abroad: For though the annual Exportation of theſe Commodities is a certain Wealth to the Nation, yet a Deduction muſt be made from the Profits, for the neceſſary Import of the Materials for building and rigging of Ships, *Spaniſh* Wool to improve our finer Sort of Drapery, raw Silk, dying Drugs, Salt-petre, Salt for our Fiſhery, and many other Commodities, without which ſeveral of our Manufactures could not be carried on; and beſides theſe, our Luxury and Depravity of Manners have introduced among us the Uſe of many Things from abroad, as Wine, Oil, Fruits, Spices, fine Linens, Silks, Jewels, *&c.* which it would be difficult now to paſs without, Cuſtom becoming a ſecond Nature. It is true, a Reſtraint might be laid by ſumptuary Laws, but as theſe have been ſo long diſcontinued, they are become almoſt Strangers to our Conſtitution, and could not be revived without Murmurs and Repinings; ſo that the Proof of the Advantages ariſing from Commerce would not be difficult, or that theſe Advantages are not to be ſlighted as immaterial to the national Welfare.

I will allow that a rich Soil may not only nouriſh its Inhabitants, but enable them with the Overplus to purchaſe a little foreign Luxury, provided they be moderate in their Appetites, and a ſmall Share will ſatisfy and content them; ancient Frugality muſt be reſtored, Rents be admitted in Kind, and Landlords contented to live among their Tenants.

I could add much more in Support of the Argument propoſed, but muſt content myſelf with having offered the few preceding Remarks in its Favour, and ſhall now paſs forward to my intended Account of our foreign Trade;

And I begin firſt with *France*.

Of the Commerce between Great-Britain *and France.*

NO commercial Subject whatever has undergone ſo much inveſtigation, ſo ſtrict a Scrutiny, nor ſuch ſevere Cenſures as the trading Intercourſe between *France* and *Great-Britain*. The Contention laſted upwards of One Hundred and Fifty Years, and has at length terminated in a Treaty of Commerce, an Event no one commercial Writer would have ventured to predict; and which the Editor of this Work, alone, preſumed to adviſe as a political Meaſure of the firſt Importance, if practicable; at the ſame Time, thinking it highly improbable, from the Prejudices ſubſiſting in both Kingdoms againſt each other, and the firm Perſuaſion of the Subjects of *Britain*, that no Plan of Commerce beneficial to them could be propoſed. On the other Hand, the French Government ſhewed no Deſire to enter into any Negociation of the Kind, whilſt a conſiderable clandeſtine Trade was carried on from their Coaſts to ours, in thoſe valuable Articles Teas, Wines, Brandies, Laces and Cambrics, prodigious Quantities of each being ſmuggled into *Great-Britain* and *Ireland*, to the great Detriment of the public Revenue, and of the Trade and Manufactures of theſe Kingdoms.

But when the wiſe Meaſures adopted by the *Britiſh* Government in lowering the Duties upon the Importation of Teas, and the Regulations reſpecting Wines and Spirits began to take Effect to ſuch a Degree as nearly to ſuppreſs the chief Branches of this illicit Trade; the Miniſtry of France began to think ſeriouſly of a Treaty of Commerce with *Great-Britain*. Political Cauſes, which we cannot enter into in this Place, likewiſe contributed to change the Syſtem of Commerce for the reciprocal Benefit of both Countries.

From the Year 1663, to 1778, we read of nothing but heavy Complaints from all our commercial Writers, concerning the Loſſes ſuſtained by *Great-Britain* by the lawful and unlawful Trade with France; the Balance of which in ſome Years, during Times of profound Peace, was ſtated to amount to more than 1,000,000*l.* Sterling, againſt us, independent of the Specie carried out of the Kingdom, to ſupport *Engliſh* Families reſiding in *France* and occaſionally viſiting *Paris*.

The great Alteration therefore which has been effected by the following Treaty of Commerce, redounded to the Honour of the *Britiſh* Miniſtry under whoſe Adminiſtration it was concluded; and it is earneſtly to be wiſhed it may be renewed at the Expiration of the Term ſtipulated. At preſent indeed, the Body of the People in France conſider it as too favourable to *Britain*; but we hope the more enlarged Ideas of Policy and Commerce which their *new* Government has introduced, will be the Means of continuing the friendly Sentiments now entertained by the moderate and reflecting Part of the Inhabitants of both Countries for each other; and lay the Foundation for a permanent Peace of very long Duration, which muſt be much more for the Intereſt and Proſperity of theſe once rival Nations, than thoſe repeated Wars, moſt of them ſpringing from commercial Cauſes, which ſooften diſturbed the Repoſe of Europe, and exhauſted the Treaſures of the contending Powers; not to mention the inhuman Effuſions of Chriſtian Blood, in direct Contradiction to the mild Principles of that Religion which the Rules of both Countries profeſſed to believe and follow, and in open Violation of the moſt ſolemn *Treaties* profanely made, *in the Name of the Holy, Bleſſed and Undivided* Trinity; ſigned, ſealed and ratified by Chriſtian Sovereigns; and declared to be *perpetual*.

Hitherto the ſubſequent Treaty has met with a better Fate, and therefore it is with Pleaſure we lay before our Readers an authentic Copy.

Treaty of COMMERCE *and* NAVIGATION *between his* Britannic *Majeſty, and the Moſt Chriſtian King, ſigned at* Verſailles, *the* 26*th of* September 1786.

HIS Britannic Majeſty, and his Moſt Chriſtian Majeſty, being equally animated with the Deſire not only of conſolidating the good Harmony which actually ſubſiſts between them, but alſo of extending the happy Effects thereof to their reſpective Subjects, have thought that the moſt efficacious Means for obtaining thoſe Objects, conformably to the 18th Article of the Treaty of Peace, ſigned the 6th of *September* 1783, would be to adopt a Syſtem of Commerce on the Baſis of Reciprocity and mutual Convenience; which, by diſcontinuing the Prohibitions and prohibitory Duties which have exiſted for almoſt a Century between the two Nations, might produce the moſt ſolid Advantages on both Sides, to the national Productions and Induſtry, and put an End to *Contraband* Trade, no leſs injurious to the public Revenue, than to that lawful Commerce which is alone intitled to Protection; for this End, their ſaid Majeſties have named for their Commiſſaries and Plenipotentiaries, to wit, the King of *Great-Britain*, *William Eden*, Eſq. Privy Counſellor in *Great-Britain* and *Ireland*, Member of the *Britiſh* Parliment, and his Envoy extraordinary and Miniſter Plenipotentiary to his Moſt Chriſtian Majeſty; and the Moſt Chriſtian King, the Sieur *Joſeph Matthias Gerrard de Rayneval*, Knight, Counſellor of State, Knight of the Royal Order of *Charles* III. who, after having exchanged their reſpective full Powers, have agreed upon the following Articles.

ARTICLE I. It is agreed and concluded between the Moſt Serene and Moſt Potent King of *Great-Britain*, and the Moſt Serene and Moſt Potent, the Moſt Chriſtian King, that there ſhall be a reciprocal and entirely perfect Liberty of Navigation and Commerce between the Subjects of each Party, in all and every the Kingdoms, States, Provinces, and Territories, ſubject to their Majeſties in *Europe*, for all and ſingular Kinds of Goods, in thoſe Places, upon the Conditions, and in ſuch Manner and Form as is ſettled and adjuſted in the following Articles.

ART. II. For the future Security of Commerce and Friendſhip, between the Subjects of their ſaid Majeſties, and to the End, that this good Correſpondence may be preſerved from all Interruption and Diſturbances; it is concluded and agreed that if at any Time there ſhould ariſe any Miſunderſtanding, Breach of Friendſhip, and Rupture between the Crowns of their Majeſties, which God

forbid! which Rupture ſhall not be deemed to exiſt, until there calling or ſending Home of the reſpective Ambaſſadors or Miniſters, the Subjects of each of the two Parties reſiding in the Dominions of the other, ſhall have the Privilege of remaining and continuing their Trade therein, without any Manner of Diſturbance, ſo long as they behave peaceably, and commit no Offence againſt the Laws and Ordinances; and in Caſe their Conduct ſhould render them ſuſpected, and the reſpective Governments ſhould be obliged to order them to remove, the Term of twelve Months ſhall be allowed them for that Purpoſe, in Order that they may remove with their Effects and Property, whether entruſted to Individuals, or to the State. At the ſame Time, it is to be underſtood that this Favour is not to be extended to thoſe who ſhall act contrary to the eſtabliſhed Laws.

ART. III. It is likewiſe agreed and concluded that the Subjects and Inhabitants of the Kingdoms, Provinces, and Dominions of their Majeſties ſhall exerciſe no Act of Hoſtility, or Violence againſt each other, either by Sea or by Land, or in Rivers, Streams, Ports or Havens, under any Colour or Pretence whatſoever, ſo that the Subjects of either Party ſhall receive no Patent, Commiſſion, or Inſtruction for arming and acting at Sea, as Privateers; nor Letters of Repriſal as they are called, from any Princes or States, enemies to the other Party; nor by Virtue, or under Colour of ſuch Patents, Commiſſions, or Repriſals, ſhall they diſturb, infeſt, or any Way prejudice or damage the aforeſaid Subjects and Inhabitants of the King of *Great-Britain*, or of the Moſt Chriſtian King; neither ſhall they arm Ships in ſuch Manner as is above ſaid, or go out to Sea therewith. To which End, as often as it is requeſted by either Party, ſtrict and expreſs Prohibitions ſhall be renewed and publiſhed in all the Territories, Counties, and Dominions of each Party whereſoever, that no one ſhall in any wiſe uſe ſuch Commiſſions or Letters of Repriſal, under the ſevereſt Puniſhment that can be inflicted on the Tranſgreſſors, beſides being liable to make full Reſtitution and Satisfaction to thoſe to whom they have done any Damage; neither ſhall any Letters of Repriſal be hereafter granted by either of the ſaid high contracting Parties, to the Prejudice or Detriment of the Subjects of the other, except only in ſuch Caſe wherein Juſtice is denied or delayed; which Denial or Delay of Juſtice ſhall not be regarded as verified, unleſs the Petitions of the Perſon, who deſires the ſaid Letters of Repriſal, be communicated to the Miniſter reſiding there, on the Part of the Prince againſt whoſe Subjects they are to be granted, that within the Space of four Months, or ſooner, if it be poſſible, he may manifeſt the Contrary, or procure the Satisfaction which may be juſtly due.

ART. IV. The Subjects and Inhabitants of the reſpective Dominions of the two Sovereigns ſhall have Liberty, freely and ſecurely, without Licence or Paſſport, general or ſpecial, by Land or by Sea or any other Way, to enter into the Kingdoms, Dominions, Provinces, Countries, Iſlands, Cities, Villages Towns walled or unwalled, fortified or unfortified, Ports, or Territories whatſoever, of either Sovereign, ſituated in *Europe*, and to return from thence, to remain there, or to paſs through the ſame, and therein to buy and purchaſe as they pleaſe, all Things neceſſary for their Subſiſtence and Uſe, and they ſhall mutually be treated with all Kindneſs and Favour. Provided, however, that in all theſe Matters they behave and conduct themſelves conformably to the Laws and Statutes, and live with each other in a friendly and peaceable Manner, and promote reciprocal Concord by maintaining a mutual and good Underſtanding.

ART. V. The Subjects of each of their ſaid Majeſties may have Leave and Licence to come with their Ships, as alſo with the Merchandizes and Goods on board the ſame, the Trade and Importation whereof are not prohibited by the Laws of either Kingdom, and to enter into the Countries, Dominions, Cities, Ports, Places, and Rivers of either Party, ſituated in *Europe*, to reſort thereto, and to remain and reſide there, without any Limitation of Time; alſo to hire Horſes, or to lodge with other Perſons, and to buy all lawful Kinds of Merchandizes, where they think fit, either from the firſt Maker or Seller, or in any other Manner, whether in the public Market for the Sale of Merchandizes, or in Fairs, or wherever ſuch Merchandizes are manufactured or ſold. They may likewiſe depoſit and keep in their Magazines and Warehouſes, the Merchandize brought from other Parts, and afterwards expoſe the ſame to Sale, without being in any wiſe obliged,

From the Year 1663, to 1778, we read of nothing but heavy Complaints from all our commercial Writers, concerning the Loſſes ſuſtained by *Great-Britain* by the lawful and unlawful Trade with France; the Balance of which in ſome Years, during Times of profound Peace, was ſtated to amount to more than 1,000,000*l.* Sterling, againſt us, independent of the Specie carried out of the Kingdom, to ſupport *Engliſh* Families reſiding in *France* and occaſionally viſiting *Paris*.

The great Alteration therefore which has been effected by the following Treaty of Commerce, redounded to the Honour of the *Britiſh* Miniſtry under whoſe Adminiſtration it was concluded; and it is earneſtly to be wiſhed it may be renewed at the Expiration of the Term ſtipulated. At preſent indeed, the Body of the People in France conſider it as too favourable to *Britain*; but we hope the more enlarged Ideas of Policy and Commerce which their *new* Government has introduced, will be the Means of continuing the friendly Sentiments now entertained by the moderate and reflecting Part of the Inhabitants of both Countries for each other; and lay the Foundation for a permanent Peace of very long Duration, which muſt be much more for the Intereſt and Proſperity of theſe once rival Nations, than thoſe repeated Wars, moſt of them ſpringing from commercial Cauſes, which ſooften diſturbed the Repoſe of Europe, and exhauſted the Treaſures of the contending Powers; not to mention the inhuman Effuſions of Chriſtian Blood, in direct Contradiction to the mild Principles of that Religion which the Rules of both Countries profeſſed to believe and follow, and in open Violation of the moſt ſolemn *Treaties* profanely made, *in the Name of the Holy, Bleſſed and Undivided* Trinity; ſigned, ſealed and ratified by Chriſtian Sovereigns; and declared to be *perpetual*.

Hitherto the ſubſequent Treaty has met with a better Fate, and therefore it is with Pleaſure we lay before our Readers an authentic Copy.

Treaty of COMMERCE *and* NAVIGATION *between his* Britannic *Majeſty, and the Moſt Chriſtian King, ſigned at* Verſailles, *the* 26*th of* September 1786.

HIS Britannic Majeſty, and his Moſt Chriſtian Majeſty, being equally animated with the Deſire not only of conſolidating the good Harmony which actually ſubſiſts between them, but alſo of extending the happy Effects thereof to their reſpective Subjects, have thought that the moſt efficacious Means for obtaining thoſe Objects, conformably to the 18th Article of the Treaty of Peace, ſigned the 6th of *September* 1783, would be to adopt a Syſtem of Commerce on the Baſis of Reciprocity and mutual Convenience; which, by diſcontinuing the Prohibitions and prohibitory Duties which have exiſted for almoſt a Century between the two Nations, might produce the moſt ſolid Advantages on both Sides, to the national Productions and Induſtry, and put an End to *Contraband* Trade, no leſs injurious to the public Revenue, than to that lawful Commerce which is alone intitled to Protection; for this End, their ſaid Majeſties have named for their Commiſſaries and Plenipotentiaries, to wit, the King of *Great-Britain*, *William Eden*, Eſq. Privy Counſellor in *Great-Britain* and *Ireland*, Member of the *Britiſh* Parliment, and his Envoy extraordinary and Miniſter Plenipotentiary to his Moſt Chriſtian Majeſty; and the Moſt Chriſtian King, the Sieur *Joſeph Matthias Gerrard de Rayneval*, Knight, Counſellor of State, Knight of the Royal Order of *Charles* III. who, after having exchanged their reſpective full Powers, have agreed upon the following Articles.

ARTICLE I. It is agreed and concluded between the Moſt Serene and Moſt Potent King of *Great-Britain*, and the Moſt Serene and Moſt Potent, the Moſt Chriſtian King, that there ſhall be a reciprocal and entirely perfect Liberty of Navigation and Commerce between the Subjects of each Party, in all and every the Kingdoms, States, Provinces, and Territories, ſubject to their Majeſties in *Europe*, for all and ſingular Kinds of Goods, in thoſe Places, upon the Conditions, and in ſuch Manner and Form as is ſettled and adjuſted in the following Articles.

ART. II. For the future Security of Commerce and Friendſhip, between the Subjects of their ſaid Majeſties, and to the End, that this good Correſpondence may be preſerved from all Interruption and Diſturbances; it is concluded and agreed that if at any Time there ſhould ariſe any Miſunderſtanding, Breach of Friendſhip, and Rupture between the Crowns of their Majeſties, which God

forbid! which Rupture ſhall not be deemed to exiſt, until there calling or ſending Home of the reſpective Ambaſſadors or Miniſters, the Subjects of each of the two Parties reſiding in the Dominions of the other, ſhall have the Privilege of remaining and continuing their Trade therein, without any Manner of Diſturbance, ſo long as they behave peaceably, and commit no Offence againſt the Laws and Ordinances; and in Caſe their Conduct ſhould render them ſuſpected, and the reſpective Governments ſhould be obliged to order them to remove, the Term of twelve Months ſhall be allowed them for that Purpoſe, in Order that they may remove with their Effects and Property, whether entruſted to Individuals, or to the State. At the ſame Time, it is to be underſtood that this Favour is not to be extended to thoſe who ſhall act contrary to the eſtabliſhed Laws.

ART. III. It is likewiſe agreed and concluded that the Subjects and Inhabitants of the Kingdoms, Provinces, and Dominions of their Majeſties ſhall exerciſe no Act of Hoſtility, or Violence againſt each other, either by Sea or by Land, or in Rivers, Streams, Ports or Havens, under any Colour or Pretence whatſoever, ſo that the Subjects of either Party ſhall receive no Patent, Commiſſion, or Inſtruction for arming and acting at Sea, as Privateers; nor Letters of Repriſal as they are called, from any Princes or States, enemies to the other Party; nor by Virtue, or under Colour of ſuch Patents, Commiſſions, or Repriſals, ſhall they diſturb, infeſt, or any Way prejudice or damage the aforeſaid Subjects and Inhabitants of the King of *Great-Britain*, or of the Moſt Chriſtian King; neither ſhall they arm Ships in ſuch Manner as is above ſaid, or go out to Sea therewith. To which End, as often as it is requeſted by either Party, ſtrict and expreſs Prohibitions ſhall be renewed and publiſhed in all the Territories, Counties, and Dominions of each Party whereſoever, that no one ſhall in any wiſe uſe ſuch Commiſſions or Letters of Repriſal, under the ſevereſt Puniſhment that can be inflicted on the Tranſgreſſors, beſides being liable to make full Reſtitution and Satisfaction to thoſe to whom they have done any Damage; neither ſhall any Letters of Repriſal be hereafter granted by either of the ſaid high contracting Parties, to the Prejudice or Detriment of the Subjects of the other, except only in ſuch Caſe wherein Juſtice is denied or delayed; which Denial or Delay of Juſtice ſhall not be regarded as verified, unleſs the Petitions of the Perſon, who deſires the ſaid Letters of Repriſal, be communicated to the Miniſter reſiding there, on the Part of the Prince againſt whoſe Subjects they are to be granted, that within the Space of four Months, or ſooner, if it be poſſible, he may manifeſt the Contrary, or procure the Satisfaction which may be juſtly due.

ART. IV. The Subjects and Inhabitants of the reſpective Dominions of the two Sovereigns ſhall have Liberty, freely and ſecurely, without Licence or Paſſport, general or ſpecial, by Land or by Sea or any other Way, to enter into the Kingdoms, Dominions, Provinces, Countries, Iſlands, Cities, Villages Towns walled or unwalled, fortified or unfortified, Ports, or Territories whatſoever, of either Sovereign, ſituated in *Europe*, and to return from thence, to remain there, or to paſs through the ſame, and therein to buy and purchaſe as they pleaſe, all Things neceſſary for their Subſiſtence and Uſe, and they ſhall mutually be treated with all Kindneſs and Favour. Provided, however, that in all theſe Matters they behave and conduct themſelves conformably to the Laws and Statutes, and live with each other in a friendly and peaceable Manner, and promote reciprocal Concord by maintaining a mutual and good Underſtanding.

ART. V. The Subjects of each of their ſaid Majeſties may have Leave and Licence to come with their Ships, as alſo with the Merchandizes and Goods on board the ſame, the Trade and Importation whereof are not prohibited by the Laws of either Kingdom, and to enter into the Countries, Dominions, Cities, Ports, Places, and Rivers of either Party, ſituated in *Europe*, to reſort thereto, and to remain and reſide there, without any Limitation of Time; alſo to hire Horſes, or to lodge with other Perſons, and to buy all lawful Kinds of Merchandizes, where they think fit, either from the firſt Maker or Seller, or in any other Manner, whether in the public Market for the Sale of Merchandizes, or in Fairs, or wherever ſuch Merchandizes are manufactured or ſold. They may likewiſe depoſit and keep in their Magazines and Warehouſes, the Merchandize brought from other Parts, and afterwards expoſe the ſame to Sale, without being in any wiſe obliged,

unleſs willingly and of their own Accord, to bring the ſaid Merchandizes to the Marts and Fairs. Neither are they to be burthened with any Impoſitions or Duties on Account of the ſaid Freedom of Trade, or for any other Cauſe whatſoever, except thoſe which are to be paid for their Ships and Merchandizes, conformably to the Regulations of the preſent Treaty, or thoſe to which the Subjects of the two contracting Parties ſhall themſelves be liable. And they ſhall have free Leave to remove themſelves, as alſo their Wives, Children and Servants, together with their Merchandizes, Property, Goods, or Effects, whether bought or imported, wherever they ſhall think fit, out of either Kingdom, by Land and by Sea, on the Rivers and freſh Waters, after diſcharging the uſual Duties; any Law, Privilege, Grant, Immunities or Cuſtoms, to the contrary thereof in any wiſe notwithſtanding. In Matters of Religion, the Subjects of the two Crowns ſhall enjoy perfect Liberty. They ſhall not be compelled to attend divine Service, whether in the Churches or elſewhere; but on the contrary, they ſhall be permitted, without any Moleſtation, to perform the Exerciſes of their Religion privately in their own Houſes, and in their own Way. Liberty ſhall not be refuſed to bury the Subjects of either Kingdom who die in the Territories of the other, in convenient Places to be appointed for that Purpoſe; nor ſhall the Funerals or Sepulchres of the Deceaſed be in any wiſe diſturbed. The Laws and Statutes of each Kingdom ſhall remain in full Force and Vigour, and ſhall be duly put into Execution, whether they relate to Commerce and Navigation, or to any other right, thoſe Caſes only excepted, concerning which it is otherwiſe determined in the Articles of the preſent Treaty.

ART. VI. The two high contracting Parties have thought proper to ſettle the Duties on certain Goods and Merchandizes, in order to fix invariably the Footing on which the Trade therein ſhall be eſtabliſhed between the two Nations. In Conſequence of which they have agreed upon the following Tariff, *viz.*

1ſt. The Wines of France, imported directly from *France* into *Great-Britain*, ſhall, in no Caſe, pay any higher Duties than thoſe which the Wines of *Portugal* now pay. The Wines of *France*, imported directly from *France* into *Ireland*, ſhall pay no higher Duties than thoſe which they now pay.

2d. The Vinegars of *France*, inſtead of *Sixty ſeven Pounds, five Shillings and three Pence; and twelve twentieths of a Penny Sterling, per Ton*, which they now pay, ſhall not for the future pay in *Great-Britain* any higher Duties than *Thirty two Pounds eighteen Shillings, and ten Pence, and ſixteen twentieths of a Penny Sterling, per Ton.*

3d. The Brandies of *France*, inſtead of *Nine Shillings and ſixPence, and twelve twentieths of a Penny Sterling*, ſhall for the future, pay in *Great-Britain*, only *Seven Shillings per Gallon*, making four Quarts *Engliſh* Meaſure.

4th. Oil of Olives, coming directly from *France*, ſhall for the future, pay no higher Duties than are now paid for the ſame, from the moſt favoured Nations.

5th. Beer ſhall pay reciprocally a Duty of *Thirty per Cent. ad Valorem.*

6th. The Duties on Hardware, Cutlery, Cabinet-ware and Turnery, and alſo all Works, both heavy and light, of Iron, Steel, Copper, and Braſs, ſhall be claſſed; and the higheſt Duty ſhall not exceed *Ten per Cent. ad Valorem.*

7th. All Sorts of Cottons manufactured in the Dominions of the two Sovereigns in *Europe*, and alſo Woollens, whether knit or wove, including Hoſiery, ſhall pay, in both Countries, an import Duty of *Twelve per Cent. ad Valorem*; all Manufactures of Cotton or Wool, mixed with Silk excepted; which ſhall remain prohibited on both Sides.

8th. Cambricks and Lawns ſhall pay, in both Countries, an import Duty of *five Shillings*, or *Six Livres Tournois, per* Demi-Piece of *Seven Yards and three Quarters*, Engliſh Meaſure; and Linens made of Flax or Hemp, manufactured in the Dominions of the two Sovereigns in *Europe*, ſhall pay no higher Duties either in *Great-Britain* or *France*, than Linens manufactured in *Holland* or *Flanders*, imported into *Great-Britain*, now pay. And Linen made of Flax or Hemp, manufactured in *Ireland* or *France*, ſhall reciprocally pay no higher Duties than Linens manufactured in *Holland*, imported into *Ireland* now pay.

9th. Sadlery ſhall reciprocally pay an import Duty of *Fifteen per Cent. ad Valorem.*

10th. Gauzes of all Sorts ſhall reciprocally pay *Ten per Cent. ad Valorem.*

11th. Millenery made up of Muſlin, Lawn, Cambrick, or Gauze of every Kind, or of any other Article admitted under the preſent Tariff, ſhall pay reciprocally a Duty of *Twelve per Cent. ad Valorem*; and if any Articles ſhall be uſed therein, which are not ſpecified in the Tariff, they ſhall pay no higher Duties than thoſe paid for the ſame Articles by the moſt favoured Nations.

12th. Porcelain, Earthen-ware, and Pottery, ſhall pay reciprocally *Twelve per Cent. ad Valorem.*

13th. Plate-Glaſs, and Glaſs Ware in General ſhall be admitted, on each Side, paying a Duty of *Twelve per Cent. ad Valorem.*

His *Britannic* Majeſty reſerves the Right of countervailing by additional Duties on the under-mentioned Merchandizes, the internal Duties actually impoſed upon the Manufactures, or the impoſt Duties which are charged on the Raw Materials; namely, on all Linens or Cottons, ſtained or painted, on Beer, Glaſs-Ware, and Iron.

And his moſt *Chriſtian* Majeſty alſo reſerves the Right of doing the ſame, with Regard to the following Merchandizes; namely, Cottons, Iron, and Beer.

And for the better ſecuring the due Collection of the Duties payable, *ad Valorem*, which are ſpecified in the above Tariff, the ſaid contracting Parties will concert with each other, as well the Form of the Declarations to be made, as alſo the proper Means of preventing Fraud, with Reſpect to the real Value of the ſaid Goods and Merchandizes.

But if it ſhall hereafter appear, that any miſtakes have inadvertently been made in the above Tariff, contrary to the Principles on which it is founded, the two Sovereigns will concert, with good Faith, upon the Means of rectifying them.

ART. VII. The Duties above ſpecified are not to be altered but by mutual conſent; and the Merchandizes not above ſpecified ſhall pay, in the Dominions of the two Sovereigns, the Import and Export Duties payable in each of the ſaid Dominions, by the moſt favoured *European* Nations, at the Time the preſent Treaty bears Date; and the Ships belonging to the Subjects of the ſaid Dominions, ſhall alſo reſpectively enjoy therein all the Privileges and Advantages which are granted to thoſe of the moſt favoured *European* Nations.

And it being the Intention of the two high contracting Parties, that their reſpective Subjects ſhould be in the Dominions of each other upon a Footing as Advantageous as thoſe of other *European* Nations; they agree, that in Caſe they ſhall hereafter grant any additional Advantages in Navigation or Trade, to any other *European* Nations, they will reciprocally allow their ſaid Subjects to participate therein; without Prejudice, however, to the Advantages which they reſerve, *viz. France* in favour of *Spain*, in conſequence of the 24th Article of the Family Compact, ſigned the 10th of *May*, 1761; and *England* according to what ſhe has practiſed in Conformity to, and in Conſequence of the Convention of 1703, between *England* and *Portugal.*

And to the End that every Perſon may know, with Certainty, the State of the aforeſaid Impoſts, Cuſtoms, Import, and Export Duties, whatever they may be, it is agreed that Tariffs, indicating the Impoſts, Cuſtoms, and eſtabliſhed Duties, ſhall be affixed in publick Places, as well in *Rouen*, and the other trading Cities of *France*, as in *London*, and the other trading Cities under the Dominion of the King of *Great-Britain*; that Recourſe may be had to them whenever any Difference ſhall ariſe concerning ſuch Impoſts, Cuſtoms, and Duties, which ſhall not be levied otherwiſe than in Conformity to what is clearly expreſſed in the ſaid Tariffs, and according to their natural Conſtruction. And if any Officer, or other Perſon in his Name, ſhall, under any Pretence, publickly or privately, directly or indirectly, demand, or take of a Merchant, or of any other Perſon, any Sum of Money, or any Thing elſe, on account of Duties, Impoſts, Search, or Compenſation, although it be under the Name of a free Gift, or under any other Pretence, more or otherwiſe than what is above preſcribed; in ſuch Caſe, the

the ſaid Officer, or his Deputy, if he be accuſed and convicted of the ſame before a competent Judge, in the Place where the Crime was committed, ſhall give full Satisfaction to the injured Party, and ſhall ſuffer the Penalty preſcribed by the Laws.

ART. VIII. No Merchandiſe exported from the Countries, reſpectively, under the Dominion of their Majeſties, ſhall hereafter be ſubject to be inſpected or confiſcated, under any Pretence of Fraud or Defect in making or working them, or of any other Imperfections whatſoever; but abſolute Freedom ſhall be allowed to the Buyer and Seller, to bargain and fix the Price for the ſame, as they ſhall ſee Good; any Law, Statute, Edict, Proclamation, Privilege, Grant, or Cuſtom to the contrary notwithſtanding.

ART. IX. Whereas ſeveral Kind of Merchandizes, which are uſually contained in Caſks, Cheſts, or other Caſes, and for which the Duties are paid by Weight, will be exported from and imported into *France* by *Britiſh* Subjects; it is agreed, that in ſuch Caſes, the aforeſaid Duties ſhall be demanded only according to the real Weight of the Merchandizes; and the Weight of the Caſks, Cheſts, and other Caſes whatever, ſhall be deducted in the ſame Manner as has been, and is now practiſed in *England*.

ART. X. It is further agreed, that if any Miſtake or Error ſhall be committed by any Maſter of a Ship, his Interpreter or Factor, or by any other Perſon employed by him, in making her Entry or Declaration of her Cargo, neither the Ship nor the Cargo ſhall be ſubject, for ſuch Defect, to Confiſcation; but it ſhall be lawful for the Proprietors to take back again ſuch Goods as were omitted in the Entry or Declaration of the Maſter of the Ship, paying only the accuſtomed Duties, according to the Placart, provided always that there be no manifeſt Appearance of Fraud. Neither ſhall the Merchants, or the Maſters of Ships, or the Merchandize, be ſubject to any Penalty, by Reaſon of ſuch Omiſſion, in Caſe the Goods omitted in the Declaration ſhall not have been landed before the Declaration has been made.

ART. XI. In Caſe either of the two high contracting Parties ſhall think proper to eſtabliſh Prohibitions, or to augment the Import Duties upon any Goods or Merchandize of the Growth or Manufacture of the other, which are not ſpecified in the Tariff, ſuch Prohibition or Augmentations ſhall be general, and ſhall comprehend the like Goods and Merchandizes of the moſt favoured *European* Nations, as well as thoſe of either State; and in Caſe either of the two contracting Parties ſhall revoke the Prohibitions, or diminiſh the Duties in favour of any other *European* Nation, upon any Goods or Merchandize of its Growth or Manufacture, whether on Importation or Exportation, ſuch Revocations or Diminutions ſhall be extended to the Subjects of the other Party; on Condition that the latter ſhall grant to the Subjects of the former, the Importation and Exportation of the like Goods and Merchandizes under the ſame Duties; the Caſes reſerved in the 6th Article of the preſent Treaty always excepted.

ART. XII. And foraſmuch as a certain Uſage, not authoriſed by any Law, has formerly obtained in divers Parts of *Great-Britain* and *France*, by which *French* Subjects have paid in *England* a Kind of Capitation Tax, called, in the Language of that Country, Head-money; and *Engliſh* Subjects a like Duty in *France*, called *Argent de Chef*; it is agreed, that the ſaid Impoſt ſhall not be demanded for the future, on either Side, neither under the ancient Name, nor under any other Name whatſoever.

ART. XIII. If either of the high contracting Parties has granted, or ſhall grant any Bounties for encouraging the Exportation of any Articles, being of the Growth, Produce, or Manufacture of his Dominions, the other Party ſhall be allowed to add to the Duties already impoſed by Virtue of the preſent Treaty, on the ſaid Goods and Merchandize, imported into his Dominions, ſuch an Import Duty as ſhall be equivalent to the ſaid Bounty. But this Stipulation is not to extend to the Caſes of Reſtitutions of Duties and Impoſts, called *Drawbacks*, which are allowed upon Exportation.

ART. XIV. The Advantages granted by the preſent Treaty, to the Subjects of his *Britannic* Majeſty ſhall take Effect, as far as relates to the Kingdom of *Great-Britain*, as ſoon as Laws ſhall be paſſed there, for ſecuring to the Subjects of his Moſt Chriſtian Majeſty the reciprocal Enjoyment of the Advantages which are granted to them by the preſent Treaty.

And the Advantages granted by all theſe Articles, except the Tariff, ſhall take Effect, with Regard to the Kingdom of *Ireland*, as ſoon as Laws ſhall be paſſed there, for ſecuring to the Subjects of his Moſt Chriſtian Majeſty, the reciprocal Enjoyment of the Advantages which are granted to them by this Treaty; and in like Manner, the Advantages granted by the Tariff ſhall take Effect, in what relates to that Kingdom, as ſoon as Laws ſhall be paſſed there, for giving Effect to the ſaid Tariff.

ART. XV. It is agreed, that Ships belonging to his Britannic Majeſty's Subjects, arriving in the Dominions of his Moſt Chriſtian Majeſty, from the Ports of *Great-Britain*, or *Ireland*, or from any other foreign Port, ſhall not pay Freight Duty, or any other like Duty. In the ſame Manner *French* Ships ſhall be exempted in the Dominions of his *Britannic* Majeſty, frum the Duty of five Shillings, and from every other ſimilar Duty or Charge.

ART. XVI. It ſhall not be lawful for any foreign Privateers, not being Subjects of either Crown, who have Commiſſions from any other Prince or State, in Enmity with either Nation, to arm their Ships in the Ports of either of the ſaid two Kingdoms, to ſell what they have taken, or in any other Manner whatever to exchange the ſame; neither ſhall they be allowed even to purchaſe Victuals, except ſuch as ſhall be neceſſary for their going to the neareſt Port of that Prince from whom they have obtained Commiſſions.

ART. XVII. When any Diſpute ſhall ariſe between any Commander of a Ship and his Seamen, in the Ports of either Kingdom, concerning Wages due to the ſaid Seamen, or other civil Cauſes whatever, the Magiſtrate of the Place ſhall require no more from the Perſon accuſed, than that he give to the Accuſer a Declaration in Writing, witneſſed by the Magiſtrate, whereby he ſhall be bound to anſwer that Matter before a Competent Judge in his own Country; which being done, it ſhall not be lawful for the Seamen to deſert their Ship, or to hinder the Commander from proſecuting his Voyage. It ſhall moreover be lawful for the Merchants in the Places of their Abode, or elſewhere, to keep Books of their Accounts and Affairs, as they ſhall ſee fit, and to have an Intercourſe of Letters, in ſuch Language and Idiom as they ſhall chuſe, without any Moleſtation or Search whatſoever. But if it ſhould happen to be neceſſary for them to produce their Books of Accounts for deciding any Diſpute or Controverſy, in ſuch Caſe, they ſhall be obliged to bring into Court the entire Books or Writings, but ſo as the Judge may not have Liberty to take Cognizance of any other Articles in the ſaid Books than ſuch as ſhall relate to the Affair in Queſtion, or ſuch as ſhall be neceſſary to give Credit to the ſaid Books; neither ſhall it be lawful, under any Pretence, to take the ſaid Books, or Writings forcibly out of the Hands of the Owners, or to retain them, the Caſe of Bankruptcy only excepted. Nor ſhall the Subjects of the King of *Great-Britain* be obliged to write their Accounts, Letters, or other Inſtruments relating to Trade on Stampt Paper, except their Day-book, which, that it may be produced as Evidence in any Law-ſuit, ought, according to the Laws which all Perſons trading in *France* are to obſerve, to be indorſed and atteſted *Gratis* by the Judge under his own Hand.

ART. XVIII. It is further agreed and concluded, that all Merchants, Commanders of Ships, and others, the Subjects of the King of *Great-Britain*, in all the Dominions of his Moſt Chriſtian Majeſty in *Europe*, ſhall have full Liberty to manage their own Affairs themſelves, or to commit them to the Management of whomſoever they pleaſe; nor ſhall they be obliged to employ any Interpreter or Broker, nor to pay them any Salary, unleſs they ſhall chuſe to employ them. Moreover, Maſters of Ships ſhall not be obliged in loading and unloading their Ships, to make Uſe of thoſe Perſons who may be appointed by public Authority for that Purpoſe, either at *Bourdeaux*, or elſewhere; but it ſhall be entirely free for them to load or unload their Ships by themſelves, or to make Uſe of ſuch

Perſon or Perſons in lading or unlading the ſame as they ſhall think fit, without the Payment of any Reward to any other, whomſoever; neither ſhall they be forced to unlade into other Ships, or to receive into their own, any Merchandize whatever, or to wait for their Lading any longer than they pleaſe. And all the Subjects of the Moſt Chriſtian King ſhall reciprocally have and enjoy the ſame Privileges and Liberties, in all the Dominions of his *Britannic* Majeſty in *Europe*.

ART. XIX. The Ships of either Party being laden, ſailing along the Coaſts of the other, and being forced by Storm into the Havens or Ports, or making Land there in any other Manner whatever, ſhall not be obliged to unlade their Goods or any Part thereof, or to pay any Duty, unleſs they, of their own Accord, unlade their Goods there, and ſell ſome Part thereof. But it ſhall be lawful, Permiſſion having been firſt obtained from thoſe who have the Direction of Maritime Affairs, to unlade and ſell a ſmall Part of their Cargo, merely for the End of purchaſing Neceſſaries, either for victualling or refitting the Ship; and in that Caſe, the whole Lading ſhall not be ſubject to pay the Duties, but that ſmall Part only, which ſhall have been taken out and ſold.

ART. XX. It ſhall be lawful for all the Subjects of the King of *Great-Britain*, and of the Moſt Chriſtian King, to ſail with their Ships, with perfect Security and Liberty, no Diſtinction being made who are Proprietors of the Merchandizes laden thereon, from any Port whatever, to the Countries which are now, or ſhall be hereafter at War with the King of *Great-Britain*, or the Moſt Chriſtian King. It ſhall likewiſe be lawful for the aforeſaid Subjects, to ſail and traffick with their Ships and Merchandizes, with the ſame Liberty and Security, from the Countries, Ports, and Places of thoſe who are enemies of both, or of either Party, without any Oppoſition or Diſturbance whatſoever, and to paſs directly not only from the Places of the Enemy aforementioned to neutral Places, but alſo from one Place belonging to an Enemy, to another Place belonging to an Enemy, whether they be under the Juriſdiction of the ſame, or of ſeveral Princes. And as it has been ſtipulated concerning Ships and Goods, that every thing ſhall be deemed free, which ſhall be found on board the Ships belonging to the Subjects of the reſpective Kingdoms, although the whole Lading, or Part thereof, ſhould belong to the Enemies of their Majeſties, contraband Goods being always excepted, on the ſtopping of which, ſuch Proceedings ſhall be had as are conformable to the Spirit of the following Articles; it is likewiſe agreed, that the ſame Liberty be extended to Perſons who are on board a free Ship, to the End that, although they be Enemies to both, or to either Party, they may not be taken out of ſuch free Ships, unleſs they are Soldiers, actually in the Service of the Enemies, and on their Voyage for the Purpoſe of being employed in a military Capacity, in their Fleets or Armies.

ART. XXI. This Liberty of Navigation and Commerce ſhall extend to all Kinds of Merchandizes, excepting thoſe only which are ſpecified in the following Article, and which are deſcribed under the Name of Contraband.

ART. XXII. Under this Name of contraband, or prohibited Goods, ſhall be comprehended Arms, Cannon, Harquebuſſes, Mortars, Petards, Bombs, Grenades, Sauciſſes, Carcaſſes, Carriages for Cannon, Muſket-Reſts, Bandoleers, Gun-powder, Match, Salt-petre, Ball, Pikes, Swords, Head-pieces, Helmets, Cutlaſſes, Halberts, Javelins, Holſters, Belts, Horſes, and Harneſs, and all other like Kind of Arms and warlike Implements, fit for the Uſe of Troops.

ART. XXIII. Theſe Merchandizes which follow ſhall not be reckoned among contraband Goods, that is to ſay, all Sorts of Cloth, and all other Manufactures of Wool, Flax, Silk, Cotton, or any other Materials, all Kinds of wearing Apparel, together with the Articles of which they are uſually made, Gold, Silver, coined or uncoined, Tin, Iron, Lead, Copper, Braſs, Coals, as alſo Wheat and Barley, and any other Kind of Corn and Pulſe, Tobacco, and all Kinds of Spices, ſalted and ſmoaked Fleſh, ſalted Fiſh, Cheeſe and Butter, Beer, Oils, Wines, Sugar, all Sorts of Salt, and of Proviſions which ſerve for Suſtenance and Food to Mankind; alſo all Kinds of Cotton, Cordage, Cables, Sails, Sail-cloth, Hemp, Tallow, Pitch, Tar and Roſin, Anchors, and any Parts of Anchors, Ship-maſts, Planks, Timber of all Kinds of Trees, and all other

Things proper either for building or repairing Ships. Nor ſhall any other Goods whatever, which have not been worked into the Form of any Inſtrument, or Furniture for Warlike Uſe, by Land or by Sea, be reputed contraband, much leſs ſuch as have been already wrought or made up for any other Purpoſe. All which Things ſhall be deemed Goods not contraband, as likewiſe all others which are not comprehended and particularly deſcribed in the preceding Article; ſo that they may be freely carried by the Subjects of both Kingdoms, even to Places belonging to an Enemy, excepting only ſuch Places as are beſieged, blocked up, or inveſted.

ART. XXIV. To the End that all Manner of Diſſentions and Quarrels may be avoided and prevented on both Sides, it is agreed, that in Caſe either of their Majeſties ſhould be engaged in a War, the Ships and Veſſels belonging to the Subjects of the other ſhall be furniſhed with Sea-letters, or Paſſports, expreſſing the Name, Property, and Bulk of the Ship, as alſo the Name and Place of Abode of the Maſter or Commander of the ſaid Ship, that it may appear thereby, that the Ship really and truly belongs to the Subjects of one of the ſaid Princes; which Paſſports ſhall be made out and granted, according to the Form annexed to the preſent Treaty: they ſhall likewiſe be renewed every Year, if the Ship happens to return Home within the Space of a Year. It is alſo agreed, that ſuch Ships when laden are to be provided not only with Paſſports as above-mentioned, but alſo with Certificates containing the ſeveral Particulars of the Cargo, the Place from whence the Ship ſailed, and whither ſhe is bound, that ſo it may be known whether ſhe carries away any of the prohibited or contraband Goods ſpecified in the 22d Article of this Treaty; which Certificate ſhall be prepared by the Officer of the Place from whence the Ship ſhall ſet ſail, in the accuſtomed Form. And if any one ſhall think fit to expreſs in the ſaid Certificates the Perſon to whom the Goods belong, he may freely do ſo.

ART. XXV. The Ships belonging to the Subjects and Inhabitants of the reſpective Kingdoms, coming to any of the Coaſts of either of them, but without being willing to enter into Port, or being entered, yet not willing to land their Cargoes, or to break Bulk, ſhall not be obliged to give an Account of their Lading, unleſs they are ſuſpected, upon ſure Evidence, of carrying prohibited Goods, called contraband, to the Enemies of either of the two high contracting Parties.

ART. XXVI. In Caſe the Ships belonging to the ſaid Subjects or Inhabitants of the reſpective Dominions of their moſt Serene Majeſties, either on the Coaſt, or on the high Sea, ſhall meet with any Men of War belonging to their moſt Serene Majeſties, or with Privateers; the ſaid Men of War and Privateers, for preventing any Inconveniences, are to remain out of Cannon-Shot, and to ſend their Boats to the Merchant-Ship which may be met with, and ſhall enter her to the Number of two or three Men only, to whom the Maſter or Commander of ſuch Ship or Veſſel ſhall ſhew his Paſſport, containing the Proof of the Property of the Ship, made out according to the Form annexed to this preſent Treaty; and the Ship which ſhall have exhibited the ſame, ſhall have Liberty to continue her Voyage, and it ſhall be wholly unlawful any Way to moleſt or ſearch her, or to chaſe or compel her to alter her Courſe.

ART. XXVII. The Merchant Ships belonging to the Subjects of either of the two high contracting Parties, which intend to go to a Port at Enmity with the other Sovereign, concerning whoſe Voyage and the Sort of Goods on board, there may be juſt Cauſe of Suſpicion, ſhall be obliged to exhibit, as well on the High Seas, as in the Ports and Havens, not only her Paſſports, but alſo her Certificates, expreſſing that the Goods are not of the Kind which are contraband, as ſpecified in the 22d Article of this Treaty.

ART. XXVIII. If, on exhibiting the above-mentioned Certificates, containing a Liſt of the Cargo, the other Party ſhould diſcover any Goods of that Kind which are declared contraband, or prohibited by the 22d Article of this Treaty, and which are deſigned for a Port ſubject to his Enemies, it ſhall be unlawful to break up or open the Hatches, Cheſts, Caſks, Bales, or other Veſſels found on board ſuch Ships, or to remove even the ſmalleſt Parcel of the Goods, whether

ther the ſaid Ship belongs to the Subjects of the King of *Great-Britain*, or of the Moſt Chriſtian King, unleſs the Lading be brought on Shore, in the Preſence of the Officers of the Court of Admiralty, and an Inventory made by them of the ſaid Goods; nor ſhall it be lawful to ſell, exchange, or alienate the ſame in any Manner, unleſs after due and lawful Proceſs ſhall have been had againſt ſuch prohibited Goods, and the Judges of the Admiralty, reſpectively ſhall, by Sentence pronounced, have confiſcated the ſame; ſaving always as well the Ship itſelf, as the other Goods found therein, which by this Treaty are to be accounted Free: neither may they be detained on Pretence of their being mixed with prohibited Goods, much leſs ſhall they be confiſcated as lawful Prize; and if, when only Part of the Cargo ſhall conſiſt of contraband Goods, the Maſter of the Ship ſhall agree, conſent, and offer to deliver them to the Captor who has diſcovered them, in ſuch Caſe the Captor having received thoſe Goods, as lawful Prize, ſhall forthwith releaſe the Ship, and not hinder her, by any Means, from proſecuting her Voyage to the Place of her Deſtination.

ART. XXIX. On the contrary it is agreed, that whatever ſhall be found to be laden by the Subjects and Inhabitants of either Party, on any Ship belonging to the Enemies of the other, although it be not contraband Goods, ſhall be confiſcated in the ſame Manner as if it belonged to the Enemy himſelf; except thoſe Goods and Merchandizes which were put on board ſuch Ship before the Declaration of War, or the general Order for Repriſals, or even after ſuch Declaration, if it were done within the Times following; that is to ſay, if they were put on board ſuch Ship in any Port or Place within the the Space of *two* Months after ſuch Declaration, or Order for Repriſals, between *Archangel*, *St. Petersburgh*, and the *Scilly* Iſlands, and between the ſaid Iſlands and the City of *Gibraltar*; of ten weeks in the *Mediterranean* Sea; and of eight Months in any other Country or Place in the World; ſo that the Goods of the Subjects of either Prince, whether they be contraband or otherwiſe, which, as aforeſaid, were put on board any Ship belonging to an Enemy before the War, or after the Declaration of the ſame, within the Time and Limits abovementioned, ſhall no Ways be liable to Confiſcation, but ſhall well and truly be reſtored, without Delay, to the Proprietors demanding the ſame; provided nevertheleſs, that if the ſaid Merchandizes be contraband, it ſhall not be any Ways lawful to carry them afterwards to the Ports belonging to the Enemy.

ART. XXX. And that more abundant Care may be taken for the Security of the reſpective Subjects of their Moſt Serene Majeſties, to prevent their ſuffering any Injury by the Men of War or Privateers of either Party, all the Commanders of the Ships of the King of *Great-Britain*, and of the Moſt Chriſtian King, and all their Subjects ſhall be forbid doing any Damage to thoſe of the other Party, or committing any Outrage againſt them; and if they act to the contrary, they ſhall be puniſhed, and ſhall moreover be bound in their Perſons and Eſtates, to make Satisfaction and Reparation for all Damages, and the Intereſt thereof, of what Nature ſoever.

ART. XXXI, For this Cauſe, all Commanders of Privateers, before they receive their Patents or ſpecial Commiſſions, ſhall hereafter be obliged to give, before a competent Judge, ſufficient Security by good Bail, who are reſponſible Men, and have no Intereſt in the ſaid Ship, each of whom ſhall be bound in the whole for the Sum of *thirty-ſix thouſand Livres Tournois*, or *fifteen hundred Pounds Sterling*; or if ſuch Ships be provided with above one hundred and fifty Seamen and Soldiers, for the Sum of *ſeventy-two thouſand Livres Tournois*, or *three thouſand Pounds Sterling*, that they will make entire Satisfaction for all Damages and Injuries whatſoever, which they, or their Officers, or others in their Service, may commit during their Cruize, contrary to the Tenour of this preſent Treaty, or the Edicts made in Conſequence thereof by their moſt Serene Majeſties, under Penalty likewiſe of having their Patents, and ſpecial Commiſſions revoked and annulled.

ART. XXXII. Their ſaid Majeſties being willing mutually to treat, in their Dominions, the Subjects of each other as favourably as if they were their own Subjects, will give ſuch Orders as ſhall be neceſſary and effectual, that the Judgments and Decrees concerning Prizes in the Courts of Admiralty be given con-

conformably to the Rules of Juſtice and Equity, and to the Stipulations of this Treaty, by Judges who are above all Suſpicion; and who have no Manner of Intereſt in the Cauſe in Diſpute.

ART. XXXIII. And when the Quality of the Ship, Goods, and Maſter ſhall ſufficiently appear, from ſuch Paſſports and Certificates, it ſhall not be lawful for the Commanders of Men of War to exact any further Proof under any Pretext whatſoever. But if any Merchant Ship ſhall not be provided with ſuch Paſſports and Certificates, then it may be examined by a proper Judge, but in ſuch Manner as, if it be found, from other Proofs and Documents, that it truly belongs to the Subjects of one of the Sovereigns, and does not contain any contraband Goods, deſigned to be carried to the Enemy of the other, it ſhall not be liable to Confiſcation, but ſhall be releaſed, together with its Cargo, in Order to proceed on its Voyage.

If the Maſter of the Ship named in the Paſſports ſhould happen to die, or be removed by any other Cauſe, and another put in his Place, the Ship and Goods laden thereon, ſhall nevertheleſs be equally ſecure, and the Paſſports ſhall remain in full Force.

ART. XXXIV. It is further provided and agreed, that the Ships of either of the two Nations, retaken by the Privateers of the other, ſhall be reſtored to the former Owner, if they have not been in the Power of the Enemy for the Space of *four and twenty* Hours, ſubject to the Payment, by the ſaid Owner, of one *third* of the Value of the Ship retaken, and of its Cargo, Guns, and Apparel; which third Part ſhall be amicably adjuſted by the Parties concerned: but if not, and in Caſe they ſhould diſagree, they ſhall make Application to the Officers of the Admiralty of the Place where the Privateer which retook the captured Veſſel ſhall have carried her.

If the Ship retaken has been in the Power of the Enemy above *four and twenty* Hours, ſhe ſhall wholly belong to the Privateer which retook her.

In Caſe of a Ship being retaken by any Man of War belonging to his *Britannic* Majeſty, or to his Moſt Chriſtian Majeſty, it ſhall be reſtored to the former Owner, on Payment of the *thirtieth* Part of the Value of ſuch Ship, and of its Cargo, Guns, and Apparel, if it was retaken within the *four and twenty* Hours; and the *Tenth* Part, if it was retaken after the four and twenty Hours; which Sum ſhall be diſtributed as a Reward, amongſt the Crews of the Ships which ſhall have retaken ſuch Prize. The Valuation of the *Thirtieths* and *Tenth* Parts above-mentioned ſhall be ſettled conformably to the Regulations in the Beginning of this Article.

ART. XXXV. Whenſoever the Ambaſſadors of either of their ſaid Majeſties, or other their Miniſters having a public Character, and reſiding at the Court of the other Prince, ſhall complain of the Injuſtice of the Sentences which have been given, their Majeſties ſhall reciprocally cauſe the ſame to be reviſed and re-examined in their Councils, unleſs their Councils ſhould already have decided thereupon, that it may appear, with Certainty, whether the Directions and Proviſions preſcribed in this Treaty have been followed and obſerved. Their Majeſties ſhall likewiſe take Care that this Matter be effectually provided for, and that Juſtice be done to every Complainant within the Space of *three Months*. However, before or after Judgment given, and pending the Reviſion thereof, it ſhall not be lawful to ſell the Goods in Diſpute, or to unlade them, unleſs with the Conſent of the Perſons concerned, for preventing any Kind of Loſs; and Laws ſhall be enacted on both Sides for the Execution of the preſent Article.

ART. XXXVI. If any Differences ſhall ariſe reſpecting the Legality of Prizes, ſo that a judicial Deciſion ſhould become neceſſary; the Judge ſhall direct the Effects to be unladen, an Inventory and Appraiſement to be made thereof, and Security to be required reſpectively from the Captor for paying the Coſts, in Caſe the Ship ſhould not be declared lawful Prize; and from the Claimant for paying the Value of the Prize; in Caſe it ſhould be declared lawful; which Securities being given by both Parties, the Prize ſhall be delivered up to the Claimant. But if the Claimant ſhould refuſe to give ſufficient Security, the Judge ſhall direct the Prize to be delivered to the Captor, after having received from him good and ſufficient Security for paying the full Value of the ſaid Prize, in Caſe it ſhould be

adjudged illegal. Nor ſhall the Execution of the Sentence of the Judge be ſuſpended by Reaſon of any Appeal, when the Party againſt whom ſuch Appeal ſhall be brought, whether Claimant or Captor, ſhall have given ſufficient Security for reſtoring the Ships or Effects, or the Value of ſuch Ship or Effects, to the Appellant, in Caſe Judgment ſhould be given in his Favour.

ART. XXXVII. In Caſe any Ships of War or Merchantmen, forced by Storms or other Accidents, be driven on Rocks or Shelves, on the Coaſts of either of the high contracting Parties, and ſhould there be daſhed to Pieces and ſhipwrecked; all ſuch Parts of the ſaid Ships, or of the Furniture or Apparel thereof, as alſo of the Goods and Merchandizes as ſhall be ſaved, or the Produce thereof, ſhall be faithfully reſtored, upon the ſame being claimed by the Proprietors, or their Factors, duly authoriſed, paying only the Expences incurred in the Preſervation thereof, according to the Rate of Salvage ſettled on both Sides; ſaving at the ſame Time, the Rights and Cuſtoms of each Nation, the Abolition or Modification of which ſhall however be treated upon, in the Caſes where they ſhall be contrary to the Stipulations of the preſent Article; and their Majeſties will mutually interpoſe their Authority, that ſuch of their Subjects, as ſhall be ſo inhuman as to take Advantage of any ſuch Misfortune, may be ſeverely puniſhed.

ART. XXXVIII. It ſhall be free for the Subjects of each Party to employ ſuch Advocates, Attornies, Notaries, Solicitors, and Factors as they ſhall think fit; to which end the ſaid Advocates, and others above-mentioned, ſhall be appointed by the ordinary Judges, if it be needful, and the Judges be thereunto required.

ART. XXXIX. And for the greater Security and Liberty of Commerce and Navigation, it is further agreed, that both the King of *Great-Britain*, and the Moſt Chriſtian King ſhall not only refuſe to receive any Pirates or Sea- Rovers whatſoever into any of their Havens, Ports, Cities or Towns, or permit any of their Subjects, Citizens or Inhabitants, on either Part to receive or protect them in their Ports, to harbour them in their Houſes, or to aſſiſt them in any Manner whatſoever; but further they ſhall cauſe all ſuch Pirates, and Sea-Rovers, and all ſuch Perſons who ſhall receive, conceal, or aſſiſt them, to be brought to condign Puniſhment, for a Terror and Example to others. And all their Ships, with the Goods or Merchandizes taken by them, and brought into the Ports of either Kingdom, ſhall be ſeized as far as they can be diſcovered, and ſhall be reſtored to the Owners, or the Factors duly authoriſed or deputed by them in writing, proper Evidence being firſt given in the Court of Admiralty, for proving the Property, even in Caſe ſuch Effects ſhould have paſſed into other Hands by Sale, if it be proved that the Buyers knew, or might have known, that they had been piratically taken. And generally all Ships and Merchandizes of what Nature ſoever, which may be taken on the High Seas, ſhall be brought into ſome Port of either Kingdom, and delivered into the Cuſtody of the Officers of that Port, that they may be reſtored entire to the true Proprietor, as ſoon as due and ſufficient Proof ſhall have been made concerning the Property thereof.

ART. XL. It ſhall be lawful, as well for the Ships of War of their Majeſties, as for Privateers belonging to their Subjects, to carry whitherſoever they pleaſe, the Ships and Goods taken from their Enemies, without being obliged to pay any Fee to the Officers of the Admiralty, or to any Judges whatever; nor ſhall the ſaid Prizes, when they arrive and enter the Ports of their ſaid Majeſties, be detained or ſeized; neither ſhall the Searchers, or other Officers of thoſe Places, viſit or take Cognizance of the Validity of ſuch Prizes; but they ſhall be at Liberty to hoiſt Sail at any Time, to depart, and to carry their Prizes to the Place mentioned in the Commiſſions or Patents, which the Commanders of ſuch Ships of War ſhall be obliged to ſhew: on the Contrary, no Shelter or Refuge ſhall be given in their Ports to ſuch as have made Prize upon the Subjects of either of their Majeſties; but if forced by Streſs of Weather, or the Danger of the Sea, to enter therein, particular Care ſhall be taken to haſten their Departure, and to cauſe them to retire from thence as ſoon as poſſible, as far as it is not repugnant to former Treaties made in this Reſpect with other Sovereigns or States.

ART. XLI. Neither of their ſaid Majeſties ſhall permit the Ships or Goods belonging to the Subjects of the other, to be taken within Cannon Shot of the Coaſts, or in the Ports, or Rivers of the Dominions by Ships of War, or others having Commiſſion from any Prince, Republic, or City whatſoever, but in Caſe it ſhould ſo happen, both Parties ſhall employ their united Force to obtain Reparation of the Damage thereby occaſioned.

ART. XLII. But if it ſhall appear that the Captor made Uſe of any Kind of Torture upon the Maſter of the Ship, the Crew, or others who ſhall be on board any Ship belonging to the Subjects of the other Party, in ſuch Caſe, not only the Ship itſelf, together with the Perſons, Merchandizes, and Goods whatſoever, ſhall be forthwith releaſed, without any Delay, and ſet entirely free, but alſo ſuch as ſhall be convicted of ſo enormous a Crime, together with their Accomplices, ſhall ſuffer the moſt ſevere Puniſhment ſuitable to their Offences, this the King of *Great-Britain*, and the Moſt Chriſtian King, mutually engage ſhall be obſerved, without any Reſpect of Perſons whatſoever.

ART. XLIII. Their Majeſties ſhall reſpectively be at Liberty, for the Advantage of their Subjects trading to the Kingdoms and Dominions of either of them, to appoint therein national Conſuls, who ſhall enjoy the Right, Immunity, and Liberty, belonging to them, by Reaſon of their Duties and their Functions; and Places ſhall hereafter be agreed upon, where the ſaid Conſuls ſhall be eſtabliſhed, as well as the Nature and Extent of their Functions. The Convention relative to this Point ſhall be concluded immediately after the Signature of the preſent Treaty, of which it ſhall be deemed to conſtitute a Part.

ART. XLIV. It is alſo agreed, that in whatever relates to the lading and unlading of Ships; the Safety of Merchandize, Goods and Effects, the Succeſſion to perſonal Eſtates, as well as the Protection of Individuals, and their perſonal Liberty, as alſo the Adminiſtration of Juſtice, the Subjects of the two high contracting Parties, ſhall enjoy in their reſpective Dominions, the ſame Privileges, Liberties, and Rights, as the moſt favoured Nations.

ART. XLV. If hereafter it ſhall happen through Inadvertency, or otherwiſe, that any Infraction or Contraventions of the preſent Treaty ſhould be committed on either Side, the Friendſhip and good Underſtanding ſhall not immediately thereupon be interrupted; but this Treaty ſhall ſubſiſt in all its Force, and proper Remedies ſhall be procured for removing the Inconveniences, as likewiſe for the Reparation of the Contraventions; and if the Subjects of either Kingdom ſhall be found guilty thereof, they only ſhall be puniſhed and ſeverely chaſtiſed.

ART. XLVI. His *Britannic* Majeſty and his moſt Chriſtian Majeſty have reſerved the Right of reviſing and re-examining the ſeveral Stipulations of this Treaty, after the Term of *twelve* Years, to be computed from the Day of paſſing Laws for its Execution in *Great-Britain* and *Ireland* reſpectively; to propoſe and make ſuch Alterations as the Times and Circumſtances may have rendered proper or neceſſary for the commercial Intereſts of their reſpective Subjects: and this Reviſion is to be completed in the Space of *twelve* Months; after which Term the preſent Treaty ſhall be of no Effect, but in that Event, the good Harmony and friendly Correſpondence between the two Nations ſhall not ſuffer the leaſt Diminution.

ART. XLVII. The preſent Treaty ſhall be ratified and confirmed by his *Britannic* Majeſty, and by his Moſt Chriſtian Majeſty, in two Months, or ſooner, if it can be done, after the Exchange of Signatures between the Plenipotentiaries.

In Witneſs whereof, we the under-ſigned Commiſſaries and Plenipotentiaries of the King of *Great-Britain*, and the Moſt Chriſtian King, have ſigned the preſent Treaty with our Hands, and have ſet thereto the Seals of our Arms. Done at *Verſailles*, the 26th of *September*, 1786.

Gerard de Rayneval. (L. S.)

FORM

FORM *of the* PASSPORTS *and* SEA-LETTERS which are *to be granted by the reſpective Admiralties of the Dominions of the two high contracting Parties to the Ships and Veſſels ſailing from thence, purſuant to the 24th Article of the preſent Treaty.*

N. N. To all who ſhall ſee theſe Preſents, *Greeting*, Be it known that we have granted Licenſe and Permiſſion to *N.* of the City or Place of *N.* Maſter or Commander of the Ship *N.* belonging to *N.* of the Port of *N.* burthen Tons, or thereabouts, now lying in the Port or Haven of *N.* to ſail to *N.* laden with *N.* the ſaid Ship having been examined before their Departure, in the uſual Manner, by the Officers of the Place appointed for that Purpoſe. And the ſaid *N.* or ſuch other Perſon as ſhall happen to ſucceed him, ſhall produce this Licenſe in every Port or Haven which he may enter with his Ship, to the Officers of the Place, and ſhall give a true Account to them of what ſhall have paſſed or happened during his Voyage; and he ſhall carry the Colours, Arms, and Enſigns of *N.* during his Voyage.

In Witneſs whereof, we have ſigned theſe Preſents, and ſet the Seal of our Arms thereto, and cauſed the ſame to be counterſigned by *N.* at Day of in the Year, *&c. &c.*

No Perſon converſant in mercantile Affairs can poſſibly read the foregoing prolix Treaty, without preſaging what muſt follow; many of the Articles being drawn up, in *vague*, and indefinite Terms, requiring Explanation and Comments; accordingly, it had not been long ratified and confirmed by the reſpective Sovereigns, and by Laws enacted in *Great-Britain* and *Ireland*, for the Purpoſe of carrying it into effectual Execution, before Complaints, Diſagreements, and even open Diſguſt expreſſed by ſome of the trading Cities of *France*, particularly *Rouen*, where it was firſt publiſhed, threatened its total Overthrow; happily however, by the good Conduct of the Miniſters at the Head of the commercial Departments of both Nations, an Explanation took Place, the following Year, in the Form of a Convention; Copy of which is hereunto annexed.

CONVENTION between his Britannic *Majeſty and the Moſt Chriſtian King, ſigned at* Verſailles, *the* 15*th of* January, 1787.

THE King of *Great-Britain*, and the Moſt Chriſtian King, being willing, in Conformity to the 6th and 43d Articles of the Treaty of Navigation and Commerce, ſigned at *Verſailles* the 26th of *September*, 1786, to explain and ſettle certain Points which had been reſerved; their *Britannic* and Moſt Chriſtian Majeſties, always diſpoſed more particularly to confirm the good Underſtanding in which they are happily united, have named for that Purpoſe, their reſpective Plenipotentiaries, *to wit*, on the Part of his *Britannic* Majeſty *William Eden*, Eſq. Privy-Counſellor in *Great-Britain* and *Ireland*, Member of the *Britiſh* Parliament, and his Envoy Extraordinary, and Miniſter Plenipotentiary to his Moſt Chriſtian Majeſty, and on the Part of his Moſt Chriſtian Majeſty, the Count *de Vergennes*, Miniſter and Secretary of State for the Department of Foreign Affairs, and chief of the Royal Council of Finances; who, after having communicated to each other, their reſpective full Powers, have agreed upon the following Articles.

ART. I. Their Majeſties having ſtipulated in the 6th Article of the ſaid Treaty, "that the Duties on Hard-ware, Cutlery, Cabinet-ware, and Turnery; and on all other Works, both heavy and light, of Iron, Steel, Copper and Braſs, ſhall be claſſed; and that the higheſt Duty ſhall not exceed *Ten per Cent. ad Valorem*," It is agreed that Cabinet-ware, and Turnery, and every Thing that is included under thoſe Denominations, as alſo Muſical Inſtruments, ſhall pay *Ten per Cent. ad Valorem*.

All Articles made of Iron or Steel, pure or mixed, or worked or mounted with other Subſtances, not exceeding in Value, *ſixty Livres Tournois*, or fifty Shillings *per* Quintal, ſhall pay only *Five per Cent. ad Valorem*; and all other Wares as

Buttons, Buckles, Knives, Sciſſars, and all the different Articles included under the Deſcription of Hardware and Cutlery, as alſo all other Works of Iron, Steel, Copper, and Braſs, pure or mixed, or worked or mounted with other Subſtances, ſhall pay *Ten per Cent. ad Valorem.*

If either of the two Sovereigns ſhould think proper to admit the ſaid Articles, or only ſome of them, from any other Nation, by Reaſon of their Utility, at a lower Duty, the Subjects of the other Sovereign ſhall be allowed to participate in ſuch Diminution, in order that no foreign Nation may enjoy in this Reſpect, any Preference to their Diſadvantage.

The Works of Iron, Steel, Copper, and Braſs above mentioned, are not to be underſtood to extend to Bar Iron, or Pig Iron, or in general, to any Kind of Iron, Steel, Copper, or Braſs, in the State of the raw Material.

ART. II. Their Majeſties having alſo ſtipulated in the 6th Article, " that for the better ſecuring the due Collection of the Duties payable *ad Valorem*, which are ſpecified in the Tariff, they will concert with each other the Form of the Declarations to be made, and the proper Means of preventing Fraud, with Reſpect to the real Value of the Goods and Merchandizes :" It is agreed that each Declaration ſhall be given in Writing, ſigned by the Merchant, Owner, or Factor who anſwers for the Merchandizes at their Entry, which Declaration ſhall contain an exact Liſt of the ſaid Merchandizes, and of their Packages, of the Marks, Numbers and Cyphers, and of the Contents of each Bale or Caſe, and ſhall certify that they are of the Growth, Produce, or Manufacture of the Kingdom from whence they are imported, and ſhall alſo expreſs the true and real Value of the ſaid Merchandizes, in order that the Duties may be paid in Conſequence thereof. That the Officers of the Cuſtom Houſe where the Declaration may be made, ſhall be at Liberty to make ſuch Examination as they ſhall think proper of the ſaid Merchandizes, upon their being landed, not only for the Purpoſe of verifying the Facts alledged in the ſaid Declaration, that the Merchandizes are of the Produce of the Country therein mentioned, and that the Statement of their Value and Quantity is exact, but alſo that of preventing the clandeſtine Introduction of other Merchandizes in the ſame Bales or Caſes: provided nevertheleſs that ſuch Examinations ſhall be made with every poſſible Attention to the Convenience of the Traders, and to the Preſervation of the ſaid Merchandizes.

In Caſe the Officers of the Cuſtoms ſhould not be ſatisfied with the Valuation made of the Merchandizes in the ſaid Declaration, they ſhall be at Liberty, with the Conſent of the principal Officer of the Cuſtoms of the Port, or of ſuch other Officer as ſhall be appointed for that Purpoſe, to take the ſaid Merchandizes according to the Valuation made by the Declaration, allowing to the Merchant or Owner an Overplus of *Ten per Cent.* and refunding to him the Duties he may have paid for the ſaid Merchandizes. In which Caſe, the whole Amount ſhall be paid without Delay, by the Cuſtom Houſe of the Port, if the Value of the Effects in Queſtion ſhall not exceed *Four hundred and eighty Livres Tournois*, or *Twenty* Pounds Sterling; and within *Fifteen Days* at lateſt, if their Value ſhall exceed that Sum.

And if Doubts ſhould happen to ariſe, either reſpecting the Value of ſuch Merchandizes, or the Country of which they are the Produce, the Officers of the Cuſtoms at the Port, ſhall come to a Determination thereupon, with all poſſible Diſpatch; and no greater Space of Time ſhall be employed for that Purpoſe, in any Caſe, than eight Days, in the Ports where the Officers who have the principal Direction of the Cuſtoms reſide, and Fifteen Days in any other Port whatſoever.

It is ſuppoſed and underſtood that the Merchandizes admitted by the preſent Treaty, ſhall be reſpectively of the Growth, Produce, or Manufacture of the Dominions of the two Sovereigns in *Europe*.

To oblige the Traders to be accurate in the Declarations required by the preſent Article, as alſo to prevent any Doubt that might ariſe on that Part of the 10th Article of the ſaid Treaty, which provides, " that if any of the Effects are omitted in the Declaration delivered by the Maſter of the Ship, they ſhall not be liable to Confiſcation, unleſs there be a manifeſt Appearance of Fraud" it is underſtood,

that in ſuch Caſe, the ſaid Effects ſhall be confiſcated, unleſs ſatisfactory Proof be given to the Officers of the Cuſtoms, that there was not any Intention of Fraud.

ART. III. In order to prevent the Introduction of Callicoes manufactured in the *Eaſt Indies*, or in other Countries, as if they had been manufactured in the reſpective Dominions of the two Sovereigns in *Europe*; it is agreed that the Callicoes manufactured in the ſaid Dominions for Exportation from one Country to the other reſpectively, ſhall have at the two Ends of each Piece, a particular *Mark* woven in the Piece, to be ſettled in Concert by the two Governments; of which Mark the reſpective Governments ſhall give nine Months' previous Notice to the Manufacturers, and the ſaid Mark ſhall be altered from Time to Time, as the Caſe may require. It is further agreed, that until the ſaid Precaution can be put in Execution, the ſaid Callicoes mutually exported ſhall be accompanied by a Certificate of the Officers of the Cuſtoms, or of ſuch other Officer as ſhall be appointed for that Purpoſe, declaring that they were fabricated in the Country from whence they were exported, and alſo that they are furniſhed with the Marks already preſcribed in the reſpective Countries, to diſtinguiſh ſuch Callicoes from thoſe which come from other Countries.

ART. IV. In ſettling the Duties upon Cambricks and Lawns, it is underſtood that the Breadth ſhould not exceed for the Cambricks, *ſeven-eighths* of a Yard, *Engliſh* Meaſure, about three Quarters of an Ell of *France*, and for the Lawns one Yard and a Quarter, *Engliſh* Meaſure, one Ell of *France*; and if any hereafter ſhall be made of a greater Breadth than what is above mentioned, they ſhall pay a Duty of *Ten per Cent. ad Valorem*.

ART. V. It is alſo agreed that the Stipulations in the 18th Article of the Treaty ſhall not be conſtrued to derogate from the Priveleges, Regulations, and Uſages already eſtabliſhed in the Cities or Ports of the reſpective Dominions of the two Sovereigns; and further, that the 15th Article of the ſaid Treaty ſhall be conſtrued to relate only to Ships ſuſpected of carrying, in Time of War, to the Enemies of either of the high contracting Parties, any prohibited Articles, denominated contraband; and the ſaid Article is not to hinder the Examinations of the Officers of the Cuſtoms, for the Purpoſe of preventing illicit Trade in the reſpective Dominions.

ART. VI. Their Majeſties having ſtipulated by the 43d Article of the ſaid Treaty, that the Nature and Extent of the Functions of the Conſuls ſhould be determined, "and that a Convention relative to this Point ſhould be concluded immediately after the Signature of the preſent Treaty, of which it ſhould be deemed to conſtitute a Part," It is agreed that the ſaid ulterior Convention ſhall be ſettled within the Space of two Months; and that, in the mean Time, the Conſuls-General, Conſuls, and Vice-Conſuls ſhall conform to the Uſages which are now obſerved, relative to the Conſulſhip, in the reſpective Dominions of the two Sovereigns; and that they ſhall enjoy all the Priveleges, Rights and Immunities belonging to their Office, and which are allowed to the Conſuls-General, Conſuls, and Vice Conſuls of the moſt favoured Nations.

ART. VII. It ſhall be lawful for the Subjects of his *Britannic* Majeſty to proſecute their Debtors in *France*, for the Recovery of Debts contracted in the Dominions of his ſaid Majeſty, or elſewhere, in *Europe*, and there to bring Actions againſt them, in Conformity to the Practice of Law in uſe, in the Kingdom; provided that there ſhall be the like Uſage in Favour of *French* Subjects, in the *European* Dominions of his *Britannic* Majeſty.

ART. VIII. The Articles of the preſent Convention ſhall be ratified and confirmed by his *Britannic* Majeſty, and by his Moſt Chriſtian Majeſty, in one Month, or ſooner, if it can be done, after the Exchange of Signatures between the Plenipotentiaries.

In Witneſs whereof, we the Miniſters Plenipotentiary have ſigned the preſent Convention, and have cauſed the Seals of our Arms to be ſet thereto.

Done at *Verſailles* the 15th *January* 1787.

W. Eden. (L. S.)
Gravier de Vergennes. (L. S.)

In Conformity to the ſaid Treaty and Convention, the *Britiſh* Parliament paſſed an Act for conſolidating certain Duties of Import, payable at the Cuſtom-houſe, under various Denominations of Old and New Subſidies, &c. &c. &c. &c. into one ſimple Rate, either by the Piece, by Weight, or *ad Valorem*; which Regulations will be given under the Head of CUSTOMS, reſerved, in this Edition, for the laſt Article, that every, the moſt recent, Regulation made by Parliament or the Miniſtry, to the very Moment of ſending the final Sheets to the Preſs, may, for the Benefit of our Merchants, and Traders, be included.

Of the Commerce between Great-Britain *and* Holland.

I Am now going to open a very beneficial Branch of Commerce, and ſhall take the ſame Method to inveſtigate the Advantages or Diſadvantages ariſing from it, as I have done with the preceding; not knowing of any truer Method for diſcovering them, than what the Cuſtom-houſe Entries afford, which have hitherto been my Guide through this intricate Maze of Buſineſs; though I ſhall not here particularize the different Articles as I did in the foregoing.

Before the *Dutch* War; *viz.* from *Michaelmas* 1662 to *Michaelmas* 1663, our Imports from *Holland* exceeded our Exports there 386,160*l.* 4*s.* and from 1668 to 1669 the Balance in our Diſfavour was again 323,636*l.* 1*s.* And I do not find any Account how Matters ſtood between us from 1669 to 1696; but from *Chriſtmas* 1699, to the ſame Time in 1704, the Eſtimate of Exports exceeded our Imports by 7,618,668*l.* 0*s.* 2*d.* $\frac{3}{4}$. From which Accounts may be obſerved, that in the Years 1663 and 1669, our Dealings with the *States* were inconſiderable to what they were after the Beginning of the firſt War, and have continued to be ever ſince, as well in Number and Variety of Commodities, as in the Value. For in the firſt Years above-mentioned, our Exports thither were confined to only forty-five Articles of rated Goods, whereas in the laſt Year, *viz.* 1704, they were increaſed to at leaſt a hundred and twenty or a hundred and thirty; and ſo proportionably in thoſe paying *ad valorem*, without reckoning the Out-Ports, whoſe Cuſtoms, Dr. *Davenant* ſays, bear Proportion to thoſe of *London*, as 1,268,095*l.* is to 346,081*l.* which would add to the above Account near two Millions more for the five Years; and the ſaid Gentleman, ſtill bringing the Calculation lower, *viz.* from 1698 to 1705, remarks, that the Exceſs on our Side has been ſome Years a Million and a Half, but by a Medium taken of theſe ſeven Years 1,388,102*l.* 6*s.* 8*d.* $\frac{1}{2}$. *per Annum*, which, according to the common Notion of theſe Things, is ſo much Money got clear of the Nation. But the Doctor diſſents from this too generally received Opinion, and ſuppoſes that nothing can be more fallacious than to conclude, that becauſe a Country takes off more of our Commodities than we do of their's, that our Dealings with that Country are always beneficial to us, though prejudicial to them, and that when this happens, there is a conſtant Superlucration on our Side; but his Obſervation is with this Reſtriction, that our Goods thus exported ſerve for the Tranſportation Trade to thoſe who take them from us, and not for a Support of luxury and Voluptuouſneſs. For he grants, as every one muſt, that if they are conſumed where they are firſt carried, they muſt prove a dead Loſs to their new Proprietors; the *Dutch* are in the firſt Caſe, where our Products and Manufactures, Plantation and *Eaſt-India* Goods, furniſh Materials for a great Part of their Trade with other Nations, by which they are ſo far from being Sufferers, that, on the contrary, the more they take from us, the more they enlarge their univerſal Traffick, and conſequently encreaſe their Riches; and *extra* of theſe Reaſons, it would be abſurd to imagine, that if *Holland* was ſo great a Loſer yearly as the Balance of Trade amounted to, that they either would, or indeed could continue it, as they have for ſo long done; nay, if they were in any Shape Sufferers by it, they are too politick a Nation to proceed in a bad Courſe; for this would be a glaring Inſtance of an Imprudence which that circumſpect People are never guilty of; the contrary is therefore apparent, and their Motives for continuing the Trade proceed from the Advantages they reap by it.

But Sir *William Temple's* Sentiments on this Subject are ſo finely expreſſed, in his Obſervations upon the *United Provinces*, P. 231. Cap. 6. of the 5th Edition, that I could not paſs them by without tranſcribing: "The vulgar Miſtake, ſays he, "that Importation of foreign Wares, if purchaſed with Native Commodities, and "not with Money, does not make a Nation poorer, is but what every Man that "gives himſelf leiſure to think muſt immediately rectify, by finding out, that "upon the End of an account between a Nation, and all they deal with abroad, "whatever the Exportation wants in Value to balance that of the Importation, "muſt of Neceſſity be made up with ready Money.

"By this we find out the Foundation of the Riches of *Holland*, as of their Trade, "by the Circumſtances already rehearſed. For never any Country traded ſo much "and conſumed ſo little; they buy infinitely, but it is to ſell again, either upon Im-"provement of the Commodity, or at a better Market. They are the great Maſters "of the *Indian* Spices, and of the *Perſian* Silks; but wear plain Woollen, and feed "upon their own Fiſh and Roots. Nay they ſell the fineſt of their own Cloth to "*France*, and buy coarſe out of *England* for their own Wear. They ſend abroad "the beſt of their own Butter into all Parts, and buy the cheapeſt out of *Ireland* "or the North of *England*, for their own Uſe. In fine, they furniſh infinite "Luxury, which they never practiſe; and Traffick in Pleaſures, they never "taſte."

The principal Articles of our Exports to *Holland* are, Woollens of ſeveral Sorts, Lead, wrought Braſs and Iron, Melaſſes, Cotton, Printed Linens, Quickſilver, wrought Silk, Butter, Morkins, Rice, Copperas, Allum, Pimento, Tin, Tobacco, Sugars, Gold and Silver Coin and Bullion, Drugs, and *Eaſt-India* Goods; beſides which, our ſmaller Exports are Skins, Woods, Leather, Glue, Wool, wrought Plate, Gloves, Hats of ſeveral Sorts, Watches, Earthen-Ware, Garters, Bellows, Cheeſe, Catlings, Lantern Leaves, Rape Cakes, Haberdaſhery, *Scots* Pearls, Pewter, Elephants' Teeth, Glaſs, *&c.* And the principal Imports from thence are Linens, Silks, Threads, Spicery, Incles, Battery, Stockfiſh, Whale-Fins, Madder, Hemp, Flax, Rheniſh Wine, Safflower, Paper, Bugles, and Iron Wire. The leſſer Imports are Snuff, Wainſcot, *Ruſſia* Mats, Smalts, Argol, Seeds, Packthread, Metal prepared, Steel, Spa-Water, Wine, Quilts, Hair of ſeveral Sorts, broken Glaſs, Stone Pots, Bulruſhes, Brick-ſtones, Terras, Quern-ſtones, Twiſt, Indigo, Verdigris, Weed Aſhes, Cinnabar, Spelter, Oker, Pencils, Geneva Hones, Iron, Plates, *&c.* all which we ſuffer to be imported and conſumed amongſt us for the ſame Reaſons that we prohibit the Merchandize of *France*, *viz.* becauſe theſe latter take ſo little from us, whilſt the *Dutch*, by the large Extractions they make, pay much more to the Rents of our Lands and the Labour of our People, than we do to their's. And it is certain, that the *United Provinces* are the greateſt of all our foreign Markets; and the moſt likely to continue ſo; as the Products of their Country are not any Thing near ſufficient to feed or clothe their Inhabitants; ſo that it is not in the Power of Induſtry or Art to free them from a Dependance for both on their Neighbours; whilſt thoſe Princes, who govern a more extended Country, may, as moſt of them do, daily improve in Growths and Manufactures. It is true, *France* has for ſome Years paſt interfered with us in this Trade, though I believe very little to our Prejudice; and I think it may be eſteemed on as good a Footing now, as it was when the Calculations I have quoted were made; and muſt remain ſo, at leaſt in general, as many of the principal Goods which conſtitute that Branch of Commerce can only be ſupplied by us, and ſome of them are as much demanded for *France* as they are for *Holland*.

Of the Trade between Great-Britain *and* Germany.

OUR Commerce with this Country will appear to be but little when its vaſt Extent and Populouſneſs are conſidered; as Dr. *Davenant* makes the Medium of a ſeven Years' Dealing with it, *viz.* from *Chriſtmas* 1698 to 1705, to be in Exports 838,791*l.* and Imports 677,521*l. per Ann.* though indeed he accounts for the Smallneſs of it in a very reaſonable Manner, by acquainting us, that the *Dutch* ſupply that People now with thoſe fine Cloths, Stuffs, Says, Serges, *&c.* manufactured here, which our Merchants uſed formerly to export to *Hamburgh*, and other Parts of the *German* Empire, otherwiſe our Dealings there would certainly be much more conſiderable than they are, and increaſe our Advantage by augmenting the Employ of our Shipping in their Carriage; and this would certainly have occurred, as the Importation of ſo large a Quantity of *German* Linens muſt have been anſwered by an adequate Quantity of our Woollen Manufactures, had not we been intercepted in that Traffick by our *Flemiſh* Neighbours, with Goods of our own manufacturing, taken immediately from the Premiſes; and this in Part proves that *Holland* is no Sufferer in the Overbalance we ſeemingly have againſt them in our mutual Dealings.

It it true, our late Improvements in the Linen Fabricks have ſupplanted the *Germans* in ſome Part of their's, ſince the before-mentioned Calculation; but on the other Hand, this Branch of Buſineſs muſt have roſe in their Favour, and it has gone on ſinking in that of *France's*, and is certainly rendered more beneficial to us both by the Alteration; our Imports of Linen being repaid by an Export of Woollens, and therefore the Increaſe of one is conſequentially the Augmentation of the other. Our Exports there, are Cloths, Baiſe, Stuffs, Frize, Flannels, Kerſeys, Hats, Hoſe, doub. Dozens, Logwood, Pipes, Cochineal, wrought Iron and Braſs, Haberdaſhery, Silk mixed, Silk wrought and unwrought, Sugar, and ditto refined, Painters' Colours, Turners' Wood, wrought Plate, Leather, printed Linen, Callicoes, and other *India* Goods; Rice, Ginger, Pimento, Pepper, Tobacco, ditto cut, Drugs, Coffee, Allum, Pewter, Cotton, Wool, Lead, Litharge, Tin, Apothecaries' Stuff, Copperas, Orchal, Chalk, Glaſs, Glue, Lantern Leaves, Silver Coin, Coney Wool, Fuſtick, Blankets, Cabinet Ware, *&c.* And we import from thence, Linens, Spa and Bourn Water, *Ruſſia* Mats, Rags, Smalts, white Copperas, melting Pots, Pearl, Weed and Potaſhes, Fenugreek, Sturgeon, Canvas, broken Glaſs, Hartſhorns, Drugs, Flax, Tow, Quills, Briſtles, *&c.*

Of Great-Britain's *Commerce with* Spain.

I Now go from the *northern* to the *ſouthern* Regions, in order to give an Account of our Trade with this Kingdom, being the next of Importance to thoſe already mentioned; and I wiſh I could ſay it ſtill continued in that flouriſhing and advantageous Condition it was formerly carried on; but an aggregate Number of Events have happened within theſe fifty Years, or ſince the Emperor *Charles* II.'s Reign, to alter the Nature and Manner of it, by its being loaded with higher and additional Duties than it was in that Prince's Time; and the Introduction of *French* Commodities more encouraged, ſince a Monarch of the Houſe of *Bourbon* ſat on the Throne. But what has given a ſtill greater Blow to our ſaid Trade, is his ſetting up a Multiplicity of Fabricks, for the manufacturing ſuch Goods as the *Spaniards* were formerly ſupplied with principally from us: For though the favouring thoſe from *France* undoubtedly hurts us, I cannot think it did in the Article of our *Colcheſter* Baiſe, as the *Britiſh Merchant* ſeems particularly to intimate; for theſe ſtand as a remarkable Inſtance of the invaluable Quality of that Fabrick, which hitherto no Nation has been able to imitate; and Mr. *King* ſeems to be under another Miſtake in Regard to the Value of theſe Baiſe, when he ſuppoſes them once to have roſe from ſeventeen to twenty-four Pence the *Flemiſh* Ell, as they are never bought by Meaſure, but by the Piece; it being the *Bocking* Baiſe, made indeed at *Colcheſter* as well as at that Place, only that are ſold by Meaſure, and are only fit for the *Portu-*

tugal Market, whilſt the *Colcheſter* Baiſe are ſolely vendible in *Spain*; and the fineſt of them are ſtill in almoſt as much Eſteem as ever in that Country, though the Poverty of the People diſabled them from going dreſſed in the ſame Manner their moſt affluent Condition permitted them, ſo that the Generality are now obliged to content themſelves with the Products of their own Looms, ſet up in *Arragon*, &c.

His Catholick Majeſty *Philip* V. began before his Death to encourage the Manufactories of Cloth, which had for many Years been carried on in his Kingdom, though to very little Purpoſe, till the Duke *de Ripperda*, then Prime Miniſter, revived the Eſtabliſhments, and improved them by introducing a great many Clothiers from his own Country, *Holland*, to whom his Majeſty continued his Protection, notwithſtanding the ſaid Nobleman afterwards fell into Diſgrace. And, in Order the better to promote his Intentions, he granted the Fabricators many Privileges, and to animate them to an Increaſe and Improvement, he wore them himſelf, clothed his Troops with them, and prohibited the Importation of any from abroad, which Mandate was for ſome Years obſerved with Rigour; and though I never heard it was repealed, yet our Cloths are now, and have been for ſome Years paſt, admitted to an Entry at *Cadiz*, as well as other Sorts of Woollens that were included in the Prohibition; but the Quantity is ſmall in Reſpect to what it formerly was, and this Commerce has entirely ceaſed in moſt other Parts of *Spain*, where the Diſpatch formerly was very conſiderable; and the principal Part of what is now introduced there as well of Cloth as other Woollens, ſerves for their Tranſport Trade to their *American* Colonies, with the Exception of our fine Baiſe, beſt *Sandford* Ells, and a few other fine Goods, inimitable, as I before obſerved, by the *French*, which are ſtill uſed and worn by the *Spaniards* in *Old Spain*.

Don *Ferdinand* VI. ſtrictly followed his Father's Steps, and greatly improved on his Schemes and Maxims; ſo that Manufactures of various Sorts are now ſettled in *Spain*, whereas his Father, only left that of Cloth in Being; and this Prince, being leſs influenced by *French* Counſels, had naturally the Good of his Country more at Heart.

I ſhould now proceed to give an Account of the preſent State of our Trade with that Country; but previous hereto, I hope it will be agreeable to my Readers, that I inform them on what Footing our Treaties with that Crown have placed us, as ſome of them are in very few Hands, though the Knowledge of them may prove both inſtructive and advantageous.

The Baſis on which the ſeveral Treaties of Commerce ſubſiſting between *Great-Britain* and *Spain* are founded, is that concluded between the two Crowns at *Madrid*, on the $\frac{13}{23}$ of *May*, 1667; and as this is indeed the Subſtance of all the ſubſequent ones, I ſhall juſt give the Heads of the Articles immediately relative to Trade.

ARTICLE IV. Stipulates a free Trade of Commerce to the Subjects on both Sides, as well by Land as Sea, *&c.*

ART. V. Agrees that no Cuſtoms ſhall be paid in either Kingdom by the Subjects of the other, but ſuch as the Natives pay.

ART. VI. Tables or Liſts of the Duties ſhall be put up at the Doors of the Cuſtom-houſes, *&c.* that Merchants may know what they have to pay, and not be impoſed on.

ART. VII. Permits the *Engliſh* freely to import all Kind of Goods, without being enforced to declare to whom, and for what Price they ſell them; nor ſhall they be moleſted for the Errors of Maſters or others, in the Entry of the ſaid Goods, nor obliged to pay Duties for more than they land; and Prize Goods ſhall be eſteemed as *Engliſh*.

ART. VIII. Grants Leave for the *Engliſh* freely to carry *Eaſt-India* Goods into *Spain*, and that they ſhall have all the Privileges granted to the *Dutch* by the Treaty of *Munſter*, 1648.

ART. IX. And the Privileges granted to the *Engliſh* reſiding in *Andaluſia*, 1645, to be general to all of that Nation, reſiding or trading in any Places whatſoever within his Catholick Majeſty's Dominions.

ART.

ART. X. No Ships appertaining to the *Engliſh*, navigating in the King of *Spain's* Dominions, ſhall be viſited by the Judge of Contraband, or any other Officer; nor ſhall any Soldiers or armed Men be put aboard them; nor ſhall the Cuſtom-houſe Officers of either Part ſearch any Ship, until they have landed all their Cargo, or ſuch Part of it as they intend; but in the Interim Officers may be put aboard, not exceeding three, to ſee that no Merchandiſe be landed without paying Duties, but this without any Expence to the Ship. And when the Maſter ſhall declare his Intention of landing his whole Cargo, and ſhall have made his Entry accordingly, and afterwards other Goods unentered are found aboard, eight working Days ſhall be allowed to work, to commence from the firſt Day of Delivering, to the End that the concealed Goods may be entered, and Confiſcation prevented; and if in the Time limited, the Entry be not made, then the unentered Goods only ſhall be confiſcated, and no other Puniſhment inflicted.

ART. XI. Agrees, that neither Party ſhall be obliged to regiſter or pay Cuſtoms for any other Goods than thoſe they ſhall unlade.

ART. XII. Settles, that when thoſe Goods which are landed and have paid Cuſtoms, are afterwards carried to ſome other Part in the ſame Dominions, they ſhall pay no new Duties.

ART. XIII. All Ships may enter freely in any Port or Road of either Prince, and depart when they pleaſe, without paying any Duties for their Cargoes, provided they do not break Bulk.

ART. XIV. In Caſe the Ships belonging to the Subjects of either Party ſhall be met by Men of War or Privateers appertaining to the other Party, theſe ſhall ſend their Boat aboard the Merchant Ship, and be ſatisfied with examining his Paſſports, without coming within Gunſhot.

ART. XV. If any prohibited Goods ſhall be exported from either of the Kingdoms, by the reſpective Subjects of the one or the other Party, only ſuch Goods ſhall be confiſcated, without any further Puniſhment, except the Delinquent ſhall carry out of his *Britannic* Majeſty's Dominions, the proper Coin, Wool, or Fullers-Earth; or ſhall carry out of the Dominions of the ſaid King of *Spain*, any Gold and Silver, wrought or unwrought; in either of which Caſes, the Laws of the reſpective Countries are to take Place.

ART. XVII. No Merchant, Pilot, Maſter of a Ship, Mariner, Ships, or Merchandiſe, ſhall be embargoed or detained, by any general or particular Order whatſoever.

ART. XVIII. Merchants and Subjects, of the one and the other King, may uſe all Kinds of Fire-Arms for their Defence, according to the Cuſtom of the Place.

ART. XIX. The Captains, Officers, and Mariners, of the Ships belonging to either Party, may not commence an Action for their Wages, nor may be received under any Pretext whatſoever, into the Service or Protection of either King; but if any Controverſy happen between Merchants and Maſters of Ships, or between Maſters and Mariners, the compoſing thereof ſhall be left to the Conſul of the Nation; though he who ſhall not ſubmit to this Arbitrament, may appeal to the ordinary Juſtice of the Place.

ARTS. XXI, XXII, and XXIII. Allow Freedom of Trade to Places in Amity or Neutrality with either Party, that they ſhall not be diſturbed therein, and that in this Caſe, if any contraband Goods be found in them, they only ſhall be confiſcated, and no other.

ART. XXIV. Shews what are contraband Goods, which I have already deſcribed in a former Part of this Work.

ART. XXVI. All Goods belonging to the Subjects of either Party, which ſhall be found laden on the Ships of Enemies, ſhall be confiſcated.

ART. XXVII. The Conſuls which ſhall hereafter reſide in any of the King of *Spain's* Dominions, or the *Spaniſh* Conſul reſiding in *England*, ſhall have, and exerciſe the ſame Power and Authority in the Execution of his Office, as any other Conſul hath formerly had.

ART.

ART. XXVIII. Secures the Subjects on either Side from being moleſted or diſturbed on Account of their Religion, ſo long as they give no publick Scandal or Offence.

ART. XXIX. All Merchandiſe ſhall be paid for in both Countries only in ſuch Coin as ſhall be agreed for.

ART. XXX. And all Merchants, Factors, *&c.* of both Nations ſhall enjoy their Houſes, Warehouſes, *&c.* during the Time for which they have hired them, without any Impediment.

ART. XXXI. The Subjects of the ſaid confederate Kings ſhall employ thoſe Advocates, Proctors, *&c.* that they ſhall think fit; and they ſhall not be conſtrained to ſhew their Books and Papers, if it be not to give Evidence, for the avoiding Controverſies and Law Suits, neither ſhall they be embargoed, detained, or taken out of their Hands upon any Pretence whatſoever, and they may keep their ſaid Books and Accounts in whatever Language they pleaſe.

ART. XXXII. In Caſe the Eſtate of any Perſon ſhall be ſequeſtered or ſeized on by any Court of Juſtice, within the Dominions of either Party, and any Eſtate or Debt happen to lie in the Hands of the Delinquents, belonging *bona fide* to the Subjects of the other, the ſaid Eſtate or Debts ſhall not be confiſcated, but reſtored to the true Owners.

ART. XXXIII. The Eſtates of thoſe who die in either Country reſpectively ſhall be preſerved for the lawful Heirs of the Deceaſed.

ART. XXXIV. The Goods and Eſtates of his *Britannic* Majeſty's Subjects, who ſhall die in *Spain*, without making their Wills, ſhall be put into Inventory, with their Papers, Writings, and Books of Account, by the Conſul, or other publick Miniſter, to be kept for the Proprietors and Creditors; and neither the *Cruzada*, nor any other Judicatory whatſoever, ſhall intermeddle therein: which alſo in like Caſe ſhall be obſerved in *England*, towards the Subjects of the King of *Spain*.

ART. XXXV. That a decent and convenient Burial-place ſhall be granted and appointed, to bury the dead Bodies of the *Britiſh* Subjects who ſhall die in *Spain*.

ART. XXXVI. If any Difference hereafter happen between their *Britannic* and Catholic Majeſties, ſix Months' Space ſhall be allowed their reſpective Subjects, to withdraw their Effects, without giving them in that Time any Moleſtation or Trouble, or retaining their Goods or Perſons.

ART. XXXVIII. The *Engliſh* and *Spaniards* to have reciprocally all Privileges granted, orto be granted, to any other Stranger.

Subſequent to the foregoing Treaty many others have ſince been made, eſpecially after the laſt long War, at *Utrecht*, the 13th of *July*, and 9th of *December*, 1713, and another on the 14th of *December*, 1715, which laſt being ſcarce, and conſequently not eaſy to be obtained, I here inſert it *verbatim*, as it is not long.

Treaty of Commerce between Great-Britain *and* Spain, *concluded at* Madrid, *the* 14*th of* December, 1715.

WHEREAS ſince the Treaties of Peace and Commerce lately concluded at *Utrecht*, the 13th of *July*, and the 9th of *December*, 1713, between his Catholic Majeſty, and her late Majeſty the Queen of *Great-Britain*, of glorious Memory, there remained ſtill ſome Differences about Trade and the Courſe thereof; and his Catholic Majeſty and the King of *Great-Britain*, being inclined to maintain and cultivate a firm and inviolable Peace and Friendſhip, in order to attain to this good End, they have by their two Miniſters, underwritten, mutually and duly qualified, cauſed the following Articles to be concluded and ſigned.

I. The *Britiſh* Subjects ſhall not be obliged to pay higher or other Duties, for Goods coming in, or going out of the ſeveral Ports of his Catholic Majeſty, than thoſe they paid for the ſame Goods in King *Charles* II.'s Time, ſettled by Sche-

dules and Ordonnances of the ſaid King, or his Predeceſſors: And although the *Gracias*, commonly called *Pie del Fardo*, be not grounded on any Royal Ordonnance, nevertheleſs his Catholic Majeſty declares, wills, and ordains, that it be obſerved, now and hereafter, as an inviolable Law; which Duties ſhall be exacted and raiſed, now and for the future, with the ſame Advantages and Favours to the ſaid Subjects.

II. His Majeſty confirms the Treaty made by the *Britiſh* Subjects, with the Magiſtrates of *St. Andero* in the Year 1700.

III. His Catholick Majeſty permits the ſaid Subjects to gather Salt in the Iſle of *Tortugas*, they having enjoyed this Liberty in the Reign of King *Charles* the Second, without Interruption.

IV. The ſaid Subjects ſhall pay no where any higher, or other Duties, than thoſe paid by the Subjects of his Catholic Majeſty in the ſame Places.

V. The ſaid Subjects ſhall enjoy all the Rights, Privileges, Franchiſes, Exemptions, and Immunities whatever, which they enjoyed before the laſt War, by Virtue of the Royal Schedules or Ordonnances, and by the Articles of the Treaty of Peace and Commerce made at *Madrid* in 1667, which is hereby fully confirmed; and the ſaid Subjects ſhall be uſed in *Spain*, in the ſame Manner as the moſt favoured Nation, and conſequently all Nations ſhall pay the ſame Duties on Wool and other Merchandiſes coming in and going out by Sea. And all the Rights, Privileges, Franchiſes, Exemptions and Immunities, that ſhall be granted and allowed to the ſaid Subjects, the like ſhall be granted, obſerved, and permitted to the Subjects of *Spain*, in the Kingdoms of his Majeſty the King of *Great-Britain*.

VI. And as Innovations may have been made in Trade, his Catholic Majeſty promiſes on his Part to uſe his utmoſt Endeavours to aboliſh them, and for the future to cauſe them to be avoided: In like Manner the King of *Great-Britain* promiſes to uſe all poſſible Endeavours to aboliſh all Innovations on his Part, and for the future to cauſe them by all Means to be avoided.

VII. The Treaty of Commerce made at *Utrecht*, the 9th of *December*, 1713, ſhall continue in Force, except the Articles that ſhall be found contrary to what is this Day concluded and ſigned, which ſhall be aboliſhed and rendered of no Force, and eſpecially the three Articles, commonly called explanatory; and theſe Preſents ſhall be approved, ratified, and changed on each Side, within the Space of ſix Weeks, or ſooner, if poſſible. In Witneſs whereof, and by Virtue of our full Powers, we have ſigned theſe Preſents at *Madrid*, the 14th of *December*, in the Year 1715.

(L. S.) *M. de Bedmar.*
(L. S.) *George Bubb.*

After this Treaty, Affairs of State and new Embroils have occaſioned the making ſeveral others ſince the Rupture in 1718, though they all proved ineffectual to prevent the War in 1739, which being now happily over, it is to be hoped the Peace that has ſucceeded will remain eſtabliſhed for a long Term, and her chearful Smiles lull both Nations into a Forgetfulneſs of the paſt Troubles and Diſtreſſes, that War brings with it, more eſpecially to the mercantile Part of them; and as the Treaty concluded on this Occaſion at *Madrid*, the 5th of *October*, N. S. 1750, not only ſettled the Peace in general, but alſo in particular the Diſputes depending between the two Crowns, in regard to the *Aſſiento* Contract; and as it is the laſt, and conſequently of moſt Importance for my Readers' Government, I ſhall give them the Articles of it, and with them finiſh this Topick.

WHEREAS by the XVIth Article of the Treaty of *Aix-la-Chapelle*, it has been agreed between their *Britannic* and Catholic Majeſties, that the Treaty of the *Aſſiento* for the Commerce of Negroes, and the Article of the annual Ship, for the four Years of Non-Enjoyment, ſhould be confirmed to *Great-Britain*, upon the ſame Foot, and upon the ſame Condition, as they ought to have been executed before the late War; and their reſpective Ambaſſadors of their ſaid Majeſties having agreed, by a Declaration ſigned between them on the $\frac{12}{23}$ *June*, 1748,

1748, to regulate at a proper Time and Place, by a Negociation between Miniſters, named on each Side for that Purpoſe, the Equivalent which *Spain* ſhould give in Conſideration of the Non-Enjoyment of the Years of the ſaid *Aſſiento* of Negroes, and of the annual Ship, granted to *Great-Britain*, by the Xth Article of the Preliminaries ſigned at *Aix-la-Chapelle*, on the $\frac{13}{24}$ *April*, 1748.

Their *Britannic* and Catholic Majeſties, in order to fulfil the ſaid Engagements of their reſpective Miniſters, and to ſtrengthen and perfect more and more a ſolid and laſting Harmony between the two Crowns, have agreed to make the preſent particular Treaty between themſelves, without the Intervention or Participation of any third Power; ſo that each of the contracting Parties acquires by Virtue of the Ceſſions which that Party makes, a Right of Compenſation from the other reciprocally: And they have named their Miniſters Plenipotentiaries for that Purpoſe, *viz.* his *Britannic* Majeſty, *Benjamin Keene*, Eſq. and his Catholic Majeſty, Don *Joſeph de Carvajal and Lancaſter*; who, after having examined the Points in Queſtion, have agreed on the following Articles:

ARTICLE I. His *Britannic* Majeſty yields to his Catholic Majeſty, his Right to the Enjoyment of the *Aſſiento* of Negroes, and the annual Ship, during the four Years ſtipulated by the XVIth Article of the Treaty of *Aix-la-Chapelle*.

ART. II. His *Britannic* Majeſty, in Conſideration of a Compenſation of 100,000*l.* Sterling, which his Catholic Majeſty promiſes and engages to cauſe to be paid either at *Madrid* or *London*, to the Royal *Aſſiento* Company, within the Term of three Months at lateſt, to be reckoned from the Day of ſigning this Treaty, yields to his Catholic Majeſty all that may be due to the ſaid Company for Balance of Accounts; or ariſing in any Manner whatſoever from the ſaid *Aſſiento*; ſo that the ſaid Compenſation ſhall be eſteemed and looked upon as a full and entire Satisfaction on the Part of his Catholic Majeſty, and ſhall extinguiſh from this preſent Time, *for the future and for ever*, all Right, Pretenſion, or Demand, which might be formed in Conſequence of the ſaid *Aſſiento* or annual Ship, directly or indirectly, on the Part of his *Britannic* Majeſty, or on that of the ſaid Company.

ART. III. The Catholic King yields to his *Britannic* Majeſty all his Pretenſions or Demands in Conſequence of the ſaid *Aſſiento* and annual Ship, as well with Regard to the Articles already liquidated, as to thoſe which may be eaſy or difficult to liquidate; ſo that no Mention can ever be made of them hereafter on either Side.

ART. IV. His Catholic Majeſty conſents that the *Britiſh* Subjects ſhall not be bound to pay higher or other Duties, or upon other Evaluations for Goods, which they ſhall carry into, or out of the different Ports of his Catholic Majeſty, than thoſe paid on the ſame Goods in the Time of *Charles* the Second, King of *Spain*, ſettled by the Schedules and Ordonnances of that King, or thoſe of his Predeceſſors. And although the Favour or Allowance called *Pie del Fardo* be not founded upon any Royal Ordonnance, nevertheleſs his Catholic Majeſty declares, wills, and ordains that it ſhall be obſerved now, and for the future, as an inviolable Law; and all the above-mentioned Duties ſhall be exacted and levied, now and for the future, with the ſame Advantages and Favours to the ſaid Subjects.

ART. V. His Catholic Majeſty allows the ſaid Subjects to take and gather Salt in the Iſland of *Tortugas*, without any Hindrance whatſoever, as they did in the Time of *Charles* the Second.

ART. VI. His Catholic Majeſty conſents that the ſaid Subjects ſhall not pay any where higher, or other Duties, than thoſe which his own Subjects pay in the ſame Place.

ART. VII. His Catholic Majeſty grants, that the ſaid Subjects ſhall enjoy all the Rights, Privileges, Franchiſes, Exemptions, and Immunities whatſoever, which they enjoyed before the laſt War, by Virtue of Schedules or Royal Ordonnances, and by the Articles of the Treaty of Peace and Commerce made at *Madrid* in 1667; and the ſaid Subjects ſhall be treated in *Spain*, in the ſame Manner as the moſt favoured Nation, and conſequently, no Nation ſhall pay leſs Duties upon Wool and other Merchandiſes, which they ſhall bring into, or carry out of *Spain* by Land,

than the ſaid Subjects ſhall pay upon the ſame Merchandizes, which they ſhall bring in or carry out by Sea; and all the Rights, Privileges, Franchiſes, Exemptions, and Immunities, which ſhall be granted or permitted to any Nation whatever, ſhall alſo be granted and permitted to the ſaid Subjects; and his *Britannic* Majeſty conſents that the ſame be granted and permitted to the Subjects of *Spain* in his *Britannic* Majeſty's Dominions.

ART. VIII. His *Catholic* Majeſty promiſes to uſe all poſſible Endeavours on his Part, to aboliſh all Innovations which may have been introduced into Commerce, and to have them forborn for the future. His *Britannic* Majeſty likewiſe promiſes to uſe all poſſible Endeavours to aboliſh all Innovations, and to forbear them for the future.

ART. IX. Their *Britannic* and *Catholic* Majeſties confirm by the preſent Treaty the Treaty of *Aix-la-Chapelle*, and all the other Treaties therein confirmed, in all their Articles and Clauſes, excepting thoſe which have been derogated from by the preſent Treaty: As likewiſe the Treaty of Commerce, concluded at *Utrecht* in 1713; thoſe Articles excepted, which are contrary to the preſent Treaty, which ſhall be aboliſhed and of no Force; and namely the three Articles of the ſaid Treaty of *Utrecht*, commonly called *explanatory*.

ART. X. All the reciprocal Differences, Rights, Demands, and Pretenſions, which may have ſubſiſted between the two Crowns of *Great-Britain* and *Spain*, in which no other Nation whatever has any Part, Intereſt or Right of Intervention, being thus accomodated and extinguiſhed by this particular Treaty; the two ſaid moſt ſerene Kings engage themſelves mutually to the punctual Execution of this Treaty of reciprocal Compenſation, which ſhall be approved and ratified by their ſaid Majeſties, and the Ratifications exchanged in the Term of ſix Weeks, to be reckoned from the Day of their Signing, or ſooner, if it can be done.

In Witneſs whereof, &c.

Theſe Treaties are confirmed by the ſecond Article of the definitive Treaty of Peace, ſigned at *Paris*, *Febuary* 10th, 1763.

Our Exports now to *Spain*, including the *Canary* Iſlands, are long, ſhort, and *Spaniſh* Cloth, Stuffs, Baiſe, Hats, Perpets, Silk and worſted Hoſe, Butter, Cheeſe, Leather, wrought Iron, Braſs, Bell Metal, Linens plain and printed, Pewter, Tin, Lead, Shot, Copper, Sail Cloth, Haberdaſhery Wares, Clock Work and Watches, Shoes, wrought Silk, wrought Plate, Gunpowder, Cordage, Logwood, Brazilleto, Silk mixed, and ſewing Silk, Glaſs, Copperas, Prints, Train Oil, Toys, Cabinet and Ship-Chandlery Wares, Wax, Lantern Leaves, Flax, Fans, Wheat, Beans, Barley Meal; Thread, Tobacco, Canvas, Cambricks, Lawns, Bed-Ticks, Sugar, Drugs, Pimento, Pepper, Spice, Staves, Brimſtone, Deer Skins, *Eaſt-India* Goods, *&c.*

The Imports from thence are Wine, Almonds, Anniſeed, Cumminſeeds, Soap, Oil, Silk, before the Extraction was prohibited, Iron, Wool, Indigo, Figs, Raiſins, Oranges, and Orange Juice, Lemons, Cheſnuts, Small-nuts, Pomgranates, Olives, Saffron, Barilla, Kelp, Kid-Skins, Capers, Umber, Anchovies, Sponges, wrought Silk, Cochineal, Cork, Whiſk Brooms,and, formerly, Brandies, which I believe may pretty near balance that Trade, *extra* of the Corn and Meal, which have lately been very conſiderable, and I think muſt be regarded as a Balance in our Favour; but theſe being only accidental Articles, are not to be reckoned as ſtaple Commodities, nor placed on the Credit Side in this Account of Commerce, at leaſt in ſuch large Quantities, as a loſt Harveſt in that and the neighbouring Territories obliged them to call for; I ſay, ſuppoſing their Dearth to happen when an equal Calamity has befel the other ſouthern Countries; for when they can be ſupplied from *Sicily*, *Sardinia*, *Naples*, *Turkey*, *Barbary*, or the *Eceleſiaſtical State*, they always prefer thoſe ſolid Grains before our's, as well on Account of its yielding more Flour, as becauſe their Mills are ſet for grinding hard Corn, which muſt be altered when a ſoft Sort is to ſupply the Deficiency. I have not mentioned among the preceding Imports, the Article of Plate, which is no ſmall one, and I think is a certain Indication of the Balance of that Trade being in

our

our Favour; and would certainly be much more ſo, were the Cuſtoms on our Goods collected in *Spain* according to the preceding Treaties, which include and inforce the Schedules granted the *Engliſh* by ſeveral ſucceſſive Monarchs. But to ſhew that they are levied on a much higher Valuation, and very differently from what is therein ſtipulated and agreed, I here add an Account of the Impoſts on Merchandiſe, drawn up at *Cadiz*, the 17th of *February*, 1750, by a Gentleman, whoſe Capacity in Mercantile Affairs is exceeded by few, and this induces me alſo to ſubjoin his Sentiments, which pleaſe to take in his own Words.

Particulars of the Impoſts on Merchandiſe entered in this Cuſtom-houſe.

GOODS according to their different Species pay 11, 5, 10, or 4 *per Cent.* Almoxarifaſgo Goods charged with 11 *per Cent.* Almoxarifaſgo pay Duties as follows:

Branches.		Decimals.
N°. 1	11 *per Cent.* with $\frac{1}{4}$ in Plate, which is $\frac{1}{8}$ Part more	0,12375
2	2 *per Cent.* called *dos unos*, as aforegoing	0,0225
3	2 *per Cent.* called *Boſillo de la Reyna*, as above	0,0225
4	$1\frac{1}{2}$ *per Cent.* with a Premium of 5 *per Cent.*	0,01575
5	$1\frac{1}{4}$ *per Cent.*	0,0125
6	4 *per Cent.* called 1°. 2°. 3°. 4°. *uno de Alcavala*	0,04
7	$1\frac{1}{2}$ *per Cent.* called *Donativo antiguo de la Cuidad y Fortification*	0,01500
	Amount of the Duties before the Year 1686, being $25\frac{1}{2}$ *per Cent.*	0,252
8	$1\frac{1}{2}$ *per Cent.* with a Premium of 5 *per Cent. conſulado y longa*	0,014
	Amount of the Duties upon the Acceſſion of King *Philip* V. being $26\frac{3}{5}$ *per Cent.*	0,266
9	$1\frac{1}{2}$ *per Cent.* called *Donativo moderno de la Cuidad*	0,015
	Amount of the Duties before the late War, being $28\frac{1}{10}$ *per Cent.*	0,281
10	2 *per Cent.* called *Sanidad*	0,02
	Amount of the Duties actually levied, being $30\frac{1}{10}$ *per Cent.*	0,301

When the Almoxarifaſgo is 5 *per Cent* the Duties are as follows:

5 *per Cent.* with the Quarter Part in Plate, which is $\frac{1}{8}$ Part more	0,05625
N°. 2, 3, 4, 5, 6, 7, Branches afore-mentioned added	0,12825
$4\frac{1}{2}$ *per Cent.* additional Alcavala on this Article	0,045
Amount of the Duties before the Year 1686 being $22\frac{19}{20}$ *per Cent.*	0,2295
N°. 8, above-mentioned added	0,014
Amount of the Duties upon the Acceſſion of King *Philip*, being $24\frac{7}{20}$ *per Cent.*	0,2435
N°. 9, above-mentioned added	0,015
Amount of the Duties before the late War, being $25\frac{17}{20}$ *per Cent.*	0,2585
N°. 10, above-mentioned, added	0,02
Amount of the Duties actually levied, being $27\frac{85}{100}$ *per Cent.*	0,2785

Goods charged with 10 *per Cent.* Almoxarifaſgo paid in the afore-mentioned Manner, before the Acceſſion of the late King *Philip*, $29\frac{975}{1000}$ *per Cent.* and before the late War, $31\frac{475}{1000}$ *per Cent.* and they muſt now pay $33\frac{475}{1000}$ *per Cent.*

Goods charged with 4 *per Cent.* Almoxarifaſgo, paid before the Acceſſion of King *Philip* $23\frac{225}{1000}$ *per Cent.* and $24\frac{725}{1000}$ *per Cent.* before the late War, and actually pay $26\frac{725}{1000}$ *per Cent.*

In Order to comprehend the Calculation of theſe Duties, here is a ſmall Specimen of the Model of the *Spaniſh* Book of Rates, as it ſtood before the late War, and the Innovations made in the Valuation of ſome Articles of your Manufacture.

5	Anaſcotsblancos la Pieza	6000	40	White Hunſcoats, they are now rated at	7000
5	Dichos negros la Pieza	5000	40	Black ditto	6000
11	Bayetas de *Ingalaterra*	10000	$\frac{1}{3}$	Baiſe	12000
10	Curtidos de *Irlanda* cada une	680	$\frac{1}{3}$	*Iriſh* Hides	1496
11	Duroys la Pieza	2000	40	Duroys	3000
11	Pannos finos de *Ingalaterra* la Pieza	24,000	40	Fine *Engliſh* Cloths, Var. now rated at	1768 each
11	Dichos entre finos	17,000	40	Second Cloths	816 ditto
11	Dhos Comunes	14,000	40	*Yorkſhire* Cloths	510 ditto

The firſt Column ſpecifies the Almoxarifaſgo, the ſecond the ſpecies of Goods, the third the Value, Rate, or Aforo, as called here, the fourth the Abatement *per Cent.* or Gracia, called *Pie de fardo.* Beſides that Gracia, there is an Abatement of 25 *per Cent.* allowed by the King, called *la quarta Tabla.* The Duties are thus calculated, *viz.*

100 Pieces white Hunſcoats entered in this Cuſtom-houſe, 40 deducted for the Gracia, being 40 *per Cent.* as afore-mentioned, 60 Pieces valued according to the Aforo, or Rate above-mentioned, at 6000 Maravedis, make 360,000, from which Sum deducting 90,000, or the $\frac{1}{4}$ Part for la Quarta Tabla, there remains 270,000 Maravedis. As the Almoxarifaſgo is 5 *per Cent.* and all the Branches appertaining to it as afore-mentioned, amounting to $25\frac{85}{100}$ *per Cent.* before the late War, therefore 270,000 at $25\frac{85}{100}$ *per Cent.* are Mars. 69,795, which at 64 Mars. the Value of each Real Plate, are R. Pla $1090\frac{35}{64}$, the full Amount of the Duties on 100 Pieces of white Hunſcoats. But at preſent the Aforo or Valuation of white Hunſcoats is at 7000 Maravedis, whence $60 \times 7000 = 420{,}000 - 105{,}000$ the Quarta Tabla $= 315{,}000$ at $27\frac{85}{100}$, the actual Duties *per Cent.* are 87,727,5 Mars. at 64 are R. Pl. $1370\frac{475}{640}$ the Amount of the Duties 100 Pieces white Hunſcoats muſt now pay. The Difference is, R. Pl. $280\frac{125}{640}$ they now pay more than was levied before the late War, which is near $25\frac{3}{4}$ *per Cent.* Augmentations on the Duties then eſtabliſhed.

In the Treaty of Commerce between the Crowns of *Great-Britain* and *Spain*, concluded at *Madrid* the $\frac{13}{23}$ *May*, 1667, the Schedules and Immunities granted to the *Britiſh* Subjects trading to theſe Ports are, I think, inſerted. If a new Treaty be attempted, the ſaid Schedules may be inſerted therein verbatim, to enforce the Execution. The View of the *Britiſh* Court, in the Treaty concluded at *Utrecht* in 1713, ſeemed to be, that their Merchandiſe ſhould not pay more Duties than 10 *per Cent.* on their real Value, to be aſcertained in a new Book of Rates, which was mutually agreed between the two Courts to be formed. But the Biſhop, [I ſuppoſe the Biſhop of *Briſtol*, who was then Ambaſſador and Plenipotentiary, is here meant,] did not underſtand Duties; for the Expreſſion in the ſaid Treaty, *But it is to be underſtood that this is not to extend to the* Albavalas, Cientos, and *Millones*, deſtroyed the whole Purport of the Treaty, and rendered the forming a new Book of Rates quite uſeleſs. The Merchants verſed and knowing in the Nature of the Duties, did therefore ſollicit that the Cuſtoms and Aforos ſhould remain on the ſame Footing they were upon in King *Charles* II.'s Time, though ſome Articles were over-rated, which was accordingly executed by the Treaty of *Madrid*, 1715. Since the late War the Duties are augmented as afore-mentioned, and what is much more grievous, the Aforo or Valuation of the Merchandiſe is greatly increaſed; wherefore our Conſul at the Head of this Factory applied to our Ambaſſador at *Madrid*, to ſollicit, if ſeemingly to him convenient, that the Goods ſhould be diſpatched in the Cuſtom-houſes in like Manner as they were before the War: Nothing favourable has reſulted, for the Goods are charged upon the extravagant new Footing. If the Aforo or Valuation of a few Articles of the *Britiſh* Products was leſſened, and the Innovations, introduced ſince the War, were aboliſhed, the

propoſed End of the *Britiſh* Court, to pay no more than 10 *per Cent.* on the real Value of the Goods, may be accompliſhed, although no Alteration bemade in reducing or aboliſhing any Branch of the Duties actually levied: Which appears to me to be the eaſieſt Method, as an Attempt to ſtrike off any of the Branches of the Duties might be powerfully reſiſted by thoſe to whom they were appropriated, or the Managers thereof. Some Inſtances are offered to make this Matter more plain. A Piece of Baiſe, upon a Medium of the Value of the Quality for this Market, ſhipped in *London*, will not coſt, including the Charges, above 3*l.* 8*s.* 9*d.* which is equal to fifteen Ducats, or a hundred and ſixty-five Reals Plate; each Piece was rated before the War at 10,000 Maravedis; the Gracia $\frac{1}{3}$, and $\frac{1}{4}$ for the Quarta Tabla, being deducted, and the Duties at $28\frac{1}{176}$ *per Cent.* as they then ſtood, being charged, each Piece paid R. Pl. $22\frac{5}{51}$ which is $13\frac{1}{2}$ *per Cent.* on the real Value. Yet a Piece of Baiſe is now rated at 12,000 Mars. and the actual Duties of $30\frac{1}{176}$ being charged, after deducting the Gracias, each Piece muſt now pay R. Pl. $28\frac{7}{352}$ which exceeds 17 *per Cent.* on the real Value. Whereas if the Aforo of Baiſe was at 7000 Mars. then each Piece would pay as the Duties now ſtand, R. Pl. $16\frac{57}{1288}$, or only 10 *per Cent.* on the real Value. In like Manner other Goods may be valued according to their regular and common Coſt put aboard, and not at the Price they are regularly ſold for; becauſe the Duties and Charges on the Sale make a Part of the Price of Sale. If this Idea be approved, a Table for the Rates of all Goods imported from his Majeſty's Dominions may eaſily be framed, and formed ſo that the Duties ſhall not exceed 10 *per Cent.* on the real Value. The following is a Specimen of ſuch a Table, *viz.*

Almoxarifaſgo	Goods	the Aforo	the Gracia.
11	Baiſe, each Piece	70000	$\frac{1}{3}$
11	Long Ells, each Piece	2900	40
11	Fine Cloths, each Piece	24000	40 as before the War.
11	Second Cloths, ditto	17000	40 as before the War.
11	*Yorkſhire* Cloth, ditto	10000	40
11	Eſtamenas, each Piece	6000	40 as before the War.
5	Broad Camlets, ditto	5000	40
5	Hunſcoats, each Piece	5000	40
10	Hides, each	680	$\frac{1}{2}$ as before the War.

Merceries according to Invoice, *&c.*

Of the Trade between Great-Britain *aud* Portugal.

OUR Trade with this Kingdom is generally eſteemed of great Value; and the Importance of it to both Nations being very conſiderable, therefore ought to be cultivated by them with mutual Ardour; as the *Portugueſe* take off a large Quantity of our native Commodities, and we in Return conſume a greater one of their's than all the Nations in *Europe* put together; though that People appear in ſome Meaſure inſenſible of the Advantages ariſing to them from this Commerce, and ſeem to have forgot the little Diſpatch they had for their Wines, the greateſt Product of their Country, when Peace and low Duties made thoſe of *France* to be the general Conſumption.

The *Engliſh* Factory at *Liſbon* publiſhed a Memorial in the Month of *July* 1729, by which it appears, and ſeemingly beyond Contradiction, that the Balance of Trade with that Kingdom was againſt us; and as I have no Reaſon to think there has been any favourable Alteration in it ſince, I ſhall give my Reader a Copy of the ſaid Memorial, as it was communicated to me by one of the Gentlemen principally concerned in drawing it up, with the Remarks made by that conſiderable and judicious Body of Traders on it.

An Eſtimate *of the yearly Conſumption in the* Portugueſe *Dominions of the Commodities which are of the Growth and Manufactures of the* Engliſh *Dominions, calculated by the annual Sales of the Merchants reſiding in* Liſbon, *and by the beſt Information taken from them and from other Parts.*

Sales in *Liſbon*, computed by ſeveral *Engliſh* and other Merchants' Houſes ſettled there	1,620,000,000
Sales in *Porto*	600,000,000
Sales in *Coimbra* and *Fiegueira*	120,000,000
Sales in *Madeira*, and the other Iſlands, about	100,000,000
Bacalhoa, fifty thouſand Quintals, at 4000 Rs.	200,000,000
	2,640,000,000
Duties paid for Cuſtoms might be reckoned at 15 *per Cent.* on the Sales 496,000,000	
Small Charges in and out the Cuſtom-houſe, and at the Sale 1 *per Cent.* 26,400,000	
Port Charges, Conſulage excepted, of all the *Engliſh* Ships, Expences of the Captains and Sailors, and of all the *Engliſh* in *Portugal*, at a moderate Computation 50,000,000	
	572,400,000
Remains net to the *Britiſh* Nation	2,067,600,000

An *Eſtimate* on the yearly Conſumption by the *Engliſh*, of the Product of the *Portugueſe* Dominions, calculated by the Exportation from them to *Great-Britain*, *Ireland*, and the *Engliſh* Poſſeſſions in *America*.

WINES.

From *Liſbon*	3000 Pipes, white, at	40000	120,000,000
	2000 ditto, red	50000	100,000,000
From *Oporto*	25000 ditto,	50000	1,250,000,000
From *Figueira*	1500 ditto,	45000	67,500,000
From *Madeira*	10000 ditto,	28000	280,000,000
	41500 Pipes.		1,817,500,000
Oils from *Liſbon*, *Oporto*, and *Algarve*, 2000 Pipes, at 40000			80,000,000
Figs, Almonds, Raiſins, Brooms, Canes, Shumach, Cork, *&c.* from *Algarve*			20,000,000
50000 Cheſts of Fruit, from *Liſbon*, *Oporto*, &c. at 3000 Rs.			150,000,000
4000 Moys of Salt from *Liſbon*, *St. Uval*, &c. at 1400 Rs.			56,000,000
The Exportation by the *Engliſh*, for their own Conſumption of the *Portugueſe* Commodities, annually amounts to			2,123,500,000
The net Proceeds belonging to the *Engliſh*, of the Conſumption of their Commodities in the *Portugeſe* Dominions as above, amounts to			2,067,600,000
Conſequently the Balance in Favour of *Portugal*, and loſt by *England*, is			55,900,000
			2,123,500,000

Portugal

Portugal loſes by her Trade with the ſeveral other Nations from whom ſhe receives Commodities, *extra* of the *Engliſh*, as will be ſhown in an Eſtimate, when I come to treat thereof	2,964,000,000
The *Engliſh* pay for the Balance of their Trade with *Portugal* as *per* the above Eſtimate	55,900,000
	2,908,100,000

Part of which goes directly to *Italy*, and the Reſt, moſtly, by the Way of *England*, on Account of the Conveniency of the Exchange, and of Shipping

By the preceding Eſtimate, made favourable to the *Engliſh* Trade, as the Conſumption of their Commodities is ſet down rather more than leſs, and their Exportation of the *Portugueſe* Products as moderately computed as is poſſible both in Quantity and Price, it plainly appears,

1ſt. That the Balance of Trade between *Great-Britain* and *Portugal*, is in Favour of *Portugal*, who annually gains by the ſame, and the *Engliſh* loſe Rs. 55,900,000.

2dly. That conſequently that Trade cannot occaſion the Extraction of Gold from *Portugal*, ſince the liquid Produce of all the Commodities conſumed there, is not ſufficient to pay for thoſe which they take from *Portugal*.

3dly. That therefore the Gold, which annually goes from thence, is to pay other foreign Nations the Balance of their Trade; ſince the *Portugueſe* cannot pay them in the Product of their own Country much above the quarter Part of the Value of what they conſume of thoſe foreign ones.

4thly. That the King of *Portugal* receives every Year a very conſiderable Sum from the Duties on the *Engliſh* Trade, which are much higher in Proportion than thoſe on the Commodities of other Nations, being on the Importation Rs. 396,000,000 and on the Exportation 212,350,000, which amounts annually to R. 608,350,000.

Beſides theſe Truths ſo clearly demonſtrated, there are many others which well deſerve to be conſidered; ſuch are the following:

No Nation, beſides the *Engliſh*, take off the *Portugueſe* Wines, nor can be ſuppoſed ever to do it, ſince thoſe who want this Commodity are ſupplied much better from *France*, and from other Parts, and at more moderate Prices; and as *England* reduce the Duties on the *French* Wines to an Equality with thoſe on the *Portugueſe*, this Branch of Trade, which is ſo advantageous to them as to amount yearly to above a million eight hundred thouſand Mil-Reis, paid them in ready Money, by the *Engliſh*, would be entirely loſt to them: The ſame Thing, a little more or leſs, is evident with Reſpect to other Fruits, ſince the *Engliſh* take off above ten Times the Quantity which all other Nations together do.

And though this Branch of Trade is much leſs conſiderable, yet it amounts by the Eſtimate to 170,000,000 Reis, and being, the ſame with their Wines, the Growth of their Country, that whole Sum which the *Engliſh* pay for it is juſt ſo much Gain to *Portugal*. It is remarkable, that, notwithſtanding the conſiderable Sum of Money, which the Commodities exported by the *Engliſh* amount to, they are never indebted to the *Portugueſe*, paying them always ready Money; whereas on the contrary, theſe laſt are always indebted to the *Engliſh*; and this Truth naturally leads to the following Conſiderations: That *Portugal* has always in Poſſeſſion a very large Stock belonging to the *Engliſh*, which, conſidering the Nature of the Sales in this Country, and the Cuſtom and Method of the Shopkeeper's Payments, may ſafely be computed, Allowance being made for what is ſold for ready Money, to amount to above the Import of one Year's Sales, ſo that by a moderate Computation the *Engliſh* have conſtantly a dead Stock in *Portugal*, conſiſting of Goods in the Cuſtom-houſe and their Warehouſes, and in Debts outſtanding, of 2,500,000,000 Reis or upwards. The *Engliſh* certainly furniſh the *Portugueſe* with the moſt uſeful and neceſſary Goods, their own Corn for the preſent excepted, and at ſuch moderate Prices as no

other Nation can afford to do. If at this Time they bring them none of their Corn, there being a Scarcity of it, they have done it formerly, and no Doubt will do it again when they can ſpare it: and ſince *Portugal* cannot ſubſiſt without a conſtant Supply of that Commodity from abroad, ſhould there happen to be a bad Harveſt in *Spain*, or a Rupture between thoſe two Crowns, the *Engliſh* by the Power of their Navy, and the Quantity of their trading Ships, are the only Nation which can at all Times effectually furniſh and ſecure what foreign Corn is neceſſary to *Portugal*.

To the above Remarks on the Trade of *Portugal*, I ſhall take the Liberty to add the following of my own; as conſequential to thoſe ſo juſtly made by the Merchants there. And;

1ſt. If they are ſuch as may be relied on, Mr. *King's* Calculations on that Commerce muſt have been very erroneous, or it muſt have been greatly altered in the few intervening Years, between his Eſtimate and the *Liſbon* Merchant's; as he ſuppoſes, in his Dedication, P. 3. Vol. III. that our Exports to *Portugal* were then encreaſed from about 300,000*l.* a Year to near a Million and a half, whereas by the preceding Eſtimate it may be ſeen, than in the Year 1729, the nett Produce of every Thing ſold in that Kingdom did amount to but little more than one half of the foregoing Sum.

2dly. But if Mr. *King's* Calculations are right, as I am inclined to believe, when I conſider they were made by ſome Gentlemen eminent both for their Capacities and Honour, I muſt conclude ſo great a Difference in ſo ſhort a Space muſt have proceeded from large Quantities of our Woollens, *&c.* being carried into *Portugal*, with the View of introducing them afterwards, through that Channel, into *Spain*; and I cannot otherwiſe account for the Diſparity between two Eſtimates made by different Sets of Gentlemen, equally to be credited and relied on.

It is, however, certain, that our Trade with that Kingdom was in the laſt Century almoſt deſtroyed by the Encouragement given to Manufactures of their own; though indeed the Blow came from hence at firſt; as one *Courteen*, an *Iriſhman*, and a Servant in the then Queen of *England's* Family, afterwards Queen Dowager, carried over in the Year 1681 ſeveral Clothiers and Baiſe-Makers into *Portugal*, who immediately began to exerciſe their Profeſſions, particularly at *Port Alegre* and *Covillhan*, though with various Succeſs, as the latter were ſoon diſmiſſed, on its being found that the Staple of their Wool was too ſhort for the Manufacturing of Baiſe, but the others were continued, and brought the Fabrick of their Cloths to ſuch Perfection, that in *June* or *July* of 1684, among ſome ſumptuary Laws then made, his *Portugueſe* Majeſty prohibited the Importation of any foreign ones, which continued in Force, till by the Treaty of 1703 with that Crown, it was agreed to reſcind the prohibitory Decree, and permit the free Importation of all Woollens, as before the making it; which the ſubſequent Abſtract of the ſaid Treaty will demonſtrate.

ART. I. His ſacred Majeſty of *Portugal* promiſes, both in his own Name, and that of his Succeſſors, to admit for ever hereafter into *Portugal*, the Woollen Cloths, and the Reſt of the Wollen Manufactures of *Britain*, as was accuſtomed till they were prohibited by the Laws; nevertheleſs upon this Condition,

ART. II. That is to ſay, that her ſacred Royal Majeſty of *Great-Britain* ſhall, in her own Name, and that of her Succeſſors, be obliged for ever hereafter, to admit the Wines of the Growth of *Portugal* into *Britain*; ſo that at *no Time*, whether there ſhall be Peace or War between the Kingdoms of *Britain* and *France*, any Thing more ſhall be demanded for theſe Wines by the Name of Cuſtom or Duty, or by whatſoever other Title, directly or indirectly, whether they ſhall be imported into *Great-Britain* in Pipes or Hogſheads, or other Caſks, than what ſhall be demanded for the like Quantity or Meaſure of *French* Wine, deducting or abating a third Part of the Cuſtom or Duty. But if at any Time this Deduction, or Abatement of Cuſtoms, which is to be made as aforeſaid, ſhall in any Manner be attempted and prejudiced, it ſhall be juſt and lawful for his ſacred Royal Majeſty of *Portugal* again to prohibit the Woollen Cloths, and the Reſt of the *Britiſh* Woollen Manufactures.

ART. III. The moſt excellent Lords the Plenipotentiaries promiſe, that their above-named Maſters ſhall ratify this Treaty. (L. S.) *John Methuen.*

In Conſequence of this Treaty, our Woollens have ever ſince been currently admitted into *Portugal*, and we now ſend there, Cloths of all Sorts, Baiſe, Perpets, Stuffs, Hats, Hoſe, *&c.* We ſend likewiſe Iron, wrought Braſs, Lead, Pewter, Shot, ſtained Paper, and other ſtationary Wares, Sail Cloth, Linen, Glaſs, Earthen and Cabinet Wares, Gun-Flints, Toys, Millinery and Turnery Wares, Painter's Colours, Butter and Cheeſe, Gunpowder, Cordage, wrought and mixed Silk, Clock-work and Watches, Garters, Haberdaſhery Ware, all Sorts of Corn and Meal, wrought Plate, Lantern Leaves, Leather, Logwood, Copperas, Apothecaries' Stuffs, Drugs, Glue, Rice, Bees-Wax, *&c.* And our Imports from thence are thoſe mentioned in the laſt quoted Eſtimate.

Great-Britain's *Trade with* Italy, *including under this Denomination* Venice, Naples, *and* Sicily, Genoa, Leghorn, Ancona, *&c.*

THE above-mentioned Cities are of all the maritime ones of *Italy* the moſt conſiderable, that carry on the moſt extenſive Trade, and where the greateſt Number of Ships arrive.

Turin, *Milan*, *Florence*, *Bolognia*, *Modena*, *Reggio*, *Parma*, and *Lucca*, are alſo deeply engaged in Commerce, but as they are ſituated within Land, they are oblige to value on the Aſſiſtance of the maritime ones for carrying it on; and as the Commodities ſent from hence to them are in a Manner alike to all, I have joined them together, and intend to treat on the *Italian* Trade, as if the whole had been one Kingdom and not ſubject to ſeparate Princes.

I have always heard the Trade of *Italy* reckoned at a Million and a half to two Millions Sterling *per Annum*; thoſe that made it moſt, have not exceeded the laſt Sum, and thoſe who have made it leaſt, have never put it under the former, and occaſionally it may be much more, as in the laſt War, and according as their Harveſts prove good or bad.

Our Exports to *Italy* are, all Sorts of Cloths and other Woollens, Hats, Hoſe, Silk, mixed and wrought, horological Works and Watches, Gunpowder, Leather, Pewter, Braſs, Tin, Lead, Shot, Cochineal, Coney Wool, Coals, refined clayed and Muſcovada Sugars, Redwood, Logwood, Brazil Wood, Litharge of Lead, Lantern Leaves, Butter, Cheeſe, Coffee, Bugles, Tobacco, Ginger, Jeſuits-Bark, Indigo, Pepper, Pimento, Rhubarb, Sarſaparilla, and other Drugs, China Ware, Callicoes, and other *India* Goods, Glaſs and Earthen Ware, Pipes, wrought Plate, and, when their Harveſt fails, Corn; Herrings, Salmon, Pilchards, Stockfiſh, Poorjack, *&c.* And in Return, *Venice*, and that State, ſends us Currants, Hemp, Brimſtone, Glaſs Beads of different Sorts and Sizes, many Drugs, ſometimes Rice, Oil, *&c.* *Naples* remits here large Quantities of *Belvidere* and *Lipari* Fruit, Oil, Brimſtone, Manna from *Calabria*, Argol, Eſſences, *&c.* And from *Palermo*, the Capital of *Sicily*, and *Meſſina*, a Place of ſtill greater Trade there, we receive chiefly Silks, Salt, ſome Wine, Argol, Cantharides, Juice of Liquorice, Shumach, Manna, and Hemp. *Genoa* makes Returns principally in Paper, Velvets, Damaſks, Tabbies, and Brocades, though not ſo much of either Species as formerly, Oil, Marble, Roch Allum, Lemons, Eſſences, and Perfumes, Vermicelli, Rice, Coral, Cotton, *&c.* From *Leghorn* we receive Oil of *Gallipoli* and *Florence*, Wine, Soap, Straw Hats, Cotton and Cotton Yarn, Goats Hair, and Skins, Shumach, Brimſtone, Cream of Tartar, Valonia, Marble, Anchovies, Soap, Galls, Juniper Berries, Olives, Coral, and Coral Beads, Verdigris, Argol, Drugs, Silks thrown and raw, *&c.* all which occaſion a Circulation in Trade, well worthy our Attention and Regard, more eſpecially as it leaves a conſiderable Balance in our Favour.

Of the Trade carried on by Great-Britain *with* Turkey *and* Barbary.

THE *Turkey* Trade is carried on by a Company of Merchants, incorporated by Queen *Elizabeth*, under the Title of the *Levant*, or *Turkey* Company, and whoſe Charter was confirmed by her Succeſſor, King *James* I. with the Addition of many new Privileges, and a Form of Polity obſerved ever ſince. This Company is of a very particular Inſtitution, as the Members are not obliged to contribute any Thing to a general Fund, ſo that it may more properly be

termed a ſimple Aſſociation, of which the Partners have nothing in common but their Charter and Government, every one trading on his own Stock, though obliged to ſubmit to the Regulations of the Company, and contribute his Share of the neceſſary Expences about it.

The Troubles of the Kingdom under *Oliver Cromwell* gave Riſe to no ſmall ones in this Company, as many Members were thruſt in, unqualified in the Manner that the Charters of Queen *Elizabeth* and King *James* required; but on the Reſtoration King *Charles* endeavoured to re-eſtabliſh its *quondam* Reputation.

His Charter was dated the 2d of *April*, 1662, and contains, beſides the Confirmation of that granted by King *James*, many new Articles about their Polity, or the Amendment of it.

The Company is eſtabliſhed in a Body politick, capable of making Laws for their Government, with a Seal, under the Name of the *Governor and Company of* Engliſh *Merchants trading to the* Levant *Seas*.

The Number of its Members is not fixed, as every one properly qualified may be admitted, though they are generally about three hundred.

The principal Qualification for Admittance is, being a Merchant, and not a Tradeſman or Retailer, bred either under a Father, or by ſerving a regular Apprenticeſhip to ſome other. Thoſe who deſire to become an Aſſociate, muſt pay the Company twenty-five Pounds Sterling if they are under twenty-five Years of Age, and double that Sum if they are above; and muſt ſwear, on their Admiſſion, to ſend no Goods to *Turkey* but on their own Accounts, and to conſign them only to ſuch as belong to the Company or their Factors.

The Company is governed by itſelf, and determines Affairs by a Plurality of Voices, in which the Merchant trading for 1000*l.* has an equal Vote with him that trades for an hundred Times as much; and for its better Management, there is a Court ſettled in *London*, conſiſting of the Governor, Sub-Governor, and twelve Aſſiſtants, who ought all to live in the City or Suburbs; there is alſo a Deputy-Governor in all the Towns and Ports of *England*, where any Members of the ſaid Company reſide.

It is this Aſſembly at *London* who ſend the Ships, and regulate the Tariff for the Prices, which the *European* Goods carried to *Turkey* are to be ſold at, as well as the Quality of thoſe to be brought back; it alſo raiſes the Taxes on the ſaid Merchandiſes, when the neceſſary Preſents, or other common Expenſes in Regard of this Trade, require it.

It preſents the Ambaſſador to the Throne for Approbation; and alſo nominates the Conſuls of *Smyrna* and *Conſtantinople*, whoſe Penſions the Company pays, therefore never permit either theſe latter, or the former to raiſe any Contributions on Ships or Goods under the Pretext of being to defray the Expenſes of ſome neceſſary Gift or other extraordinary Charges, and by this Means avoid the Diſorders which other Nations not governed by ſuch wholeſome Laws, fall into, to the no ſmall Detriment of their Commerce.

The Company alſo nominate and pay their principal Officers, ſuch as the Miniſter, Secretary, Chancellor, Interpreters, and Janniſaries, and this to the End that they ſhall not raiſe or impoſe any new Sum on the Merchants' Ships, or Goods.

In extraordinary Caſes, the Conſuls, and even the Ambaſſador himſelf, have Recourſe to two Deputies of the Company, who reſide on the Spot; or if the Affair be very important, they aſſemble the whole Nation, who regulate and determine the Preſents that are to be given, the Voyage to be made, and every other Circumſtance neceſſary to be treated of; and in Conformity to the Reſolutions then taken, the Deputies order the Treaſurer to ſupply the Money, Goods, or *European* Curioſities agreed on; and this Treaſurer is eſtabliſhed by the Company, and his Caſh ariſes from the Taxes and Impoſts, which they themſelves have thought proper to lay on Goods to diſcharge the common Expenſes of the Aſſociation.

It is true, however, that the Ambaſſador and Conſuls may act alone on all theſe Occaſions; but beſides its being a tacit Clauſe in the Penſions paid them, to do nothing

nothing without the Deputies' Advice, they chooſe rather to conform to this Rule than otherwiſe, for their own Diſcharge.

The Places reſerved to this Company for their Trade, are the States of the Republick of *Venice*, in its Gulf, thoſe of *Raguſa*, and all the Grand Signor's Dominions; the Ports of the *Levant* and *Mediterranean*, excepting thoſe of *Carthagena*, *Alicant*, *Denia*, *Valencia*, *Barcelona*, *Marſeilles*, *Toulon*, *Genoa*, *Leghorn*, *Civita Vecchia*, *Palermo*, *Meſſina*, *Malta*, *Majorca*, *Minorca*, *Corſica*, and all other Ports and Places of Commerce on the Coaſts of *France*, *Spain*, and *Italy*. And the Fine for thoſe caught in Trade, and not Members in the Company, is 20 *per Cent.* on the Value of the Lading ſo taken.

26 *Geo.* II. By the Act of 26 *Geo.* II. any Subject of *Great-Britain* may be admitted a Member of this Company, on requeſting it of the Governor or Deputy-Governor, within thirty Days after making ſuch Requeſt, and paying twenty Pounds, and taking an Oath to be faithful to his Majeſty and the Company.

This Trade to be carried on in *Britiſh* and Plantation-built Ships only, navigated according to Laws; and the Goods may be conſigned to any Freemen of the Company, their Sons, or Apprentices, being his Majeſty's Chriſtian Subjects.

No Goods or Merchandiſes, coming from the *Levant* without a clean Bill of Health, and liable to retain the Infection of the Plague, ſhall be landed in *Great-Britain* or *Ireland*, or in the Iſles of *Guernſey*, *Jerſey*, *Alderney*, *Sark*, or *Man*, unleſs it ſhall appear to the Satisfaction of his Majeſty, his Heirs, or Succeſſors, or of his or their Privy-Council, that ſuch Goods have been ſufficiently opened and aired in the *Lazarets* of *Malta*, *Ancona*, *Venice*, *Meſſina*, *Leghorn*, *Genoa*, and *Marſeilles*, or one of them.

Great Complaints having been made of the Decay of the *Turkey* Trade during the late War begun in 1756, by the Importation of *French* Cloth into *Turkey*, the following Act paſſed, which was to be in Force no longer than the Continuance of the War:

32 *Geo.* II. The Preamble ſets forth, That the Importation of Woollen broad Cloth of the Manufacture of *France* into any Places within the *Levant* Seas, by *Britiſh* Subjects, is not only a Diſcouragement and Prejudice to the Woollen Manufactures of *Great-Britain*, but is alſo a Means of affording Relief to the Enemy, and thereby enabling them to carry on the War; to prevent ſuch deſtructive Commerce for the future, it is enacted, that no Woollen Goods of the Manufacture of *France* ſhall be carried into any Place in the *Levant* Seas by any Subjects of this Realm.

No Woollen Goods of this Kingdom ſhall be imported within the Limits of the Company's Charter, except directly from this Kingdom by a *Britiſh* Subject, unleſs the Importer ſhall produce to the Ambaſſador, Conſul, or Vice-Conſul, or other proper Officer appointed by the Company at the Place where ſuch Goods ſhall be imported, a Certificate upon Oath from the Exporter or Shipper at the laſt Place of Exportation, that the ſame were brought or received from *Great-Britain*; and in ſuch Certificate ſhall be deſcribed the Name of the Ship and Maſter, and the Time when the Goods were imported into ſuch laſt lading Port from *Great-Britain*; which Certificate ſhall be atteſted by the *Britiſh* Conſul or Perſon acting in his Abſence, reſiding at ſuch laſt lading Port; and the Shipper ſhall alſo produce the Bill of Lading from *Great-Britain*; and the Conſul ſhall take Notice in his Atteſtation of ſuch Bill being produced to him.

The Conſul, *&c.* upon granting ſuch Certificate, is to enter a Duplicate thereof in a Book which is to be ſigned by the Shipper of the Goods, he taking the Oath required before making out ſuch Certificate, which Book is to be received as final Evidence in all Diſputes reſpecting Certificates, and may be examined *gratis*.

Where the Conſul, *&c.* ſhall receive Information upon Oath, ſetting forth good Reaſon to ſuſpect the Authenticity of the Certificate, he is to ſignify the ſame to the Importer, and take Security in double the Value of the Goods, which becomes forfeited if it ſhall appear no ſuch Certificate was granted; ſuch Security to be aſſigned to the Informer for his ſole Benefit.

As often as any ſuch Objection ſhall be made to the Certificate, the Conſul, *&c.* is to tranſmit Notice thereof to the Conſul where ſuch diſputed Certificate ſhall be alledged to have been granted, requiring an Atteſtation under his Hand and Seal, whether ſuch Certificate was granted by him; which Atteſtation the Conſul is to tranſmit by the firſt Opportunity; and upon Receipt thereof is to be laid before the Importer: If the Certificate be thereby verified, the Security ſhall be immediately cancelled; but if not, the Penalty to be levied by Diſtreſs and Sale of Goods, and be applied as before directed.

All Woollen Goods without ſuch Certificate, except imported directly from *England*, ſhall be deemed *French*; and his Majeſty's Ambaſſador, *&c.* is required to confiſcate the ſame.

Every Merchant, *&c.* being a Subject of *Great-Britain*, or reſiding under the Protection of the *Britiſh* Ambaſſador, *&c.* within the Limits of the Company's Charter, ſhall, before the Exportation of any Goods, make Oath before the ſaid Ambaſſador, *&c.* that the ſame were not purchaſed with the Produce of, or taken in Barter for, the Woollen Manufactures of *France*.

Every Perſon who ſhall import into *Great-Britain* any Goods of the Growth or Manufacture of *Turkey*, within the Limits of the Company's Charter, ſhall make the ſame Oath before the Commiſſioners of the Cuſtoms, *&c.* except ſuch Goods as ſhall have been condemned as lawful Prize.

If any Certificate ſhall be loſt, the Maſter of the Veſſel muſt make Oath before the *Engliſh* Conſul, *&c.* of the Purport of ſuch Certificate, of the Loſs of it, and that it hath not been diſpoſed of to any Perſons whatſoever; and the ſaid Maſter, or the Conſignee of the ſaid Goods, is alſo to give Security, in the Penalty of double the Value of the Goods, for procuring a Duplicate of the Certificate: thereupon the Conſul, *&c.* ſhall grant a Licence for importing the Goods.

But prize Goods, condemned, of any Country whatſoever, may be imported, on producing a Copy of the Sentence of Condemnation, ſigned by the Perſon who condemned the ſame.

To prevent Raw Silk, Mohair, Yarn, *&c.* from being imported into this Kingdom, purchaſed by the Woollen Manufactures of *France*, and imported from *Leghorn* and other Places in *Italy*, contrary to the Act of Navigation, *&c.* it is enacted, that if any Raw Silk or Mohair Yarn, or any Ship or Veſſel bringing the ſame into *England*, *Ireland*, *Wales*, the Iſlands of *Guernſey*, or *Jerſey*, or Town of *Berwick* upon *Tweed*, ſhall be ſeized as forfeited by any Acts of Parliament, the Perſon who ſhall make the Seizure may not releaſe or abandon the ſame, or delay to proceed to Judgement for the Condemnation thereof, without firſt acquainting, in Writing, the Governor, Deputy-Governor, Treaſurer, or Huſband of the ſaid Company, or their Secretary, of ſuch his Intention, and delivering at the ſame Time a Copy of the Schedule of ſuch Seizure: And in Caſe the ſaid Governor and Company, or any Committee thereof, ſhall within ſeven Days after give Bond, or offer to give Bond, under the common Seal of their Corporation, in the penal Sum of 1000*l.* with Condition for indemnifying ſuch Officer, *&c.* againſt all Coſts and Charges, in Caſe ſuch Ship or Goods ſhall not be adjudged forfeited; then ſuch Officer, *&c.* ſhall not voluntarily abandon ſuch Seizure without the Conſent of the ſaid Company or ſome Committee thereof; but ſhall proceed to Judgement concerning the Legality thereof.

Any Member of the Company ſhall be admitted to give Evidence, either for the Plaintiff, Relator, or Defendant upon the Trial.

The Commerce of this Company is undoubtedly a very beneficial one to this Nation; as may be ſeen by the following curious Calculation taken from the *Britiſh Merchant*, and there quoted with a View to inſtruct the Reader in the whole Proceſs of the Cloth Manufacture, from its Commencement to its Conſumption; and to ſhow the Advantages ariſing from the *Turkey* Trade, by its taking off ſo large a Share of our Woollens, and thereby contributing proportionably to the Subſiſtence of our People.

	l.	*s.*	*d.*
A Clothier buys at Market fifty Packs of Wool, picked and ſorted, at 10*l.* *per* Pack.	500	0	0
With which Wool he makes 100 broad Cloths, and the Manufacture thereof in Carding, Spinning, Weaving, Milking, Dreſſing, *&c.* as they are uſually brought to, and ſold white at *Blackwell-Hall*, will amount to about the firſt Coſt of the Wool	500	0	0
So that theſe 100 Cloths are ſold by the Clothier to the Merchant at 10*l.* *per* Cloth	1000	0	0
And the Merchant pays for the Dying of the ſaid 100 Cloths, *viz.* one third Part in Grain Colours, at 7*l.* and two thirds in ordinary Colours, at 30*s.* *per* Cloth	333	6	8
Alſo for Setting, Drawing, Preſſing, Packing, *&c.* 15*s.* *per* Cloth	75	0	0
The ſaid 100 Cloths will coſt the Merchant 14*l.* 1*s.* 8*d.* *per* Cloth on board, which amounts to	1408	6	8
And to repay him their Coſts and Charges here and abroad, with a bare Allowance for Inſurance, and the Intereſt of his Money, they cannot purchaſe leſs, I ſhould think, than twenty-two great Pounds of *Sherbaffee*, or *Perſia* fine raw Silk, for every Cloth. Thus he probably receives for the ſaid 100 Cloths, 2200 Pounds wt. of the ſaid raw Silk.			
Now, if the half Part of this Silk is wrought up in plain coloured Tabbies, the Manufacturers will receive 13*s.* 7*d.* *per lb.*	747	1	8
And if the other half Part is wrought up into rich flowered Silks brocaded, the Manufacturers will receive 1*l.* 19*s.* 9*d.* *per lb.*	2186	5	0
And the additional Charge of Dying, ſuppoſe but of $\frac{1}{8}$ Part of the ſaid Silk, into Grain Colours at 9*s.* *per lb.*	123	15	0
Then the Coſts and Charges of 100 Woollen Cloths; ſhipped from *London* to *Turkey*, and the Manufacture of the raw Silk brought from thence, in Return thereof, muſt amount to	4465	8	4
The Freight of the ſaid 100 Cloths, and of the ſaid 2200*lb.* of raw Silk is computed at	40	12	6
Her Majeſty's Cuſtoms on the ſaid 2200*lb.* of raw Silk is	156	15	0
Engliſh Factors' Commiſſions abroad on the Sale of the Cloth, and on inveſting the Returns in Silk, aforeſaid, computed at	100	0	0
It is hereby repreſented to the View of every Reader, that every 2200*lb.* wt. of raw Silk imported from *Turkey*, and manufactured here for our Conſumption, without paying any Thing to the Merchants' or Mercers' Gain, pays to the Landholders, the Labourers, and the Crown, the Sum of	4762	15	10

If any Thing is to be added for the Mercers' or Merchants' Gain, and we may depend upon it they will not be at the Trouble of driving their Trades for nothing, we may very well affirm, that the whole Coſt of this Manufacture for Conſumption cannot be leſs than the Sum of 5000*l.* So that 2200 Pound Weight of *Turkey* raw Silk manufactured here, pays the Sum of 5000*l.* to the Subſiſtence of our own People.

This Account takes the Returns upon 100 Cloths exported to *Turkey*, and makes them pay 5000*l.* to the Subſiſtence of our People. But we have exported annually two hundred Times as many Cloths for *Turkey*, and receive for about half that Quantity of Cloth, the ſame Kind of Returns in raw Silk for our own Conſumption; and conſequently our own Conſumption of *Turkey* Silk, paid for the Subſiſtence of our own People the Sum of 500,000*l.* *per Annum*, beſides what is paid by the other half of that Trade; but if the Conſumption of 5000*l.* Value of *Turkey* Silk manufactured pays 500*l.* to the landed Intereſt for the Wool that is exported to *Turkey* in Manufacture, then the annual Conſumption of 500,000*l.* Value of that Silk muſt pay 50,000*l.* *per Annum* to the landed Intereſt.

And yet this is not all that the landed Intereſt receives annually by Means of this half Part of the *Turkey* Trade; the Crown and the Subjects, who receive nine

Times

Times as much for Cuſtoms and Labour, pay perhaps a ninth Part what they receive to the landed Intereſt for Clothes and Proviſion; by which Means the Conſumption of *Turkey* Silk, manufactured in *England* either directly or indirectly, pays a fifth Part of its whole Value to the landed Intereſt, that is, it pays directly one tenth Part of the Value of the Silk by the Woollen Manufacture exported, and as much more by enabling the People to purchaſe neceſſary Clothes and Proviſions, of which much more than a tenth Part is paid to the landed Intereſt.

It will be objected here, that the 10*l.* above-mentioned upon a Pack of Wool, is not paid to the landed Intereſt, ſince a Part of it is paid to the Shepherd's Wages, and a Part to the Labour of Picking and Sorting this Wool: It is very true; but then conſidering how much of the Product of the Land is exported to purchaſe Dying Goods, the tenth Part of the Price of the whole Silk Manufacture may be well ſaid to be paid for the Product of the landed Intereſt.

It is therefore evident, that of every 5000*l.* Value of Manufacture from *Turkey* Silk, 500*l.* is paid for the Manufacturing of the *Engliſh* Wool that is ſent abroad, 333*l.* 6*s.* 8*d.* to the charge and labour of Dying 75*l.* to other Labour beſtowed on that Manufacture, 747*l.* 1*s.* 8*d.* for manufacturing one Half of our Returns, and 2186*l.* 5*s.* of the other, beſides 123*l.* 15*s.* for dying the ſame in Grain Colours; add to this the Freight of 40*l.* 12*s.* 6*d.* beſides the Charges to Factors abroad, and Merchants and Mercers at home, and it will appear that near 4000 of every 5000*l.* Value, or that near 400,000 of every 500,000*l.* Value of *Turkey* Silk wrought in *England*, is paid to the Labour of the People beſtowed upon it; and I think this enough to ſhow, that ſuch a Trade ought to be carefully preſerved, and that it claims a Share in the Regard of every Gentleman in *England*.

This Calculation, though made only on one Particular of the *Levant* Company's Exports, may be adapted to any other Branch of it, or indeed to any other Trade where the Returns are improved to the Increaſe of our Manufactures, and Employ of our People.

Our Exports for *Turkey* are Cloths, Serges, and other Woollens, Tin, Lead, Pepper, Cochineal, Indigo, Iron and Glaſs Ware, Leather, Sugar, *&c.* which I have here computed at near half a Million yearly; and though Mr. *Savary* in his Time complains that the *French*, by their ill Management in their Dying and Manufacturing their Cloths, had loſt the greateſt Part of the conſiderable Trade they before had in thoſe Parts, which he ſays the *Engliſh* had ſecured, yet Mr. *King* takes Notice many Years after, that from a trifling Commerce the *French* carried on, they in the Year 1713 at laſt equalled us, and I fear have once more ſurpaſſed us in the *Levant* Traffick; ſo that I cannot imagine our *Turkey* Company do now export near the Value above mentioned.

The Returns we have from thence, are raw Silk, Grogam Yarn, Cotton and Cotton Yarn, Wool, Goats Hair, Coffee, Dying Goods, Drugs, Gall, *&c.*

Of Great-Britain's *Trade to* Africa.

THIS Trade, like the preceding, has for many Years paſt been carried on by a Company with an excluſive Charter, granted at firſt by K. *Charles* II. the 18th of December 1661, in Favour of his Brother *James*, then Duke of *York* and *Albany*, for the Term of a thouſand Years, with full Power to trade all over the weſtern Coaſt of *Africk*, from the Port of *Sallee* in South *Barbary*, to the Cape of *Good-Hope*; but theſe Letters Patent were afterwards revoked by his Majeſty, with the Duke's Conſent, and regranted in 1663, by a freſh Charter, which, in Conſideration of the many illuſtrious Perſons engaged in it, had ſeveral new Privileges added, and divers Regulations made, beſides thoſe before eſtabliſhed for its Government.

Its principal Aſſociates were Queen *Catharine* of *Portugal*, then his Majeſty's Conſort, Queen *Mary* of *France*, his Mother, the afore-mentioned Duke of *York*, *Henrietta Maria*, Ducheſs of *Orleans*, his Siſter, Prince *Rupert*, and moſt of the prime Nobility of *England*; the Reſt of the concerned, charged with the Direction of

of the Company's affairs, were choſen from among the principal Merchants of *London*, more eſpecially thoſe who had carried on that Trade which the Company were now put in Poſſeſſion of. And that a proper Title might be given to this illuſtrious Aſſociation, correſpondent to the Dignity of its Conſtituents, it was called the *Royal African Company*; and the following Privileges were granted it, and compoſed its Charter.

I. That *It* ſhould be erected into a Body Politick, both in Name and Effect, and in this Quality ſhould be capable in Law, to have, get, acquire, ſollicit, receive, poſſeſs, and enjoy, all Manors, Lands, Hereditaments, Rents, Liberties, Privileges, *&c.* which any other of his *Britannic* Majeſty's Subjects might till then poſſeſs and enjoy.

II. That *It* ſhould have a common Seal, of which the Impreſſion on one Side ſhould be an Eſcutcheon bearing an Elephant, with two Negroes for Supporters, and on the other Side, his Majeſty's Portrait.

III. For *Its* Government there ſhall yearly be choſen, by a Plurality of the Perſons named in the Charter, and other Adventurers intereſted in the Company, a Governor, Deputy, and Sub-Governor, with twenty-four or thirty-ſix Aſſiſtants, at their Election, or as they ſhall think proper.

IV. That the Governor and his Deputy, with ſeven of the twenty-four, or thirteen of the thirty-ſix Aſſiſtants, are authoriſed to take on them the Care and Management of the Company's Affairs, whether for buying or ſelling the Goods and Merchandiſe proper to be ſent to *Africk*, or that ſhall come from thence; or in fitting out Ships, making Settlements, and chooſing Factors neceſſary for the well-governing their Trade.

V. The Governor, Sub-Governor, and Aſſiſtants, when elected, ſhall take the Oaths, before the then Lord Chancellor, Keeper of the Seals, or Lord Treaſurer, except the Governor be of the Royal Family, in which Caſe he ſhall be exempt from the ſaid Oath.

VI. It ſhall be permitted to the ſaid Governor and Aſſiſtants, to hold Courts and Meetings whenever they think proper, and a competent Number being ſo aſſembled, may make, ordain, conſtitute, and eſtabliſh Laws, Ordinances, and Regulations, for the Government of their Company; and after making, to revoke and diſannul them, in Order to form others more convenient; and to impoſe and inflict Penalties on the Violators of them, either by Fines or Impriſonment, provided that the Laws and Penalties are juſt, and agreeable to the Laws of *England*.

VII. The Partners and Adventurers may grant and transfer all or any Part of the Stock which they ſhall have in the Company, to whomſoever they pleaſe, provided the ſaid Ceſſions and Transfers be made in full Court, and regiſtered.

VIII. That the Company may put to Sea, ſuch and as many Ships as they ſhall judge convenient for their Trade, and furniſh them with Artillery, Ammunition, and other warlike Stores for their Defence.

IX. That the Company ſhall have the Poſſeſſion and Property of all the Gold and Silver Mines that are, or ſhall be found, in all the Extent of their Grant; and that *It* only ſhall deal there, excluſive of all other *Engliſh* Traders, in all Merchandize, the Growth of the ſaid Countries, as well as in the Traffick of the Negroes.

That it may equip ſuch, and as many Veſſels as it pleaſes, to ſend on Diſcoveries; more particularly of thoſe Places that are hereby granted, and to make the neceſſary Settlements.

XI. That the ſaid Company ſhall, nevertheleſs, pay all the Cuſtoms, Subſidies, and Impoſts, that are due and payable, as well on the Exports of Goods and Merchandiſe ſent to *Africk*, as on thoſe that ſhall be imported from thence.

XII. That only the Company's Ships, or thoſe to whom the Governor and Aſſiſtants ſhall give Permiſſion in Writing, may trade in *Africk* within the Limits before preſcribed, or bring any of thoſe Merchandiſes to *England*, under Penalty of Seizure and Confiſcation of the ſaid Ships and Goods, *&c.*

XIII. That the Factors, Maſters of Ships, Sailors, and Members of the ſaid Company, may not trade ſecretly, or otherwiſe, for their own Account, in any

of the ſaid Parts; nor import into *England* any Merchandizes, on the ſame Penalties of Seizure and Confiſcation as above.

XIV. His *Britannic* Majeſty reſerves to himſelf and Succeſſors, a Liberty of coming in, at any Time when he ſhall think proper, as Sharer in the Company's Adventures, upon joining and bringing in a proportionable Fund to that already made by the other Partners; in which Caſe they ſhall be admitted to have a Part in the Profits and Loſſes that it ſhall acquire or ſuffer, in Proportion to the Sums that they ſhall have brought in.

XV. The Company, or its Governors and Aſſiſtants, may nominate Captains and Governors, to command in the Colonies that ſhall be eſtabliſhed in the Extent of *Its* Grant; to which Governors and Captains, his Majeſty grants Power to command the military Forces that ſhall be there; to muſter them, and to do and execute all that is permitted by the Laws of Arms; either without, for the Defence of the ſaid Colonies againſt any foreign Invaſion, or within, to appeaſe any domeſtick Troubles and Seditions.

XVI. That to explain what has been ſaid in the IXth Article concerning the Gold Mines, his Majeſty reſerves to himſelf, his Heirs, and Succeſſors, two Thirds of the ſaid Mines, on ſupplying two Thirds of all the Charges that ſhall occur, for the Working and Tranſporting of the ſaid Gold; the other Third remaining in Property to the Company, on contributing likewiſe *Its* one Third to the Expences.

XVII. The Company ſhall have the Enjoyment of all the Privileges of the City of *London*, as full as any other Company of Merchants, eſtabliſhed by Letters Patent of his *Britannic* Majeſty, or his Predeceſſors, may or can enjoy.

XVIII. In fine, his Majeſty ordains, as well for himſelf as for his Heirs and Succeſſors, that all Admirals, Vice-Admirals, Generals, Commandants, Captains, Juſtices of the Peace, Comptrollers, Collectors, Searchers, and all other Officers and Miniſters whatſoever, that they be aiding and aſſiſting to the Adventurers in the *Royal African Company*, their Factors and Agents, whenſoever they ſhall be required; his ſaid Majeſty intending, that all contained in the preſent Charter and Letters Patent ſhall have its full Effect, and that whatſoever may have been omitted, or leſs clearly explained than his Majeſty intended, ſhall be ſupplied or interpreted in Favour of the ſaid Company.

This Charter of *Charles* II. of 1663, was afterwards confirmed by new Letters Patent of the ſame King, under the date of 27th of *September*, 1673; which were followed two Years afterwards by a Proclamation, in which his Majeſty orders the Execution of the Article by which was granted to the Company an excluſive Privilege, upon all the Coaſts of *Africk*, prohibiting all his Subjects, that were not Members of it, to trade there.

In fine, neither the Letters Patent, nor the Proclamation, having been ſufficient to hinder the Interlopers from diſturbing the Company's Trade, *It* had Recourſe to the Protection of *James* II. whom *It* had the Honour to ſee twice among the Number of *Its* Aſſociates; from whom *It* obtained, in the firſt Year of his Reign, a new and more ſevere Proclamation, to exclude all the *Engliſh* who were not Members of the Company, or that ſhould not have obtained *Its* Permiſſion, from all Trade on the Coaſts of *Africk*; which laſt Proclamation was on the 1ſt of *April*, 1685.

In conſequence of theſe Grants, the Company commenced, and carried on a conſiderable Trade; but the vaſt Charges they were at, in building and ſupporting their Fortifications, and their great Expence in maintaining and ſalarying their Factors and Troops, the frequent Embroils and Altercations they have had with different Nations about their Commerce, and Knavery of ſome, and Miſmanagement of others of their Dependents, obliged them frequently to ſollicit a national Aſſiſtance, and, being greatly in Debt, at laſt to petition Parliament for Relief, who having taken the State of their Caſe into Conſideration, determined on making a new Company, *for extending and improving the Trade to* Africa; which they did by the following Act:

23 *Geo.* II. P. 547. The Preamble ſets forth, That the Trade to and from *Africa*, being very advantageous to *Great-Britain*, and neceſſary for the ſupplying the Plantations, and Colonies belonging thereto, with a ſufficient Number of Negroes, at reaſonable Rates, ought for that Purpoſe to be free and open to all his Majeſty's Subjects: *It is therefore enacted*, That it ſhall be lawful for all the King's Subjects to trade to and from any Place in *Africa*, between the Port of *Sallee* in *South Barbary*, and the Cape of *Good-Hope*, without any Reſtraint whatſoever, ſave as herein after expreſſed.

P. 548. All his Majeſty's Subjects who ſhall trade to and from *Africa*, between Cape *Blanco* and the Cape of *Good-Hope*, ſhall for ever hereafter be deemed a Body Corporate and Politick, in Name and in Deed, by the Name of *The Company of Merchants trading to* Africa, and by the ſame Name ſhall have perpetual Succeſſion, and a common Seal; and may ſue and be ſued, and do any other Act, which any Body Corporate or Politick, as ſuch, may lawfully do.

All the *Britiſh* Forts, Settlements, and Factories, on the Coaſt of *Africa*, beginning at Cape *Blanco*, and extending from thence to the Cape of *Good-Hope*, incluſive, and all other the Regions, Ports, *&c.* comprehending within the ſaid Limits, which are now claimed by, or in the Poſſeſſion of, *the Royal* African *Company of* England, or which may hereafter be in the Poſſeſſion of the Company hereby eſtabliſhed, ſhall, from the paſſing of an Act for diveſting the *African* Company of their Charter, Forts, and all other their Property on the Coaſt of *Africa*, their Goods and Merchandize only excepted, be abſolutely veſted in the new Company eſtabliſhed by this Act, and their Succeſſors, to the Intent that the ſaid Forts, Settlements, and Premiſes, ſhall be employed only for the Protection, Encouragement, and Defence of the ſaid Trade.

The Company eſtabliſhed by this Act ſhall not trade to or from *Africa*, in their corporate or joint Capacity; nor ſhall they have any joint or transferable Stock; nor ſhall they borrow Money on their common Seal.

P. 549. The Direction and Management of the Affairs of the new Company ſhall be by a Committee of nine Perſons to be choſen annually; who are to meet as often as ſhall be neceſſary, at ſome Place in the City of *London*; and the ſaid Committee, or any five of them, or the Majority of them aſſembled, ſhall, from and after the paſſing ſuch Act for diveſting the *African* Company of their Charter, *&c.* or before, ſo far as the *African* Company ſhall conſent thereto, have full Power to make Orders for the governing and improving the Forts and Factories which are or ſhall be built within the Limits aforeſaid, and to appoint Governors, Deputy-Governors, or any other Officers civil or military, and to remove or diſplace them when they ſhall ſee fit; and to make Orders and Regulations for the better Government of the ſaid Officers and Servants abroad, and to take Security for their good Behaviour, and Obedience to the Regulations eſtabliſhed by this Act, and to ſuch as the Committee ſhall from Time to Time make; ſo as no Orders or Regulations made by the Committee ſhall lay any Reſtraint whatſoever on the Trade or Traders, contrary to the Intent of this Act.

The Traders, or Perſons intending to trade, to or from *Africa*, who ſhall, on or before the 30th of *June* 1750, have paid into the Hands of the Chamberlain of the City of *London*, 40*s.* each for their Admittance into the Freedom of the ſaid Company, are empowered to meet on the 30th of *July* 1750, in the *Guild-hall* of the ſaid City, and chooſe three Perſons: And ſuch as ſhall, on or before the ſaid 30th of *June* have paid into the Hands of the Clerk of the Merchants' Hall

P. 550. in the City of *Briſtol*, the like Sum of 40*s.* are empowered to meet on the 10th of *July*, in ſome convenient Place in the City of *Briſtol*, and chooſe three other Perſons; and ſuch as ſhall, on or before the ſaid 30th of *June*, have paid into the Hands of the Town Clerk of *Liverpool*, the like Sum of 40*s.* are empowered to meet on the ſaid 10th of *July*, in the Town-Hall of *Liverpool*, and chuſe three other Perſons; and the nine Perſons ſo choſen ſhall be the firſt annual Committee, and ſhall continue in their Office for one Year, and until others ſhall be choſen in their Room.

In all future Elections, the Committee ſhall be nominated on the 3d of *July* in every Year, in Manner following, *viz.* three ſhall be nominated by the Freemen of

the ſaid Company admitted in *London*, who ſhall aſſemble for that Purpoſe at *London*; three by the Freemen admitted into the ſaid Company at *Briſtol*, who ſhall aſſemble for that Purpoſe at *Briſtol*; and three by the Freemen of the ſaid Company admitted in *Liverpool*, who ſhall aſſemble for that Purpoſe at *Liverpool*.

The Freemen of the ſaid Company in any of the ſaid Cities and Towns, reſpectively, may chooſe other Committee-men in the Place of thoſe that ſhall happen to die, be removed, or refuſe to act; and ten Days previous Notice ſhall be inſerted in the *London Gazette* by the Committee, of the Time and Place where ſuch Election is to be had. 23 *Geo.* II. P. 551.

If at the Time appointed for the Elections of Committee-men, the Freemen in any of the ſaid Cities or Towns ſhall neglect to proceed to ſuch Choice, ſuch as ſhall be choſen in the other of the ſaid Cities or Towns, though leſs in Number than nine, may act as the Committee until the next annual Election; and all Elections ſhall be determined by the Majority of the Votes preſent; and where the 3d of *July* ſhall fall on a *Sunday*, the annual Election of Committee-Men ſhall be on *Monday* the 4th of *July*.

In Caſe of an Equality of Votes at any Election, the Lord-Mayor of *London*, the Mayor of *Briſtol*, and the Mayor of *Liverpool*, reſpectively, ſhall determine which of ſuch Perſons ſhall be the Committee-Man.

The Committee ſhall meet for the firſt Time on the firſt *Monday* in *Auguſt*, 1750, and ſhall then ſettle the Manner of their future Meetings, and of the Notices and Summonſes to be ſent for that Purpoſe to the Members of the Committee; and no Order or Reſolution of the Committee, to which all the Members preſent at the making thereof ſhall not be conſenting, ſhall be binding, unleſs confirmed at a ſubſequent Meeting, at which all the Members of the Committee ſhall be preſent, or of which the Abſentees ſhall have had the uſual Notice. P. 552

At every Meeting, when the Time prefixed for entering on Buſineſs is come, and ſo many as are neceſſary to make a Committee are preſent; before they enter upon Buſineſs, a Chairman ſhall be choſen by Lot, out of the Committee-Men then preſent who ſhall take the Chair for that Meeting; but he ſhall not vote that Day on any Queſtion, unleſs the Votes are equal, in which Caſe he may vote; and every Committee-Man, who ſhall not be preſent at the Choice of the Chairman, ſhall not vote on any Queſtion before the Committee that Day; but he may be preſent, and give his Opinion in all Matters as any other Committee-Man may do; and all Matters which ſhall be decided by a Plurality of the Votes of ſuch of the Committee-Men as ſhall be entitled to vote, ſhall be deemed to be decided by a Majority of the Committee then preſent.

Such of his Majeſty's Subjects as ſhall, on or before the 30th of *June* 1750, pay to the Chamberlain of *London*, the Clerk of the Merchants' Hall in *Briſtol*, or th Town-Clerk of *Liverpool*, 40*s* each for their Freedom, ſhall be the firſt Members of the ſaid new Company: And from and after the ſaid 30th of *June*, any other of his Majeſty's Subjects who ſhall trade to or from *Africa*, ſhall be admitted Freemen of the ſaid Company at *London*, *Briſtol*, or *Liverpool* upon Payment of 40*s*. each, to ſuch Perſons as the Committee ſhall appoint to receive the ſame.

No Perſons admitted Freemen after the ſaid 30th of *June*, ſhall vote at the Election of Committee-Men until one Year after their Admiſſion. P. 553.

The Chamberlain of *London*, the Clerk of the Merchants' Hall in *Briſtol*, the Town-Clerk of *Liverpool*, and ſuch other Perſons as the Committee ſhall appoint to receive the ſaid Sums of 40*s*. for the Admiſſion of Perſons into the Freedom of the Company, ſhall ſign and deliver to every ſuch Perſon a Certificate of Payment thereof, for which they ſhall be paid 2*s*. 6*d*. as a Fee, and no more, and the Names and Places of Abode of every ſuch Perſon ſhall be entered in a Book to be kept for that Purpoſe by the Receivers.

The Chamberlain of *London*, the Clerk of the Merchants' Hall at *Briſtol*, and the Town Clerk of *Liverpool*, ſhall pay and deliver over the ſaid ſeveral Sums of 40*s*. received by them, and the Books, in which the Names and Places of Abode of the Perſons making Payment thereof are entered, to ſuch Perſons as the Committee ſhall appoint to receive the ſame.

The Perſons who ſhall be appointed by the Committee at *London*, *Briſtol*, and *Liverpool*, to receive the ſaid Sums of 40*s*. ſhall annually, or oftener if required, P. 554.

pay

pay and deliver over the ſame, together with the Liſts of the Names, and Places of Abode of the Perſons from whom received, to the Committee, as they ſhall direct.

An exact Liſt ſhall be kept at the Office of the Committee in *London*, of the Names and Places of Abode of all Perſons admitted into the Freedom of the ſaid Company, diſtinguiſhing where each Perſon was admitted; which Liſt ſhall yearly, ten Days at leaſt before the annual Election, be printed and delivered *gratis* to the Members who ſhall deſire the ſame.

No Perſon ſhall be capable of being choſen, or acting as a Committee-Man, above three Years ſucceſſively; and two or more Perſons, who ſhall be in Copartnerſhip in Trade, ſhall not be choſen, during the ſame Time or Year: And none of the ſaid nine Perſons, during the Time they ſhall be of the Committee, ſhall directly or indirectly trade jointly or in Copartnerſhip to *Africa*, or lade any Goods or Merchandizes on board the ſame Ship in which any one of the Committee ſhall, for that Voyage, have before laden Goods, to be carried to any Place in *Africa*.

The Committee may from Time to Time inveſt ſuch Part of the ſaid Money in their Hands, as they ſhall judge neceſſary, in the Purchaſe of Goods and Stores; which, after the ſame are inſured, ſhall be exported to *Africa*, and there ſold, and applied for the ſole Uſe, Preſervation, and Improvement of the Forts and Settlements, and for the Payment of the Wages and Salaries to the Officers and other Perſons employed there; but the Committee ſhall not export from *Africa* any Negroes or other Goods in Return, or in any other Manner carry on a Trade to or from *Africa*. And an Account of the Committee's Receipts and Payments ſhall be kept in a Book which ſhall be open at their Office in *London*, to be peruſed *gratis* at all ſeaſonable Times, by any Members of the Company.

23 *Geo.* II. P. 555.

The Commiſſioners for Trade and Plantations may remove any of the Committee-Men, or Officers, or Servants appointed by them, who ſhall be guilty of any Miſbehaviour, contrary to this Act; giving Notice of ſuch Removal, and ſpecifying the Cauſes thereof to the Committee; and when a Committee-Man ſhall be ſo removed, the Committee ſhall give Notice forthwith to the Mayor of the City or Town by whom the ſaid Perſon was choſen, to elect another in his Room; and if any Officer or Servant ſhall be removed, the Committee may appoint another in his Stead.

Whenever the Committee-Man ſhall be charged with Miſbehaviour in his Employment, the Commiſſioners for Trade and Plantations ſhall ſummon him to appear before them; and upon his Attendance, or Default, examine into the Truth of the Charge, before they ſhall remove him from his Employment.

P. 556. The Committee ſhall render an Account of all their Tranſactions once a Year to the Commiſſioners for Trade and Plantations, or oftener if required; in which ſhall be contained an Account of all the Monies received and diſburſed by them, or by their Order; and alſo all the Orders and Inſtructions given, as well to their Officers and Servants in *Great-Britain*, as on the Coaſts of *Africa*; and all their Anſwers thereto; and all other the Tranſactions of the Committee.

The Committee, out of the Monies they ſhall receive, may deduct annually a Sum not exceeding 800*l.* for defraying, in the firſt Place, the Salaries of their Clerks and Agents, at *London*, *Briſtol*, and *Liverpool*, the Houſe-Rent of their Office in *London*, and all other Charges of Management, Commiſſion, or Agency, in *England*; and the Reſidue of the ſaid Sum ſhall be divided amongſt themſelves, as they ſhall think proper, as a Compenſation for their Trouble and Attendance; and the Reſt of the Monies ſhall be applied wholly to the Maintenance and Improvement of the Forts and Settlements on the Coaſt of *Africa*, which ſhall be in the Poſſeſſion of the ſaid Company, and for providing Ammunition and Stores, and Officers and Soldiers to defend the ſame.

The Committee ſhall, within one Month after the Expiration of the Year for which they ſhall be choſen Committee-Men, lay before the Curſitor Baron of the *Exchequer*, an Account upon Oath of the Money received by them during the preceding Year, and of the Application thereof; and the Curſitor Baron, within one Month after, ſhall audit and paſs the ſame; and he may examine any of the ſaid

Committee, and ſuch other Perſons as he ſhall judge neceſſary upon Oath, touching any of the Articles or Particulars therein; and the Account ſo audited and paſſed ſhall be a full Diſcharge to the ſaid Committee, without their being compelled to render any other; and the Committee ſhall lay before the Parliament every Seſſion a Copy of the ſaid annual Account, and of all the Orders and Regulations made by them in the preceding Year relating to the ſaid Forts and Settlements, or the Government of their Officers or Servants employed therein; and Copies of the ſame ſhall be annually laid before a general Meeting of the Members of the ſaid Company, to beheld in *London*, *Briſtol*, and *Liverpool*, of which fourteen Days Notice ſhall be previouſly given in the *London Gazette*. 23. *Geo.* II. P. 557.

No Officer or other Perſon employed by the Committee at any of their Forts or Settlements, ſhall in any Manner, or on any Pretence, obſtruct any of his Majeſty's Subjects in Trading; and the Forts, Warehouſes, and Buildings, which are or ſhall be erected by the ſaid Company, ſhall at all Times be free and open to all his Majeſty's Subjects, to be uſed as Warehouſes for depoſiting Gunpowder, Gold, Elephants' Teeth, Wax, Gums, and Drugs, and no other Goods.

The ſaid Forts, Warehouſes, and Buildings, ſhall, in Caſe of Neceſſity or Danger, be free and open to all his Majeſty's Subjects, for the Safety of their Perſons, and Security of all their Effects.

Any of his Majeſty's Subjects trading to *Africa*, for the Security of their Goods or Slaves, may erect Houſes and Warehouſes under the Protection of the ſaid Forts, or elſewhere, in any other Part of *Africa* within the Limits aforeſaid; and the ſame ſhall be their Property, and not be diſpoſed of, or let, to any Foreigner whatſoever.

If the Commander or Maſter of any Veſſel trading to *Africa*, ſhall, by any indirect Practice whatſoever, take on board or carry away from the Coaſt of *Africa* any Negro or Native of the Country, or ſhall commit, or ſuffer any Violence to be committed on the Natives, to the Prejudice of the ſaid Trade, he ſhall forfeit 100*l.* one Moiety thereof to go to the Uſe of the Company towards maintaining the ſaid Forts and Settlements, and the other to the Proſecutor. P. 558.

The Lords of the Admiralty ſhall give Inſtructions to the Captains of ſuch of his Majeſty's Ships of War as ſhall be ſtationed, or ordered to cruize within the Limits aforeſaid, from Time to Time to inſpect and report to them the State and Condition of the ſaid Forts and Settlements; and the Officers of ſuch Forts are required to permit ſuch Inſpection; and Copies of all the ſaid Reports ſhall be laid before the Parliament every Seſſion.

Such Commiſſion Officers of his Majeſty's Navy as the Lords of the Admiralty ſhall appoint for that Purpoſe, ſhall inſpect and examine the State and Condition of the Forts and Settlements on the Coaſt of *Africa* in the Poſſeſſion of the Royal *African* Company, and of the Number of Soldiers therein; and alſo the State and Condition of the military Stores, Caſtles, Slaves, Canoes, and other Veſſels and Things belonging to the ſaid Company, and neceſſary for the Uſe and Defence of the ſaid Forts and Settlements, and ſhall, with all poſſible Diſpatch, report how they find the ſame to the Lords of the Admiralty; and the ſaid Company, their Officers and Servants, are required to permit ſuch Inſpection and Examination, and to aſſiſt therein; and a Copy of the ſaid Report ſhall be laid before Parliament at the Beginning of the next Seſſion.

The Accomptant-General of the Court of *Chancery*, and ſuch two of the other Maſters of the ſaid Court as the Lord Chancellor, or Lord Keeper of the Great-Seal, ſhall nominate for that Purpoſe, ſhall be Commiſſioners for examining into the Claims of the Creditors of the Royal *African* Company; and the ſaid Commiſſioners, or two of them, are impowered, according to their Diſcretion, by Examination of the Parties intereſted, or the Teſtimony of Witneſſes upon Oath, or by the Inſpection and Examination of the Books, Deeds, Writings, and Accounts of the ſaid Company and their Creditors, to examine into the ſaid Claims, and enquire and ſtate when the ſame were reſpectively incurred, and for what Conſideration they were originally contracted; and upon what Conſideration the Claimants became intitled thereto, together with their Opinion of the Juſtneſs and Reaſonableneſs of ſuch Debts; and for that Purpoſe the Creditors are to deliver P. 559.

unto ſuch Officers and at ſuch Place within the City of *London* as the ſaid Commiſſioners, or two of them, ſhall appoint, of which Notice ſhall be given in the *London Gazette*, an Account of their reſpective Claims, with a Copy of their Securities for the ſame; and ſuch of the ſaid Creditors as reſide in *Great-Britain* or *Ireland*, ſhall make their Claims on or before the 30th of *Auguſt* 1750, and ſuch as are reſident on the Coaſt of *Africa*, or elſewhere beyond the Seas, ſhall make their Claims on or before the 30th of *December* 1750, and the Directors and Officers of the ſaid Company, and all other Perſons whom the Commiſſioners ſhall think fit to examine touching the ſaid Matters, are required to attend the Commiſſioners at the Times and Places they ſhall appoint, and to give the beſt Information they can touching the ſaid Claims; and to produce all Books and Papers in their Cuſtody or Power relating thereto; and the Commiſſioners, or two of them, are authoriſed to adminiſter an Oath for the better Diſcovery of the Truth of the ſaid Facts; and they are to cloſe their Examinations of all the
23 *Geo.* II. P. 560. Claims that ſhall be made by ſuch of the Creditors who reſide in *Great-Britain*, or *Ireland*, on or before the 31ſt of *January*, 1750; and of ſuch as reſide in *Africa* or other Parts beyond the Seas, on or before the 28th of *February*, 1750; and are to lay the Accounts of their Proceedings before the Parliament with all convenient Speed. If any Perſon ſummoned ſhall neglect or refuſe to appear and be examined touching the Matters and Things by this Act directed to be enquired into, or ſhall refuſe to anſwer, or ſhall not fully anſwer to the Satisfaction of the Commiſſioners all Queſtions put to them, as well by Word of Mouth as by Interrogatories in Writing, or ſhall refuſe or neglect to produce all Books of Accounts and Papers in their Cuſtody or Power relating to the Premiſes, any two of the Commiſſioners may commit ſuch Perſon to ſuch Priſon as they ſhall think fit, to remain there
P. 561. without Bail or Mainprize until he ſhall ſubmit in all Things aforeſaid; and the Commiſſioners, where any Perſon ſhall be committed for refuſing to anſwer, or for not fully anſwering any ſuch Queſtion, ſhall ſpecify the Queſtion in their Warrant and Commitment.

The Royal *African* Company, *&c.* are reſtrained for one Year to be computed from the 17th of *March*, 1749, from aſſigning or diſpoſing of any of their military Stores, Ammunition, Slaves, Canoes, Veſſels, and Things neceſſary for the Uſe or Defence of their Forts and Settlements; and all Actions and Suits for Recovery of any Debt due by, or contracted on Behalf of, the ſaid Company, ſhall be ſtayed for one Year, to be computed from the ſaid 17th of *March*, 1749.

The Remainder of this Act is about Mr. *David Crichton* then in Cuſtody, and the Charges of obtaining the Act, *&c.* And another was made in the ſucceeding Seſſion *viz.* 24 *Geo.* II. for allowing further Time to the Commiſſioners appointed by and in Purſuance of the preceding Act, to enquire into the Claim of certain Creditors of the Royal *African* Company, *&c.* *viz.* till the 12th of *January*, 1752.

26 *Geo.* II. P. 773, 774. This Act recites the two preceding ones, and in Purſuance of them, that a Survey had been taken of all the Forts and Caſtles of the Royal *African* Company on the Coaſt of *Africa*, by Captain *Thomas Pye*, Commander of his Majeſty's Ship *Humber*, and of the Quantity, Number, and Quality of Cannon, and their military Stores, Canoe-Men, Caſtle Slaves, Canoes, and Veſſels, then at each reſpective
P. 775. Fort belonging to the ſaid Royal *African* Company. And whereas the ſaid Company are willing to ſurrender all and ſingular their Lands, Forts, *&c*, and all their Eſtate, Property, Intereſts, and Effects whatſoever, for ſuch Compenſation and Satisfaction, and to be applied in ſuch Manner as herein after is expreſſed and directed: Be it therefore enacted, that the Royal *African* Company of *England*, from and after the 10th Day of *April*, 1752, ſhall be, and they are hereby abſolutely diveſted of, and from their ſaid Charter, Lands, Forts, Caſtles, *&c.* and all other their Eſtate, Property, and Effects whatſoever; and that all and every the *Britiſh* Forts, Lands, Caſtles, Settlements, and Factories, on the Coaſt of *Africa*, beginning at Port *Sallee*, and extending to the Cape of *Good-Hope* inclusive, which were granted to the ſaid Company by the ſaid Charter, or which have been ſince erected or purchaſed by the ſaid Company; and all other the Regions, Countries, *&c.* lying and being within the aforeſaid Limits, and the Iſlands near adjoining to thoſe Coaſts, and comprehended within the Limits

deſcribed by the ſaid Charter, and which now are, or at any Time heretofore have been in the Poſſeſſion of, or claimed by the ſaid Royal *African* Company of *England*, together with the Cannon, and other military Stores, Canoe-Men, *&c.* at and belonging to the ſaid Forts, Caſtles, *&c.* ſuch Stores as have been made Uſe of in the Service of the Forts, and ſuch Canoe-Men and Slaves as may have died ſince the taking of the ſaid Survey, only excepted, and alſo all Contracts and Agreements, made by, or for, or on the Behalf of the ſaid Royal *African* Company, with any of the Kings, Princes, or Natives, *&c.* and all other the Property, Eſtate, and Effects whatſoever of the ſaid Royal *African* Company, ſhall, from and after the ſaid 10th of *April*, 1752, be veſted in, and the ſame and every of them are, and is hereby fully and abſolutely veſted in the ſaid Corporation, called and known by the Name of *The Company of Merchants trading to Africa*, and their Succeſſors, freed and abſolutely diſcharged of and from all Claims and Demands of the ſaid Royal *African* Company and their Creditors. 25. *Geo.* II. P. 777.

Provided always, that the diveſting the ſaid Royal *African* Company of their Charter, and veſting the before-mentioned Premiſes in the ſaid Company of Merchants trading to *Africa*, ſhall not extend to give the ſaid Company, or their Committee, any other Rights, Privileges, or Powers, than ſuch as are given to the ſaid Company by the afore recited Act of 23 *Geo.* II.

And *Bance* Iſland, in the River *Sierra Leon*, with its Forts and Buildings, appearing to belong to *Alexander Grant*, *John Sargent*, and *Richard Oſwald* of *London*, Merchants, they ſhall continue in the quiet Poſſeſſion of it, and it ſhall be abſolutely veſted in them, their Heirs and Aſſigns; any Thing herein or in any former Acts to the contrary notwithſtanding; though with the *Proviſo*, that it ſhall never be lawful for them to alienate their Right and Intereſt therein to any foreign Perſon. P. 777.

The new Company of Merchants may, with the Conſent of the Commiſſioners for Trade and Plantations, raiſe and arm, train and muſter, ſuch military Forces as to them ſhall ſeem requiſite and neceſſary, and ſubject them to martial Diſcipline, ſo as the Puniſhment does not extend to the Loſs of Life or Limb.

They may alſo erect Courts of Judicature for hearing and determining all Cauſes on Account of maritime Bargains, *&c.* or concerning any Perſon reſiding within the Bounds and Limits aforeſaid. P. 778.

Provided nevertheleſs, that his Majeſty, his Heirs and Succeſſors, ſhall have full Power, at his or their Will and Pleaſure, from Time to Time, by his or their Sign Manual, to revoke all ſuch Powers which ſhall be given to any Perſons for raiſing, arming, and training the military Forces, and all ſuch Rules and Regulations as ſhall be given or eſtabliſhed, and to grant all military Powers on the ſaid *African* Coaſt, and eſtabliſh ſuch Rules and Regulations as he or they ſhall from Time to Time think fit; and alſo to revoke and repeal all ſuch Courts of Juſtice as ſhall be erected; and to erect and eſtabliſh ſuch other Courts of Juſtice there, as he or they ſhall from Time to Time think fit.

And be it further enacted, that all Contracts and Agreements which have been made by the ſaid Royal *African* Company with any of the Kings, *&c.* on the ſaid Coaſts, and all Deeds, *&c.* which did belong to the ſaid Company, ſhall, on or before the ſaid 10th Day of *April*, 1752, be delivered over to the ſaid *Company of Merchants trading to Africa*, &c.

And for making a full Compenſation and Satisfaction to the Royal *African* Company for their ſaid Charter, Lands, Forts, Caſtles, *&c.* *Be it enacted*, that out of all or any the Aids or Supplies granted to his Majeſty in this Seſſion of Parliament, there may, and ſhall be applied and paid, the Sum of one hundred and twelve thouſand one hundred and forty-two Pounds, three Shillings, and three Pence, without Account, to ſuch Perſons, and in ſuch Proportion, and in ſuch Manner as is herein after particularly directed and appointed. P. 779.

That out of the ſame Sum of 112,142*l.* 3*s.* 3*d.* the Commiſſioners of his Majeſty's Treaſury, or any three of them for the Time being, do iſſue and pay the Sum of one thouſand ſix hundred and ninety-five Pounds and three Shillings, to *Richard Edwards* and *Edmund Sawyer*, Eſqrs. two of the Maſters of the High Court of *Chancery*, and *John Waple*, Eſq. one other of the Maſters, and alſo

Accomptant-

Accomptant-General of the ſaid Court; being the Commiſſioners appointed to examine and ſtate the Claims of the Creditors of the ſaid Royal *African* Company, by the 23d of his preſent Majeſty, for their Trouble, and in Satisfaction of the Expences of executing the ſaid Commiſſion.

And it is further enacted, That out of the aforeſaid Sum of 112,142*l.* 3*s.* 3*d.* the further Sum of eighty-four thouſand ſix hundred and fifty-two Pounds, twelve Shillings, and ſeven Pence, be diſtributed and paid to the ſeveral Creditors mentioned and ſet forth in the ſecond Schedule to this Act annexed, in the reſpective Sums and Proportions therein mentioned, in full Satisfaction of all and every their Demands.

25 *Geo.* II. P. 780. That twenty-three thouſand ſix hundred and eighty-eight Pounds, fifteen Shillings, and five Pence, be paid and divided to and amongſt the Perſons named in the third Schedule to this Act annexed, in the Sums and Proportions therein mentioned, being ſuch of the Proprietors of *African* transferrable Stock as were poſſeſſed of the ſame on the 31ſt Day of *December*, in the Year of our Lord 1748, the ſame being computed to be at, and after the Rate of ten Pounds *per Centum* on the ſaid Stock, ſo poſſeſſed by them at that Time, in full of all their Right and Title to the ſame, or any Part thereof.

That the Sum of two thouſand one hundred and five Pounds, twelve Shillings, and three Pence, Reſidue of the ſaid Sum of 112,142*l.* 3*s.* 3*d.* be paid and divided to and amongſt the Perſons named in the fourth Schedule to this Act annexed, the Sums and Proportion therein mentioned, being ſuch of the Proprietors of *African* transferrable Stock as have become poſſeſſed of the ſame ſince the ſaid 21ſt of *December*, 1748, being computed to be at and after the Rate of five Pounds *per Centum* on the Stock ſo poſſeſſed by them, in full of all their Right and Title to the ſame or any Part thereof.

And be it further enacted, That from and after the ſaid 10th of *April*, 1752, the ſaid Royal *African* Company ſhall ceaſe to be a Corporation, and all Claims and Demands againſt it, *&c.* are hereby declared to be null and void, *&c.*

P. 781. And that the ſaid *Richard Edwards*, *Edmund Sawyer*, and *John Waple*, Eſqrs. or ſuch other of the Maſters of the High Court of *Chancery* as may be hereafter appointed, ſhall be conſtituted and appointed Commiſſioners for the making out and delivering Certificates to all the Creditors of the ſaid Royal *African* Company, and the Proprietors of their Stock in the ſaid Schedules particularly mentioned, and for other the Purpoſes in this Act contained, for the Space of two Years, to be computed from the 1ſt of *January*, 1752. And the ſaid Commiſſioners, or any two of them, are hereby impowered and required with all convenient Speed to make out, under their Hands, and to deliver all and every the Creditors of the ſaid Company, and to the ſeveral Proprietors of *African* transferrable Stock, mentioned in the ſaid ſeveral Schedules, Certificates of what is due, or allowed to them reſpectively as aforeſaid, and to take proper Receipts for the ſame,

And in Caſe of any of the Creditors' or Proprietors' Death, or becoming Bankrupts, the Certificate ſhall be delivered to their reſpective Executors or Aſſignees.

P. 782. And be it further enacted, That all the Creditors of the ſaid Company, and Proprietors of their Stock, on Receipt of the Certificate herein before directed to be made out and delivered, ſhall, upon their reſpective corporal Oaths, which the ſaid Commiſſioners are hereby authoriſed to adminiſter, produce and deliver up to the ſaid Commiſſioners, all and ſingular the Bonds, Bills, *&c.* relating to their reſpective Debts, which at the Time of the Examination of their Claims, or that of receiving the ſaid Certificate, were, or ſhall be, in their Hands, which the ſaid Commiſſioners are hereby impowered and required to cancel and deſtroy; and the Commiſſioners are hereby impowered to ſtop and retain the Certificates of ſuch as ſhall not deliver up the Securities to their Satisfaction, or as they ſhall require.

And that the Creditors and Proprietors, or their Executors or Aſſignees, ſhall attend the ſaid Commiſſioners, on ſuch Days and Times, and at ſuch Place,

within the Cities of *London* or *Weſtminſter*, as the ſaid Commiſſioners ſhall appoint in the *London Gazette*.

That the Lord High Treaſurer, or any three or more of the Commiſſioners, are hereby authoriſed and impowered, on Tender to them of the Certificates, to iſſue and pay to the Perſons named in them, the ſeveral Sums therein reſpectively contained. 25 *Geo.* II. P. 783.

That in Caſe of the Death of any of the Commiſſioners, others ſhall be appointed by the Lord High Chancellor; and the Commiſſioners are hereby required to lay Accounts of their Proceedings before the Parliament.

And it is further enacted, that the ſaid Company of Merchants trading to *Africa*, and their Succeſſors, are hereby required, with all convenient Speed, to ſell and diſpoſe of all the Goods, Wares, and Merchandize of the ſaid Royal *African* Company, which ſhall come to the Hands of the ſaid Company of Merchants or their Agents, the military Stores, Slaves, Canoes, and Veſſels, in the firſt Schedule to this Act annexed, excepted, for the beſt Price that can be got for the ſame; and that the ſaid Company of Merchants do every Seſſion of Parliament, until the whole ſhall be diſpoſed of, lay before both Houſes of Parliament, an Account of the Diſpoſition of the ſaid Goods, *&c.*

And that the ſaid Commiſſioners ſhall and may take for each Certificate from the Parties obtaining the ſame, a Sum not exceeding the Rate of two Pounds *per Cent.* upon the Money contained therein, where the Sum ſhall not be more than one hundred Pounds; and a Sum not exceeding one Pound *per Cent.* where the Money contained therein is above one hundred Pounds, and not exceeding one thouſand Pounds; and a Sum not exceeding ten Shillings *per Cent.* where the Money contained therein does exceed one thouſand Pounds; which reſpective Sums, and no more, the ſaid Commiſſioners ſhall and may demand and take, in full Recompence for all Trouble and Expences which they or their Clerks, *&c.* ſhall be at, in the Execution of the Powers thereby given them.

And whereas, at a general Meeting of the Creditors of the ſaid Royal *African* Company, on the 4th of *March* 1747, *Robert Myre* and *William Mills*, of *London*, Merchants, and *John Leapidge*, Stationer, with others, were choſen and appointed by the ſaid Creditors, to ſollicit a Satisfaction for the juſt Debts due and owing to them; and as it is reaſonable that all the ſaid Creditors ſhould contribute to the Charges of ſuch Sollicitation, and a proportionable Part of the Expences for obtaining this and the laſt Act; every Creditor of the ſaid Company whoſe Name is expreſſed in the ſecond Schedule, ſhall pay to the ſaid *Robert Myre*, &c. or one of them, a Contribution, at, and after the Rate of two Pounds *per Cent.* upon the Sum in the ſaid Schedule expreſſed, to be by them, the ſaid *Robert Myre*, &c. applied in Payment of all ſuch Charges and Expences as they have been or ſhall be at, *&c.* and no one of the ſaid Creditors ſhall have a Certificate of, or for, his or her ſaid Debt or Claim from the ſaid Commiſſioners, until he, or ſhe, ſhall produce to them a Note in Writing, under the Hands of the ſaid *Robert Myre*, &c. or one of them, expreſſing the Receipt of the ſaid Contribution. And the ſaid *Robert Myre*, *&c.* ſhall, on or before the 10th of *May*, 1754, or within three Calendar Months next after all the Contributions aforeſaid ſhall have been paid, if the ſame ſhall be ſooner paid, lay and ſubmit an Account thereof, and of their Payments and Diſburſements, in Writing under their Hands before the ſaid Commiſſioners for their Examination and Allowance; and ſhall diſpoſe of the Balance then remaining in their Hands, if any, in ſuch Manner as the ſaid Creditors at a general Meeting to be ſummoned for that Purpoſe by Advertiſement in the *London Gazette*, or the major Part in Value of the Creditors, at ſuch Meeting, ſhall reſolve, agree, or direct. P. 784. P. 785.

And whereas there is a conſiderable Sum of Money due to *William Newland*, the Sollicitor to the Royal *African* Company, for his Fees, Labour, and Diſburſements, in diverſe Sollicitations on their Account in their general Buſineſs ſince the 31ſt of *December* 1749; and it being juſt and reaſonable that all the Proprietors of the transferrable Stock of the ſaid Company ſhould contribute to a proportionable Part of the Expences for obtaining the laſt and preſent Act, every Proprietor of the ſaid Company, whoſe Names are expreſſed in the third and fourth Schedules tothis

Act annexed, ſhall pay to *John Vaughan*, *Solomon Aſhley*, and *Bibye Lake*, Eſqrs. Captain *Thomas Collett*, and *Samuel Exell*, Gentleman, or one of them, a Contribution, at, and after the Rate of two Pounds *per Centum*, for and upon the reſpective Sums in the ſaid reſpective Schedules expreſſed to be payable to the Perſons therein mentioned, to be by them the ſaid *John Vaughan*, Eſq. *&c.* applied in Payment of ſuch Sums as are now due to the ſaid *William Newland*, on the Account before-mentioned; and a proportionable Part of the Charges for obtaining the ſaid Acts, in ſuch Manner as ſhall be adjudged and directed by the ſaid Commiſſioners in Writing under their reſpective Hands; and no one of the ſaid Proprietors ſhall have a Certificate for his or her ſaid Share and Proportion from the ſaid Commiſſioners, until he or ſhe ſhall produce to them a Note in Writing, under the Hands of the ſaid *John Vaughan*, Eſq. *&c.* or one of them, expreſſing the Receipt of the ſaid Contribution; and the ſaid *John Vaughan*, Eſq. *&c.* ſhall, on or before the 10th of *May*, 1754, or within three Calendar Months next after all the Contributions aforeſaid ſhall have been paid, if the ſame ſhall be ſooner paid, lay an Account thereof, and of their Payments and Diſburſements, in Writing under their Hands, before the ſaid Commiſſioners for their Examination and Allowance, and ſhall diſpoſe of the Balance then remaining in their Hands, if any, in ſuch Manner as the ſaid Creditors at a general Meeting to be ſummoned for that Purpoſe, by an Advertiſement in the *London Gazette*, or the major Part of them in Value, preſent at ſuch Meeting, ſhall direct and appoint.

25 *Geo.* II. P. 786.

This Act ſhall be taken and deemed as a publick Act, *&c.*

The old Company being thus diveſted of their Charter, the Trade to *Africa* became free and open to all his Majeſty's Subjects, but was and is ſtill carried on under the Direction and ſubject to the By-Laws of a new Set of Merchants, ſtiled, *The Committee of the Company of Merchants trading to Africa*; and by an Act of Parliament paſſed in the Year 1765, all the Britiſh Forts and Settlements upon the Coaſt of *Africa*, lying between the Port of *Sallee* and Cape *Rouge*, together with all the Property, Eſtate, and Effects of the Company of Merchants trading to *Africa*, in or upon the ſaid Forts, Settlements, and their Dependencies, are veſted in his Majeſty King *George* III. and other Regulations are made, for ſecuring, extending, and improving the Trade to *Africa*, which has reſtored it to a flouriſhing State; and an annual Grant is made by Parliament of from 13,000*l.* to 15,000*l.* for repairing and maintaining the Forts.

Our Exports for this Trade are Cloths, and other Woollens, Muſlins, and ſome other *India* Goods, Spices, Drugs, Tobacco, Sugar, dying Woods, Alum, Paper, Steel, Iron, Lead, Toys, Mercery and Hard Ware, Ivory and Box Combs, Glaſs Beads, *&c.*—And our Returns from thence are Slaves, Gum Senegal, Oſtrich Feathers, Indigo, Gold Duſt, Dates, *Damas* Raiſins, Copper, Wax, Wool, Goat Skins, Coral, bitter Almonds, *&c.* In which Deſcription I include the Particulars of that ſmall Branch of Trade we carry on from hence with *Sallee*, *Tunis*, *Tripoli*, and *Algiers*.

I ſhall in the next Place give ſome Account of the Original of our Trade to *India*, and of the firſt Inſtitution of a Company for carrying it on.

Of the Trade between Great-Britain *and* Aſia, *more eſpecially that carried on by our* Eaſt-India *Company.*

OUR Knowledge of the *Eaſt-Indies* was early, and is very reaſonably ſuppoſed to be derived to us from the *Romans* during their Settlement among us; though it is not ſaid that any Commerce was attempted with thoſe Parts till the celebrated *Alfred*, who ſo glorioufly filled the *Britiſh* Throne, ſent, in 883, a favourite Eccleſiaſtick, one *Sighelmus*, with Alms for the poor diſtreſſed Chriſtians of St. *Thomas* and St. *Bartholomew* in the *Indies*; this we learn from the *Saxon* Annals, and though an extraordinary Event, they alone would put it paſt Doubt, had we not the Confirmation of it from *William* of *Malmſbury*, who writes, that the ſaid *Sighelmus* left in the Treaſury of *Sherburn* Church in *Dorſetſhire*, of which on his Return he was made Biſhop, ſome Jewels and Spices that he had brought with him from *Aſia*.

This

This Voyage however was not ſoon repeated by any other, and it was ſtill later before any Trade was ſettled from hence; the *Venetians*, as I have already mentioned in this Work, having ſupplied us always with the *Aſiatick* Commodities, till the Eyes of our Merchants were opened to the Advantages which a direct Trade would produce; they ſollicited the Protection of the Throne to their infant Engagements, and after ſtruggling with many Difficulties and Oppoſitions from jarring Intereſts, have at laſt happily brought the Company trading there, to be at leaſt ſecond, if not ranked as a firſt, amongſt the moſt opulent Aſſociations in the World.

It is ſaid, that in the Year 1527, one Mr. *Robert Thorne* of *London*, then ſettled at *Seville* in *Spain*, was the firſt that ever recommended the eſtabliſhing an *Eaſt-India* Trade from *England*, and added ſuch ſtrong Reaſons to his Propoſals, which both Books and Experience had furniſhed him with, as would have been more than ſufficient, in this enlightened Age, to have rendered his Schemes ſucceſsful; but in that Dawn of commercial Knowledge, People were timorous of engaging in ſuch a bold Undertaking as this then appeared to be, and conſequently the Aims of this judicious Gentleman, for his Country's Proſperity, were rendered abortive by the Puſillanimity of thoſe they were addreſſed to. And though many *Engliſh* Ships, and more *Engliſhmen*, in foreign Bottoms, were ſucceſſively going there, and by their Accounts it made appear how eaſy an Eſtabliſhment of Factories, *&c.* would be to their Countrymen in thoſe Parts, nothing was done in it till Queen *Elizabeth's* Reign, when ſeveral great Men and eminent Merchants began to entertain a Deſign of eſtabliſhing ſuch a Commerce. And in order to do it the more ſecurely, they ſollicited her Majeſty for an excluſive Charter, which ſhe accordingly granted them on the 31ſt of *December*, 1600, in the 43d Year of her Reign; thereby conſtituting them a Body Corporate, by the Stile of *The Governor and Company of the Merchants of* London, *trading to the* Eaſt-Indies, with a Common Seal, and to be managed by a Governor and twenty Directors, yearly to be choſen, on the 1ſt of *July*, or within ſix Days after. She likewiſe granted them the Privilege of making By-Laws, allowed them to export Goods Cuſtom-free for four Years, with a Permiſſion alſo to carry out thirty thouſand Pounds, every Voyage, of foreign Coin, provided they brought an equal Sum of ſimilar Specie into theſe Kingdoms by their Trade.

This Charter was for fifteen Years, and her Majeſty engaged to grant no other during that Term; but this Ceſſion was with the *Proviſo*, that if within the ſaid Space this Charter ſhould appear to be in any Reſpect detrimental to the Publick, it ſhould upon two Years' Warning, under the Privy-Seal, become void; but if Experience ſhould evince the contrary, and this new Corporation appear to be a publick Benefit, then ſhe promiſes to renew their Charter, with ſuch additional and favourable Clauſes, as ſhall be requiſite to promote the Advantage of the Company and the Kingdom.

In Conſequence of this Charter, the Company loſt no Time in raiſing a joint Stock for promoting their Deſign of carrying their Project immediately into Execution; in which they were ſo ſucceſsful, as ſoon to find themſelves Maſters of ſeventy-two thouſand Pounds, no ſmall Sum at that Time, with which they determined to commence their Trade, and gave Beginning to it by fitting out five able Ships for the firſt Voyage; of which Squadron the *Dragon*, of ſix hundred Tons, was Admiral, the *Hector*, of three hundred Tons, Vice Admiral, the *Suſannah* and *Aſcenſion*, of two hundred Tons each, and the *Gueſt*, a Store Ship, of an hundred and thirty Tons Burthen; the whole Complement of Men was four hundred and twenty; the Expence of equipping them forty-five thouſand Pounds; and the remaining twenty-ſeven thouſand Pounds of their Caſh was expended in the Purchaſe of their Cargoes.

They ſailed from *Torbay* on the 2d of *May*, 1601, and continued their Voyage to *India*, without any remarkable Accident; and the Admiral, Captain *James Lancaſter*, there made a Treaty with the King of *Achen*, ſent a Pinnace to the *Moluccas*, and ſettled a Factory in the Iſland of *Java*; after which he returned here in Safety, and brought good Profit with him.

The Death of Queen *Elizabeth* ſoon after made Way for King *James's* Acceſſion to the Throne, in whom this Company found a powerful Protector, not only by

his countenancing their Proceedings, but by affording them all the Aſſiſtance they could deſire, which, together with the Advantages reſulting from the firſt Voyage, animated them to freſh Engagements: and they fitted out a ſecond Squadron of four Ships, under the Command of Sir *Henry Middleton*, which proceeded in 1604 for the *Moluccas* and *Java*, where they were well received by all the *Indian* Princes, though their Treatment from the *Dutch* was very indifferent, who, had they retained any Gratitude, it muſt have made them rather careſs than ill uſe their *quondam* Preſervers; but, jealous of a Rival in this beneficial Trade, they loſt all Remembrance of their Obligations, and opprobriouſly traduced the *Engliſh* to the Natives, by miſrepreſenting them as a cruel, unjuſt, and ambitious People, whoſe Intentions were not to trade fairly with them, but to ſeize their Country, and forcibly take from them what they liked; however, this inſidious Behaviour had not all the Effect our *Batavian* Neighbours intended, as the King of *Ternate* expreſſed a Regard for our Countrymen in his Letter to King *James*, notwithſtanding the *Dutch*, as he therein informs his *Britiſh* Majeſty, had uſed their utmoſt Endeavours to alienate their Eſteem, and deſtroy the good Opinion which both he and his Subjects had entertained of the *Engliſh*, ever ſince Sir *Francis Drake* had viſited their Iſland.

In 1607 the Company undertook a third Voyage with three Ships only, which they ſucceſsfully performed, eſpecially in the *Moluccas*; and though the *Dutch* repeated their ill Uſage, yet they could not hinder theſe Ships from procuring a valuable Cargo of Spice, which they brought ſafely to the *Downs*, *May*, 10, 1610, with this remarkable Inſtance of Providence, that in this whole Voyage, out and home, they had not loſt a ſingle Man. In this Squadron Captain *William Hawkins* embarked, to whom was given the Title of the King's Ambaſſador to the *Great-Mogul*, by whom he was very kindly received, and had the good Fortune, by his prudent Addreſs and Management, to ſettle a friendly Correſpondence between the two Courts.

His Majeſty King *James*, in the Month of *May*, 1609, was pleaſed to enlarge the Company's Charter in the Manner they had requeſted; and not only ſo, but he made it perpetual, which gave them ſuch freſh Spirits, that they built a Ship of one thouſand two hundred Tons Burthen; which I mention, as this was the firſt Marine Conſtruction of any large Dimenſions in *England*; it having been cuſtomary till then, to build or purchaſe all great Ships from the *Hanſe* Towns; and being ſo extraordinary a Thing, the King, the Prince of *Wales*, and moſt of the chief Nobility, went down to *Deptford*, to dine aboard her, and were ſerved entirely upon China.

I might here enter into a Detail of the Company's Progreſſion in their Trade, Settlements; and their Conteſts with the *Dutch* and *Portugueſe*, till I brought my Reader to that unparralleled Scene of Barbarity perpetrated by the former at *Amboyna*; but the Troubles in *England*, during the Civil War affected the Commerce of *England*, ſo much that no material Improvements were made in it until the Reſtoration of King *Charles* II.

It was one of the earlieſt Acts of his Reign to revive and ſettle the Trade of the *Eaſt-India* Company, which he effected by granting them a new Charter, dated the 3d of *April*, 1661, confirming thereby not only their former Privileges, but making conſiderable Additions to them, he enlarged the Quantity of Bullion they before had Liberty to export each Voyage to 50,000*l.* though with the former *Proviſo*, that their Trade ſhould introduce an Equivalent, in that or foreign Specie; their excluſive Trade was confirmed, and he gave them a Power to licenſe others to traffick in the *Indies*; but this Charter ſtill retained the Condition of the firſt, that it ſhould be vacated upon three Years' Notice, if it was found to be detrimental to the Nation.

His Majeſty, in his Marriage Treaty with the Infanta of *Portugal*, had it ſtipulated, that the Iſland of *Bombay* ſhould be ceded to him as a Part of her Portion, and after his having built a Fort there, he made it over to the Company in Fee-Tail, who have remained Maſters of it ever ſince; beſides which Favour, he granted them two new Charters in the 28th and 35th Years of his Reign. But they having been put to great Expences, by the Intrigues and Violence of the *Dutch* in

the

the latter Part of it, and this cunning People having found Means to ſoften that Prince's Reſentments, the Company's Trade languiſhed till King *James* II.'s Acceſſion to the Throne, who proved a powerful Protector, and granted them greater Privileges than they knew how rightly or advantageouſly to uſe, otherwiſe they might have increaſed their Commerce, as they are now placed on ſo good a Footing both at home and abroad; but this proſperous Condition was reſerved as a Reward for a more prudent Set of People afterwards.

King *William* and Queen *Mary* granted a new Charter to the Company, dated the 7th of *October*, 1693, wherein their former Charters were confirmed; and another of Regulations was granted by their Majeſties on the 10th of *November* following; by which new Grants they were enabled to take in a freſh Subſcription for ſeven hundred and forty-four thouſand Pounds, and tied down to make public Sales by Inch of Candle; to export yearly of the Manufactures of this Kingdom, to the Value of one hundred thouſand Pounds; and annually to furniſh the Crown with five hundred Tons of the beſt Salt-Petre at the Rate of thirty-eight Pounds ten Shillings *per* Ton in Time of Peace, and at forty-five Pounds *per* Ton in Time of War: They were alſo directed to make no Dividend on their Stocks but in Money only. This Charter was to continue in Force for twenty-one Years, provided the Governor and Company complied exactly with the Rules therein preſcribed, and likewiſe with ſuch other Orders, Directions, Additions, Qualifications, and Reſtrictions, as their Majeſties, by and with the Advice of their Privy-Council, ſhall think fit to appoint, on or before the 29th of *September*, 1694, otherwiſe all their Power and Privileges might be determined and taken away by Letters of Revocation.

And in Purſuance of this *Proviſo*, another Charter of Regulations was granted to the ſaid Company under the great Seal of *England*, on the 28th of *September*, 1694, in the ſixth Year of their Majeſties' Reign; preſcribing, among other Things, that in the Month of *Auguſt*, yearly, the Governor and Company ſhould preſent to the Privy-Council, a true Account, fairly written, under the Governor and Deputy-Governor's Hand, of the Nature, Quality, Value, and Prime-Coſt of the Manufactures of this Company by them exported, and from what Place; and this upon the Oaths of the proper Officers and Servants of the Company. And it was further ordered, that none of theſe Goods ſhould be again landed in *England*, or carried elſewhere, than within the Limits of the Company's Charter. It was likewiſe directed, that on the Application in Writing of any ſix or more of the Proprietors, poſſeſſing each one thouſand Pounds Capital Stock, demanding a general Court of the ſaid Company to be called, the Governor or Deputy-Governor ſhould be obliged within eight Days to call ſuch Court; and that it ſhould not be adjourned, but by the Conſent of the Majority of the Proprietors then aſſembled: And the Company were required to ſignify their Acceptance of, and Submiſſion to, theſe and other Reſtrictions, under Penalty of its being diſſolved.

But though theſe Charters and Regulations ſeemed fully to confirm, at the ſame Time that they enlarged the Company's Privilege and Power, yet they proved but a Prelude to the Diſſolution of both; as their Rights were conteſted by a Set of Interlopers, under a Pretence that the Crown could not grant an excluſive Charter; and the Government's Wants inclining the Miniſtry to liſten to the Offers of a Loan from other Hands, though on Terms they ought to have rejected, haſtened the Deſtruction of an Aſſociation ſeemingly ſo firmly eſtabliſhed, to the Ruin of many thouſands, who had embarked in it, under the Sanction of the Crown: For this new Set of People, who were willing to advance their Money, though intimidated from doing it without a better Surety than what had hitherto been eſteemed, I mean the King's Prerogative, at laſt agreed with the Miniſtry to lend them two Millions under a parliamentary Security; at an Intereſt of 8 *per Cent.* and an Act to incorporate them, which paſſed in 1698; ſo that hereby two Companies trading to the *Eaſt-Indies* were eſtabliſhed, and ſubſiſted at the ſame Time. 9 and 10 *Will.* III. Cap. 44. S. 46, & *Seq.*

This Act was not obtained, however, without a ſtrong Oppoſition from the old Company, who followed the Bill into the Houſe of Lords; but had the Mortification to ſee it paſs, under the Suppoſition of its being for the Public's Advantage. And this Occurrence reduced them to the Neceſſity of endeavouring an Accom-

modation with their new Rival, which being for the common Benefit of both, was ſettled under ſeveral Articles; and amongſt them, that a joint Trade ſhould be, for ſeven Years, carried on, though with different Stocks and ſeparate Servants, who ſometimes acted jointly, and at others governed alternately, under the Direction of their own Maſters. But this double-headed Government being found inconvenient, and the ſeven Years ſpun out, it was mutually agreed by the two Companies to form themſelves into one, which they accordingly did in 1705, though they could not bring their Factors at all Places into the ſame Union till three or four Years after, nor carry on their Buſineſs with the Advantages they had Reaſon to hope, unaſſiſted by the Miniſtry, whoſe Attention was now ſolely engroſſed by the foreign Wars we were then engaged in, and the Company left to take Care of itſelf, by finding out ſome Means to obtain ſuch favourable Regulations, as might effectually remedy the Inconveniences that had reſulted from the uniting two Companies, before ſo differing in their Intereſts. And, in Order to obtain ſuch a Law as was requiſite for this Purpoſe, they tempted the Government by a tendered Loan of a Million and two hundred thouſand Pounds, *extra* of what was before lent, to grant them ſuch Parliamentary Aſſiſtance towards carrying on their Trade, as they required, and which incorporated them under the Title of *The united Company of Merchants of* England, *trading to the* Eaſt-Indies: It likewiſe enacted, that this Company ſhall pay into the *Exchequer* 1,200,000*l.*

6 *Ann.* Cap. 17. S. 1.

S. 2. That they may borrow by their common Seal on their united Stock, ſo as the principal Money owing do not exceed 1,500,000*l.* above what might lawfully have been borrowed before this Act.

S. 3. In Caſe the general Court of the ſaid *Engliſh* Company ſhall think fit, they may call in Monies from their Adventurers, towards raiſing the ſaid 1,200,000*l.* or the repaying the Money borrowed to that Purpoſe; and in Caſe any Member ſhall neglect to pay his Share of the Monies called in, or which the ſaid Companies, in Purſuance of 9 *W.* III. Cap. 44. or their Charters, ſhall call in for carrying on their Trade, by Notice fixed on the Royal *Exchange*, *London*, the Companies may ſtop the Dividends payable to ſuch Member, and apply the ſame towards ſuch Payment, and alſo ſtop the Transfers of the Shares of ſuch Defaulter, and charge him with Intereſt at 6 *per Cent.* for the Monies neglected to be paid; and if the Principal and Intereſt be not paid in three Months, the Company may ſell ſo much of the Stock of the Defaulter as will pay the ſame.

S. 4. The ſaid 1,200,000*l.* ſhall be deemed an Addition to the Stock of the *Engliſh* Company and be Tax free.

S. 5. The united Stock of the ſaid *Engliſh* Company ſhall be ſubject to the Debts contracted by the ſaid Company.

S. 6. The *Proviſo* in 9 *W.* III. Cap. 44, and in the Charters of the ſaid Company for Reduction upon three Years' Notice, upon Repayment of the 2,000,000*l.* paid in, and the Arrears of the Payments at 8 *per Cent.* is repealed.

S. 7. Perſons intitled to 7200*l.* Part of the 2,000,000*l.* who have united their Stock to the Corporation's, and who carry on a Trade for their ſeparate Uſe, may hold their Proportion of the Annuity, as if this Act had not been made. But the *Engliſh* Company may affix Notice on the *Royal Exchange*, of their Intention to repay 7200*l.* at the End of three Years; and in Caſe the Company pay the ſame, and the Annuities at 8 *per Cent.* for the ſame, then the ſaid Stock of 7200*l.* and Trade, ſhall be veſted in the Company.

Beſides the above Particulars, many others were enacted, concerning their Stock and Payment of Cuſtoms, &c. by the Acts already mentioned, and ſeveral ſucceeding ones; and as it was found in the Beginning of King *George* the Firſt's Reign, that ſeveral Attempts had been made to diſcover the Secrets of the Company's Trade, for the Information and Advantage of Foreigners, a Law was obtained to prevent and remedy this miſchievous Intent, and alſo to deſtroy the interloping Trade, by inflicting ſubſequent Puniſhment, on the Infringers or Violators of it.

5 *Geo.* I. C. 21.

S. 7. If any of his Majeſty's Subjects ſhall repair to, or be in, the *Eaſt-Indies*, or ſuch Places of *Aſia*, *Africa*, and *America*, beyond the Cape of *Bona Eſperanza*, to the Straits of *Magellan*, where any Trade of Merchandiſe may be had, contrary to the Laws in being, every Perſon, ſo offending, ſhall be liable to ſuch Puniſhment as by any Law in being may be inflicted for ſuch an Offence.

It ſhall be lawful for the united Company of Merchants of *England* trading to the *Eaſt-Indies*, and their Succeſſors, to arreſt ſuch Perſons within the Limits aforeſaid, and ſend them to *England* to anſwer for their ſaid Offence. 5 *Geo.* I. C. 21. S. 2.

Every Perſon who ſhall ſollicit for, obtain, or act under any Commiſſion from any foreign State, to ſail, or trade to the *Eaſt-Indies*, &c. ſhall forfeit 500*l.*

If any of his Majeſty's Subjects ſhall repair or trade to the *Eaſt-Indies*, or Places beyond the Cape of *Good-Hope*, mentioned in former Acts, contrary to any Law in being, it ſhall be lawful for the Attorney General, or for the united Company trading to the *Eaſt-Indies*, within ſix Years, to file in any of the Courts at *Weſtminſter*, Informations againſt ſuch Offenders. And, if found guilty, the Court ſhall give Judgement againſt him, by Fine and Impriſonment, as it ſhall think fit, and award the Proſecutor Coſts; but, if the Defendant is acquitted, the Company ſhall pay him Coſts. 7 *Geo.* I. C. 24. S. 1.

All Contracts made by any of his Majeſty's Subjects, or in Truſt for them, on the Loan of Monies by Way of Bottomry, on any Ship in the Service of Foreigners, and bound to the *Eaſt-Indies*, &c. and all Contracts for ſupplying any ſuch Ship with Goods or Proviſions, and all Copartnerſhips relating to any ſuch Voyage, and Agreements for the Wages of Perſons ſerving on board any ſuch Ships, ſhall be void. S. 2.

Every Subject of his Majeſty who ſhall go to the *Eaſt-Indies*, &c. contrary to the Laws in being, ſhall be deemed to have traded there; and all the Goods there purchaſed by any ſuch Offender, or found in his Cuſtody, or in the Cuſtody of any other in Truſt for him by his Order, ſhall be forfeited, and double the Value. S. 3.

All Goods ſhipped on board any Ship bound for the *Eaſt-Indies*, &c. except Goods of the Company, or ſuch as are licenſed by them, and the Stores for ſuch Ship, and all Goods taken out of ſuch Ship on her Voyage homeward before her Arrival, ſhall be forfeited, and double the Value; and the Maſter, or other Officer, knowingly permitting ſuch Goods to be ſhipped, or taken out of ſuch Ship, ſhall forfeit for every Offence 1000*l.* and ſhall not be entitled to any Wages; nor ſhall the Company be obliged to pay any Wages to ſuch Maſter, *&c.* but ſhall have an Allowance in Reſpect thereof, out of the Monies payable on Account of the Ship. S. 4.

It ſhall be lawful for the Attorney General, at the Relation of the Company, or by his own Authority, to exhibit Bills of Complaint in the *Exchequer* againſt any Perſons trading to or from the *Eaſt-Indies*, &c. contrary to Law, for Diſcovery of ſuch their Trading, *&c.* and for Recovery of the Duties and Damages herein mentioned, waving in ſuch Bills all Penalties for the Matters in ſuch Bill contained; and ſuch Perſons ſhall pay to his Majeſty the Cuſtoms of the Goods ariſing by the ſaid unlawful Trade, and ſhall anſwer to the Company 30*l. per Cent.* according to the Value thereof in *England*, and if ſuch Offenders pay the Cuſtoms into his Majeſty's *Exchequer*, and the Damages to the Company, they ſhall not be proſecuted on any other Law for the ſame Offence: And if ſuch Bills, exhibited at the Relation of the Company, be diſmiſſed, the Company ſhall pay full Coſts; and if a Decree be obtained againſt the Defendants, they ſhall pay Coſts to his Majeſty and the Relator, *&c.* S. 5.

If any Subject of his Majeſty ſhall contribute to, or encourage the eſtabliſhing or carrying on any foreign Company trading to the *Eaſt-Indies*, and other Places beyond the *Cape of Good Hope*, deſcribed in former Acts, or ſhall be intereſted in the Stock or Actions of ſuch foreign Company, every Perſon ſo offending ſhall forfeit his Share in the Stock of any ſuch Company, together with treble the Value thereof, *&c.* 9 *Geo.* I. C. 26. S. 1.

If any Subject of his Majeſty ſhall have accepted of any Truſt, or ſhall know of any Intereſt which any of his Majeſty's Subjects ſhall have in any ſuch foreign Company, and ſhall not within ſix Months diſcover the ſame in Writing to the united Company, or their Court of Directors, he ſhall forfeit treble the Value of the Intereſt, *&c.* S. 4.

Every Perſon, who within the Time above limited ſhall voluntarily come to the Court of Directors, and make a Diſcovery in Writing, of the Intereſt of any of his Majeſty's Subjects in the Stock of ſuch foreign Company, ſhall have one half of S. 5.

the

the clear Amount of the Forfeitures ariſing by this Act out of the Eſtate of the Perſons ſo intereſted, *&c.*

9 *Geo* I. C 26. S. If any of his Majeſty's Subjects, other than ſuch as are lawfully authoriſed, ſhall go to or be found in the *Eaſt-Indies*, the Perſons ſo offending are declared to be guilty of a high Crime and Miſdemeanour, and may be proſecuted in any Court of *Weſtminſter*; and being convicted, ſhall be liable to ſuch corporal Puniſhment, Impriſonment or Fine, as the Court ſhall think fit, *&c.*

S. 7. Perſons ſo offending may be ſeized and brought to *England*, and any Juſtice of Peace may commit them to the next County Gaol, till Security be given by natural-born Subjects, to appear in the Court where ſuch Proſecution ſhall be commenced, and not to depart out of Court, or out of the Kingdom, without Leave of the ſaid Court.

The following Acts principally regard the Company's Stock, with which I ſhall finiſh the Subject of their Eſtabliſhments and Polity, and then proceed to ſay ſomething of their Trade.

3. *Geo.* II. C. 14. S. 4. The Annuity of 160,000*l.* ſhall be reduced to 128,000*l.* in Reſpect of the Capital Stock of 3,200,000*l.* which reduced Annuity ſhall be charged on the ſame Revenues as their preſent Annuity, *&c.*

S. 5. On one Year's Notice to be given by Parliament after the 25th of *March*, 1736, and on Repayment of the capital Stock of 3,200,000*l.* and of all Arrears of their reduced Annuity, their ſaid Annuity ſhall ceaſe.

S. 6. Upon one Year's Notice, after the 25th of *March*, 1736, to be given by Parliament on Repayment to the Company of any Sum not leſs than 500,000*l.* in Part of the Capital Stock, and on Payment of all Arrears, due on their reduced Annuity; ſo much of the ſaid Annuity, as ſhall bear Proportion to the Monies paid in Part, ſhall ceaſe.

S. 7. Notwithſtanding ſuch Redemption, the united Company ſhall continue a Body Corporate by the Name of *The united Company of Merchants of* England *trading to the* Eaſt-Indies, and enjoy all Privileges which by former Acts or Charters founded thereon, the Company might enjoy.

S. 8. After Redemption of the ſaid yearly Fund, or one Moiety thereof, the Company may, by By-Laws to be made in their general Courts, declare what Share in the remaining Stock, *&c.* ſhall qualify Members to be Directors, or to give Votes in any general Court.

S. 9. Notwithſtanding ſuch Redemption, the Company ſhall, ſubject to the *Proviſo* of Determination herein contained, enjoy the ſole Trade to the *Eaſt-Indies*, and all Places between the Cape of *Good-Hope* and the Straits of *Magellan*; and if any Subjects, other than Factors, *&c.* of the Company, ſhall ſail or adventure to the *Eaſt-Indies*, &c. every ſuch Offender ſhall incur the Loſs of all Ships employed in ſuch Trade, *&c.* with the Guns, and Furniture, and the Goods laden thereon, and double the Value thereof, *&c.*

S. 10. The ſaid Company ſhall have Powers, by any Acts or Charters granted to the Company, not altered by this Act, diſcharged from all Proviſoes of Redemption therein contained, for ſecuring to them the ſole Trade to the *Eaſt-Indies*, and for ſecuring their Effects, and governing their Affairs.

S. 11. Provided that upon three Years' Notice to be given by Parliament, after the 25th of *March*, 1766, and Repayment of the ſaid Capital Stock of 3,200,000*l.* and all Arrears of Annuities payable in Reſpect thereof, the Right of the Company to the ſole Trade to the *Eaſt-Indies*, &c. ſhall ceaſe.

S. 12. Nothing in the above *Proviſo*, or in the Charter of the 5th of *Sept.* 10 *Will.* III. ſhall extend to determine the Corporation of the united Company, or to exclude them from carrying on a free Trade to the *Eaſt-Indies*, &c. with their Joint Stock, *&c.* in common with other Subjects of his Majeſty.

S. 13. Any Notice in Writing, ſignified by the Speaker of the Houſe of Commons, ſhall be deemed proper Notice by Parliament to the Company.

S. 14. The united Company are reſtrained from purchaſing Hereditaments in *Great-Britain*, exceeding in the whole the yearly Value of 10,000*l.*

S. 15 Nothing in this Act ſhall prejudice ſuch Trade or Navigation within the ſaid Limits, as the *South-Sea* Company are entitled to.

Nothing

Nothing herein ſhall ſubject the Governor and Company of the Merchants of *England*, trading to the *Levant* Seas, to any Penalties in Reſpect of their trading into thoſe Seas. 3 *Geo.* II. C. 14. S. 16.

The reduced Annuity of 128,000*l.* ſhall be transferred from the Duties now charged, and be charged upon the *aggregate Fund*, to be paid to the united Company, *&c.* 3 *Geo.* II. C. 20. S. 22.

Whereas the ſaid united Company of Merchants trading to the *Eaſt-Indies*, are willing to advance towards the Supply granted for the Service of the Year 1744, a Million Sterling, for the Purchaſe of an Annuity of 30,000*l.* well ſecured to the ſaid Company, and repayable on the ſame Terms with the Company's preſent Capital, with an Addition of fourteen Years to their preſent Term, which will, with ſuch Addition, extend to *Lady-Day*, 1760, beſides the three Years allowed them after the Expiration of their preſent Term, for bringing home, and diſpoſing of their Effects, and other Purpoſes; with Power to the Company to iſſue out Bonds from Time to Time, with any Part, or the whole Amount of the ſaid Million Sterling, and on ſuch other Conditions, *&c.* as are herein after made: *It is therefore enacted*, that the ſaid united Company of Merchants of *England*, trading to the *Eaſt-Indies*, in Purſuance of their before recited Agreement, ſhall advance into the *Exchequer*, for his Majeſty's Uſe, the full Sum of one Million, on or before the 29th of *September*, 1744, *&c.* 17 *Geo.* II. P. 363.

And to encourage the Company to advance the ſaid Million, *&c.* it is hereby enacted, that the Proviſoes contained in the 3d of *Geo.* II. and all other Proviſoes contained in any other Acts, for determining the Annuity of the Company, and their Right to the excluſive Trade to the *Eaſt-Indies*, and Parts aforeſaid, upon the reſpective Notices and Payments in the ſame Acts mentioned, are hereby repealed and made void; and the ſaid Company ſhall for ever enjoy, not only their preſent entire Annuity of 128,000*l.* out of the Revenue charged therewith, but alſo after the ſaid 29th of *September*, 1744, they ſhall enjoy a further Annuity of 30,000*l.* computed after the Rate of 3 *per Cent. per Ann.* &c. P. 365.

The *Eaſt-India* Company under their common Seal may borrow Money equivalent to the Million raiſed for his Majeſty's Uſe, over and above the Money which might lawfully be borrowed thereon before making of this Act. P. 366, 367.

At any Time on a Year's Notice to be given by Parliament, after the 25th of *March*, 1745, on the Expiration of the ſaid Year, and on Repayment of the 3,200,000*l.* formerly advanced, and of the 1,000,000*l.* now to be advanced, without any Deduction, and on the Payment of all Arrears of the ſaid Annuities of 128,000*l.* and 30,000*l.* then the ſaid Annuity ſhall ceaſe. P. 368.

On a Year's Notice at any Time after the ſaid 25th of *March*, 1745, to be given by Parliament on the Expiration of the ſaid Year, and on Repayment of any Sum not leſs than 500,000*l.* in Part of the ſaid Debt of 4,200,000*l.* and on Payment of all Arrears, *&c.* then ſo much of the ſaid Annuities as ſhall bear Proportion to the ſeveral Sums paid in Part, ſhall, from Time to Time, as ſuch Payments are made, ſink and be abated, till their whole Annuities ſhall be entirely ſunk and determined. P. 369.

Notwithſtanding ſuch Redemption of the Annuities of 128,000*l.* and 30,000*l.* the ſaid Company ſhall, ſubject to the Proviſo of Determination, herein after contained, enjoy an excluſive Traffick to and from the *Eaſt-Indies*, and all Places between the Cape of *Good-Hope*, and Straits of *Magellan*, and Limits preſcribed in the Act of 9 *Will.* III. *&c.* in as ample a Manner as the ſaid Company could thereby or otherwiſe lawfully trade thereto; And the ſaid *Eaſt-Indies*, or Places within the Limits aforeſaid, ſhall not be reſorted to by any other Subjects, before the excluſive Trade of the *India* Company is determined: And if any other his Majeſty's Subjects, ſhall preſume to trade thither during the Continuance of the excluſive Trade of the *India* Company, they ſhall forfeit their Ships, with their Guns and Furniture belonging, with all their Lading and double the Value, *&c.* P. 370.

The ſaid *India* Company ſhall hereafter for ever, ſubject as aforeſaid, enjoy all the Profits and Powers, as by any former Acts of Parliament or Charters founded thereon are enacted and eſtabliſhed concerning them, under any particular Denomination, and not altered by this Act; and the ſame are hereby confirmed, and P. 371.

ſhall continue to be enjoyed and practiſed by the ſaid Company, for the better ſecuring to them the ſole and excluſive Trade to the *Eaſt-Indies*, &c. and for preventing all other his Majeſty's Subjects trading thither, and for ſecuring their Effects and governing their Affairs in all Reſpects, as effectually as if the ſame things were ſeverally repeated in the Body of this Act; ſubject nevertheleſs to ſuch Reſtrictions and Covenants as are contained in the ſaid Acts and Letters Patent now in Force, and not hereby altered; and to the Proviſo following, *viz.*

17 *Geo.* II. P. 372. Provided that on three Years' Notice to be given by Parliament, after *March* 25, 1760, and Repayment of the Capital Stock of 4,200,000*l.* and all Arrears of Annuity in Reſpect thereof, the Company's Right to the ſole and excluſive Trade to the *Eaſt-Indies* and Parts aforeſaid, ſhall ceaſe and determine, *&c.*

The Company's Settlements, and the Places they trade to in *Perſia* and *India* are many, as *Gombroon*, where a Factory was eſtabliſhed about the Year 1613, which continued to govern the whole Trade, in Reſpect of the Company, in *Perſia*, till the Diſorders in that Country obliged the *Factors* to decamp, to the no ſmall Detriment of the Company's Trade, who carried on a very great one to this Port.

Mocha, ſituated at the Entrance of the *Red Sea*, is a Place where the *Engliſh* are well received, and carry on a very conſiderable Commerce in Coffee, *&c.* as they do in all the adjacent Parts of *Arabia*, though with the Riſk of being ſometimes oppreſſed by the unjuſt Proceedings of the reigning Princes, and expoſed to the piratical Depredators of thoſe Parts.

Our Factories, Forts, and Settlements, on the *Indian* Coaſt, are at *Baroach*, *Swally*, *Surat*, *Bombay*, *Dabul*, *Carwar*, *Tellechery*, *Anjengo*, and *Conymere*, all along the *Coaſt of Malabar*; and turning up to thoſe of *Coromandel*, we meet with *Fort St. George*, the Principal of our *Indian* Poſſeſſions.

The *Engliſh* formerly had a Settlement at *Matchulipatam*, *Narſipore*, and ſeveral other Places to the *Northward* on this Coaſt, but were obliged to quit them by the Interruption they received to their Trade from the Rajahs' Impoſitions.—Round *Carrango* Point, in the Bay of that Name, lies *Angerang*, where ſome *Engliſh* from *Vizagapatam* ſettled in the Year 1708, but the Factory ſoon withdrew, and thereby defeated the projected Scheme of extending their Trade that Way; *Vizagapatam* however continues fortified, and the *Engliſh* their Reſidence there; theſe Places lie in the Kingdom of *Golconda*, and the next to it is that of *Orixa*, in which is the Town of *Balaſore*, where the *Engliſh*, *French*, and *Dutch*, have their reſpective Factories, though of very ſmall Importance; *Pipley*, about five Leagues from it, had once a Settlement, but was deſerted for the more commodious Situation of *Hughly* and *Calcutta*; ſeveral Trading Towns are diſperſed on this Coaſt, but the Company's chief Factory here is that at *Fort William*, a Fort belonging to *Calcutta*, ſituated on the River *Hughly*, the moſt weſterly Branch of the *Ganges*. The Fort itſelf is ſaid to be irregular, and untenable againſt diſciplined Troops; but it contains commodious Houſes for the Governor and other ſuperior Servants of the *Eaſt-India* Company. As to the Town of *Calcutta*, it is, to all Intents and Purpoſes, an eſtabliſhed Settlement, under an *Engliſh* civil Government, having a Mayor and Alderman, upon the Footing of our corporate Cities, and lately a ſupreme Court of Judicature has been introduced; and Judges nominated by the King, in Virtue of an Act of Parliament for the better Adminiſtration of Juſtice in the Company's Settlements in *India*, were ſent out, but from the Complaints lately exhibited againſt their Proceedings, it ſhould ſeem as if this new Regulation will not be permanent.

The next Place on the Continent *Southward* is *Merjee*, ſituated on the River *Tanacerin*, and ſubject to the King of *Siam*, where ſome *Engliſh* were formerly ſettled as private Merchants, for which Reaſon the Company inſiſting on their being turned away, and ſome Miſunderſtandings ariſing between their Meſſenger and the Natives on this Occaſion, ſeventy-ſix of our Countrymen were maſſacred; though the Affairs of the Company having ſince their Union been more prudently managed, and all Things carried on with the greateſt Regularity, a proper Proviſion is made for the Trade of the whole Gulf from the *Ganges'* Mouth to the

Extremity of the Peninſula of *Malacca*, without any extraordinary Expence of new Colonies.

Our Factories of *Mocho*, *Bantal*, *Cattoun*, *Bencoolen*, *Marlborough Fort*, and *Sillebar*, on the Iſland of *Sumatra*, are ſo well eſtabliſhed as to afford Room to ſuppoſe we enjoy the beſt Share in the Traffick of it; and we had formerly ſome Settlements on the Coaſts of *Cochin-China*, and in the Kingdom of *Tonquin*, though they have been ſince withdrawn; but an occaſional Trade is ſtill carried on there, more eſpecially to the Kingdom laſt mentioned.

Our Trade to *China* was once principally carried on at *Amoy*, but for many Years paſt *Canton* has had the Preference, and ſeems to have determined the Gentlemen at *Madras* entirely in its Favour, as the Impoſitions of the *Nandareens* at the former became intolerable, and forced them to reſolve on turning their Commerce into this different Channel.

The various Regulations made by the Legiſlature for ſettling the commercial Tranſactions of the Company, and the Adminiſtration of their civil and military Government in *India*, from the Year 1781, to the preſent Time, are of too extenſive a Nature to be inſerted at large in this Work; but the Subſtance of the whole may be reduced into a ſmall Compaſs.

Under the ſubſiſting Charter, the Commerce of the Company has increaſed beyond all former Example, and the Conduct of its political Concerns, ſubject to a Board of Control appointed by Government at home, promiſes greater Security and Permanency to the national Advantages derived from the excluſive Privileges granted to it. For the Number of Ships employed in this Trade has increaſed conſiderably of late Years; for Inſtance, in the Seaſon of 1787, twenty-nine Ships were laden in *China* for *England*, of the Burthen of 700 Tons upon an Average; and the ſame Number has been ſince conſigned to *India* from *London*; and nearly 19,000,000 *Pounds* of different Kinds of Teas, which conſtitute only one principal Article of their Commerce have been imported, inſtead of about 6,000,000, the uſual Amount before the Duties were lowered by the Commutation Act. Finally, the Liſt of Ships juſt publiſhed as engaged to be taken up, to be ſent out for the Seaſon of 1791 amounts to no leſs than *Thirty-four*; no greater Proof therefore, can be given of the proſperous and unrivalled Commerce of the *Britiſh Eaſt-India* Company.

The Company's Exports from hence are chiefly Bullion, of which the Proportion with the other Particulars of an outward-bound Cargo, I believe, is commonly from $\frac{5}{8}$ to $\frac{3}{4}$ Parts; the others conſiſting of Lead, Iron, Guns, Powder, Match, Cloths of various Colours, Serges, and other Stuffs, Cochineal, Quickſilver, Vermillion, rough Coral, Amber, *&c.*

And the Returns are, Pepper, Coffee, Tea, Incenſe, Salpetre, Terra Japonica, three Sorts of Lack, Indigo, Myrrh, Bezoa, Opoponax, Vitriol, Camphire, China Root, Sal Ammoniac, divers Gums, and Aloes, Galbanum, Galangals, Sagapenum, Rhubarb, Senna, Mirabolans, *Indian* Leaf, and many other Sorts of Drugs, Cowries, Red-Wood, Sandal, Cane, Tutenack, raw and wrought Silk, Callicoes, white and painted, Muſlins, Cotton Wool, and manufactured into a great Variety of Things for Wear, China, Japanned Cabinets, *&c.* Arrack, Diamonds, Pearls, and many Curioſities, unneceſſary to be numerated here; I ſhall therefore cloſe this Diſcourſe on our *Indian* Trade, with my ſincereſt Wiſhes for its conſtant Proſperity, as notwithſtanding the many ſpecious Arguments that have been uſed to the contrary, I muſt conſider it a general Benefit to the Nation.

And, in Purſuance of my Plan, I now proceed to treat of our *American* Trade, in which that granted to, and carried on by the *South Sea* Company, is firſt to be conſidered; I ſhall therefore mention the Occaſion of its original and ſhow the Uſes they have from Time to Time made of their Charter.

Of

Of the SOUTH SEA *Company*.

THIS Company, eſtabliſhed at the latter End of the ſeventeenth Century, was ſeemingly more with a political View of raiſing Money for the Government's Service than in Expectation of its carrying on any great Trade; as they had neglected every favourable Opportunity for attempting the Conqueſt of ſome Place in the Southern Parts of *America*, which might have ſecured the Means of extending a Commerce in which every Proſpect of Advantage muſt neceſſarily centre; but this Omiſſion, and its Conſequences, had rendered the Company's Stock ſo low in the Public's Eſteem, that it was at near 40 *per Cent*. Diſcount, when an unexpected Accident raiſed it to ſuch an imaginary Value as ſeemed the Effect of an Infatuation, only to be paralleled by the *Miſſiſſippi* Scheme that preceded it.

The *French Guinea* Company had contracted with *Philip* V. King of *Spain*, on his Mounting the Throne of that Monarchy, for the Introduction of Slaves into his *American* Dominions, and on this Agreement changed its former Name to that of the *Aſſiento* Company; and being ſuppoſed a very beneficial Contract, it was an Article of the Treaty of Peace at *Utrecht*, that this Contract ſhould be tranſlated to the *Engliſh*, and was accordingly ſigned at the Court of *Spain*, in *March* 1713, to continue thirty Years, under various Articles, which I excuſe giving, as they are now annulled, and in all Probability will never be renewed. It was in conſequence of this Contract that the Company eſtabliſhed Factories at *Porto Bello*, *Panama*, *Carthagena*, *Vera Cruz*, *Buenos Ayres*, &c. which continued till the late War diſlodged the Factors, and deſtroyed their Settlements.

The Company was obliged to furniſh the *Spaniſh* Colonies with four thouſand eight hundred Negroes yearly, though they might introduce more if they thought proper; and had Liberty to ſend an annual Ship of five hundred Tons, with Goods to be diſpoſed of there; in which, as well as in the Negro Contract, his Catholick Majeſty was a fourth Part concerned; but this Agreement found many Obſtacles to its Performance, and occaſioned divers Repreſentations to the Court of *Spain* before it could be carried into Execution; in Conſequence of which, ſeveral Articles were altered, and new ones added, previous to the performing any Part of it; and indeed during the Time it continued, Miſunderſtandings and Diſputes were continually ariſing, either about the Number of Negroes or Tonnage of the Ship; and when the late Rupture happened, it found many Particulars unſettled, and large Sums due from the Crown of *Spain* to the Company, which on the Return of Peace were lumped at 100,000*l*.

Much more might, and indeed ſhould, have been ſaid about this Aſſociation; but as their Trade is terminated, it would be ſuperfluous to enlarge concerning it in ſuch a Work as this: I therefore proceed, to give ſome Account

Of the HUDSON'S BAY *Company*.

THAT Part of the World, which gave Birth to this Company, owes its Diſcovery, as the *Engliſh* ſuppoſe, to the Diligence of that able Mariner, whoſe Name it bears, and who reaped no other Fruit of his Labours to diſcover a North Weſt Paſſage, than thus conveying to Poſterity a Record of his Capacity and Diligence, in which at laſt he periſhed. The *Danes* inſiſt on their prior Knowledge of this Part of *America*. But not to enter into a Detail of the Diſpute, nor enlarge on the hiſtorical Accounts of it, I ſhall content myſelf with informing my Reader, that though the Expectations of an advantageous Trade might reaſonably have encouraged its being ſooner engaged in, yet it was the Year 1681 before any tolerable Progreſs was made in it; and on the 2d of *May* an excluſive Charter was granted by King *Charles* II. in the 32d Year of his Reign, to Prince *Rupert* and his Aſſociates, which eſtabliſhed this Branch of Trade on the ſolid Footing it has continued ever ſince; though not without various Interruptions by the *French*, who, jealous of ſuch Neighbours to their *Canada* Settlements, have frequently driven the *Engliſh* from their's; and this Conteſt, which continued ſeveral Years, made them alternately Maſters of the Bay, till it was finally determined by the Treaty of *Utrecht* in our Countrymen's Favour, who have now ſeveral Forts and Factors ſettled there, notwithſtanding the extreme Cold, which is ſo intenſe as to confine

them for ſeven or eight Months in the Year to their Houſes; though they have good Proviſions in this recluſe Life, with the Pleaſures of Hunting and Fiſhing in Reverſion, to which in Summer-Time the Elements of Earth, Air, and Water, contribute in ſuch Plenty as would be hardly credited under a leſs Authority than that of many Eye-Witneſſes, who have aſſured us of it; though this Country furniſhes nothing for the Support of Trade but Furs of various Sorts, and Iſinglaſs, the latter made here by the Company's Servants from the Skins of Fiſhes; but the former are ſo rich, and both ſo plenty, as to have raiſed the Value of this Company's Funds above thoſe of any other.

The Commodities they truck with the *Indians* for their Furs, are Arms, Powder, Balls, Kettles, Hatchets, Knives, Sword-Blades, Awls, Fiſh-Hooks, Steels, and Flints, blue Serge Cloaks, Shirts, Stockings, Tobacco, coarſe Thread for Nets, and ditto of divers Colours for Sewing, Glaſs Beads, Pins, Needles, &c. which as I before obſerved, procure ſuch Returns as have greatly enriched the Proprietors of them.

And having mentioned the Settlements of our trading Companies, I ſhall in the next Place treat of our *American* Colonies, of which we have the moſt extenſive and flouriſhing of any Potentate, the *Spaniards* only excepted; as, beſides our Iſles, we poſſeſs an uninterrupted Line of Sea Coaſt from the Gulf of *Mexico*, Northward up to *Hudſon's Bay*.

Of the General Commerce of AMERICA, *with* GREAT-BRITAIN *and other* NATIONS.

THE total Alienation of the Thirteen Provinces of *North America* from the *Britiſh* Empire, by a formal Renunciation of all Claim of Dominion over and Property in them; by an Act of Parliament paſſed in the Spring of the Year 1783; and the final Ratification of the Independence of thoſe Provinces, by the following Treaty, produced the greateſt Revolution in Commerce, which had been experienced by *Great-Britain*, from the era of her original great commercial Eſtabliſhments on the Continent of *North America* in the Reigns of Queen *Elizabeth*, and King *James* I. to the preſent Time. For which Reaſon, we not only inſert in this Place, an exact Copy of the ſaid Treaty, but annex to it, a conciſe Account of the Changes, and Conſequences reſulting from it.

The Definitive Treaty of Peace and Friendſhip between his Britannic *Majeſty, and the* United States *of* America.

ART. I. His *Britannic* Majeſty acknowledges the ſaid *United States, viz. New Hampſhire, Maſſachuſet's-Bay, Rhode Iſland and Providence Plantations, Connecticut, New York, New Jerſey, Pennſylvania, Delaware, Maryland, Virginia, North Carolina, South Carolina*, and *Georgia*, to be free ſovereign and independent States; that he treats with them as ſuch; and for himſelf, his Heirs and Succeſſors, relinquiſhes all Claims to the Government, Propriety, and territorial Rights of the ſame.

ART. II. And that all Diſputes which might ariſe in future, on the Subject of the Boundaries of the ſaid *United States* may be prevented, it is hereby agreed and declared, that the following are and ſhall be their Boundaries, *viz.* from the north-weſt Angle of *Nova Scotia*, to that Angle which is formed by a Line drawn due North, from the Source of *St. Croix* River to the Highlands, along the ſaid Highlands, which divide thoſe Rivers that empty themſelves into the River *St. Lawrence*, from thoſe which fall into the *Atlantic Ocean*, to the north-weſternmoſt Head of *Connecticut* River; thence down along the Middle of that River, to the 45th Degree of north Latitude; from thence by a Line due Weſt on that Latitude, until it ſtrikes the River *Iroquois* or *Cateraguy*; thence along the Middle of the ſaid River into the Lake *Ontario*, through the Middle of that Lake, until it ſtrikes the Communication between the ſaid Lake and the Lake *Erie*: Thence along the Middle of that Communication into Lake *Erie*, through

the Middle of the ſaid Lake, until it arrives at the Water-Communication between that Lake and Lake *Huron*: Thence along the Middle of the ſaid Water-Communication: Thence through the Middle of the ſaid Lake to the Water-Communication between that Lake and Lake *Superior:* Thence through Lake *Superior*, Northward of the Iſles *Royal* and *Phillipeaux*, to the *Long Lake:* Thence through the Middle of the ſaid *Long Lake*, and the Water-Communication between it and the *Lake of the Woods*, to the ſaid *Lake of the Woods:* Thence through the ſaid Lake to the moſt north-weſtern Point of it; and from thence in a due weſt Courſe to the River *Miſſiſſippi:* Thence by a Line to be drawn along the Middle of the ſaid River *Miſſiſſippi*, until it ſhall interſect the northernmoſt Part of the 31ſt Degree of north Latitude.

South, by a Line to be drawn due Eaſt, from the Termination of the Line laſt mentioned, in the Latitude of 31 Degrees North of the Equator, to the Middle of the River *Apalachicola*, or *Catahouche*. Thence along the Middle thereof, to its Junction with the River *Flint:* Thence ſtrait to the Head of *St. Mary's River*; and thence down along the Middle of *St. Mary's River* to the *Atlantic Ocean*.

Eaſt, by a Line to be drawn along the Middle of the River *St. Croix*, from its Mouth in the Bay of *Fundy*, to its Source; and from its Source, directly North to the ſaid Highlands, which divide the Rivers that fall into the *Atlantic Ocean*, from thoſe which fall into the River *St. Lawrence*; comprehending all Iſlands within twenty Leagues of any Part of the Shore of the *United States*, and lying between the Lines to be drawn due Eaſt from the Points where the ſaid Boundaries between *Nova Scotia* on the one Part, and *Eaſt Florida* on the other, ſhall reſpectively touch the Bay of *Fundy*, and the *Atlantic Ocean*; excepting ſuch Iſlands as now are, or heretofore have been, within the Limits of the ſaid Province of *Nova Scotia*.

ART. III. It is agreed, that the People of the *United States* ſhall continue to enjoy, unmoleſted, the Right to take Fiſh of every Kind on the grand Bank, and on all the other Banks of *Newfoundland:* Alſo in the Gulph of *St. Lawrence*, and at all other Places in the Sea, where the Inhabitants of both Countries uſed at any Time heretofore to Fiſh. And alſo, that the Inhabitants of the *United States* ſhall have Liberty to take Fiſh of every Kind on ſuch Part of the Coaſt of *Newfoundland* as *Britiſh* Fiſhermen ſhall uſe, but not to dry or cure the ſame on that Iſland; and alſo on the Coaſts, Bays and Creeks, of all other of his Britannic Majeſty's Dominions in *America*; and that the *American* Fiſhermen ſhall have Liberty to dry and cure Fiſh in any of the unſettled Bays, Harbours and Creeks of *Nova Scotia*, *Magdalen Iſlands*, and *Labrador*, ſo long as the ſame ſhall remain unſettled; but ſo ſoon as the ſame, or either of them, ſhall be ſettled, it ſhall not be lawful for the ſaid Fiſhermen to dry or cure Fiſh at ſuch Settlement, without a previous Agreement for that Purpoſe with the Inhabitants, Proprietors, or Poſſeſſors of the Ground.

ART. IV. It is agreed, that Creditors on either Side ſhall meet with no lawful Impediment to the Recovery of the full Value, in Sterling Money, of all *bona Fide* Debts heretofore contracted.

ART. V. It is agreed, that the Congreſs ſhall earneſtly recommend to the Legiſlatures of the reſpective *States*, to provide for the Reſtitution of all Eſtates, Rights, and Properties, which have been confiſcated, belonging to real *Britiſh* Subjects; and alſo of the Eſtates, Rights, and Properties, of Perſons reſident in Diſtricts in the Poſſeſſion of his Majeſty's Arms, and who have not borne Arms againſt the ſaid *United States*; and that Perſons of any other Deſcription ſhall have free Liberty to go to any Part or Parts of any of the *Thirteen United States*, and therein to remain *twelve* Months, unmoleſted in their Endeavours to obtain the Reſtitution of ſuch of their Eſtate, Rights, and Properties, as may have been confiſcated; and that Congreſs ſhall alſo earneſtly recommend to the ſeveral *States*, a Reconſideration and Reviſion of all Acts or Laws regarding the Premiſes, ſo as to render the ſaid Laws perfectly conſiſtent not only with Juſtice and Equity, but with that Spirit of Conciliation which, on the Return of the Bleſſings of Peace, ſhould univerſally prevail. And that Congreſs ſhall alſo earneſtly recommend to the ſeveral *States*, that the Eſtates, Rights and Properties, of ſuch

laſt-mentioned Perſons ſhall be reſtored to them, they refunding to any Perſons who may now be in Poſſeſſion of them, the *bona Fide* Price, where any has been given which ſuch Perſons may have paid on purchaſing any of the ſaid Lands, Rights, or Properties, ſince the Confiſcation.

And it is agreed, that all Perſons who have any Intereſt in confiſcated Lands, either by Debts, Marriage Settlements, or otherwiſe, ſhall meet with no lawful Impediment in the Proſecution of their juſt Rights.

ART. VI. There ſhall be no future Confiſcations made, nor any Proſecution commenced againſt any Perſon or Perſons, for or by Reaſon of the Part which he or they may have taken in the preſent War; and that no Perſon ſhall, on that Account, ſuffer any further Loſs or Damage, either in his Perſon, Liberty, or Property; and that thoſe who may be in Confinement on ſuch Charges at the Time of the Ratification of this Treaty in *America*, ſhall be immediately ſet at Liberty, and the Proſecution ſo commenced be diſcontinued.

ART. VII. There ſhall be a firm and perpetual Peace between his *Britannic* Majeſty and the ſaid *States*, and between the Subjects of the one, and the Citizens of the other, therefore, all Hoſtilities, both by Sea and Land, ſhall from henceforth ceaſe: All Priſoners on both Sides ſhall be ſet at Liberty, and his *Britannic* Majeſty ſhall, with all convenient Speed, and without cauſing any Deſtruction, or carrying away any Negroes, or other Property of the *American* Inhabitants, withdraw all his Armies, Garriſons, and Fleets, from the ſaid *United States*, and from every Port, Place, and Harbour within the ſame; leaving in all Fortifications, the *American* Artillery that may be therein: And ſhall alſo order and cauſe all Archives, Records, Deeds, and Papers, belonging to any of the ſaid *States*, or their Citizens, which in the Courſe of the War, may have fallen into the Hands of his Officers, to be forthwith reſtored and delivered to the proper *States* and Perſons to whom they belong.

ART. VIII. The Navigation of the River *Miſſiſſippi*, from its Source to the Ocean, ſhall for ever remain free and open to the Subjects of *Great-Britain*, and to the Citizens of the *United States*.

ART. IX. In Caſe it ſhould ſo happen, that any Place or Territory belonging to *Great-Britain*, or to the *United States*, ſhould have been conquered by the Arms of either from the other, before the Arrival of the ſaid proviſional Articles in *America*, it is agreed, that the ſame ſhall be reſtored without Difficulty, and without requiring any Compenſation.

ART. X. The ſolemn Ratifications of the preſent Treaty, expedited in good and due Form, ſhall be exchanged between the contracting Parties in the Space of ſix Months, or ſooner if poſſible, to be computed from the Day of the Signature of the preſent Treaty.

In Witneſs whereof, we, the under-ſigned Miniſters Plenipotentiary, have, in their Names, and in Virtue of our full Powers, ſigned with our Hands the preſent Definitive Treaty, and cauſed the Seals of our Arms to be affixed thereto.

Done at *Paris*, this 3d Day of *September*, 1783.

(L. S.) D. HARTLEY,
(L. S.) JOHN ADAMS,
(L. S.) B. FRANKLIN,
(L. S.) JOHN JAY.

The grand commercial Alteration produced by this Treaty was the throwing open the foreign Trade of the *Thirteen Provinces*, which had been before confined ſolely to *Great-Britain*, to all the other Nations of the known World; and the Conſequence that immediately enſued was, ſeparate Treaties of Commerce between the ſaid *United States*, and ſome of the moſt conſiderable maritime and commercial Powers of Europe. *France* had ſet the Example, prior to the Peace, *Spain* had followed; and afterwards *Holland*, *Sweden*, *Pruſſia*, *Denmark*, and *Ruſſia*; our famous navigation Act, in the elegant Language of *Edmund Burke*, was thereby almoſt frittered away; and the only Remedy left, was to rely on the Wiſdom of Parliament, in framing ſuch commercial Laws and Regulations for renewing the Intercourſe

Intercourſe with the aforeſaid *diſmembered* Colonies, as ſhould be beſt calculated to throw as much of the Trade of the *United States*, as poſſible, into the old Channel; and this was accordingly done without Loſs of Time, and what is more remarkable ſtill, without any formal Treaty of Commerce between the two Parties; for at the Date of Writing this Article for the Preſs, no ſuch Treaty ſubſiſts, though repeated Efforts have been made to accompliſh it.

23 *Geo.* III. C. 39. Two ſhort Bills were paſſed, one to repeal all the prohibitory Acts, which had totally put a Stop to any Intercourſe between the two Countries; the other to prevent the Cuſtom-Houſes of *Great-Britain* requiring *American* Veſſels to produce certain Inſtruments, as Manifeſtoes and other particular Papers, on their Arrival from any of the Ports of the now *United States*, at any Port of *Great-Britain*; and to veſt in the King and Council, for a limited Time, full Powers to make ſuch other Regulations as ſhould be judged expedient.

By the ſecond Act, likewiſe, the Ships of the Citizens of the *United State*, with the Merchandizes and Goods on board the ſame, are to be admitted into all the Ports of *Great-Britain*, in the ſame Manner as the Ships and Veſſels of the Subjects of other independent ſovereign States; and the Merchandizes and Goods on board ſuch Ships or Veſſels of the Subjects or Citizens of the ſaid *United States*, being of the Growth, Produce or Manufacture, of the ſaid *United States*, ſhall be liable to the ſame Duties and Charges *only*, as the ſame Merchandizes and Goods would be ſubject to, if they were the Property of *Britiſh* Subjects, and imported in *Britiſh*-built Ships or Veſſels, navigated by *Britiſh* natural-born Subjects.

This Privilege by another Clauſe is extended to the *Britiſh* Colonies in *America*, thereby eſtabliſhing a free commercial Intercourſe between the Subjects of *Great-Britain* in thoſe Colonies, and the Subjects and Citizens of the *United States*.

The ſame Drawbacks, Exemptions and Bounties on the Exportation of Merchandizes and Goods from *Great-Britain*, to the Territories of the United States, are granted to them; as are allowed on Exportation of the ſame Articles to the Iſlands, Plantations or Colonies, now remaining or belonging to the Crown of *Great-Britain* in *America*.

Theſe Acts were followed by an Order of Council dated at the Court of *St. James's* the 26th *December*, 1783; by which unmanufactured Goods or Merchandizes of the Growth or Production of any of the United States of *America*, the Importation of which is not prohibited by Law, may be imported directly from thence into *Great-Britain*, either in *Britiſh* or *American* Ships, by the Subjects, or Inhabitants of either Country, on the Payment of the ſame Duties, as they are liable to, if imported by *Britiſh* Subjects, in *Britiſh* Ships only, and from the Colonies and Plantations in *America* belonging to the King of *Great-Britain*.

By the ſame Order of Council, Tobacco is allowed to be imported in Ships belonging to the ſaid United States, and a Payment of the Duties to be lodged in the King's Warehouſes in the Ports of *London*, *Briſtol*, *Liverpool*, *Cowes*, *Whitehaven*, *Greenock*, and Port *Glaſgow*, in Order to be taken from thence, ſubject to the Regulations of the Acts of Parliament in Force, reſpect the warehouſing of Tobacco, to be exported to other Countries.

And in Order to facilitate the carrying on Trade and Commerce between the People and Territories belonging to the Crown of *Great-Britain* in the *Weſt-Indies*, including in that Deſcription the *Bahama Iſlands*, and the *Bermuda* or *Somers Iſlands*; and the People and Territories belonging to the ſaid United States of *America*; his Majeſty is hereby farther pleaſed to order, that Pitch, Tar, Turpentine, Hemp, Flax, Maſts, Yards and Bowſprits, Staves, Heading-Boards, Timber, Shingles, and all other Species of Lumber: Horſes, Neat-Cattle, Sheep, Hogs, Poultry, and all other Species of live Stock and live Proviſions: Peas, Beans, Potatoes, Wheat, Flour, Bread, Biſcuit, Rice, Oats, Barley, and all other Species of Grain, being the Growth or Production of any of the ſaid United States of *America*, may, until farther Order, be *Imported* by *Britiſh* Subjects, in *Britiſh-built* Ships, owned by his Majeſty's Subjects, and navigated according to Law, from any Port of the ſaid United States in *America*, to any of his Majeſty's *Weſt-India Iſlands*, the *Bahama Iſlands*, and the *Bermuda* or *Somers Iſlands*; and that Rum, Sugar, Melaſſes,

Melaſſes, Coffee, Cocoa-Nuts, Ginger, and Pimento may, until ſuch Order, be *Exported* by *Britiſh* Subjects, in *Britiſh-built* Ships, owned by his Majeſty's Subjects, and navigated according to Law, from any of the ſaid Iſlands, to any Port or Place within the ſaid United States, upon Payment of the ſame Duties on Exportation, and ſubject to the like Rules, Regulations and Securities, as the ſame Articles by Law, are or may be ſubject and liable to, if exported to any *Britiſh* Colony or Plantation in *America*; and the Bonds and Securities heretofore required to be taken for ſuch Ships carrying ſuch Goods, ſhall and may be cancelled and diſcharged, upon the like Certificates as are required by the above recited Act to diſcharge any Bond given in *Great-Britain* for the due landing any other Goods in the ſaid United States of *America*.

In the Seſſion of Parliament of 1784, the Act before recited was continued, and has been renewed in the ſame Manner annually, to the preſent Year 1791.

Another Act paſſed to confine for a limited Time, the Trade between the Ports of the United States of *America*, and his Majeſty's Subjects in the Iſland of *Newfoundland*, to Bread, Flour, and live Stock, to be Imported in *none* but *Britiſh-built* Ships, owned by *Britiſh* Subiects and navigated according to Law; clearing out from the Ports of his Majeſty's *European* Dominions, and furniſhed with a Licence according to a Form thereunto annexed; and already given in a former Part of this Work. 25 *Geo.* III. C. 5. 1785.

Continues the Act above recited with theſe Additions: Goods imported into *Newfoundland* contrary to this Act ſhall be forfeited; and no Licenſe ſhall be granted to any Ship to carry on the ſaid Trade after the 30th of *June*, 1787. 26 *Geo.* III. C. I. S. 5.

The preceding Acts being continued to *April* 5th 1789; it is further enacted: that Iron, Hemp, Sail-Cloth, or other Articles, the Produce of any Place bordering on the *Baltic* Sea, which may be exported from *Great-Britain*, if exported contrary to Law; or Goods Imported from the Territories of the United States of *America*, into *Great-Britain*, not being ſuch as are permitted by Law to be Imported, ſhall be forfeited. 28 *Geo.* III. C. 5. S. 2.

Theſe are the preſent ſubſiſting Laws reſpecting our Commerce with the new States of *America*; and they have been found ſufficient to promote a beneficial, increaſing Return of Trade in Favour of *Great-Britain*, without any Commercial Treaty; and againſt the Expediency of making ſuch a Treaty, that excellent and correct Writer and Calculator on the commercial Affairs of *Great-Britain* and *Ireland*, and of their Trade with the *American* States, *John* Lord *Sheffield*, one of the Repreſentatives in the preſent Parliament for *Briſtol*, to whom the Editor acknowledges himſelf greatly indebted for much valuable Information, and ſome authentic Materials for the Improvement of this Work, offers the following weighty Objections.

" It is plainly impoſſible to make a Commercial Treaty with the *American States*, without giving them ſome valuable Privilege, for which they have precluded themſelves from making an adequate Return. The Treaty of Peace, and ſubſequent Acts, opened the Ports of *Great-Britain* and *Ireland* to them, in the ſame Manner as their Ports were opened to us, when they repealed their reſtraining Laws. A briſk Trade has already begun, and it is unneceſſary to prove on which Side the Advantage is, between the Traders who aſk for Credit, or the Traders who give it.

" If the *American States* had any Thing to grant by any Kind of Commercial Treaty, it may be well doubted, whether they would keep it farther than ſuited their Convenience. Beſides; what was foretold in the firſt Edition of this Work *, has now actually happened. Every Account from *America* ſays, that *Britiſh* Manufactures are ſelling at a conſiderable Profit, while other *European* Goods cannot obtain the firſt Coſt. Every Day's Experience ſhews that this Country, from the Nature and Quality of its Manufactures, and from the Aſcendancy it has acquired in Commerce, will command at leaſt *three Fourths* of the *American* Trade. The *American* Merchants ſollicit a Correſpondence, and beg

* Obſervations on the Commerce of the *American* States, By *John* Lord *Sheffield*, with an Appendix containing Tables of the Imports and Exports of *Great-Britain* to and from all Parts from 1700, to 1783 &c. The Sixth Edition. *London* 1784.

for Credit, becauſe, while they feel their own Want of Capital, they know that our Traders are more liberal, and our Goods cheaper and better than any other in *Europe*. And the only Danger is, not that the *American* Merchants will aſk for too few Manufactures, but that they will obtain too many".

Ournoble Author, then ſtates the Riſk of giving an extenſive Credit to the People of the *United States*, who being impoveriſhed by an expenſive War, which has bequeathed them many Taxes to pay, will not be punctual in their Remittances at a Time, when they are aſſociating againſt the Payment of old Debts. But this well-grounded Objection in 1784, when his Work was publiſhed, has been ſince happily removed, by an equitable Change in the Conduct of the *United States*; for having reſcinded their former Reſolutions, they have lately made large Remittances on Account of old Debts; and have reſtored ſeveral confiſcated Eſtates to Loyaliſts, the original Owners, upon their refunding the inconſiderable Sums paid for them by the new Purchaſers. Upon the whole therefore, it appears evident, that in the preſent State of our Commerce with the ſaid *United States*, we derive more real Profit from them, than while they were ſubject to the Crown of *Great-Britain*. And Lord *Sheffield* ſupports this Opinion, by the moſt convincing Arguments and Facts, which we take the Liberty to inſert in this Place, becauſe they may ſerve as a Guide to mercantile Legiſlation, with Reſpect to ſimilar Caſes, that may ariſe if Difficulties and Diſagreements ſhould hereafter occur concerning other Foreign Settlements and Plantations belonging to the *Britiſh* Empire.

" Let Conſiderations of Advantage and Protection hereafter go Hand in Hand together. In moſt Caſes, the Expence of Protection and civil Government is much greater than the Prevention of Competition is worth. The ſuperior State of *Britiſh* Manufactures in general, does not require other Means of Monopoly than what their Superiority and Cheapneſs will give. If we have not purchaſed our Experience ſufficiently dear, let us derive a Leſſon of Wiſdom from the Misfortunes of other Nations, who like us, purſued the Phantom of Foreign Conqueſt and diſtant Colonization, and who, in the End, found themſelves leſs populous, opulent, and powerful.

" By the War of 1739, which may be truly called an *American* Conteſt, we incurred a Debt of upwards of - - - - - £. 31,000,000
" By the War of 1755, a further Debt of - - - 71,500,000
" And by the War of the Revolt, nearly - - - - 100,000,000

Total £. 202,500,000

"And thus have we expended a larger Sum in defending and retaining our Colonies, than the Value of all the Merchandiſe which we have ever ſent them: we have in a great Meaſure, diſburſed this enormous Sum, to ſecure the Poſſeſſion of a Country which yielded us no Revenue, and whoſe Commerce called for but 1,655,902*l.* of the Manufactures of *Britain*, taking the Average of four Years, from 1767, to 1770; ſo egregious has our Impolicy been in rearing Colonies for the Sake of their Cuſtom."

Finally, for the Satisfaction of *Britiſh* Merchants, and of all Perſons intereſted in, or wiſhing well to the Trade and Navigation of *Great-Britain*, we add, from a comparative View of authentic Records, that at the Commencement of the Year 1788, Our general Imports and Exports from and to all Ports of the World, exceeded by ſome Millions, the Amount of any preceding Year, during the preſent Century.

The Imports for the Year 1787, amounting, by the declared Value at the Cuſtom-Houſe to - - - - - £. 17,804,024 : 16 : 1

The *Exports* for the ſame Year to - - - 18,296,166 : 12 : 11

After

After this ample Statement of the Conſequences of the *American* Revolution, we proceed, according to the original Plan of our Author *Wyndham Beawes*, with the civil and commercial Hiſtory of the ſeveral Provinces of *America*; their Growth and Product, &c. beginning with the Southernmoſt.

Of GEORGIA.

THIS Settlement lies in the Bounds of *Carolina*, as deſcribed in their Charter; but having long remained unſettled, the worthy Projectors of the *Georgia* Eſtabliſhment fixt on this Spot as a proper one for their benevolent Intentions of relieving the Diſtreſſes of their fellow Creatures, and at the ſame Time to make their Relief turn to a publick Advantage. It was with theſe generous Views, that a Set of Gentlemen ſollicited his late Majeſty King *George* II. for a grant of the uncultivated Lands afore-mentioned, with a free Conſent of the *Carolinians*, to whom this Tract was rather a Burthen than a Benefit, and from whoſe Settlement they expected to reap both Security and Advantage. His Majeſty, always ready to promote the Good of his Subjects, was graciouſly pleaſed to condeſcend to their Requeſt, and by his Letters Patent, bearing Date the 9th of *June*, 1732, did conſtitute the Petitioners a Corporation, by the Name of *The Truſtees for eſtabliſhing the Colony of* Georgia *in* America; with Capacity to purchaſe and take Lands, to ſue and be ſued, &c. with the reſtraining Clauſes, that no Member of the ſaid Corporation ſhould have any Salary, Fee, Perquiſite, Benefit, or Profit whatſoever, for acting therein, or ſhould have any Office, Place, or Employment of Profit whatſoever under the ſaid Corporation, &c. They had likewiſe a Power to make By-Laws, &c. And, amongſt other Things, there was granted to the ſaid Corporation and their Succeſſors, under the Reſervations therein mentioned, ſeven undivided Parts, the whole to be divided into eight equal Parts, of all thoſe Lands, Countries, Territories, ſituate, lying, and being, in that Part of *South Carolina*, in *America*, which lies from the northernmoſt Stream of a River there, called the *Savannah*, along the Sea Coaſt to the Southward, unto the moſt Southern Stream of a certain great other Water or River, called the *Alatamahah*; and Weſtward from the Head of the ſaid Rivers, reſpectively in direct Lines to the *South Seas*: To have and to hold the ſame to them, &c. for ever, for the better Support of the ſaid Colony, under the yearly Rent of four Shillings Proclamation-Money of *South Carolina*, for every hundred Acres of the ſaid Lands, for every of which the ſaid Corporation ſhall grant, demiſe, plant, or ſettle; but not to commence until ten Years after ſuch Grant, Demiſe, Planting, or Settling; and erected and created the ſaid Lands, Countries, and Territories, into one independent and ſeparate Province, by the Name of *Georgia*; and made the Inhabitants who ſhall reſide therein, free, and not ſubject to any of the Laws, Orders, Statutes, or Conſtitutions of *South Carolina*, except the Commander in Chief of the *Militia*; and authorized the ſaid Corporation, for the Term of twenty-five Years from the Date of the ſaid Letters Patent, to form and prepare Laws, Statutes, or Ordinances, for the Government of the ſaid Colony not repugnant to the Laws and Statutes of *England*; to be preſented under their common Seal to his Majeſty in Council, for his Approbation or Diſallowance; and that the ſaid Laws ſo approved of, ſhould be in full Force and Virtue within the ſaid Province. The Council for the Time being of the ſaid Corporation were likewiſe impowered to apply their Money, make Contracts, &c. to appoint Officers and Servants, removable at Pleaſure; that they might tranſport and convey into the ſaid Province ſuch of his Majeſty's Subjects and Foreigners, as are willing to go and inhabit there; and declared all Perſons born within the ſaid Province, and their Poſterity, to be free Denizens as if they had been born in any of his Majeſty's Dominions. The ſaid Corporation had likewiſe Power to aſſign, transfer, and ſet over, ſuch particular Portions of the ſaid Lands, Tenements, and Hereditaments, unto ſuch of his Majeſty's Subjects and others, willing to live in the ſaid Colony, upon ſuch Terms, and for ſuch Eſtates, and upon ſuch Rents, Reſervations, and Conditions, as the ſame might lawfully be granted, and as to the ſaid Common Council ſhould ſeem fit and proper; provided no Grant ſhould be made of any Part of the ſaid Lands, unto, or in Truſt for, or for the

Benefit of, any Member of the ſaid Corporation; and that no greater Quantity of the ſaid Lands be granted, either entirely or in Parcels, to, or to the Uſe of, or in Truſt for, any one Perſon, than five hundred Acres; and declared, that all Grants made contrary to the true Intent and Meaning thereof, ſhould be abſolutely null and void. And granted, that the ſaid Corporation, for the Term of twenty-one Years from the Date of the ſaid Letters Patent, ſhould have Power to erect and conſtitute Judicatures and Courts of Record, or other Courts, to be held in his Majeſty's Name, for the Hearing and Determining all Manner of Crimes, Offences, Pleas, *&c.* And it is directed, that all Rents, Iſſues, or Profits, which ſhould come to the ſaid Corporation, iſſuing or ariſing out of or from the ſaid Province, ſhould be laid out and applied in ſuch Manner as would moſt improve and enlarge the ſaid Colony, *&c.* And directed, that the ſaid Common Council ſhould from Time to Time, for the ſaid Term of twenty-one Years, have Power to appoint all ſuch Governors, Judges, Magiſtrates, Miniſters, and Officers, civil and military, both by Sea and Land, within the ſaid Diſtrict, as they ſhould think fit and needful for the Government of the ſaid Colony; except ſuch Officers as ſhould be appointed for managing, collecting, and receiving ſuch of his Majeſty's Revenues as ſhould ariſe within the ſaid Province; with a Proviſo, that every Governor ſo appointed, ſhould be approved of by his Majeſty, and qualify himſelf as other Governors in *America* are by Law required to do, *&c.* And they have Power to train the Militia, erect Forts, *&c.* And that they ſhall have Power to import or export their Goods at or from any Ports that ſhould be appointed by his Majeſty, within the ſaid Province, without being obliged to touch at any other Port in *South Carolina*; and declared, that after the End of the ſaid twenty-one Years, ſuch Form of Government, and making of Laws and Statutes, and Ordinances for the Government of the ſaid Province and its Inhabitants, ſhould be eſtabliſhed and obſerved within the ſame, as his Majeſty, his Heirs, and Succeſſors ſhould ordain and appoint, agreeable to Law; and that after the End of the ſaid twenty-one Years, the Governor, and all Officers civil and military within the ſaid Province, ſhould be appointed by his Majeſty, his Heirs, and Succeſſors.

In Conſequence of this extenſive Charter, many Nobles and Men of Fortune undertook, in Quality of Truſtees, to carry the Deſign into Execution, and had, as the Object of their firſt Care, the obtaining a ſufficient Fund for enabling them to ſend over a conſiderable Body of People, and to provide them with all Kinds of Neceſſaries; to which they liberally ſubſcribed themſelves, obtained conſiderable Sums by Collection from Perſons who were charitably diſpoſed, to forward the Settlement, and, beſides, procured a Donation from Parliament of 10,000*l.*

The propereſt Method was alſo ſtudied in making this Settlement, that it might both anſwer the intended Ends of their being ſent thither, and alſo contribute as much to the publick Utility as poſſible; in Order whereto, every Individual was regarded as a Planter and Soldier, and accordingly furniſhed with Arms for Defence, and Tools for his Huſbandry, whoſe Uſe and Exerciſe was alſo taught him: It was alſo reſolved, that Towns ſhould be planned, and Lands appointed for the Subſiſtance and Conveniency of the Settler, and theſe be held in Tail-Male, as the propereſt Tenure in this infant Colony. The Introduction of Negroes was alſo prohibited for many Reaſons. And after theſe Diſpoſitions were made, and the Truſtees enabled by publick and private Benefactions, one hundred and fourteen Souls, Men, Women, and Children, embarked with *James Oglethorpe*, Eſq. one of the Truſtees, in *November*, 1732, and ſailed for *Carolina*, where they arrived on the 25th of *January* following; and being aſſiſted by the Governor of *Charles-Town*, and other kind Gentlemen, a Town was marked out, and the firſt Houſe begun, ten Miles up the River *Savannah*, on the 9th of *February*; after which Mr. *Oglethorpe* procured all the Aſſiſtance and Neceſſaries he could for his young Colony, ſowed and planted a Quantity of Corn, Herbage, and Fruit, made a Treaty with the *Indians*, and then returned *England*, in Order to continue his good Offices by procuring the neceſſary Supplies to be ſent to this Object of his Care; and arrived in Safety, in *June*, 1734, accompanied by ſeveral of the *Indian* Kings and Chiefs, who were endeared to our Countrymen by the kind Uſage ſhewn them here.

Mr. *Oglethorpe* again embarked, and on the 6th of *February*, 1735, arrived with four hundred and ſeventy Perſons, who were ſettled on the Iſland of *St. Simon*; and in the preceding Month a Parcel of *Scotch* Highlanders were got there, and eſtabliſhed up the River *Alatamaha*, about ſixteen Miles diſtant from the aforeſaid Iſle; they both built Towns, the *Engliſh* calling their's *Frederica*, and the *Scots*, *New Inverneſs*: Roads of Communication were made between the Towns of the *Britiſh* Adventurers and the *Indians*, and both the North and South Frontiers were not only ſecured by Fortifications, but alſo by an amicable Treaty, concluded with the *Spaniards of St. Auguſtin*, which, however, was diſapproved of by their Court; and the Governors of *Cuba* and *Spaniſh Florida* had Directions to prepare ſuch a Force as they imagined would be ſufficient to deſtroy our Settlements, as well as in *Carolina* as *Georgia*; to prevent which, his Majeſty was graciouſly pleaſed to order a Regiment of ſix hundred effective Men to be ſent to *Georgia* for its Defence and Protection, and the Truſtees allotted each one of them a Parcel of Land to encourage their good Behaviour.

The Parliament alſo now granted them 20,000*l.* and 26,000*l.* at ſundry Times afterwards, for their further Aſſiſtance, which enabled the Truſtees to make another Embarkation, and with theſe repeated Augmentations of People, the Town laid out in this new Colony began to flouriſh. Mr. *Oglethorpe* was appointed Colonel of the aforeſaid Regiment; and no one could have been more proper for the Command than he, who only uſed his Authority and Care, to protect that Settlement, which with ſo much Fatigue and Aſſiduity he had planted; but this Reinforcement did not induce him to abate any Thing of that Diſcipline he had always obſerved, but he continued to train his Militia, with the ſame Exerciſe and Regularity he had before uſed them to, and, diſregarding the Dangers he run, and the Inconveniences he ſuffered by travelling in an almoſt unknown, uninhabited, and conſequently an uncultivated Country, he undertook a Journey of five hundred Miles from *Frederica*, purely to increaſe the Services he had already rendered the Colonies of *Carolina* and *Georgia*, by concluding a new Treaty with the *Indians*, and thereby confirming them in the *Engliſh* Intereſt, at a Time when the *French* were uſing their utmoſt Efforts to draw them off from it; thus, to advance and ſecure the Happineſs of others, did this worthy Man, with unwearied Diligence, expoſe himſelf to Hazards and Toils, that would have proved unſurmountable to one of a leſs enterprizing Genius and ſteady Reſolution; but theſe enabled him to go through even ſuch a comfortleſs and tireſome Expedition, as this now mentioned.

The Number of People ſettled in *Georgia* in the firſt eight Years was upwards of two thouſand, which under Mr. *Oglethorpe's* prudent Conduct, in Obedience to the wiſe Regulations and Diſpoſitions of the Truſtees, had now acquired Strength ſufficient to defend themſelves, as they were ſoon obliged to prove; for the War, kindled here with the *Spaniards*, in 1739, ſoon blazed out in *America*, where General *Oglethorpe*, having with all the other Governors in that Country received his Majeſty's Orders to annoy the *Spaniards* as much as they could, agreed on an Expedition againſt them at *St. Auguſtine*, in Conjunction with the Forces of *Carolina*; and though the Plan of their Operations ſeemed to be well concerted, it unfortunately miſcarried with the Loſs of many Men and much Money. The *Spaniards* in Return paid them a Viſit in the Beginning of *June*, 1742, but met a ſignal Repulſe from the *Engliſh*; for though their Force conſiſted of fifty-ſix Sail, with between ſeven and eight thouſand Men, they were defeated by the Handful General *Oglethorpe* had with him, to the immortal Honour both of the Soldiers and their Commander, who obliged the Enemy to ſo precipitate a Flight, as to leave Part of their Baggage, *&c.* behind them. The General received all the Congratulations and Acknowledgements, ſo juſtly due to his Bravery, from all our *American* Governors, and ought to have the ſame Incenſe paid him by every Well-Wiſher to the Colonies, or indeed *Great-Britain* itſelf.

This Province is ſaid to be capable of producing all that *Carolina* does, though the Truſtees, from an Obſervation that moſt of the *American* Settlements run into a Cultivation of the ſame Commodities, recommended a different Practice here, and ordered a large Plantation of Mulberry-Trees to be made, invited thereto by

the Propriety of the Soil, and Agreeableneſs of the Clime for raiſing Silk, of which a Parcel was brought from thence in 1739, and deemed by competent Judges to be very good; though what more it may have produced ſince, I muſt confeſs myſelf ignorant, or indeed, of what other Returns it has made to the People's Expectations, from the large Sums expended on it; though, ſhould it fall ſhort in the Fertility it has been praiſed for, and remit but little in Exchange for its Manufactures it takes from hence, the Eſtabliſhment ought to be ſupported as an important Frontier, whoſe Conſequence has been demonſtrated, in the Stand it made againſt the above-mentioned powerful Attack, which might otherwiſe have proved of fatal Conſequence to ſeveral of our Colonies. The Exports are calculated at about 74,000*l.* and the Imports at 49,000*l.*

Of CAROLINA.

THIS Part of the Globe has been poſſeſſed alternately by *Spaniards* and *French* and though one of the fineſt Spots in the World, had by both been deſerted for near a hundred Years, when his Majeſty King *Charles* II. granted it the 24th of *March*, 1663, to *Edward* Earl of *Clarendon*, then Lord High Chancellor, *George* Duke of *Albemarle*, *William* Lord *Craven*, *John* Lord *Berkley*, *Anthony* Lord *Aſhley*, Sir *George Carteret*, Sir *William Berkley*, and Sir *John Collinton*, with all Royal Fiſheries, Mines, Power of Life and Limb, and every thing neceſſary to an abſolute Propriety, within the Limits of the Patent, and with the Acknowledgement of twenty Marks yearly; and this Grant was ſeconded by another about two Years after, that made ſome Alteration in the Boundaries, and included both the *Carolinas* and the new Province of *Georgia*. But this Eſtabliſhment not meeting with a Succeſs anſwerable to the Proprietor's Expectations, they after ſtruggling with many Difficulties for the Space of near ſixty Years, reſigned $\frac{7}{8}$ of their Grant to the Crown, in Conſideration of 17,500*l.* paid them for it, and the Surrender was confirmed by Act of Parliament in 1728; the other $\frac{1}{8}$ being therein reſerved to the Right Hon. *John* Lord *Carteret*, late Earl of *Granville*.

This Country, as afore-mentioned, is very pleaſant and fertile, as the Riches acquired bythe Inhabitants in a few Years plainly prove; and the Trade of it was once ſo conſiderable, that from *March* 1730, to the ſame Time 1731, there ſailed from *Charles Town*, moſtly for *England*, 207 Ships, with 41,957 Barrels of Rice, about 500*lb.* wt. each; 10,700 Barrels of Pitch; 2063 of Tar; and 759 of Turpentine; of Deer Skins 300 Caſks, containing 8 or 900 each; beſides a vaſt Quantity of *Indian* Corn, Peas, Beans, *&c.* Beef, Pork, and other ſalted Fleſh; Beams, Plank, and other Timber for Building, moſt Part of Cedar, Cypreſs, Saſſafras, Oak, Walnut, and Pine.——Since writing the above, the *Carolina* Trade is greatly increaſed by the Produce of *Indigo* in that Colony.

Before the late War in *America*, the Commerce of *South Carolina* alone employed 140 Ships. Its Exports to *Great-Britain* of native Commodities, on an average of three Years, amounted to upwards of 395,000*l.* annually, and its Imports to 365,000. The Exports of *North Carolina* were computed at 68,000*l.* and its Imports at about 68,000*l.*

Their Trade with the *Indians* is very conſiderable, by which they procure the Skins above-mentioned; and in Exchange for them give Lead, Powder, coarſe Cloth, Vermillion, Iron, ſtrong Waters, and ſome other Goods, reaping from this Traffick a very great Profit. Of Negroes it is ſuppoſed there are near 50,000 in the Province; though Artificers are very ſcarce, and their Demands for Labour very extravagant; which I believe principally proceed from the Miſrepreſentations of the Country at home; otherwiſe it is to be imagined, a fine Climate and great Wages would be ſufficient Inducements to attract a ſufficient Number of Mechanicks to ſupply every Want there could poſſibly be of them.

Of

Of VIRGINIA.

THIS Country was at firſt divided into North and South *Virginia*, and was accordingly granted by King *James* I. in 1606, to two diſtinct Sets of Men, the one to poſſeſs all the Lands, &c. between 34 and 41 Degrees of Latitude, to be called the firſt Colony, and the others to have all thoſe lying between 38 and 45 Degrees of Latitude, with the Denomination of the ſecond Colony; and they immediately fitted out Ships and ſent many People there in the ſame Year; and though their Eſtabliſhments were rendered as eaſy to them as the Nature of the Thing would poſſibly admit, and their advantageous Situation was very apparent, yet they could not ſubmit to the few Labours and Difficulties attending their firſt ſettling, though with the Proſpect of ſoon obtaining from them a comfortable and eaſy Abode, capable of daily Improvements by an honeſt Induſtry, but were continually breaking out into Commotions and Diſturbances, which proved ruinous to the Colony, and their own Deſtruction; and they were ſo contumacious as to fly in the Face of Juſtice; ſo that few of their Governors could ſupport their Authority, or bring them into any ſettled Order or Diſcipline; which was a good Deal owing to the Nature of the Grants made in *England* by the Patentees, and no ſmall Share of it charged on the Company's Mal-Adminiſtration; in ſo much, that on King *Charles* I. aſcending the Throne, he diſſolved the Company in 1626, reducing the Country and Government under his own immediate Direction, and granting Patents to particular Adventurers, with the Reſerve of a Quit-Rent of two Shillings for every hundred Acres.

This Reſolution of his Majeſty's at firſt ſeemed very agreeable to thoſe already ſettled, and animated many daily to encreaſe their Number; but old Diſcontents reviving, and the People proving reſtleſs under their Governor's Oppreſſions, gave an Inſtance of their Reſentment, by ſending the firſt his Majeſty had ſet over them Priſoner to *England*, for his Diſagreement with his Council, and Violences on the Inhabitants. And the ſubſequent Troubles of King *Charles's* Reign, and *Cromwell's* Adminiſtration, hindered the good Diſpoſitions from proving effectual that had before been taken for the Colony's Proſperity by their worthy Chief, Sir *William Berkley*. However, many continued Sollicitors for Patents of large Tracts, which has indeed proved very prejudicial to the Country, as it is by this Means that very few Towns are to this Day built in it, and thoſe few ſo ſmall as hardly to be worth naming.

It lies from 36° to 39° of North Latitude, and between 74° and 80° of Weſtern Longitude, being about two hundred and forty Miles in Length, and near one hundred and twenty in Breadth; divided into twenty-five, ſome ſay twenty-nine, Counties; of theſe, the firſt is *James* County, which contains five Pariſhes, and the only two Towns in the Province; and theſe, as I ſaid before, ſo ſmall, that the principal called *James Town*, does not contain above eighty Houſes; and *Williamſburgh*, though the Seat of Juſtice, not above half that Number: The People, if we reckon Men, Women, and Children, and join to theſe the Negroes, may amount to about five hundred thouſand, which may reaſonably be ſuppoſed to bring no ſmall Advantage to their Mother Country; as from hence they are all ſupplied with moſt of the Neceſſaries of Life; ſuch as Linen, Silks, *India* Goods, Wine, and other foreign Manufactures; and of our home ones, Cloths, Serges, Stuffs, Bays, Hats, and all Sorts of Haberdaſhery Ware; Hoes, Bills, Axes, Nails, Adzes, and other Iron Tools,; Cloths ready made, Knives, Biſcuit, Flour, Stockings, Shoes, Caps for Servants, and indeed almoſt every Thing that is made in *England*, to the Amount of near 1,000,000*l.* Sterling which is repaid moſtly in Tobacco, of which it is ſuppoſed, by the niceſt Calculators, that near one hundred thouſand Hogſheads are, in Times of Peace, imported here yearly, employing between three and four hundred Ships, navigated by upwards of four thouſand Sailors; and of theſe, about 60,000 Hogſheads are re-exported for foreign Parts, which, if computed only at 5*l.* per Hogſhead, makes 3009,000*l.* beſides the Duties not drawn back, and the new Freight it occaſions.

This

This Settlement, it is to be obſerved, is only that Part of the original Grant, called the firſt or *London* Colony; the other, termed the ſecond or *Plymouth* Colony, ſhall be ſpoke of when I come to treat of *New-England*, of which they were the original Planters; in the mean Time I proceed, as it comes next in Courſe, to ſpeak

Of MARYLAND.

THIS Colony remained a Part of *Virginia*, as ſeveral others did till they were diſmembered, which ſhall be noted in their proper Places, till 1632, when King *Charles* I. in the eighth Year of his Reign, granted all the Country to the North of *Potowmack* River, not then planted, to *Cecilius Calvert* Lord *Baltimore*, and his Heirs; which Tract was thenceforth called *Maryland*, in Honour of the then Queen Conſort; and in Conſequence of this Grant, the Proprietor ſent over his Brother, with about two hundred Adventurers, to take Poſſeſſion of their Limits, and to make a Settlement; which they firſt did in an *Indian* Town, called afterwards *St. Mary's*, on the River *Potowmack*, and near the Mouth of that they chriſtened *St. George's*.

This ſoon became a flouriſhing Colony, though the *Baltimore* Family was deprived of its Government during the Civil Wars; but King *Charles* II.'s Reſtoration proved that of the Proprietor's; as his Majeſty, on coming to the Throne, reinſtated him in all his Privileges.

The Province is ſituated between 38° and 40° of Northern Latitude, and between 75° and 80° of Weſtern Longitude; abounding, as *Virginia* does, in fine Springs and Rivers; ſo that, like the *Virginians*, they can bring the Ships up to their very Doors: It is divided into ten Counties, though it has very fine Towns, the ſame Humour of living on their own Plantations prevailing among the Gentry here, as was before obſerved to reign among their above-mentioned Neighbours.

The Soil and Products of this Country are ſimilar to thoſe of *Virginia*, and the Natives here imitate the others' Management, in confining their Huſbandry to the Cultivation of Tobacco only, of which it is ſuppoſed they now produce as much as *Virginia* does, though the Quality to the *Engliſh* Taſte is inferior to the other, it being ſtronger than the ſweet-ſcented Leaf gathered on the Borders of *James* and *York* Rivers; however, this Circumſtance gives it a Preference every where in the North, to which Part of the World we generally ſend it: The Inhabitants may be about 30,000, who are ſupplied with Neceſſaries from hence in the ſame Manner *Virginia* is, ſo that a Catalogue of them need not be repeated here.

Of NEW-YORK.

THIS, like the laſt-mentioned Province, was a Part of *Virginia*, and became our's under the double Right of Diſcovery and Conqueſt; the firſt by *Cabot*, and the latter from the *Dutch*, who had ſettled here, and held it by an illegal Title, and therefore the *Engliſh* have retained it ever ſince its Recovery at the Beginning of the *Dutch* War. It is about two hundred Miles in Length, though generally very narrow, well repleniſhed with Proviſions and Farms, which occaſions it having few large Towns; the Capital *New-York* City, however, is very conſiderable for this Part of the World, as it contains upwards of a thouſand well-built Houſes of Stone and Brick, beſides commodious Quays and Warehouſes on its excellent Harbour, where ſome hundreds of Ships and Veſſels are employed in the foreign Trade and Fiſheries from hence carried on to *Madeira* and the *Azores*, where they ſend Pipe-Staves and Fiſh, returning with Wine and Brandy, to their very great Advantage; and to all our Sugar Iſlands, more eſpecially *Barbadoes*, they ſend Corn, Flour, Bread, Beef, pickled and ſmoaked Pork, Peas, Bacon, Apples, Onions, Board, and Pipe-Staves; for which they bring back Sugar, Melaſſes, Rum, Ginger, *&c.* And the Agents for this Province, in their Conteſt with the Sugar Plantations, affirmed, that their Winters being ſevere, obliged them to take off more of the Woolen Manufactures of this Kingdom, for which they remitted Gold and Silver, than all the Iſlands, *Jamaica* excepted, put together, and which I believe has remained uncontradicted.

At our becoming Maſters of this Country, it was found to be very thinly peopled; but the Clime and Soil have proved ſuch powerful Inducements to Adventurers, that their Number is ſuppoſed now to be ſwelled to 90,000.

Before the *American* War, the Exports from this Province, upon an Average of three Years, amounted annually to 526,000*l.* and their Imports from *Great-Britain* to 531,000*l.*

Of PENNSYLVANIA.

ADMIRAL *Penn*, afterwards Sir *William*, rendered himſelf famous by the Conqueſt, with Col. *Venables*, of *Jamaica*; and endeared himſelf to every one ſerving under him, by his unaffected Modeſty, and other engaging Qualifications and Virtues; theſe, and his great Abilities in maritime Affairs likewiſe, placed him in a very high Degree of Eſteem and Credit both with King *Charles* II. and his Royal Brother, which drew from the former a promiſed Grant of this *American* Territory, in Reward of his paſt Service to the Crown; but he dying before its Confirmation, and his Son not applying for it till ſome Years after, the Patent bears Date only from the 4th of *March*, 1680, containing all that Tract of Land in *America*, with all the Iſlands belonging to it, from the Beginning of the 40th Degree of North Latitude to the 43d Degree, &c. This was the Limitation of the firſt Grant; but Mr. *Penn* having afterwards obtained an Addition from *New-York*, the whole Territory of *Pennſylvania* now runs three hundred and thirty Miles in Length, and about two hundred in Breadth, being diſtinguiſhed by this Denomination in both the Patents.

There were but few *Engliſh* when Mr. *Penn* ſent over the firſt Adventurers, who had accompanying them a Governor of his appointing, to whom the *Swedes* and *Dutch* that remained very readily ſubmitted; but he afterwards went in Perſon to ſettle the Conſtitution he had procured to be drawn up by that great Lawyer, Sir *William Jones*, and to make Agreements with the *Indian* Princes. The Air is ſerene and pleaſant, the Soil generally fertile, and every Thing growing here in great Abundance and Plenty. The Towns are large and numerous, well ſituated for Trade, and populous; inſomuch that the Capital, *Philadelphia*, is now ſuppoſed to contain fifteen thouſand Inhabitants, by which the Number of People in this flouriſhing Colony may be gueſſed at, though it would be difficult to aſcertain them.

The Merchandize which *Pennſylvania* furniſhes for its Commerce with *Europe* and *America*, conſiſts in Horſes, Pipe-Staves, Pork, Beef, and Fiſh ſalted and barrelled up, Skins and Furs; all Sorts of Grain, *viz.* Wheat, Rye, Peas, Oats, Barley, Buck-Wheat, *Indian* Corn, *Indian* Peas and Beans, Pot Aſhes, Wax, &c. And in Return for theſe they import from the *Caribbee* Iſlands, &c. Rum, Sugar, Melaſſes, Silver, Negroes, Salt, and Wine; and from *Great-Britain*, Houſehold Goods, Clothing of all Sorts, Hardware, Tools, and Toys. They alſo grow ſome Rice, and a little Tobacco of the worſt Sort; and their Trade with the *Indians* is confined to a few Articles; they receiving from them only Furs and Skins, and giving them in Return, ſome Clothing, Arms, Ammunition, Rum, and other Spirits.

The Amount of the Commodities exported from *Great-Britain*, before the War, was upon an Average of three Years, valued at 611,000*l.* and thoſe exported to *Great-Britain*, including Ships built there for Sale in *England*, are eſtimated at 705,500*l.*

Of the JERSEYS.

THESE fell under the Dominion of the Crown at the ſame Time that *New-York* did, and with that compoſed the Province of *Nova Belgia*, taken from the *Dutch*, as before-mentioned, and all were included in the Grant made by King *Charles* II. to his Brother the Duke of *York*; who inveſted this Part of it by the Name of *Nova Caneria*, in *John* Lord *Berkley*, and Sir *George Carteret*, and they or their Aſſigns agreed to divide it, with the Denomination of *Eaſt* and *Weſt New Jerſeys*; the firſt falling to the Share of Sir *George*, as the latter did to his Lord-

ſhip; and both being parcelled out into different Proprietaries, were unanimouſly reſigned up to her Majeſty Queen *Anne*, on the 22d of *April*, 1702, and have been ever ſince governed by Royal Authority: They have ſeveral well-built Towns in them, commodiouſly ſituated for Trade, as Ships of two or three hundred Tons may come up to the Merchants' Houſes in divers of them. The Country yields Plenty of all Sorts of Grain, with which they ſupply the Sugar Iſlands, and beſides this drives ſome Trade in Furs, Skins, and a little Tobacco; they likewiſe ſhip ſome Train Oil, Fiſh, Corn, *&c.* for *Portugal*, *Spain*, and the *Canaries*, though *New-York* is their principal Market, either for ſupplying themſelves with, or diſpoſing of their Commodities.

The Inhabitants are computed to be about 100,000, but they carry on little or no foreign Trade, owing to the vicinity of the *Jerſeys* to the great commercial Cities of *Philadelphia* and *New-York*, by which they were ſupplied with Merchandize from *Britain*, and make Returns in Wheat, Lumber, and other native Products.

Of NEW-ENGLAND.

IN my Deſcription of *Virginia*, I gave an Account only of the firſt or *London* Company, referring my Readers for the Succeſs of the ſecond or *Plymouth* Company's Expedition, to this Place, which I ſhall now give.

Theſe Adventurers contented themſelves for ſome Years, with the Trade of Furs with the Natives of *North Virginia*, and fiſhing on that Coaſt, in which two Ships were employed ſo early as the Year 1614, commanded by the famous Capt. *John Smith*, and Capt. *Thomas Hunt*, the former of which landed, and took a particular View of the Country of the *Maſſachuſets*, by which he was drawn into ſeveral Skirmiſhes with the Natives; and afterwards returning to *England*, he left Orders with *Hunt* to proceed in his Ship, with the Fiſh taken, to *Spain*; but this ungenerous Man, not content with his finny Treaſure, and ſtimulated by an avaricious deſire of Gain, took ſuch iniquitous Steps to procure it, as proved of fatal Conſequence to the infant Colony; for as ſoon as Capt. *Smith* was departed, he enticed twenty-ſeven of the innocent *Indians* aboard, and carried them with his Cargo to *Malaga*, where he ſold them at 20*l.* a Head. This Outrage was reſented by the *Indians* in ſuch a Manner as might juſtly be expected; they broke off all Communication with the Colony, ſo that an entire Stop was put to the little they before carried on, and their Endeavours for Revenge were exerted on ſeveral future Occaſions. And repeated Diſappointments occurring by theſe Diſagreements, the Patentees were diſcouraged from proſecuting their intended Settlements, and gave up all Thoughts of making them. However, other Adventurers carried on a Trade to *New-England*; and a Congregation of *Independents* who had fled from thence to *Holland* on Account of their Religion, under Mr. *John Robinſon* their Miniſter, now meditated another Remove, and determined on changing their Clime once more, from an *European* to an *American*; flattered with the Hopes of finding an *Aſylum* in the latter, which was denied them in the former. And they accordingly procured a Grant for their Settlement on *Hudſon*'s River, where, however, they never arrived; but either Chance, or Treachery, as ſome ſuppoſe, having driven them to *New-England*, in the Latitude of 42° North, they there landed, and built themſelves a Town, which they called *New Plymouth*, being about a hundred Souls in all, Men, Women, and Children, of which a great Part died the firſt Winter. However, new Recruits continually ſucceeding, they began to grow powerful, and became a flouriſhing Colony; and this led them to reflect ſeriouſly on the Nature of their preſent Settlement, which they knew to be precarious, as they were not only without a Patent or Grant to ſecure them in the Poſſeſſions they now enjoyed, but held them contrary to the Rights of the *North Virginia*, or *New-England* Company. In Order, therefore, to eſtabliſh themſelves on a better footing, they commiſſioned one of their Number, in the Year 1624, to ſollicit a Charter for them, which he ſucceſsfully performed, and obtained one more favourable than their moſt ſanguine Expectations could make them hope for; they being thereby enabled to elect a Governor, Council, and Magiſtrates, and to make Laws, provided they were no Ways

oppoſite to our's, or in any Reſpect encroached on the Crown's Prerogative: Thus the firſt Settlement in this large and fertile Country was confirmed; and this animated others to take the ſame Steps; of which I ſhall give ſome Account in as brief a Manner as poſſible.

In 1625, Mr. *White* of *Dorcheſter*, another Miniſter of the ſame Perſuaſion with the before-mentioned, being animated by his Succeſs, determined to follow his Steps, in Hopes of the ſame good Fortune; and accordingly procured a Grant from the *North-Virginia* Company, to divers therein mentioned, of all that Part of *New-England*, which lies between the great River *Merimack* and *Charles* River, *&c.* and obtained a Patent from King *Charles* I. to hold the ſame; which was enlarged by a new one, 1628, with ſtill greater Privileges than in thoſe ceded to the *New Plymouth* Colony, and by whom *Charles Town*, *Dorcheſter*, and *Boſton*, the Capital, were ſucceſſively built; and from theſe a Colony was detached, to ſettle on *Connecticut* River; which afterwards obtained a Grant for themſelves, with Privileges ſimilar to thoſe already ſpoken of. After theſe, *New-Haven* was built, and the Country ſettled; and whilſt this was tranſacting in the *South-Weſt* Parts of *New-England*, thoſe in the *North-Eaſt* were not neglected; for theſe Coaſts having for ſome Time been frequented, for the Advantages of Fiſhing and the Fur Trade, encouraged thoſe concerned therein to attempt an Eſtabliſhment; which they ſucceeded in ſo much to their Satisfaction, as in a few Years to ſettle the two Counties of *New-Hampſhire* and *Main*, for which they obtained a Charter; but as Feuds and Diviſions prevailed among them, they again reſigned it, in 1684, to the Crown, where the Property has ever ſince remained.

And if any one reflects on the ſwift Progreſs made in the Settlements, that in about twenty Years they had built twice as many Towns, cultivated a large Tract of Land, and ſettled a tolerable good Trade, he muſt allow them to have been uncommonly induſtrious, more eſpecially, if he conſiders the many Difficulties they had all along to ſtruggle with.

New-England at preſent comprehends four very conſiderable Governments, *viz.* *Maſſachuſets*, which with *New-Plymouth* and the *Main*, are now included in one Charter; *New-Hampſhire* ſtill remaining ſeparate; *Connecticut*, comprehending alſo *New-Haven*; and *Rhode-Iſland*, with *Providence* Plantation. The whole Country extending from 41 to 45 Degrees of North Latitude, and from 67 to 73 Degrees of Weſtern Longitude, abounding with Plenty of Fiſh, Fowl, Fruit, Grain, and Herbage; it is likewiſe replete with many fine Rivers, and its Inhabitants are very numerous.

Its Commerce is very conſiderable, being ſpread all over *America*, and to ſeveral Parts in *Europe*: Our Sugar Colonies are from hence ſupplied with Fiſh, Cattle, Corn, Apples, Butter, Cheeſe, Oil, Tallow, Boards, Hoops, Pipe-Staves, Skins, Bark, Turpentine, *&c.* and theſe in ſuch vaſt Abundance, that the Iſland of *Barbadoes* only is computed to take off the Value of two hundred thouſand Pounds yearly: They alſo deal with the other Sugar Colonies; ſometimes with the *French*, more with the *Spaniards*; and their Exportation of Fiſh for *Portugal*, *Spain*, and *Italy*, is greater than from any Part except *Newfoundland*—From hence they take all Kinds of Mercery Goods, Linens, Stockings, Shoes, Sail Cloth, Cordage, Haberdaſhery Ware, and a vaſt many other Things: In Return, they build for us a prodigious Number of Ships, and ſupply us with Pig and Bar Iron, Pitch, Tar, Turpentine, Skins, Furs, Oil, Whale Fins, Logwood, and other Commodities, beſides a great Quantity of Maſts, Yards, and Plank, for the Royal Navy; and as I cannot pretend to make a Calculation myſelf of the Advantages accruing to us from this Trade, I ſhall adopt Sir *Joſiah Child*'s Words on this Subject, to convey to my Reader an Idea of the Greatneſs of them. "To do Right, "ſays he, to that induſtrious *Engliſh* Colony, ſpeaking of *New-England*, I muſt "confeſs, that though we loſe by their unlimited Trade with other foreign "Plantations, yet we are very great Gainers by their direct Trade to and from "*Old England*. Our yearly Exportations of *Engliſh* Manufactures, Malt, and "other Goods from hence thither, amounting, in my Opinion, to ten Times "the Value of what is imported from thence; which Calculation I do not make "at Random, but upon mature Conſideration; and peradventure upon as much "Experience of this very Trade, as any other Perſon will pretend to do, *&c.*"

It

It was computed, before the unfortunate Revolt of the Thirteen Provinces from the Mother-Country, that the Amount of the *Engliſh* Manufactures and of *India* Goods ſent into this Colony from *Great-Britain*, was not leſs, upon an Average of three Years, than 395,000*l.* Our Imports in Value, *&c.* Commodities for home Conſumption, and for Exportation to the *European* Markets, were calculated at 370,500*l.*

Of NOVA-SCOTIA.

NO Part of our *American* Settlements has occaſioned more Conteſts than this, or has ſo often changed Maſters; having been ſeveral Times alternately poſſeſſed by *French* and *Engliſh*, though our Title to it is founded on *Cabot*'s Diſcoveries, and was therefore originally regarded as a Part of *North-Virginia*, and as ſuch, within the Charter of the *Weſtern* Company, who gave ſtrict Orders to thoſe in their Service, by all Means to prevent foreign Nations from ſettling in their Limits.

Sir *Samuel Argal*, then Governor of *Virginia*, made a cruiſing Voyage in 1618, round the Coaſt northwards, as far as *Cape Cod* in *New-England*, about five or ſix Years before the *Engliſh* Adventurers arrived in that Country; and being informed by the *Indians*, that ſome white Men had ſettled farther North, he went, and found a Fort built, with a *French* Ship riding at Anchor before it, both which he took; and the *French* afterwards cancelled their Patent from the King; and acquainted him of another Settlement made by their Countrymen at a Place they had named *Port-Royal*, in the Bay on the South-weſt of *Acadia*, which he alſo went to, and reduced it.

When Sir *Ferdinand Gorges* was Preſident of the *New-England* Company, he propoſed to Sir *William Alexander* to procure a particular Grant for the Land to the Northward of their Patent, who accordingly applied for and obtained it of King *James* I. in 1621; and the next Year ſent a Ship with Paſſengers, to plant and ſettle there; but it being late in the Seaſon, they were forced to winter in *Newfoundland*, and to wait the Spring's Return before they could get away, which they effected as ſoon as the Weather would permit it, and proceeded on their Voyage till they happily concluded it, and landed in what they afterwards called *Luke*'s-*Bay*; and Sir *William Alexander* having publiſhed a Book, with the Deſcription of the Country, placed it in ſo tempting a Light, that his Sovereign created a new Order, called the Knights of *Nova-Scotia*, purely to facilitate its Plantation.

This projected Settlement, however, proved abortive; and there was afterwards another Grant made of the Northern Part of this Country, to Sir *David Kirk*, from whom the *French* King bought it, or at leaſt contracted to give him 5000*l.* for it; and Sir *William Alexander*, ſome Years after, ſold his Property to *Claude de la Tour*, a *French* Nobleman; which plainly proves that the Rights and Titles by which they held them were acknowledged by that Nation.

Oliver Cromwell, in 1654, ſent Major *Sedgwick* to diſlodge the *French* from *Port-Royal*, which he effected, and took Poſſeſſion of the ſaid Tract of Land; on which *Charles de St. Eſtina*, I believe it ſhould be *Eſtienne*, Son and Heir to *Claude de la Tour*, came to *England*, and on making out his Claim under Sir *William Alexander*, then Earl of *Sterling*, *Cromwell* allowed it.

On the 20th of *Sept.* 1656, the ſaid *Charles de St. Eſtina* ſold and conveyed his Property in the ſaid Country to Sir *Thomas Temple* and *William Brown*, who divided the ſaid Land by Deed of Partition.

Sir *Thomas* afterwards, *viz.* in the Year 1662, made out his Right, and obtained a Patent from the Crown, not only for the Territory mentioned therein, but for the Government thereof during his natural Life, and the ſole Monopoly of the Fiſhery and Trade with the *Indians*.

By the Treaty of *Breda*, in 1667, this Land was again ceded to the *French*; and in 1670, the Poſſeſſion was delivered to them by Sir *Thomas*, in Virtue of the ſaid Treaty, and in Obedience to expreſs Orders from the Earl of *Arlington*, then Secretary of State, though he never conveyed his Right to the Lands, nor ever received a ſingle Farthing of 16,200*l.* Sterling then ſtipulated to be paid to him

in

in Recompence of his Diſburſements for building Forts, maintaining Garriſons, and the Debts due to him from the Natives, though much ſollicited for, both at the Courts of *England* and *France*.

In 1690, on the 28th of *April*, Sir *William Phipps* having, by Order of the *Maſſachuſet's* Government, ſet forward on an Expedition for the Reduction of this Country, ſucceeded therein; and having diſpoſſeſſed the *French* thereof, and appointed a Governor, he returned to *New-England* on the 30th of *May* following, and the *Engliſh* remained Maſters of it till 1697, when by the Treaty of *Riſwick*, it was once more reſtored to the *French*.

In 1710, it was again reconquered by the Forces of Queen *Anne*, ſent from hence and *New-England*, under the Command of General *Nicholſon*; and by the Treaty of *Utrecht*, in 1712, was yielded up to *Great-Britain*, and has ever ſince continued in the Poſſeſſion of this Crown, having been conſtantly garriſoned by a Regiment of Soldiers, till its late Settlement augmented the Number of theſe, as well as of its Inhabitants.

Sir *Thomas Temple* died on or about the 27th of *March*, 1674, at *Brentford* in *Middleſex*, leaving his Nephew, *John Nelſon*, Eſq. of *Boſton* in *New-England*, his Heir and ſole acting Executor to his Will; who by Deed, bearing Date the 15th of *April*, 1731, ſold and conveyed all his Right, Title, Claim, *&c.* in and to the ſaid Lands, Debts, Rent, *&c.* to *Samuel Waldo*, Eſq. of *Boſton* aforeſaid; of which the ſaid *Samuel Waldo* afterwards ſold and conveyed an undivided Moiety to me. And as we were conſcious of what Importance the Settlement of this Province would be to the Northern Colonies, we ſecured a conſiderable Number of *Swiſs* Proteſtants to begin it, not imagining, after ſo clear a Deduction of our Title, we ſhould have any Impediment to ſo neceſſary a Work, pregnant with innumerable Advantages to the Nation. However, leſt our Right ſhould be in future conteſted, on Account of the aforeſaid ſeveral Treaties and Changes of Poſſeſſion, we humbly intreated his Majeſty, about thirteen years ago, to confirm our Grant, or to give us a new one; which Petition he was graciouſly pleaſed to refer to a Committee of Council, and the Committee referred it to the Conſideration of the Attorney and Solicitor General; which being juſt before the breaking out of the War of 1755, this Occurrence made us deſiſt from preſſing the Affair: But all Pretenſions to this Colony having been formally renounced on the Part of *France*, by the IVth Article of the Peace of *Verſailles*, in 1763, our Title to *Nova-Scotia* is now confirmed beyond Diſpute.

This Country lies in a good and healthy Climate, being in the ſame Latitude with Old *France*; enriched with a fertile Soil, abounding in fine navigable Rivers, which, like its Coaſts are full of various Kinds of Fiſh; more eſpecially Salmon, Sturgeon, Herrings, Cod, and Whales; and beſides theſe, the Province is capable of producing Hemp, Flax, Maſts, Iron, and all the naval Stores, *extra* of Furs, Oil, Whalebone, and Poor-jack; it can alſo as conveniently as any other ſupply the Sugar Colonies with Proviſions, Boards, Staves, *&c.* and conſequently, under proper Encouragement, ſoon become capable of taking off large Quantities of *Britiſh* Manufactures, and in Time prove a valuable Eſtabliſhment to its Mother Country.

In the Year 1749, a Town was built in this Colony, and called *Halliſax*, in Honour of the Earl of *Halliſax*, the noble Patron of the Undertaking, who then preſided at the Board of Trade. By the Goodneſs of its Harbour, and its convenient Situation for *Britiſh* Men of War to winter in, together with the Protection it affords to the Cod Fiſhery, this bids fair to be one of the moſt conſiderable Towns in *North-America*, notwithſtanding its Northern Climate; being free from Ice the whole Winter.

The Number of Inhabitants is computed at 16,000, who carry on a conſiderable Trade in Furs and naval Stores, which, with their Fiſhery, and the internal Circulation by the Reſidence of a Governor and a Garriſon conſiſting of three Regiments of regular Forces, renders it a very flouriſhing Place. *Annapolis*, a Town of leſs Note, is famous for its fine Bay in which a thouſand Sail of Ships may ride at Anchor in Safety.

The Exports from *Great-Britain* to this Country, conſiſt chiefly in Woolen and Linen Cloth, and other Articles of Clothing; Fiſhing-Tackle, and Rigging for Ships. The Imports, conſiſting of Timber, Furs, and Fiſh.

Of the Iſlands of Cape Breton *and* St. John.

THESE two Iſlands belonged to the *French*, but were taken from them in the Year 1758, by the *Engliſh* Fleet and Army commanded by Admiral *Boſcawen* and General *Amherſt*; and ceded to us by the following Treaty of 1763. The principal Advantage of theſe Iſlands is their Situation for the Cod Fiſhery, which throws the whole of that invaluable Trade into the Hands of the *Engliſh*, calculated by ſome at ſo large a Sum as eight hundred thouſand Pounds *per Annum* Profit, employing at leaſt 1500 Ships, excluſive of large Boats.

At the ſame Time theſe Iſlands were taken, the *French* Neutrals, as they were called, came from *Nova-Scotia* to our more Southern Settlements, by which that lately ſettled Colony is ſecured from Inroads both from them and the *Indians*.

Of CANADA.

IN the Year 1759, General *Wolfe* and Admiral *Saunders* being ſent with an Army and Fleet from *Great-Britain* to attack this very conſiderable Settlement of the *French*, their Arms were bleſſed with ſuch Succeſs that they made themſelves Maſters of the City of *Quebeck*, the Capital of that Country, ſituated on the River *St. Laurence*. At the ſame Time General *Amherſt*, the Conqueror of *Louiſburgh* the Year before, with Sir *William Johnſon*, and a large Army of Regulars from *England*, Provincials, and *Indians*, marched againſt the *French* Settlements at *Crown Point*, *Ticonderoga*, and *Niagara*; the two firſt of which were abandoned on the Approach of General *Amherſt*; but Winter coming on, prevented his proceeding to *Montreal*, and thereby making a Junction with General *Wolfe*. While this was doing, Sir *William Johnſon* beſieged *Niagara*; and an Army of *French* and *Indians* coming to raiſe the Siege, he entirely defeated them, on which the Place ſurrendered.——General *Forbes* marched with another Army to attack Fort *Du Queſne* on the *Ohio*, which the *French* ſet on Fire and abandoned on his Approach. This finiſhed the Operations in this Country for the Year 1759.

In the beginning of the following Year 1760, the *French* from *Montreal* attacked the new Conqueſt of *Quebeck*; but raiſed the Siege on the Arrival of the *Engliſh* Fleet, abandoning their Tents, Baggage, Artillery, *&c.* On the Approach of Summer, General *Amherſt* proceeded with his Plan for the entire Conqueſt of this Country; and notwithſtanding the Difficulty of bringing up Artillery and ſupplying an Army with Proviſions at ſo conſiderable a Diſtance from the back Settlements of our Colonies, he arrived at *Montreal* in the Beginning of *September*, where he was joined by General *Murray* from *Quebeck*. The Day General *Murray* arrived, Articles of Capitulation were agreed on between General *Amherſt* and the Marquis *Vaudreuil*, Commander in Chief of the *French* Troops in that Country, and Governor General of the Colony, for the Surrender not only of *Montreal*, but of all *Canada*; of which Country, with all its Dependencies, the IVth Article of the Treaty of Peace following, gave us the entire Property, and thereby ſecured our other Colonies from the continued Dread of the Inroads made by ſuch troubleſome Neighbours behind them.

This Country is of a prodigious Extent, and by its large Lakes and Rivers, formed for the greateſt inland Navigation in the World. The *French* Inhabitants, who remain in the Country and enjoy their Eſtates, amount to near 100,000.

Since *Great-Britain* became poſſeſſed of *Canada*, her Commerce with that Country employs 34 Ships, and 400 Seamen. Their Exports, upon an Average of three Years, in Skins, Furs, Ginſeng, Snake-Root, Capillaire, and Wheat, amount to 150,500*l.* Their Imports from *Great-Britain*, in a Variety of Articles, are computed at nearly the ſame. The Importance and Value of this improveable Trade is ſelf-evident; for *Canada* ſupplies us with unmanufactured Materials, indiſpenſably neceſſary in many Articles of our Commerce, and takes

in

in Exchange the Manufactures of our own Country, or the Produce of our other Settlements in the *Eaſt* and *Weſt-Indies*.

I have now done with our Settlements on the Continent, and ſhall next ſpeak of our *American* Iſlands, equally beneficial to this Kingdom with the Eſtabliſhments whoſe Trade I have juſt now deſcribed; and ſhall begin with thoſe called the *Caribbee* or *Antilles*; and of theſe the principal is

BARBADOES,

WHICH was primarily granted by King *Charles* I. on his coming to the Crown, to *James* Earl of *Carliſle*, who having ſold ſome Parcels to ſeveral Adventurers, they tranſported themſelves thither; and the firſt Improvement they attempted was planting Tobacco; but this not ſucceeding according to Expectation, they proceeded to try Cotton and Indigo, which afforded them much better Returns. But I find they made little or no Sugar till 1647, when the Colonels *Modiford*, *Drax*, and *Walrond*, and ſeveral other Cavaliers, were induced, by their uneaſy Situation in *England* under the Uſurper, to convert their Eſtates into Money, and ſeek a quiet Receſs in this fertile Iſle, carrying with them ſuch Implements and Machines as were proper for Sugar-Works, which they intended to propagate, as ſeemingly the Commodity beſt adapted to the Soil, and in which Experience has proved they were not deceived; for it is ſaid, that Colonel *Drax* in a few Years acquired an Eſtate of 7 or 8000*l. per Annum*, and married the then Proprietor's, the Earl of *Carliſle's*, Daughter.

The Increaſe of its Riches and Inhabitants was a Conſequence of the Soil's Fertility, and a Reward of the Planters' Induſtry, and I believe is unparalelled by any Settlement, of any Nation whatſoever; as, in 1626, this Country was ſo far from being ſettled, that it was quite uninhabited, affording nothing for the Support of Life, and overgrown with Shrubs and Buſhes, enough to diſcourage the Attempts of the firſt Planters to clear it; yet, in the Space of fifty Years, this Incumbrance was quite deſtroyed, and by an exact Calculation there were in the Iſland at this Period fifty thouſand white People, of whom twenty thouſand were able to bear Arms, and eighty thouſand Negroes; a ſurprizing Populouſneſs on ſo ſmall a Spot, and in ſo ſhort a Time! though it is probable the Inhabitants would ſtill have encreaſed, had not an epidemical Diſtemper among the Whites, begun in 1691, ſwept off ſuch Numbers of them, that the Calamity has not been repaired to this Day; and it is ſuppoſed, that at preſent there are not above thirty thouſand white People on the Iſland, and of *Negroes*, *Mulattoes*, and *Meſtive* Slaves, about an hundred thouſand.

In 1661, this Iſland was purchaſed by King *Charles* II. of the Lord *Kinnoul*, Heir to the Earl of *Carliſle*, ſince which Time it has continued unalienated by the Crown: It lies in 13 Degrees of North Latitude, and 59 of Weſtern Longitude, being about twenty-five Miles in Length, and fifteen in Breadth, very little bigger than the *Iſle of Wight*, and ſuppoſed to contain, according to a round Computation, an hundred thouſand Acres. The whole is ſo entirely planted with Canes, that even the common Neceſſaries are not cultivated or raiſed here; ſo that Corn, Fleſh, and Fiſh, is for the moſt Part brought from the Northern Colonies, beſides Fuel, and all Sorts of Staves and Boards.

Bridge-Town, or *St. Michael's*, is the only one of any Conſequence in the Iſland, being ſituate in *Carliſle* Bay, and contains between ten and twelve hundred Houſes, tolerably well built with Brick or Stone, defended by three Caſtles, and accommodated with good Wharfs and Keys, for landing and loading of Goods.

The Product of the Iſle, as has already been remarked, is principally Sugar; though beſides this, great Quantities of Rum are diſtilled from the Melaſſes, and it affords ſome Cotton, Indigo, Ginger, and Pimento; all which it returns us in Lieu of the Manufactures and Commodities it is ſo largely ſupplied with from hence, beſides the Advantage ariſing from an Employ of Shipping, neceſſary to furniſh them with the *Madeira* Wine they want; this being the principal Beverage of the Rich and Opulent in the *Weſt-Indies*.

Of St. Chriſtopher's, Nevis, or Mevis, *and the other* Caribbee *Iſlands.*

THE firſt of theſe ſtands next in Regard to *Barbadoes*, being about ſeventy-five Miles in Circumference, and lies in the Latitude of 17°. 25′. on this Side the Line. The *Engliſh* and *French* both took Poſſeſſion of it on the ſame Day, and in *May*, 1627, divided it between them, continuing in perfect Amity till the breaking out of the War, which deſtroyed the Harmony; and our Countrymen being more powerful than their Neighbours, drove them off the Premiſes, which by the Treaty of *Utrecht* were confirmed to the Crown of *Great-Britain*.

Their chief Product is Sugar, of which in a common Year they make about 10,000 Hogſheads, but like the laſt mentioned Iſland, this alſo yields ſome Ginger, Indigo, and Cotton.

Nevis, or *Mevis*, was alſo ſettled by the ſame Perſons, and within a Year of the ſame Time as *St. Kit's*, was and is commonly the Reſidence of the Governor of theſe *Leeward* Iſlands; it is not above twenty Miles in Circuit, yet has maintained between 30 and 40,000 Whites and Blacks, and produces about 6000 Hogſheads of Sugar.

Montſerrat was begun planting with *Nevis*, and ſeems to be near a Circle of about three Leagues Diameter, more mountainous than any other of the *Antilles*, and yet ſo fruitful in the Vallies and Plains as to produce from 2500 to 3000 Hogſheads of Sugar, beſides ſome other of the Commodities before mentioned, natural to theſe Iſles, and to ſupport about 5000 white, and 12 or 14,000 black People *.

Barbuda was as early ſettled as either of the two laſt-mentioned Iſles, but being different in its Products, and having met with greater Interruptions in their Settlements, by frequent Incurſions from the *Carribeans*, there are not to this Day 2000 People at moſt in the Iſland, though theſe are all white, as their ſole Employ is Huſbandry, for carrying on which themſelves are ſufficient without Slaves; they raiſe Corn and feed Cattle, with which they ſupply their Neighbours.

Anguilla, as it is falſely wrote, or *Snake* Iſland, as it is more falſely tranſlated, is about ten Leagues long, and three broad, ſomething Eel like, or Serpentine in its Shape, and alſo ſo level, that there is not a Mountain in it. The firſt Adventurers ſettled here in 1650, and finding this, like *Barbuda*, fitter for raiſing Corn and breeding Cartle, than other Productions, they brought their Stock with them, and might, undoubtedly, like the Inhabitants of that Iſland, have made a better Improvement in their Farming Buſineſs than they have done, had not Idleneſs lulled them into a ſlothful Neglect of the Means Providence had put into their Hands, of procuring a comfortable Subſiſtence; but they content themſelves with a bare Sufficiency for Nature's Support, though not through the Inſtigation of any philoſophic Principles, but as the Reſult of a confirmed Sloth or Lazineſs, which is as great as can be, and ſeems the Influence of the Air they breathe, as many from *Barbadoes*, and every other of the *Caribbee* Iſlands have been infected with it on their Arrival here; and it is carried to ſo high a Pitch, that they live in a more lawleſs Manner than even their Predeceſſors, the *Indians*, ever did, having neither Miniſter nor Magiſtrate among them; ſo little Senſe or Notion have they of Government or Religion.

They hardly amount to a thouſand People, and they have very little Sugar, and I believe no Cotton, Indigo, or Ginger among them.

Antego, or *Antigua*, is about ſixty Miles in Circumference, and was granted by King *Charles* in 1663, to *Francis* Lord *Willoughby*, Governor of *Barbadoes*, on which he ſettled a Colony in about three Years' Time; it however afterwards by ſome Means reverted to the Crown. Its principal Town is *St. John's*, the Reſidence of the Governor, and, of late Years, a Royal Dock-yard, and a conſiderable naval Eſtabliſhment has been made there, which has greatly increaſed the Trade and Population of the Town and of the whole Iſland, which is ſuppoſed to contain 7000 Whites, and 30,000 Negroes, Slaves to the former. The Products of the Iſland for Exportation are Sugar, Ginger, Indigo, and Tobacco: The Soil in moſt Places is but indifferent, the Heats are greater than in *Barbadoes*, &c. and the Hurricanes more frequent and deſtructive.

* St. Chriſtopher's Nevis, and Montſerrat, by the Fortune of War, have fallen into the Hands of the French and remained in their Poſſeſſion in 1782.

Grenada

Grenada is 25 Leagues in Circumference, and has ſeveral good Bays and Harbours, ſome of which are fortified. It is ſituated in 11°. 15′, North Latitude, about 30 Leagues South Weſt of *Barbadoes*. There are ſeveral ſmall Iſlands that lie to the Northward of *Grenada*, called the *Grenadillas*, which, after being reduced, were all ceded to us by the late Peace of 1763; and with the three heretofore neutral Iſlands, *Dominica*, *St. Vincent*, and *Tobago*, conſtitute one of the four Governments of *Britiſh America*, to which *Grenada* gives Name.

Dominica has a central Situation between *Guadaloupe* and *Martinique*; it is about twenty-eight Miles in Length, and thirteen in Breadth. It was conquered from the French in the laſt War, and ceded to *Great-Britain* by the Treaty of Peace in 1763; but being ſo ſituated as to intercept the Communication with *Guadaloupe* and *Martinico* in Time of War, the French, early in the late War, before we were prepared for the Blow, recaptured it, but it was reſtored by the Treaty of Peace, in 1783.

St. Vincent and *Tobago*, Iſlands of inferior Conſequence, the former about twenty-four Miles in Length, and eighteen in Breadth; and the latter, thirty-two in Length, and nine in Breadth, belonging to the *French*, being retaken from *Britain* in the late War, after the *Britiſh* Planters and Merchants had been at a conſiderable Expence in cultivating it; and not reſtored. Indigo, Coffee, Sugar, and Rum are the chief Products of all theſe Iſlands.

Of JAMAICA.

THIS Iſland, one of the largeſt in *America*, is of an oval Form, near a hundred and forty Miles in Length, and about ſixty in Breadth; it is ſituated in the *Atlantic* Ocean, between ſeventeen and eighteen Degrees of North Latitude, and from ſeventy-ſix to ſeventy-nine of Weſtern Longitude, about twenty Leagues Eaſt of *Hiſpaniola*, and as many South from Cuba. Its Length in *Engliſh* Miles is 140, and its greateſt Breadth 60. It is very fertile, and produces ſeveral Commodities more than any other of our Plantations do, as Cocoa, Pepper, and wild Cinnamon; of the firſt, however, there is a much leſs Quantity growing, than there was when the *Spaniards* were Maſters of this Iſle, proceeding from the Ignorance of the *Engliſh* in its Cultivation, it being of a very delicate Nature, and requiring great Care to ſhade and nurſe it, otherwiſe it continues barren, pines, and dies; and notwithſtanding every Precaution is practiſed, that has come to the Knowledge of our Countrymen, they cannot bring it to fructify as it formerly did; of Pimento there are great Quantities, which from its Form, and the Place of its Growth, is called *Jamaica* Pepper, and commonly here in *England* All-Spice; being of a fine high Flavour, and deſervedly reckoned the beſt, and moſt temperate of the many aromatick Drugs brought to us, principally from the *Eaſt-Indies*. The Bark of the wild Cinnamom is commonly, though falſely, called Cortex Winteranus, and is ſold here as ſuch; but this latter is a Native of the Straits of *Magellan*, from whence it was firſt brought by Captain *Winter*, who accompanied Sir *Francis Drake* in his Voyage round the World. Beſides theſe Commodities, there are ſeveral other Productions natural to *Jamaica*, as Cotton, which grows here in great Plenty, and finer than that of the *Caribbee* Iſlands; Tobacco, though cultivated in ſmall Quantities, Abundance of Fuſtick, Redwood, Logwood, and others, for Dying; beſides ſeveral Sorts of Wood that are ſweet ſcented. The Iſland alſo abounds in Medicinal Herbs and Drugs; as Guaiacum, China, Sarſaparilla, Caſſia, Tamarinds, Vanilloes, Variety of Miſſletoe, and ſeveral ſalutary Gums and Roots. ——Copper Mines have been diſcovered here, of which Metal I have ſeen a Sample from thence very fine and good; but all theſe Products muſt give Place to the Sugar Cane, which has brought ſuch immenſe Riches to the Inhabitants; and the Quantity is not only very great, but the Quality ſuperiour even to that of *St. Chriſtopher's* which is accounted the beſt in the *Leeward* Iſlands. It is difficult to aſcertain the Number of the Inhabitants; but Computations lately made demonſtrate that *Jamaica* is not ſo populous as it was at the Beginning of the preſent Century. We now reckon only about 25,000 Whites, and 90,000 Negroes;

whereas at the former Period it was ſuppoſed to contain 70,000 Whites, and 120,000 Negroes. The Inhabitants are all ſupplied with Clothes, Furniture, &c. from *Great-Britain*.

The Exports of the Iſland conſiſt of three principal Articles of native Growth: *Sugars* of which they export, after good Seaſons, about 20,500 Hogſheads annually; eſtimated in *England* at near 425,000*l*. Moſt of this goes to *London*, *Briſtol*, and *Glaſgow*; and from the two former to *Ireland*, before the Reſtrictions on the Commerce of that Kingdom were removed: Some Part is likewiſe ſent to *North-America*, and bartered for Staves, Planks, Pitch, Tar, and Proviſions. *Rum*, of which they export about 4000 Puncheons. *Melaſſes*, with which they trade principally to *New-England*. *Cotton*, of which they export about 2000 Bags.

I cannot quit the Subject without mentioning another beneficial Commerce chiefly carried on from this Iſland, *viz.* that of cutting Logwood in the Bay of *Campeachy*, to which we have an undoubted Right; and this has been ſo clearly proved by many Authors, as to put the Matter beyond Diſpute, notwithſtanding the continued Depredations of the *Spaniards* on this Account, to the no ſmall Detriment of thoſe who are concerned in this Branch of Buſineſs, and conſequently to this Nation in general, as no leſs than 14,935 Tons, 3q. 4lb. were imported in the Years 1713, 1714, 1715, and 1716; and were the Cutters properly protected, a Sufficiency might now be brought in for our own Uſe, and that of our Neighbours, without any Expence to the Government; and as this is not only clear Gain, but occaſions the additional Benefit of employing a conſiderable Number of Ships, I think it challenges a ſuitable Regard, as from what I have here mentioned, it may reaſonably be concluded, that the Profit accruing thereby, cannot be put at leſs than 100,000*l*. a Year.

Of the Lucayos, *or* Bahama *Iſlands*.

THESE lie in the *Atlantic* Ocean, between 21°, and 27°. of Northern Latitude, and from 73°. to 81°. of Weſtern Longitude, taking their Names from one of them called *Bahama*, which is ſituate in the Latitude of 26°. 30′. at the Diſtance of between twenty and thirty Leagues; ſay ſome, and 50 Leagues as others aſſert, from the Continent of *Florida*; but *Providence*, lying in the midſt of them, has been pitched on as the Seat of Government, when any has been ſettled here.

Theſe Iſlands were granted by King *Charles* II. to *George* Duke of *Albemarle*, and ſeveral other Noblemen, who ineffectually endeavoured to people them; for as ſoon as ſome Adventurers were got there, they were driven off by the *French* or *Spaniards*; and when this was not the Caſe, they contumaciouſly roſe againſt their Governors, whom they either deſtroyed, or ſent them away Priſoners, to the Diſſolution of all Polity and their own Deſtruction; ſo that after ſeveral Settlements made, and ſucceſſively deſtroyed, either by the Enemy or themſelves, theſe Iſlands became a Refuge for Pirates, till 1718, when King *George* I. appointed a Governor, who once more eſtabliſhed a Colony here, where there may now be between fifteen hundred and two thouſand People; though the having a Force in theſe Parts, ſeems more the Motive to their Settling, than what is expected from their Products, for as yet theſe have been but trifling, conſiſting in a little Tobacco, Sugar, *&c.*

Of the Bermudas, *or* Summer *Iſlands*.

THESE received their primitive Denomination from one *Bermudas* a *Spaniard*, their firſt Diſcoverer; and were afterwards called *Summer* Iſlands, from Sir *George Summers*, who was ſhipwrecked, and in another Voyage there reſigned his Breath. They lie within the Limits of the Grant that was made to the *Virginia* Company, who ſold them to an hundred and twenty Perſons of their own Society, and theſe afterwards obtained a Charter from King *James*, which confirmed their Property. This new Company ſoon endeavoured to render their Land profitable, by the eſtabliſhment of a Colony, and accordingly ſent a Ship there with the firſt Adventurers

Adventurers in 1610, under the Direction of Mr. *Richard Moore*, who made them an excellent Governor, and ſoon put them in a Capacity to defend themſelves, by building a handſome Town and ſtrong Forts, and by his prudent Management he diſappointed the *Spaniards'* Attempts to land on, and conquer theſe Iſlands, in 1614. His firſt Settlement was upon a Plain in *St. Goerge's* Iſland, where, from a Habitation of Palmeto Leaves, ſprang up *St. George's* Town, one of the ſtrongeſt and beſt built in our *American* Colonies.

This worthy Man was ſucceeded by Capt. *Daniel Tucker*, who being a Perſon of a ſuperior Education to his Predeceſſor, and having ſeen more of the World, exerted his Talents in Favour of the Colony now put under his Care, and eſtabliſhed a regular Form of Government, traced out Plantations, and obliged every one to build uniformly in the Town, and to plant regularly in the Country, ſo that a beautiful Symmetry was ſeen through the whole of their Improvements, and Pleaſure was thus blended with Profit.

In 1619, this vigilant Governor quitted to another, who then arrived from *England* with four Ships and five hundred Planters, which were equalled in Number by thoſe already ſettled there, ſo that the Colony began now to make a Figure; ſome Laws were ſettled, the Government directed to be, by Governor, Council, and Aſſembly, as in our other *American* Plantations, and Capt. *Tucker*, having before eſtabliſhed a Militia, they were ſecured againſt the Attacks of any Enemy.

The Number of theſe Iſlands are uncertain, as by ſome they are reckoned to be three hundred, whilſt others make them above five hundred. They lie in the Latitude of 32°. 30′. North, and in 35°. of Weſtern Longitude, a great Diſtance from the Continent, as the neareſt Land, which is *Carolina*, lies at leaſt two hundred and fifty leagues, as Mr. *Harris*, or four hundred and eighty Miles, as Mr. *Echard* ſays, to the Weſt of them.

The Air is deemed extremely wholeſome, and the Country vaſtly pleaſant; the Soil is rich and fertile, inſomuch that *Indian* Corn, their chief ſupport, is reaped twice here, between the Months of *March* and *December*, and all the Plants, Flowers, and Trees peculiar to the *Weſt-Indies* grow here in great Perfection, as thoſe tranſplanted from *Europe* do; and beſides, among the Fruits, the Oranges here in every Reſpect exceed thoſe either of the *Eaſt* or *Weſt-Indies*, as among the Foreſt Trees the Cedar does for any Uſe or Purpoſe whatſoever, more particularly in Ships, ſo that the *Bermudas* Sloops are become famous, both for Service and Sailing.

St. George's Town, the Capital, has no leſs than ſeven Forts to defend it, though indeed the whole Coaſt, and the unknown Rocks, are natural Bulwarks to this Country, ſo that the Inhabitants live free from the Apprehenſions of an Enemy, and as happy as a mild Government, and a delightful Country, can make them. It is true, that the pleaſing Proſpect of Riches has been the principal Attraction to the peopling of moſt of our other Colonies, though the ſettling theſe Iſles was apparently from different Motives, as their Trade is very limited, and conſequently the Opportunities of making a Fortune very rare; ſo that the greateſt Inducement the State had to ſettle them, was to keep them from being poſſeſſed by any other Nation; but that ariſing to the Adventurers, was to ſecure to themſelves a ſafe and quiet Retreat from the Cares and Tumults that the other Parts of the World laboured under, of which they had none here to ruffle and diſturb them; ſo that many with this philoſophick Diſpoſition, and that could content themſelves with the Pleaſures and Plenty of the Country, retired here with their Fortunes, as others did to procure or preſerve Health, and ſome few on Account of Religion.

Their Trade chiefly conſiſts in Timber and Proviſions, which they ſend to the other Parts of *America*, a ſmall Quantity of Tobacco, and the building of Sloops, as before-mentioned; ſo that though it has for ſome Time been a very flouriſhing Colony, it is very little beneficial to the Mother Country, otherwiſe than by the Clothing and other Neceſſaries it takes from us, which cannot be inconſiderable, when the ſmalleſt Computation makes the Inhabitants to be in Number at leaſt nine thouſand.

Of

Of NEWFOUNDLAND.

OUR Right to this Iſland has already been inconteſtibly proved by ſeveral good Authors, ſo that any Advances towards it would be ſuperfluous here. It lies between 47 and 50°. Northern Latitude, and is ſo far from being that cold and inhoſpitable Country that many have repreſented it, that St. *John's* and ſome other Places have been conſtantly inhabited for many Years paſt: It is very warm in the Summer, and though the Snows lie long in the Winter, moſt Sorts of *European* Fruits grow wild here; however, were there fewer in Number, and the Soil much worſe than it is, the Advantages of our poſſeſſing it would ſtill ſubſiſt, as theſe do not reſult from what grows here, but from the Fiſhery upon its Coaſts and Banks, and the natural Conſequences of it.

Mr. *Parkhurſt* has given us an Account of its State in 1578, when he ſays, there were about fifty Sail of *Engliſh*, one hundred Sail of *Spaniſh*, beſides twenty or thirty Sail of *Biſcayneers*, fifty of *Portugueſe*, and a hundred and fifty *French* Ships, employed upon that Coaſt, ſo that the Fiſhery muſt have begun long before, to be at ſuch a Height ſo early, and the Importance of it was quickly diſcovered by Queen *Elizabeth's* wiſe Miniſtry, and by them ſo encouraged, that towards the Cloſe of her Reign, upwards of two hundred Sail of fiſhing Veſſels were employed, and theſe navigated with more than eight thouſand Seamen.

The Fiſhery has greatly increaſed ſince the ſole Poſſeſſion of it was confirmed to the Crown of *Great-Britain*; and we can have no better Proof of the aſtoniſhing Improvements, and of the national Benefits of this valuable Branch of our Commerce, than a comparative View of the different Statements of it given in at the Bar of the Houſe of Commons in the Years 1775, and 1787. At the firſt Period, it appeared that four hundred Ships, whoſe burthen was not leſs than 36,000 Tons, 2,000 Shallops, burthen 20,000 Tons, and 20,000 Seamen, were employed in this Fiſhery; that 600,000 Quintals of Fiſh were annually taken, which, upon an Average of ſeven Years, were worth 14*s*. *per* Quintal, and together with the Value of other Articles, independent of Cod Fiſh, as Salmon, Cod Oil, Seal, and Furs, amounted annually to more than half a Million *Sterling*.

In 1787; the Report made to Parliament was, that ſince the Encouragement given to the *Newfoundland* Fiſhery, by the ſeveral Acts of Parliament already noticed, under the Head of Shipping, the *French* Fiſhery had conſiderably diminiſhed; while the *Britiſh* had increaſed to ſuch a Degree, that 732,000 Quintals of Fiſh had been taken by our People that Year; and that this Nurſery for Seamen was annually increaſing; as well as the Demand for the Articles from home, neceſſary for carrying it on, and for Conſumption on the Spot, *viz*. Biſcuit, Beef, Pork, Butter, Cheeſe, Linen and Woolen Cloths, Nets, Hooks, Lines, *&c*. Theſe Conſiderations therefore determined the Legiſlature to continue all the Acts made of late Years for the Encouragement of this Fiſhery; particularly, that which authoriſes the Trade between the Ports of the *United States* of *America*, and the *Britiſh* Settlements at *Newfoundland*.

I now return to *Europe*, where I have only our Trade to the *Baltick*, and with the northern Countries to treat of; and as *Ruſſia* ſtands foremoſt in Dignity, I ſhall give it the ſame Preference here, and begin with it.

An Account of the Trade between GREAT-BRITAIN *and* RUSSIA, *carried on by the* RUSSIA *Company*.

OUR Trade with the *Ruſſians* is very conſiderable, and was always greatly encouraged by the *Britiſh* Government; but the flouriſhing State of our *American* Colonies would have reduced our Imports of Naval Stores from *Ruſſia*, if the unhappy Revolt of the *North-American* Colonies had not taken place, which has again increaſed the Balance of Trade, which was always againſt us, with this Empire. The ſtrong political Alliance which has taken Place between *Great-Britain*, and the Empreſs of *Ruſſia*, CATHARINE II. likewiſe greatly contributed to advance her commercial Connections with us; but ſtill the Improvements made

made in the Linen Manufactures of *Ireland* and *Scotland* have contributed not a little, of late Years, to diminiſh our Demands for ſimilar Manufactures from *Ruſſia*, particularly in the Articles of Sail-Cloth, Sheeting, coarſe Linen for Towels, table Linen, &c.

But the Treaty of Commerce with this Country, entered into for *twenty Years*, expired in 1786, and a Reluctance to renew it on the Part of the Empreſs, combined with ſome Difficulties in the Arrangement of it; and a political Coolneſs between the two Courts, has hitherto prevented any new Treaty, and not a little embarraſſed the Merchants of both Countries.

This Commerce is carried on by a Company, projected in the Reign of *Edward* VI. though not eſtabliſhed by Patent, till the 6th of *February*, in the 1, and 2, of *Philip* and *Mary*, whereby was incorporated, *The Merchants Adventurers for the Diſcovery of Lands unknown, and not before frequented*, with Power that the ſaid Fellowſhip ſhould have the ſole Trade to all the Main Lands, Iſles, &c. of the Emperor of *Ruſſia*; which Letters Patent were, by an Act of Parliament 8 *Eliz.* not printed, confirmed to the ſaid Company, by the Name of *The Fellowſhip of* Engliſh *Merchants for Diſcovery of new Trades*, with an Excluſion of all other Subjects from this Trade, without the Conſent of the Governor, Conſuls, and Aſſiſtants; though by 10 and 11 *Will.* III. Cap. 6. Sect. 1. it is enacted, that every Subject of this Realm, deſiring Admiſſion into the ſaid Fellowſhip, called the *Ruſſia* Company, on Requeſt to be made to the Governor, Conſuls, and Aſſiſtants, or any three of them, ſhall be admitted into the ſaid Fellowſhip, paying for ſuch Admiſſion 5*l.*

Any Perſon reſiding in any Out-Port, or other Place within this Realm, ſhall be admitted on the ſame Terms.

And it was ſince enacted, That from and after the 24th of *June*, 1741, any Perſons free of the ſaid Fellowſhip of *Engliſh* Merchants for Diſcovery of new Trades, commonly called the *Ruſſia* Company, excluſive of all others, may import into this Kingdom, in *Britiſh*-built Shipping, navigated according to Law, from any Place belonging to *Ruſſia*, raw Silk, or any other Commodities, of the Growth or Manufacture of *Perſia*, provided ſuch Manufacture be made of the Produce of *Perſia*, being purchaſed by Barter, with Woollen or other Manufactures, exported from *Great-Britain* to *Ruſſia*, and from thence carried into *Perſia*, Gold and Silver in Coin or Bullion excepted, or with the Produce ariſing from the Sales of ſuch Manufactures, ſo exported to *Ruſſia*, and carried into *Perſia*, upon paying or ſecuring the Cuſtoms and other Duties now payable, by any Law now in Force, according to ſuch Rules, and with ſuch Drawback, and under ſuch Penalties, as are by Law preſcribed, on the Importation of the like Goods of the Growth, Produce, or Manufacture of *Perſia*, imported into this Kingdom from any Place in the *Levant* Seas, by any Perſons free of the *Levant* or *Turkey* Company; any Thing in the Act of 12 *Car.* II. to the contrary notwithſtanding.

No Silk, or other Manufactures of *Perſia*, ſhall be imported into *Great-Britain* through *Ruſſia*, by Virtue of this Act, unleſs the Importers take an Oath, or Affirmation, before the Collector, Cuſtomer, or Comptroller of his Majeſty's Cuſtoms, at the Place of Importation; that, to the beſt of their Knowledge, the Silk, and other Manufactures of *Perſia*, contained in their Entries, were truly purchaſed by Barter with Woollen, or other Manufactures, exported from *Great-Britain* to *Ruſſia*, and from thence carried into *Perſia*, not being Gold or Silver in Coin or Bullion, or with the Produce ariſing from the Sales of ſuch Woollen, or other Manufactures exported as aforeſaid: And in Default of taking ſuch Oath or Affirmation, all the Manufactures of *Perſia*, ſo imported from *Ruſſia*, ſhall be liable to be forfeited, as if the ſame had been imported, contrary to the ſaid Act of 12 *Car.* II. P. 678.

This Act does not extend to the permitting the uſing or wearing in this Kingdom any wrought Silks, or other Commodities of the Manufacture of *Perſia*, mentioned in the Act of 11 *Will.* III. which Act is hereby confirmed, &c.

Whereas ſoon after the Commencement of the aforeſaid Act of 14 *Geo.* II. a very beneficial Trade between *Great-Britain* and *Perſia* through *Ruſſia* was opened, whereby great Quantities of raw Silk, and other Goods and Commodities of the Growth or Manufacture of *Perſia*, were imported in Return for the Woollen and 23 *Geo.* II. P. 584.

other Manufactures and Goods of *Great-Britain*, upon much eaſier and more advantageous Terms, than the ſame could have been otherwiſe procured; but the ſaid Trade having been for ſome Time paſt interrupted, the Subjects of *Great-Britain* not having been of late permitted, to tranſport *Britiſh* Manufactures and Commodities into *Perſia* through *Ruſſia*, in Conſequence whereof, the Importation of raw Silk, and other Commodities of *Perſia* from *Ruſſia*, hath been diſcontinued: And as it would be of great Advantage to the Trade of this Kingdom in general, as well as contribute to the Increaſe and Improvement of the Silk Manufactures in particular, if raw Silk of the Growth or Produce of *Perſia*, purchaſed in *Ruſſia*, were permitted to be imported from *Ruſſia* in Return for Woollen and other Manufactures exported from *Great-Britain* to *Ruſſia* although the ſame be not carried from thence into *Perſia*, it is enacted, That from and after the 25th of *December*, 1750, all Perſons free of the *Ruſſia* Company, excluſive of all others, may import into this Kingdom from *Ruſſia*, in *Britiſh* built Shipping, navigated according to Law, raw Silk of the Growth or Produce of *Perſia*, which ſhall be purchaſed by Barter, with Woollen, or other Manufactures or Commodities exported from *Great-Britain* to *Ruſſia*, although the ſame be not carried from thence into *Perſia*, Gold and Silver in Coin or Bullion excepted, or with the Produce ariſing from the Sale of ſuch Commodities, and not otherwiſe, upon paying the Cuſtoms and other Duties, *&c.*

23 *Geo.* P. 585.

No Silk of the Growth or Produce of *Perſia* ſhall be imported from *Ruſſia*, by Virtue of this Act, unleſs the Importer make Oath before the Collection *&c.* that it was purchaſed by Barter, *&c.*

This Act ſhall not deprive the *Eaſt-India* Company of any of the Powers and Privileges, *&c.* which belong to them, or which they might have enjoyed if this Act had not been made.

In Conſequence of theſe Acts, the Company have ſomething increaſed their Trade, and would undoubtedly have enlarged it more, had not the Troubles in *Perſia* put a Stop to their Deſigns.

In Return, we import from thence, *extra* of the *Perſian* Commodities, Pitch, Tar, Bees-Wax, *Ruſſia* Leather, Skins, Furs, Pot Aſhes, Iron, Copper, Hemp, Flax, Linens, and Linen Yarn, Linſeed, Cavear, Sail-Cloth, *&c.*

And our Exports are, Woollens of various Sorts, Silks, Paper, Mercery, and Hard-wares, Arms, Powder, Brimſtone, Lead, Tin, Pewter, Herrings, Incenſe, Copperas, White Lead, Dying Woods, Gold and Silver Thread, Lace, Sugar, Pepper, Tobacco, *&c.*

Of the Trade between Great-Britain, Denmark, *and* Norway.

THOUGH the *Danes* are Maſters of one of the ſafeſt and fineſt Ports in *Europe*, I mean *Copenhagen*, yet their Trade has always been inconſiderable, comparatively with that of other Powers, as their Country affords but little towards carrying it on; however of this I ſhall have Occaſion to ſpeak when I come to treat of thoſe Kingdoms; Our Exports there are but trifling, being reduced to a few Woollens, Paper, Drugs, Pepper, Tin, Herrings, *&c.* and as our Imports greatly exceed our Exports in Value, this muſt conſequentially be a very loſing Trade to us, and as ſuch ſhould have been dropped long ago; more eſpecially as every Commodity we receive from thence, might be better furniſhed from our own Plantations, they conſiſting principally of Pitch, Tar, Fir, Timber, Deals, Maſts, Yards, Spars, Baulks, ſome few Furs, Skins, *&c.*

Of Great-Britain's *Trade with* Sweden.

THIS is a more conſiderable, though not a more beneficial Commerce than the laſt mentioned, as the Balance is greatly againſt us, and might eaſily be remedied by the frequently propoſed Means, of encouraging a Supply from our own *American* Settlements, as the Imports from thence are pretty near of the ſame Sort with thoſe from *Denmark*, viz. Pitch, Tar, Hemp, Flax, Furs, Copper, and Iron,; and they in Return take from us, Broad Cloth, fine Stuffs, and ſome other Woollens, wrought Iron, and Braſs, Horological Works, Paper, Pepper, Tin, Herrings, Drugs, *&c.*

Of

Of the Commerce between Great-Britain, Poland, *and* Pruſſia.

THIS Trade is of no great Importance, nor varies much from the two laſt mentioned, though it is not ſo ſmall as to be left out in a Work of this Nature, as it takes off pretty large Quantities of our Manufactures, though principally through the Medium of the *Dutch: Poland* has no other Ports than *Dantzick* and *Elbing*, from whence we import Naval Stores, as from *Denmark* and *Sweden*, with ſome Iron, Steel, Pot Aſhes, Sturgeon, Linen, and Sail Cloth; and, in Return, ſend them ſeveral Sorts of Woollens, Herrings, Mercery, and Drapery; ſome Tobacco, Sugar, Rice, *&c.* as we do the *Stetiners* in *Pruſſia*, though from thence we receive but very little in Return. *Dantzick* alſo furniſhes us with Spruce Beer, and Bees' Wax, as both this and *Stetin* do with Eaſt Country Plank.

Of the Trade which Great-Britain *carries on with the* Auſtrian Netherlands.

THIS is a very extenſive and beneficial Commerce, as it takes off great Quantities of our Products and Manufactures.

We ſupply them with a vaſt Variety of Articles, the chief of which are *Yorkſhire* Woollen Cloths, particularly White plains for Clothing their Military; *Norwich* Stuffs, *Mancheſter* Cottons, fine Worſtead Stockings, Hard-ware of all Sorts, Paper-hangings, Crockery, Rock-Salt, Slates, Alum, Tin, Lead, and ſince the Port of *Oſtend* has been made free, Houſehold Furniture, Sadlery, Horſes, *&c.* In fine, for the Extent of it, *Great-Britain* does not enjoy a more beneficial Branch of Commerce; the Returns being principally made in Specie.

Our Imports conſiſt of Thread-Lace, a ſmall Quantity of Damaſk Table Linen, Lawns, and other fine Linen, Rags for our Paper Mills, Apples, Potatoes, old Iron, and other trifling Articles.

This finiſhes my Account of the Trade of *Great-Britain*, which I have endeavoured to render as plain to my Readers as I poſſibly could in ſo limited a Space: And I proceed to give an Abſtract of that carried on in *Ireland*, which I ſhall do in the ſame Manner as I have hitherto obſerved. Having diſplayed the Greatneſs of its Products and Manufactures; in a former Chapter, I have now to add an Account how they are diſpoſed of.

Of IRELAND.

THE Products of *Ireland*, as has been already ſhewn, are ſimilar to thoſe of *Great-Britain*; and it was always the Opinion of the beſt commercial Writers, that if the Reſtraints laid upon her Commerce by *Britiſh* Acts of Parliament ſhould ever be taken off, their Manufactures would be equal in Quantity and Quality, if they did not riſe to a Degree of Superiority from the Cheapneſs of Labour in *Ireland*. We have now ſeen theſe Reſtraints removed, and a new commercial Syſtem eſtabliſhed, founded upon this Maxim, that the commercial Improvement of *Ireland* muſt, in the End, prove advantageous to *Great-Britain*.

At the Time of publiſhing the laſt Edition of our Work, the beneficial Effects of this ſtriking Revolution in Commerce were but beginning to operate; and the Editor only foretold what has actually happened: Happily the conſtant Demand for this Book, by the Gentlemen of the Long Robe, and the Merchants and Traders of *Great-Britain*, *Ireland*, and *America*, has produced the preſent Edition, in which he is enabled from authentic Documents to ſtate the prodigious Increaſe of the Commerce of *Ireland*, and the reciprocal Benefit that both Kingdoms have derived from thoſe liberal Regulations made in Favour of *Ireland* by the *Britiſh* Legiſlature. And that the Contraſt between former Times and the preſent may be more evident, he has judged it neceſſary to retain ſome of the old Eſtimates and Calculations.

The *Iriſh* poſſeſs the Principles of the Woollen Manufacture, *viz.* Wool, Fuller's Earth, *&c.* in as great a Degree of Perfection as we, and the Cheapneſs of their Living gives them vaſtly the Advantage in working them up, both in Reſpect of the Value of the Materials, and the Price of Labour; ſo that were not their Exports thus prohibited, their Commerce would greatly claſh with our's, and

this Interference prove prejudicial to both; therefore to alleviate this ſeeming Hardſhip as far as a prudential Care of our own Trade will ſuffer, the *Iriſh* are permitted, not only to introduce their Wool here, but to import their Yarn alſo, which they annually do to the Amount of forty thouſand Packs; and though this Reſtriction undoubtedly contracts their Trade, and reduces it into a much narrower Compaſs than would otherwiſe bound it, yet this being the only one they are burthened with of ſuch a Nature, their foreign Trade is very conſiderable, notwithſtanding it is confined to the mere Produce of their Land, and Linen-Looms; the firſt of theſe conſiſt chiefly in Beef, Pork, Butter, Leather, Tallow, and Corn, and for the Diſpatch of what is ſuperfluous, and unconſumed at Home, they have different Channels, *viz.* to *Flanders* they ſend Tallow and Leather, in great Quantities; and Butter to *Holland*; *France* and the *Britiſh Colonies* take off large Parcels of their barrelled Beef, as theſe latter do now of their Linens, which are alſo permitted to be imported here Duty free, ſo that many Millions of Yards are annually brought in; they likewiſe ſend yearly good Store of Pilchards and Herrings to *Spain* and *Portugal*; ſo that their Exports are very great. However, to give the Reader a better Idea of them, we preſerve ſome Extracts of the Imports and Exports from Mr. *Dobbs's* curious Calculations.*

The following is an Abſtract of the General Imports and Exports from 1710 to 1726, ending at *Lady-Day*.

Years.	Exports.			Imports.			Balance.			Contra Balance.		
	l.	*s.*	*d.*	*l.*	*s.*	*d.*	*l.*	*s.*	*d.*	*l.*	*s.*	*d.*

Med.	497,024	6	8	Med.	126,752	17	1
	Medium of Cattle and Sheep				623,777	3	9

We have no ſuch Tables at preſent; and the Exportation of Sheep being long ſince prohibited, it will be to the full as ſatisfactory to ſtate the general Increaſe of the Produce of live, and ſlaughtered Cattle: The three Species of which exported from *Ireland* are Bullocks, Cows, and Hogs; and to theſe we muſt add other Articles, as Tallow, Hides, Butter, Cheeſe, *&c.* comprehended under the Produce from Cattle.

The average Amount for five Years ending the 25th of *March*, 1782, was 1,293,858*l.* yearly; which is about one-third of the Value of eight Years, in the preceding table. And one Article alone will ſuffice to ſhew the prodigious Increaſe of the Trade of *Ireland* to *England* alone, ſince Proviſions from that Kingdom were permitted by the *Britiſh* Legiſlature.

The Quantity of Pork imported into *England* alone for the Year ending 5th *January*, 1783, was 45,995 Barrels, which exceeds, according to Lord *Sheffield's* Calculations, the whole Export of Pork to all Parts of the World, from *Ireland*, twenty Years ago. The Article of Butter has increaſed nearly in the ſame Proportion.

The Produce of the Exports of Grain and Fiſh.

Years.	Grain. *l.*	*s.*	*d.*	Years.	Fiſh. *l.*	*s.*	*d.*
1719	56,145	0	11	1719	15,169	16	6
1720	44,253	2	$4\frac{1}{2}$	1720	13,669	10	9
1721	38,208	15	$8\frac{1}{2}$	1721	12,055	10	$2\frac{3}{4}$
1722	17,664	12	$11\frac{1}{4}$	1722	16,246	17	5
1723	42,154	3	$8\frac{3}{4}$	1723	11,313	12	10
1724	47,410	4	1	1724	15,713	9	7
1725	18,515	3	9	1725	17,544	10	0
1726	27,005	2	$4\frac{1}{2}$	1726	15,911	16	6
Total	291,356	5	$10\frac{1}{2}$	Total	117,625	3	9^{3}
Med.	36,419	10	$8\frac{3}{4}$	Med.	14,703	2	11

For the Year 1783, the Exports of Grain to *England* alone amounted to 38,146*l.* With reſpect to the Fiſheries, they have never been purſued with

that Activity and Aſſiduity which might have been expected from the Situation of the Coaſts. The Herring Fiſhery is the principal Branch; and it may ſuffice to mention, that *Ireland* exported for the *Weſt-India* Trade alone in 1783, no leſs than 35,960 Barrels, the Value of which by far exceeds the Value of the Exports of all Kinds of Fiſh from *Ireland*, in Mr. *Dobbs's* Table for 1726.

The Produce of the *Engliſh* Linen.

Years.	Linen.		
	l.	*s.*	*d.*
1719	268,021	13	0
1720	214,217	13	6
1721	259,519	8	0
1722	312,964	12	0
1723	281,549	13	6
1724	275,573	9	10
1725	323,628	16	0
1726	342,295	0	9
Total —	2,277,770	6	7
Med. —	284,721	5	$9\frac{7}{8}$

The Exports in Linen Cloth to *England* alone, for 1783, amounted to 948,180*l.* 9*s.* 2*d.* being nearly three Times the Value of the Exports to all Nations for the Year 1726.

The Imports into *Ireland* from all Nations, at a Medium of ſeven Years, ending at *Lady-Day* 1727, amounted to 843,392*l.* And the Imports from *Great-Britain* alone, of the Growth and Manufacture of *Great-Britain*, on an Average of three Years, ending *March* 25th, 1783, amounted to 1,432,417*l.*

The Value of the Goods and Merchandize being the Growth, Product, or Manufacture of *Aſia*, imported into *Great-Britain* by the *Eaſt-India* Company, and from thence imported into *Ireland*; for three Years, from 25th *March*, 1780, incluſive, to 25th *March*, 1783, incluſive, was, 1,056,050*l.* 2*s.* 0*d.* and conſiſting of the following Articles, Drugs, Spices of different Kinds, Rice, India Silks, Callicoes, Muſlins, Salt-Petre, China, Raw Silks, Teas.

Thus ſtands the Trade between *England* and *Ireland*. I ſhall next conſider the Commerce of *Ireland* with *Scotland* and the *Iſle of Man*, annexing an Abſtract of the *Iriſh* Exports and Imports, for the Term of eight Years, as follows:

Years.	Exports.			Imports.		
	l.	*s.*	*d.*	*l.*	*s.*	*d.*
1719	13,690	19	0	37,868	19	$3\frac{1}{4}$
1720	10,352	4	4	27,706	18	$4\frac{3}{4}$
1721	11,256	15	$2\frac{3}{4}$	29,151	10	$11\frac{1}{2}$
1722	14,398	2	$9\frac{1}{4}$	27,468	14	$10\frac{1}{2}$
1723	23,578	5	8	33,497	2	$4\frac{1}{4}$
1724	21,250	0	3	31,003	0	$1\frac{1}{4}$
1725	10,023	12	4	38,938	0	$3\frac{3}{4}$
1726	9,384	2	$0\frac{3}{4}$	29,762	12	$2\frac{3}{4}$
Total	113,934	1	$7\frac{3}{4}$	255,396	19	6

The Exports to *Scotland* for the Year ending 25th *March*, 1783, amounted to — 123,897*l.*
The Imports to 171,670.
} So that the Exports for that Year, exceeded the Value of the Total of eight Years, in the preceding Table.

The Exports to *Scotland* and the *Iſle of Man* conſiſt of Oatmeal and other Grain, Beef and Kine, Horſes, Hides, Butter, Cheeſe, Soap, Linen, and Mutton, with ſome other Articles, and Wine and Brandy.

The Imports from thence conſiſtof Coals, Tobacco, Bark, Brandy, Barley,

and Malt, Groceries, Linen, and Kenting, Wine, Timber, Linen Yarn, and Herrings.

The following is an Abſtract of the Exports to *America* for the ſame Number of Years, *viz.*

	l.	*s.*	*d.*
1719	77,190	8	$8\frac{1}{2}$
1720	88,980	18	9
1721	68,404	3	$2\frac{1}{2}$
1722	74,344	9	$6\frac{3}{4}$
1723	82,806	6	$9\frac{3}{8}$
1724	96,825	8	10
1725	103,998	2	$4\frac{1}{2}$
1726	110,313	19	$7\frac{1}{4}$
Total	702,863	17	$9\frac{7}{8}$

The Exports to the Colonies remaining ſubject to *Great-Britain*, for the Year ending 25th *March*, 1783, amounted to 381,617*l.* 1*s.* 7*d.* which exceeds the Value of any three Years to *all America*, in the foregoing Table. The Calculations reſpecting the Trade of *Ireland* with the *United States* of *America* cannot be made out exact, on Account of the very conſiderable Imports in Tobacco and other Articles, ſince the Commerce of *Ireland* was liberated from the former Reſtrictions of not trading directly to the *American* Colonies; but receiving all Goods and Manufactures of the Growth and Product of thoſe Colonies by Reexportation from *Great-Britain*, in *Britiſh*-built Ships. But the prodigious Increaſe of this Branch of the Commerce of *Ireland*, may be readily conceived by the Amount of the preceding Article.

The next particular Trade to be conſidered is the *Eaſtland*, which comprehends all the Countries northward of *Holland*, upon the Continent, from *Embden* to *Archangel*, the *Sound* and *Baltick* conſequently included.

The Exports conſiſt of Beef, Biſcuit, Butter, Beer, Cheeſe, Grain, raw and tanned Hides, Oat-meal, Linen, Calves' Skins, Tallow, Malt, Salt, Pork, Soap, Gun Powder, and the Remainder is made up of ſeveral ſmall Articles, not material in Trade. The Imports to *Ireland* conſiſt of Bark, Copper Plates, Flax, and Seed, Sugar, Hemp, Iron, Lamp Black, Herrings, Train Oil, Tin Plates, Tar, and Wood, the Remainder being made up of Linen Yarn, Pot-Aſh, Lattin Wire, and other ſmall Things.

The next Trade to be examined in a Southward Progreſs, is that with *Holland* and *Flanders*.

The Exports thither chiefly conſiſt of Beef, Biſcuit, Butter, Candles, Feathers, Salmon, raw Hides, Pork, Rape Seed, Hogs' Lard, and Tallow, with ſeveral other Particulars not material; and the Imports from thence are Bark, Wheat, Battery, Braſs Shruff, Books unbound, Drugs, Madder, and other Dying Stuffs, Earthen Ware, Flax, Groceries, Geneva, Gunpowder, Inkles, Thread, Hemp, Iron, Bone-Lace, Cambricks, Hollands, Flax Seed, Linſeed Oil, Paper, Pot-Aſh, Starch, Garden Seeds, Silk Manufacture, Steel, Whalebone, *Rheniſh* Wine, Wooden Ware, Iron, Lattin and Steel Wire.

The next particular Trade that falls regularly in our Way to be obſerved, is that of *France*.

The Exports conſiſt of Beef in Barrels, Pork, Biſcuit, Butter, Candles, raw Hides, and Tallow; the other Articles of ſmall Value in Trade are not worth inſerting. The Imports from thence are Wine, Brandy, Capers, Playing Cards, Cork, Flints, Gloves, Prunes, Succus Liquor, Sugar, Iron and Iron Ware, Cambricks, Lawns, Train Oil, Olives, Copper-plate Printing Paper, Rezin, Salt, Silk Manufacture, Toys and Trinkets, Vinegar, Groceries, Wooden Ware.

Though the Exports for *France* cannot be aſcertained to any Nicety from the Cuſtom-houſe Books, as Merchants are not reſtrained in their Entries, for reporting their Goods for one Country when they are deſigned for another, as is frequently the Caſe in this Trade; for the Entries are made for that Kingdom, when

when the Merchandize is intended for *Hamburgh*, *Bremen*, or *Holland*, and this with the View of evading Payment to the ſeveral *Britiſh* Light-houſes in their Way to the ſaid Places, towards whoſe Support all Ships pay in the firſt Port they put in at, and are charged with ſo many as they are benefited by in their Voyage; now if it appear, by their Cocket, that they are bound for theſe Ports, they pay towards the Maintenance of them all; but if for *France*, and they are ſuppoſed to be blown there out of their Way, they are charged for no more than they are preſumed to receive Benefit from, and hereby elude the ſeveral Charges they muſt otherwiſe pay.

Mr. *Dobbs* makes ſeveral Allowances for an illicit Trade, *&c.* too long to be inſerted here, and then concludes from the Premiſes, that *Ireland* loſes by her Trade with *France*.

The laſt in Order, though the greateſt Branch of the *Iriſh* Trade with Foreigners, is with *Spain*, *Portugal*, and the *Straits*, as theſe take off the major Part of any manufactured Commodities they export, except Linen.

The Exports to the afore-mentioned Countries are, Beef, Candles, Cheeſe, Barley, Wheat, Hake, Herrings, Salmon, Hair, raw Hides, Tanned ditto, Linen, Pork, Calf Skins, Starch, Tallow.

The Imports from them are Capers, Cork, Dying Stuffs, Sugar and Fruit, Oranges and Lemons, Iron, Oil, Salt, Silk Manufactures, Raw Silk, Thrown Silk undyed, Succus Liquor, Walnuts, *Port* Wine, *Spaniſh* Wine, Hoops, Cane, Reeds, and Plank, Wool.

The blameable Inaccuracy in the Cuſtom-Houſe Accounts in *Ireland*, the great Fluctuations in the Commerce of that Country, with the principal Kingdoms and States of *Europe*, and other Circumſtances, render all Tables of the Amount of any particular Trade incorrect, eſpecially as ſuch Amount muſt be calculated by the Value in ſterling Money, at which they are rated by the Piece, the Yard, the Pound, or the hundred Weight; for which Reaſon, we have followed our beſt modern Guide, *Lord Sheffield*, and from him give the following ſhort Statement of the Amount of the general Trade of *Ireland*, with all the foreign Countries of *Europe*.

	£.	s.	d.
Total *Iriſh* Produce *Exported* to foreign Countries, on an Average of nine Years, ending *March* 25th, 1782,	345,118	10	9
Ditto, exported to ditto, in the Year ending *March* 25th, 1783, - - - - - - - -	584,222	19	3
Total *Imports* from foreign Countries on an Average of nine Years, ending *March* 25th, 1782, - - -	605,117	4	0
Ditto from ditto, in the Year ending *March* 25th, 1783,	679,289	8	7

By the Imports ſo far exceeding the Exports, falſe Concluſions may be drawn, as they have been by Mr. *Dobbs*, and we are ſorry to add, by our more intelligent commercial Writer, *Lord Sheffield*. Whenever the Imports from any Country exceed the Exports, they ſtate the Balance of Trade to be againſt the Importer. No reaſoning can be more fallacious, if the Article imported, as in the Caſe of *Ireland*, and forming ſuch a Balance, conſiſt of the firſt Materials for its principal Manufactures, to be wrought up to the higheſt State of Perfection, and to be ſo exported, with the Addition of the Labour of the Inhabitants, to other Countries, with a conſiderable Profit. For Inſtance, 6207 *cwt.* of Flax, and 11,415 *cwt.* of Hemp were imported into *Ireland* from the Eaſt Country in one Year, and contributed to raiſe the Value of the Imports above the Exports; and a Balance muſt have been paid to the Eaſt Country in Specie, or Bills of Exchange: This has been uſually called a Loſs; but the Sum ſo paid produces a Profit, beyond any derived from Barter, and is received back again, with Intereſt, in the Payments for the Linens manufactured by the *Iriſh* and exported to *Britain* alone. Without a large Quantity of Flax and Hemp in Store, this valuable Manufacture, the chief dependance of *Ireland* might ſtagnate; beſides, a bad Seaſon, or a prohibitory Law paſſed in the Country from whence you import your firſt Materials, may put a ſtop to it for a Time; therefore, in every

Point of View the firſt Price of raw Materials is not to be taken as their real Value, nor a Payment in Specie, above the Value of the Goods exported, as a loſing Trade, or Balance againſt the Country, ſo circumſtanced.

We conclude this ample Account of the Trade of *Ireland* with obſerving that the Shipping of *Ireland* bears no Proportion to its increaſing Commerce. The *Engliſh*, *Scotch*, *Daniſh*, *Dutch*, *French*, *Spaniſh*, and *Portugueſe*, all have a conſiderable Share in the carrying Trade of *Ireland*.

Of the Products, Manufactures, and Trade of FRANCE.

THE COMMERCE of this Kingdom bears a Proportion to the Number of its Inhabitants, and the Extenſiveneſs of its Dominions; of which ſome Idea may be formed from the Calculations made of its annual Revenue, which is eſtimated at 25,000,000*l.* and the Number of its Inhabitants, by the lateſt Computations, appear to be about 25,000,000.

In treating of the Commerce of this Country, I ſhall obſerve the ſame Method that I have followed in my Deſcription of *Great-Britain's*, that is, by acquainting my Reader with the Products and Manufactures of each Province, and then ſhew him how they are diſpoſed of.

1. *The* Iſle *of* France.

THE Capital of which is *Paris*, where many Manufactures are carried on, and afterwards brought into Trade, of which ſome are exempt from the Juriſdiction of the public Companies of the City, and eſtabliſhed by Royal Authority; ſuch as the *Gobelins*, where as beautiful Tapeſtries are made as any in *Europe*; the *Savonnerie*, appropriated to the making of Carpets with a Mixture of Silk and Worſtead, in Imitation of thoſe brought from *Perſia*, the Beauty of whoſe Colours they come up to, and greatly exceed them in the Figure. The Manufactures of Glaſſes, Cloths, Hangings, *&c.* beſides which the Artificers here carry on all Manner of Trades that are practiſed in our Metropolis; though it is with Pleaſure I can aſſert, not many of them with equal Perfection. Here, however, are made all Sorts of rich Silks, Brocades, *&c.* Stockings, Hats, and every other Requiſite for Home Conſumption and Trade; and almoſt all the ſmall Towns, Villages, and Diſtricts in the Neighbourhood of *Paris*, have ſome Fabrick particular to them; as *Madrid*, a Caſtle built by *Francis* I. in *Boulogn* Wood, famous for Stockings; *St. Cloud*, for Porcelaine, Earthern Ware, Glaſs, and Tanneries; *Gentilly*, *Garges*, and *Antony*, are noted for Whitſters; at *Ferté Gaucher* is a Manufactory of Serges; *Compeigne* affords Stockings, Socks, and Caps; as *Margny* does Cloths, Camlets, and Shags; at *Houdon* are made a conſiderable Quantity of Worſtead Stockings; at *Dreux* is a Fabrick of coarſe Cloth, and at *Châtres*, *Linas*, *Meulan*, *Seſanne*, *Poiſy*, *Claye*, *Luſarche*, *Moret*, and *Dourdon*, large Parcels of Leather are tanned, and this laſt is famous for knit Stockings, and making Buff.

2. *The Province of* Picardy.

THE natural Products which this Province furniſhes to Trade are Corn, Hemp, and Wool; and its Manufactures, Woollens, Linens, Caps, Tapeſtry, and Soap. In Reſpect to the firſt, here is worked up five or ſix hundred thouſand Pounds of Wool of the Country's Produce, and near as much more from *Germany*, *Holland*, *England*, *Spain*, and ſome other Parts of *France*, ſo that in the City of *Amiens* only are made about 129,800 Pieces of Stuffs, and 50,000 Pieces in the Neighbourhood, which are called foreign Stuffs, as they are made out of the City; and of the aforeſaid Wool, the Camlet-makers alone take off 80,000lb.

The Cities of the greateſt Trade in *Picardy*, next to *Amiens*, are *Beauvais* and *Abbeville*; beſides which there are many Villages and Towns, as *Tilloy*, *Fienville*, *Naſurs*, *Beauchamps*, *Granvilliers*, *Feuguieres*, *Aumale*, *Anvoille*, *Glatigny*, and *Seules*; in all which Places are only made Serges of many Sorts and Qualities, and what in *French* is called *Tiretaines*, which I take here to be meant a Linſey Woolſey; *Mouy* and *Crevecœur* give a Name to ſome of the former made there, as *Tricot* and eleven Villages of its Juriſdiction does to other Kinds of Serges of their Fabricaton.

The fineſt Woollen Thread ſpun in *Picardy* is that of *Amiens*, where the Spinning employs a great Number of Hands, and conſumes a large Quantity of Wool both of the Country's Growth and *Spaniſh*, which is uſed for making of Caps and Cloths here, and in the Woollen Manufactures of *Paris*, *Elbeuf*, and *Rouen*. The Quantity of Hemp and Flax gathered in this Province is likewiſe very great, ſo that the Linen Trade here equals that of the Woollen; and *St. Quintin* is where the greateſt Sales are tranſacted, which may amount to 40,000 Pieces in a common Year; after *St. Quintin* is *Peronne*, and then *Neſle*; the different Species made in theſe three Places being ſeveral Sorts of Cambricks, from ten to a hundred Livres a Piece, Lawns, Gauzes, Hollands, printed Calicoes, *&c.*

The Fabrick of ſoft Soap at *Amiens* is ſo conſiderable as to produce yearly ten thouſand Quintals, and at *Beauvais* Tapeſtry is made, and in its Neighbourhood is carried on a large Buſineſs in Caps, Thread, and black Silk, Lace, Gimps, *&c.*

In *Amiens* are at leaſt two thouſand Looms conſtantly employed, and in its Neighbourhood eleven fulling Mills, turned by Water, whoſe Quality is not leſs excellent for Dying than it is for cleanſing the Woollens, which of this Place alone ſell for upwards of 1,600,000 Livres.—The Linens of *Pignigny*, *Oreſmaux*, and *Flixcourt*, are better than thoſe of *Amiens*, of which about two hundred Pieces are made and ſold weekly.

Mr. *Savary* ſays, that the Cloths of *Abbeville* are ſo like to thoſe of *England* and *Holland*, as to render a deciſion in Favour of either very difficult; but either their Fabricks are grown worſe ſince his Time, the contrary of which I am very well aſſured of, or elſe he is guilty of a noted Partiality to his Countrymen; for though I will allow the Cloth that is made there to be good, yet the Yarn is neither ſo fine ſpun, nor ſo well and cloſely wove as here in *England*, neither will it wear ſo long, and much ſooner grows bare and ſhabby; this Experience has taught me, as I have for many Years ſeen the Wear of them, and more than once examined many of the fineſt Pieces on the Spot. It is ſaid here are about an hundred Looms, that employ upwards of fifteen hundred Spinners, beſides as great a Number of Weavers, Cloth-Workers, Fullers, Dyers, and ſuch like Artiſts, neceſſary to the perfecting the Cloths; and the Produce of them is computed to be at leaſt five hundred thouſand Livres yearly. Beſides Cloth there is made at *Abbeville*, *Barragon* Serges, Druggets, *&c.* to the Amount of about an hundred thouſand Livres, and of Stuffs made out of the City, though in its Neighbourhood, two hundred thouſand Livres; and *extra* of theſe Commodities, many others are the Products of *Abbeville*, as Pluſh, Caffoy, Ticking, coarſe Linen for Package, *&c.* to the Value of about 150,000 Livres.

St. Quintin has no Woollen Manufacture, though near 100,000lb. of Wool is collected in its Diſtrict; it however has a large Fabrick of Linen, inſomuch, that forty thouſand Pieces are made or ſold here yearly, to the Value of 2,000,000 Livres; being Cambricks, Lawns, Hollands, and ſeveral other Sorts of Linens, which are likewiſe made in great Abundance in many Parts of this Province, whoſe Inhabitants are almoſt totally employed in the Linen and Woollen Way, as they have a large Share of the Materials in their own Territories, which produces them 524,000lb. of Wool, and Plenty of Flax of a very rich Quality.

Of

Of the Products of Champagne *and* Soiſſons.

THE Proximity of theſe two Provinces, and the great Reſemblance of their Products and Manufactures, have induced me to treat jointly of them. The Soil, both of the one and the other, is very fertile in all Sorts of Grain, more eſpecially Wheat and Oats, and their Hills are covered with Vineyards that produce a moſt excellent Wine. Hemp and Flax are cultivated here in Plenty, of which are made various Sorts of Linen, and Threads employed in the Manufacturing of Lace. The Paſtures are admirable for Grazing, as may be judged from the Support they give to ſixteen or ſeventeen hundred thouſand Sheep, which yield between three and four Million Pounds of Wool, beſides a great Parcel of black Cattle; whoſe Hides afford a ſufficient Employ to ſeveral Tanneries; and, in fine, their Rivers and Brooks ſet to Work many Forges for working Iron, hammering Copper, and milling Paper.

The Territories of *Rethel* or *Mazarin* are in many Parts unfit for Corn, and this Sterility has put the Inhabitants on a Method of gaining a Livelihood, which I could not omit mentioning for the Uncommonneſs of it, and that is the fattening Oxen with Loaves, compoſed with Rape Oil, which Seed they gather here in plenty; but the principal Product of theſe Provinces is the Wine, for which they are juſtly ſo famous, and of which the beſt is found at *Rheims*, *Sillery*, *Hautvilliers*, corruptly called *Ovilé*, in the Valley of *Pierry*, and the Diſtrict of *Ay*, though there are many good ones of a ſecond Quality at *Oxmery*, *Chatillon*, and *Vertus-Dormans* in *Champagne*, and *Guichy*, *Pargnant*, and *Coucy* in the *Soiſſoinois*. The Number of the Woollen Manufactories eſtabliſhed in theſe Provinces is almoſt incredible; at *Rheims* they make Cloths like thoſe of *Berry*, and various Sorts of Stuffs, both here and at *Rhetel*, *Chateau*, *Portion*, *Mezieres*, *Donchery*, *Mouzon*, *Fiſmes*, *St. Menehould*, *Sommepy*, *Ville-en-Tartenois Soiſſons*, *Chateau-Thierry*, *Charly*, *Obaye*, *St. Martin-Dablois*, *Bar-ſur-Aube*, *Ferre-en-Tartenois*, *Neuilly*; and *St. Fond-Sedan* is noted for making and Dying the fineſt black Cloths, as alſo large Parcels of Cloth and other Serges: At *Bouts*, *Pertes*, and *Jeinville*, only white Eſtaminas are made; at *Montcoruet* are made Sattins, Cloth, Serges, *&c.* as they are at *Vervins*, *Fontaine*, and *Ploumure*, with ſome ordinary Cloths: At *Montineral*, *Langres*, *St. Juſt*, *Anglure*, *Sezanne*, *la Ferte Gaucher*, and *la Ferte Sous-Joüars*, the Fabricks are of Cloths, made all of *Spaniſh* Wool; in fine, *Brienne*, *Chalons*, *Vitry*, *Chaumont*, and *Dienville*, make ſeveral Sorts of Stuffs and Serges, beſides ſome Cloths.

Linens, whether Flaxen or Hempen, are no inconſiderable Products of theſe Parts, as the Manufactories of them are diſperſed through both Provinces, though the principal one is at *Guiſe*; however, between this Place, *Vervins*, and *Noyon*, there are thirty-four Villages, where no other Linens are made than thoſe of the fineſt Flax, called *Bateſtes*, or Cambricks. At *Rheims*, and almoſt all the above-mentioned Places for Woollen Fabricks, there are alſo eſtabliſhed ſome for Linen, which with thoſe of Hats, Caps, Lace, *&c.* are very conſiderable, and furniſh a great Value to the general Commerce of *France*.

4. *Of the* Lyonnois Foreſt, *and* Beaujolois.

VERY little Silk is gathered in the firſt of theſe Diſtricts, and yet *Lyons* is one of the Cities, where the greateſt Commerce in this rich Merchandize is carried on. All the Silks brought in from the *Levant*, *Perſia*, *Meſſina*, *Italy*, *Spain*, &c. for the Uſe of *France*, ought to be carried to *Lyons*, as to a Staple, and from thence ſent to *Paris*, *Tours*, and the other Silk Manufactories of the Kingdom.

The Products of theſe three Provinces for Trade, are 1. Hemp. 2. Wine. 3. Vitriol, Saffron, and Copperas. 4. Coals, which are conſumed in the manufacturing Arms, and other Works of Iron.

The Fabricks are principally of Silk, and of the Materials neceſſary to its Perfection, of whichthat carried on at *Lyons* has for many Years paſt been the moſt conſiderable not only in *France*, but in any other Part of *Europe*. Mr. *Sa-*

vary ſays, that there is yearly employed of Silk, Gold, and Silver in this Manufacture, to the Amount of eleven Millions of Livres; that the Preparation of theſe Materials to fit them for Uſe, and their Working up, ariſes to better than three Millions; the Sales made of them, to above three Millions more; and that of the ſeventeen Millions, which theſe three Sums amount to, Foreigners pay near One-third, in Time of Peace, when Trade flouriſhes.

This might be very true when Mr. *Savary* wrote, but the Weaving and Dying Arts are ſince brought to ſo great a Perfection in many Parts, more eſpecially among us, that large Deductions muſt be made from the preceding Calculations, and the Balances conſiderably altered from what they were then, to what they are now.

The *Lyonnois* Manufacture is not confined to any two or three different Sorts of Silks, but is general, producing Gold and Silver Brocades, and rich ones without either of theſe Metals, Damaſks, Sattins, Velvets, Mohairs, Taffeties, and almoſt every other Species made elſewhere. The fine-drawing, and making the Gold and Silver Thread, our Author ſays, employs a thouſand Marks of Gold, and five Million Livres of Silver yearly; and here are alſo made ſome Fuſtians, Dimities, and a conſiderable Trade carried on in the Bookſelling Way. Other Parts of theſe Provinces are noted for their different Products, as *St. Eſtienne* and *St. Chaumont*, for Hardware and Ribbons, *Roche* for Cheeſe, *Beaujolois* for Linens, and various Sorts of Paper, made in many Parts of them, which altogether render theſe Parts very conſiderable in the commercial Way.

5. *Of* MONTAUBAN.

IN this Province are collected from twelve to fifteen hundred Quintals of different Sorts of Wool, which, jointly with large Parcels from abroad, are worked up by the Inhabitants into various Sorts of Stuffs and Cloths, making in all about ſixty thouſand Pieces. At *Montauban* and *Cahors* are made ſeveral Sorts of Serges and corded Stuffs. At *Gourdon*, *Lectoure*, *Realuille*, *Vicfeſenſac*, *Auche*, *Mauvezin*, *Mur-de-Barras*, *Eſpalion*, *Foix*, *Pamiers*, *Milland*, *St. Giron*, *Taraſcon*, *Carlat*, *St. Gaudans*, *Aſpect*, *Gimon*, *Montrejan*, *Montpezat*, and *la Cauſſade*, are made Druggets, Serges, Crapes, and coarſe Cloths, as they are at *Beaumont de Lernaige*, *St. Clair de Lomagne*, *Villefranche*, *Cramares*, *St. Aularis*, and many other Places; and alſo at ſome few of them are made Barragons and fine Stuffs. At *Montauban*, *Gourdon*, and *Jouillat*, there are Manufactories of Hats; and, at this latter, ſeveral Tanners. Stockings and Caps are made at *St. Clar de Lomagne*, *Pamiers*, *St. Giron*, *Montrejan* and *Mirande*. Hempen Linen at *Gourdon*, *Villefranche*, *St. Clar de Lomagne*, and *St. Antonin*; Paper at this laſt and *St. Giroul*, and Tickings at *St. Clar de Lomagne*. The greateſt Number of Forges are on the Side of *Taraſcon*, which are twenty-ſeven in Number. At *St. Giroul* there are four, and ſome Hammers for beating Copper. At *Foix* there are three Hammers, and in the Neighbourhood of *Villefranche* are ſeveral Hammers and Forges, all which, joined to the Fabricks before-mentioned, employ a great Number of Hands, and occaſion a Currency of large Sums of Money.

6. *Of* GUIENNE.

THIS rich Province furniſhes Trade with large Quantities of Wine and Brandies, Vinegar, Prunes, Reſin, Cheſnuts, Oil, Iron, and Copper, wrought and unwrought, a great deal of Paper, and a middling Quantity of Hemp; there are in the Neighbourhood of *Perigeux*, thirty-nine Forges for Cannons, and other large Works of Iron; there are alſo many others near *Dax*, and ſeveral Hammers for Copper at *Bergerac*, *Orteix*, and *Nerac*. On the Side of *Oleron* are four Paper Mills, and in the Neighbourhood of *Bergerac* and *Caſtel Jaloux* ſeven others. A large Quantity of Hemp is cultivated at the two *Tonneins*, and in ſome other Places along the *Garonne* and the *Lot*; but all the Fabricks are but trifling, when compared with the Crops of Wine and Brandy, the ſtaple Commodities of theſe Parts; inſomuch, that in all this Province not above ſeventy-five thouſand Pounds of Wool are ſhorn, and it is with theſe, and

a few from *Poitou*, that all their Woolen Goods are made, *viz.* at *Bourdeaux*, *Bazas*, *Mont-de-Marſan*, and *Nay*, thick Blankets; at *Jouſſac*, coarſe Cloths; at *Ponts*, ſome Eſtaminas; at *Baniers*, the Stuffs called Cardillats; at *Paw* and *Marmande*, Hats; at *Cadillac*, *Nerac*, and *Villeneuve d' Agenois*, Stockings; and at *Reolle*, Thread, Fringe, and Tickins.

7. *Of* Limoſin *and* L'Angoumois.

THESE two Provinces, though under one Direction or Receipt of Cuſtom, are very different in the Nature of their Soil and Products; the *Angoumois* yields a ſufficient Quantity of Wheat, Wine, and all Sorts of excellent Fruits; whilſt the *Limoſin* on the contrary is cold and ſteril, has but few Wines and thoſe bad, hardly any Wheat, ſo that Rye, Barley, and Cheſnuts commonly ſerve for Bread to nouriſh the Inhabitants.

Both the one and the other Province have a great Number of Paper Mills, whoſe Fabrick is in great Repute for the Preſs, though very little for Writing.

The Manufactures for Woolen Stuffs are very trifling in this Province; however, there are a few Stuffs, Serges, Eſtaminas, coarſe Cloths, *&c.* made at *Limoges*, *Angouleme*, *St. John d' Angely*, *Nerac*, *Rochefoucalt*, *Sentereune*, *Cognac*, *St. Leonard*, *Erieves*, and at *Tulle*.

The Saffron cultivated in the *Angoumois*, is no ſmall Object of the Country's Trade; for, although it is not ſo good as that of the *Gaſtinois*, a great Quantity of it is ſold at *Bourdeaux* to Foreigners; and the bringing up of Horſes for Sale, chiefly at the Fair of *Chaſlus*, cloſes the Commerce of theſe Provinces.

8. *Of* POITOU.

GRAIN, Wine, Cheſnuts, Hemp, and Wool, are the Products of this Province; the Meadows, whoſe Herbage is an excellent Paſture, enable the Inhabitants to raiſe and feed a great Number of large and ſmall Cattle, of Horſes and Mules, with which they carry on a very conſiderable Trade. The beſt Studs of Horſes are in the twelve Pariſhes called the Wood of *Eſtos*, in four of which there are Salt Marſhes.

At *Partinay*, *Niort*, *Fontenoy*, *Thouars*, and many other Places of their Diſtricts, are made Cloths, Druggets, Serges, and Linſey Woolſeys; at *Niort* alſo Chamois is prepared; Woolen Stockings and Caps at *St. Maixant*, and Hardware at *Chatellerault*.

25,000lb. of Wool is gathered in this Province, beſides which there is brought from *Spain* about 600,000lb. of which, from 20 to 30,000 Pieces of Stuffs are annually made; and here are only three Forges of Iron, and two Paper Mills.

9. *Of* Rochelle, Aunis, Saintonge, *&c.*

THE Products of the Provinces and Country that compoſe this Receiverſhip, are Salt, Wine, Brandy, and Hemp, beſides a Number of excellent Horſes; and their Manufactures are of Linen, principally at *Barbeſieux*. Great Quantities of Sugar are refined at *Rochelle*, and about 34,000 Muids of Salt gathered in the Iſle of *Rhé*; 18,000 Ton of Wine, and 10,000 Barrels of Brandy. This Iſland is alſo famous for the Anniſeed Water made here, not only among the *French*, but Foreigners. *Olleron* produces about 4,000 Barrels of Brandy, and the Sands of *Ollonne* yield near 20,000 Muids of Salt: Vaſt Quantities of Wine are gathered, and Brandy diſtilled, at *Rochfort*, *Charente*, *Aigre*, *Xaintes*, *Cognac*, and their Diſtricts. *Angouleme* affords four Sorts of Merchandize, *viz.* Brandy, Pepper, Saffron, and Iron, this laſt having Forges for it at *Perigord*, *Aubaroche*, *Rudeau*, the *Chapple*, *Bourequoil*, *New Forge*, *Jomeliers*, the *Augoumois*, *Planchemenier*, and *Feuillade*.

10. *Of* ORLEANS.

THE Wines that are made in very great Quantities in this Province, amounting to 100,000 Tons, are the principal Part of its Products, and it is ſaid, that *Blois* and *Beaugency* do not furniſh leſs: It is likewiſe very fertile in Corn, and not entirely barren in Manufactures, as at *Orleans*, *Dourdan*, *Gien*, *Blois*, *Chartres*, and ſome other Places, ſubject to this Generality, are made all Sorts of Woolen Stockings, both wove and knit, and at *Dourdan* many are made of Silk; at *Orleans* alſo are wove Caps, as Cloths are at *St. Genoux*, *Clamecy*, *Chatillon-ſur-Loing*, and *Montargis*; various Sorts of Stuffs, different Species of Serges, Crapes, Capuchin Cloths, Bays, Linſey Woolſey, Eſtaminas, *&c.* are made at *Beaugency*, *Blois*, *Vendome*, *Pierre-Fitte*, *Montoir*, *Salbry*, *Soueſme*, *Nouan-le-Fuzelier*, *Vouzon*, *Jergeau*, *Chartres*, *St. Fargeau*, *Brou*, *St. Agnan*, *Chateau-Neuf*, *Brinont*, *Sully*, *La Charite*, *Petiviers*, *Pongoin*, *Chaudun*, *Bazoches*, *Illiers*, and *Anthon*. This Province has ſeveral Fabricks of Hats, though the principal ones are at *Orleans*, *Vendome*, *La Charité*, and *Blois*; at all which Places there are likewiſe conſiderable Tanneries; and in the Neighbourhood of *La Charité*, are twelve Forges, and three Furnaces for Iron. The *Beauſſe* and *Vendomois*, produce a great Quantity of Wheat and other Grain, as moſt other Diſtricts of this Receiverſhip do: In this Province, upwards of 200,000*lb.* of Wool are manufactured into about 25,000 Pieces of Cloth and other Stuffs, moſt of it the Growth of the Country.

11. *Of* Touraine, Anjou, Maine, *and* Perche.

THE principal Manufactures eſtabliſhed in this fruitful and pleaſant Part of *France*, are compriſed in the ſilken, woolen, and tanning Commodities. The firſt has its eſtabliſhment in *Tours*, the Capital of the Province of *Touraine*, where are made all Sorts of fine Silks, as Velvets, Mohair, Serges, Brocades, Sattins, Taffeties, *&c.* in which formerly were worked up 2,400 Bales of Silk, though at preſent three or four is more than ſufficient; and the ſame Decadence that has happened in this Manufacture, has occurred in the Woolen, as this hardly employs fifteen or twenty Looms now, that occupied two hundred and fifty before; in thoſe that ſtill ſubſiſt, are *Amboiſe*, *Chinon*, *Richlieu Loudun*, *Loches*, *Beaulieu*, *St. Chriſtophle*, *St. Pater*, *Laval*, *Beaumont*, *la Roue*, *Roziers*, *Montreſor*, *Villeloin*, *Orbigny*, *Reugnay*, *Chateau-Renault*, *Neuvillé*, *Pontpierre*, *Maray*, *Neufay*, *Loiſant*, and *Montricard*, are made much the ſame Sorts of Stuffs and Cloths, as in the laſt mentioned Province. Few Hides are now tanned here, in Compariſon with the great Quantity that uſed to be formerly. The natural Products of theſe Parts, conſiſt in Wines, Brandies, Saltpetre, and ſuch Abundance of Fruit raiſed, and afterwards preſerved by the Natives, as has drawn on this Province the Appellation of the Garden of *France*. In the Pariſhes of *Parcenay*, *Abillon*, *St. Mars*, and *Mettray*, are Quarries of Millſtones; and near the Abbey of *Noyers*, a Copper Mine was diſcovered in the latter End of the laſt Century. About 7000 Pieces of Cloths, Serges, Druggets, Linſey Woolſeys, and other Stuffs, are made in this Diſtrict of *Touraine*, beſides ſome Caps, Hats, and Stockings; in that of *Anjou* are gathered Wines, Flax, and Hemp, of which large Quantities of Thread and Linen are made; the Quarries of Slate, Iron, and Coal Mines, the Whitſteries for Linen and Wax, the Refineries of Saltpetre and Sugar, the Forges and Glaſs-houſes, with the Manufacture of Eſtaminas and Druggets of various Sorts, make up the Commerce of this Province; of theſe latter about 4000 Pieces are made yearly at *Angers*, *Chateau-Gontiers*, *la Fleche*, *Beauge*, *Saumur*, *le Ludi*, *Dove*, *Montreuil*, *Bellay*, *Beaufort*, and *Durtal*, beſides ſome Hats, Caps, *&c* In the Territory of *Maine*, about 5,300 Pieces of the aforeſaid Woolens are made, though the principal Manufacture of this Province is Linen, for which it produces the Materials in vaſt Plenty, and there has been ſeen 20,000 People employed at once in the ſeveral Branches of it: Here are alſo ſome Glaſs-houſes, Iron Mines, *&c.* and large Quarries of a middling Sort of Marble. The Manufactures of the ſmall Province of *Perche*, are Linen Stuffs and Paper, of which the firſt is the moſt conſiderable; they have alſo here ſome Forges of Iron, and carry on ſome Trade in the Grazing Way.

12. *Of* BERRY.

THE Sheep and Wool of this Province are the principal Materials it furniſhes for Trade; its Corn, Iron, Hemp, Nut Oil, Wines and Wood, would alſo occaſion a tolerable good Traffick, had they navigable Rivers to carry them off. The fineſt Wool is ſold for *Roüen*, and only the inferior Sorts worked up here, of which are made the coarſe Cloths, called Drab de Berry, and ſome ordinary Serges, Druggets, Linſey Woolſey, *&c.* at *Bourges*, *Iſſoudun*, *Chateauroux*, *Vierſon*, *Selles*, *Aubigny*, *St. Amant*, *la Chaſtres*, *Caſtillon*, *Mehum*, *Aubigni*, *Dun-le-Roi*, *St. Benoiſt-du-Salt*, *Buzancois*, *Leueroix*, *St. Savin*, *Sancerre*, *Linieres*, *Leret*, *La Chappelle-danguillon*, *Aiſne-le-Chateau*, *St. Guatier*, *Ivry-le-Pre*, *Argenton*, *Neuvy-St.-Sepulchre*, *Argent*, *Valençay*, *Cinconet*, *Baugy*, *Sancergues*, *Les Aix*, *Blancafort*, and *Enrichemont*, in all from 47 to 48,000 Pieces.

13. *Of* MOULINS.

THE Manufactures and Fabricks of this Province, which contains the *Bourbonnois*, *Nivernois*, and the upper Part of *Auvergne*, are the Forges and Founderies, where Cannon, Anchors, and ſuch large Works of Iron are made; the Manufactures of Tin, Earthen Ware, and Glaſs; the Smalt Works, thoſe of Cutlery and other Hardware, the Fabrick of Tapeſtry and Cloth; and the natural Products conſiſt in Wine, Hemp, Iron, and Steel Mines, Coal, Cattle, Fiſh, Cheſnuts, and Cheeſe. The whole Province feeds ſuch a Quantity of Cattle, as exceeds Imagination; and it is ſurprizing to ſee how many Beeves and Sheep are every Year extracted from it for all Parts (even in Time of War) for *Flanders*, *Germany*, and *Italy:* Here are alſo, in an Acorn Seaſon, large Herds of Swine fattened; and in Return of Manufactures, the Iron, Steel, Iron Plates, and Tin, are melted, run, and formed into ſeveral different Works, almoſt in all the Forges, built on the little River of *Nievre*, which falls into the *Loire*, under the Bridges of *Nevers*, and which before joining it, gives Movement to the Bellows, Hammers, and other Machines of above fifty Forges.

The Cutlery, and other Hardware, is made at *Bourbon* and *Nevers*, and in this laſt is alſo made ſome Earthen Ware, and ſome Works of Enamel. At *Aubuſſon*, and *Feuilletin*, there are Manufactures of an ordinary Tapeſtry; and at *Moulins*, *St. Pourçain*, *Montluçon*, *Aeriſſon*, *Decize*, *Cercy-la-Tour*, *Moulins-Engilbert*, and *Nevers*, are made ſome coarſe Cloths and Woolens, though by far the feweſt in this Province of any in *France:* This Receiverſhip produces in Wood, from the *Nivernois*, *Bourbonnois*, and more eſpecially from *Morvant*, about the Value of 400,000 Livres yearly; Coal from the Vicinage of *Decize*, to the Import of 120,000 Livres; Fiſh 300,000 Livres; Hogs, in an Acorn Year, 300,000 Livres; Corn, Hemp, Wine, and Cattle, 500,000 Livres; Iron 300,000 Livres; Tin 50,000 Livres; Earthen Ware and Glaſs 200,000 Livres; Cutlery and other Hardware, with ſome Enamel, 150,000 Livres; and Tapeſtry, Nut Oil, *&c.* to at leaſt 150,000 Livres. The Products of Wool, and the Manufactures of Linen, I paſs unnoticed, as theſe are all conſumed on the Spot, as indeed moſt of the Cloths and Stuffs are.

14. *Of* AUVERGNE.

THIS Province is commonly divided into High and Low, and the Products of each are as different as their Situation; the firſt is mountainous, as the Diſtinction ſeems to ſpeak it, and productive of nothing but Food for Cattle, of which here is bred a ſurprizing Quantity; and the Low Lands abound in Corn, Wine, Hemp, and Walnuts; their Meadows are delightful, and ſo fertile, that thoſe in the Neighbourhood of *Riom* and *Clermont*, are mowed three Times a Year, and the Lands in general never lie idle, or at moſt are not fallowed above one Year in twenty.

There are ſeveral Sorts of Manufactures in the *Auvergnois*, and almoſt all the different Species fabricated are of a very good Quality, but more eſpecially the Paper, which is excellent, made chiefly at *Ambret*, and about *Thiers* and *Clermont*. The Manufactures of Eſtaminas, Woollen Camlets, and other Stuffs, are at *Ambrit*, *Culnhac*, *Oliergue*, *Sanxillanges*, and *St. Flour*, making in all about 10,000 Pieces. Laces are made at *Aurillac*, to the annual Value of 200,000 Livres, though formerly they produced near 800,000, and there are ſome made at *Muret*, *la Chaſe-Dieu*, *Alarche*, and *Vineroles*. The Hardware of *Thiers* and its Neighbourhood, affords Subſiſtence to above 5,000 Families, and Cards for Play are made here and at *Ambret*. The Tanneries of *Clermont*, *Riom*, *St. Flour*, *Maringuet*, *Anjoy*, *Chaudes-Aigues*, &c. are very conſiderable, as the Dairies near *Aurillac*, *Moriac*, *Volers*, *Beze*, *la Tours*, and *Ardes*, are in Cheeſe: Many fine Mules and good Horſes are bred in the Studs of this Province, which, beſides the foregoing Particulars, produces Maſts for Ships, and Wood for Carpentry, Coals, Fruit, Wax, Glue, Tallow, Butter, Linen, Hemp, and Nut Oil.

15. *Of* NORMANDY.

TO treat of this large and rich Province with due Regularity, I ſhall do it according to its cuſtomary Diviſion, into the three Diſtricts of *Rouen*, *Alençon*, and *Caën*.

The former produces Corn, Cider, Cattle, Hemp, and Flax, and beſides has ſome Fiſheries at *Dieppe*, *Honfleur*, *Havre*, &c. Its Manufactures conſiſt of Woollens, Linens, Leather, Hats, Combs, Paper, and playing Cards; at *Rouen*, *Elbeuf*, *Darnetal*, *St. Aubin*, *Aumale*, *Bolbec*, *Louviers*, *La Bouille*, *Gournay*, &c. are made all Sorts of Cloth, Serges, Druggets, Ratines, Blankets, and divers Species of Stuffs and Hangings, in which are employed about 1,100 Looms, and from 8 to 9,000 Bales of Wool, beſides other Materials, of which 5,000 are *Spaniſh*, and the Reſt of the fineſt Staples of *France*. Linens of many Proportions, and different Fineneſs, are made at *Ponteau-de-Mer*, *Lizieux*, *Bernay*, *Rouen*, *Caudebec*, *Arques*, and *Montoilliers*. The moſt conſiderable Tanneries are at *Rouen*, and its Neighbourhood; and Hats are made in ſeveral of theſe Parts, though the Quantity is vaſtly ſhort of what they have been been formerly.

The Diſtrict of *Caën* has not leſs extenſive or important Trade than this laſt treated of, but it ſeems as if each Part of this Receiverſhip had appropriated a different Species of Buſineſs to itſelf.

Here are gathered a large Parcel of Drugs for Dying, ſuch as Woad, Argol, Sumac, *&c.* The Butter of *Iſſigny*, the white Salt made in ſeveral Ponds, the Linens fabricated at *Bayeux*, and in its circumjacent Parts, are the only Manufactures of it; the Wool, Hemp, and Flax in this Neighbourhood, are ſold unmanufactured: In the Diſtrict of *Vire* are three great Forges of Braſiery, *viz.* at *Envou*, *Alouze*, and *Cherbourg*; and here are made ſome Woollens and Linens; at *St. Lo*, *Vire*, *Valogne*, *Cherbourg*, *Countances*, *Freſne*, *St. Pierre-de-Antremont*, *Athis*, *Flers*, and *Halouze*, to the Amount of 28,500 Pieces of Cloth, Serges, and Stuffs, beſides Linens, Hats, Stockings, Leather, *&c.* and the Territory of *Alençon* is nothing inferior to the other preceding two, either in the Diverſity of its Commodities, or Importance of its Trade. Large Parcels of various Sorts of Linens are made at *Domfront*, *Vimoutiers*, and thereabouts. The Manufacture of Vellum Lace, was maintained through the long War at *Alençon*; the Magnificence, or rather Extravagance of *France*, ſufficing for its Support, even in thoſe diſtreſsful Times; of Cloths and Stuffs, from 50 to 52,000 Pieces, are made in this Diviſion in a common Year. The Pins made at *Laigle* and at *Conches*, the Hardware and Braſiery of this laſt, the Tanneries at *Argentan*, *Vimoutiers*, *Conches*, and *Verneuil*; the Fabrick of wooden Shoes, the forming of Joiſts, Beams, and other Timber for building; the fattening of Poultry for *Paris*, and the Butter and Eggs ſent there; the Saltpetre, in the Diſtrict of *Argentan*, are no ſmall Addition to the Commerce of *Alençon*; but the Glaſs-houſes at *Nonant*, in the Foreſt of *Exme*, at *Fortiſſambert* in the Foreſt of *Montpinſon*, and the two eſtabliſhed in the *Thimarais*, with the Forges for Iron at *Chancegray*, *Varennes*, *Carvuges*, *Rannes*, *Conches*, and *la Bonneville*, are the Fabricks which moſtly enrich their Neighbour-

hood by their Quantities and Perfection; and to theſe we may add the Breeding a great Number of Horſes, and making large Quantities of Hats, as other Advantages to this Country.

16. *Of* BRETAGNE.

THE Products and Manufactures of this Province, are, 1ſt, Salt, of which is annually made in the Pariſh of *Bourneuf*, from 16 to 17,000 Muids, and in that of *Guerrande*, or *Croſic*, from 20 to 30,000. 2dly, Butter, in the Biſhoprick of *Nantes*. 3dly, Wines, more eſpecially thoſe on the River of *Nantes*, and theſe moſtly diſtilled into Brandies, to the Amount of about 7000 Pipes *per Annum*. 4thly, Corn, particularly from the Biſhoprick of *Vannes*, of which in a good Year, after a ſufficient Proviſion made for the Province, 6000 Tons of Wheat, and 9000 of Rye, may be exported for *Spain*. 5thly, Hemp and Flax, principally cultivated in the Biſhoprick of *Rennes*, *Treguier*, *Leon*, and *Dol*, and ſold in Threads, Stockings, Stocks, Gloves, and Cloths, to a very conſiderable Value. 6thly, Iron, for which here are ſeveral Forges in different Parts, Lead, Coal, and Paper. 7thly, Pilchards and Mackarel, whoſe Fiſhery is carried on from *Port Louis*, *Belleiſle*, *Concarnau*, *Audierne*, and ſometimes from *Breſt*. 8thly, Woollens, ſuch as Eſtaminas, Druggets, Serges, Flannels, Crapes, and ſome ordinary ſmall Cloths, made at *Nantes*, *Rennes*, *Bourg*, *Dinan*, *St. Brieux*, *Lamballe*, *Chateaubriant*, *Nozay*, *Redon*, *Joſſelin*, *le Guay de Plelant*, *St. Croix*, *Auvray*, *Vannes*, *Maleſtroit*, *Rochefort*, *Chateau-neuf*, *Longonna*, and *Herviliac*, to the Value of about Livres 40,000

And I ſhall here re-capitulate the afore-mentioned Commodities, and ſet down what thoſe carried out of the Province may yearly amount to

Linens of all Sorts, to the Value of	12,000,000
Threads, crude, whitened, and coloured, to the Value of	1,000,000
Paper of different Sorts	200,000
Honey and Wax	600,000
Butter	100,000
Horſes 1,000,000, Oxen 350,000, Hogs 100,000, and Sheep 40,000, in all	1,490,000
Grain 100,000, Salt 100,000 Fiſh 50,000, and Game 10,000 in all	260,000
Poultry 14,000, Hides and Skins 60,000, Wines and Brandies 80,000, in all	154,000
Hemp, Tow, and Cordage 150,000, old Rags 10,000	160,000
Hair and Flocks 10,000, Staves 15,000, and Wood for Building, and Fuel 230,000	
Iron for Anchors 10,000, Cards 6000, Tallow and Greaſe 100,000	116,000
Livres	16,375,000

17. *Of the Duchy of* Burgundy.

THE Wines of *Dijon*, *Nuis*, *Beaune*, *Pomarre*, *Chaſſagne*, *Mâcon*, *Tonerre*, *Auxerre*, &c. are the principal Products of this rich Province, and are juſtly termed the Mother of Wine, not ſo much for the Quantity, as the Excellency of its Quality: Here are however other Commodities, as Corn, Iron, Cattle, Wool, Hemp, *&c.* of which the following Manufactures are made, *viz.* from 12 to 13,000 Pieces of Cloths, Serges, and other Stuffs; the Crop of Wool amounts to 3 or 400,000*lb.* Weight; the Hides and Hats ſuffice for the Uſe of the Inhabitants; here are thirty-two Forges for Iron, and eight Paper Mills: Several Ingredients for Dying grow here, and Woad in particular flouriſhes to a Miracle; Li-

hens are made at *Vitaux*, *Saulieu*, and *Autun*, though coarſe, and no large Quantity; and a few Stockings, with ſome Lace, finiſh the Catalogue of this Province's Productions.

18. *Of* FRANCHE-COMPTE.

THE Products of this Province conſiſt of Corn, Hay, Iron, Saltpetre, Salt, Cattle, Butter, Cheeſe, and Horſes. The Rivers *Saone*, *Doux*, *Lougnon*, *Loure*, and ſome Brooks, work upwards of thirty Forges and Furnaces, where a large Quantity of Bombs, Bullets, and many other Iron Commodities are made; Maſts and other Wood for Marine Conſtructions grow here in Plenty; and the Saltpetre made in a common Year, is about 1,200,000*lb*. with Room for a conſiderable Augmentation at a ſmall Expence, upon a due Application. The Salt is from the Pits of *Montagne dorée*, ſo named from the rich Treaſure it encloſes, which however only conſiſts of two Drains of Water never dry, and which produced an extraordinary Quantity of this Commodity. The Studs of this Diſtrict are very conſiderable, having always about 80 Stallions, 9000 breeding Mares, and from theſe about 5000 Colts yearly; here is no Manufacture of Drapery, nor any other Product meriting Regard.

19. *Of* DAUPHINE.

THIS Province being divided into Mountains and Plains, the Productions correſpond to this Diverſity of Soil and Situation. The Mountains produce Firs, and other Trees proper for Marine Uſes, and cover ſeveral Sorts of Minerals and Metals; and the Rivers that ariſe and flow from them, turn many Mills of Forges and Founderies, for carrying on divers Works of Iron, Steel, Copper, and Lead, according to the different Species of Metals caſt and wrought here. The principal Iron Mine is in the Mountain of *Allevard*, ſix Leagues from *Grenoble*, being of an excellent Quality, ſoft, eaſy to forge and file, without Flaw. The Copper Mines are in the Mountain of *Cloche*, and thoſe of Lead in the *Gapençois*, near the Cave of the *Arnauds*, and at the Village of *Argentieres*, four Leagues from *Briançon*. In the Territory of *Beſſes*, there are Slates; in that of *Larnage* a Mine of Vitriol and Copperas, and another of Tobacco-pipe Clay, worked up at *Tain*; *Cezanne* and *Ceſtiers*, in the *Briançonnois*, produce Chalk, and ſeveral Parts in the Upper and Lower *Dauphiny*, Coal and Saltpetre. The Manufactures, which theſe different Metals and Minerals occaſion and maintain, are ſpread thro' the whole Province. Steel is made at *Rives-Moirans*, *Voiron*, *Beaumont-Furent*, *Tulins*, *Beaucroiſſant*, *Chabons*, and *Vienne*. The Iron is forged at *St. Hugon*, *Hurtiers*, *Thois*, *Allevard*, *Laval*, *Goncelin*, *la Combe*, *Vriage*, *Revel*, *des Portes*, *St. Gervais*, and *Royans*; and Scythes and Sickles are made at *Voiron* and *Viziles*: Sword Blades at *Rives*, *Beaucroiſſant*, *Tulins*, *Vioron*, *Beaumont-Furent*, but above all at *Vienne*; Cannons are caſt at *St. George*, and Anchors forged at *Vienne*: In fine, there are Copper Forges at this laſt-mentioned Place, *Turins*, *Noiron*, and *Beaucroiſſant*; and the Vitriol and the other Minerals are prepared in the Fabricks and Laboratories of *Allevard*, *Laval*, *la Cloche*, *Laugentieres*, *Leſchet*, *Bearrierie*, and *Larnage*. Theſe are the Products of the hilly Parts, and we will now deſcend to the Plains, where we may find growing in their proper Seaſons, Hemp, Corn, and Mulberry-Trees, for the Nouriſhment of Silk-Worms. The Linen Manufactures of the former are at *St. John-Cremiere*, *la Tour-du-Pin*, *Bourgoin*, *Vienne*, *Jallieu*, *Ruy*, *Liſle Dabo*, *Artas*, *St. George*, *Voiron*, and at *la Buiſte*. It is almoſt in the ſame Places that Thread is ſpun, for Sewing and for the different Sorts of Cap-making: Silk is made through the whole Province, excepting in the Mountains, and ſome Parts too cold for the Worms; and beſides theſe, here are many Paper Mills at *St. Donat*, *Chateau-Double*, *Perus*, *Diſimont*, *Chabueil*, *St. Villier*, *Creſt*, *Vienne*, *Rives*, *Pariot*, and *Vizille*. The Fabricks of Hats are eſtabliſhed at *Grenoble*, *Fontenil*, *Saſſenage*, *Voreppe*, *Moirans*, *Creſt*, and *Pont-en-Royans*. Large Hides are dreſſed on the Side of *St. André*, *St. Jean-de-Bournay*, *Vienne*,

Serre, *Grenoble*, *Lumbin*, *Croes*, and *Goncelin*; the Skins and ſmall Hides are tanned at *Grenoble*, *Voiron*, *Romans*, *Valence*, *Loriol*, *Livron*, *Moutelimazt*, *Dier-le-ſit*, *Vienne*, and *St. Antoine de Viennois*. The Cheeſe of *Saſſenage* or other Parts, ſold under that Name; Gloves of *Grenoble* ſo light and fine: The Pine-Nuts, Reſin, Turpentine, *&c.* gathered in theſe Parts, make a conſiderable Addition to the Trade of them; but I have yet to treat of a principal Branch, *viz.* that of the Woollen Manufactory carried on at *Grenoble*, *Voiron*, *Tulin*, *St. Marcollin*, *Roybon*, *Serre*, *Beaurepaire*, *St. Jean-en-Royans*, *Romans*, *Pont-en-Royans*, *Creſt*, *Montelmart*, *Tollinian*, *Dieu-le-ſit*, *Buis*, *Valence*, and *Vienne*, in all which Places are annually made from 38 to 40,000 Pieces of Cloths and Stuffs.

20. *Of* PROVENCE.

THIS Province is very fertile in Wine, Olives, Saffron, Oranges, Lemons, Prunes, Almonds, Nuts, Pomegranates, and all Sorts of excellent Fruit; and here is alſo gathered a very great Quantity of Silk and Wool: Of the Olives is made large Quantities of the ſweeteſt Oil, beſides thoſe pickled, for which the *Provencials* have the beſt Method yet known. Their Muſcated Wines of *St. Laurent* and *Cioutat* exceed any Thing of that Nature, and add to the Delights of the beſt Tables: The Raiſins, wherewith theſe Wines are made, and particularly thoſe gathered about *Roquevaire* and *Auriol*, are excellent in their Kind, as the Figs are dried here of two Sorts, and no Part of the World comfit their Fruits in that Perfection as here. The great Number of the Mulberry-Trees with which this Province abounds enables the Natives to breed vaſt Quantities of Silk-Worms, and thereby procure large Crops of their precious Webs. The Soap, particularly that of *Marſeilles* and *Toulon*, is in very good Repute, though generally allowed to be inferior to that ſhipped at *Alicant* in *Spain*. There are in *Provence* ſixty Paper Mills, where many Sorts of this Commodity are made; and the Tanneries are many and very conſiderable. The Country Wools are employed in divers Manufactures of Stuffs, and many Fabricks of Hats; the latter at *Aix*, *Marſeilles*, *Toulon*, and in the Principality of *Orange*; and the former at *Toulon*, *la Roque*, *Meuve*, *Solieres Cuers*, *Pequanto*, *Camoulles*, *Luc*, *Draguignan*, and at *Lorgues*, though a great Part of theſe are made of *Spaniſh* Wool, pure and unmixed: At *Gordes*, *Apt*, *Ayquieres*, *Auriol*, *Signe*, *Colmars*, and *Digne*, are likewiſe made ſome corded and other Stuffs, as there are at *Arles* and *Grignan*, of other Species: In this Province alſo are made many Hammers for Copper Work, which are all the Commodities it furniſhes to Trade.

21. *Of* LANGUEDOC.

ALTHOUGH this and the laſt-mentioned Province are joined together, enjoy the ſame Aſpect, and are expoſed to the ſame Winds, they are, however, very differently divided, in Regard of the neceſſary Advantages for Trade, more eſpecially in their Ports, with which the other abounds; and to this Nature has given one, ſo that the few it enjoys, are the Effects of Art, made with a great deal of Trouble and Expence: However, as in theſe Sections I propoſe to confine my Diſcourſes only to the Products and Manufactures of the Countries treated of, I ſhall omit enlarging on their Situation, at leaſt at preſent, and proſecute in this, the Method I have obſerved in my Account of all the preceding Provinces.

Languedoc is eſteemed as one of the beſt cultivated Provinces of the Kingdom of *France*, and juſtly merits this Encomium; its Inhabitants are numerous, diligent, ſkilful, and induſtrious; it enjoys the Advantage of having a greater Diverſity in its Products, than any other Province; yet this Country, ſo well cultivated, and ſo well peopled, might raiſe a much greater Revenue, ſupport a much greater Number of Inhabitants, and furniſh the State with much larger Succours, if it underſtood to attract by a ſuitable Culture all thoſe Advantages which

which it is capable of procuring; it has plenty of Corn and Wool, but it might largely augment its Crops of Wine and Oil, and expect a ſurer, more beneficial, and immediate Sale to theſe Commodities, than they ever find, or can hope for from the others; the Growth of Silk might alſo be greatly encreaſed, and Cotton might be planted to Advantage, and this further improved by eſtabliſhing Manufactures of it; much more Salt might be made, more Mines wrought, and a great Number of Things might be added to the natural Products of the Country, for which the Soil and Situation is adapted; however, I ſhall not enlarge on what this Part of *France* might be made to produce, but now acquaint my Readers with what its Products and Manufactures actually are.

This fruitful Province, one of the largeſt, richeſt, and moſt agreeable of that Kingdom, has two great Salt Marſhes, the one at *Mordirac*, the other at *Sigean*, both yielding vaſt Quantities of that uſeful Commodity. At *Rieux*, *la Grange-des-pres*, *Lodéve*, *Carcaſſonne*, *Limoux*, *Caſtres*, *Alby*, *Alet*, *St. Colombe*, *Lauclanet*, *Laiſſat*, *la Grace*, *les Saptes*, *Calabre*, *Mazanet*, *Terriéres*, *la Caume*, *Bedarrieux*, *St. Sivian*, *Quiſſac*, *St. Hypolite*, *Bauzely*, *Vigan*, *Ganges*, *Saumennes*, *Anduze*, *Alais*, *St. Gervais*, *Sommieres*, *Gardonnenque*, *la Salle*, *Beziére*, *Aniane*, and *Beaucaire*, are many Woollen Manufactures of Cloths, Serges, Ratines, Baize, Crapes, Druggets, Linſey Woolſey, and ſeveral other Sorts of Stuffs: Of the ſilken Fabricks, the principal are at *Toulouſe*, *Montpelier*, *Niſmes*, *Alais*, and in ſome other Towns and Villages along the *Rhone*, where are made Taffeties, Tabbies, Crapes, Tarandines, Brocades, Damaſks, and ſome Goods with a Mixture of Silk and Wool, in which all the Silk gathered in theſe Parts is employed, being from 12 to 1500 Quintals in a common Year. The Verdegris made at *Montpelier* and its Neighbourhood, and the Cryſtal of Tartar prepared at *Aniane*, are in great Eſteem among Strangers. The Dioceſe of *Mirepoix* has alſo Mines of Iron, Coals, and Jett; the Iron is found and wrought at *Courſouls*, *St. Colombe*, *Quillau*, and at *Beleſtat*; the Coal at *Trimont*, and at *St. Benoiſt*; and the Jett at *Lovan*, and *Ranalet*. Of Hats the Fabrick is very conſiderable in theſe Parts; they are made at *Montpelier*, *Quiſſac*, *Sauve*, *St. Hypolite*, *Saumennes*, *Anduſe*, *Alais*, *Uſes*, *St. Geniez*, *la Salle*, *Niſmes*, *Clermont*, *Beaucaire*, *Valborgne*, *Mairvrin*, and *Valarangue*: Cheſnuts and Hemp are plenty in the *Vivares*; and in the Dioceſe of *Carcaſſonne*, all the Inhabitants of the ſix Boroughs, compoſing the little Territory of *Graiſſeſac*, are Nail-Makers. The Fabrick of Lace employs a good Part of the Workmen in *Velay*, and beſides the Manufactures before-mentioned at *Montpelier*, there are made Blankets, Wax is whitened, and thoſe Drams called *Roſſolis*, compoſed in greater Quantities than can be conſiſtent with their Drinkers' Health: But to abbreviate the Detail of this Province's Products, I ſhall excuſe giving a more particular Account of them than the preceding; though in the following general one, I ſhall ſet down the Value of the total Produce and Manufactures, and add what Share of it is ſuperfluous to the Province's Conſumption, and therefore ſent into others, and abroad.

Merchandize and Commodities of the Growth and Manufacture of *Languedoc*.	The Price at which each Article in Trade is fixed and may amount to in a common Year.	The Value of the Goods and Merchandizes, extracted for foreign Parts, and other Provinces.
Grain	Ls. 1,200,000	400,000
Wine	830,000	830,000

Garden-Seeds	30,000	15,000
	Livres 25,198,000	Livres 13,093,000

22. *Of the Lower* Navarre *and* Bearn.

IF *Bearn* cannot be called fruitful, the Lower *Navarre* is much leſs ſo, being a mountainous barren Country, whoſe Soil will not produce any Thing but thro' Force of Application and Care; and it is owing to the Labour, Aſſiduity, and Induſtry of the Inhabitants, that it yields the little it does. The Vallies of *Baretons*, *Aſpe*, and *Offane*, in the Precinct, or *Senechauſſé*, of *Oleron* in *Bearn*, produces Pines to make Maſts for the Royal Navy; they likewiſe encloſe ſome Mines of Lead, Copper, and Iron, which employ a Quantity of Forges, Founderies, and Hammers; ſome Salt is alſo made in different Parts of *Bearn*, though very little more than ſerves for the Natives' Conſumption. The Productions of this Country for Trade are Wine, Wheat, Millet, Oats, Apples, Flax, and Hemp, with which latter they make ſome Linen, as they do Cider with their Apples, ſelling their Wine, of which that of the Seneſchalry of *Morlac* is eſteemed excellent. Theſe two Provinces, more eſpecially the Mountains of *Navarre*, have moſt admirable Paſturage, which enables the Inhabitants to breed and raiſe a great Number of Horſes, black Cattle, and Sheep, of which latter the Wool is ſo fine as to paſs for that of *Spain*; though here are no Woolen Manufactures, except a trifling one for coarſe Cloths for the poor Natives' Uſe.

23. *Of* French-Flanders.

OF which *Liſle* is the Capital and Centre of its Trade; its Manufactures, and the Undertaking of its Merchants, employ and maintain about 100,000 Workmen, either in the City, Suburbs, plain Country, or the neighbouring Villages: The Commodities which this Part of *Flanders* produces are Grains of all Sorts, for the Food both of Men and Beaſts; Hay, Wood, Fruit, Wool, Horſes, Flax, Cattle, Butter, and prodigious Quantities of Rape Oil.

The Manufactures conſiſt in Cloths, Serges, Ratines, and divers other Sorts of Stuffs, made with Wool alone, or mixed with Silk or Thread; and others, where ſeveral Sorts of Linens are made, both figured and plain; Hides differently tanned; Tickings, Camlets, Damaſks, Velvets, Laces white and black, either of Thread or Silk, Tapeſtry, gilt Leather, Pipes, Match, Paſteboard, Stockings, Breeches, Caps, or other ſuch knit or wove Work; fine Ozier Baſkets, Hats, Barragons, Crapes, Blankets, and ſeveral other Species of Stuffs: All theſe Manufactures are eſtabliſhed in the City of *Liſle*, and the Commerce they occaſion can hardly be imagined. At *Orchies* are made Trippes; at *Douay*, the ſame Things in Proportion as at *Liſle*; at *Armentiers* Eſtaminas, ſome Cloths, and a very few light Stuffs; it is in this City alſo that the Linens made in the adjacent Parts are all ſold; at *Lanoy* and its Juriſdiction ſome light Stuffs alſo are made. At *Gorgche* is a Fabrick of plain and figured Linens, whitened in the Whitſteries of this Place, which are excellent for the Purpoſe. There are ſeveral Looms of Woollen Stuffs, or thoſe mixed with Silk, at *Roubais* and *Turcoing*; at *Menin* is a Fabrick of Linen, and another of Hats; and in fine, at *Tournay* are made worſted Stockings, mock Pluſh, and Earthen-Ware.

24. *Of* Lorrain *and* Bar.

THERE are but few Woollen Manufactures in either of theſe Duchies, and none of Silk; what little is carried on of the former is at *St. Nicholas*, *St. Marie-au-Mines*, but the Cloths are very coarſe and in little eſteem. At *Nancy* is a Fabrick of ordinary Hangings, though ſo trifling, that I ſhould not have mentioned it, but to avoid leaving out any Manufacture in a Country where there are ſo few, That of Thread Laces is not only more conſiderable, but is almoſt the only one that merits any Regard; *Mericourt*, *Vezelize*, *Neufchateau*, and ſome Villages in their Juriſdiction, are the Places where moſt are made, and employ five or ſix hundred Women or Girls; it is true they are far from being fine, but of a Quality very fit for the *Spaniſh* Markets, where ſeveral thouſand Pieces are annually ſent. Houſehold and other Sorts of Linen, Worſted Stockings and Caps, Hats, Cordage, Nails,

and Paper, are alſo Manufactures of theſe Provinces, but all conſumed at Home; and what they afford for Trade is Salt, Iron, Alum, Saltpetre, Wood, Cattle, Wool, Rape Oil, Honey, Wax, Wine, Brandy, Skins, and Glaſs. Places proper for making Salt are found in many Parts of *Lorrain*, ſo that at leaſt a Dozen might be appropriated to this Purpoſe, which would furniſh a large Quantity of an excellent Sort; though only three are now wrought, *viz.* at *Rozieres*, *Chateau-Salins*, and *Dieuſe*.

The Iron Mines are chiefly in the Mountains of *Voſge*, though there are ſome in the plain Country; they afford Plenty of Metal, and employ a great Number of Forges. The Allum Mines are only found in the *Voyvre* near *Longevi*, and are of little Advantage to the *Lorrainers*, as they neither know how to extract or prepare it. Of Saltpetre they have no Mine, but collect it, as elſewhere, on the Walls of old Houſes, and other antique Buildings. Timber and Maſts are felled in the Mountains of *Voſge*, both for Ship and Land Uſe; and the Glaſs-houſes are eſtabliſhed in the Woods of the Provoſtry of *Arnay*, in thoſe of *St. Michael*, and at the Village of *Tavoy*, three Leagues from *Nancy*. Brandies are diſtilled at *Pont-a-Mouſſon*, though not from Wine as in other Parts of *France*, but from the Preſſings of the Grapes, which are every where elſe regarded as uſeleſs, or at moſt ſerve only for feeding Pigeons, or to dry and burn. The Skins particularly thoſe of Bears, which are taken in large Quantities in the Mountains, and the Foreſts of *Voſge*, are ſold at *Straſburgh*, &c. Wheat grows here in Plenty; and the *Lorrainers* are eſteemed the beſt Founders in *Europe*; eſpecially for Cannon, Mortars, and Bells; the Inhabitants of *Leveſcour*, *Outremicour*, and *Breranne*, are the moſt reputed for theſe Fabricks, and this Art may be regarded as a Sort of Trade in *Lorrain*.

25. *Of the three* Biſhopricks.

UNDER this Title are comprehended *Metz*, *Toul*, and *Verdun*, three imperial and epiſcopal Cities in *Lorrain*, now ſubject to *France*. The Products of this Country are Wine, Wood, Grain, Salt, Hides, Fruit, Confectionary, Brandy, Linen, and wrought Wood of *St. Lucia*, a ſweet-ſcented Wood; beſides which here are ſeveral Woollen Manufactures, and Fabricks of Caps; the beſt of which are eſtabliſhed at *Metz*, and its Neighbourhood, which conſiſt of all Sorts of Ratines, divers Species of thin Serges for the Women's Wear, coarſe Cloth, with ſome Druggets, and Eſtaminas. *Toul* and *Verdun* have alſo ſome of theſe Manufactures, but very inconſiderable, both in Quantity and Quality. Worſted Stockings are made in all the three Cities, and theſe Parts abound ſo in Tanneries, that there are above forty at *Metz*, more at *Verdun*, and ſeveral at *Toul*. A Sufficiency of Salt is extracted from the Works of *Moyenvic*, as theſe produce about 9000 Muids *per Annum*. Oil is made here from the *Lorrain* Rape-Seed, both for their Woollen Manufactures and Lamps. The Mountains of *Voſge* furniſh the three Biſhopricks with Cattle, Butter, Cheeſe, Skins, eſpecially thoſe of Bears, and Wood for all Uſes; beſides which they make Brandy in the Manner that is expreſſed under the preceding Section of *Lorrain*.

26. *Of* ALSACE.

THE Trade carried on in this Province, bears no juſt Proportion to its Fertility, and the Number of its Products; however, *Straſburgh*, the Capital of the Lower *Alſace*, furniſhes Trade with Tobacco, Brandy, Hemp, Madder, Alkermes, Saffron, Hides, Tallow, Wood, and large Cabbages, of which laſt Commodity, though ſeemingly trifling, there is yearly ſold at *Mayence* and in *Holland*, to the Amonnt of 30,000 Crowns: The Manufactures of this City conſiſt of Hangings, ordinary Cloths, Blankets, Serges, and ſome Linens, made both of Hemp and Flax; at *Giromani*, *St. Marie-au-Daines*, *Aſtembare*, and *Munſter*, are Mines of Silver, Copper, and Lead, all in the Upper *Alſace*; and to melt and prepare the Iron of theſe Mines of *Befort*, there are many Furnaces and Forges in the neighbouring Foreſt, and for thoſe of Copper, a Number of Hammers and Founderies.

27. *Of* ROUSSILLON.

THE Wool, Iron, and Olive Oil of this Country are the principal of its Products for Trade: The firſt of theſe are ſo fine and good, that they almoſt equal the Spaniſh in Quality; the Extract of Oil in a common Year, is to the Worth of 2 to 300,000 Livres; but of the Wine, though good, only a middling Quantity is ſold; the Reſt of their Trade conſiſts in Wheat, Millet, large Cattle, and Sheep. *Rouſſillon* has no one conſiderable Manufacture; here are however ſome Blankets, ordinary Linens, and coarſe Cloths, made for the Peaſants' Clothing and Uſe.

I HAVE now finiſhed my Detail of what each Country of *France* produces, and ſhall next inform my Readers how theſe Products are diſpoſed of, in the general Traffick of that Kingdom, excuſing to mention any Thing of the Trade carried on with *Great-Britain*, as this has been ſpoken to already.

The Commerce of *France* is extended almoſt to every Part of the known World, where any is carried on, and it is this only I ſhall ſpeak of, without regarding their Home Trade, and ſhall begin firſt with that they maintain with *Holland*, as the moſt conſiderable of any other they are engaged in; and the principal Cities concerned in it, are *Paris*, *Rouen*, *Orleans*, *Dieppe*, *Dunkirk*, *St. Valery*, *Caen*, *Nantes*, *St. Malo*, *la Rochelle*, *L'Iſle de Rhè*, *L'Iſle d'Oleron*, *Bourdeaux*, *Berberac*, *Montauban*, *Bayonne*, *Lyons*, and *Marſeilles*, whoſe Trade with the *Dutch* I ſhall deſcribe in Order. Of the Manufactures of *Paris*, are ſent to *Holland* all Sorts of rick Silks, as Gold and Silver Brocades, and thoſe without either of theſe Metals; Gros de Tours, Damaſk, flowered and plain Sattins, Tarandines, Thread Laces, Ribbons and Girdles, Aprons, Head Dreſſes, Gloves, Fans, Jewels, Books, *&c.* From *Rouen* they extract Linens, *Caudebec* Hats, Laces of Silk, and of Gold and Silver, true and falſe, Silk and Worſted Stockings, divers Sorts of Mercury and Hardwares, Greening Weed for Dyers, Thiſtles for Clothiers, Saſh Glaſs, Bon Chrêtien Pears, Rennet Apples, Cider, and Sweetmeats. From *Orleans*, they have only *Gâtinois* Saffron, *Orleans* Wine, and ſome from the *Loire*, and Brandies: Dieppe furniſhes them with Saſh Glaſs, Laces, Mercury, and Hardwares, and a large Quantity of Combs, and Horn Tobacco-Boxes. The Trade of *Dunkirk* with *Holland* is now reduced to the Importation only of the Returns the former gets by its *American* Commerce, and which are principally ſent to *Rotterdam*. *St. Valery* has hardly any Trade with the *Dutch*, nor does *Caen* remit them any Thing but Paper, which is ſent both to *Amſterdam* and *Rotterdam*. *St. Malo* ſupplies the former with Paper, Honey, Grain, Calf-Skins, Grindſtones, *India* Goods, coarſe Sugars, and ſeveral *Spaniſh* Commodities.

Nantes ſends them *Bretagne* Linen, Butter, when ſcarce in *Holland*, Corn, ſuch as Wheat, Rye, and Maſlin, Honey, *Gâtinois* Saffron, *Loire* Wine and Brandy, Paper, Prunes of *St. Catharine*, Sugar, Indigo, Cocao, Rocou for Dying, and Cotton Wool: *Rochelle* furniſhes *Amſterdam* with Wine and Brandy, Salt, Paper, brown Sugar, Syrup, Indigo, *Martinico* Cocao, Walnut-Tree Boards, *&c.* The Iſles of *Rhè*, *Oleron*, and Town of *Cognac*, ſupply it plentifully with ſmall Wines, particularly that from *St. Martin*, Brandy and Salt. *Bourdeaux* ſends there Brandy, Vinegar, *Perigord* Cheſnuts, Prunes of *St. Antonin*, Walnuts, and Walnut-Tree Planks, Honey, *Montauban* Saffron, Linſeed for Oil, Paper, Turpentine Reſin, and Pitch, coarſe Sugars, Indigo, and Rocou, Syrups, and ſeveral other Commodities. *Bergerac* only affords for this Trade, Wine and Cheſnuts, with which at leaſt a hundred and fifty Ships go yearly laden from hence and *Libourne* to *Amſterdam*. From *Bayonne* are carried there the ſeveral Wines of *Journanſon*, *Bearn*, *Chaloſſe*, and *Cape Breton*; Brandies, Cheſnuts, Prunes, Hams, Liquorice, Turpentine, Reſin, and Pitch; a large Parcel of *Spaniſh* Wool, Honey, Bed Feathers, and Linſeed. *Lyons* only deals with *Amſterdam* in Silks and Exchanges, though *Marſeilles* ſends there Olive Oil, Soap white and marbled, Brandy, *St. Laurence* Wine, Olives, Capers, Anchovies, Honey, Almonds, Figs, Raiſins, Currants, Tunny Fiſh, Dates, Verdegris, Perfumes, Woad of *Languedoc*, *Marſeilles* Quilting, Silk Stockings of *Niſmes*, all Sorts of *Arabian* and *Levant*

Drugs, Coffee, Silk, Cotton Wool and Thread, *Angora* Goats Hair, Camels Hair, and ſeveral other Sorts of Merchandize.

And what *Holland* ſends to *France* in Return, are Cloths, Cambricks, Hollands, Cotton Wool and Thread, Chints and Muſlins, but theſe by Stealth, as they are contraband, Sugar-Candy, Pepper, Cinnamon, Cloves, Mace, Nutmegs, writing Quills, fine Wool, Horſe Hair, Ox Horns, Drugs for Dying, Diamonds, Pearls, and Seed Pearls, Madder, Galls, Gums, Allum, Copperas, Vitriol, Pewter, Lead, Copper, Tin, Steel, Iron, Iron Plates, Pots and ſeveral other Works of this Metal; Limbecks for Diſtilleries, and Kettles for boiling Sugar; Braſs and Iron Wire, Quickſilver, refined Brimſtone, all Sorts of tanned Hides, *Ruſſia* Leather, all Sorts of Skins, Flax, Hemp, Cables and Cordage for Ships, Sail-Cloth, Maſts, Yards, and Plank for all Marine Uſes; Timber for Houſe-building, Reſin, Pitch, Tar, Cheeſe, Tallow, Candles, Butter, Salmon pickled and ſmoaked, Herrings, Whalebone, Train, Linſeed, and Rape Oils, Linſeed for ſowing, Muſk, Civet, and Ambergris, Coral, and yellow Amber, Staves, Caſks, Aſhes for the Soap Works and Whitſterers, white and yellow Wax, Wax Candles and Flambeaus, Starch; all Sorts of Thread for Sewing or Weaving, as alſo for making Cables and Sails, China-Ware, Tea and Chocolate, Couries, and all Sorts of Copper Baſons and Merceries for the *Guinea* Trade; Tapeſtries of different Species, Cannon, and all Sorts of Fire-Arms, Powder, Bullets, and Bombs.

By which may be in Part ſeen how conſiderable a Trade is carried on between *France* and *Holland*; and if we may believe the Author of the Memoirs *on the Commerce of the* Dutch, Monſ. *Boreel*, who was their Ambaſſador to his moſt Chriſtian Majeſty, had declared and proved to the *French* Court, that in the Year 1658, Goods had been entered in the ſeveral Cuſtom-houſes of the ſeven United Provinces to above three Million and a half of Guilders in Value, in the following different Sorts of Commodities, *viz.*

	Guilders.
Of Velvets, Sattins, Gold, Silver, and other Brocades, Taffeties, *&c.* made at *Lyons*, *Tours*, and *Paris*, to the Value of	6,000,000
Of Silk Ribbons, Thread, and Gold and Silver Laces, Buttons, Stay-Laces, *&c.*	2,000,000
Of Caſtor, Nicuna, and *Caudebec* Hats, made at *Paris*, &c.	1,500,000
Of Feathers, Belts, Fans, Head-Dreſſes, Looking-Glaſſes, Watches, Clocks, and other Merchandize of this Sort	2,000,000
Of Gloves made at *Paris*, *Rouen*, and *Vendome*	1,500,000
Of Wools ſpun in *Picardy*	1,500,000
Of the different Sorts of Paper made in *Auvergne*, *Limoſin*, *Poictou*, *Champagne*, and *Normandy*	2,000,000
Of Pins and Needles, Box, Ebony, and Ivory Combs	500,000
Of Hardware from *Auvergne*	500,000
Of the different Sorts of Linens from *Bretagne* and *Normandy*	5,000,000
Of Furniture, Beds, Quilts, Blankets, Curtains, and Fringes	5,000,000
Of *Bourdeaux*, *Gaſcoyne*, *Saintonge*, *Orleans*, *Anjou*, and *Nantes* Wine	5,000,000
Of Brandy and Vinegar	1,500,000
Of Saffron, Soap, Honey, Almonds, Olives, Prunes, *&c.*	2,000,000
Which Imports together make thirty-ſix Millions of Guilders	36,000,000

Monſ. *Boreel* repreſents, that beſides all this, *Holland* annually extracted from *Rochelle*, *Marans*, *Brouage*, and the Iſlands of *Rhé* and *Oleron*, above five or ſix hundred Ship-loads of Salt, without including Hemp, Wheat, and other Grain that they take from *France* in a plentiful Year, which ſometimes amount to more than ſix Millions; and though their Trade muſt have ſuffered ſome Alteration in near a Century that has elapſed ſince the above Calculation was made, yet it ſtill continues very great, and moſt of the ſame Commodities exchanged as were by the preceding Account.

The *French* likewiſe carry on a very important Trade with *Portugal*, *Spain*, and *Italy*, though nothing nigh ſo much as they formerly did, as *Spain* in particular has within a few Years paſt ſet up ſeveral Manufactures of Silk, more eſpecially at

Valencia, which now rival the *Lyonnois* Fabricks in Pattern, Goodneſs, and Dye; they however ſtill ſupply *Portugal* with this Commodity, and both Kingdoms with ſome Woollens for their *American* Trade; on the contrary, raw Silk is carried from *Italy* to *France* as well by Sea as Land, and all the *Italian* States in Return take off ſome Part of their fleecy Treaſure wrought into Serges, Cloths, Druggets, *&c.* Of Hats, ſome are yet exported to all theſe Countries, though in nothing near the Quantities as was uſual when thoſe of *Caudebec* were the celebrated ones of *Europe*; their Linens and Lace alſo continue to find a Sale as well in moſt Parts of *Italy* as the *Spaniſh* and *Portugueſe* Dominions, both in this Part of the Globe and *America*; and theſe States furniſh the Wants of the *French* with large Parcels of Hides from *Buenos Ayres* and *Neuva Colonia*, as they do with Snuff and Roll Tobacco; of the former it is ſaid, about two thouſand Ton from *Spain*, and as much of the latter from *Portugal*; they alſo take from *Spain* large Quantities of Soap ready made, with Oil and Soſa or Barrilla, to manufacture more at Home; and with this latter they likewiſe ſupply themſelves for their Plate Glaſs Fabricks. With their Wine, Brandies, and Salt, they carry on a prodigious Trade to all the *North*, for though many of thoſe Parts are ſupplied with theſe Commodities at Second-hand by the *Dutch*, yet none totally; for *Sweden*, *Denmark*, *Ruſſia*, and the *Dantzickers* relieve a great Part of their Wants with their own Shipping, which they load with Iron, Steel, Copper, Tin, Lead, Powder, Stock-Fiſh, Salt-Fiſh, Tallow, Wools, Boards, Maſts, Hemp, Cordage, Tar, and other naval Stores for the *French* Markets; though indeed, in Regard of the *French* Intereſt, it ſignifies very little what Nations are the Exporters of their Commodities, provided they be taken off. They carry on an immenſe Trade to the *Levant*, and on the Coaſts of *Barbary*, principally with their own Products and Manufactures, and ſupply all their *Weſt-India* Settlements with them; they ſhare all the *European* and *American* Fiſheries, and if they do not do as much as the *Engliſh* and *Dutch* do in them, they do more I believe than all the other Nations put together. Their Commerce with *Germany* is alſo conſiderable, and a great Part of this is carried on by Land, as the two Empires in many Places join, ſo that Silks, Salt, Woollens, *&c.* they may get to Market without the Intervention of any Sea Carriage, and bring back an Aſſortment of thoſe fine Threads and Laces for which many of thoſe Parts are ſo famous. The Flemings come empty, and load back with Wine, Brandy, Syrup, and Sail Cloth. The *Hamburghers* bring Lead, Copper, Starch, Staves, Steel, Iron; and in Return take Salt, Wines, Brandy, Indigo, Ginger, and Paper. For carrying on their *Weſt-India* Trade, the *French* have a Company with an excluſive Charter, which was at firſt formed in 1628, to ſupport the Colonies they had at that Time eſtabliſhed in *Canada*, and to ſettle others in that vaſt Tract of Land then moſt Part unknown; this Company immediately began to flouriſh, and the large Settlements ſince made there are properly owing to its Activity and good Management, though it ſubſiſted no longer than till 1649, when it began to ſell Part of its Grant, and finiſhed the Whole by 1651. This occaſioned a Succeſſion of Companies under different Denominations, and frequently ſplit into ſeveral Societies, too prolix to be inſerted here, till they were reunited again in one, in 1664, under the Title of *The Royal* Weſt-India *Company*, but this only laſted for about nine Years, when the King annulled the Patent, and annexed all the *American* Settlements to this Crown, at which Time there was alſo eſtabliſhed a more conſiderable Aſſociation, I mean that of the *Eaſt-India* Company, which ſtill ſubſiſts; and there are now very large Colonies and Settlements in both the different Diſtricts, though the Support of the one and the other has coſt that Monarch ſeveral Millions. Here is likewiſe the Company *du Baſtion de France*, ſettled in the Kingdom of *Algiers*; and that of *Senegal*, after ſome Years' Traffick, was in 1718 ſwallowed up by their grand Company of the *Indies*; though out of this ſprung their *Guinea* Company, which changed its Name for that of the *Aſſiento*, and then for the *South Sea* Company, and in its Turn loſt both the one and the other, in its Abolition, the King laying the Trade of their Diſtrict open to all its Subjects in 1716. They have alſo had their *Hudſon's-Bay*, *Miſſiſſipi*, *Weſtern*, and *Canada* Companies; the Company of *Acadie*, Company of the *North*, *Levant* Company, and *St. Domingo* Company, all which have been ſo altered and jumbled together, that it would take up too much Time, and be little to the Pur-

poſe, to give a diſtinct Hiſtory of them: I ſhall therefore conclude my Diſſertation on the Trade of *France*, with this additional Remark, that, notwithſtanding its Sufferings by the late War, it ſeems a very growing one, and muſt be regarded with a jealous Eye by every Well-wiſher to that of *Great-Britain*.

Of the Trade of SPAIN.

THE principal, and moſt beneficial Branches of this Commerce, have been treated of already in that carried on with us, as the Trade with the *French* can never be accounted ſo, the Balance being greatly in their Favour, even in that, leſs than middling, Traffick yet ſubſiſting between the two Crowns. The chief Places of Trade in *Spain*, are *Madrid*, *St. Sebaſtian*, *Bilboa*, *Seville*, *Cadiz*, and in its Bay, *St. Maria*, *Port Real*, *St. Lucar*, and *Rota*, *Malaga*, *Carthagena*, *Alicant*, *Valencia*, and *Barcelona*, in all which the *Dutch* have ſome Commerce, and, next to that with the *Engliſh*, the moſt advantageous one to the *Spaniards*. *Madrid*, the Capital of *Spain*, is ſituated almoſt in the Middle of it, and conſequently lies very diſtant from the Sea, which however does not hinder its carrying on a conſiderable Trade, by Means of the Correſpondence it has ſettled with the ſeveral Sea Ports of the Kingdom, and elſewhere, more eſpecially at *Cadiz* and *Carthagena*, as theſe are the uſual Places where Goods are landed for the Metropolis; and it is here that all foreign Commodities are entered for the Court, on Account of the Difference in the Cuſtoms, which greatly vary between the ſeveral Ports of this Kingdom. At *St. Sebaſtian's* great Quantities of Wool are ſhipped for *England*, *France*, and *Holland*, as alſo Cheſnuts and ſmall Nuts for the latter, both from hence and *Gigon*, which is but a little diſtant. From *Bilboa*, the *Dutch* carry Wool, Iron, Saffron, Cheſnuts, Oranges, and Lemons: From *Seville* they take Olives, Oil, Wool, Oranges, Lemons, *Morocco* Hides, and Wine: From *Cadiz*, they have Indigo, Cochineal, Tobacco *de Verines*, Jeſuits Bark, Sarſaparilla, Venelloes, and other *American* Drugs and Hides, Salt, Wine, Oil, Figs, Raiſins, Wool, *&c.* At *Malaga* and *Carthagena*, they ſupply themſelves with Wool, Oil, Olives, Raiſins, Figs, and Wine, and from this latter with ſome Sôſa or Barilla. *Alicant* affords them ſtill greater Supplies, as from hence they have a better Sort of the laſt-mentioned Commodity; Red Wine, accounted by the *Dutch* a good Remedy for the Dyſentery, *Caſtile* Soap, Anniſeeds, Cummin-Seeds, Almonds, Raiſins, Saffron, Oil, and Salt. *Valencia*, though the Capital of the Kingdom of that Name, and a moſt delightful fertile Country, produces nothing for the *Dutch*, nor indeed any other Nation, but raw or wrought Silks, of which the firſt is however generally all ſhipped at *Alicant*, when the Extraction is permitted, which has for ſome Years been denied, and *Valencia* grows no Almonds or Wines, as moſt Authors have erroneouſly aſſerted. *Barcelona* is the Capital of *Catalonia*, where ſome few Woollens are made, though the only Extracts from theſe Parts for *Holland* are Brandies and Nuts, chiefly ſhipped at *Saloe*. The Merchandizes which the *Dutch* carry to *Spain* are *Holland*, *Sileſia*, and *Oſnabruck* Linens, printed Cottons and Chints, Muſlins, Cambricks, *Brabant* and *Flanders* Lace, Gold and Silver ditto, *Engliſh* and *Dutch* Cloth though I believe theſe are now prohibited, Gold, Silver, and Silken Stuffs, Gauzes, Ribbons, Fans, Wigs, Velvets plain and flowered, Caffoys, Silk and Worſted Stockings, Mercerics, and Hard-ware of all Sorts, Pepper, Cloves, Mace, and Nutmegs; Wheat and other Grain, when wanted, Wood for the Building of Ships, Canvas, Cords, and Twine, Ships built on Purpoſe for Sale, Anaſcotes, Lamparillas of *Bruges*, and Picottes of *Liſle*, Tapes white and coloured, Butter, Cheeſe, ſewing Thread, Paper, Cards, Table Linen, *Ruſſia*, and other Hides, *&c.* The Commerce between *Italy* and *Spain* conſiſts in ſeveral Sorts of wrought Silks from *Naples*, *Florence*, *Milan*, *Genoa*, *Meſſina*, and *Leghorn*, Hoops, Pipe-Staves, Paper, Linens, and Corn, on Failure of the *Spaniſh* Harveſt. The *Swede*, and *Danes* bring only Iron, Copper, Pitch, Tar, and Lumber: and re-load with Wine, Brandy, Salt, *&c.* The *Hamburghers* likewiſe take off theſe Commodities, and beſides, they yearly freight two or three Ships, to load almoſt ſolely with Saffron and Almonds. The Iſland of *Majorca* is very fruitful in Oil, of which great Quantities are yearly ſhipped for all Parts of the North, and that of *Ivica* is greatly frequented for its Salt,

Salt, of which one Sort is different in Colour and Grain from that made at *Almat*. The greateſt and moſt important Part of the *Spaniſh* Trade is carried on at *Cadiz*, and this on Account of the Galleons and Flotas being diſpatched from, and returning there. And as it is a Commerce in which the principal Nations of *Europe* are concerned, I ſhall give my Reader ſome Idea of the Method of its Tranſaction, and acquaint him with the Aſſortments of Goods proper for an Intereſt therein. The Galleons was a Name formerly given to large Men of War of three or four Decks; and though it has been for a long Time diſuſed with this Significancy, it is however ſtill retained by the *Spaniards*, and uſed indifferently for all the Ships which yearly ſail from *Cadiz*, for *Carthagena* and *Porto-Bello*; of theſe, there are eight for the King's Account, which are Men of War, and from twelve to ſixteen belonging to Merchants, who obtain, or rather purchaſe, the Permiſſion to undertake this *American* Voyage. The Ships are all fitted out at *Cadiz*, from whence they may ſail at any Time, though they commonly depart ſome Months before the Flota, which leave this Place always in *Auguſt*, and are about two Years before they return. The Flota conſiſts of three Men of War for the King's Account, and an equal Number with the Galleons for the Merchants, from four hundred to a thouſand Ton, which ſails, as before obſerved, about *Auguſt*, for *la Vera Cruz*, and is generally nineteen or twenty Months in its Voyage. Beſides theſe Diſtinctions in the *Weſt-India* Convoys, there is yet another, under the Denomination of the Flotilla, or little Flota, which the *Spaniards* give to ſome Ships, ſent before the Flota on its Return from *la Vera Cruz*, with an Account of the Time of its Departure, and what its loading conſiſts of. When theſe Fleets ſet out together, they ſeparate in the Latitude of the *Antilles*, and rejoin on their coming back at the *Havanna*, in the Iſle of *Cuba*; the Galleons are always the richeſt, though the Aſſortments of Goods proper for the different Markets, much the ſame; the following therefore will indifferently ſerve for both.

From ENGLAND.

Cloths in twenty Pieces, nineteen Brown and one Black.
Sempeternas, in forty Pieces, the following Colours, *viz.*
Fifteen Pieces of Parrot Green, fifteen Pieces of Sky Blue, five Pieces of Muſk, five Pieces of Black.
Serges, all Brown, or ſorted like the Sempeternas.
Eſtaminas, wide and well calendered, Brown and Green.
Serges, fine, of a ſcarlet Colour.
Says, White and Black, well calendered.
Bombazeen, double, Brown and Greeniſh.
Serges of *Hoogwet*, half White and half Black, very fine and well calendered.
Bays of *Colcheſter*, the hundred Pieces aſſorted as follows, *viz.*
Twenty Pieces Black, fifteen Pieces Parrot Green, fifteen Pieces Sky Blue, twelve Pieces of the beſt Yellow, ten Pieces Scarlet, ten Pieces Red, eight Pieces Violet, five Pieces very White, five Pieces Carachuca, a Colour which I am quite ignorant of.
Stockings, Worſted, of the firſt and ſecond Sort.
Ditto, Silk, ordinary knit, in Packets of ten Pair, *viz.*
Three Pair Sky Blue, two Pair Dove Colour, three Pair Parrot Green, two Pair light Yellow.

From FRANCE.

Several Sorts of Linen, as Rouennes, Florettes, Blancartes, *&c.*
Caſtor Hats, two Thirds White, and one Third Black.
Pluſh Velvet, the twelve Pieces aſſorted as follows,
Four Pieces Muſk, two Pieces Olive Colour, two Pieces Amber Colour, one Piece Sky Blue, one Piece Fleſh Colour, one Piece Parrot Green, one Piece Black.
Stuffs called Lamas, twelve Pieces, aſſorted as follows,

Three Pieces Fleſh Colour, three Pieces Sky Blue, three Pieces Parrot Green, three Pieces Caracucha.
Thread Stockings.
Laces, Gold and Silver, from one to eight Fingers wide, one Third of each Sort.
Cuts of black Laces, a Foot, or half a Yard wide.

From *Holland* and *Flanders*.

Cloth, fine, of two Aunes wide, twelve Pieces, aſſorted as follows, *viz.*
Two Pieces Black, two Pieces Scarlet, two Pieces of a light Nut Brown, two Pieces Olive, two Pieces of deep Cinnamon, and two Pieces of Muſk.
Cotton printed Cloths, called Guineas, which are denominated Hollandillas in *Spain*; twenty-five Aunes long, and the Aſſortment of a hundred Pieces to be as follows, &c.
Thirty Pieces deep Blue, twenty Pieces pale Blue, fifteen Pieces Parrot Green, fifteen Pieces Orange, ten Pieces Muſk, five Pieces Yellow, and five Pieces Fleſh Colour.
Or as the ſubſequent;
Fifty Pieces of Blue, deep and pale, ten Pieces of a pale Fleſh Colour, ten Pieces of Parrot Green, ten Pieces of Orange, ten Pieces of Muſk, ten Pieces Yellow.
Some Pieces of Goods made of Goats Hair, wide and narrow very fine, of Muſk and black Colours.
Nonpareils, Palimites, Serges of *Leige* of a deep Scarlet; ditto, corded, of *Holland* of lively Colours; Dimities, Browns and Greens.
Says, fine, half Black and half of a very good White.
Tapes, White, made of *Erverwelt* Thread, of twenty-eight Threads, the two Thirds.
Ditto, Fleſh Colour, of eighteen Threads, the other one Third.
Caſtor Hats, fine, two Thirds White and one Third Black.
Pepper and Cinnamon, when they are cheap; as the Charges run high on them.
Cloves and Mace, in a ſmall Quantity, as the Conſumption is not great.
Ruſſia Hides; Muſk in the Cods and out of them.
Wax, White, in Cakes of five Roves: Knives, with Ivory Handles.
Stuffs of *Leyden*, of a fine Black, two and three threaded Velvets.
Pluſh Velvet.
Silk Brocades of plain Colours, among which muſt be neither Red nor Fleſh Colour.
Barragons of *Liſle*, and double ones of *Valenciennes*.
Picote Woollen, of modeſt Colours and Browns.
Ditto, Silk, Lamparilles and Anaſcotes.
Serges, fine, of *Germany*, all of brown Colours.
Cambricks, of the fineſt and cleareſt Sorts.
Hollands, very fine; and Laces of all Sorts, eſpecially fine.
Lace, called Cortes, of the Price of eight or ſixteen Rials of Plate the Yard; the Aſſortments of the Cortes of *Anvers* are made for a hundred, as follows, *viz.*
Twenty Sorts of Tranſillas, in two Aſſortments, *viz.*
Ten of the ſame Pattern, from two to four Inches wide.
Forty Aluxeriados, with ſmall Holes in,
twenty-five from two to four Inches Width,
fifteen from two to five Inches Width,
Twenty Puntas de Moſquito, the half from three to eight or ten Inches wide, and the other Half from four to eight or ten Inches wide, but each Sort to be of the ſame Pattern.
Ten Licenciados, very fine, of one or two Inches wide, and ſome from three to four Inches wide, for Women's Head Dreſſes.
Tranſillas and Aluxeriados, of the fineſt, from one to two Inches wide.
Damaſk Napkins and Table-Cloths
Some Platilles, Eſtopilles, and Bocadilles.

From ITALY.

Lames of Silk of *Naples*, the ten Pieces aſſorted as follows, *viz.*
Two Pieces Fleſh Colour, three Pieces Parrot Green, two Pieces Sky Blue, and two Pieces Dove Colour.
Silk Stockings of *Milan* with long Clocks, each Dozen ſeparate, with the following Colours.
Three Pair Dove Colour, three Pair Parrot Green, three Pair Sky Blue, three Pair light Yellow.
Ditto, for Women, of the ſame Colours.
Ditto, of *Meſſina* and *Genoa*, about half the Quantity as from *Milan*.
Ditto, for Children, of the ſame Colours.
Guirviones, or Corcondilles of *Naples*, *Meſſina*, and *Genoa*, of Brown Colours.
Silk Eſtaminas and Gorgeranes, of the ſame Colours.
Plain Silks of *Florence* of a low Price, the ten Pieces aſſorted thus;
Three Pieces Parrot Green, three Pieces Dove Colour, one Piece Sky blue, one Piece light Yellow, one Piece of a fine white, one Piece of an Amber Colour.
Flowered Silks of a middling Price, with lively Colours, and ſome Brown.
Gold and Silver Silks, from twenty to twenty-four Rials of Plate the Yard.
Lamas, of lively Colours, all with Silver, and none with Gold.
Calabria Silk, a hundred Skeins, ſorted as follows;
Fifty Skeins Brown; ten Black, Pearl and White; ten Parrot Green; ten Dove Colour; ten deep and Sky blue; five deep Green; five deep Yellow.

Since the above Calculation was made, the *Spaniards* have improved greatly in their Manufactures; and now, at leaſt in a great Part, ſupply ſeveral of the preceding Commodities from their own Looms; of which Don *Geronimo de Uztariz* ſays, in his Theory and Practice of Commerce, there were formerly no leſs than ſixteen Thouſand in *Seville*, though they now are reduced to about three hundred; which Decreaſe, though a ſeeming Contradiction to what I have aſſerted of the *Spaniſh* Improvements, is, however, not ſo in fact; as the Decay of Trade in one Place has been more than equivalently augmented in another; thus the City of *Valencia*, *Alicant*, *Alcoy*, &c. have gone on for ſome Years paſt increaſing both in their Silk and Woollen Manufactures, inſomuch, that it is now computed there are in this kingdom only two thouſand Looms; in *Catalonia* above five hundred; and in the Kingdom of *Granada* a thouſand: And as there are alſo ſeveral of both Sorts in other Provinces, we may reaſonably conclude, there are not at preſent ſo few as ten thouſand in all *Spain*, which one would imagine ſhould be ſufficient to clothe both Rich and Poor, as the Inhabitants of *Spain* are not ſuppoſed to exceed ſeven Millions and a half; however we find the contrary, and though the Imports to that Kingdom are greatly diminiſhed within a few years paſt, yet they ſtill continue very conſiderable, more eſpecially to furniſh out the Aſſortments proper for the *American* Settlements: Wool and Silk are the natural Products of this Country, ſo that the Natives have a conſtant Supply of Materials for their Manufactures within themſelves, and the Crown has prudently prohibited the Extraction of the latter, in order to encourage them, as I doubt not it would the former, did not the Sheep produce more than ſufficient for the Subjects' Uſe. A Patent for the making of Cryſtal Glaſs was granted on the 30th of *January*, 1720, to Don *John Goyeneche*, which ſtill continues; and the ſame Gentleman undertook the cutting down, and conveying from the *Pyrenees*, Maſts, and Timber for Shipping, which he ſtill performs, by having eſtabliſhed three Works, in the higheſt and moſt craggy Parts of thoſe Mountains; one of them in the Kingdom of *Arragon*, upon the Mountains of *Eſpuna*; another in the ſame Kingdom, in the Valley of *Hecho*, and upon the Mountains of *Oza*; and the third in the Kingdom of *Navarre*, in the Vale of *Roncal*, and upon the Mountains of *Maze*, *Zurizabeiti*, and *Yzeizpeta*, all being brought by Land and Water Carriage into the River *Ebro*, for his Catholic Majeſty's Navy. It is alſo owing to the Induſtry of this great and uſeful Man, that many Fabricks of Pitch and Tar are eſtabliſhed in many Parts of the Kingdom of *Arragon* and *Catalonia*, more eſpecially in the Mountains of *Tortoſa*, where the great Plenty of Pines

affords ſufficient Matter for a very large Increaſe of theſe neceſſary Commodities; and indeed moſt of the Mountains in *Spain* are covered with theſe Trees, and the Extraction of theſe Reſins ſo eaſy, that it is a Matter of Surpriſe any Importation of it is permitted from other Parts; yet I believe much more is brought in than made here, notwithſtanding what Don *Geronimo de Uztariz*, before quoted, aſſerts, that the Manufacture of all Kinds of Rigging in *Port-Royal* is with Hemp and Tar of the *Spaniſh Growth*. At *Sada* in the Kingdom of *Gallicia*, Cables, Cordage, and Sail Cloth are made, as this latter was, ſome Years ago, by that good Subject and conſummate Stateſman the Prince of *Campo Florido*, then Viceroy of *Valencia*. The aforeſaid Don *John de Goyeneche* eſtabliſhed with his Glaſs Fabrick twenty-ſix Looms for Cloths, which manufactured fifty thouſand Yards yearly for clothing the Troops; beſides others for Soldiers' Hats, Buff, and Shamois Leather, Looms for weaving Silk Handkerchiefs, Ribbons, and Girdles; a Diſtillery for Brandy and *Hungary* Water. In *Madrid* has been ſet up a Manufacture of Tiſſues, Luſtrings, and other Silks, in Imitation of thoſe made at *Lyons* in *France*, and from whence moſt of the Artificers have been drawn; without the Gates of that Metropolis has likewiſe been raiſed a Fabrick of fine Tapeſtry, ſimilar to thoſe of *Flanders*, under the Direction of Maſters and Workmen from that Country. The Fabricks of fine Cloths at *Guadalaxara*, *Valdemero*, *Alcoy*, &c. are very conſiderable, and are undoubtedly greatly improved both in Quantity and Quality within a few Years paſt; yet our above-mentioned Author muſt excuſe my diſſenting from his Determination in Favour of the latter, when he aſſerts they are as fine as the *Engliſh*; for I cannot allow them to be equal to the *French*, much leſs to what is undoubtedly their Superiors; and I ſpeak this with due Deference to Don *Geronimo's* Judgement, which I revere in other Particulars, though in this it ſeems ſomething biaſſed and prejudiced in Favour of his Country.

The *Spaniards* are well known to have excellent Iron, and may whenever they pleaſe caſt very good Cannon, Ball, *&c.* at their Founderies of *Lierganes* and *Cavada*, which are but at a ſmall Diſtance from the Dock Yards of *Guarnito* and *Santona*. From the Fabricks of *Eugui*, *Azura*, and *Iturbieta*, a Supply of Bombs, Grenadoes, Ball, and Grape Shot, may be drawn, and Gunpowder is made, all glazed, in ſeveral Parts of the Kingdom. In the Forges of *Placentia* in *Guipuſcoa*, only three Leagues diſtant from the Sea, is manufactured a conſiderable Number of good Fire-Arms, ſo that they may eaſily be conveyed by Water to any of the Yards, as Nails, Anchors, and other Iron Works, proper for Marine Uſes, may be, their Forges enjoying the ſame advantageous Situation; Hemp grows plentifully in ſeveral Parts of *Spain*, and might eaſily be increaſed, if the Natives ſet about its Cultivation, particularly in the Plains of *Granada*, *Murcia*, and *Valencia*, where I have ſeen five Crops of it, and its Price ſo reaſonable, that my afore-mentioned Author ſays, a Propoſal was made to furniſh the King with 25,000 Quintals, at four Dollars *per* Quintal, clear of all Charges.

I ſhall now ſay ſomething concerning the Companies eſtabliſhed in *Spain*, and with this cloſe up my Account of the Trade of that Kingdom.

The Royal Company of the Philippines.

THE firſt Aſſociation in this Country was that now mentioned, whoſe Charter was dated at *Seville* the 29th of *March*, 1733, with the following Articles.

This Company was eſtabliſhed to carry on a Trade directly to the *Philippines*, and had a Privilege, Art. I. To ſail to the ſaid Iſles, and to trade there, and in the *Eaſt-Indies*, and on the Coaſts of *Africk*, both on this, and on the other Side of the *Cape of Good-Hope*, and in all the Ports where other Nations have a free Trade. Art. II. and III. This Privilege is excluſive, and all former Permiſſions given are hereby revoked. Art. IV. This Company may hoiſt the King's Arms in all their Colours, have a Seal, bearing the Arms of *Cadiz*, to uſe in all their Affairs. Art. V. The Ships of this Company ſhall pay no Duties, being conſidered on the Footing of the Royal Navy; and the Charity for the Seminary of *St. Elme*, and the Admiſſion of Youth for the Study of Navigation, ſhall be at the Choice of the Directors.

Art.

Art. VI. As alſo the Nomination of the Maſters, Carpenters, and Caulkers; on Condition, however, that they be with the King's Approbation. Art. VII. If the King ſells or freights any Ships to the Company, they ſhall be ſuch as it requires; and the Price of the Sale or Hire ſhall be agreed between the Intendant and Comptroller of the Marine at *Cadiz* on the one Part, and the Directors of the Company on the other. Art. VIII. IX. X. XI. and XII. They may build Ships in any Part of the King's Dominions, or out of them; and if they buy them abroad, they may bring them to *Cadiz*, without paying Duties, except on thoſe they re-ſell; and all the Cordage, Sails, *&c.* ſhall enjoy the ſame Exemption, as thoſe uſed immediately for the King's Service; and in Caſe they want any Thing from the Royal Arſenals, it ſhall be delivered them for its juſt Value. The Company may ſettle Magazines wherever they pleaſe, which ſhall enjoy the ſame Privileges as the King's, and be viſited in like Manner with theſe, on Suſpicion of any Fraud. The Directors may nominate their Officers from among any Foreigners, provided that the Captain and half the Crew are *Spaniards*. Art. XIII. XIV. XV. and XVI. And the Company may alſo name Strangers, for their Factors, who, as well as the Officers, ſhall be ſubject to Puniſhment if they do not actually follow the Directors' Orders. The King will grant the Company ſome Troops, if neceſſary; and if the Ships of the ſaid Company, which are prohibited going to *America*, are forced on that Coaſt, they ſhall be regarded as Men of War, and provided, at a reaſonable Price, with all they want; and in Caſe they have not ſufficient Caſh to diſcharge the Expence, they ſhall be ſupplied with it from the Royal Coffers, and the Company ſhall reimburſe the King at *Cadiz*. Art. XVII. XVIII. XIX. and XX. The Company may freely embark any Merchandize and Products, either of *Spain* or other Countries, to ſell or truck; and they may alſo load 500,000 Dollars, more or leſs, on each Ship, to employ in the Purchaſe of Goods; and in Caſe any Silver remains, they may truck it for Gold, and on the Extraction of the ſaid Silver they ſhall pay no Cuſtom, *&c.* The remaining Articles, to the Number of fifty-two, are concerning their Cargoes, Cuſtoms, *&c.*

Concerning the Guipuſcoa *Company.*

THE Province of *Guipuſcoa*, ſeeing their Countrymen deſpoiled of the *Caracca* Trade by Foreigners, offered his Catholick Majeſty, to equip for his and the Nation's Service, ſome Men of War, and to ſend them to the *Caraccas*, to facilitate the Means of preventing the ſaid Detriment, and ſecure the future Advantages of that Trade to themſelves; his Majeſty admitted the Offers, and granted the ſaid Province an excluſive Charter for that Trade, on the following Conditions.

1. That the Province ſhould erect a Company, and ſend yearly to the *Caraccas* two Ships of forty or fifty Guns, laden with the Products of *Spain*, which ſhall proceed to the Port of *Guayoa*, and being unladed, ſhall go out and cruize on the Coaſt, and take all Ships and Veſſels they ſhall find carrying on an illicit Commerce, and may extend their Cruize from the River *Oronoko* to the River *de la Hacha*, for which Purpoſe they ſhall be furniſhed with a Commiſſion from his Majeſty.

2. That the two Ships ſhall be loaded at *St. Sebaſtian*, or at *Paſſage*, and inſtead of the Royal Duties which they ſhould pay at *Cadiz*, they ſhall render to his Majeſty an equivalent Service, and ſail directly from *Guipuſcoa* for the *Caraccas*.

3. That on returning with their Cargo of Cocoa, Silver, Gold, Tobacco, Sarſaparilla, Hides, and other Products of thoſe Parts, they ſhall proceed to *Cadiz*; and after having been viſited, and the Royal Duties paid, they may tranſport to *Cantabria* ſuch Part of their Lading as they ſhall think proper, without ſuffering the conſiderable Expence of delivering and re-ſhipping their Goods.

4. That the Prizes which they ſhall make in *America*, ſhall be divided one-third to the Crew, and two-thirds to the Company.

5. That the Merchandize taken may be ſold at the *Caraccas*, on paying the King's Cuſtoms. The Ships taken, with their Ladings of Cocoa, and other

Goods, ſhall be regiſtered and ſent to *Spain*, and the Ships that ſhall be deemed fit for Cruiſers may be equipped for that Purpoſe.

6. That the Company's Factors, having any Quantity of Cocoa remaining, may ſend it to *La Vera Cruz*, in the Barks appointed for the Trade permitted to the Inhabitants of the *Caraccas*.

7. That the Factors ſhall be obliged to ſupply with Goods, beſides the Province of *Venezuela*, thoſe of *Cumana*, *Margarita*, and *la Trinidad*.

8. That the Governor of the *Caraccas* ſhall be nominated Judge Conſervador of the Company and their Dependencies, with a Prohibition to all Tribunals and Miniſters to intermeddle, with a Right of Appeal to the Council of the *Indies*.

9. That the ſaid Ships ſhall be exempt from paying Strangers' Duties, *&c.*

10. That his Majeſty will maintain the ſaid Company under his Royal Protection, and make thoſe concerned in it to enjoy all the Rights and Honours that appertain to thoſe of his Royal Navy; and the Share which any one ſhall take in this Commerce ſhall not prejudice his Honour, Eſtate, or Reputation, neither directly or indirectly; but on the contrary, this ſhall be a new Luſtre added to his Gentility, his Services, his Character, *&c.*

The ſaid Company formed Bye-Laws, for their better Government, to the Number of twenty-four, which I excuſe adding as ſuperfluous here; and for the ſame Reaſon ſhall omit mentioning the Steps taken by the *Dutch*, by their Miniſters at *Madrid* and *Paris*, to obtain a Revocation from his Catholic Majeſty of the ſaid Company's Patent.

Commerce of PORTUGAL.

THERE is hardly a State in *Europe*, with the Title of a Kingdom, and whoſe King has no additional Territories, that is of leſs Extent than that of *Portugal*; and yet no one has puſhed Trade farther, or has maintained it with a ſuperior Reputation. Its great Conqueſts in both *Indies*, its Eſtabliſhments in many places on the Coaſt of *Africa*, and the Poſſeſſion of the *Azores*, *Madeira*, and *Cape de Verd* Iſlands, for a long Time ſupported the ſaid Commerce, which it might probably have yet preſerved, had the Union between this Kingdom and *Spain* never happened.

This Union ſo fatal to the *Portugueſe* Trade, was agreed on in 1580, after the Death of Cardinal *Henry*, Succeſſor to the unfortunate *Sebaſtian*, who was killed at the Battle of *Alcacer* in *Barbary*, the 4th of *Auguſt*, 1578; and thereby becoming Subject to the *Spaniſh* Monarchy, it found a very formidable Enemy in the *Dutch*, who were combating for Liberty, almoſt at the ſame Time that the others began to ſuffer the Yoke which they were ſhaking off.

Brazil was ſoon loſt, and their new Enemies became Maſters of a Part in their *Eaſt-India* Conqueſts; and being likewiſe bereaved of a Share of their Colonies on the *Guinea* Coaſt, they had barely Power left to ſupport the remaining Part of their *African* Trade, which had formerly being equally glorious and profitable to them. It is true that after a conſtrained Union, or rather Servitude of ſixty Years, *Portugal* recovered its primitive Power or Liberty, and all the States, which it had remaining in the other three Parts of the Globe, were unanimous with it, in electing *John* Duke of *Braganza* for their King, who was accordingly proclaimed on the 1ſt of *December*, 1640.

But the fatal Blow to the *Portugueſe* Commerce was ſtruck; for although they afterwards re-poſſeſſed *Brazil*, and their Forts and Eſtabliſhments on the *African* Coaſt were reſtored to them, thoſe of the *Eaſt-Indies* were never again ſettled; inſomuch, that the Trade ſince carried on at *Liſbon*, is nothing in Compariſon with what it formerly drove, when the Riches of *Perſia*, *Arabia*, the States of the *Mogul*, the Coaſts of *India*, *China*, *Japan*, and all the Iſles of that vaſt Part of the Ocean beyond the Line, came to be united at *Goa*, the Capital of their *Eaſt-India* Conqueſts, and were by numerous Fleets brought to *Liſbon*, for their Diſtribution to all the Nations of *Europe*, by the Hands only of theſe their ſole Importers.

The preſent Trade of *Portugal* is principally carried on by Foreigners; and the chief Places for it are *Liſbon*, *Porto Port*, *Ulla de Conda*, *St. Ubes*, and *Faro* in *Europe*; though in the Commerce of their *American* and other Settlements, none but the Subjects can openly be concerned. Of that with the *Engliſh* I have already ſpoke, and ſhall now mention what Branch the other Nations are engaged in. The *Dutch* ſend to *Liſbon*, all Sorts of Linen, Woollen, and Silk Manufactures; ſuch as printed Cottons, and Chints, Muſlins, and Cambricks, *Holland*, *Oſnabruck*, and *Sileſia* Linens, Black Silk and others, *Delft* Serges, Men and Women's Clothes ready made, Wigs, Hats, and Gloves, Silk and Worſted Stockings, *Ruſſia* Hides, Copper Pans and Kettles, Steel, Mercery, and Hardwares, Powder, Cannon Balls, Hemp, and Flax, Corn, Paper, and Cards, beſides which, moſt of the Merchandizes ſent from *Holland* to *Cadiz* are proper for *Liſbon* or the *Brazils*.

And in Return they take from the *Portugueſe*, *Brazil* Sugar, Tobacco, and Snuffs; *Fernambuc*, *Campeche*, and *Brazil* Wood, Hides, Cotton, Ginger, divers Drugs, Sweetmeats, Indigo, Cochineal, Sumack, Anniſeeds, Wool, Oil, and Olives, Figs, Raiſins and Almonds, Oranges and Lemons, Pearls, Diamonds, and other precious Stones, Gold and Silver Ingots and Coin.

The *French* Trade with *Portugal* is but ſmall, as his moſt Chriſtian Majeſty brought it to this low Ebb, by prohibiting the Importation to his Dominions of *Portugueſe* Sugars and Tobacco; there is, however, a Sale of ſome of the *French* Brocades, Perukes, *&c.* though to no great Value.

The Commerce with *Italy* furniſhes them with Paper, and ſome Linens from *Genoa*; Glaſs Works from *Venice*; and Silk from theſe and moſt other Parts of this Country; who carry back with them Sugar, Hides, Tobacco, *&c.*

From the northern Powers are brought here Hemp, Flax, Tar, Pitch, Iron, and all other naval Stores for the King's Yards and otherwiſe; beſides Copper, ſome Linen, *&c.* and the Ships bringing theſe Commodities, of which the *Swedes* are always moſt, relade with Wine, Brandy, Oil, Salt, Oranges, Lemons, Cork, Sumack, and ſome few other Commodities.

The *American* Trade employs a great Number of Ships; as there ſail annually from *Liſbon* and *Oporto* twenty to twenty-two Merchant-Veſſels for *Rio Janeiro*; thirty for the *Bay of All Saints*; as many for *Pernambuc*, and ſeven or eight for *Paraiba*; thoſe for the two firſt Places, of five hundred Tons Burthen; but for the latter, not above half as big.

All the Ships deſtined for the ſame Part ſail together, and obſerve the ſame Method in their Return; thoſe of *Oporto* joining thoſe of *Liſbon*. The *Paraiba* and *Pernambuc* Fleets depart all in Company, and come back in like Manner: And the King grants five Men of War yearly to convoy theſe Fleets, *viz.* two for *Rio Janeiro*, two for *All Saints Bay*, and one for *Pernambuc*; ſending ſome Veſſels to meet them on their Return in the Latitude of the *Azores*. The Departure of all theſe Ships for *Brazil* is commonly in *March*, and their Return in *September* or *October*; and formerly it was permitted to carry Silver with them for Trade; but now this is prohibited, and their Cargoes reſtrained to be Goods, of which the following ones are the Chief, *viz.* Flour, Wine, Brandy, Oil, ordinary Worſted Stuffs, Linen and Thread of the Country; Silk Stockings, Hats, Baiſe, Serges, and other Woolens from *England* and *Holland*; whitened Linen called *Panicos*, and raw ditto named *Aniages* and *Groga*; Copper Plates, and other Requiſites for the Sugar Engines and Mills from *Hamburgh*; ſome Linens from *Bretagne*; a few Druggets, Serges, and clouded Brocades of all Sorts of Colours from *France*; and Tabbies, Taffeties, ſewing Silk, Paper, *&c.* from *Italy*. The *Engliſh* Goods, however, make up the beſt Half, and generally find the beſt Diſpatch. From the *Bay of All Saints* the Ships come laden with Tobacco, Sugar, Sugar-Candy, Indigo, Whale Oil and Fins, which come aſhore here in great Quantities from *June* to *September*, Cotton, Oil, and Balſam of Capaiva, Ipecacuanha, Pareira, Brava, or the wild Vine, affirmed by Mr. *Savary* in his Dictionary, to come from hence, though denied by Dr. *James*, in his Diſpenſary, to be a Native of this Country, as he ſays that it is of the *Eaſt-India* Growth; both allow it to be a good Diuretic; and the former reports that the *Portugueſe* regard it as a Specific for the ſtone and Gravel, which induced me to mention it here, ſome Cinnamon, long Pepper, Ginger, Elephants' Teeth, from the Coaſt of *Africk*, Copper from *Angola*, Hides, Silk, dying and

ſweet ſcented Woods, Saffron, Rocou, Laque, Rock Cryſtal, Cocoa, Ambergris, that the Sea ſometimes throws aſhore, Amethiſts, of which here is a Mine, Gold, found in the Gravel of a River near a Place called *St. Paul*, of which the King's Fifth may nearly amount to eight or nine hundred Marks, and all Sorts of Sweetmeats wet and dry.

The Ships that touch here from *Goa*, in their Way to *Europe*, furniſh the Inhabitants of *Brazil* with Spice, Drugs, and other *Eaſtern* Merchandize; and by thoſe from *Angola* and *Congo* they receive their Negroes, at leaſt fifteen thouſand yearly, Ivory, Wax, Honey, Civet, Gold, and all other Commodities that thoſe Parts produce; but theſe Goods, the Slaves excepted, are moſtly ſent to *Portugal* in the *Liſbon* Fleet.

Pernambuc produces only Sugar, and *Brazil* or *Fernambuc* Wood, being ſteril in the Neceſſaries of Life; and the Inhabitants, who are more numerous than in any other part of the *Brazils*, would hardly be able to ſubſiſt without the foreign Supplies the Ships bring them; on the contrary, *Rio Janeiro* is extremely fertile in Sugar, Indigo, and Cotton, as it would be in Tobacco, was the Growth of more than what ſuffices for the Inhabitants' Uſe not prohibited; it likewiſe brings Wheat to Perfection, and has *Brazil* Wood, Hides, and Fiſh Oil in Plenty.

It is particularly with the *Portugueſe* of this Part that the *Spaniards* of *Buenos Ayres* carry on their Trade; theſe furniſhing them with Flour, Biſcuit, Salt, or dried Meat: and the *Portugueſe* giving in Exchange Sugar, Tobacco, Indigo, Wine, Brandy, Rum, and ſeveral other Merchandizes that they receive from *Europe*.

The principal Company which the *Portugueſe* have is that Trading to the Coaſt of *Africa*, of which I ſhall give ſome Account, and with it conclude my Treatiſe on this Nation.

The Portugueſe African *Company*.

THE true Object of this Company's Trade is the furniſhing *Brazil* with Negroes; and their Patent bears Date from the Beginning of the Year 1724, under the following Articles:

1. The new Company engages to build a Fortreſs at their own Expence at the Mouth of the River *Angre*, over-againſt the Iſle of *Coriſco*, which belongs to the King of *Benin*, near the Coaſt of *Gabon*, otherwiſe called *Pongo*, in 1°. 30'. South Latitude.

2. That they ſhall furniſh as many Negroes as the *Portugueſe* Plantations in *America* ſhall have Occaſion for.

3. That it ſhall not be permitted either to *Portugueſe* or foreign Ships to traffick on the ſaid Coaſt, on Penalty of forfeiting Ship and Cargo.

4. Nevertheleſs if any Ships are forced thither, either by Storm or ſome other Neceſſity, the Company's Factors may permit them to water, and likewiſe ſell them the Proviſions they may ſtand in Need of, without permitting them, however to tranſact any Buſineſs.

5. That this Conceſſion ſhall laſt for fifteen Years, after which it ſhall be lawful for his *Portugueſe* Majeſty to prolong the Term, or to re-enter into Poſſeſſion of the Country granted.

6. In this laſt Caſe, his Majeſty may take Poſſeſſion of the Forts, Artillery, Ships, and other Effects of the Company, on paying ready Money for them, according to the Valuation.

Some Time after this Grant was made publick, the new Company fixed up at *Liſbon* Billets, declaring the Conditions under which an Intereſt might be had therein, the Funds it would conſiſt of, and the Price of the Actions. Theſe Conditions were couched in twelve Articles, of which the principal ones are.

That the Fund ſhall only be one Million of Cruſades.

That the Actions ſhould be worth a thouſand Cruſades each, of which the Proprietors ſhall pay three hundred Cruſades at ſubſcribing, the ſame Sum in the Month of *December*, 1724; and the remaining four hundred Cruſades whenever the Company thinks proper, after ſix Months' Notice.

That thoſe Proprietors, who ſhall not comply with the Payments at the Time preſcribed, ſhall forfeit what they have already advanced.

That

That the Company ſhall pay the Proprietors, a Year after the firſt Undertaking, a Dividend of five *per Cent.* on the Capital Sum they ſhall have paid in, and this taken from the Profits which the Company ſhall make by their Trade.

In fine, that the Chief or general Commander, who has undertaken to form this Company, ſhall have fourteen *per Cent.* upon the Profits that it ſhall make, on which he undertakes to pay the Factors, and other Perſons, that he ſhall deem neceſſary to be employed, on the Coaſts of *Africk*, at *Liſbon*, *Brazil*, or elſewhere.

Portugal has lately erected two Companies to manage the *Brazil* Trade, namely thoſe of *Grand Para*, and *Pernambuc*; which Meaſure has ſubjected our *Portugueſe* Trade to many Reſtraints, and been the Subject of ſeveral Memorials from our Conſul and Merchants at *Liſbon*, to the *Britiſh* Miniſter at that Court, on the Foundation of the Treaties ſubſiſting between us; but hitherto, as far as appears, without Effect.

Of the Trade of ITALY.

And firſt of that of Venice.

THE Commerce of this Republick is hardly to be imagined, though there is no Compariſon between the preſent and former State of it, when it was from hence that all the other *European* Countries were furniſhed with the Products of all the *Eaſt*; however, it is yet ſo conſiderable, as to ſtand the firſt, and I think by far, among the trading States of that Part of the Globe.

The Quantities of Gold and Silver Tiſſues, and other Silks made here, are prodigious, and are ſold in all Parts of *Europe*, where theſe Sorts of Commodities find a Diſpatch; but the Conſumption is more particularly great in all the *Levant*, where it ſpreads daily more and more; and it is aſſerted for a Truth, that the *Turks* take off larger Quantities than all *Europe* put together; beſides which, the State produces Rice, Currants, Looking-Glaſs and other Cryſtal Works, Beads, Laces, Gloves, Snuff-Boxes, Silk, Coral, Tartar, and Cream of Tartar, Oil, Olives, Drugs, fine Lacque, Orpiment, Annis and Coriander Seeds, Brimſtone, fine Steel, Turpentine, and Soap: They likewiſe make ſome Cloth here, which was formerly greatly valued for its Dye, though its Quality is not a little inferior to the *Engliſh*, *French*, and *Dutch*. The *Armenians* eſtabliſhed at *Venice*, and thoſe who annually arrive there, contribute greatly to the Support of its Trade, in which the *Engliſh* and *Dutch* Ships alſo find a Convenience, as theſe are generally the Carriers of the ſaid Merchants' Goods from the *Levant*. I have already briefly mentioned the Particulars of its Trade with us, in which thirty or thirty-five Ships are annually employed in carrying there Lead, Tin, Pepper, Sugar, Ginger, Dying Woods, Hides, Woollen Goods, Herring, Salmon, Pilchards, Stock-Fiſh, *&c.* which Ships return laden with Currants, Hemp, Brimſtone, Beads, Drugs, Oil, ſometimes Rice, *&c.*

From *Hamburgh*, *Holland*, *Norway*, and the *Baltick*, ten or fifteen Ships arrive yearly with Dying Woods, Pepper, Cinnamon, Cloves, Mace, *Ruſſia* Hides, Braſs, Iron, Pitch, Tar, Stock-Fiſh, *&c.* And theſe Ships reload with the ſame Goods as is before-mentioned for *England*, with the Difference that to theſe Places are carried more Silks.

Formerly there came annually from *Liſbon* to *Venice* near three thouſand Cheſts of Sugar, in Return for the Cargoes of Corn ſent there from *Ancona*, *Sicily*, and the *Levant*; as alſo Rice, *Turkey* Wheat, Steel, Looking, Drinking, Window Glaſs, *&c.* But, as for ſome Years paſt, the ſame Quantity of Sugars has been introduced from *France*, the Trade from *Portugal* has in Proportion gone on decreaſing, as this has augmented.

From *Cadiz* and other Ports of *Spain*, *Venice* gets Indigo, Cochineal, Wool, Barilla, *&c.* for the Produce of the ſame Effects as were ſent to *Liſbon*.

To *Genoa* and *Leghorn* are ſent many Cargoes of Corn, which the *Venetian* Veſſels commonly load in the *Archipelago*, and ſome Window Glaſs, *&c.* ſometimes repaid in Goods, but oftener by Remittances.

There are ſent to the Kingdoms of *Naples* and *Sicily*, large Parcels of ordinary Cloth, Steel, Iron, Writing Paper, Looking, Drinking, Window Glaſs, *&c.* and received from thence, Oil of Almonds, Soſa, Piſtachoes, Silk, Pitch, Lemons, and Lemon Juice.

In fine, the Trade which *Venice* carries on with the *Morea* in the Gulfs of *Lepanto* and *Athens* ought not to be forgotten; as it is from theſe Places, that a great deal of Wool, Silk, Wax, Galls, Valonea, Oil, Cotton, Grain, Honey, Tar, *&c.* are extracted, beſides a prodigious Quantity of Cheeſe; for which the *Venetians* generally pay in Money, except ſome Loadings of Fir and Larch Planks, with a few Nails and old Iron, which, however, employ ſeveral Ships continually.

This is the principal Commerce that *Venice* carries on by Sea; that which ſhe tranſacts on *Terra-firma* is alſo very conſiderable; for, beſides what it has with a great part of *Germany*, it furniſhes all the Wants, either from the Eaſt or Weſt, of the States of *Parma*, and *Placentia*, *Modena*, *Bolonia*, *Ferrara*, *Mantua*, *Milan*, and all *Lombardy*; and even of *Piedmont*, by Means of the Rivers, which facilitate its providing all theſe Places on eaſier Terms than by *Genoa*, *Leghorn*, or *Ancona*; beſides this, it alſo ſends all Sorts of Goods into its own and the *Eccleſiaſtical State*; more particularly a great Quantity of Wax, which is wrought, and finely blanched at *Venice*; here are likewiſe Sugar Refineries, with which is carried on a good Trade, as there is with Soap, Glaſs, *&c.* And the ſole Privilege to ſell Tobacco, imported from *Salonica* and *Albania*, in the *Venetian* Territories, actually produced in the Year 1741, the Sum of 736,000 effective Ducats, which make 950,000 Current, for the Term of five Years.

And to preſerve the conſiderable Trade carried on with *Germany* and *Turkey*, which in Value ſurpaſſes all others, the Republick has granted large Privileges to the Merchants of both Nations, eſtabliſhed in this Capital, and has aſſigned vaſt Edifices to the one and the other, as well for their Habitation, as a Depoſit for their Merchandize; that of the *Turks*, called the *Palace of Turkey*; and that of the *Germans*, *Il Fondaco de Tedeſchi*.

If any Diſpute happens between the *Turks* and the Republick's Subjects, in which the former think themſelves offended, they demand Satisfaction in ſo haughty a Manner, and receive it ſo promptly, that it ſeems as if there was a Fear to Refuſe it them.

In Regard of the Traffick with the *Germans* in *Stiria*, it is partly by Sea and partly by Land in Waggons; and with this I conclude the Trade of *Venice*; though before I cloſe the Section, I ſhall add the following Method of calculating the *Venetian* Money, as I was not ſo explicit about it when I treated of its Bank.

Concerning the Agios at Venice, *and the Difference between Bank and current Money.*

THERE are two Agios, the one conſtant and fixed of 20 *per Cent.* called the Bank Agio; the other fluctuating like that of *Amſterdam*, and is from 120 to 128, which is called the *Sopragio*, becauſe it is calculated on the Bank Money, after the firſt Agio is added.

As for Example,

Ducats 2000 Banco at the Sopragio of 128
$\frac{1}{5}$ 400 Bank Agio of 20 *per Cent.*

2400
20 480
4 96
4 96 } Sopragio of 128.

Ducats 3072 Current.

128 100 3072 to 2400, from which deducting $\frac{1}{6}$ for the Bank Agio of 120
$\frac{1}{6}$ 400

Ducats 2000 Banco.

But however the Sopragio vary, be it 128 more or leſs, ſuch Sum of Ducats current will be reduced to Ducats $83\frac{1}{3}$ Banco.

From hence it appears that by making $82\frac{1}{3}$, the middle Term, or by multiplying the Current Ducats by $83\frac{1}{3}$, and dividing by the Sopragio, the Amount in Bank will be given.

128 $83\frac{1}{3}$ 3072 Ducats 2000 Banco.

$83\frac{1}{3}$

9216
24576
1024

256000

2000

The Bank of *Venice* is ſhut on all Holidays, and every *Friday* of the Week in which there is no Holiday; beſides which there are four Times of the Year in which it is ſhut, for ſeveral Days together, agreeable to the Order of the Senate 29 *Feb.* $173\frac{7}{8}$, and not as I by Miſtake mentioned in treating of the ſaid Bank, *viz.*

The firſt ſhutting of the Bank to begin the *Saturday* before *Palm-Sunday*, and open the firſt *Monday* after *Eaſter* Week.
The ſecond——on the 23d *June*, and open the ſecond *Monday* of *July*.
The third——on the 23d *Sept.* and open the ſecond *Monday* of *October*.
The fourth——on the 23d *Dec.* and open the ſecond *Monday* of *January*,

Of the Trade of Genoa.

THIS Republick for a long Time diſputed with that of *Venice* the Empire of the *Mediterranean* Sea, and the Trade to the *Levant*; but after the celebrated Victory of *Chiozza*, as mentioned in the Hiſtorical Introduction, they ceaſed to rival the *Venetians*, after they had done ſo for near three hundred Years; it is, however, certain, that they now only yield the Superiority in the *Levant* Trade to their ancient Competitors, as their's is ſuppoſed to be conſiderably greater to the Reſt of *Europe*, and more eſpecially to *Spain*; and it is beſides by *Genoa*, that Foreigners carry on all their Trade with *Lombardy*.

Raw Silks, and in Skains, which the *Genoeſe* get from *Meſſina*, and other Ports of *Sicily*, and the fine rich Silk they make in their Capital, occaſion a conſiderable Trade, and they ſee an annual arrival, however, of Ships, hardly credible, all of which take ſome of their Manufactures: It is true, that for ſome Time paſt, the Buſineſs of their City has not been ſo briſk as uſual; but as it is to be hoped they will find ſome Means to re-eſtabliſh it, I ſhall deſcribe it as it has been, with my beſt Wiſhes that, *Phœnix* like, it may riſe out of its own Aſhes.

The Fabricks here are plain and flowered Velvets, and ſome with Gold and Silver Grounds; Damaſks, Sattins, Tabbies, Gold and Silver Tiſſues, and many other Sorts of Silks, both plain and flowered; here are likewiſe Oil, Olives, dry Sweet-meats, Silk Stockings, Gloves, Breeches, and Waiſtcoats, Ribbons, Galloons, Paper, Soap, Rice, Oil, Olives, Figs, Almonds, Anchovies, Marble, Lemons, ſcented Oil, and Perfumes, Tartar, *Parmeſan* Cheeſe, red Coral, Coffee, Cotton, and all Dying and Medicinal Drugs, that come from the *Levant*.

At preſent the *Genoeſe* Trade to *Smyrna* is but trifling, however they always keep a Conſul there.

In the flouriſhing Æra of this Republick, it was Miſtreſs of ſeveral Iſles in the *Archipelago* and poſſeſſed many Cities and Towns on the Coaſt of *Greece*, and the *Black Sea*; *Pera*, one of the Suburbs of *Conſtantinople*, was once under their Dominion, which facilitated the carrying on a great Trade in the *Levant*.

The Decline of their Power, and the Loſs of ſo many States, occaſioned the Ruin of their Commerce in the Dominions of the *Grand Signor*, where their Merchant Ships are now rarely ſeen.

When

When foreign Ships arrive at *Genoa*, which is one of the fineſt Ports in *Italy*, they depoſit their Goods in a great Warehouſe called *Porto Franco*, becauſe the Merchandizes brought in to be ſold, as well as that to be exported, pay no Duties at coming in, or going out; the Merchants only paying at the Cuſtom-Houſe in Proportion to the Sales they make, and it is permitted them to reimbark whatever remains unſold, without any Impoſition.

In 1741 an Inſurance Company was formed at *Genoa*, which has contributed to the Revival of the Commerce of the Republic; the Plan of this Company was inſerted in the former Editions of our Work, but upon a careful Review of the Articles, and comparing them with the Syſtems of other Companies of a ſimilar Nature in *England*, *France*, and *Holland*, it was found that they contained no Information whatever that could poſſibly be of ſervice to the Merchant, or the Stateſman of the preſent Times, for which Reaſon they are omitted.

The *Genoeſe* have a *Levant* Company ſtill ſubſiſting, which was eſtabliſhed in 1645, though it has for ſome Years paſt done ſo little Buſineſs, that it is hardly remembered to be an Aſſociation, its Tranſactions are ſo trifling in a corporate Capacity. They likewiſe had a Company eſtabliſhed formerly under the Title of *The Company of the Grilli*, which ſupplied the *Spaniards* in *America* for a long Time with Negroes, but on their agreeing with the *Aſſiento* Company, this of the *Genoeſe* was overſet.

I muſt here introduce ſome Account of the Iſland of *Corſica*, as Part of the *Genoeſe* Dominions, and I am the more tempted to do it, as the Natives have rendered themſelves ſo famous in their Struggles for Liberty, and done ſo much towards making themſelves a free People. All their noble Efforts for Independence have been however rendered abortive; for *Genoa*, unable to ſubdue the reſolute Inhabitants of this ſmall Iſland herſelf. concluded a Treaty at *Verſailles*, in 1768, whereby that Republic formally ceded *Corſica* to the *French* King, for an indeterminate Time. In Conſequence of this Meaſure, a conſiderable Body of *French* Forces being ſent to take Poſſeſſion of it, their Numbers ſoon effected this *glorious* Conqueſt over a handful of brave unhappy Men, and in 1769 their General *Paſcal Paoli* left the Iſland.

In might have been apprehended that this Procedure would be conſidered as an Infraction of the Treaty of *Aix la Chapelle*, by which it had been provided that no Change ſhould be made in the State of *Italy:* But however this may be, the Reſt of *Europe*, even *England* itſelf, contented themſelves with being mere Spectators of this Event; and though they profeſſed to pity the Fate of *Corſica*, afforded no Aſſiſtance to check the Hand of Oppreſſion, and ſuccour expiring Liberty in a poor little Nation whoſe Number does not Amount to 200,000 Souls!

The *Mercure Hiſtorique* furniſhes us with a ſhort, though curious Account of them and their King *Theodore*, which I have tranſlated, in Hopes it may be agreeable to my Readers.

" THE War which has ſubſiſted for ſome Years between the *Genoeſe* and the *Corſicans* leaves Room to doubt, whether they will remain with the Poſſeſſion of that Iſle, or whether it ſhall paſs under ſome other Power, or whether the Inhabitants will obtain their Liberty. In the Interim, for the unravelling of the myſterious Intrigue, which King *Theodore* has played, who was elected in 1735, I ſhall here obſerve, that on his Return to that Iſle towards the End of 1737, he convoked the States of the Kingdom, to give them an Account of his Proceedings during his Abſence; he afterwards made them a Repreſentation, conſiſting of ſeveral Points, which they agreed to, without the leaſt Difficulty; they were, above all, extremely well ſatisfied with the Diſpoſitions taken to extend their Trade, and they eſtabliſhed a Council of Commerce, compoſed of four *Corſicans*, and the ſame Number of foreign Commiſſaries, converſant in Trade, from which they flattered themſelves with great Succeſs; and it is a Matter of Surpriſe, that a Nation till then hardly known, ſhould find themſelves in a Condition ſo ſuddenly to make themſelves talked of. They attended to the Manufactures of divers Species of Goods; and the Crops were

ſo abundant this Year, 1737, that the Corn, Wine, Oil, and other Fruits, were at a very low Price, which muſt naturally put the Chamber of Commerce in a Condition to procure great Advantages from Foreigners; but, as Money is very ſcarce in *Corſica*, they permitted the Inhabitants of the Low Country, to pay their Taxes and Capitations in Fruits, *&c.*"

The principal Articles of King *Theodore's* Propoſitions were,

I. That they ought as ſoon as poſſible to ſet about making ſome Salt-Ponds, as the Nature and Situation of the Country promiſed ſo great a Quantity of that Commodity, as may load an Hundred Ships yearly; ſo that the Crown and Subjects might draw Advantages from this Branch of Commerce.

II. That they ought to encourage the Working of the Iron, Copper, and Lead Mines which are diſcovered, to extract not only Iron for common Uſes, but for Cannon, Bullets, and other Things neceſſary to put an End to this tedious troubleſome War, and thereby ſave the groſs Sums ſent out of the Iſle to purchaſe them.

III. And as here is a great Abundance of Brimſtone and Saltpetre, they ought to build a Mill on the moſt commodious River, to make what Gunpowder they ſhall need in the Kingdom, and repair the Want under which they have hitherto laboured in this Particular, without mentioning the vaſt Sums it has coſt.

IV. They ought to encourage Agriculture, the Majority of the beſt Lands being uncultivated; and to this End, they ought to eſtabliſh in each *Pieve* ſome Commiſſaries, intelligent in this Art, who ſhall be particularly charged to take Care, that the Peaſants till each a certain Spot in their ſeveral Diſtricts for their own Advantage; and in Parts improper for the Plow, each Peaſant ſhall be obliged to plant at leaſt four thouſand Vines, or a thouſand Olive Trees, and all Sorts of Exemptions ſhall be granted during ten Years for thoſe Grounds ſo newly cultivated.

V. By an Ordinance publiſhed throughout the Kingdom, one conſtant and uniform Meaſure ſhall be eſtabliſhed for all the Fruits growing here, ſuch as Oil, Wine, Honey, Pitch, Tar, and other Commodities put up in Caſks; and at the ſame Time, one Ell, one Weight, and one Buſhel, ſimilar and conformable to the Standards of other Trading Nations.

VI. Whereas a Quantity of Silk may be ſhipped for abroad, they ſhould above all encourage this Branch of Commerce.

VII. And as nothing can contribute more to the Advantage of this Nation than a regular foreign Trade, and as our Kingdom is better ſituated than any other for it, with ſo great a Number of good Ports and Bays, we would have our good Citizens accuſtom themſelves to it, by making them ſenſible of the Advantages ariſing from ſuch an Application. To which Purpoſe we have thought proper to eſtabliſh a College of Commerce for Account, and at the Expence of the Crown. The Commiſſioners of which College ſhall be obliged to purchaſe of our Subjects all their Fruits and Products of the Country, fit to be ſent abroad, at a Market Price, paying them in Manufactures, or other Silver Coin; But, if the Peaſant will not give his Products at ſuch a price, he ſhall bring them into the Crown Magazines, where a Receipt ſhall be given him. The Commiſſioners ſhall ſend theſe Products with others, and their reſpective Invoices, to the Conſuls and Correſpondents of the Crown in foreign Parts, with an Order to draw out the particular Accounts of the Produce of theſe Effects, in Order that there be given to every one what belongs to him. The Proprietors ſhall receive at the College of Commerce the Returns, or Imports of their Accounts, on paying, beſides the Carriage, five *per Cent* on the Capital, to defray the Charges; and if the Peaſant be neceſſitous, and cannot wait for the Returns unaſſiſted, he may receive from the College, the half, or two thirds of the Value of what he delivers, for which he ſhall pay on balancing Accounts half *per Cent*. for ſix Months, beſides the five *per Cent*. aforementioned. And to give a greater Credit to the ſaid College, we engage our Self and Crown for it. And we order our Conſuls, Reſidents, or Correſpondents, to contract and negociate only with the ſaid College, and they ſhall ſend us whatever we cannot paſs without in our Iſle. No Veſſel

ſhall be admitted without the Permiſſion of the ſaid College; and our Correſpondents abroad ſhall have the ſame Credit as thoſe here, and beſides that, the Character of Counſellor of Commerce of this Kingdom.

VIII. And foraſmuch as that our Kingdom abounds in Wood, Pitch, Tar, Hemp, and every Thing neceſſary for the Conſtruction of Ships; this Article ſhould be taken very ſeriouſly into Conſideration, as alſo what concerns the Fiſhery, *&c.*

This little Hiſtory is not intended ſolely to amuſe, but will likewiſe ſerve to ſhew what that Iſland contributes to Trade, as the Commodities therein mentioned are the Total of its Products.

Of the Trade of Naples.

THIS Capital of the Kingdom of the ſame Name is a Place of great Trade, and the Goodneſs of its Port attracts vaſt Numbers of foreign Veſſels to it; but in order ſtill to increaſe its Commerce, and raiſe it to the higheſt Pitch poſſible, Don *Carlos*, the late King, invited the *Jews* to ſettle there, by granting them ſeveral very great and ſingular Privileges, as will appear by the following Edict publiſhed on the 3d of *February*, 1740, by Order of his *Sicilian* Majeſty, *viz.*

I. It is granted to all Merchants or others of the *Hebrew* Nation, a full and abſolute Safe-guard, Faculty, and Permiſſion, to come, remain, traffick, paſs on, or ſtay, with or without their Families, in our Kingdoms and States, as alſo to depart, and return, without any Obſtacle, both in Regard of their Effects and Perſons; and this for the Term of fifty Years next following, to commence the firſt Day of this; declaring, that the fiftieth Year being expired, there ſhall yet be granted five others, during which, if it be the good Pleaſure of his Majeſty, or his Succeſſors, to abrogate the preſent Licence at the End of the fifth Year, they may freely, and without Hindrance, regulate all their Affairs, *&c.* we willing, that no extraordinary Duty be exacted from them on the Departure of their Ships, Veſſels, Horſes, Carriages, *&c.*

II. If any *Hebrews* coming from other Kingdoms or Countries to ours, ſhall be accuſed in thoſe States from whence they came, of having committed ſome enormous Action or Crime there, for which they have been proſecuted, as alſo in Caſe that they were diſguiſed as Chriſtians, and had feigned to be of this Religion, we annul and make void the Cauſes of ſuch Accuſation, and will not permit that they be called to Account for it in our Dominions, on any Pretext whatſoever; in fine, we grant to the ſaid *Hebrews*, the free Exerciſe of their Caremonies, Solemnities, Uſe, and Cuſtoms, according to the *Jewiſh* Laws, prohibiting their wearing publickly Cloaks, or other diſtinguiſhing Dreſs, under any Denomination whatſoever.

III. That the *Hebrews* ſhall not be ſubject to any Regiſtry or conſular Juriſdiction, nor to any Company of Tradeſmen; but, if any Difference ariſes between a Chriſtian and a *Jew*, on ſome Affair concerning Arts and Trades, the Judge Delegate, who ſhall be named for this Purpoſe, ſhall be deemed a competent one, and decide it.

IV. We grant to the *Hebrews* and their Families, who ſhall eſtabliſh their Reſidence in our States, to enjoy, in Reſpect of their Commerce, either at home or abroad, the ſame Privileges, Franchiſes, and Immunities, which the other Citizens, or Inhabitants of the ſaid Cities or Places, do, or may enjoy.

V. That all their Moveables or Ornaments making a Part of their Apparel, acquired either within or without our Dominions, ſhall be exempt from paying any Cuſtoms, or Duty of Paſſage, at their Importation or Exportation.

VI. There ſhall be a Judge Delegate at *Naples*, *Palermo*, and *Meſſina*, and a Magiſtrate appointed at *Meſſina*, as at *Naples*, who ſhall judge of the Differences that ſhall ariſe between a *Chriſtian* and a *Jew*, or between two *Jews*, in Caſe that the Crimes merit a ſeverer Chaſtiſement than confining or baniſhing; and in other Caſes, that may be carried excluſively before their People of the Law, and

if they are wronged or aggrieved, they may recur to the Royal Protection of his Majeſty.

VII. This Article regards the Puniſhment to be inflicted on the *Jews*, who ſhall frequent or keep Company with either Chriſtians, *Turk*, or *Moor*.

VIII. This is to prevent the falſe Accuſations, which may be intended againſt the *Jews*.

IX. If there happens any diſaſtrous Accident to a *Hebrew*, that ſhould oblige him to fail, and that he falls into Penury, ſo as to diſable him from paying his Debts; in this Caſe the Merchandize, Bills of Exchange, and other Effects, or Money appertaining to any Correſpondent, ſhall not be ſtopped to ſatisfy his ſaid Debts.

X. Is relative to the Dowry of Married Women.

XI. On the Subject of Sequeſtrations obtained againſt the *Jews*.

XII. Concerning the Validity of the Securities which the *Jews* ſhall give, when they ſhall be obliged to leave the Kingdom.

XIII. Permits the *Hebrews* to have all Sorts of Books, after being, however, inſpected by their Delegate.

XIV. and XV. Favour the *Jewiſh* Phyſicians.

XVI. Grants them a publick Synagogue.

XVII. Leaves them at Liberty in Regard of their Wills.

XVIII. In Regard to Contracts of Purchaſe and Sale, or in Trade, in Relation to the *Jews* in our Dominions, the Sales ſhall not be held as perfected, till after a Writing has paſſed between the Buyer and Seller, under their Hands, and confirmed by a Notary, or two Witneſſes; provided that if between Merchants in the retail Way, at Fairs, Markets, *&c.* they be made without theſe Formalities, they ſhall have all Force, according to the uſual Cuſtom and Law, in Regard to the other Inhabitants.

XXV. We grant to the *Jews* all the Favours, Privileges, and Faculties, enjoyed by the other Merchants of this Kingdom; they may exerciſe all Sorts of Trades and Traffick; but it ſhall not be permitted them, after the Manner of our Subjects, to cry about the Streets old Clothes to ſell: Though the *Jews* have Leave to ſell and buy every one in particular, in his own Houſe or Shop, none of them or their Family ſhall be obliged to wear any Mark that they may be known by.

XXXI. The Merchandize of the *Jews*, and of their Correſpondents, and their Perſons, coming to any Place whatſoever in our Ports, ſhall be free, as well in their Merchandizes and Perſons as the Ship which brings them, on Payment of the ordinary Cuſtoms, Gabelles, and Taxes, even when they have no Paſſport; provided that it appears by the Veſſels' Documents, that it was deſtined with its Goods for one of our Ports, and no Magiſtrate or Officer ſhall moleſt either the Ships or any of the Effects; but, on the contrary, ſhall obſerve our preſent Privilege, and in Caſe of Diſobedience ſhall be puniſhed, and all the Merchandizes reſtored to the *Jews*, with Charges and Expences, without any Hinderance real or perſonal.

XXXV. We grant to the *Jews* ſix Warehouſes for their Uſe in the Cuſtom-Houſes of *Naples* Rent free, ſince we conſider them as our own Subjects; they may have alſo the like, in the other Cuſtom-Houſes of our Kingdoms for their Conveniency, equally with the other Burgeſſes and Inhabitants, in Proportion to their Number and Trade, according to the Informations that their Declaration ſhall give in; and in Caſe that the Magazines of the Cuſtom-Houſe are not ſufficiently large to contain their Goods, it ſhall be permitted the *Jews* to hire others to their Liking, under the Guard and Inſpection of the Cuſtom-Houſe Officers, enjoying the Privilege of *Portos Francos*, as if their Effects were encloſed in the Offices of the Cuſtom-Houſe.

The King of the *Two Sicilies* likewiſe made a Treaty of Peace, Trade, and Navigation with the *Ottoman* Court, which was concluded at *Conſtantinople* the 7th of *April*, 1740, whereby his Subjects are put on the ſame Footing with thoſe of all others trading to the Dominions of the *Grand Signor*.

Naples

Naples furniſhes Trade with raw and wrought Silks, ſilk Waiſtcoats and Stockings knit, Oil of Laurel, crude Brimſtone, *Calabrian* Manna, Roſemary Bloſſoms, Anis and Coriander Seeds, Raiſins, Currants, Cream of Tartar, Figs and Olives, Soap, dried Orange and Lemon Peel, Silk Stockings and Waiſtcoats, Eſſences, Quinteſſences, and Perfumes.

Palermo, the Capital of *Sicily*, produces alſo raw and wrought Silks, Brimſtone, Cream of Tartar, fine Sponges, and Plenty of the fineſt Wheat, except *Spaniſh*, I ever ſaw.

Reggio yields Raw Silk, Manna, Oil, and dried Fruits.

Meſſina affords alſo large Quantities of Silk, and other Commodities, ſimilar to thoſe of *Palermo*.

With thoſe Products and Manufactures his *Sicilian* Majeſty's Subjects carry on a great Trade to *England*, *Holland*, *Liſbon*, *Turkey*, and ſome to *France*, more eſpecially in Corn, when this Kingdom is in Want; and the Merchandizes they take in Return will be noticed in a Catalogue of thoſe fit for *Italy*, in which theſe Places will be included.

Of the Trade of Rome, *and the other Territories of the* Pope.

THIS City is more celebrated and known for Antiquity, Hiſtory, Magnificence, and Grandeur, than by its Commerce, as it draws almoſt all from Abroad, by its Port of *Civita Vecchia*, at the Mouth of the celebrated River *Tyber*, whoſe Stream muſt be gone up to reach *Rome*: theſe Parts afford nothing more to the Increaſe of Trade than Allum, made in great Abundance about ſix Miles from *Civita Vecchia*; but what is wanting here, *Bologna* and *Ancona* in the *Eccleſiaſtical* State abundantly ſupply, I mean to Commerce, the Fertility of the Country about the firſt being beyond all Imagination, and this improved by the Induſtry of its Inhabitants, has rendered the City rich and flouriſhing; there are Mills for Paper, and others for ſawing the Wood found in the *Apennines*; to move Hammers for forging Iron, for poliſhing Gun Barrels, to bruiſe the Barks; and *Valonea* for tanning of Hides, for making of Oil, for Flax and Hemp, for grinding all Sorts of Grain, for winding, twiſting, and making Silk into Skains, and for an Infinitude of other Works.

The Manufactures of this City are Cloths and Silks, particularly Sattin, Damaſks, and Velvets, flowered and plain; ſilk Stockings, Linens and Crapes. There are raiſed in the Neighbourhood a great Quantity of Silk Worms, which furniſhes the *Bolognois* with the richeſt Part of their Trade for raw Silk; and beſides the Silk in Skains, they here make Organcens, which are very much eſteemed.

The other Merchandize brought from *Bologna*, conſiſts in their celebrated Sauſages, of which Foreigners take off yearly a ſurpriſing Quantity, packed up with Cotton in little deal Boxes, and ornamented with painting and Gilding; here is likewiſe a conſiderable Trade in Quince Marmalade, prepared by the religious Recluſes of the Place.

Ancona has likewiſe its Silk Fabricks, and Tanneries for Hides, of which its Exports chiefly conſiſt, except in ſome Years when large Quantities of Corn are ſhipped from hence; it was made a free Port by *Clement* XII. in a Decree of the 16th of *February*, 1732, very much to the Diſlike of the *Venetians*, as it attracts a large Share of that Trade carried on before at *Venice*, both from the North and the *Levant*.

Of Florence *and* Leghorn, *with their Trade.*

THE Commerce of *Florence* is carried on by Way of *Leghorn*, and conſiſts in a large Quantity of rich Silks, manufactured in this Capital of the grand Duke of *Tuſcany*; the principal of which are Tiſſues and Brocades of Gold, Silver, and Silk, Sattins of all Colours, but more eſpecially the White, which are greatly eſteemed, Armoiſins and Taffeties; here are alſo made ſome light Woollen Stuffs; and the other Merchandize that this Place affords, are raw and ſpun Silks, Wool waſhed and unwaſhed, Wine, and Gold Wire.

Leghorn, or *Livorno*, is one of the moſt important, and the beſt Ports of the Grand Duke's Eſtates, and hardly yields in Point of Trade either to *Venice* or *Genoa*; the great Liberty which all Nations enjoy, let their Religion be what it will, induces ſome of almoſt all Nations to aſſemble here; and the moderate Cuſtoms paid on Importation, for all Exportations are free, attracts alſo a Concurrence, not only of *French*, *Engliſh*, *Dutch*, &c. but alſo of *Jews*, *Turks*, and *Armenians*; the *Turks* however trading only *de paſſo*.

The *Engliſh* and *Dutch*, more eſpecially the former, carry on the greateſt Trade; this Place being properly the Staple or Magazine for the major Part of the Goods which they receive from the *Weſt*, and ſend to the *Levant*, as it is for thoſe they get from hence in Return, and forward to their *Weſtern* Markets.

The *Jews* and *Armenians* tranſact moſt of the Buſineſs, by intervening as Brokers, for which they are paid, according to Cuſtom, for the different Branches of Trade they tranſact, whether Purchaſes or Sales, Exchanges or Inſurances.

Beſides the rich Fabricks of Silk, Gold and Silver, at *Florence*, *Piſa*, *Lucca*, and the other Towns of *Tuſcany* and its Neighbourhood, here are found raw Silk of all Sorts, as well *Italian* as *Levant*, and even *Spaniſh* Olives and Oils, not only of the Growth of the Country, but from different Parts, as *Gallipoli*, *la Pouille*, the *Levant*, *Barbary*, &c.

But that which is not the leaſt important Part of this Commerce, are the Merchandiſes from the *Levant*, with which, as has been ſaid, the *Engliſh* and *Dutch* have always their Warehouſes well furniſhed, as they have with thoſe Goods they receive from the *Weſt*, which conſiſt of the ſame Commodities, as will hereafter be mentioned as proper for *Italy*; what is ſhipped from *Leghorn*, beſides the Goods afore-mentioned, are Cotton in Wool and ſpun, Coffee, brought there by Way of *Alexandria*, Allum, of *Civita Vecchia*, and the *Archipelago*, Anniſeeds, from *Rome* and *Malta*, fine Laque, from *Venice*, Marble of curious Colours, from *Carrara*, Red Coral, from *Sardinia*, Soap, Sumack, Argol, Brimſtone, Wine, *&c.*

Of the Trade of Milan, Modena, Lucca, Parma, *and* Verona.

MILAN, the Capital of *Lombardy*, is very conſiderable for its Commerce, which it furniſhes with Gold Thread, flowered Velvets, with Gold, Silver, and Silk Grounds, many fine wrought Silks, and large Quantities of unwrought, exported for *France*, &c.

Modena has its Products and Manufactures ſo like thoſe of *Bologna*, as a Deſcription of them here would be a Tautology.

Lucca is a ſmall Republick in *Italy*, upon the River *Serchio*, five Leagues from *Piſa*; it is celebrated for its fine Silk-Manufactories, particularly thoſe of Velvets, Damaſks, Sattins, and Taffeties; here is likewiſe ſold a large Quantity of raw Silks, and in Skains, as alſo of Oils and Olives, which latter are eſteemed the beſt in *Italy*, but double priced from all others.

Parma tranſacts all its Buſineſs by Way of *Venice*, which principally conſiſts in raw Silk, and Cheeſe made at *Lodi*.

I ſhall laſtly mention, as a very conſiderable Branch of the *Italian* Trade, that carried on in the Territories of his *Sardinian* Majeſty; of which *Turin* is the Capital, and has an advantageous Situation, for extending it on every Side, as almoſt all that comes from the other Parts of *Italy*, and that which enters it by the Way of *Lyons* and *Geneva*, paſs by this City; the *Po*, which runs near it, alſo facilitates a Communication with *Lombardy* and the *Venetian* States; and although it is neceſſary to traverſe the *Alps* to get there, nothing is eaſier than the Journey by Mules, which are made Uſe of for the Tranſportation of the Goods, and of Men, who give all deſireable Aſſiſtance for the Paſſage of Mount *Cenis*.

Piedmont produces the beſt Silk in *Europe*, on Account of its Lightneſs and Fineneſs, and the Organcens made of it, are moſt eſteemed, in *England*, *France*, *Holland*, and *Germany*, of any. It is reckoned that, in a common Year, are made in the King of *Sardinia's* Territories, *viz.* in *Piedmont*, *Montſerrat*, *Alexandrin*, *Lomeline* and *Novaros*, about 560,000 Pounds, of twelve Ounces, of raw Silk,

which are all reduced into Organcens or Frames; only thoſe of *Navarois* being permitted Extraction unthrown.

The Fabricks of all Sorts of Silk Stuffs, long ſince eſtabliſhed in *Turin*, conſume about 130,000 Pounds of thrown Silk yearly; though it is to be obſerved that the Fabricators of theſe Silks, import from their Neighbours, the greateſt Part of the Frames they uſe, of raw Silk to make them.

There are beſides in *Turin*, about ſix hundred or ſeven hundred Looms for Silk Stockings; for whoſe Employ a great Quantity of Silk is required; however, it is computed, that beſides the Silk uſed in all theſe Manufactures, there is yearly ſent to *Lyons*, about two thouſand ſmall Bales, of an hundred and thirty-ſix Pounds each, laden at *Genoa* and *Leghorn*; *extra* of what is ſent to *Holland* and *Germany*, by Way of *Savoy* and *Geneva*.

This Prince's Dominions have likewiſe ſeveral Fabricks of Drapery, particularly of Scarlet, Blue, and Black Cloth; beſides divers Sorts of light Stuffs; they alſo make Ratines, and coarſe Cloth for the Soldiers' Clothing.

Piedmont is very fertile in Corn, with which it ſupplies its Neighbours, particularly with Rice; of which large Quantities are ſent to *France* and *Genoa*, as alſo to *Venice*, by the River *Po*.

Hemp likewiſe grows here in Plenty, which is almoſt all ſent through *Nice* to *Marſeilles* and *Toulon*, except a ſmall Share to the *Genoeſe*.

A great Number of Cattle are fatted in *Piedmont*, and Abundance of Wine made, both which find a ready Sale among the *Genoeſe* and *Milaneſe*, and a large Share of this latter is diſtilled into Brandy, to make the Compoſition of *Roſi-ſolis* at *Turin*, which has greatly the Preference of others.

Some few Years ago, a Manufacture of Earthen Ware was eſtabliſhed at *Turin*, and a little while ſince, another of Porcelains, which is brought to great Perfection; ſeveral Quarries of excellent Marble are found diſperſed about the Country, which ſerves to ornament both their Churches and Palaces.

The Countries of *Nice*, *Oneille*, and other Places on the Sea Coaſt, ſubject alſo to his *Sardinian* Majeſty, produce moſt excellent Olive Oil, and in ſuch Plenty, that beſides a Sufficiency for all his Dominions, large Quantities are ſold to the *French* and *Genoeſe*. And the Iſland of *Sardinia*, producing many of the Commodities above-mentioned, and ſimilar to thoſe of *Sicily*, I ſhall not enlarge on its Deſcription, to avoid Repetitions, but now give a Detail of the Commodities proper for *Italy*.

Merchandize proper for Italy.

SPICE in general, which, except Pepper, the *Dutch* ſupply.
Cocoa, Ginger, Tea, Porcelaine, and other *Indian* Curioſities.
Painted Linens, Chints, and painted Furies.
Sattins, Damaſks, and other thin light *Indian* Silks.
Linens of divers Sorts, as Muſlins, Cambricks, Hollands, Sileſias and Oſnabrucks.
Cloths, Camlets, Serges, and other Stuffs, from *England*, *France*, and *Holland*.
Silk Stuffs from *Lyons*, Mercery, hard Ware, and *Ruſſia* Hides.
Divers *French* Modes for Women's Wear; white Threads and Tapes from *Harleim* and *Flanders*.
Vermilion, and all Sorts of Dying Woods; Madder, and Elephants' Teeth.
Whalebone and Oil, Copper, Braſs, Iron, Lead, and Tin.
Tar, Pitch, and Reſin, Capers, Muſk, Amber, and Civet.
Herrings, ſmoaked and pickled, Salmon, Stock-fiſh, Poor-jack, and Pilchards.
Pewter, Steel, Caviar, *Languedoc* and *Provence* Wines, Wheat, and other Grain.
All Sorts of *French* Merceries, Laces, and Guimps, of Silk and Silver.
Silk Stuffs, with Gold and Silver, from *Lyons* and *Tours*, and Ribbons, particularly from *Paris*.
Wigs, Hair, Worſted Stockings, Hats, *&c.*

Of the Levant *Trade, on the Coaſt of* Barbary.

I Shall include, under this Title, all the Commerce carried on with the *Engliſh*, *French*, *Dutch*, and *Italians*, at *Smyrna*, *Alexandretta*, *Aleppo*, *Seyda*, *Cyprus*, *Conſtantinople*, *Alexandria*, *Roſetta*, and even *Grand Cairo*, *Angora*, and *Beibezar*, upon the Coaſts of *Barbary*.

The great Quantities of *European* Ships that trade to *Smyrna*, and the numerous Caravans which arrive there from *Perſia*, have always made, and ſtill make this to be a Place of the greateſt Commerce in all the *Levant*, for which it is happily ſituated in the Gulf of the *Archipelago*, in that Part of the *Leſſer Aſia* that the *Greeks* called *Ionia*, and at preſent named *Natolia*.

The Port of this City, ſo famous for its Commerce, is capable of containing many Fleets, and here are generally ſeen ſeveral hundred Merchant Veſſels of divers Nations.

The greateſt Part of the principal foreign Merchants have fine commodious Houſes of their own; and hardly any Thing can be ſeen more ſuperb and magnificent than the Habitations of the Conſuls, who are almoſt all lodged near the Sea; but Perſons whoſe Stay here is but ſhort, or who would be ſaving in their Expences, may have the Convenience of being accommodated in a *Kan*, which is a Sort of an Inn, where a thouſand People may lodge, on paying a Dollar *per* Month for each Chamber.

At *Smyrna* are two Cuſtom-houſes; the biggeſt called the Cuſtom-houſe of Commerce, where the Duties are paid on Silk, and other Goods that the *Armenians* import from *Perſia*, and thoſe which the Chriſtian Nations unlade there, and embark for their Returns: The other named the Cuſtom-houſe of *Stamboul*, or *Conſtantinople*, only takes Notice of the Trade of this Capital of the *Ottoman* Empire from *Salonica*, and other Parts of *Turkey*.

The Caravans have their Times and Seaſons fixed for their Arrival and Departure, on which the *European* Nations regulate the Remiſs of their Ships, to the End that the *Aſiaticks* may carry with them the Weſtern Merchandizes, and the *Europeans* relade with thoſe of *Aſia*.

Of the *Aſiatick* Nations, the *Armenians* are thoſe that carry on the greateſt Trade with *Smyrna*; the Caravans from *Perſia* being almoſt all compoſed of them, and in this City are eſtabliſhed above twelve thouſand.

In reſpect to the Natives of *Europe*, the *Engliſh* are beſt regarded, and moſt favourably treated, and they likewiſe ſend the greateſt Number of Ships here; next to them the *Dutch*; and laſtly, the *French*, but they are too numerous here, and thereby hurt one another.

The Merchants from *Leghorn* carry on a great Trade here: thoſe of *Venice* ſtill more; and the *Genoeſe*, notwithſtanding the Expence the Liberty to trade under their own Colours has coſt them, hardly any.

The *French* Trade is carried on from *Marſeilles* in ten Sail of Ships, and three or four Barks yearly; whoſe Ladings conſiſt of Dollars, Cloths of *Dauphine*, *Carcaſſone*, and *Sapte*; in Perpetuans, or Imperial Serges; in Caps, Paper, Cochineal, Tartar, Verdegris, Indigo, from *St. Domingo*, and *Guatimala*, Pewter, Dying Woods, Spice, and Sugar. The Returns being almoſt the ſame for all the Nations of *Europe* who trade there, I ſhall here mention them once for all, *viz.* Angora Goats, and Camels Hair, Rhubarb, Scammony, Opium, Senna, Gum Adragant and Arabick, Coffee, yellow Wax, Allum, Cotton in Wool and ſpun, Currants, fine Camlets, fine Wools from *Metalin* and *Caramania*, Skins like *Moroccoes*, Buffaloes Hides, Shagreen, Sponges, Maſtick, Saffron, Galbanum, Galls, Aſhes, Box, Anniſeeds, Fuſtians, Buckram, Carpets, Silks called Cerbaſſi, Legis, Ardaſſe, and Ardaſſetes, Cotton Stockings, *Turkey* Handkerchiefs, Valonea, Xantoline, Apoponax, Agaric, Tutti, Amber, Muſk, the Ultramarine Stone, Storax, Soap, Pearls, Diamonds, Rubies, and other precious Stones; but theſe Jewels are ſold privately by the *Armenians*, who bring them with their Caravans, and who frequently come themſelves to Chriſtendom to diſpoſe of them.

The

The *Dutch* ſend yearly about fourteen Ships, with *Leyden* fine Cloths, Cloves, Mace, Cinnamon, Nutmegs, Ginger, Cochineal, Indigo, Copperas, Quickſilver, Braſs and Iron Wire, *Dantzick* Steel, *Engliſh* Pewter, rough yellow Amber, Tartar, Sea-Horſe Teeth, Lapis Lazuli, Loaf and Powder Sugar, Cinabar, red Oaker, Dying Woods, Tin, *Ruſſia* Hides, *&c.* and re-lade with the greateſt Part of the Goods juſt mentioned.

The *Venetians* generally ſend fourteen or ſixteen large Ships annually, under Convoy of two Men of War, beſides others at different Times without Convoy; and the *Livernois* alſo ſend Veſſels as they find Occaſion.

Angouri, or *Angora*, and *Beibazar*, Capital of *Galatia*, has always preſerved its Reputation for the Beauty and Fineneſs of its Goats Hair, and the Fabrick of Stuffs made there at preſent called Camlets; and it is from this Place, and *Beibazar*, that *Smyrna* is ſupplied with theſe Commodities, the Quantity of the former being almoſt incredible, of which it is ſaid the *Engliſh* tranſport about five hundred Bales, the *French* as many, and the *Dutch* more than double that Number, and the Conſumption of it is full as great there, as what is ſhipped by theſe Nations: The *Engliſh* and *Dutch* have Factors ſettled here to purchaſe this Commodity at firſt Hand, by which Means they have it much cheaper than when brought to *Smyrna*.

Aleppo and *Alexandretta*; theſe two Cities of *Syria* have a great Similitude in their Trade, or rather it is the ſame that they both carry on, *Alexandretta* being properly only the Port to *Aleppo* which is twenty-two, or as ſome ſay twenty-five, Leagues within Land.

Aleppo is one of the principal Cities in the *Turkiſh* Empire, and yields only to *Conſtantinople* and *Cairo* in Grandeur, and to *Smyrna* in Point of Trade.

Two Things, among others, are very remarkable in Regard of Trade. The one is the Cuſtom of making Pigeons ſerve for Meſſengers, to give Advice of Ships' Arrival, and other preſſing Affairs, which is done by taking them from their young ones at *Aleppo*, and ſending them to *Alexandretta* a little before it is ſuppoſed they may be wanted, which being let fly at this Place, with a Billet about their Neck, return in three Hours' Time. The other is, the Prohibition to go from *Alexandretta* to *Aleppo*, any other Way than on Horſeback; and the Reaſon of it was, to prevent Sailors running afoot to *Aleppo*, and there ſpoiling the Price of Goods by their Over-urgency in laying out their little Stock, which without this Ordinance would be greatly diminiſhed.

There is hardly any Place in the three ancient Parts of the World, from whence ſome Merchants are not ſeen at *Aleppo*: Beſides the *Engliſh*, *French*, *Dutch*, and *Italians* which reſide there, the Caravanſeras are always full of *Armenians*, *Turks*, *Arabians*, *Perſians*, and *Indians*, which come in ſuch Numbers by the Caravans, that although there are about forty of thoſe publick Buildings, they hardly ſuffice to contain thoſe, who only appear to tranſact ſome tranſient Buſineſs, and who after ſelling their Goods, return by the Way they came, with their new Purchaſes.

The Merchandize proper for this Place, are the ſame as thoſe for *Smyrna*; and thoſe which the Ships relade are Silks of the Country, and *Perſia* Cotton Cloths of various Sorts, and among others blue Amans, Auquilles, Lizardes, thoſe from *Beby*, others called Linen Antiquies, Ajamis, and Abundance of Chints; different Cottons, and Cotton Threads, Galls, Cardovans, Soap; many Species of Silk Stuffs, and thoſe admirable Camlets before-mentioned.

Seyde is the ancient *Sidon* of *Phœnicia*, ſo renowned formerly for its great Traffick, very little inferior to that of *Tyre* itſelf, whoſe Reputation for Commerce has been equally publiſhed, both by ſacred and profane Authors. The modern *Sidonians* retain nothing of the ancient but their Inclination for Trade, every Thing elſe is altered; their Power by Sea no longer ſubſiſts: The vaſt Extent of their City is reduced to leſs than one Quarter of what it was formerly; and the great Number of its Inhabitants to leſs than ſix Thouſand, of which the Foreigners make near half.

But few Weſtern Commodities find a Sale at *Seyde*, though with the Products of the Country a pretty good Trade is ſupported; thoſe few are ſome Cloths of lively Colours, Sattins and Damaſks of *Lucca* and *Genoa*, with ſome Paper, a few

Cheſts of Indigo and Cochineal, Spice, Sugar, and *Brazil* Wood, all in ſmall Quantities. The Goods laden here are principally Silks and Cottons, with ſome Aſhes, Galls, Oil, Soap, and Birdlime; and as the Occidental Sales do not balance their Purchaſes, a conſiderable Sum of Money is yearly obliged to do it.

The *French* Trade to this Place, *Acre*, and *Rama*, which are in its Diſtrict, imports about 350,000 Dollars yearly, and there are no Merchants but of this Nation ſettled in theſe Places.

Chio is now ſubject to the *Turks*, and better peopled than any Iſle in the *Egean* Sea; its Commerce is very conſiderable, though much leſs than the Number of its Inhabitants, and the various Sorts of Merchandize that grow and are made here, ſeem to promiſe. The Wine, Silk, Cotton, and Turpentine, and Maſtick, are the principal Products that draw the *Europeans* hither, more eſpecially the *Engliſh* and *French*, who have their Conſuls here.

It is ſuppoſed that above 100,000 *French* Crowns' worth of thrown Silk is annually exported from hence, beſides a large Quantity of Silk Stuffs made in the Iſle, ſuch as Damaſks, Sattins, and Taffeties, which are tranſported to *Cairo*, and to all Places on the Coaſts of *Barbary* and *Natolia*, particularly to *Conſtantinople*.

The Cottons are in Wool, or ſpun, and a great deal of them employed in Fuſtians and Dimities, which are as much eſteemed, and diſpoſed of in the ſame Way, as the Silks.

Maſtick, the chief Article of their Trade, is hardly found any where elſe but here, and the beſt, and indeed almoſt the whole is for the *Grand Signor*; who has from all the Villages in the Iſland where it is gathered, two hundred and eighty-ſix Cheſts, weighing 100,025 *Oques*, and ſome few others are taken by the Cuſtom-houſe Officers, *&c.* Of Turpentine the Iſle produces about three hundred *Oques*, of $3\frac{1}{2}$ Pound one Ounce. Of Oil about two hundred Hogſheads, each Hogſhead weighing 400 *Oques*, and the *Oque* about *3lb. 2oz.* Of Silk 6,000 Maſſes, or 30,000*lb.* almoſt all which is wrought up by the Iſlanders in the Manufactures before-mentioned. Here is alſo ſome very good Wine, known to the Ancients under the Diſtinction of *Nectar*; and it affords fine Honey and Wax in tolerable Quantities.

Cyprus maintains hardly any Trade with the *Europeans*, except with the Products and Manufactures of the Iſle. Its Extent, and the Fertility of its Soil, enables it to furniſh Commerce largely; particularly with Cottons, and Silk, which are cultivated almoſt every where. The Cottons in Wool or Thread are eſteemed the beſt and Fineſt in all the *Levant*; the Country between *Nicoſia* and *Famagouſta*, and about *Paphos*, and *Limiſſo*, are the Parts in the Iſland that produce moſt.

The Silks are alſo gathered, and the Silk Worms bred in ſome Villages, ſubject to the Magiſtracy of the two laſt mentioned Cities; but the beſt and greateſt Quantity is made in the Village *Cyteree*, though none are held in an equal Degree of Goodneſs with the Cottons.

The Wools, Wine, Galls, ſome Medicinal Drugs; red, yellow, green, and greyiſh Earths or Boles; Stuffs and Dimities are the other Merchandizes of the Iſle, to which I think I ought to add as one, the Ortolans, which come here in ſuch Abundance, that the Natives pickle them; and, beſides what they conſume on the Iſland, the *Venetians* export upwards of a thouſand Barrels annually.

Some few Bales of Cloth, Paper, Caps, and ſome Verdigris, are the only Goods imported there, which occaſion the major Part of the Returns to be paid for in Money, and the moſt advantageous Specie for this Purpoſe are the *Mexican* and *Seville* Dollars.

Conſtantinople. This City, formerly the ſecond *Rome*, or rather the true Capital of the *Roman* Empire, when *Conſtantine* the Great had choſen it for his Reſidence; after having been for a long Time the Seat of the *Greek* Emperors, and a little more than half an Age that of the *Latins*, became at laſt the Metropolis of the *Turkiſh*.

The happy Situation of this great City, joined to the Beauty and Security of its Port, might render it a Place of the greateſt Trade in the World, if the Inhabitants, who are ſubject to a Servitude that almoſt deprives them of the Property of their Effects, dared to think of enriching themſelves by Commerce; or, if the

Foreigners

Foreigners that Trade draws here, and who are treated with leſs Haughtineſs and Severity, were not expoſed to ſo great and frequent Inſults and Impoſitions.

Notwithſtanding theſe Reaſons, ſo naturally tending to raiſe a Diſreliſh in the *Chriſtian* Nations to a Commerce with *Conſtantinople*, there is however a great Number of their Ships ſeen to arrive here; and there is hardly one of theſe Nations who have not a Miniſter ſettled here, more to protect their Merchants than for any political Intereſt; the *Emperor* and the *Venetians* being thoſe only who can have any Conteſt with the *Port*, by Reaſon of the Proximity of their Territories.

Of the *Europeans*, the *Engliſh*, *French*, and *Dutch*, are thoſe who carry on the greateſt Trade here, more particularly with their Cloths, ſent here directly, or brought from their Warehouſes at *Smyrna*, which are always well filled. The Cloths from *Venice* have for a long Time had the Preference in this City, though every where elſe in the *Levant*, they are the leaſt eſteemed.

Thoſe deſtined for *Conſtantinople* ſhould be thin and fine, well milled, cloſe ſhorn, without any Nap; above all they muſt be of the beſt Dye, and have their juſt Lengths and Breadths.

The propereſt Colours for *Conſtantinople* are Violet, Purples, Green, Red, Crimſon, Scarlet, Sky-blue, Fleſh and Cinnamon Colours; no Black, except of the greateſt Beauty, and then only one Piece in forty or fifty. About eight or nine thouſand Pieces are ſold here yearly, one fourth *Dutch*, little more than one third *Engliſh*, and the Reſt *French* and *Venetian*; a few Perpetuanas, and ſome other Woollens are ſold here, but of Silks, great Quantities from *France* and *Italy*, and a ſmall Matter from *England* and *Holland*; the chief are the Sattins from *Florence*, Tabbies, Damaſks with and without golden Flowers; flowered Brocades, with gold and ſilver Grounds from *Venice*; and flowered Velvets from *Genoa*; but although theſe Stuffs preſerve the Name of their original Fabricks, ſome of them are now made at *London* and *Amſterdam*, and many of them at *Lyons* and *Tours*, which are however ſold to the *Turkiſh* Tailors, and *Armenian* Merchants, for true *Venetian* and *Genoeſe* Goods.

The Sale of Sattins amounts yearly to between five and ſix hundred Pieces; of Tabbies to three or four hundred; of Damaſks without Gold, only ſixty Pieces, and with, an hundred Pieces, and hardly more Velvets; but Brocades with gold and ſilver Flowers find the greateſt Vent, though theſe muſt be made on Purpoſe, with Patterns proper for the Place; for it is not the Richneſs of the Stuff that pleaſes the *Turks*, but chiefly the Gaiety, and above all the Cheapneſs.

Paper is one of the beſt Commodities carried to *Conſtantinople*, and what frequently produces the moſt Profit; it goes there from *France* and *Venice*, and *Genoa*, though principally from the firſt, in all about thirty thouſand Reams; the other Merchandizes are, Hard-ware, Tin, Braſs, and Iron Wire, which the *Engliſh* and *Dutch* carry from *Hamburgh*, and the *Baltick*; gold Thread, and ditto Gold and Silver falſe, from *Poland*, carried by the *Venetians*, *Marſeilles* and *Tuniſeen* Caps; Verdigris from *Montpelier*, Oil of Spike from *Marſeilles*; Tartar, Sugars ſupplied by the *Engliſh* and *Dutch* when the Crop has failed in *Egypt*, which commonly furniſhes *Conſtantinople*, by the Way of *Alexandria*; and in fine, Spices, Camphire, Quickſilver, Lead, Cochineal, *Brazil* Wood, White-Lead, *&c.* in which theſe two Nations are almoſt ſolely concerned.

The Exports from *Conſtantinople* are very few in Compariſon with the Imports; therefore, to balance Accounts, the *European* Merchants direct their Correſpondents at *Smyrna* or *Aleppo*, to draw it on the Capital, or other Remittances to be made them in Specie from the ſaid Metropolis, to purchaſe what they commiſſion to be bought for their Ships relading at either or both of the ſaid Places.

The few Merchandizes mentioned to be exported from *Conſtantinople* conſiſt in Wools, called Pelades, and Treſquilles, of which the Extract in a common Year is two thouſand Bales of the former, and three thouſand of the latter. Of Buffaloes' Hides, about ten thouſand carried to *France* and *Italy*; of Ox and Cow Skins, of the different Sorts and Qualities, fifty thouſand, of which the Conſumption is for *Italy*; of Pot-Aſhes, from the Black Sea, which the *Engliſh* and *Dutch* buy to ſcour their Cloths; yellow Wax, ſome Goat's Hair Thread, a Quantity

of Caviar, or ſalted Sturgeons' Roes, commonly bought up by the *Venetians* and *Leghorners*.

The Fur Trade from *Muſcovy*, *Natolia*, the *Black Sea*, *Crim*, and other Places of *Tartary*, is very conſiderable, though in this the *European* Merchants have no Share, being entirely tranſacted by the *Greeks*; of theſe Skins about two hundred Cheſts, with two hundred pair in each, of Sables are yearly ſold, from fifteen hundred to twenty-five hundred Dollars *per* Cheſt; Ermines, only eſteemed when extremely white, ſell from ten to eleven Dollars, for forty Skins and Minevers at ſeventy Dollars *per* Thouſand; Martins, Polecats, Lynxes, and Fox Skins are brought here from *Natolia*, and annually ſell for the Value of about ſixty thouſand Dollars; the black Fox Skins brought from *Caffa* and *Tartary* are in very great Eſteem, and their Sales may yearly import an hundred thouſand Dollars.

Of *Caffa*, or *Capha*, and the *Black Sea:* The *Venetians* have often endeavoured to commence a Trade to this laſt, more eſpecially to *Caffa*, and in 1672 obtained Leave, by the lively Repreſentations, and the more perſuaſive Arguments of large Preſents, which their Baily the Chevalier *Quirini* made; but upon the Remonſtrances of the Superintendant of the Cuſtom-houſe at *Conſtantinople*, who ſuffered in his Intereſt by this Conceſſion, and alſo under the political Apprehenſion, that the *European* Chriſtians would, by this Means, more eaſily have a Correſpondence with thoſe of their Religion ſettled on that Coaſt, the Privilege was revoked, and no *European* Nation has been able to obtain one ſince.

Caffa has an excellent Road, and its Port is where the greateſt Buſineſs is carried on in all the *Black Sea*, it being common to ſee arrive, or ſail, four or five hundred Veſſels together. Here is a great Trade carried on in Corn, Salt, Furs, and Butter; this laſt being eſteemed the beſt in all *Turkey*; but that which attracts the greateſt Number of Shipping, and what induced the *Venetian* Ambaſſador to purchaſe the afore-mentioned Liberty at ſo great a Price, is the large Quantity of Sturgeons taken in the *Palus Mæotis*, of which ſalt Roes the *Italians* are ſo fond, and not only they, but ſeveral other Nations of *Europe* and *Aſia*. Some Accounts ſay, that many of theſe Fiſh here weigh eight or nine hundred Pounds, and their Roes three or four Quintals; and though theſe Relations may be ſomething exaggerated, it is certain that there are none elſewhere, either ſo large, or abundant; but as the Trade of this Part is in general ſo very great, I ſhall give my Readers an Abſtract of a very curious Memoir drawn up by a Perſon well acquainted with it.

The Commerce, ſays he, of the *Black Sea* is ſo conſiderable by the Advantages it affords, and the great Quantity of Goods it takes off, that the yearly Import of them is ſuppoſed to be more than three Millions of Dollars; *Caffa* is one of the principal Ports in it, diſtant about ſeven hundred Miles from *Conſtantinople*; the *Turks*, *Greeks*, *Perſians*, and *Muſcovites*, are the People who ſupport this Trade, and vaſt Quantities of Merchandizes ſell here, both for the Conſumption of the Place, and that with many others with which it maintains a Correſpondence. Here are annually ſold to the Value of twelve or fifteen thouſand Dollars in *Venetian* Brocades; here is likewiſe ſold another Sort in which the Gold and Silver is falſe, and the Flowers like thoſe of Damaſks, to the Amount of ſeven or eight thouſand Dollars. Ten or twelve Bales of Cloth are alſo annually diſpoſed of; about twenty thouſand Dollars worth of *Scio* Damaſk; and to the Amount of an hundred and fifty thouſand Dollars in Taffeties, ſtriped and plain; here is likewiſe brought from *Scio*, fifteen thouſand Dollars' worth of Fuſtians, and ſome of theſe from *Conſtantinople*. Of Coffee here is ſold yearly from fifteen to twenty thouſand Dollars; and five to ſix thouſand Dollars in Flax from *Cairo*. Of all theſe Merchandizes a great Part is conſumed in the *Crim*, diſtant about an hundred and fifty Miles from *Caffa*; another Part is ſent to the Ports ſituated near the *Palus Mæotis*, as at *Guſleree*, *Bolovelava*, *Kirerei*, and ſome other dependent on *Caffa*, which ſerves them for an Almagazen.

The Proceeds of all theſe Goods are commonly employed in Hides, Wax, Wheat, Barley, Butter, Honey, and Caviar, which are the chief Products of the Place. Of the Hides here are two Sorts, the beſt made at *Caffa* being from about thirty-five to forty thouſand yearly; theſe are carried to *Smyrna* by the Way of *Natolia*, and

and coſt about a Dollar each; the ſecond Sort are of an inferior Quality, tanned in the Neighbourhood of that City, whoſe Value is three-fourths of a Dollar each, and their Number about an hundred Thouſand, which are ſent to *Conſtantinople*.

There is annually collected at *Caffa* near thirty thouſand Ocques of Wax, of which Part goes to *Smyrna*, and the Reſt to *Conſtantinople*; there are alſo ſent yearly to the latter, fifty or ſixty Saicks, or, Saiques, with Wheat, and from fifteen to twenty with Barley; of Butter *Caffa* remits to this Capital between fifty and ſixty thouſand Ocques; and the Profit it makes by its Honey is not leſs than that which the Wax and Butter leaves. In fine, this Place affords ſome Silk, though the Quantity is not large, nor its Quality good.

Azeck or *Aſoph* is ſituated on the *Don* or *Tanais*, not far from the Place where this great River falls into the *Palus Mæotis*. This Part of *Aſia* was hardly known in *Europe*, only to the Geographers, before the Year 1695, when the famous *Czar Peter Alexowitz* took this Fortreſs from the *Turks* to whom it belonged, with the Deſign to eſtabliſh a Fleet there, not only to attract the Trade of the *Black Sea*, but alſo capable to make the Grand Signor tremble, even in the Capital of his Empire; *Aſoph* ſoon attracted the Attention of all Nations, and it coſt more than one Siege and a bloody Battle, in which the *Czar* with his whole Army had like to have periſhed, to reſtore this Place to its firſt Maſter, who having experienced the Importance of it, augmented its Fortifications, and guarded it with an extreme great Jealouſy; but it is known that in the War of 1739 this City became again an Apple of Diſcord, and that the *Czarina* remained in Poſſeſſion of it, though I believe without reaping thoſe great Advantages that the *Czar* had at firſt expected from its Conqueſt.

It is from *Aſoph* that a Part of the Caviar ſold at *Conſtantinople* comes, where in a common Year are imported at leaſt ten thouſand Barrels with $7\frac{1}{2}$ Quintals each; though all the Caviar is not made of Sturgeons' Roes, but ſome of thoſe of other large Fiſhes.

Kily, or *Kilia*, is ſituated on the South Side of the *Danube*, about ſeven or eight Leagues from the Mouth that diſcharges into the *Baltick Sea*. Four or five thouſand Pieces of Fuſtian from *Scio* are brought here yearly, and Damaſks from thence alſo to the Value of about ſix thouſand Dollars; Buckrams for more than thirty thouſand; beſides two thouſand Pieces of Fuſtian made and ſold in the Place; Coffee alſo ſold here for fourteen or fifteen thouſand Dollars; Flax for three or four thouſand; ſtriped Taffeties, called Santals, for above ſixty thouſand; other Sorts of Taffeties for ſeventy thouſand; of Cloths, fifty or ſixty Pieces are annually imported, though of all theſe Merchandizes few are conſumed at *Kily*, as this is the only Staple, or Storehouſe, from whence they are ſent to divers Ports on the *Danube*, or within Land, as *Iſmael*, *Memeſwaer*, *Hias*, *Galas*, and ſeveral other leſs conſiderable; all which Places contribute ſomething to Trade, *viz.*

Hias, about fifty thouſand Ocques of Wax, of which a Part is ſent to *Smyrna* by *Natolia*, and the Reſt to *Conſtantinople*; the Butter comes from other Ports, where in a common Year may be collected above an hundred thouſand Ocques.

At the Mouth of the *Danube*, and before *Kily*, is a very large Fiſhery, of the *Mouronne*, though what this Fiſh is, I confeſs my Ignorance, which produces above ſixty thouſand Dollars yearly; each Fiſh weighs about a Quintal and a Half, one with another, after the Roes are taken out, to make Caviar, though this Commodity made here is not good, as the curing it well would render it too coſtly to get any Thing by it. From the Ports along the *Danube* are expedited more than ſix hundred Saicks yearly with Wheat and Barley, which commonly yield the great Profit of 15 to 30 *per Cent.* to the Concerned.

Prevat takes off no *European* Goods, ſo that all the Commerce is carried on in *Dutch* Dollars, the *Poliſh* Abra, the Izelotes of the Empire, *Venetian* Sequins, Hongres of *Hungary*, the *Egyptian* Cherif, Aſpers, and Parats, all which Species are commonly taken here at 15 or 20 *per Cent.* higher than in *Conſtantinople*. Here is made in a common year from twenty to twenty-five thouſand Buff-Skins, and ſome Wax is alſo ſhipped off.

Kirmant, like the laſt-mentioned Place, takes off nothing from *Europe*, and only furniſhes Trade with about twenty-five or thirty thouſand Hides yearly, and ſome Butter.

Sinope is a Port ſituated on the *Euxine* Sea, on the *Natolian* Side; ſome Goods are here imported, but the greateſt Part of the Trade is carried on in the different Coins afore-mentioned. The *Perſians*, however, drive a very conſiderable one here in Silk Stuffs, Cambreſines, Indianas, Carpets, Lizats, *&c.* of which the greateſt Part goes to *Conſtantinople*, and the Reſt to *Caffa*; and it is the *Tartars*, *Greeks*, and *Turks*, who purchaſe the greateſt Part of theſe Merchandizes; a few Linens are brought from *Trebiſonde*, but of ſo little Import as not to merit any Regard.

Nicopolis is a Sea Port, with very little or no Trade: Though

Caſtamboli, which is two Days Journey from it, makes coarſe Buckrams of all Colours to above eighty thouſand Dollars Value yearly; of which a Part goes to *Conſtantinople*, and the other to *Caffa* and *Kily*; here is alſo gathered a conſiderable Quantity of Wax ſent to *Smyrna*; and the *Perſians* carry on a great Trade here, as they do at *Rupur*, a Day's Journey from *Synope*.

La Maſtre is a Port in the *Black Sea*, tolerably ſecure, and where a pretty good Commerce is carried on, conſiſting chiefly of Packthread and ſpun Yarn for Cordage and Cables, of which there are annually laden for *Conſtantinople* at leaſt eight Saicks; there alſo goes from hence, and ſeveral other neighbouring Ports, a large Quantity of Wood, the greateſt Part for *Conſtantinople*, where it is employed in the *Grand Signor's* Yards for building the Men of War and Galleys; the Maſts in particular are very good, and ſo long, that they have ſerved for ſixty and ſeventy Gun Ships, all of a Piece.

There are exported from ſeveral Parts of the *Black Sea*, Salt Beef and Pot-aſhes, the laſt for *Conſtantinople* and *Smyrna*, which the *Engliſh* and *Dutch* purchaſe to ſcour their Cloths, and make Soap; the Furs alſo that come from *Muſcovy* are tranſported to *Conſtantinople* by the *Black Sea*.

Of the Trade of Cairo, Alexandria, *and* Roſetta *in* Egypt.

THE interior Commerce of *Egypt* was once very conſiderable; of which its continual Fairs, that during the whole Year were often held ſeveral at a Time in the different Provinces of the Kingdom, will give the higheſt Idea. There all the People of the Country flocked together, to furniſh themſelves with the Goods and Merchandizes that they wanted, or to diſpoſe of thoſe which a Superfluity rendered uſeleſs. There each particular Diſtrict, bringing into Trade the Merchandize which either Art or Nature had rendered peculiar to them, contributed on its Part, to this reciprocal Communication, and to the general Circulation, which was inceſſantly made, in the whole Body of the State. *Egypt* was ſo fertile, and had ſo well perfected the Arts and Sciences, that there was a prodigious Concourſe from all Parts to theſe ſo frequent Aſſemblies, which were productive of immenſe Riches to all the Country.

In Regard to the exterior Commerce of the Kingdom, it did not become flouriſhing all at once; and as it owed its Birth to the Wants of Strangers, rather than to thoſe of the *Egyptians* themſelves, it was only by Degrees that it went on improving, and in the End became ſo extremely great. *Egypt* was for a long Time ſhut up in itſelf, and ſo ſeparated from all other Nations, that Nature itſelf ſeemed to have concurred in keeping it hid from the Reſt of the Earth, as at firſt it had no Communication with any of the other People of the World. Long and toilſome Deſerts encompaſs it on the *Eaſt* and *Weſt*, where its greateſt Extent is; dreadful and unpaſſable Mountains bound it on the *South*, and ſhut up its Paſſages to *Nubia*: In fine, the *Mediterranean* Sea on the *North*, ſeemed to deny it any Commerce on that Side, whilſt Navigation was ſo little known, that it was for a long Time in thoſe Ages retarded. *Egypt*, contented with its own Products, was then both unknown, and unprofitable to the Reſt of the Univerſe; from which it drew no Advantage, until the *Greeks*, by riſking the croſſing to *Africk*, diſcovered in that Country, ſo long unknown, a Nation already poliſhed and a Friend to Trade, that in Time engaged deeply in it, and became famous for its Knowledge both in this, and other liberal Arts and Sciences; which the Magnificence and bon Gout of their Kings, went on perfecting by inſpiring an Emulation in their Subjects to improve in all by the Application of a ſuitable Reward,

as

as an Encouragement to thoſe who exceeded in any of them; and it may be juſtly aſſerted, that they were there ſupported a much longer Time, than among all the other Nations of the Earth: But after *Egypt* fell under the Dominion of the *Mahometans*, all went to Decay; the Fertility of this charming Country diminiſhed, as the Number of Inhabitants did, and theſe People were ſoon reduced to an extreme Miſery under their pitileſs Maſters, and from a Nation once ſo induſtrious, are now become the moſt unpoliſhed, ſince the Arts and Sciences were baniſhed.

The making of Fire-Arms is of all Arts the beſt maintained in *Egypt*; and notwithſtanding all others, and the Sciences are ſo fallen here, that it is hardly poſſible to diſcover any Traces of them, yet it always carries on a very conſiderable Trade with *Africk*, *Aſia*, and even to *India* and *Europe*, and it muſt be allowed, that no Situation was ever more favourable for Trade, than that of this delightful Country.

Cairo, the Capital of *Egypt*, is ſeated on the *Nile*, above the ſeven Mouths, by which this River diſcharges itſelf into the *Mediterranean*; *Alexandria*, and *Roſetta*, diſtant from one another ten or twelve Leagues, and which are at two of the *Nile's* Mouths, ſerve as Ports to this famous City, about ninety Leagues diſtant: and it is before the one or the other, that the *European* Ships anchor to diſcharge their Goods, of which the greateſt Part is deſigned for *Cairo*, and where they attend to take in their Reladings.

If all that has been ſaid of the vaſt Extent of *Cairo*, to make it deſerve the Name of *Grand*, beyond all other Cities, is not an Effect of Exaggeration in the *Arabian* Hiſtorians, or of that of the greateſt Part of the *European* Travellers, who are equally ſuſpected, certainly there is not a City in the World, that ever had or has, a better Title to it; but, not to enter into this Hiſtorical Diſcuſſion, there is no Room to doubt, that it has been, and ſtill is, a Place of great Trade, though Monſieur *Maillet*, *Sicard*, and other *French* Writers, will not allow it to be near ſo big, nor ſo populous as *Paris*.

The famous City of *Alexandria* is now reduced to three or four thouſand Refugees, from the different Provinces of *Turkey*; *Roſetta* is all new built, of which the Foundation was not laid much above a hundred Years ago; and as the Canal, which goes from the *Nile* to *Alexandria*, only now ſerves to carry the Water from that River to this City, and the Lake *Mareotis*, the Neceſſity of houſing the Goods ſent from *Cairo* to *Alexandria*, and thoſe which go from thence to *Cairo*, has probably not a little contributed to the Aggrandiſement, or even to the Conſtruction of *Roſetta*. And it frequently happening that the Goods, which were without the Bar, waited an Opportunity to get over it to *Alexandria* for Months together; and on the other Side, as thoſe that came from this City, after having ſurmounted the Difficulties of the ſaid Paſſage, could not be tranſported to *Cairo* in the ſame Veſſels, it became abſolutely neceſſary to build in this Part proper Places to put them under Cover, and to have Correſpondents and Factors ſettled there. The Trade here is ſo much augmented, more eſpecially ſince the Beginning of this Century, that this City is now one of the moſt powerful in *Egypt*, and carries on a conſiderable Trade in the Commodities that its Neighbourhood produces, with thoſe brought in from *Cairo*, and thoſe imported by the *Greeks* in their Saicks from the *Archipelago*.

The Merchandizes carried to, and exported from theſe Ports, being with a trifling Difference the ſame for *Cairo*, as for the two Cities that ſerve for its Storehouſes, I ſhall not treat of them ſeparately; but only remark, that the greateſt Traffick, either in Purchaſes or Sales, is tranſacted at *Cairo*, with which the Buſineſs of *Roſetta* and *Alexandria* is nothing in Compariſon.

The Goods exported from *Egypt* are, Benzoin, Bdellium, Gum-Arabick, Gum-Adraganth, Turbith, Myrrha, Abiſſinica, Incenſe in Tears, Storax, Aloes Succotrina, and Hepatica, Sugar in Powder and Loaves, and Sugar Candy, Sherbet in Caſks, different Sorts of Cinnamons from *Ceylon*, *Malabar*, &c. Caſſia, Cocoa, Coriander, Coffee, Myrabolans, Chebula, Bellerica, and Citrina, Nutmegs, Nux Vomica, Cardamoms, Ben, Tamarinds, Coloquintida, Pepper, Mace, Flax of all Sorts, Senna, Spikenard, Baſtard Saffron, Cotton in Wool and Thread, Hermodactyls,

modactyls, yellow Wax, Ginger, Rhubarb, Elephants' Teeth, Wool waſhed, and unwaſhed, Oſtrich and Herons' Feathers of different Sorts, Mummy, Sal-Ammoniac, Nitre, Roche Allum, Sea Lizards, Botargue, Mother of Pearl, blue Linens of ſeveral Species from ſeveral Places, painted Linens, Mogrebines, Muſlins, and Cambreſines; *Egypt* alſo produces ſome Stuffs, and other Commodities of various Materials, as of Wool alone, Wool and Silk mixed, *&c.* Ribbons, Handkerchiefs, Carpets, and Muſk; there are likewiſe exported from *Cairo* and *Alexandria*, a Quantity of Buffaloes, Ox, and Cow Hides in the Hair, red and yellow Cordouans, Shagreen Skins, *&c.*

Egypt does not want the neceſſary Materials for making good Glaſs, but ſhe ſends them to *Venice*, from whence they return manufactured, though in ſmall Parcels, as the *Turks* never drink out of Veſſels of this Commodity. There are ſtill made in *Egypt* a large Quantity of Linens differing in Quality, and Stuffs with Silk and Cotton, Silk and Gold, and even Velvets, though but very few of them are perfectly good.

The Merchandize which *Europe* ſends to *Egypt* are, Agarick, white and yellow Arſenick, black Lead, Orpiment, Antimony, Sublimate, Quickſilver, Vitriol, Vermilion, Cinnabar, Lattin and Braſs Wire, Tin, *Venetian* Steel, Lead, Paper, Sattins, from *Florence*; Cloths of all Sorts, Caps, Cochineal, Coral from *Meſſina* wrought and unwrought, red Tartar, Roche Allum, Dying Woods, and Hardware; beſides which a vaſt Quantity of Glaſs Beads from *Venice* of all Colours, are ſold at *Cairo*, and afterwards tranſported to *India* and all *Africa*, where the Women deck themſelves with theſe Toys, as the *European* Ladies do with Diamonds and Pearls. There is alſo carried on at *Roſetta*, a very conſiderable Trade from *Conſtantinople* and *Satalia*, in white Slaves, brought from thoſe two Cities, and in black ones, remitted there in Return from *Egypt*: All the Eunuchs in the *Grand Signor's* Seraglio, and in private ones, as well as almoſt all the other Negroes, that are in *Turkey*, both Men and Women, come from *Egypt*, where an Infinity of white young Perſons of both Sexes are brought in Exchange for them; the white Slaves are very dear, when they are well made, being worth at leaſt from 40 to 45*l.* Sterling, and ſome Girls have been ſold for more than ten Times as much. The greateſt Part of the Trade at *Cairo* is tranſacted by the *Jews* and *Arabians*, who are here in great Numbers, and who, with ſome *Turk* Merchants, carry on that of the *Red Sea*, from whence they draw the Majority of the afore-mentioned Merchandizes; and it is alſo the *Arabian* Brokers who interfere in almoſt all the Negociations here.

This Commerce is carried on by *Suez*, a Town ſituated at the Bottom of the *Red Sea* on the *Egyptian* Coaſt, about forty-five Leagues from *Cairo*, and ſeparated by a Plain of firm Sand, very commodious for Carriages. It is from this ſmall Town, whoſe Port nevertheleſs is far from a good one, that the *European* Goods, carried there by Caravans, are at firſt tranſported to *Gedda*, a League Diſtance from *Mecca*, and afterwards to *Mocha*, a City in *Arabia*, at the Entrance of the Straits of *Babel-Mandel*, where the *Red Sea* communicates with the *Indian* Ocean; and it is alſo at *Suez* that all their Merchandize arrives, which the *Turk* Merchants of *Cairo* import from the *Eaſt-Indies*, and of which the general Staple for *Egypt* is at *Mocha*, where theſe Merchants have their Factors.

The Commerce of the *Red Sea* is carried on by Means of the *Grand Signior's* Ships, and of ſome particular Princes, which Ships are without Decks, or Artillery, ſo that nothing would be more eaſy than their Capture; a Bark, furniſhed with only four Guns, might make an immenſe Booty in this Sea. When they are hindered by contrary Winds from arriving at *Suez*, they traverſe the *Red Sea*, and go to winter at *Coſſci*, a ſmall Place, and not much frequented, five Days' Journey diſtant from *Coptain*, a City in the *Thebaida*; whilſt theſe Veſſels are at an Anchor, they ſend from the *Upper Egypt* to take their Lading, and carry them Proviſions and Goods. The Road from *Coſſci* to the *Nile* is two Days' Journey farther than that from *Suez* to *Cairo*; nevertheleſs the Expence is not much more, becauſe the Camels' Hire coſts leſs in the *Upper* than in the *Lower Egypt*, and the remaining Carriage being by Water is performed for very little.

Beſides what *Eaſtern* Merchandize the *Europeans* export from *Cairo* and *Alexandria*, the *Turkiſh* Merchants alſo tranſport a very great Quantity to *Conſtantinople*,

tinople, and to other Cities of the *Grand Signor's* Territories, on their Saicks, and in which they alſo lade Rice, Flax, Sugar, and other Commodities of the *Egyptian* Growth; and the Total of this Commerce does not import leſs than between 7 and 800,000*l.* Sterling *per Annum*, and employs about an hundred, or an hundred and twenty Saicks in it.

The Trade of *Egypt* is alſo very great on the Part of *Aſia*, from whence Caravans laden with Riches are continually arriving at *Cairo*, and which are conveyed by that Branch of the *Nile*, which falls into the *Mediterranean* near *Damietta*. it is from *Arabia* and the Neighbourhood of *Mecca*, that the white Balm comes to *Cairo*, ſo much valued by the *Eaſtern* Ladies, for preſerving their Complexions, though there is but a very little of it unadulterated. Almoſt all the Soap that is uſed in *Egypt* comes from *Paleſtine*, where it is made of a very good Quality, though that of *France* is better; the Conſumption of this Commodity is very great, becauſe the waſhing with Lyes is not practiſed here.

The different Countries of *Africa* do not contribute leſs than the Reſt of the World to enrich the Trade of *Egypt*; there is no Year paſſes in which ſome Caravans do not arrive from *Tunis*, *Algiers*, *Tripoli*, and even the remoteſt Provinces of that Part of the Earth; ſo that there is ſeen a continual coming in of Merchandize from all the Univerſe. Among theſe foreign Merchants who rendezvous at *Cairo* from all the inhabited Places of *Africa*, there is above all two Sorts, who ought not to be forgotten; of which the firſt was called *Croys*, living near the Iſle of *Pheaſants* on the Ocean, who come to *Fez* and *Morocco*, and from thence to *Cairo*, traverſing the immenſe Deſerts that lie in their Way. This Caravan, which is ſeven or eight Months on its Journey, touches alſo at *Tripoli* in *Barbary*, and brings Gold-Duſt to *Cairo*; though they take Care not to ſell it as ſuch, for in ſo doing they imagine they commit a Sin, and thefore ſell it for Silver, with which they buy Copper and Cutlery Ware, which they carry back with a certain Species of Shells, current in their Country for Money.

The ſecond Sort of Merchants I juſt now mentioned are black like the firſt, and are full as ſingular; they have a Method of carrying on Commerce ſo particular that it is probable they are the only People in the World that practiſe it: In vain may any one offer them double the Value of their Goods, if he does not join the Elephant's Pizzle with it; that is to ſay, nothing but a good Drubbing will induce them to drive a Bargain, and therefore the Brokers of the Country, accuſtomed to the Manner and Expectations of this Gentry, do not fail to ſerve them according to their own Faſhion, and always begin liberally to diſpenſe their Blows, that they may terminate the Difference the ſooner; after which Preliminary, theſe Negroes are the moſt contented People in the World, and there is nothing that may not be expected from their Good-Humour.

In fine, the *Nile* conveys to *Egypt* all that *Ethiopia* encloſes moſt ſerviceable and precious; though it is not the *Ethiopians* themſelves who carry on this Commerce, as theſe People very ſeldom trade any Diſtance from their own Country; but they ſell their Merchandize to the Natives of *Nubia*, called *Barbarians*, who traverſing the frightful Mountains which ſeparate them from *Egypt*, bring thoſe precious Effects there. Every Year a Caravan ſets out from *Sannar* for this Journey; and though it is only compoſed of Merchants ragged and almoſt naked, who frequently want all Sorts of Conveniences in the toilſome dangerous Roads they have to go; it is impoſſible to conceive what Riches they are Bearers of. From ſeveral Parts of *Africa* there is brought to *Egypt* Gold-Duſt, Elephants' Teeth, Ebony, Muſk, Civet, Ambergris, Oſtrich Feathers, divers Gums, and an Infinitude of other Merchandize, though this Traffick is not a little increaſed by the Remiſſes of two or three thouſand Blacks ſent here to be ſold, from all which it is eaſy to conceive what prodigious Sums theſe Caravans muſt return with, either in Specie or Goods.

It muſt naturally be concluded, that a Commerce ſo conſiderable cannot but bring immenſe Sums with it, and make *Egypt* one of the richeſt Parts in the World. It is true, this Country produces neither Gold, Silver, nor precious Stones; yet it is probable, that there is not a Spot upon Earth where theſe Productions of Nature are leſs rare, or more common. The Flax, of which a prodigious Quantity

tity of Linens are made, and from thence ſpread into all Parts of the World; the Cotton gathered in Abundance, and a great Share of it worked up; the Wheat, Rice, Pulſe, Sugar, Coffee, Sherbet, Hides, *Morocco* Leather, all Sorts of Drugs and Spices; that Sort of Earth called *Hanna*, ſo much eſteemed, and of which there is ſo great a Demand in all the *Levant*, where it ſerves both Men and Women to paint their feet and Hands; all theſe draw immenſe Sums from *Europe*, *Aſia*, and *Africa*; there is not a Year that 4 or 500,000 Dollars are not carried there from *France* and *Italy* only. From *Africa* there is annually imported from 1000 to 1200 Quintals of Gold Duſt; and from *Conſtantinople* and *Aſia* there comes more than a Million of Dollars, for the Purchaſe of Rice, Coffee, Linens, *&c.* It is true, that what the Baſhaw pays yearly to the *Grand Signor*; what he ſends to the Miniſters of the Port to obtain a Continuance in his Poſt; what he and his Dependents carry off on his quitting the Government; that which the *Agas* levy, whom the *Sultans* ſend from Time to Time into this Country; what goes to *Damaſcus*, and all that which paſſes to *Mecca*, may amount to many Millions: However, it is certain that there remains near as much; and if the Natives, or even the *Turks*, who are under continual Apprehenſions of being ſtripped, had not the Madneſs to bury their Money, by which Means it not only becomes uſeleſs to Trade, but is often abſolutely loſt, it is certain that few Kingdoms in the World would be richer than *Egypt*.

Of the Commerce of the Archipelago.

BY the Word *Archipelago* is to be underſtood a Cluſter of ſmall Iſlands, of which there are many in different Seas; but that I am now going to treat of is moſt neceſſary for the *European* Merchants to know, being as it were at their Doors.

This *Archipelago*, being the only one I believe that was known to the Ancients, lies in the *Egean* Sea; and the principal Iſlands are, *Argentiere*, *Milo*, *Siphanto*, *Serpho*, *Antiparos*, *Paros*, *Naxia*, *Stenoſa*, *Nicouria*, *Amorgos*, *Caloyero*, *Cheiro*, *Skinoſa*, *Raclia*, *Nio*, *Sikino*, *Folicandro*, *Santorin*, *Nanſio*, *Mycone*, *Delos*, *Syra*, *Thermia*, *Zia*, *Macroniſi*, *Joura*, *Andros*, *Tinos*, *Scio*, *Metelen*, *Tenedos*, *Nicaria*, *Samos*, *Patmos*, *Fourni*, and *Skyros*, which produces Oil and Olives, Wine, Corn, a Sort of Lichen for dying Red, ſome ordinary, and ſome good Silk, Cotton, Figs, Maſts and Planks, Salt, at *Milo*, in vaſt Plenty and very cheap, Brimſtone, great Quantities of Mill-Stones, at *Milo*, Flax, Cheeſe, Oxen, Sheep, Mules, Emery, Laudanum, Wool, Goat's Hair, Marble, Cotton, Cloth, a ſmall Quantity of Pitch, Vallonea, Honey, Wax, Scammony, ſeveral Sorts of Earth, Capers, *&c.* which the Natives ſell to the ſeveral *Europeans*, who go here to purchaſe them.

Candia is a large Iſland, ſituated at the Entrance of the afore-mentioned *Archipelago*, formerly known under the Name of *Crete*; it carries on a conſiderable Trade, and all the Chriſtian Nations, who traffick to the *Levant*, have Conſuls ſettled here. The chief Towns of the Iſle are, *Canea*, *Retimo*, *Candia*, and *Girapetra*; the Neighbourhood of the principal Place, as well indeed as all the Reſt of the Iſland, are covered with almoſt an infinite Number of Olive Trees, yielding very good Oil, which is the principal Product of it, and in ſuch Quantities, that in a common Year are gathered at leaſt three hundred thouſand Meaſures, of eight *Ocques* and a Half, and the *Ocques* of three Pounds two Ounces; here are likewiſe purchaſed, Wine, Gum Adraganth, Laudanum, Wool, Silk, Honey, Wax, Cheeſe, Cotton, and Wheat.

Salonica, the ancient *Theſſalonica*, is a Sea Port ſeated at the Bottom of the Gulf, bearing the ſame Name, in the *Archipelago*. All the *European* Nations Trade here, but the greateſt Commerce is from *Italy*. This Place is very fertile in Corn, and I have ſeen ſome very good Wheat from hence, though not quite ſo clean as it ſhould be. The other Merchandizes of *Salonica* are, Tobacco, of which whole Ship Loads are exported at a Time, Hides, Cotton in Wool, better than that of *Smyrna*, yellow Wax, brought here in large Quantities from *Turkiſh Valachia*, unwaſhed Wool, and ſome coarſe Woollen Stuffs, for the clothing of the Poor People and Soldiers.

The Goods carried there are Indigo, Cochineal, Ginger, Pepper, Cinnamon, Mace, Nutmegs, Dying Woods, Sugar, Lead, Pewter, block and ſingle Tin, Cloths from *England*, *France*, and *Holland*, Paper, Almonds, Verdigris, and ſometimes Coffee from the Iſles.

Of the Commerce with the Coaſt of Barbary.

WHAT is called *Barbary*, is that vaſt Maritime Part of *Africa*, which extends for more than ſix hundred Leagues from *Egypt* to the Straits of *Gibraltar*, and a little beyond them into the *Atlantick* Ocean. The principal Kingdoms, or Republicks, which divide the Coaſt of *Barbary*, are *Tripoly*, *Tunis*, *Algiers*, *Morocco*, and *Fez*; the Government of theſe two laſt is entirely monarchial, and ſubject to the ſame Prince; that of *Tripoly* is Republican, and thoſe of *Tunis* and *Algiers*, a Mixture of both. All theſe States have a Number of Ports in the *Mediterranean*; and the Kingdoms of *Morocco* and *Fez* have alſo ſome on the Ocean, which are equally ſerviceable for the Chriſtians' Trade, and for a Retreat to their own Cruizers.

The moſt conſiderable of theſe Ports, and where the greateſt Trade is tranſacted, and Conſuls of different Nations reſide, are *Tripoly* and *Gouletta*, which is that to *Tunis*, *Algiers* and *Sallee*, in which laſt the chiefeſt Trade of *Fez* and *Morocco* is carried on, although a good deal is done at *Tetuan*, and ſome at *Arzilla*, *Alcaſſar*, *Azamor*, *Saphia*, and *Santa Cruz*. The Kingdom of *Algiers* has, beſides its Capital, *Tremecen*, *Conſtantine*, *Bona*, *Bugia*, *Gigery*, *La Calla*, Cape *Roſa*, *Collo*, and that called the *Baſtion* of *France*, near the Gulf of *Storacourcouri*.

And beſides the *Gouletta*, *Tunis* has *Bizerta* and *Port Farina*, though the *Tripolines* have only the Port of their City, with ſome few Places on the Coaſt, where none, or hardly any Trade is carried on.

The *European* Merchants have Warehouſes only in the principal Cities, and rarely land in any others, on Account of the Impoſitions commonly practiſed there; trading among theſe People, as the Saying is, Pike in Hand, being always on their Guard, or otherwiſe they are ſurely abuſed or cheated.

I have already mentioned, in a former part of this Work, the Exports from *Barbary*, as well as the Goods they take off, and have little to add thereto, except ſomething concerning the Trade of *Morocco*, which differs in ſeveral Reſpects from the others.

Sallee, as above obſerved, is the Port in the Kingdoms of *Fez* and *Morocco*, of the greateſt Commerce; the Entrance of the River *Guerou*, on which it is built, has a Bar of Sand that changes according to the Winds that blow, which is of a vaſt Inconvenience to the trading Veſſels, though it ſerves as a Reſource to the *Salletines* when purſued by the *Malteſe*, or other Chriſtians, who are more in Safety here than in any other Port of *Barbary*.

The *European* Merchandizes are unladen immediately on their Arrival, into the Chriſtian Merchants' Warehouſes there, and afterwards ſold Wholeſale to the *Moors* or *Jews*, who ſend them to their Correſpondents at *Morocco*, *Fez*, *Mequinez*, *Tarudant* and *Illoe*. The greateſt Part of the Merchandize imported is conſumed in theſe five Cities, particularly at *Mequinez*, twelve Leagues from *Fez*, and has the largeſt Magazines of Corn, Hides, and Wax, which are the chief Commodities of the Growth of *Morocco*, and the States dependent on it. And what Goods remain undiſpoſed of in the ſaid five Places are ſent to the Provinces of *Sara*, *Dras*, and *Touet*, in the Kingdom of *Tafilet*, where the *Arabians* take them in Truck for Gold Duſt, Indigo, Oſtridge Feathers, Dates, and ſometimes a few Elephants' Teeth; of which laſt, Gold, or the Feathers, none are produced in the Territories ſubject to the King of *Morocco*, although the Chriſtians yearly extract from them a great Quantity of that rich Duſt and Plumes. The Gold and Ivory is brought by the *Arabian* Troops, who go to procure them, as far as the Kingdoms of *Sedan* and *Gago*, which are Part of *Guinea*, and are above four hundred Leagues from *Morocco*. The Oſtridge Feathers come from *Sara*, or *Dara*, a Country to the *South* of *Morocco*, towards the Sea of *Sand*, where the *Moors* and *Arabians* kill them in great Numbers, and ſometimes take them alive,

tity of Linens are made, and from thence ſpread into all Parts of the World; the Cotton gathered in Abundance, and a great Share of it worked up; the Wheat, Rice, Pulſe, Sugar, Coffee, Sherbet, Hides, *Morocco* Leather, all Sorts of Drugs and Spices; that Sort of Earth called *Hanna*, ſo much eſteemed, and of which there is ſo great a Demand in all the *Levant*, where it ſerves both Men and Women to paint their feet and Hands; all theſe draw immenſe Sums from *Europe*, *Aſia*, and *Africa*; there is not a Year that 4 or 500,000 Dollars are not carried there from *France* and *Italy* only. From *Africa* there is annually imported from 1000 to 1200 Quintals of Gold Duſt; and from *Conſtantinople* and *Aſia* there comes more than a Million of Dollars, for the Purchaſe of Rice, Coffee, Linens, *&c.* It is true, that what the Baſhaw pays yearly to the *Grand Signor*; what he ſends to the Miniſters of the Port to obtain a Continuance in his Poſt; what he and his Dependents carry off on his quitting the Government; that which the *Agas* levy, whom the *Sultans* ſend from Time to Time into this Country; what goes to *Damaſcus*, and all that which paſſes to *Mecca*, may amount to many Millions: However, it is certain that there remains near as much; and if the Natives, or even the *Turks*, who are under continual Apprehenſions of being ſtripped, had not the Madneſs to bury their Money, by which Means it not only becomes uſeleſs to Trade, but is often abſolutely loſt, it is certain that few Kingdoms in the World would be richer than *Egypt*.

Of the Commerce of the Archipelago.

BY the Word *Archipelago* is to be underſtood a Cluſter of ſmall Iſlands, of which there are many in different Seas; but that I am now going to treat of is moſt neceſſary for the *European* Merchants to know, being as it were at their Doors.

This *Archipelago*, being the only one I believe that was known to the Ancients, lies in the *Egean* Sea; and the principal Iſlands are, *Argentiere*, *Milo*, *Siphanto*, *Serpho*, *Antiparos*, *Paros*, *Naxia*, *Stenoſa*, *Nicouria*, *Amorgos*, *Caloyero*, *Cheiro*, *Skinoſa*, *Raclia*, *Nio*, *Sikino*, *Folicandro*, *Santorin*, *Nanſio*, *Mycone*, *Delos*, *Syra*, *Thermia*, *Zia*, *Macroniſi*, *Joura*, *Andros*, *Tinos*, *Scio*, *Metelen*, *Tenedos*, *Nicaria*, *Samos*, *Patmos*, *Fourni*, and *Skyros*, which produces Oil and Olives, Wine, Corn, a Sort of Lichen for dying Red, ſome ordinary, and ſome good Silk, Cotton, Figs, Maſts and Planks, Salt, at *Milo*, in vaſt Plenty and very cheap, Brimſtone, great Quantities of Mill-Stones, at *Milo*, Flax, Cheeſe, Oxen, Sheep, Mules, Emery, Laudanum, Wool, Goat's Hair, Marble, Cotton, Cloth, a ſmall Quantity of Pitch, Vallonea, Honey, Wax, Scammony, ſeveral Sorts of Earth, Capers, *&c.* which the Natives ſell to the ſeveral *Europeans*, who go here to purchaſe them.

Candia is a large Iſland, ſituated at the Entrance of the afore-mentioned *Archipelago*, formerly known under the Name of *Crete*; it carries on a conſiderable Trade, and all the Chriſtian Nations, who traffick to the *Levant*, have Conſuls ſettled here. The chief Towns of the Iſle are, *Canea*, *Retimo*, *Candia*, and *Girapetra*; the Neighbourhood of the principal Place, as well indeed as all the Reſt of the Iſland, are covered with almoſt an infinite Number of Olive Trees, yielding very good Oil, which is the principal Product of it, and in ſuch Quantities, that in a common Year are gathered at leaſt three hundred thouſand Meaſures, of eight *Ocques* and a Half, and the *Ocques* of three Pounds two Ounces; here are likewiſe purchaſed, Wine, Gum Adraganth, Laudanum, Wool, Silk, Honey, Wax, Cheeſe, Cotton, and Wheat.

Salonica, the ancient *Theſſalonica*, is a Sea Port ſeated at the Bottom of the Gulf, bearing the ſame Name, in the *Archipelago*. All the *European* Nations Trade here, but the greateſt Commerce is from *Italy*. This Place is very fertile in Corn, and I have ſeen ſome very good Wheat from hence, though not quite ſo clean as it ſhould be. The other Merchandizes of *Salonica* are, Tobacco, of which whole Ship Loads are exported at a Time, Hides, Cotton in Wool, better than that of *Smyrna*, yellow Wax, brought here in large Quantities from *Turkiſh Valachia*, unwaſhed Wool, and ſome coarſe Woollen Stuffs, for the clothing of the Poor People and Soldiers.

and bring them to *Morocco*, which has led many Authors and Geographers into the Error of ſuppoſing them Natives of this Empire.

The *Benizequers*, a People of *Africa* in the Province of *Habat* in the Kingdom of *Fez*, have among them a Number of Weavers and Curriers, who carry on a great Trade in Linen and Hides; and the other Commodities in which they deal are, Honey, Wax, and Cattle.

Santa Cruz, in the Kingdom of *Morrocco*, on the Confines of that of *Sus*, near to Mount *Atlas*, is a ſmall Town, though it at preſent carries on a pretty good Trade, more eſpecially to *Marſeilles*, where Imports and Exports are ſuch as are before mentioned.

Algiers, Mr. *Savary* ſays, contains above three thouſand foreign Families which Trade had drawn there, though he ſuppoſes it principally ariſes from the Sale of the Prize Goods, continually bringing in by their Privateers. The Country produces plenty of Corn, beſides the other Commodities peculiar to *Barbary*, and their Imports conſiſt of Gold and Silver Stuffs, Damaſks, Draperies, Spices, Pewter, Iron, hammered Copper, Lead, Quickſilver, ſmall Cordage, Bullets, Linens, Sail-Cloth, Cochineal, Tartar, Allum, Rice, Sugar, Soap, Galls from *Aleppo* to *Smyrna*, Cotton in Wool, and Thread, Copperas, Aloes, Woods for Dying, Cummin, Vermilion, Arſenic, Gum Lack, Aniſeeds from *Malta*, Brimſtone, Opium, Maſtick, Sarſaparilla, Incenſe, Spike, Honey, Wool, Paper, Glaſs, Beads aſſorted, *&c.* a ſmall Quantity of theſe Merchandizes, however, ſell here, although the Natives are always wanting them, as Duties muſt be ſatisfied, Recoveries difficult, a Retreat of the Property uncertain, and Impoſition very frequent. Thoſe, therefore, who need any of theſe Goods wait till the laſt Extremity, in Hopes of ſome Prize being brought in.

Couca is a ſmall Kingdom, ſubject to that of *Algiers*; its principal Trade conſiſts in Corn, Olives, Oil, Figs, Raiſins, Honey, and Wax; here are alſo ſome Iron, Allum, Sheep, and Goats for Exportation.

The *Baſtion of France* is a ſmall Fortification built at the Extremity of the Kingdom of *Algiers*, on the Side where its Frontiers join with thoſe of *Tunis*. The *French*, to whom it belongs, and from whom it received its Name, have been in Poſſeſſion of it ever ſince 1561, when *Soliman* II. made them the Conceſſion, after a previous Agreement with the Divan of *Algiers*, and the petty Princes of the Country, for which they pay 39,500 *French* Livres yearly.

La Caſſa is the true Port to the *Baſtion*; and beſides theſe, the *French* have Cape *Roſa*, *Bonna*, and *Collo* in their Grant, from all which Places, they annually Export about fifty thouſand Meaſures of Wheat, eleven or twelve thouſand of Barley, five or ſix thouſand of Beans, and ſome other Pulſe, above eighty thouſand Skins, a little Suet, above five hundred Quintals of Wax, and much the ſame Quantity of Wool. It is likewiſe here that the *French* have their Coral Fiſhery, of which they take from five to ſix hundred Quintals yearly; and all theſe Commodities are ſent to *Marſeilles*, except the Pulſe or Grain, which the *Italian* Markets take off, and more eſpecially *Genoa*.

The *Baſtion* has been for ſome Years paſt united to the *French African* Company, or the Cape *Negro* Company, whoſe Exports from the Place of their Denomination, are like thoſe from the *Baſtion*, *viz.* Corn, Hides, Wool, and Wax, of which in a good Year their Extracts are conſiderable.

Between theſe two Places of the *Baſtion* and Cape *Negro*, ſubject to *Tunis*, is the Iſle of *Tabarque*, dependent on *Sardinia*, but has for a long Time appertained to Meſſrs. *Lomnelini* of *Genoa*, in Property, who pay a Sort of Tribute to *Algiers* and *Tunis*, to preſerve the Inhabitants in the free Enjoyment of the Coral Fiſhery, and do the ſame to the King of *Sardinia*, though their Iſland is well fortified, and free from Inſults. It likewiſe carries on a tolerable good Trade on its Coaſt in Corn, Hides, and Wax.

Of the Commerce of AFRICA.

THIS is one of the four Parts of the World, bounded by the Ocean, the *Mediterranean*, and the *Red Sea*, which make a Peninſula of it; and a great Iſthmus, between *Suez*, at the Extremity of the *Red Sea*, and *Damietta*, on the *Mediterranean*, joins it to *Aſia*. This ſituation gives it a vaſt Extent of Coaſt, on which

which only the *Europeans* have any Traffick; the Inland of their Continent being very little known, either from the Nature of the Country, the inſupportable Heats that generally reign here, or on Account of the Inhabitants' Ferocity, of which the major Part are Savages.

And as a Connexion of Matters, which could not conveniently be ſeparated in treating of the *Mediterranean* Trade, led me to deſcribe that of *Cairo*, *Alexandria*, *Roſetta*, and all the Coaſt of *Barbary*, that make a conſiderable Part of *Africa*, I ſhall have no Occaſion to repeat any Thing concerning them here; but under this new Title proceed to give a general Idea of all the Places, where any Commerce is tranſacted on the other Coaſt of *Africa*, and of the Eſtabliſhment that the different Nations of *Europe* have there.

In regard to the Trade of the *Red Sea*, as it in ſome Sort appertains more to *Aſia* than *Africa*, I ſhall omit ſpeaking of it till I come to treat of the *Aſiatic* Commerce, and at preſent confine myſelf to the *African* only.

Very little or no Trade has been carried on, nor any of the *Europeans* had any Settlement on the ſaid Coaſt, from the Kingdoms of *Morocco* and *Sus* to the Neighbourhood of Cape *Verd*; near which Cape, and in the Space between the River of *Senegal*, which is one of the Branches of the *Niger*, and that of *Sierra Leona*, the *French* and *Portugueſe* have ſome Factories; as the *Engliſh* and *Dutch* formerly had, but the one abandoned them, and the others yielded them to *France*.——Since writing the above, the *Engliſh* have driven the *French* from all their Settlements on the Coaſt of *Africa*.

The Coaſt of *Sierra Leona* is viſited by Ships of all the four Nations, though ſolely the *Engliſh* and *Portugueſe* have any Eſtabliſhment here; and it is the firſt only who reſide near Cape *Miſerado* between the Coaſts of *Sierra Leona*, and thoſe of *Malagueta*, where they have about ten or twelve Houſes in all.

The *French* carry on ſome Trade on the Coaſt of *Malagueta*, otherwiſe named *Greves*, thongh without any Reſidence, and on the Ivory Coaſt, which joins to this laſt-mentioned, all the Nations of *Europe*, that are engaged in the *African* Trade, tranſact a great deal here in Elephants' Teeth; though ſome of them, having no Settlements, are obliged to negociate with the greateſt Caution, very rarely putting Foot aſhore for fear of the Natives, who are Cannibals, fierce, and untameable.

The Gold Coaſt, which is the next, is the moſt frequented of any in *Africa* by the *Europeans*; and to preſerve the Trade of the rich Metal, from which it is denominated, there is hardly any of them who have not Habitations here, and ſome of them poſſeſs even Towns and conſiderable Fortifications.

Ardres is a ſmall maritime Kingdom joining to the Gold Coaſt, though it affords very little for Trade but Slaves: And *Benin* follows, making a Part of the Coaſt of the Gulf of *St. Thomas*. The Iſle of the ſame Name under the Line has belonged to the *Portugueſe* ever ſince they drove the *Dutch* out, who had before taken it from them, whilſt united with the Crown of *Spain*. The former alſo have ſome Settlements at ſeveral Places in the Gulf, and particularly at thoſe which are in the Neighbourhood of the Kingdom of *Congo*.

It is from this Kingdom, and that of *Angola*, that the beſt Part of the Negroes tranſported to *America* are extracted, and where each Nation goes to ſeek the Number they want. The *Portugueſe* are in a Manner Maſters of theſe two Kingdoms, where they are both feared and loved by the Natives; however, their Authority does not extend to hinder the *Engliſh*, *French*, *Dutch*, &c. from carrying on the Slave Trade with Eaſe and Advantage.

The *Cafraria*, or Country of the *Cafres*, begins almoſt where the Coaſt of *Angola* ends, and continues to the *Rio de Spirito Santo*, where that of *Sofala* commences. The *Europeans* have no Traffick in all this vaſt Extent of Coaſt, though it is the moſt celebrated of all the *African* ones, on Account of the Cape of *Good Hope*, which is ſituated about the Middle of it.

The *Dutch* have a Settlement at the Cape, though not ſo conſiderable for any great Advantage ariſing to them from their Trade with the Natives, as from its ſerving for a Rendezvous and Place of Refreſhment to their *Indian* Fleets both going and coming.

After the *Cafrean* Coaſt, comes that, as I obſerved before, of *Sofala*, where none but the *Portugueſe* are ſettled, as they alſo are at *Mozambique*, which joins next, and which has before it the great Iſle of *Madagaſcar*.

In fine, it is alſo the *Portugueſe* alone who carry on the whole Trade of *Melinda*, though it is the laſt Place they engroſs to Cape *Guaydafur*, which being doubled gives an Entrance into the *Red Sea*. The Coaſt of *Ajan*, or Deſert Coaſt, which extends from the Kingdom of *Melinda* to the ſaid Cape, produces nothing fit for Trade, having beſides hardly any Inhabitants to carry it on.

I have not mentioned any of the Iſles of the *African* Coaſts, except thoſe of *St. Thomas* and *Madagaſcar*; but in the ſubſequent Part of the Work, none ſhall be neglected that contributes any Thing to Trade; and at preſent I ſhall enter into a Detail of that wherein the *Europeans* are concerned on all the ſaid Coaſts, beginning it at Cape *Verd*.

Of the Trade of the African *Coaſt from Cape* Verd *to* Sierra Leona.

CAPE *Verd*, ſo named from the Ever-green Trees that cover it, is ſituated between the Rivers of *Senegal* and *Gambia*, which are two of the chief Mouths of the *Niger*, a River ſimilar to the *Nile*, with which, as one may ſay, it divides all *Africa*; this traverſing the one Half, before it falls into the *Ocean*, as the *Nile* does the other Half in its Progreſs to the *Mediterranean*.

The Trade practiſed in going up theſe two Rivers, either on the Coaſts of *Senegal*, or on thoſe which extend from *Gambia* to the Cape of *Sierra Leona*, conſiſts in Gold Duſt, Ivory, Wax, Hides, Gums, Oſtridge and Heron's Feathers, Muſk, Rice, Millet, Indigo, Cotton Coverings for Negroes, and theſe Slaves themſelves.

The *Portugueſe* have had great Settlements on all theſe Coaſts, but at preſent their Habitations are ſomething more inland, eſpecially going up the River of *St. Domingo*, which is about thirty Leagues from that of *Gambia*, where their Reſidence is at *Cacheo*, the Place where the *African* Company of *Liſbon* have their Magazines, for depoſiting the *European* Merchandizes, and thoſe they collect of the Country's Produce, brought down the ſaid River, which is navigable for above two hundred Leagues, being annually above 100,000lb. of Wax, 50,000 of Ivory, and from 800 to 1000 *Negroes*, which they ſend to the Iſlands of *St. James* and the *Brazils*, beſides thoſe they ſend to the *Engliſh* and *Dutch*, who come here yearly to ſeek them.

The *Portugueſe* here carry on their Commerce in Barks of about forty Tons Burthen, with which they trade up the Rivers *Cazuma*, *Pongues*, *Nonnes*, and even to that of *Sierra Leona*; the firſt furniſhing them with their greateſt Quantity of Wax; *Pongues* and *Nonnes* with Indigo; and *Sierra Leona* with Fruit, which they call *Coſſe*, with which they drive a great Trade; and from all theſe Places they alſo get a Quantity of Ivory and Slaves, which they truck againſt the afore-mentioned *Negroes*, Clothing, Brandy, Iron, Pewter, *&c.*

The *Engliſh* had formerly many Habitations, and ſome Forts on the River *Gambia*: That called *St. James*, belonging to the *South-Sea* Company, ſituated a little higher than its Mouth, was taken and deſtroyed by the *French* in 1695.

The River *Gambia* has two Openings, the one to the North and the other to the South; in which latter, being moſt uſed, Ships of three or four hundred Tons may enter, but cannot go up it above ſix or ſeven Leagues; though Veſſels of a hundred and fifty Tons may go up as many Leagues to *Majugard*; and the *Engliſh*, with lighter Barks, have often proceeded yet a hundred and fifty Leagues higher, from whence they have brought back a Quantity of Slaves, Gold, and Ivory, in Time of Peace, to *Majugard*, where they had a Magazine, and their Fort with their principal Habitation was in an Iſle of the River about ſeven Leagues from its Mouth.

Cantory is a Kingdom of *Africa*, in *Negro* Land, on whoſe Coaſts the *French* have a tolerable good Trade, and a Fort for its Security and Protection. The principal Traffick is in Skins and Hides, for which Duties are paid at *Beyhouta*.

Calbaria, a Province in *Africa*, where the *Dutch* have a conſiderable Trade, chiefly carried on at the Town of that Name, their Fort being there, and their

Traffick in Slaves a good one, though the greateſt Part of the Natives on this Coaſt are Man-Eaters. The Exchange for Slaves is unpoliſhed Copper, or ſmall Bars of hammered Braſs, each weighing a Pound and a Quarter, and about two Feet and a half long, of which fourteen or fifteen are commonly given for Slaves of both Sexes, and different Ages, one with another; of theſe the Natives make a Sort of Lattin Wire, which they employ in Collars and Bracelets to adorn themſelves; and in Caſe any of theſe latter are carried ready made from *Europe*, they uſe them there as Money.

SENEGAL.

THE *French* Company of *Senegal*, united to that of the Weſt in 1718, and after the Year 1719 ſwallowed up in the great *India* one, have two principal Eſtabliſhments on this Coaſt; the one at the Iſle of *Goree*, and the other in the Iſle of *St. Lewis*, at the Mouth of *Senegal* River. The *Dutch* were the firſt who occupied the Iſland of *Goree*, and built there the Forts of *St. Francis* and *St. Michael*, though under their firſt Maſters they had other Names. The *French* ſeized it in 1678; in 1692 the *Engliſh* took it from theſe laſt, who the ſucceeding Year again repoſſeſſed it; and the *Senegal* Company have occupied it ever ſince, and from hence carried on a Part of their Trade, of which, however, the greateſt Share always continues to be tranſacted on the Coaſt of *St. Lewis* Iſle, and that of the River *Senegal*. Theſe Places were taken by the *Engliſh* in 1758; and by the Xth Article of the Peace of *Verſailles* in 1763, the Iſland of *Goree* was reſtored to *France*, the Trade of the River *Senegal*, with the Forts and Factories of *St. Lewis*, *Podar*, *Galam*, were ceded to the King of *Great-Britain*: And by 4 *Geo.* III. C. 20. the Fort of *Senegal* and its Dependencies were veſted in the *African* Company.

All that the *French* Company negociated, in the whole of theſe Settlements, *Senegal* included, might amount in a common Year to ſix thouſand Bull and Ox Hides, forty or fifty Quintals of yellow Wax, ſeven or eight thouſand Pounds of Elephants' Teeth, two thouſand Cotton *Negro* Veſtments, twenty-five or thirty Marcs of Gold, and fifty thouſand Slaves. It alſo obtained ſome Oſtrich and Herons' Feathers, Ambergris, Civet, a Quantity of coarſe Cotton Cloth, blue and white ſtriped; which were reſold on the Gold Coaſt. The chief Traffick of Gum is with the *Moors*, who bring it on Horſes to a Place called *Terrier Ronge*, at fifty Leagues from the Coaſt, going by the River of *Senegal*; of which the Sales begin in the Month of *April*, and laſt about ſix Weeks.

Higher up on the Coaſt is found the Kingdom of the *Jaloſes*, and that of the *Ceratique*; and it is to this laſt that the Cuſtoms are paid for the Liberty to navigate and trade in the River of *Senegal*.

The *Engliſh* and *Dutch* have very conſiderable Dealings with theſe *Jaloſes*, and the Places of their principal Tranſactions are *Camino*, *Jameſil*, and *Geroep*. The Months of *March* and *April*, with thoſe of *November* and *December*, are the moſt convenient ones for this Commerce.

The Merchandizes proper for *Senegal* and *Gambia* are in Part the ſame, and Part different. Thoſe for the River of *Gambia*, particularly for the *Jaloſes*, with which the *Dutch* commonly lade their Veſſels for this Traffick, are Bars of Iron, twenty-eight or thirty to weigh about ten Quintals, Brandy, Beer, Copper Baſons of different Weight, Copper Plates of about a Pound, Yarn, coarſe narrow blue Serges, four threaded Cloths, red, yellow and blue Ratines, red, yellow and white combed Wool, white, blue, red, and yellow, Glaſs Beads of various Sorts, rough Coral, Sabres, Copper Trumpets, red Caps, round Padlocks, Rock Cryſtal, Sailors Knives, coarſe Shirts, and fine ones with Lace at the Boſoms and Wriſts, Suits of Cloths from *Harlem*, *Sileſia* Linens, and others both of Hemp and Flax, fine Cotton Linen, fine and common Paper, Earthen Pots white and blue, Blankets of *Leyden*, *Iriſh* Mantles, *Morocco* Leather Shoes, Hats, brown Fuſtians, coarſe white Thread, Glaſs Bottles with Pewter Stoppers, and all Sorts of Needles.

The Ladings of the *French* Ships for *Senegal* were in Part compoſed of the aforeſaid Goods; and beſides them of black Cotton Linens, calendered Linens of

Rouen, Kettles from four to ten Pounds' Weight; ſome few Trinkets of Silver, yellow Amber, Pewter, little Looking-Glaſſes with painted Frames, ſome Coin, large red Coral, Taffeties, Crimſon, cherry Colour, yellow, and blue, though but few of them, a few Cloves, Sambouc Wood, and the Iris of *Florence*, for Preſents to the *Negro* Kings, as alſo a few Ells of Scarlet Cloth for the ſame Purpoſe.

Arms, ſuch as Muſquets, Muſquetoons, Fowling Pieces, Piſtols, double barrelled Guns, Gunpowder, leaden Balls, Shot, and Flints, are equally proper for *Gambia* and *Senegal*; but one of the beſt Merchandizes, and of which the Sales are the moſt conſiderable, are the *Maldivean* Shells, called *Cauris* in *India*, and *Bouges* on the Coaſt of *Africa*.

All theſe Merchandizes, and ſome others which will be hereafter mentioned, are equally proper for the Trade of all the other *African* Coaſts, excepting the above-mentioned Shells, which are only current from *Cape Blanco*, to and including *Juda*, or *Xavis*, on this Side the River *Ardres*. But *Angola*, where the greateſt Purchaſe of *Negroes* for *America* is made, does not admit theſe Shells in Trade. It is true, that the Inhabitants of *Congo*, do alſo make Uſe of Shells, by them called *Zimbi*, or *Zinibi*; but theſe are carried them only by the *Portugueſe*, who are in a manner Maſters of all this great Kingdom.

The Commerce of the African *Coaſts, from the Cape of* Sierra Leona, *to the River of* Ardes.

IT is from the River of *Sierra Leona*, that the Coaſts of *Malaguete*, or *Malaguette*, begins, ſo called from a Sort of Pepper, that makes the principal Trade of the *Blacks* of this Part of *Africa*; the *Engliſh* and *Portugueſe* ſhare this Traffick; the firſt having a Factory conveniently eſtabliſhed in one of the Iſlands, and the other within Land.

The Merchandize this Country affords them, are Rice, Elephants' Teeth, the beſt on all the Coaſts, Civet, and a little Ambergris. The Capes of *Monte*, and *Miſerado*, would likewiſe be good Places for the Ivory Trade, could the Inhabitants be made tractable, as the River *Jonco*, or *del Punto*, would, did not the Sea break in ſuch a Manner, as to render anchoring there very dangerous.

The *Ivory Coaſt* joins to the preceding, and produces only thoſe Teeth and a little Gold for Trade. Iron Rings and ſmall Bells are what moſt pleaſes theſe Barbarians from *Europe*; and the Places of the greateſt Trade on this Coaſt, are the *Grand Drouin*, ſituated in an Iſle formed by a ſmall River; *Groma*, *Tabou*, *Little Tabou*, *Tao*, *Rio Freſco*, *St. Andrew*, *Giron*, *Little Drouin*, *Bortrou*, Cape *la Hou*, *James la Hou*, *Wallochk*, and *Gammo*.

The *Gold Coaſt* begins at the River *Sueiro da Caſtos*, and is about a hundred and thirty Leagues long Eaſt and Weſt. This Coaſt is above all others of *Africk* the moſt frequented by the *Europeans*, and where the *Engliſh*, *Dutch*, and *Danes* have very conſiderable Settlements: The great Quantities of Gold found, and ſold on this Coaſt, have given it its Name, and its chief Market Places are, *Atchim* or *Axime*, *Acera*, called alſo *Taſon*, *Acanni*, *Acherva*, and *Fetu*. That of *Axime* is the beſt, and of the Standard of twenty-two or twenty-three Carats.

Abaſſon is the firſt Kingdom on this Coaſt weſtward, which extends only about ſix or ſeven Leagues along Shore, though its Bigneſs within Land is unknown. On ſailing Eaſtward, the Villages and little States of *Albiani* and *Tabo* are met with; the firſt ſix Leagues from *Iſſini*, and the other ten. The Ships that trade along the Coaſt come to an Anchor before theſe Villages, and hoiſt their Colours, on which the *Negroes* immediately come off, and on finding them Friends, go aboard, where they are commonly regaled with a Glaſs or two of Brandy, and an Enquiry is made from them, whether any Ships have been lately on the Coaſt, and what Goods they have got to diſpoſe of.

The Kingdom of *Guiomere* is the neareſt to Cape *Apollonia*, and though its Sea Coaſt be very contracted, it is pretty conſiderable within Land, and drives a great Trade, either from Gold Mines it has itſelf, or with what it collects by its Commerce, with thoſe that poſſeſs them, as this Metal is very common here; and the Traffick in Ivory and Slaves is not a little. At eight Leagues to the Eaſt of Cape *St. Appellina*, is the Village which the *Negroes* call *Axem*, the *French Axime*,

Axime, and the *Dutch Atchim*, of which theſe laſt have been for above a hundred Years Maſters.

After *Axime*, is Cape *des Trois Pointes*, called ſo from three Mountains which compoſe it. The Subjects of the King of *Pruſſia* were ſettled here, and had a Fort, which they had obtained in 1720, and delivered up to the *Negro* King, Maſter of the Country, who acquainted the *French* therewith, and ſollicited their coming to ſettle there, with Offers of an excluſive Trade; but they neglecting to improve the Opportunity, the *Dutch* took it in 1725, and continue to enjoy it, and is one of the moſt conſiderable Places on the Coaſt; the Anchorage is good, the Landing eaſy, without any Bar; the Country is healthy, abundant, fertile, and well cultivated. Beſides the Gold Trade, which is very conſiderable, here is a great deal of Ivory, and many Slaves. The *Dutch* have another Fort called *Botrou*, about two Leagues to the Eaſtward of the Cape; and another at ſix Leagues to the Eaſt of *Botrou*, named *Witſen*, pretty near to *Tacoravi*.

Sama or *Chama*, is one of the chiefeſt Places on the Gold Coaſt, being near four Leagues Eaſt of *Tacoravi*; it contains about two hundred Houſes, and the *Portugueſe* had here formerly a Factory, and a Redoubt; but the *Dutch* ſeized both the one and the other, and carry on a conſiderable Trade here, it being the Rendezvous of all the neighbouring Negroes.

The Kingdom of *Gnaffo*, or *Commendo*, being four Leagues to the Eaſt of *Sama*, this with *Feſu*, or *Fetu*, and *Sabou*, made formerly but one Kingdom, and was then powerful and rich, but, ſince its Diviſion, is greatly diminiſhed. The *Negroes* call it *Commenda Ajata*, and the *Portugueſe*, *Aldea de Torres*, though it is yet known under the Name of *Little Commendo*, to diſtinguiſh it from *Gnaffo*, which is further in Land, and denominated *Great Commendo*. All this Country is extremely fertile, and abounding in every Thing neceſſary for Life. At *Little Commendo*, is a celebrated Market kept daily, the beſt furniſhed of any one in *Guinea*, and it may be in all *Africk*.

Although the Gold Trade is not ſo conſiderable here, as at the Places beforementioned, and at the Mine, *&c.* which I ſhall hereafter ſpeak of; yet the *French* have notwithſtanding made a Settlement that is of infinite Service to them, for furniſhing their Ships with Refreſhments in their Voyages to the Eaſt, and in their Return to *France*.

The *Caſtle of the Mine*, known by the Name of *St. George de la Mina*, is the principal Factory, and the beſt Fortreſs which the *Dutch* have on the Gold Coaſt, being the Reſidence of their Director, and general Commandant, and the Centre of their Commerce, on which all their other Settlements depend. The Soil is infertile, and therefore the Miners are obliged to the *Blacks* of *Commendo*, *Fetu*, and Cape *Corſe*, for their Proviſions; which laſt Place lies about three or four Leagues from the *Mine*, and has for ſome Years paſt been the chief Settlement of the *Engliſh* in theſe Parts; it is the Reſidence of the Director General of the *London* Company, who has the Authority over all the Settlements which this Nation has in *Guinea*; and the Fortifications are here ſo ſtrong, as to have reſiſted the *Dutch* Fleet, under the Command of Admiral *Ruyter*. The Village occupied by the Negroes is the moſt conſiderable of the Kingdom of *Fetu*; it is compoſed of more than two hundred Houſes, and has a diurnal Market, where every Thing may be had for Money that a Perſon can wiſh for.

By the Agreement which the *Engliſh* and *Danes* made on their joint Capture of this Place from the *Dutch*, it was ſtipulated that the *Danes* ſhould have a fortified Settlement here, called by them *Fridericſbourg*, which is to the North-Eaſt of the Village, and is commanded by the principal Commiſſary of the *Daniſh* Company, which carries on a conſiderable Trade here.

Although the Fort and Village of Cape *Corſe* are in part dry and arid, the Reſt of the Kingdom is very fertile and abundant, the Lands are well-cultivated, and the Natives, who are numerous, are very laborious.

The Village of *Moure* is a little League from *Fridericſbourg*, where the *Dutch* have a Fort with the Name of *Naſſau*.

The Kingdom of *Fantin* is extremely rich, populous, and potent; the greateſt Village is *Cormantin*, about three Leagues from *Moure*; the *Engliſh* had formerly a Fort here taken and retaken by the *Dutch*, with whom at laſt it remained, and

they have here a good Trade, as they have at *Adia* and *Jamolia*, which they have fortified. The Country is rich in Gold; the Inhabitants laborious, Lovers of Trade, of which they have learned the Secret and Oeconomy from the *Dutch*.

Ackram or *Acron*, a Town in *Africk* on the *Guinea* Coaſt, is not far from *Bregu*, or *Berku*, and whoſe principal Traffick conſiſts in Gold Duſt, which the Inhabitants give in Exchange for red Cloth, Pots, Kettles, Baſons, and other Copper Kitchen Utenſils.

Aguvanna, another *African* Kingdom on the Gold Coaſt, carries on much the ſame Traffick as the Preceding, with the Addition of ſome few Slaves.

Of Acara, Lampi, Juda, *and* Ardres *or* Ardra.

ACARA is a large Kingdom, ſeated at the Extremity of the Gold Coaſt, where the *Engliſh*, *Dutch*, and *Danes*, have each a conſiderable Fort, which render them Maſters both of the Gold and Negro Trade, and therefore obliges the *French* to deal with *Lampi*, *Juda*, and *Ardres*, even when at War with theſe Nations; the latter of which borders on the Kingdom of *Boneri*. Before that *Moure* and *Cormanteri* had attracted the greateſt Part of the Buſineſs tranſacted on the Gold Coaſt, the Village of little *Acara*, ſituated at the End of it, was the Place where moſt of the *European* Merchandizes found Diſpatch; this Village only furniſhed a third of all the Gold that the *Europeans* traded for on this Coaſt, and the Negro Trade is ſtill pretty good here, as between three and four hundred may annually be purchaſed on reaſonable Terms.

The Commerce of *Lampi* and *Juda*, a ſmall Kingdom between *Acara* and *Ardra*, is not inconſiderable, eſpecially for the Purchaſe of Negroes. In the Years 1706 and 1707, the *French* Aſſiento Company bought here two hundred and fifty each Voyage, in Truck for *European* Goods from forty-five to fifty *French* Livres *per* Head, though in the Kingdom of *Ardres*, from whence near three thouſand Slaves may be annually extracted, they coſt about eighty ditto; and theſe with Proviſions, are the only Articles of Commerce in this Kingdom for Exports; the Goods eſteemed moſt here for Truck, are the biggeſt Glaſs Beads; large Cryſtal Pendants; large gilt Cutlaſſes; coloured Taffeties; ſilk Stuffs ſtriped and ſpotted; fine Linen; Laces; fine Handkerchiefs; with Buttons; Iron Barrs; a fine thin woollen Stuff called Bouge; Copper, cylindrical, and pyramidical Bells; long Coral; Copper Baſons of various Sizes; Muſkets; Brandy; large Umbrellas; gilt Looking-Glaſſes; *China* Taffeties, and other Silks from that Part; Gold and Silver Duſt; *Engliſh* and *Dutch* Crowns.

Of the Trade on the Coaſt of the Kingdom of Benin.

THE *Europeans* trade but little in this Kingdom, although it has two hundred and fifty Leagues of Coaſt, and the Inhabitants are leſs ſavage than the Negroes of *Guinea* and other Parts of *Africa*. The Merchandize found here are Cotton Habits ſtriped according to their Faſhion, afterwards ſold on the Gold Coaſt, and others blue, proper for the Trade of the River *Gabou*, and on that of *Angola*; Jaſper Stones; female Slaves, for they will ſell no Men; Leopard Skins; Pepper and Acori, which is a Species of blue Coral that grows under Water, in the Form and Manner that other Corals do. In Exchange of theſe Commodities are given Gold and Silver Stuffs; Red and Scarlet Cloths; Red Velvets; Violet coloured Ferrets; *Harleim* flowered Stuffs, well coloured; Red Glaſs Ear-Rings; Looking Glaſſes with gilt Frames; Glaſs Beads; Bouges; fine Coral; Earthen Drinking-Pots ſtriped with Red; all Sorts of Cotton Thread, and Linen; Oranges; Lemons, and other green Fruits candied; Braſs Bracelets weighing five Ounces and an Half; Lavender; and Iron Bars.

The *Dutch* are almoſt the only Traders with theſe People, as it is they alone among all the *Europeans* who have a Warehouſe here, which by the King's Permiſſion is eſtabliſhed at *Golou*, a large Village on the River of *Benin*; and this Commerce they enjoy ſo uninterruptedly, as the Country produces neither Gold, Ivory, Aides, Gum, Wax, nor Slaves, as above-mentioned, though the Natives are much

much more civilived, honeſt, and if the Expreſſion may be allowed, polite than any of their Neighbours.

Captain *Snelgrave*, in his Treatiſe of *Guinea*, publiſhed in 1734, ſays, that the River *Congo*, in the ſixth Degree of ſouthern Latitude, is the moſt diſtant Part that the *Engliſh* trade to, whoſe Commerce here is ſo greatly augmented ſince the Peace of *Utrecht*, that inſtead of thirty-three Ships under thoſe Colours that in 1712 were on the coaſt of *Guinea*, it was demonſtrated to the Commiſſioners of Trade, that in 1725 there were above two hundred Sail, to the great Advantage of Navigation and our *American* Colonies.

Our Author recounts the Ruin of the Kingdom of *Whidaw*, *Fida*, or *Juda*, of which *Sabee* is the Capital, ſituated about ſeven Miles from the Sea; and here the King had granted to the *Europeans* commodious Houſes for their Factories, protecting both their Goods and Perſons. The Port was open and free to all *European* Nations, who came here to purchaſe Slaves; and this Trade was ſo conſiderable, that the *Engliſh*, *French*, *Dutch*, and *Portugueſe*, exported above twenty thouſand yearly from this Kingdom and its Neighbourhood; but the Liberties which the Natives enjoyed of having many Women, and their abandoning themſelves to Luxury and Pleaſure, ſo effeminated them, that although they could bring above an hundred thouſand Men into the Field, their Cowardice was ſo great, as to ſuffer two hundred Enemies to drive them from their Capital, and to ſee uninterruptedly their whole Country deſtroyed by a Nation, which they had formerly deſpiſed.

Of CONGO.

THE *Portugueſe*, who diſcovered this Kingdom in 1484, and ſettled here in 1491, are the only *Europeans* that trade here; all other Nations only ſtopping for Refreſhments, which they purchaſe of the Blacks, in Exchange for ſmall Looking-Glaſſes, Beads, *&c.* The principal Settlement of the *Portugueſe* is at *Loanda*, the Reſidence of the Vice-Roy, and, as may be ſaid, the Capital of what the Whites poſſeſs in this Kingdom; the Port is very large, and the Anchorage ſecure, and this is the Place where all the Ships arrive and ſail from, either for *Europe* or the *Brazils*.

The Slave Trade is the moſt important one that the *Portugueſe* have at *Congo*, and the Number which they ſend yearly to the Support of their *American* Colonies is ſurprizingly great; but what renders this Buſineſs ſtill more advantageous and conſiderable, is the ſhort Cut from hence to the *Brazils*, compared with what all other Nations have to run, when carrying theſe unhappy Wretches to their Plantations; as the *Portugueſe* ſeldom exceed a Month or five Weeks in their Paſſage, and conſequently in this ſhort Time are not expoſed to ſuch a Loſs by Mortality among their Slaves, as others are, who have a much longer Voyage to make, which frequently occaſions Diſtempers that ſometimes carry off the greateſt Part of them.

It is difficult to aſcertain the Number of Slaves, which the *Portugueſe* reſiding at *Loanda*, *Colombo*, *St. Salvador*, and all other Places in this Part of *Africk*, have in Property. Thoſe who are leaſt rich, having fifty, an hundred, or two hundred belonging to them, and many of the moſt conſiderable poſſeſs at leaſt three thouſand; a religious Society at *Loanda*, having of their own twelve thouſand of all Nations, which being Blackſmiths, Joiners, Turners, Stone-Cutters, *&c.* do almoſt all bring their Maſters in from four to five hundred Reis *per* Day, Gain, which they procure by working for the Publick.

Beſides Negroes, *Congo* produces Ivory, Wax, Honey, and Civet, and has in it ſome Mines of Iron and Copper, though of theſe no great Quantity is extracted. *St. Salvador* is properly the Rendezvous of all the *Portugueſe* Merchants; where they bring Gold and Silver Stuffs, Velvets, *Engliſh* Cloth, Gold Lace, black Ratine, ſmall *Engliſh* Carpets, Copper Baſons, blue Earthen Pitchers, Hats, Rings, Coral, Fire-Arms, and Shells called here *Zimbi*, or *Zinibis*, as before obſerved, which ſerve for a ſmall Money; beſides all which, Brandy and Wine find here a current and good Diſpatch.

Of ANGOLA.

ANGOLA is of all the *African* Coaſts that which furniſhes the *Europeans* with the beſt Negroes, and commonly in the greateſt Quantities, although it ſcarcely extends twenty-five to thirty Leagues along the Sea-Shore; it is true, this Kingdom widens conſiderably within Land, being at leaſt an hundred and fifty Leagues in Length, and as much in Breadth, whoſe Capital is *Loanda St. Paola*.

Although the *Portugueſe* are extremely powerful in the interior Part of the Kingdom; and that the Majority of the Negroes in the Provinces they have ſubdued, may properly be termed the Vaſſals of his moſt faithful Majeſty, to whom they yearly pay a Tribute of Slaves, yet the Negro Trade, which is tranſacted on the Coaſt, has always remained free to the other Nations of *Europe*; and the *Engliſh*, *French*, and *Dutch* ſend yearly a great Number of Veſſels, who carry off many thouſands of theſe poor unhappy Creatures, for the Supply of their *American* Settlements, or for Sale in thoſe of the *Spaniards*.

The *Portugueſe* are, however, thoſe which deal the moſt here; and it is aſtoniſhing that they have not before now depopulated the Country, there being hardly any Year, that they do not ſhip off fifteen thouſand for *Brazil*. The Villages of *Cambambe*, *Embaco*, and *Maſſingomo*, are thoſe which furniſh moſt Slaves to the *Portugueſe* Merchants concerned in this Traffick.

And the Merchandize with which they pay for them, are Cloth with great Liſts; Crimſon Silk Stuffs; Linens; Velvets; Gold and Silver Lace; back Serges; *Turkey* Carpets; white and coloured Thread; ſewing Silk; *Canary* Wine; Brandy; Olive Oil; Sailors' Knives; Spices; refined Sugar; great Hooks; Pins three Inches long, and others of various Sizes; Needles, *&c.*

The *Portugueſe* have alſo a Settlement at *Binguela*, a ſmall Kingdom dependent on that of *Angola*, where they carry on ſome Trade; but this Place is unwholſome, and fitter for the Abode of Criminals baniſhed by the Tribunal at *Liſbon*, than for the Reſidence of Perſons exerciſing Trade.

Of Loango, Malimbo, *and* Cabindo.

THE Negro Trade that is carried on in theſe three Places of the *Angolian* Coaſt, is not one of the leaſt conſiderable, that the *Engliſh* and *Dutch* are concerned in, on the Shores of this Part of *Africa*, whether for the Number, Goodneſs, or Strength of the Slaves, for which the *Europeans* prefer them to all others; and the Inhabitants of the *American* Colonies always give for them a higher Price, as more able to ſuſtain the Labour and Fatigues of the Culture and Manufacturing Sugar, Tobacco, Indigo, and other painful Works, in which it is cuſtomary to employ theſe miſerable Perſons.

The Merchandize proper for theſe Parts is the ſame as has been already mentioned, ſo I ſhall only add a Remark made by the Judicious in this Commerce; that as ſoon as the Buſineſs is concluded, and the Slaves aboard, not a Moment ſhould be loſt in getting to Sea, for fear that the unhappy Captives ſhould grieve at the Sight of their Country, from which they are to be for ever baniſhed.

Of the Trade of the African *Coaſts from the Cape of* Good Hope, *to the Entrance of the* Red Sea.

THE *Portugueſe* diſcovered the Cape of *Good Hope* in 1493, but they remained undetermined to ſettle here, either through a Want of Courage or Defect of Prudence, or by a Reflexion on the Cruelty with which they treated the poor *Hottentots*, in Revenge of their being at firſt not well received by them. It does not appear that from that time the *Europeans* made any Deſcent there till 1600, when the Ships of the *Dutch Eaſt-India Company* began to touch here, though they did not at firſt comprehend all the Advantage they might draw from an Eſtabliſhment in this Country, and therefore contented themſelves for ſome Years to anchor here, going and coming, only to buy freſh Proviſions; and in order to ſecure theſe from any Inſult till re-embarking, they built a ſmall Fort upon the Harbour

whoſe Ruins were diſcernible not long ago. But on the Company's Ships ſtopping here as uſual, in 1650, one Mr. *Van Reibeeck*, then a Surgeon, ſoon perceived, by the Situation and Goodneſs of the Country, of what Advantage the Eſtabliſhment of a Factory here would be to the Company's Trade, and on his Return to *Holland*, he communicated his Thoughts to the Directors, who ſo far approved of them, as to reſolve on attempting the Thing without Loſs of Time; and accordingly they charged him with the Care of the Expedition, and gave him four large Ships, with all Materials, Inſtruments, Workmen, *&c.* neceſſary for the Undertaking: They made him Admiral of this little Fleet, and Governor of the Cape, with full Power on his Arrival to treat with the Natives, and to regulate every Thing that he ſhould judge would be conducive to the Eſtabliſhment of the intended Colony, on a ſecure and laſting Foundation. *Van Reibeeck* had all the Succeſs that he could poſſibly deſire in this Enterprize; as he knew well how to ingratiate himſelf with the *Hottentots*, by the Preſents he made them of ſome Hardware, he preſently concluded a Treaty with them, by which they granted the *Dutch* full Liberty to ſettle in their Country, and to trade with them as they ſhould think proper, on Payment of fifty Guilders, in the ſame Sort of Merchandize as their Preſents were. This Treaty was immediately executed with Punctuality by both Parties, and from that Time the *Dutch India* Company have enjoyed an uninterrupted Settlement, and nothing is neglected to render it as beneficial as poſſible.

When I ſay their Eſtabliſhment has been without Interruption, I mean from the contracting Parties; for as ſoon as the *Dutch* began to cultivate their new purchaſed Lands, and to build Houſes and Forts, the *Gunjermans*, which are a Nation at the Cape neareſt the Sea, oppoſed themſelves to this Eſtabliſhment, and called in all the neighbouring Nations to their Aſſiſtance: but the *Dutch* defended themſelves ſo well, that their Enemies were obliged to demand Peace, which was granted them on the following Conditions, *viz.* The firſt Agreement was not only confirmed, but it was further ſtipulated, that all the Lands which the Natives did not then actually occupy, ſhall thence-forward belong to the *Hollanders*, with this Clauſe only, that the Natives might ſettle wherever they pleaſed, provided it was in Places that the *Dutch* left uncultivated. An Alliance offenſive and defenſive was at the ſame Time concluded, which though not ſet down in writing, the *Hottentots* not underſtanding the Uſe of Letters, has been hitherto religiouſly obſerved. By this Treaty the *Dutch* are in a Manner become the Maſters of all this Country; and the Chiefs of the Nations frequently come to renew the Alliance with the Governor, and to bring him Preſents of Cattle, when they are always well received, and their Gifts returned in Tobacco, Brandy, Coral, and other Things they are known to be fond of.

It has coſt the Company immenſe Sums to put this Eſtabliſhment on the Footing it at preſent is; Mr. *Kolben* computes the Expence of the firſt twenty Years to have been at leaſt a Million of Guilders *per Annum*, and that during the Time he was there, it was difficult to raiſe enough to defray Charges. The Revenues conſiſt in the Tithes of all the Lands which the *Europeans* poſſeſs at the *Cape*, Ground Rents, Cuſtoms on all foreign Wines, and thoſe of their own Growth, on Tobacco, Beer, Brandy, and other diſtilled Liquors, as well as on the Profits made by Trade, which the aforeſaid Mr. *Kolben* reckons annually amounts to 225,000 Guilders. But as the Colony has always gone on increaſing, and freſh Lands continually been grubbing up, this Eſtabliſhment muſt become very beneficial in Time.

The Territories which the *Dutch* poſſeſs are divided into four Diſtricts or Colonies, of which the firſt is called the *Cape*, becauſe it is the neareſt to the Sea, and the City and Fort of *Good Hope*, are built there.

The ſecond Colony is that of *Stellenboſch*, ſo called from *Steel*, the Name of a Governor, *Simon Vander Steel*, under whom this Eſtabliſhment was made, and *Boſch*, which in *Dutch* ſignifies Wood, becauſe the Country was entirely covered with it, or over-run with Weeds, when the *Dutch* took Poſſeſſion; this Colony is ſeparated from the firſt by Sands of a great Extent, and divided into four Parts, of which the two principal ones are, that which ſtill retains the Name of *Stellenboſch*, and that called *Hottentot Holland*, not becauſe it reſembles the Province

Province of *Holland*, which is much leſs, and very differently ſituated, but becauſe it appeared to the firſt Settlers, to be the fitteſt for Cattle appertaining to the *India* Company.

Drakenſtein is the Name of the third Colony, which begun by ſettling in 1675; a great Number of *French* Proteſtants having a little before fled for Refuge to *Holland*, the Company, by Recommendation of the States General, ſent many with their Families to this Country, with Orders to the Governor to give them Lands, and all Neceſſaries for their Culture; it is theſe or their Deſcendants, who at this Time compoſe the greateſt Part of the Inhabitants of *Drakenſtein*; and although they have omitted nothing that might render this Settlement flouriſhing, and herein have been aſſiſted by the Soil, which in general is very good, yet few have obtained a Sufficiency to make themſelves eaſy, but generally ſpeaking are poor, living from Hand to Mouth, and in Huts like the *Hottentots*. This ſeems ſurpriſing, but our Author attributes it to the little Support afforded them, as there was Room to have expected more.

The Country is mountainous and ſtony, yet nevertheleſs very fertile, producing almoſt every Thing growing in the other Colonies; the Honey Mountains are here among others, ſo called from the great Quantity of that ſweet Liquid, which a Meridian Sun forces in drops from the Cliffs of the Rocks, and which the *Hottentots* acquire at the Peril of their Lives. The Governor *Vander Stel* gave this Colony the Name it bears, in Honour to Monſieur Baron *Van Rheede*, Lord of *Drakenſtein* in *Guilderland*, who in 1685 was ſent by the *India* Company, in Quality of Commiſſary General, to examine the State of all their Factories and Plantations, and to redreſs as he ſhould think proper the Abuſes crept in there.

The laſt and youngeſt Colony of the Cape is that of *Waveren*, which received this Name from *William Vander Stel*, in Honour of the Family of *Van Waveren* of *Amſterdam*, to which he was allied. It was before called the *Red Sand*, on Account of a Mountain which ſeparates it from the Colony of *Drakenſtein*, on the Top of which, and about it, is found a great Quantity of this red Sand. The Country is naturally very fertile, but little cultivated, as the Inhabitants poſſeſs nothing here in Property, but are obliged to renew their Leaſes every ſix Months with the Governor.

There is not a Country in the World, according to Mr *Kolben*, that feeds ſo great a Quantity of large and ſmall Cattle, as the Cape of *Good Hope*, where they are cheaper, and their Fleſh better; an Ox commonly weighs here between five and ſix hundred Pounds, which is given for a Pound of Tobacco; and a Sheep's Tail weighs from fifteen to twenty, and ſometimes thirty Pounds.

As lazy as the *Hottentots* naturally are, they do not however neglect an Application to the Mechanick Arts, and they are even ſo expert, that it is inconceivable how they ſhould be accuſed of being a People the moſt ignorant and ſtupid in the World: They have Furriers and Tanners by Profeſſion among them, who underſtand preparing the Skins with which they cover themſelves, and the Hides that they employ in divers Uſes, almoſt as well as the *Europeans*; Artificers in Ivory, who without any other Inſtrument than a Knife, work in it with as much Propriety and Delicacy as the beſt Turners; Matt-Makers, Rope-makers, who have the Art to make Cords with ſmall Ruſhes, that are as ſtrong and durable as Hempen Ones; and the Blackſmiths, who very well underſtand to caſt Iron, and give it all Sorts of Forms, only with Flints, although they hardly ever make any other Uſe of it, than to arm their Sticks, Arrows, Javelins, and other ſimilar Inſtruments. Theſe Blackſmiths work alſo in Copper, though but a little; for all their Performances herein are reduced to ſome Toys, with which the Men and Women adorn themſelves; and they are all in general Potters, every Family making their own Veſſels, for which they uſe the Earth of an Ant Hill, which they carefully cleanſe, and afterwards knead with Ant Eggs, which make an admirable Cement, and gives to the Matter a jet Black, that it never loſes. It is hereby ſeen, that they neither want Invention or Dexterity, and that if they were leſs ſlothful, they would, in the Mechanick Arts, ſoon equal all the other *Africans**.

Of

* *Kolben's* preſent State of the Cape of *Good Hope*.

Of Sofala *and* Monomotapa.

THE Kingdom of *Sofala* is rich in Gold Mines and Ivory, and theſe two precious Commodities attract Foreigners, and maintain Commerce. The *Arabians* are ſuppoſed by ſome, and the Fleets of *Solomon* and *Hiram* King of *Tyre* by others, to have been the firſt Traders to theſe Parts; but as I have treated largely of this Conteſt in my Hiſtorical Introduction, I beg Leave to refer my Reader thereto, for any further Information.

The *Portugueſe* ſettled here towards the End of the fifteenth Century, and in 1500 even obtained Permiſſion to build a Fort pretty near the Capital, for the Habitation of their Factors, carrying on their chief Trade herein, for which it was commodiouſly ſituated on the *Quama's* Shore, where they had their Warehouſe for *European* Merchandize ſent them from *Moſambique*.

The richeſt Mines of the Kingdom are thoſe of *Sofala*, from which there is yearly extracted, if the Negroes may be credited, more than two Millions of *Merigals*, which at fourteen Livres Tournois, as Mr. *Savary* computes them, make twenty-eight Millions of Livres: Theſe Riches are divided between the *Portugueſe*, who are the only *Europeans* that trade to this Kingdom, the *Arabians*, more eſpecially thoſe of *Ziden* and *Mecca*, and the *Mahometans* of *Quilloa*, *Monbaſe*, and *Melinda*. Theſe latter come in ſmall Barks, which they call *Zambucks*, and bring blue and white Cottons, Silk, Ambergris, and Succinum, or yellow and red Amber variouſly carved.

The Commerce of the *Arabians* may import above 140,000*l*. Sterling *per Annum*, in the exchanging divers Sorts of Goods that they bring from the *Eaſt-Indies* and the *Red Sea*, againſt Gold and Ivory.

In Regard to the *Portugueſe* Trade, it is carried on by thoſe of this Nation ſettled at *Moſambique*, who ſend here the Products of *Europe*, proper for this Market, on which they make ſo vaſt a Profit, that only the Governor's Rights amount nearly to between 60 and 70,000*l*. Sterling, *extra* of the *Portugueſe* Troops Pay, which comes out of this Trade, and beſides the Tribute that is annually ſent to the King of *Portugal*, which is very conſiderable.

The ſmalleſt Share of theſe Merchandizes are, however, conſumed in this Kingdom, the Reſt paſſes to *Monomotapa*, where the *Sofalois* truck them againſt Gold, which is given them unweighed, theſe People never uſing Scales, and making, as one may ſay, an arbitrary Traffick, dependent on the Caprice of the Buyer and Seller.

The Kingdom of *Monomotapa* being within Land, and none of its Provinces near the Sea, Strangers, and more eſpecially the *Europeans*, carry on no direct Trade with it; it is true, the *Portugueſe* have ſome Settlements here, but Religion has been a greater Motive to their Origin than Trade; ſo that all the Gold, Ivory, and Oſtrich Feathers, which are the principal Commodities that this vaſt Tract of *Africk* furniſhes to Commerce, paſs, as before obſerved, through the Hands of the *Sofalois*. The Gold of *Monomotapa* is of two Sorts, the one from the Mines, and the other found in the Gravel of the Rivers; and from both the Quantity collected annually is ſo great, and the Merchants of *Sofala* have ſo rich a Buſineſs here in Truck for *Aſian* and *European* Goods, which come from the *Arabians* and *Portugueſe*, that theſe latter commonly call the Prince to whom *Monomotapa* is ſubject, the Golden Emperor.

Of Mosambique.

THE *Portugueſe* are the only *Europeans* who have any Eſtabliſhments, or carry on any Trade in the Kingdom of *Moſambique*; the *Arabians*, however, ſhare with them, although the former uſe all poſſible Means to hinder their Progreſs, and ſecure it entirely to themſelves. The *Portugueſe* Habitations along the Coaſt are conſiderable, and all defended by good Fortifications, or at leaſt by ſtrong Houſes, which ſerve for Magazines and a Security againſt the Natives, who are equally perfidious and lazy; but the Centre of their Commerce in theſe Parts is the Iſle of *Moſambique*, about two Miles from the Continent,

in which they have a commodious Town, well fortified, which is the common Reſidence of the Governor-General, and of the richeſt Merchants.

This Iſle and its Port are to the *Portugueſe India* Shipping what *Madagaſcar* was formerly to the *French*, and what *St. Helena* and the Cape of *Good Hope* are at preſent to the *Engliſh* and *Dutch*, *viz.* a Place for depoſiting Goods, and affording Refreſhments.

The *Dutch* twice attempted to make themſelves Maſters of the Commerce of *Moſambique*, in the Beginning of the ſeventeenth Century; the firſt in 1604, and the ſecond in 1607; but the *Portugueſe*, then united with the *Spaniards*, made ſo brave a Defence, that the *Dutch* Fleets were obliged to retire half ruined, though with a rich Booty that they found in ſeveral *Portugueſe* Caracks which they took.

The Trade carried on here conſiſts in Gold and Silver, Ebony, of which their Foreſts are full, Ivory, found here in greater Abundance than in any Part of *Africk*, in Slaves taken in War, Matts, and all Sorts of Refreſhments; and the Merchandize given in Exchange are Wine, Oil, Silk, Woollen and Cotton Stuffs, Coral, wrought and unwrought.

When the *European* Goods arrive at *Moſambique*, in the *Portugueſe* Ships, they are taxed at a certain Price by the King's Factor, who afterwards ſends them to *Chilimani*, at the Mouth of the *Senna*, from whence they go up the River in ſmall Barks, to a little *Portugueſe* Town ſeated at the Height of the *Senna*, where the *Caffres* and *Blacks* come from the Inland Kingdoms and Provinces of *Africk*, ſometimes at three or four Months' Travel Diſtance, to buy or take on Credit the *Portugueſe* Goods, for a Quantity of Gold agreed on, and which they never fail to bring faithfully.

This Traffick generally yields *Cent. per Cent.* and is properly the *Chili* and *Peru* of the *Portugueſe*; Gold being ſo common here, at a Month's Journey from the Coaſt, that the Utenſils of the Houſe and Kitchin are uſually made of it.

Of MELINDA.

THE Commerce of this Coaſt, which is the laſt Kingdom from the Cape of *Good Hope* to the Entrance of the *Red Sea*, where the *European* Ships anchor to trade, is almoſt entirely in the Hands of the *Portugueſe*, who have a great Settlement in the Capital, and have even had the Credit of building ſeventeen Churches here, although the King is a *Mahometan*. The Natives, however, carry on ſome Trade with their own Veſſels, in the *Red Sea*, and with them frequent the beſt Ports in *Arabia*.

They are alſo ſometimes ſeen in the *Indian* Sea, particularly at *Cambaya*, a maritime Town in the Territories of the *Great Mogul*; but with all this, and though the *Indians* and *Arabians* ſometimes bring their Goods to *Melinda*, it is properly by the Hands of the *Portugueſe* that all this Trade is tranſacted, which is but little leſs conſiderable than that of *Moſambique*.

The Gold brought from *Sofala*, the Ivory, Copper, Quickſilver, all Sorts of Silks and Cotton of *Europe* and the *Indies*, various painted Linens, eſpecially *Cambayan* Handkerchiefs, Spicery, Rice, and other Legumens and Fruits, are the principal Commodities brought to *Melinda*.

Of ABYSSINIA.

ABYSSINIA, better known to the ancient Geographers under the Name of the *Upper Ethiopia*, produces all Sorts of Commodities proper for the Support of a conſiderable Trade, either at Home or Abroad, if the natural Sloth of its Inhabitants did not hinder their benefiting themſelves by theſe Advantages.

Many Authors who have endeavoured to diſcover and fix the Situation of the celebrated *Ophir*, have thought to find it in the vaſt and rich Eſtates of this famous Empire; though I think Dr. *Garcin* has juſtly placed it elſewhere, as may be ſeen in the hiſtorical Introduction; however, it is certain, that *Ethiopia* is of a very great Extent, and would be one of the wealthieſt Empires in the World, if

if the People knew how to profit themſelves by the Treaſures that are hid in the Bowels of the Earth.

The Empire is compoſed of many Kingdoms, as that of *Tigre*, divided into twenty-four Provinces, *Abyſſinia*, and *Ajan* dependent on it. The *Portugueſe*, after they had taken the Iſland and City of *Ormus* in the *Perſian* Gulf, *Muſcate* on the Coaſt of *Arabia Felix*, and the Iſle of *Zocotora*, at the Entrance of the *Arabian* Gulf, ſoon opened a Paſſage to *Ethiopia*, and eſtabliſhed a conſiderable Commerce there, and where they afterwards tranſported many Families of their Countrymen to form there a Sort of Colony: The new Gueſts, becoming ſuſpected by the *Abyſſines*, were driven out, and all Trade forbidden with them. After this Expulſion, the Emperors of *Ethiopia* would not ſuffer their Subjects to have too ſtrict a Correſpondence with the *European* Nations, much leſs to permit any of theſe Nations to ſettle in the Country, under the Pretence of trading.

Gold, Silver, Copper, and Iron, are the Metals this vaſt Region of *Africa* produces; and other Commodities, are Cardamoms, Ginger, Aloes, Myrrh, Caſſia, Civet, Ebony, Ivory, Wax, Honey, Cotton, and Linens made of it of various Colours; and I might add, Sugar, Hemp, Flax, and excellent Wine, if theſe People, Demi-Barbarians, had the Art to prepare and boil the Cane's Juice, to cultivate the Vines, and preſs the Grapes, and to ſpin and weave their Hemp and Flax, as all theſe Things grow with them in Abundance, and of as good Qualities as in any other Part of the World.

Of the Trade of the African *Iſlands.*

THE principal Iſlands which Geographers attribute to *Africk* are *Madagaſcar*, the *Terceras* or *Azores*, *Madeira*, the *Canaries*, Cape *de Verd* Iſles, *St. Thomas*, *St. Helena*, *Zocotora*, and *Malta*; this laſt is in the *Mediterranean*, and the Reſt in the *Ocean*.

All theſe Iſlands are either poſſeſſed or frequented by the *Europeans*, who carry on a conſiderable Trade with them; that of *Madagaſcar* might be, as well for the Abundance of its rich Produce, as for its happy Situation in the Route to *India*, one of the moſt famous Iſles for Trade in the Univerſe, if the Ferocity of its Inhabitants, and the Intemperance of the Air and Sun, in the Places where the *Europeans* were at firſt ſettled, had not diſcouraged their Continuance. It is ſituated over-againſt and along that Part of the Continent of *Africk*, which the Kingdoms of *Sofala*, *Moſambique*, and *Melinda* compoſe, from whence it is diſtant in ſome Places a hundred, and in others but ſeventy or fewer Leagues.

The *European* Commodities fit for the Trade of this Iſle, are painted Linens, Silver, Copper, and Pewter, Rings and Bracelets, a Quantity of ſmall Mercery and Hardware, ſeveral Sorts of Glaſs Beads, particularly blue, red, white, green, yellow and Orange Colour, Brandy, *Spaniſh* and *French* Wine, Cornelians long and Olive ſhaped, red and white, large Braſs Wire, and ſmall Chains of ditto, Nails of all Sizes, and divers Tools, both for the Smith and Joiner, as well as Locks, Hinges, *&c.*

The Goods to be had there in Exchange conſiſt of ſeveral Sorts of Gum, ſuch as Gutti Tacamahaca, various Species of Dragon's Blood, *&c.* different Woods, Wax, raw Hides, Sugar, Tobacco, Pepper, Cotton, Indigo, Ambergris, Incenſe, Benzoin, Palma Chriſti Oil, green Balm for Wounds, Saltpetre, Brimſtone, white Cinnamon, Civet, Rock Cryſtal, Blood Stone, Touch-Stone, Terra Sigillata, ſeveral Boles, Matts of Ruſhes, and Flax, and even of Silk; but the Culture or Search after theſe Things being neglected by the Natives, and the *Europeans* who are eſtabliſhed among them not having been more induſtrious, they have not been benefited by theſe Riches, which ſome Pains and a little Time would eaſily have ſecured to them.

Some alſo count Gold, Silver, and precious Stones among the natural Products of this Iſle; but that any of theſe Metals are found here is very uncertain, and all the precious Stones are very imperfect.

Of

Of the Azores, Madeira, Cape de Verd *Iſles and* St. Thomas.

AS all theſe Iſles appertain to the Crown of *Portugal*, I have judged it beſt not to ſeparate them in relating the Trade carried on to them.

The *Azores*, called alſo the *Terceras*, from the principal of them, are nine in Number, *viz. Flores*, *Cuervo*, *Fayal*, *Pico*, *St. George*, *Gratioſa*, *St. Mary's*, *St. Michael*, and *Tercera*. Theſe Iſles lying between the two Continents of *Europe* and *Africa*, oppoſite to the Coaſts of *Portugal*, were diſcovered in 1439, or 1449, by the *Portugueſe*, uninhabited; who deeming them fit for Culture, they immediately ſettled Colonies on them, and their commodious Situation in the Way to the *Indies* and *Brazil* did not a little contribute to the ſpeedy peopling them, and eſtabliſhing a conſiderable Commerce, eſpecially at *Tercera*, which is the Governor's Reſidence, and a Biſhoprick.

The City of *Acra* is the ſole Port in this Iſle, inacceſſible in all other Parts, where all the *European* Ships anchor, and where the Products not only of this, but of all the other Iſlands are brought, though, however, the Ships often touch at the other Iſles, to purchaſe Goods at firſt Hand, or to take Refreſhments. Wheat, Wine, Woad, Potatoes, and Hides, are the principal Commodies they afford; but it is on the Woad that the Inhabitants of *Tercera* found their chief Buſineſs; there is notwithſtanding a large Quantity of freſh Oranges and Lemons exported from theſe Iſles, and a ſtill greater preſerved, with ſeveral other Species of Sweet-meats, of which thoſe at *Fayal* are eſteemed the beſt, and the *Dutch* yearly load ſeveral Ships with theſe Commodities.

The Imports there from *Portugal* are all Sorts of Mercery, Linens, Stuffs, Fuſtians, Silk Stockings, Rice, and Paper, with ſome Oil and Salt; and the Inhabitants likewiſe purchaſe conſiderable Parcels of *Canary* and *Madeira* Wine, their own being weak and inſufficient for their Conſumption; the Woollens uſed formerly to be carried all from *Europe*, but within theſe fifty Years there are ſeveral Fabricks ſet up in the Iſle of *St. Michael* for Cloths, Druggets, Camlets, Serges, and Hats, beſides ſome Silk Stuffs, in Imitation of thoſe made at *Lyons* and *Tours*, which has ſometimes nearly ſufficed for the Iſland's Supply; and the flouriſhing Condition they were in, in 1717, induced ſome People to think, that this Colony, contrary to what has been experienced in all others, would ſoon ſupply its Mother-Country with the Commodities this had till then received from it. But as the Fabricators were frequently in Want of Wool and Silk to keep their Looms going, it muſt certainly be a Damp to them, and gave the *French* Hopes of retrieving a Trade they formerly carried on by the Way of *Liſbon*, to their no ſmall Advantage.

The Returns made to *Liſbon*, beſides thoſe of theſe Iſlands' Growth, are Gold Coin from *Brazil*, and the other Products of that Part of *America*, ſuch as white and Muſcovado Sugars, Jacaranda, and other Woods, Cacao, *&c.*

The *Engliſh* now carry on the greateſt Trade to the Iſland of *Tercera* of any Nation, where they lade the afore-mentioned Goods, in Return for Woollens, Iron, Herrings, Pilchards, Butter, Cheeſe, and Salt Meat.

Madeira, ſituated on the Coaſt of *Africk*, to the Southward of the *Canaries*, among the Number of which the Pilots generally place it, and from which it is only diſtant about ſixty Leagues, was diſcovered by the *Portugueſe*, in 1410, or 1420, to be an impenetrable Foreſt; ſo that before they could ſettle here, and cultivate it, they were obliged to ſet Fire to it, though this Expedient had like to have coſt thoſe who compoſed this Infant Colony their Lives, by the exceſſive Heat in their Barks where they retired, and continued whilſt the Wood was burning; but having afterwards effected their Settlement, the Iſland is become one of the moſt fertile and populous of any in the Ocean; and produces Plenty of Corn, Wine, Sugar, Gums, Honey, Wax, Hides, all Sorts of Fruits, freſh, dry, and candied, eſpecially Citrons, Lemons, and Pomegranates, Yew and Cedar Plank, *&c.* and its Imports are ſuch of the *European* Goods as have been before-mentioned for the other Iſlands.

The

The *Cape de Verd* Iſles, diſcovered by the *Portugueſe* in 1472, ſome ſay in 1572, are to the Number of ten, *St. Jago*, *St. Antonia*, *St. Lucia*, *St. Vincent*, *St. Nicholas*, the *White* Iſle, the Iſle of *Salt*, *Mayo*, *Fuego*, and *Buena Viſta*. They are often called the *Green* Iſlands, from the continual Verdure that covers them, and ſometimes the *Salt* Iſlands, on account of the Quantity made of this Commodity, not only on the Iſle bearing that Name, but on ſome of the others; *St. Jago* is the Capital, and Reſidence of the Governor, who is a Sort of Vice-Roy, and commands all that the King of *Portugal* poſſeſſes in *Africa*, from Cape *Verd* to the Cape of *Good Hope*.

The *European* Nations, which trade to the *Eaſt-Indies* and *Africa*, commonly touch at theſe Iſlands for Refreſhments, calling at *St. Jago* in Time of Peace, and contenting themſelves to water, *&c.* at *Mayo*, *St. Antonio*, *St. Vincent*, or the Iſle of *Salt*, when a War; the few *Portugueſe* ſettled in theſe latter receiving and dealing with them, at all Times willingly, though indeed they are in no Condition to oppoſe their Deſcent, if their Inclinations led them to it. Theſe Iſlands were mere Deſerts when the *Portugueſe* firſt began their Settlements, though they now produce in Abundance many Commodities fit to ſupport a conſiderable Trade, but more eſpecially raw Hides of Kids, Goats, wild Cows, *&c.* Cattle are ſo plenty, that ſeveral Ships are employed in carrying them to *Brazil*; and the annual ſalting of Fiſh caught near Cape *Verd*, keeps many Sailors at Work, as it does alſo Veſſels afterwards, for its Tranſportation to the Bay of *All Saints*, or *Fernambouc*. The Iſles of *St. Vincent* and *St. Antonio*, in particular, carry on a very lucrative Trade in the Oil they extract from Tortoiſes that come aſhore in certain Times of the Year, as well as in Ox Hides, which they dreſs in the ſame Manner with them in *Spain* and *Portugal*.

In fine, the Rice, Honey, *Turkey* Wheat, Oranges, Lemons, Pine-Apples, and ſeveral other delicious Fruits, as alſo the great Quantities of tame and wild Fowl, found here, not only ſerve for the Food and Regales of the Inhabitants of theſe Iſles, but alſo for the Traffick which they have with Strangers, who come here to water, or to trade.

The Iſle of *St. Thomas*, which the Negroes of the Coaſt call the Iſle of *Poncas*, took its new Name from being diſcovered on that Saint's Day, the 21ſt of *December*, 1465, in ſeeking to diſcover a Way to the *Eaſt-Indies*; and the King of *Portugal* ſent People there in 1467.

Its Capital is called *St. Thomas*; and although it is ſituated under the Line, and that the Heats are exceſſive, the *Portugueſe* have raiſed here one of the moſt flouriſhing Colonies they have in *Africk*; and its Situation appeared ſo commodious to the *Dutch*, for the Trade of *Angola*, and its neighbouring Coaſts, that they took it twice, *viz.* in 1610 and 1641, though they could not keep it; and the *Portugueſe* in a ſhort Time repaired the almoſt ineſtimable Damage which their Enemies did there on abandoning it. The *Portugueſe* were the firſt who inhabited and cultivated it, though at preſent the Negroes are by far the greateſt Number, and it is ſuppoſed might eaſily ſeize it, if their natural Sloth and Cowardice, joined to their Aptitude for Slavery, did not render them incapable of ſuch an Enterprize.

Sugar Canes and Ginger grow here, as well as at any Place in the World, and make the principal inland Trade of the Iſle; the *Portugueſe* cultivate them with extreme great Care, and notwithſtanding the exceſſive Heats of Sky and Sun, they are ſeldom deceived in their Expectations, as the Crop both of the one and the other is getting in every Month of the Year. Of brown Sugar here is commonly made from ſix to ſeven hundred Charges, of which there is yearly carried out of the Iſle near a hundred thouſand Roves, of thirty-two Pounds *Portugueſe* each, which is ſent to *Portugal*, wrapped up in its Leaves.

The other Products and Manufactures of the Iſle are divers Cotton Stuffs, proper for the Negro Trade on the Coaſt, Fruits, and particularly that called *Cola*, which is a Nut, in Taſte like a Cheſnut, and which is trucked with great Advantage at *Loanda*, *St. Paola*, and other Places in the Kingdom of *Angola* and *Congo*, from whence they are tranſported to a much greater Diſtance. The

Legumes of all Sorts arrive here to great Perfection: *Indian* Wheat, Millet, Manioc, of whoſe Roots the Caſſave is made, Melons, Potatoes, Figs, Bananas, Dates, Cacaos, Oranges and Lemons grow here in Abundance; the Sheep and Kids are excellent, but the Beef is ſmaller, and not near ſo fat as in *Europe*.

The *European* Commodities, which the *Portugueſe* carry to *St. Thomas*, are Linens from *Holland* and *Rouen*, or other ſimilar in Quality, Thread of all Colours, thin Serges, Silk Stockings, *Leyden* Camlets, *Niſmes* Serges, Hatches, Bills, Salt, Olive Oil, Copper Plates and Kettles, Pitch and Tar, Cordage, Sugar Moulds, Brandy, and all Sorts of diſtilled Liquors, *Canary* Wine, Olives, Capers, fine Flour, Butter, and Cheeſe.

Beſides the great Iſle I have now ſpoke of, ſome Pilots give the Name of *St. Thomas* in general to ſmall Iſlands, near, and even to ſome very diſtant: Of theſe the chief is *Prince*'s Iſle, diſcovered in 1471; that of *Fernando Pao Poo*, or *Port*, that of the *Aſcenſion*, and that of *Annabon*, or *Bon Anno*; it having been diſcovered on New-Year's Day, even that of *St. Helena*, although at a great Diſtance from that of *St. Thomas*, of which I ſhall treat in its Place; and in Reſpect of the other four, no Commerce is carried on with them, as the Ships bound to the *Eaſt-Indies*, only touch here for Wood and Water, or to catch Tortoiſes, when in Want of freſh Proviſions, and have many Sailors ſick; except *Annabon*, where the *Portugueſe* that are ſettled carry on a Trade in Cotton, which they gather in great Abundance here, as alſo Hogs, Goats, Poultry, Variety of delicious Fruits, Palm Trees, Tamarinds, Woods, *&c.*

Of the Canary *Iſlands.*

THESE are the ſame the ancients knew under the Name of the *Fortunate* Iſlands; whoſe Diſcovery nevertheleſs is reckoned only from the Year 1348 or at the utmoſt a Century before; they were in a Manner forgotten for ſeveral Ages, and as it were, loſt all that Time to the Nations of *Europe*, who had no Knowledge of them. The *Spaniards* are at preſent the Proprietors and have poſſeſſed them ever ſince 1522, when they were given up to them by the Succeſſors of their firſt Conquerors. They are ſituated to the Weſt of *Africa*, over-againſt the Kingdom of *Morocco*, being eighty Leagues diſtant from that Coaſt, and till lately were counted only ſeven in Number, of which the principal is called the *Grand Canary*; the other ſix are *Palma*, *Ferro*, *Gomera*, *Teneriffe* ſo famous for its Peak, or Mountain, ſuppoſed to be the higheſt in the World, *Fuente*, *Fortaventura*, and *Lancerotte*; but for ſome Years paſt *Clara*, *Lobos*, *Gracioſa*, *Raca*, *Alegranza*, and *Inffermo*, have been diſcovered and added. The Soil of theſe Iſles is extremely fertile in all Sorts of Grain, Fruits, and Legumes; particularly in thoſe excellent Wines, ſo much eſteemed over all *Europe*, where ſo large a Quantity is yearly tranſported: Mr. *Savary* ſays, that between us and the *Dutch*, an annual Export is made from thence of above thirty thouſand Tons of this pleaſant Cordial; and though I am convinced that the Quantity is very large, yet I cannot think it amounts to ſo much: Sugar is alſo cultivated here in Abundance, and in the *Grand Canary* only, twelve Mills are employed in grinding the Canes: and in Proportion on the other Iſles, ſo that here may be as much, or near as much made, as there is at *St. Thomas's*; the other Goods extracted from theſe Iſles are Honey, Wax, Goats Skins, Pitch, or black Gum, divers Sorts of Fruits, Sweetmeats, Poultry, great and ſmall Cattle, with a large Quantity of *Canary* Birds, which, though ſeemingly a trifling Article, yet ſwells the Amount of their Trade very conſiderably.

The *Engliſh*, who trade more here than all other Nations put together, in a Manner ſupply theſe Iſlands with all the *European* Goods they want, which conſiſt in Cloths, ordinary Camlets, Baiſe, moſtly Blacks and emerald Greens, Anaſcotes, black and white, Sempiternas, moſt blues, Lamparilla of all Colours, worſted Stockings, wove and knit, Hats, Gogonelles, Linen from *Holland* and *Hamburgh* of two or three Sorts, other fine and coarſe Linen, all Numbers of Thread, Houſehold Furniture, ſuch as Eſcrutoires, Cheſts of Drawers, Chairs, *&c.* Horſe Harneſs,

neſs, Pewter, Mercery, and Hardwares; *Iriſh* Hides, all Sorts of Silks, though moſt of theſe are now ſupplied from *Spain*, Men and Women's Silk Stockings, Ribbons, Wheat, Barley, Flour, and all Sorts of Pulſe, Herrings, Pilchards, Beef, Pork, Butter, Cheeſe, and Candles; with all which the other Iſles are ſupplied from *Teneriffe*.

And the *Engliſh* take in Return the *Malvoiſe* and dry Wines made here, of which in a good Year *Teneriffe* only produces above thirty thouſand Pipes, one-third *Malvoiſe*; and *Palma* and *Ferro*, fifteen or ſixteen thouſand Pipes each.

I have already mentioned, under the Trade of *Spain*, the Nature of the Galleons and Flota; and to this I ſhall now add, that beſides thoſe, ſeveral Ships are permitted annually to ſail from theſe Iſlands for the *Spaniſh America*, under the Limitations of carrying their Products with them, or returning with no other Commodities than thoſe of the Growth of that Country, and out of theſe Silver and Cochineal are excepted; however, they find Means to evade theſe Reſtrictions both going and coming, and the *Engliſh* have always Warehouſes of Goods here to ſupply the Demands made on ſuch Occaſions; theſe Ships have a Right to proceed to all the *Spaniſh* Ports in that Part of the World, except *Vera Cruz*, *Carthagena*, and *Porto Bello*.

Of St. Helena.

THIS Iſland it ſituated in the Weſtern Part of the *Ethiopian* Sea, in ſixteen Degrees, twelve Minutes, South Latitude, almoſt four hundred Leagues from the Coaſts of *Angola*, and thoſe of *Brazil*, though ſomething nearer *Africk* than *America*, and therefore Geographers have placed it to the former.

The *Portugueſe* diſcovered it in 1508, and left it for a Place of Shelter and Reſort, common to all Nations, who ſhould trade to *India*; after which the *Dutch* ſettled and then abandoned it for the more commodious Situation of the Cape of *Good Hope*, and the *Engliſh* have poſſeſſed it ever ſince; but as it affords nothing for Trade, more than the Refreſhments for the Ships that call there, I ſhall not add any Thing to what I have now ſaid about it.

Of Socatara *or* Zoccotara.

SEATED at the Mouth of the *Red* Sea, commonly called the Straits of *Babel-Mandel*, is the laſt of the *African* Iſles towards the Eaſt, and neareſt to the Continent of *Aſia*. This Situation placing it almoſt equidiſtant from theſe two Parts of the World, renders it very convenient for Ships that come from *India*, *Madagaſcar*, *Moſambique*, or *Melinda*, to trade with *Arabia-Felix*, or with *Aden*, *Mocha*, *Mecca*, and other Cities of the *Red* Sea. It produces, beſides, good Refreſhment of all Sorts, Aloes, the beſt in the World, Ambergris, Indigo, Civet, Incenſe, Dragon's Blood, and other Medicinal Gums, Rice, Tobacco, and Dates, of which latter they have ſuch Quantities as to ſerve them inſtead of Bread. All theſe Commodities the Natives either ſell to Foreigners, who touch there, or truck them againſt other Products of *Europe* or *India*.

Of Malta.

THIS Iſland, ſituated in the *Mediterranean* Sea, between *Tripoly*, of *Barbary*, and *Sicily*, is leſs known for its Trade, than for being the Habitation of the Military Order of *St. John of Jeruſalem*, who have poſſeſſed it ever ſince 1530; the Commerce of it is, however, pretty conſiderable; not by what it produces, as it is hardly better than a Rock, and conſequently cannot furniſh the Inhabitants with the Neceſſaries of Life, much leſs for the Support of a Traffick with Foreigners, by Way of Barter or Exchange; but this is done by the Importation of many *Engliſh*, *Dutch*, and *Italian* Ships, who carry here all Sorts of Goods for the *Malteſe* Uſe, or are freighted by their Merchants to load Corn, *&c.* in

Italy. The Iſland, however, produces Cotton in Plenty, of which the Natives make the fineſt Stockings and Women's Gloves I ever ſaw, Wax, and Honey, the laſt being of a ſuperior Quality to what comes from the other Parts, is greatly eſteemed, and was the Motive for giving the Iſland its Latin Name of *Melita*.

Of the COMMERCE *of* ASIA.

THIS is one of the largeſt and richeſt Parts of the World, whoſe Northern Boundary is the *Scythian* Ocean, or the Sea of *Tartary*, its Eaſtern the *Oriental* Ocean, the *Indian* Sea to the South, and to the Weſtward, the *Red* Sea, the Iſthmus of *Suez*, the *Mediterranean*, the Canal of the *Black Sea*, the *Pont-Euxin*, the Sea of *Zabache*, the *Don*, and the *Oby*; being from Eaſt to Weſt about ſeventeen hundred and fifty Leagues, and from North to South near fifteen hundred and fifty.

Many Nations of this vaſt Continent, eſpecially thoſe who live in the Middle of it, and thoſe of the *Northern* Ocean, are very little known to us, and if we except the *Ruſſians*, who poſſeſs a Portion, and whoſe Caravans, ſince the Reign of the Czar *Peter Alexowitz*, have regularly departed every Year from *Peterſburgh* to *China*, and traverſe ſome Part of it, it may be ſaid, that the *Europeans* have no Trade there, and have only uncertain and fabulous Accounts of theſe Countries.

Though it is not ſo with Reſpect to the Southern and Eaſtern Coaſts of *Aſia*, of which I ſhall now briefly ſpeak, as they follow, from *Mocha*, the richeſt and moſt trading City of *Arabia-Felix*, to *China*, where the *Europeans* generally terminate their Voyages and commercial Enterprizes; reſerving nevertheleſs, the Liberty to make ſome Excurſions within Land, particularly for what regards the Trade of *Perſia*, the Empire of the *Grand Mogul*, that of *China*, the Kingdom of *Siam*, and ſome others; which, however, I ſhall touch on with the utmoſt Brevity. Afterwards I ſhall run over that great Number of Iſles lying in the Eaſt, whoſe Commerce in Spice, and other precious Commodities, is rendered ſo famous, and annually attracts ſo great a Number of Ships, as well from all the *European* as *Indian* Nations.

With Reſpect to the Eaſtern Coaſts of *Aſia*, which are waſhed by the *Mediterranean*, *Black* Sea, and the *Archipelago*, I ſhall excuſe ſaying any Thing more about them here, having before joined this Commerce to that of *Europe*, to which my Reader may have Recourſe, particularly where the Trade of *Conſtantinople*, *Caffa*, *Aleppo*, &c. is treated of.

I ſhall, therefore, begin this Traffick of *Aſia* with the Cities of *Arabia-Felix*, ſeated on the *Red Sea*, or in the *Ocean*, near its Mouth; as *Mecca*, *Mocha*, *Aden*, and ſome others; and afterwards enter the Gulfs of *Ormus* and *Baſſora*; where we find *Baſſora*, *Ormus*, *Gameron*, or *Bender-Abaſſi*, dependent on the Empire of *Perſia*, which we ſhall viſit even to its Capital.

The Coaſts of *India*, both on this and the other Side of the *Ganges*, will afterwards follow, and then ſurvey thoſe of the *Grand Mogul*, eſpecially in the Kingdom of *Guzurate*, where are ſeated *Amedabath*, *Cambaye*, *Surat*, *Daman*, &c. After them *Bengal*, *Decan*, of which *Goa* is the Capital, *Malabar*, of which the chief Cities for Trade are *Calicut*, *Cranganor*, and *Cochin*, the Coaſt of *Coromandel*, which has *Narſinga* and *St. Thomas*, the Kingdom of *Golconda*, thoſe of *Pegu*, *Siam*, and *Tanaſſerim*.

In Fine, *Malacca*, *Cochinchina*, *Tonquin*, and *China*, with which I ſhall finiſh the Trade of this vaſt Continent.

The *Aſiatick* Iſles, whoſe Trade I here propoſe to treat of, are the *Maldives*, which firſt preſent themſelves in the direct Route from *Europe* to the famous Cape *Comorin*; thoſe of *Celen* and *Maynar*, which almoſt touch the Cape. The three Iſles of the *Sund*, viz. *Sumatra*, in which is the Kingdom of *Achen*, and ſeveral others, *Java*, ſo celebrated for that of *Bantam*, and yet more for the famous City of *Batavia*, and the Iſle of *Borneo*. The *Philippines*, called the *Manilles*. The *Moluccas*, ſo fruitful in Spice. The *Ladrones*, which are in the Track from *America* to *India* by the *South Seas*, and the Iſles of *Japon*, or *Japan*,

Japan, from whence all *European* Nations are excluded except the *Dutch*. And as I have already occaſionally mentioned ſomething of the *Eaſt-India* Trade, I ſhall avoid repeating it here, but only now add, what I before omitted concerning it. And previous to my Entrance on this propoſed Detail, I ſhall ſpeak a Word concerning *Burſa*, which was omitted in the Article of the *Levant* Trade.

Burſa, which is the Capital of the ancient *Bithynia*, is ſtill one of the fineſt and largeſt Cities in the *Grand Signor's* Dominions, ſeated on the Sea of *Marmora* in *Natolia*.

Its Caravanſeras, or Inns, are vaſt and commodious, and its *Bezeſtan*, with its rich Shops, reſembles the Saloons of a Palace, by the Quantity of Merchants, and Goods exhibited to view there. The moſt able Workmen of all *Turkey* are at *Burſa*; its Manufactures of Silk Stuffs are admirable; but its Carpets and Tapeſtry, worked on Deſigns ſent from *France* and *Italy*, are above all eſteemed. Silk is gathered here in Abundance, and of the beſt Quality that the Eſtates of the *Grand Signor* produce; here is alſo ſome Gum Adragant, which is collected at *Caraiſſai*, or *Chateau Noir*, about four Days' Journey from this City.

The Trade of ARABIA.

THIS Part of *Aſia* has at leaſt thirteen thouſand Leagues of Circuit, and is divided into *Arabia Deſerta*, *Arabia Petræa*, and *Arabia Felix*; this laſt which is almoſt as big as the other two, and which it alſo ſurpaſſes in Riches and Number of Inhabitants, is beſides diſtinguiſhed for its Commerce, which is one of the moſt conſiderable in all the Eaſt.

Its chief Cities, and thoſe moſt noted for Trade are *Mocha*, *Hidedan*, *Chichiri*, *Zibet*, and *Ziden* on the *Red* Sea; *Aden*, *Fartack*, and *Maſcate*, on the *Ocean*, or *Arabian* Sea; *Bahr*, *Barhem*, and *El-Catif*, in the Gulf of *Baſſora*; in Fine, *Baſſora* at the Bottom of this Gulf; but as this laſt is in *Arabia Deſerta*, I ſhall deſcribe it when I come to treat of that Province.

I might here add *Mecca* and *Medina*, Places which the *Mahometan* Zeal has ſeparated as holy, and which are alſo rendered famous for the immenſe Riches annually brought here by five Caravans, partly through the Devotion of Pilgrims, and partly by the Merchants for Trade; but the Entrance into theſe two Cities being prohibited on Pain of Death to any Chriſtian, and the *Europeans* conſequently having no Commerce here, I ſhall content myſelf with informing my Reader, that the Buſineſs which the *Muſſulmen* Nations of *India* and *Africk* carry on here is by *Ziden*; this being properly the Port of *Mecca*, although it is at leaſt twenty-five Leagues diſtant; and by *Mocha*, which ſerves as its Storehouſe, or Staple.

Mocha, ſituated at the Entrance of the *Red* Sea, in thirteen Degrees eighteen Minutes of North Latitude, is at preſent a City of the greateſt Commerce in all *Arabia-Felix*, where it was transferred to from *Aden*, about the Middle of the 16th Century. There are hardly any maritime Nations, either of *Europe*, *Aſia*, or *Africa*, who do not ſend Ships to *Mocha*; the *Engliſh* and *Dutch* generally ſend their's here, from the Places in *India* where they are ſettled, as the *French* did when their Commerce was moſt flouriſhing, but they now go there directly. The other Veſſels brought here by every Monſoon, which are often fifty or more in Number, commonly come from *Goa*, *Diu*, *Touvel*, *Dabul*, *Goga*, *Calicut*, *Achen*, *Maſulipatam*, *Nevega*, *Promiens*, *Cadts*, *Moſambique*, *Melinda*, and *Ethiopia*, all laden with the richeſt Products of the Places from whence they ſail, or that their Freighters have collected from the moſt remote Parts of the Eaſt, as from *China* and *Japan*; beſides which Maritime Trade, a very great and rich one is carried on by Land, by Means of the Caravans from *Aleppo* and *Suez*, that arrive in the Month of *March*. They are commonly two Months on their Journey, and generally join on entering *Arabia*, making Part of thoſe that conduct the Pilgrims to *Mecca* and *Medina*, but which, till then, are only compoſed of Merchants and Goods.

About a thouſand Camels ſerve to tranſport theſe Merchandize, Eatables, and other Neceſſaries for the Merchants, and the Troops, which go as an Eſcorte to

defend them againſt the *Arabs*; and theſe Caravans are eſteemed but indifferently rich, if they carry leſs in ready Money than two hundred thouſand Dollars, and a hundred thouſand Ducats of Gold, either *Hungarian*, *Venetian*, or *Mooriſh*; and this is only to be underſtood of what is entered at the Cuſtom-houſe, there being always near as much more unregiſtered, and carried by Stealth, to ſave the Duties, which are very conſiderable. The Goods which theſe Caravans convey are Velvet, Sattins, Armoſins, Gold, *Levant* Stuffs, Camlets, Cloths, Saffron, Quickſilver, Vermillion, and Merceries, from *Nuremburg*. The Royal Ship, laden yearly for the *Grand Signor's* Account, from *Suez*, brings alſo the ſame Commodities as the Caravans, with the Addition of ſome *Muſcovy* Hides, Pewter, Fonwa, a Drug to dye Scarlet, and about four hundred thouſand Dollars, though but fifty thouſand Ducats.

The Goods which the Caravans, Royal Ship, and other foreign Veſſels lade at *Mocha*, in Return for thoſe brought here, are partly the Products and Manufactures of *Arabia*, and partly what have been introduced by Ships from *India*, *Africa*, and *Europe*. The *Arabians* furniſh but little towards this Commerce of their own Manufactures, as they have only ſome Cotton Cloth, and this but coarſe; though, in Recompence of the ſaid Defect, their Growths ſupply many valuable Commodities, as Incenſe, Myrrh, and Ambergris, Aloes, Balm, Caſſia, Dragon's Blood, Gum Arabick, Coral, and a Quantity of Plants, both medicinal and odoriferous, precious Stones, eſpecially *Baharem* Pearls, but above all, Coffee, which, beſides being of the beſt Quality, is ſo plenty as to lade many Ships with it yearly, of which this Port is generally full from all Parts, and under all Colours, as from *Surat*, *Cambaye*, *Diu*, *Malabar*, and all Places in *India*; here are alſo Veſſels of *Caſſen*, *Socotra*, *Maſcate*, and all the Gulf of *Perſia*; and of the *Europeans*, *Engliſh*, *French*, *Dutch*, *Danes*, and *Portugueſe*; and beſides the Merchants of the above-mentioned Nations, this is the Rendezvous of many from *Barbary*, *Egypt*, *Turkey*, and all *Arabia*, and may properly be termed a general Magazine, where the Merchandizes of an univerſal Trade are depoſited.

Aden formerly enjoyed all the Advantages in Trade that *Mocha* now does, by a Transfer from the other; and is the only Port that the *Grand Signor* has upon the Ocean; its Situation near the Mouth of the *Red* Sea renders it a Harbour common to both, which ſtill attracts a conſiderable Trade from the *Arabians*, *Perſians*, and *Indians*, as it ſome Time ago did from the *Dutch*, till their own Plantations of Coffee proved almoſt ſufficient to ſupply their Demands, and conſequently ſlackened their Intercourſe with other Nations for it.

Chichiri, or *Chiriri*, is ſeated higher than *Aden* in the *Perſian* Gulf, and is the firſt City in *Arabia Felix*, where the *Dutch* uſed to Trade before their correſponding with *Aden*.

This City has an *Emir*, or *Arabian* Sultan for its Sovereign, although tributary to the *Turks*, to whom he pays annually four thouſand Dollars, and twenty Pounds of Ambergris. The Veſſels from *India*, *Perſia*, *Ethiopia*, and the Iſlands of *Comorre*, *Madagaſcar*, and *Melinda*, are thoſe that moſtly frequent this Place, whoſe Imports and Exports being ſimilar to thoſe of *Aden*, a Repetition of them here is ſuperfluous.

Maſcate is a City in *Arabia Felix*, ſituated to the Weſtward of *Mogol* in the Gulf of *Perſia*, in the Latitude of twenty-three Degrees thirty Minutes North, directly under the Tropick of *Cancer*, and is a Place of greater Trade than any other near the Gulf of *Ormus*. The Pearl Fiſhery hard by the Iſle of *Baharam*, in the Months of *June*, *July*, and *Auguſt*, is alone capable of enriching the City greatly; but beſides this, it has the Advantage of being a Depoſitary of all the Drugs, and Merchandize of *Arabia*, tranſported from hence to *Perſia*, *Egypt*, *Syria*, the *Indies*, and even to *Europe*.

Caſſen has its Ports open and expoſed to an Eaſt Wind, though ſheltered from the Weſt; its Trade is but inconſiderable, and this under the King's immediate Direction; ſome Veſſels come here with Rice, Dates, and a Sort of Clothing made of Hair in *Perſia*, which Goods are exchanged for Oliban, Aloes, and Butter; and the propereſt Time for this Commerce is in the Months of *May*, *June*, and *July*.

Ser;

Ser; the Trade of this City, not far from the laſt mentioned, is very conſiderable; its Inhabitants are friendly to Strangers, and its Port being a very good one, attracts the Ships from ſeveral Parts, eſpecially from *Maſcate*, *Cameron*, *Surat*, *Galla*, and other Places on the Coaſt of *Ethiopia*; the Merchandizes exported from hence are Butter, Myrrh, Slaves, Oliban, Aloes, and other Drugs that *Arabia* produces.

Moſeck, diſtant from *Mocha* about ten Leagues, has loſt its Trade by the Proximity, and now hardly deals in any Thing but Salt.

Hodecda, is an Iſle in the Latitude of fourteen Degrees fifty Minutes, that has a Creek proper for the Conſtruction of Ships, and a ſecure Port; theſe Advantages draw a tolerable good Trade here, particularly in Coffee, brought from *Zidda*, *Mocha*, and other Parts.

Gezeon; the Pearl Fiſhery renders this Place famous, and its Trade flouriſhing, of which the *Banians* have the Direction, with very conſiderable Profits.

Ferſham is an Iſland about three Leagues diſtant from *Gezeon*, which, beſides the Pearl Fiſhery, has a great Trade in Wheat, with which it ſupplies all Parts of *Arabia*.

Judda, or *Zidden*; this is properly, as has been before obſerved, the Port to *Mecca*; its Trade conſiſts chiefly in Coffee brought here by the *Arabians*, and bought by the *Turks*, who take it off, almoſt all; though here are alſo Merchants of *Mogul*, *Perſia*, and ſeveral Places on the Coaſts of *Ethiopia*.

Of the Trade of the Gulf of PERSIA.

THIS Gulf, called alſo the Gulf of *Ormus*, from the Iſle of *Ormus*, a very little Diſtance from its Entrance, Gulf of *Baſſora*, from a City of this Name in *Arabia Deſerta*, at its other Extremity, and the Gulf of *El-Catif*, from a Kingdom in *Arabia Felix*, extending along the Coaſt, oppoſite to that of *Perſia*, is equally celebrated for its Pearl Fiſhery, near the Iſle of *Baharem*, as for its great Commerce with all the *Oriental* and *European* Nations, who ſend their Ships either to *Bender-Abaſſi*, or *Baſſora*.

The City and Iſle of *Ormus*, although quite fallen from its former Luſtre, and entirely deſtroyed by Order of *Cha-Abas*, after his retaking them from the *Portugueſe*, merit however to be mentioned, as due to the Memory of what they once were, and the Rank they for a long Time maintained among the moſt trading Iſles and Cities of *Aſia*.

This Iſle, ſeated in the *Perſian* Gulf, pretty near its Mouth, and two Leagues from the Coaſt of *Perſia*, has little more than twenty Leagues Extent; yet it bore for a conſiderable Time the Title of a Kingdom, with its own Monarchs, Tributaries however to the King of *Perſia*.

The *Portugueſe*, who judged this Port neceſſary to their infant Commerce in the *Indies*, took it in 1507, and hereby ſhut up the Entrance to *Perſia* againſt all other Nations, as no Perſon was henceforward permitted to traffick there without their Paſſport, or under their Colours; and whilſt they, of all the *Europeans*, remained Maſters of the *Indian* Trade and Navigation, the *Perſians* did not find themſelves in a Condition to ſhake off this Yoke, which theſe new Comers had put on one of the moſt famous Empires of *Aſia*. But the *Dutch*, having followed the *Portugueſe* to *India* in the latter End of the ſixteenth Century, and the *Engliſh* at the Beginning of the ſeventeenth, the Emperor *Cha-Abas* availed himſelf of the Aſſiſtance of theſe latter, to drive the Enemies from their Iſle, which they were obliged to ſurrender in 1622, having loſt, as they pretend, at its Taking, more than ſix or ſeven Millions in Merchandize, and other Effects.

Gameron, *Gamron*, or *Gambrown*, the Port of all *Perſia*, and perhaps of all *Aſia*, where the greateſt Trade is tranſacted, was quite diſregarded, till the *Portugueſe* were driven out of *Ormus*; as before that Occurrence, this was only a ſmall Village with about fifty miſerable Huts, where the *Portugueſe*, however, kept twenty-five or thirty armed Barks, on Account of the Goodneſs of its Port, and to maintain their own Commerce, and hinder that of others.

Cha-Abas fortified the Port, and began to build the City, and by Privileges and Immunities drew Trade here, changing its Name, and calling it after his own. This Port is open to all Nations, except the *Spaniards*, and *Portugueſe*; and here are ſeen, *Perſians*, *Arabians*, *Indians*, *Banians*, *Armenians*, *Turks*, *Jews*, *Tartars*, *Moors*, *Engliſh*, *French*, and *Dutch*.

The trading Time is from the Month of *October* when the great Heats are over, to the Month of *May* when they recommence, and at this Seaſon the Ships of all the *Europeans* eſtabliſhed in *India* arrive, and many others appertaining to *Indians* and *Moors*; and by Land at a fixed Day, are ſeen coming here, divers Caravans of Merchants, from *Iſpahan*, *Schiras*, *Laon*, *Aleppo*, *Bagdat*, *Herat*, *Baſſora*, &c.

The *Engliſh* began their Trade to *Perſia* in 1613, and were ſo much the better received, as the *Grand Abas* then formed the Deſign of engaging their Aſſiſtance to diſlodge the *Portugueſe* from *Ormus* and other Parts, and for that Purpoſe entered into a Treaty with our Countrymen, that entitled them to many Privileges, which have however been very ill obſerved; for as ſoon as the *Perſian* Monarch had his Turn ſerved, he forgot, or rather ſlighted his Engagements; and though he ſtill continued to prefer the *Engliſh*, it was not in the Manner, and to the Degree, as was promiſed, or their Service deſerved.

They now carry to *Perſia* Silver, a large Quantity of Cloth, Pewter, Steel, Indigo, Silk Stuffs, and the fineſt and moſt beautiful *Indian* Cottons.

The *Dutch* Cargoes conſiſt of *Spaniſh* Dollars, and Rixdollars, Goods that they receive from *Europe*, and what they collect from their different Settlements in *India*, but above all, Spices, with which they ſupply all *Perſia*; Siampan, Anis, and Santal Woods, Ginger, Indigo, Vermillion, Incenſe, Benzoin, Quickſilver, Lead, Pewter, Copper, coloured Cloths and Linens.

The *Indian*, *Arabian*, and *Mooriſh* Veſſels are laden with the Products and Manufactures of their Countries, and the Goods that come by the Caravans, conſiſt of various Gold and Silver Stuffs, Velvets, Taffeties, Porcelaine, Feathers, *Morocco* Leather, Wool, Brocades, Carpets, *Turkey* Camlets, and other ſlighter ones from *Arabia*, Medicinal Drugs, Dragon's Blood, Manna, Myrrh, Incenſe, Raiſins, Dates, *Barcun* Horſes, but particularly raw Silk, which is the greateſt Article in the *Perſian* Trade; here are alſo found Turquoiſes, and Pearls, of which latter I ſhall have Occaſion to ſpeak more hereafter.

All Nations trading to *Gamron*, have their Houſes and Magazines here; thoſe of the *Engliſh*, *French*, and *Dutch*, having more the Air of Palaces than Merchants' Offices and Habitations, and are ſeated along the Sea Side, which is very convenient for the lading and delivering their Ships, as they arrive.

Perſia has ſtill ſome other Ports in its Gulf, but much leſs conſiderable than *Bender-Abaſſi*, which has attracted almoſt all the Commerce of theſe Parts.

Congre, or as ſome call it *Bender-Congo*, or *Bender-Erric*, is alſo in ſome Reputation, and Strangers ſend their ſhips, or conduct their Caravans here; the chief Trade is however in Pearls, and Boles for dying and painting Green and Red, which are gathered from little Hills of theſe Colours, in a Mountain a few Leagues from the City, called by the Natives *Chiampa*.

Baharem, is an Iſland in the *Perſian* Gulf, ſeated over againſt the Coaſt of *Arabia* from which it is but a little diſtant, belonging to the King of *Perſia*.

The Soil is fertile, and produces plenty of Fruit, particularly Dates, though the Water has ſo bad a Taſte that Strangers cannot uſe it, and the Divers who frequent this Place are obliged to ſeek it elſewhere. It is not the Fertility of the Iſle, nor the Trade carried on here, that render it ſo famous in all the Eaſt, and oblige the *Perſians* to have a Citadel, and to keep a Garriſon of three hundred Men here; but the Pearl Fiſhery, which is near it, produces at leaſt a Million yearly.

This Fiſhery begins with *June*, and ends with *September*, in which Pearls of a large Size are ſometimes taken, even to the Weight of fifty Grains, though in common from ten to twelve; and thoſe that exceed this, ought to be ſeparated for the King, though herein he has not always Juſtice done him.

Baſſora, or *Balſora*, is ſituated on a River named by the *Arabians Schat-el-Arab*, which is formed by the Union of the *Euphrates* and *Tigris*, that join a good

good Day's Journey above this City, and ſo united empty themſelves into the *Perſian* Gulf, Twelve Leagues below it. This place is rich, and of greater Trade than any one in *Arabia Deſerta*, and its Poſſeſſion having been for a long Time diſputed by the *Arabians*, *Perſians*, and *Turks*, theſe latter remained Maſters of it.

Baſſora, like *Bender-Abaſſi*, gained conſiderably by the Deſtruction of *Ormus*, and here are now ſeen Ships from all Parts of *Aſia*, and *Europe*, and eſpecially among theſe laſt, the *Engliſh* and *Dutch* make a conſiderable Figure, they having their Factories here, to tranſact their Buſineſs, and Diſpatch their Letters by Land, which is done by the Way of *Damas* and *Aleppo*. The *Portugueſe* alſo have a Settlement here, though to very little Purpoſe.

Almoſt all the Trade paſſes through the Hands of *Indians*, *Perſians*, and *Armenians*. The Caravan of *Baſſora* is one of thoſe that carries to *Bender-Abaſſi* a Part of thoſe rich Goods, with which that Trade is ſupported: And the ſame Caravan brings back, on its Return, the Products of *India*, *China*, *Japan*, and *Europe*, of which *Bender* is, as has been before obſerved, a Depoſitary, Staple, or Storehouſe for *Perſia*, and the three *Arabias*.

Beſides this Commerce with *Bender-Abaſſi*, and that which *Baſſora* maintains on the Sea Coaſt with the *Indians*, *Moors*, and *Europeans*, whoſe Ships arrive here every Mouſſon, this City has alſo a very conſiderable one with *Bagdat*, which is not at a great Diſtance, and is commodiouſly ſeated for a Tranſportation of its Commodities by the *Tigris*; and the ſame with *Aleppo*, and the Reſt of the *Ottoman* Empire in *Aſia*, from whence Caravans ſet out, and a Part of them always deſtined for *Baſſora*.

We might alſo place in the Number of thoſe Things that render this Trade flouriſhing, the paſſing here of the *Perſians*, in their Pilgrimage to *Mecca*, who commonly take this Route, and not only pay large Duties to the *Turkiſh* Baſhaw, but alſo exchange or ſell a Quantity of Goods here, which they bring in their little Caravans going and coming.

Of the inland Commerce of PERSIA, *and the States dependent on it.*

COMMERCE is regarded as an honourable Profeſſion in *Perſia*, where the Name of a Merchant is eſteemed a Sort of Title of Diſtinction, and ſomething reſpectable; the Noblemen, and even the ſovereign himſelf, do not diſdain to exerciſe the Function, and to have Warehouſes, *&c.* for carrying it on.

The Empire of *Perſia* is of ſo great an Extent, and its Provinces are generally ſo rich and abundant, that the Aſſertion of its Trade being one of the moſt conſiderable in *Aſia* has nothing ſurpriſing or incredible in it.

Iſpahan is as the Centre of this Commerce; it is from thence that the Caravans ſet out for carrying the Goods to *Bender-Abaſſi*, which the Factors of foreign Nations reſiding here have purchaſed for ſhipping. And it is here, where many yearly arrive, both from within and without the Kingdom, as from *Schiras*, *Laor*, *Aleppo*, *Bagdat*, *Herat*, *Baſſora*, and all thoſe from the *Levant*; and there are few Cities, where Trade attracts ſo large a Number of Strangers as this; of which the moſt conſiderable are the *Armenians* of *Zulfa*, a Colony which *Abas le Grand* eſtabliſhed in one of the Suburbs; and the *Indians*, of which here are more than a thouſand, who have their Shops in the *Meidan* or market, next the *Perſians*.

Here are alſo ſettled though leſs numerous, *Engliſh*, *French*, *Dutch*, *Italians*, *Spaniards*, *Tartars*, *Arabians*, *Turks*, *Georgians*, *Perſians* from all the Provinces of the Empire, and *Jews*.

There are no Sorts of Goods, which may not be found in *Iſpahan*; but the greateſt Trade it drives is in Silk, of which an almoſt incredible Quantity is annually gathered in *Perſia*. The Provinces which produce moſt, are *Guillan*, *Meſanderan*, *Media*, *Bactria*, *Caramania*, and *Georgia*, which all together may produce about twenty-two thouſand Bales of two hundred and ſeventy-ſix Pounds each, with an appearance of its yearly increaſing.

This Silk is diſtinguiſhed into four Sorts, *viz.* *Chirvan* ſo called from *Chirvan* in *Media*, near the *Caſpian* Sea; and in *Europe* *Ardaſſe*, *Karvary*, or *Legis* gathered

thered at *Legiam*, a ſmall Town of *Guillan*, *Ked-Coda-Penſend*, or *Bourgeoiſe* and *Charbaſſe*, or *Brocard*. Of all which Silks, it is ſaid not above a thouſand Bales are uſed in the *Perſian* Manufactories, and the Reſt ſold for Tranſportation to *Turkey*, *India*, and all Parts of *Europe* and *Aſia*.

The Manufactures of Stuffs in *Perſia* are on a Footing with thoſe in *Europe*, excepting Cloths, of which there is no Fabrick eſtabliſhed, and the *Perſian* Manufacturers make of Felt, which they underſtand the working up, as well as any People, ſome Cloaks and common Carpets to cover the fine ones, for which they are juſtly ſo famous.

A very great Trade is carried on in *Perſia* with Cloths from *Europe*, brought by the *Engliſh* and *Dutch* to *Gamron*, among which are likewiſe ſome *French*, more eſpecially thoſe of *Berry* and *Uſſeau*.

The Stuffs the *Perſians* moſt commonly make in their Manufactories, are of Wool, Cotton, Goats' and Camels' Hair, and above all, Silk, with which they very often mix the three laſt Materials. The ſpinning, winding, and milling, are ſimilar to what is practiſed in *France* at *Lyons* and *Tours*, and the *Perſians* are intelligent in the Uſe of the Diſtaff, Spindle, Reel, and Mills, which ſerve in the ſaid two Cities, for the Silk's Preparation.

The Stuffs they make of pure Silk, are Taffeties, Tabbies, Sattins, Gros de Tours, Turbans, Ribbons, and Handkerchiefs. They make alſo Brocades, Gold Tiſſues, and Gold Velvets, of which laſt Sort ſome coſt fifty *Tomans* the *Gueſe* or *Perſian Aun*, which comes to about five Pounds Sterling *per Engliſh* Yard, and is certainly the deareſt in the World. The fineſt *Perſian* Carpets are made in the Province of *Kirman*, eſpecially at *Siſtan*; and among the Stuffs made of Silk only, there are many painted with various Deſigns, and ſome heightened with Gold and Silver, applied with Moulds and Gum Water, which they underſtand ſo well performing, as to make them almoſt appear true Brocades.

The Woollen Manufactures, or thoſe of Camels' Hair, are for the moſt Part eſtabliſhed at *Yeſde*, *Kirman*, and *Mongnay*; the Wools of *Kirman* being the fineſt in the World. The Goats' Hair Stuffs are made in *Hircania*, and reſemble Baragons, the fineſt coming from *Dourak* in the *Perſian* Gulf.

The other Goods which the *Perſians* ſend abroad beſides their Silks and Stuffs, are Porcelaines, Feathers, *Morocco* Leather, Cotton Wool, or Thread, Chagrin of all Colours, Tobacco, Galls, Matts, Baſkets, Things wrought in Box, Iron and Steel of *Caſbin*, and *Koraſan*; Furs, Lapis Lazuli which comes from the *Uſbecks*, but of which *Perſia* is the Storehouſe, Perfumes, eſpecially Ambergris and Muſk both Productions Strangers to *Perſia*, but found here in great Abundance, the one brought from *India* and the *Red* Sea, and the other from *Tibet*. Pearls from the *Perſian* Gulf, Turquoiſes, all Sorts of Spices brought by the *Dutch* to *Bender-Abaſſi*, Saffron the beſt in the World, particularly that from the Coaſts of the *Caſpian* Sea, and *Amadan*, Allum, Brimſtone, diſtilled Water of Orange Flowers, Roſes, *&c.* Glaſs, Cryſtal, divers Animals' Skins prepared at *Schiras*, Coffee brought there from *Arabia*. In fine, Variety of Medicinal Drugs and Gums, which either grow or are brought here; and among the products of *Perſia*, and as Part of her Merchandize, the excellent Wines of *Schiras* and *Yeſde* ſhould not be forgotten, as the *Perſians* do not conſume the whole themſelves though the great Men here are very much given to Inebriety, notwithſtanding the Alcoran's Prohibition; but they are tranſported annually to a very conſiderable Value all over *Indoſtan*, and even to *China*. Piſtachoes and Almonds grow plentifully in *Yeſde*, *Caſbin*, and *Sultania*; and of Camels, Horſes, Mules, and Lambs, large Quantities are yearly ſent into the Dominions of the *Grand Signor*, to *Indoſtan*, and to other Parts of *Aſia*. All that has been here ſaid of the Trade of *Perſia*, muſt be regarded as a Deſcription of it before the Revolution in 1721; and as the Troubles in that Kingdom ſtill continue, the Commerce there is not only interrupted, but in a manner loſt, eſpecially to the *Europeans*, and muſt remain ſo, till Peace the Parent of it reſtores Tranquillity, and places Trade on the footing it formerly was.

Of

Of GEORGIA *and* MINGRELIA.

THERE is hardly any Country in all *Aſia*, more abundant in Cattle, wild and tame Fowl, Fruits, Wines, and indeed all the Neceſſaries of Life, nor where they are in greater Perfection, than in *Georgia*. Its Wines, particularly thoſe of *Teflis* its Capital, are tranſported to *Armenia*, *Media*, and even to *Iſpahan*, where a Quantity of it is always reſerved for the King's Table: Silk is gathered here in Plenty, but the *Georgians* not underſtanding its Preparation, nor having hardly any Artificers among them to manufacture it, they carry it among their Neighbours, and drive a great Trade with it at *Arzerem* in *Turkey* and thereabouts.

The Lords in *Georgia* being Maſters of the Lives and Liberties of their Vaſſals, as the Fathers are of their Children, made a bad Uſe of their Power, by ſelling many thouſands of both Sexes yearly for Slaves, more eſpecially of the Females, who being all very beautiful, were purchaſed by the *Turks* and *Perſians* for their Seraglios; and this iniquitous Commerce was principally carried on by the *Armenians*. The *Turks* likewiſe ſent out large Parties of *Janiſſaries* to ſeize and carry off the Boys and Girls early; but ſince the Conqueſt of this Country by the valour of Prince *Heraclius*, who has made it independent, the female *Georgians* have been protected from this Violence, and preſerve their Liberty and their Chaſtity.

Mingrelia does not traffick leſs in Slaves than its Neighbour Territory, as above twelve thouſand of theſe unhappy Wretches are yearly diſpoſed of in this Manner, of which above three thouſand are purchaſed for *Conſtantinople*. The other Merchandizes that this Country produces, are Silk, Flax, in Linen and Thread, Linſeed, Hides, Martens' Skins, Caſtor, Box, Wax and Honey of two Sorts, the one white and the other red, though both exeellent; it is the *Turks* of *Conſtantinople*, and the Merchants of *Caffa*, *Gonia*, *Iriſſa*, and *Trebiſonde*, who carry on this Trade; and it is common to ſee twelve Sail yearly from *Conſtantinople*, and more than ſixty Feluccas from other Parts, which bring here ſundry Goods and Proviſion, to truck againſt thoſe of the Country, as very little or no Money intervenes in theſe Negociations, or any that are tranſacted by the *Mingrelians*.

The Goods proper for this Exchange, are Bracelets, Rings, Glaſs, or ſmall Necklaces, ſmall Knives, Pins, Needles, and other minute Mercery.

Brimſtone and Nitre are found near *Teflis*, as a foſſile Salt is, in ſome Mines in the Road to *Erivan*. Olive Oil is very dear, ſo that the Natives both eat and burn that of Linſeed; which is all the Uſe the *Georgians* make of this Plant, as they throw it away when the Seed is gathered, though they might have excellent Flax from it, did they not prefer the Cotton Cloth to Linens.

Avogaſia, Part of *Mingrelia*, is abundant in Flax, Hemp, Pitch, Wax, and Honey, though this laſt is commonly better, by Reaſon of the Bees gathering it from the Box and Yews that grow here in Plenty. Vermilion is found in an almoſt inacceſſible Rock; and it is in ſeveral Parts of this Province, that the true Rhapontick is met with, which many take for Rhubarb, and what diſhoneſt Druggiſts ſell for it.

Of ARMENIA.

THIS Kingdom, after many Revolutions, was at laſt ſubjected by the *Turk* and *Perſian*; and as I have already treated of that Part belonging to the *Schah*, I ſhall now ſpeak of the other under the Dominion of the *Grand Signor*, or at leaſt of the two principal Cities, which ſeem to have divided the Trade of all the Reſt of the Kingdom between them.

Erzerum, or *Erzeron*, Capital of the Part of *Turkiſh Armenia*, is a City of very conſiderable Trade, conſiſting chiefly of Copper Plates, Diſhes, *&c.* Furs, Galls, Caviar, and Madder. The *Engliſh* drive a great Trade here, and have a Conſul, who lives in a very handſome Manner.

Tocat is the ſecond City in *Turkiſh Armenia* for Trade, and is regarded as the Centre of it for *Aſia Minor*, where Caravans are inceſſantly arriving or depart-

ing; thoſe of *Diarbequis* are eighteen Days coming here, and thoſe from *Erzerum* but fifteen. Thoſe from hence to *Sinope* are but ſix Days going, and thoſe from *Burſa* twenty. The Caravans that go directly to *Smyrna*, without paſſing by *Angora*, or *Burſa*, are twenty-ſeven Days on the Road if with Mules, but forty if Camels are the Bearers; in fine, here are Caravans that go only to *Angora*.

The great Trade of this City conſiſts in Utenſils of Copper, as Kettles, Cups, Candleſticks, and Lanterns, which the Artiſans here work very neatly, and theſe Commodities are ſent to *Conſtantinople* and *Egypt*; the Copper they make Uſe of comes from the Mines of *Gumiſcana*, three Days' Journey from *Trebiſonde*, and from that at *Caſtamboul*, ten Days' Travel from *Tocat* towards *Angora*.

Here is prepared a Quantity of yellow *Morocco* Leather, which is carried to *Samſon* on the *Black* Sea, and from thence to *Calas*, a Port of *Valachia*, where are alſo ſent ſome red ones; but theſe the Merchants of *Tocat* procure from *Diarbeck* and *Caramania*. Painted Linens are alſo a great Object of Trade here; and although they are not ſo handſome as thoſe of *Perſia*, yet the *Muſcovites* and *Crim Tartars*, for whom they are deſigned, are contented with them; and the Commerce of Silk is not inconſiderable here, though that of the Growth of the Place is all worked up here in ſlight Silk Stuffs, ſewing Silk and Buttons.

Of the Commerce of Great TARTARY.

THE *Tartars* are at preſent Maſters of a third Part of *Aſia*, and their Country, commonly, called *Great Tartary*, to diſtinguiſh it from the *Leſſer*, which is in *Europe*, is ſituated between ſeventy-five and an hundred and fifty Degrees of Longitude, and from thirty-eight to fifty two Degrees of North Latitude; theſe People now poſſeſs all the North of *Aſia*, and are at preſent divided into three different Nations, *viz.* the *Tartars*, properly ſo called, the *Calmoucks*, and the *Moungales*; for though all thoſe *Pagans* that are diſperſed about *Siberia*, are without Doubt deſcended from the *Tartars*, yet they are not now conſidered as a Part of them, but regarded as a ſavage People. The *Tartars*, particularly ſo named, inhabit the Weſtern Parts towards the *Caſpian* Sea, and are all *Mahometans*: The *Calmoucks* are in the Middle of *Great Tartary*; and the *Moungales* near the *Oriental* Sea, but both are Idolaters. The firſt are ſubdivided into many Branches; and the *Moungales* into Tribes, or Branches of Tribes: And *Great Tartary* does not belong to one Sovereign only, as many have believed, but is poſſeſſed by the Czar of *Muſcovy*, the Emperor of *China*, and by many petty Chans or Princes, who reign over large Provinces.

This vaſt Country is under the fineſt Climate in the Univerſe, and of an extraordinary Goodneſs and Fertility; but, as it is one of the higheſt Tracts of inhabited Land, it wants Water in many Parts, though waſhed by nine principal Rivers, *viz.* the *Amur*, *Schingol*, *Selinga*, *Jeniſca*, *Amu*, *Kheſell*, *Jaicks*, *Irtis*, and the *Oby*, and therefore is only cultivated on their Borders, and this but juſt where Neceſſity drives the Inhabitants; for the *Calmoucks* and *Moungales* never uſe any Agriculture, and only live on what their Cattle produces them; and their vagabond Life is owing to this Want of Farming, which conſtrains them to change their Habitations in Conformity to the Seaſons, occupying the Northern Country in the Summer, and the Southern in the Winter.

Great Tartary has this Peculiarity, that it produces no Trees of any Height, except towards the Frontiers, and there only in ſome few Places; for all that are found in the Heart of the Country are only Shrubs, not exceeding a Man's Height; but in Recompence hereof the Mountains furniſh the Natives with a large Quantity of wild Goats, white Bears, black Foxes, Ermines, Sables, and Gluttons, a fleſh-eating Animal a little ſmaller than a Wolf, whoſe Furs, with Rhubarb, Ginſeng Roots, Silk, Wool, and Muſk, conſtitute the Trade of the Northern, Eaſtern, and Southern Part of the Country; but the *Tartars*, who inhabit the Weſt, on the Borders of the *Caſpian* Sea, regard all Trade as a Matter beneath them, and glory in robbing the Merchants who paſs through their Territories, or at leaſt exact ſo on them, as to make them loſe all Deſire of returning among them; and indeed, all thoſe *Mahometan Tartars* live on the

Rapine

Rapine and Spoil, which they pillage from their Neighbours, whether in Peace or War; in which they are very different from the *Calmouchs* and *Moungales*, who, although they are *Pagans*, live quietly on the Products of their Flocks, and offend no one, unleſs they are firſt moleſted: Of theſe ſome have fixed Habitations, though others have neither Towns nor Villages, but live in Tents, and wander from one Place to another, according as the Conveniency of Paſturage invites; and they all ſupport themſelves by equinine Food, as we do by that of Oxen and Cows, of which latter they rarely eat, but live chiefly on Horſe Fleſh, and make uſe of Mare's Milk, as the *Europeans* do of that of their Kine. The *Tartars* have ſo ſtrong a Paſſion for the Colour red, that not only their Princes and Ladies, but even the common People, through all the North of *Aſia*, would do more for a Piece of Stuff with this Dye, than for four times the Value in Gold and Silver.

The chief City of the Eaſtern, or *Nieucheu-Moungales*, is *Naun*; that of the Weſtern, or *Calcha-Moungales*, *Argunſkoy*. The Kingdom of *Tangut*, or *Baghargar*, is divided into two Parts, of which the Southern is properly called *Tibet*; this Kingdom is now in the Hands of the *Calmoucks*, and is the peculiar Patrimony of *Dala-Lama*, the Sovereign Pontiff of all the *Pagan Tartars*, who by ſome has been confounded with *Preſter-John*, before ſpoken of. The Capital of this Kingdom is *Barantola*, in whoſe Neighbourhood is gathered a Quantity of Rhubarb, *&c.* and at *Tarzinda* is a Mine of Gold extremely rich, at the Foot of the Mountains which ſeparate the Lands of *Contaiſch* from thoſe of *China*, to the Eaſt of the Deſerts of *Goby*, of which the *Chineſe* have taken Poſſeſſion, and have eſtabliſhed here ſome Colonies of the *Moungalians*.

The Kingdom of *Caſchgar*, or the *Little Boucharie*, is a fertile Country, and tolerably populous; it is rich in Gold and Silver Mines; but the *Calmoucks*, who are at preſent its Maſters, receive but little Benefit from them, as they live quietly on the Products of their Cattle, and never mind Gold nor Silver, that is to coſt them Trouble in its Acquiſition; however the *Bouchares*, who inhabit the Towns, collect a good deal of Gold Duſt in the Spring, in the Gutters, which the Torrents occaſioned by the melting Snows make on every Side of the Mountains, and carry it to *India*, *China*, and even as far as *Tobolſky* in *Siberia*. There are alſo found large Quantities of Muſk in the *Caſchgar*, and many Sorts of precious Stones, among which are Diamonds; but the Inhabitants have not the Art to cut or poliſh them, and therefore are obliged to ſell them rough.

The City of *Caſchgar*, which gives its Name to the Country, was once the Capital of the Kingdom, but ſince the *Tartars* have been in Poſſeſſion of it, it is greatly fallen from its priſtine Grandeur; however, it ſtill carries on ſome Trade with the neighbouring Countries, though little in Compariſon of what it did formerly.

Jerkeen is at preſent the Metropolis of the *Little Boucharie*, and is pretty large. It is the Staple of the *Indian* Trade with the North of *Aſia*, of *Tangut* with *Siberia*, and of the *Grand Boucharie* with *China*, which renders it both rich and populous. If *Peter* the Great had lived a few Years longer, he would have endeavoured to eſtabliſh a Trade between this Place and his Territories, by Means of the *Irtis*, which would have been very advantageous to *Ruſſia*.

Chateen, or *Chotan*, is to the Eaſt of *Jerkeen*, and is at preſent in a flouriſhing Condition, by Reaſon of the great Trade carried on here between the *Bouchares*, *Calmoucks*, *Indians*, and the *Tangutois*, and the extreme Fertility of the Soil.

The *Great Boucharie*, of which *Bouchara* is the Capital, comprehends the *Sogdian*, the *Bactriana* of the Ancients, with their Dependencies, and is at preſent the beſt cultivated, and moſt populous of any Province in the *Grand Tartary*.

With the *Mahometan Tartars* the Slaves are a conſiderable Object of Trade, for whoſe Capture they often make War with their Neighbours, keeping ſome for their own Service, and ſelling the Reſt where they can; and this Commerce goes ſo far with ſome of them, that in Default of an Opportunity to make Slaves, they do not ſcruple to ſteal and ſell the Children of one another, or to

ſell their own, if they cannot do better; if they are tired of their Wives, they ſell them without any Ceremony, as they do their Daughters, eſpecially if they are handſome.

The Horſes of theſe *Tartars* have but a bad Appearance, being very lean, notwithſtanding which they are indefatigable, and may juſtly be termed the beſt Horſes in the World.

It muſt be acknowledged that Nature has with-held nothing from this fine Country, that could render an Abode here agreeable; the Mountains abounding in the richeſt Mines, and the Vallies in an admirable Fertility of all Sorts of Fruits and Pulſe. The Meadows are covered with Graſs Man-high; their Rivers full of excellent Fiſh; and Wood, ſo ſcarce in all the Reſt of *Great Tartary*, grows abundantly in many Places of this Province; but all this is of very little Uſe to the *Tartar* Inhabitants, who are naturally ſo ſlothful, that they rather chooſe to pilfer and ſteal, than to apply themſelves to cultivate what Nature has offered them ſo liberally.

Carſchi, or *Karſchi*, is at preſent one of the beſt Cities in the *Great Boucharie*; it is large, well-built, and better peopled than any other in the Country; the adjacent Parts are extremely fertile, and its Inhabitants carry on a very good Trade to the North of *India*.

Jalagaſan, which ſtands almoſt in Front, is one of the chief Paſſages by which People enter from the States of *Contaiſch* into the *Great Boucharie*.

Badagſchan is a very ancient, and extremely ſtrong City; it is not large, but well enough built, and populous; its Inhabitants are rich by the Gold, Silver, and Ruby Mines in its neighbouring Mountains; although there is no one who regularly works theſe Mines, thoſe who live at the Foot of the Mountains do not benefit themſelves a little by the Grains of Gold and Silver which they collect in the Spring, after the melting Snows have waſhed them from their Beds, by their Torrents.

Anderab is the moſt Southern City of all the *Great Boucharie*, ſeparating the Territories of the *Great Mogul* and *Perſia* from *Grand Tartary*; it is by this Place, that whatſoever is brought in, or carried out of their Country, to or from the States of the former, muſt neceſſarily paſs. And there is in the Neighbourhood of *Anderab* rich Lapis Lazuli, with which the *Bouchares* carry on a conſiderable Trade, with the Merchants of *India* and *Perſia*.

Although *Cabul*, or *Caboul*, depends on the *Great Mogul*, and not on the *Chan* of *Balck*, it will be *à propos* to ſay ſomething here concerning the flouriſhing Trade maintained between the Subjects of theſe two Princes. *Gabul*, ſituated at the Foot of the Southern Mountains which ſeparate the Eſtates of the *Great Mogul* from the *Grand Boucharie*, is one of the fineſt Cities to the North of *India*; it is large, rich, populous, and becauſe it is conſidered as the Key of the *Grand Mogul* Territories towards *Perſia*, and the *Great Boucharie*, is is always carefully kept in a good State of Defence. This City is the Staple of all the Merchandize that paſſes to the *Indies*, *Perſia*, and the *Grand Boucharie*. The Subjects of the *Chan* of *Balck* come here in Throngs with Slaves of both Sexes, and above all, with *Tartarian* Horſes, of which ſo great a Trade is driven in this City, that it is pretended here come yearly more than ſixty thouſand. The Neighbourhood of *Cabul* is very fertile, and all that is neceſſary for Life grows here in Abundance, and is very cheap.

The City of *Bouchara* or *Buchara* is upon a River, whoſe Waters are very unwholeſome, and which diſcharges itſelf into the *Amu*, about forty Leagues from the *Caſpian* Sea; it is large, fortified, and well ſeated for Trade with *Tartary*, *Perſia*, and *India*; though with all theſe Advantages it carries on but little, being hindered by the extraordinary Impoſitions on Foreigners in the Article of Cuſtoms.

Samarkant, Capital of the Province of *Maurener*, is about ſeven Days' Journey to the North of *Bouchara*, and was formerly much more brilliant than now; however, it is large and populous enough; it is ſaid that the beſt Silk Paper is made here of any in the World, and therefore is much ſought after by the *Oriental* Nations. Here is the moſt famous *Mahometan* Academy of Sciences; and its adjacent Grounds produce Apples, Pears, Grapes, Melons of an exquiſite Taſte, and

in

in ſuch Quantities, that the Empire of the *Great Mogul*, and Part of *Perſia*, are ſupplied from hence with them: And indeed this City wants nothing to render it conſiderable in Trade, but other Maſters and Neighbours than the *Mahometan Tartars*.

Wardanſi, ſeated to the Weſtward of *Bouchara*, towards the Frontiers of *Charaſſm*, is a tolerable large City, inhabited by the *Bouchares*, who in peaceable Times trade to *Perſia*, and in the Country of *Charaſſm*.

Balck is the Capital of the ſmalleſt, and moſt Southern Part of the *Grand Boucharie*, but extremely well cultivated, and fertile; here is gathered a great deal of Silk, which the Inhabitants work up into Stuff: The *Uſbecks* here are the moſt civilized of all the *Mahometan Tartars* of the *Grand Boucharie*; to which the great Commerce they drive with the *Perſians* and the Subjects of the *Great Mogul* does not a little contribute.

Talchan, ſeated below *Balck*, on the River that runs by it, is a ſmall City, well built, pretty populous, and with a tolerable Trade.

Cachemire is a ſmall Kingdom, that is hardly thirty Leagues long, by twenty broad, ſo ſhut in by high Mountains, which ſeparate *India* from the *Grand Tartary*, that there is no Entrance to it on any Side, without paſſing Rocks of a prodigious Height; it is almoſt one continued Valley, whoſe Fertility and Beauty makes up for the Smallneſs of its Extent, as all Sorts of Fruit and Pulſe that we have in *Europe* grow here abundantly, without the Trouble of Cultivation.

The *Cachemirians* are very induſtrious, and poſſeſs the Secret of making the laquered Wares, and light Woollen Stuffs with Borders, ſo much eſteemed in *India*. The River *Amu*, or *Abiamu*, which has its Source to the North-North-Eaſt of this Kingdom, and runs by it, is full of all Sorts of Fiſh, and its Borders quite charming, on which grow thoſe excellent Melons, and all thoſe other delicious Fruits, which are ſo ſought after in *Perſia* and *India*, and which are tranſported even to *Ruſſia*.

Charaſſm is a Country extremely fertile in all thoſe Parts that are fit for Culture, and its Inhabitants are reckoned the richeſt Herdſmen of all the *Ottoman* Empire; they are ſupported entirely by their Cattle, which conſiſt in Camels, Sheep, and Goats; and lodge in Tents, which they tranſport from one Place to another, according as the Seaſon and Conveniency of Paſture ſuits: In Winter they encamp along the *Euphrates*, on the Side of *Meſopotamia* and *Natolia*; and the Summer Heats invite them to the refreſhing Vallies encloſed by the *Armenian* Mountains towards the Riſe of the *Euphrates* and *Tigris*.

The ſecond Body of *Turkmans*, called Eaſtern *Turkmans*, alſo ſubſiſt by their Cattle or Agriculture, according to the different Diſtricts they are found in; the Winter Seaſon they paſs in the Towns and Villages in the Neighbourhood of the *Amu*, and the *Caſpian* Sea; and in Summer they encamp whereſoever they meet with good Paſturage and Water.

There are twenty Provinces in this Country of *Charaſſm*. That of *Burma* is to the Eaſt of the City of *Uaſir*, towards the Frontiers of the *Grand Boucharie*. This Province is very fertile, populous, and produces the moſt delicious Melons of all the *Charaſſm*. That of *Gordiſch* is between the *Piſchga* and the *Kumkant*; and as this Province is watered by the River *Amu*, it is one of the moſt fruitful and beſt cultivated Parts of the *Charaſſm*.

The *Choraſan* is beyond Contradiction the fineſt, richeſt, and moſt fruitful Province of all *Perſia*; but having mentioned it already, I ſhall only add here, that as the Climate of this Country is excellent, and the moſt temperate of any in this Empire, nothing in theſe Parts can equal the Fertility of its Soil; all ſorts of exquiſite Fruits, Cattle, Corn, Wine, and Silk thrive here to a Miracle: Mines of Gold, Silver, and precious Stones are not wanting; and, in fine, all that can render a Place rich and agreeable this Province abundantly poſſeſſes.

The City of *Meſched*, or *Meſchet*, ſituated on a little River which falls into the *Kurgan*, was once in a very flouriſhing Condition, by the many conſiderable Manufactures of Gold and Silver Brocades, with other Stuffs, ſettled here. The Earthen-Ware of this Place was alſo very much eſteemed, beſides which a great Trade was carried on here in thoſe beautiful ſilver-grey Lamb-ſkins with curled Wool, finer than

than Silk itſelf: And it was in every Reſpect a very rich, ſtately, and populous City, till the *Uſbeck Tartars* plundered and left it in a miſerable forlorn Condition; its adjacent Parts are, however, the moſt charming of any in the World, and produce in Abundance all Sorts of exquiſite Fruits and Greens, as its neighbouring Mountains do Turquoiſes, and even Rubies.

Herat is at preſent the fineſt and largeſt City of all this Province, ſince the Ruin of the laſt-mentioned, which was the Capital; it is rich, fair, and populous, and produces the handſomeſt Carpets of all *Perſia*; here are alſo made ſeveral Sorts of valuable Stuffs and Brocades; and in a Word, this is the Staple of almoſt all the Commerce carried on between *Perſia* and *India*, as it lies in the Route from *Iſpahan* to *Candahar*.

Aſtrabath is ſituated on a Gulf of the *Caſpian* Sea, being the Capital of the Province of that Name, and paſſes for one of the fineſt Cities in *Perſia*, as it is large, well-built, rich, and very populous. Here are many fine Fabricks of Silk and Woollen Stuffs, more particularly of a Sort of Camlet that is vaſtly eſteemed. The circumjacent Lands are equally agreeable and fertile in every Neceſſary of Life, and the neighbouring Mountains are all covered with Foreſts of Fruit-Trees. The Gulf of *Aſtrabath* is about fifteen Leagues from Eaſt to Weſt, and four or five from North to South, but is only navigable for ſmall Veſſels, becauſe here is not more than ten or twelve Feet Water at its Entrance to the *Caſpian* Sea, but it is of great Convenience to this City, by Means of the Communication it has with all the *Perſian* Cities ſeated on that Sea.

Mankiſelak is a ſmall Town in the Country of *Charaſſm* on the Borders of the *Caſpian* Sea, to the Northward of the Mouth of the Southern Arm of the *Amu*, and in itſelf is but trifling, as it does not contain at utmoſt above ſeven hundred miſerable Cots; but its Port is excellent, and the only one in this Sea; it is ſpacious, ſecure, deep, and if it was in other Hands, would make Trade ſoon flouriſh.

Urgens, the Capital of *Charaſſm*, is ſituated in a large Plain, to the North of the River *Amu*, about twenty-five *German* Leagues from the Eaſtern Border of the *Caſpian* Sea. This City was once very conſiderable, but ſince it became ſubject to the *Tartars*, and the *Amu*, that run at the Foot of its Walls, has taken another Courſe, it is fallen greatly to Decay.

Turkeſtan is about ſeventy Leagues long, and as many broad, having ſeveral good Diſtricts of Land on the Side of the River *Jemba*, and towards the Mountains which divide this Province from thoſe of the *Calmoucks*; but the Inhabitants make no Advantage of it, as Rapine is their only Occupation, and few among them have any fixed Habitation, but live in Tents, towards the Frontiers of the *Calmoucks*, and the aforeſaid River, that they may be within Reach of benefiting themſelves by any Occaſions that ſhall offer for Pillage or Plunder; and they go to ſell the Slaves they make in theſe Excurſions either to the *Charaſſm* or *Grand Boucharie*, where they always find *Perſian* or *Armenian*, and ſometimes *Indian* Purchaſers.

Of the Caſpian *Sea.*

IT is but a little while ſince we have had any true Knowledge of the *Maſanderan* or *Caſpian* Sea, which the *Perſians* call *Kulſum*. It is beyond Diſpute the greateſt Lake in the Univerſe, being ſituated between the thirty-ſeventh and forty-ſeventh Degrees of Latitude, and the ſeventy-ſeventh and eighty-third Degrees of Longitude; its Waters are extremely ſalt, except towards its Shores, where they are freſhened by the Rivers running in, and it abounds with Sturgeons, Salmons, Salmon Trout, *&c.* all which Fiſh come in the Spring to ſeek the Mouths of the freſh Water Rivers; and it is incredible what a Quantity are yearly taken at this Seaſon; here are alſo Carp and Bream, which is ſomething particular in a Sea, whoſe Water is naturally ſalt; and here is alſo the White Fiſh, called by the *Ruſſians Bielluga*, which is peculiar to this and the *Black* Sea; and for this Reaſon ſome pretend that theſe two Seas have a ſubterraneous Communication. All theſe Sorts of Fiſh are much larger and fatter than elſewhere, eſpecially the White Fiſh, which have been taken twenty Feet long; they have ſome Reſemblance to a Pike, with the Taſte of a Sturgeon.

The

The *Caſpian* has neither Flux nor Reflux; and the only Port is *Baku*, in the Province of *Schivan*, on all its Weſtern Coaſt, and this ſolely for ſmall Veſſels; though there is a good Road at *Terki*, where the Veſſels ride in Safety, between the Iſle of *Zezen* and the Land. On the Eaſtern Coaſt is the Port of *Mankiſchlak* in the *Choraſſan*, which is excellent, and the only one found in this Sea; but being unhappily in the Hands of the *Tartars*, with all this Eaſtern Coaſt, it is of very little Uſe.

Of the COSACKS, *or* COSAQUES.

THE *Coſacks* are now divided into three Branches, and the *Ruſſians*, on whom they depend, call their Country the *Ukraine*, which is in that Language, *ſeated on the Frontiers*, becauſe it effectually makes a Frontier between *Ruſſia*, *Poland*, *Little Tartary*, and *Turkey*, being to the Weſtward of the *Boriſthenes*. As this Country is an entire Plain interſperſed with fine Rivers, and agreeable Foreſts, it muſt be ſuppoſed to be extremely fruitful; as it is in Effect, and produces all Sorts of Grain and Pulſe, Tobacco, Wax, and Honey in ſuch Abundance, that it ſupplies a great Part of *Ruſſia* with it. The Paſturage here is ſo excellent, that the Cattle ſurpaſs all others of *Europe* in Size; the *Muſcovite* Beef that I have ſeen, has always been very ſmall, though I think fatter, and ſuperior in Quality to any other. The Rivers are ſtocked with excellent Fiſh, and Game is found here in ſuch Quantities, that this Country only wants a Communication with the Sea, to be one of the richeſt States in that Part of the Globe.

The *Don Coſacks*, who occupy, on the Banks of the River with this *Ruſſian* Name, a Number of Towns and Villages, do not extend themſelves far within Land, as there is a Want of good Water in many Parts, and no Wood; they live on their Cattle's Produce and Agriculture, without forgetting however to live at the Expence of others, whenever Occaſions preſent.

The *Coſacks* of the River *Jaicks* took Poſſeſſion of its Southern Border, when the *Tartarian* Power began to decline there; and when the *Ruſſians* ſeized the Kingdom of *Aſtracan*, the *Coſacks* voluntarily ſubmitted to their Dominion. Theſe People live by Agriculture, Fiſhing, and the Produce of their Cattle, with what Booty they can make. This River at preſent ſeparates *Ruſſia* from the Eſtates of *Contaiſch*, and its Banks are ſo fruitful, that however little the Earth be cultivated, it abundantly produces every Neceſſary of Life. It is alſo extremely full of Fiſh; and it is aſſerted, that in the Spring, ſo great a Quantity come here from the *Caſpian* Sea, to ſeek freſh Water, as almoſt to ſtop its Courſe, and may be taken with the bare Hand, with the Roes of which prodigious Shoals, caught in this River and Neighbourhood, ſo much Caviar is made and exported to all *Europe*.

The *Tartars* of *Nagai* ſubſiſt by their Hunting, Fiſhing, and Cattle, being ſubject to the *Ruſſians* ever ſince their taking the Kingdom of *Aſtracan*, which the others poſſeſſed before; the Capital of the ſame Name is ſeated on the Frontiers of *Aſia* and *Europe*, and by this convenient Situation invites a large Number of *Armenians*, *Indians*, *Perſians*, *Mahometans*, *Tartars*, *Calmoucks*, *Georgians*, and *Muſcovites*, to form a conſiderable Trade here.

The *Volga* is one of the largeſt Rivers in the World, and traverſes almoſt all *Ruſſia*; it abounds with all Sorts of Fiſh, and its Borders ſpontaneouſly produce moſt Species of Pulſe and Herbs without any Labour or Cultivation.

The *Calmoucks* are Part of the *Pagan Tartars*, deſcended from the *Mogoules*, and deſirous of being ſtill called ſo; they inhabit the fineſt and moſt conſiderable Part of *Tartary*. The beſt Iron of all *Ruſſia*, and it is probable of the whole World, known in that Country by the Name of *Siberian* Iron, comes from the Mountains of *Aigles*, that ſeparate *Ruſſia* from *Siberia*; which Metal is melted and wrought with the ſame Eaſe as Copper, and there are Cannons made of it, nothing inferior to thoſe of Braſs, either in Beauty or Goodneſs. Theſe People carry on no Trade, except by Way of Barter for Cattle, and are harmleſs and inoffenſive, if not moleſted, as has been before obſerved. The *Oby* and *Orn*,

large Rivers in this Country, are full of Fiſh, and moſt of their Borders very fertile in every deſirable Product.

Of the general Commerce of the EAST-INDIES.

THE *Eaſt-Indies* commence where the Kingdom of *Perſia* ends, being ſeparated from it by a long Chain of Mountains, and the River *Indus*, whoſe Name they have taken, and which on iſſuing from Mount *Taurus*, where it riſes, takes its Courſe towards the Northern Parts of *India*, as the *Ganges*, which flows from the ſame Mountain, does towards the South, both falling at laſt into the *Indian* Ocean; the firſt into the Gulf bearing its Name, and the other into that called *Bengal*. This vaſt Region of *Aſia* is called the *Eaſt-Indies*, from its advanced Situation towards that Part of the Heavens, more than any other Country yet known; as *America* is in the ſame Manner diſtinguiſhed by the Denomination of the *Weſt-Indies*, on Account of its lying more Weſt than any other Diſtrict of the habitable Globe.

Eaſt-India is commonly divided into that on this Side of, and that beyond, the *Ganges*; the firſt Part comprehends the Empire of the *Great Mogul*, the Kingdoms of *Decan*, *Narſinga*, *Canara*, the *Peſcherie*, or Fiſhing Coaſt, that of *Coromandel*, *Beſnagar*, and *Orixa*. The other includes the Kingdoms of *Bengal*, *Aracan*, *Pegu*, *Siam*, *Malacca*, *Camboya*, *Ciampa*, *Cochinchina*, *Brama*, *Jangomea*, *China*, and others leſs conſiderable.

Both theſe Parts have their Iſles, though thoſe appertaining to that beyond the *Ganges*, are larger and much more conſiderable for their Trade than the other, as will be explained hereafter, when their Deſcription falls in Courſe; and I ſhall now begin with that of the *Great Mogul's* Dominions, being the firſt that preſent themſelves on quitting the *Perſian* Sea, to enter the *Indian* Ocean.

Of INDOSTAN, *or the Empire of the* Great Mogul.

THE Empire of this Prince comprehends a vaſt Extent of Coaſts in the *Indian* Sea, and ſtretches very far within Land, ſo that he poſſeſſes the greateſt Part of the *Indian Terra Firma*.

The Kingdom of *Bengal* once belonged to him by Conqueſt, and of which he ſtill retains a Share, though the *Mooriſh Rajas*, or Governors, to whoſe Cuſtody he truſted it, have revolted, divided the other Part among themſelves, and thereby deprived the Emperor of one of his richeſt Provinces, and the moſt convenient for Trade; for which he is however in ſome Sort indemnified by the Sovereignty, which he has always preſerved, and by the Acquiſition of the Kingdoms of *Decan*, *Cachemir*, *Breampour*, and *Maliquo*, which he has added to his Dominions.

Indoſtan is in general ſo fertile in all that can contribnte to the Conveniency of Life, that it might very commodiouſly paſs without any foreign Trade, and not only comfortably, but very deliciouſly ſubſiſt on its own Abundance; yet the greateſt Part of the Inhabitants, particularly thoſe called *Banians*, are ſo addicted to Commerce, and underſtand it ſo well, that it is nothing ſurprizing, to ſee them maintain ſo conſiderable a one on all the Coaſts of this Empire, and even to *Agra* its Capital.

The *European* Traffick with the *Mogul's* Dominions conſiſts pricipally in Gold and Silver Coin, Leather, Spice, Elephants, *&c.* brought here from *Japan*, *China*, *Moluccas*, and *Ceylon*; Pewter, Cloths, *&c.* imported from *Europe*, and Horſes from the *Uſbecks* and *Perſia*.

Of GUSURATE.

OF all the Kingdoms which compoſe *Indoſtan*, there are none that have more conſiderable Ports, or where greater Trade is carried on, than this of *Guſurate*, called alſo by ſome the Kingdom of *Cambaye*, from one of its moſt important Cities, diſtinguiſhed by the Appellation of the *Indian Cairo*. This Territory

ſelf into the Sea at two Openings, is reckoned both among the maritime and inland Cities. Here, and in eighty Villages under its Juriſdiction, are made Cotton Cloths, that are always placed among the Number of the fineſt and moſt beautiful of all *India*. The Factories which the *Engliſh* and *Dutch* have here are very ancient, and ſome of the firſt that theſe two Nations eſtabliſhed on this Coaſt.

Biſantagar is almoſt in the Middle of the Kingdom, where a great deal of Cloth and Thread are made for Tranſportation. And

Pettan is celebrated for its Manufactures, which conſiſt in Silk Stuffs, Cotton Cloths, Tulbandes, Allegais, and in ſome other ſuch like Fabricks, that are alſo made at *Amadabath*, *Brodera*, *Goga*, *Chiſt*, *Pour*, *Nariaath*, *Vaſſet*, and ſome other Places; and it is from them that the *Banians* extract Abundance of thoſe Commodities, which the *Europeans* make a Part of their Ships' Cargoes.

Of CAMBAYE.

THE Trade of this City is very conſiderable, and only yields to *Surat*, which it formerly ſurpaſſed, till the latter had reaped the Advantage of the Decay of that of *Goa*, and of the Ruin of the *Portugueſe* Trade there.

It is ſeated at the Mouth of the River *Carari*, at the Bottom of the Gulf, to which it gives Name, ſixteen Leagues from *Brachai*, and thirty from *Surat*; the *Engliſh* and *Dutch* have Lodges here, on Account of its Proximity to the laſt, where their principal Trade of the *Grand Mogul's* Dominions is tranſacted, and where they have their Factories ſettled, which may be almoſt regarded as the ſecond in Point of Importance, among thoſe they have in *India*.

The Natives of the Place, more eſpecially the *Banians*, addict themſelves to Trade, and carry on one commonly to *Diu*, *Goa*, *Cochin*, *Achem*, *Batavia*, *Bantam*, the Coaſt of *Coromandel*, that of *Bengal*, *Perſia*, and the *Red* Sea, where they ſend their Ships, but generally with *Dutch* Pilots, hired with a conſiderable Salary of the Company; and though the Remiſs of theſe Goods to all the aforeſaid Places, is a conſiderable Object of their Commerce, yet it is nothing in Compariſon with that which they tranſact with Strangers, who yearly arrive at *Cambaye*; there being hardly any Nation of *India*, from whence both Merchants and Ships are not ſeen here; as alſo from *Moſambique*, *Melinda*, *Arabia*, and the *Perſian* Gulf. The *Europeans* beſides ſend here every Monſoon a good many Veſſels, whoſe Ladings conſiſt more in Reals, Rixdollars, Ducats, and Sequins, than Merchandize; Gold and Silver being the beſt Cargo that a Ship can bring to this Coaſt, except Spice, which the Inhabitants here and at *Guſurate* cannot be without.

The principal Goods exported from *Cambaye* are very fine Cotton Cloths, in as good Eſteem as thoſe from *Bengal* and *Coromandel*, Canvas, many Sorts of Silk Stuffs, Tulbandes, Saſhes, Carpets, Cloth of Gold, Counterpanes of Silk and Cotton, ſtitched or embroidered, Quilts, Bed Furniture, *&c.* Elbow Chairs, Tables, and other Houſehold Stuffs, Indigo, Saltpetre, Borax, Opium, Cummin, Ginger, Rhubarb, Mirabolans, many other excellent Drugs, Sugar, Oil, and Butter, without reckoning ſeveral Sorts of precious Stones, found at *Guſurate*, or that are brought here from elſewhere. A great many excellent Works in Agate are alſo performed here, which do not in any Manner yield to thoſe of *Europe*, either in Beauty or Perfection.

The major Part of the Merchandizes, of which the *Europeans* make the greateſt Purchaſes, are not thoſe of which their homeward-bound Cargoes are compoſed, but they ſerve for Traffick to other Parts of *India*, to exchange againſt various Commodities that may ſuit their Owners; and the ſame may be ſaid of Grain, Fruit, Pulſe, as Wheat, Rice, Peas, Beans, Kiſſery, a Sort of a Pea, Millet, Barley, Oranges, Lemons, Citrons, Mangas, and Cacaos, of which the *Engliſh* and *Dutch* carry a large Quantity yearly to Places where theſe are wanting, and diſpoſe of them there to great Advantage; and this Remark may ſerve for all that ſhall be ſaid henceforward concerning the Trade of the *Europeans* in the *Eaſt-Indies*.

Of SURAT.

THERE is no Place in the *Mogul's* Dominions, and it may be added in all the *Indies*, more celebrated for Trade than this is. It is ſeated on the River *Tapi*, or *Tapta*, to which *Souali*, lying ſix Leagues from its Mouth, is properly the Port, the River being unnavigable for large Veſſels up to the City, which obliges the Merchants to unlade their Goods here, and to ſend up thoſe deſigned for *Surat* by Barks or Waggons: This City was taken by the Troops of the *Engliſh Eaſt-India* Company, in the Year 1759, and ſtill continues ſubject to that Company.

Thoſe intended for other Parts remain at *Souali*, in Warehouſes built with Boards, which each Nation has here, till Opportunities offer for ſending them to their deſtined Ports. *Souali* is a Sort of Encampment upon a Point of Land, or Peninſula, formed by the Sea and the River's Mouth, which is very commodious for a Market to furniſh the Sailors with Refreſhment on their Arrival; this Camp conſiſts only of ſmall Huts, made with Reeds, Bamboes, *&c.* ranged in Form of Streets, during the fine Monſoon, where the Natives plant their little Shops, filled with Fruits, *&c.* to the great Convenience of the new Comers, and to the no ſmall Profit of the Inhabitants, no Village being near, and the *European* Companies' Magazines being a League to the North of this Bamboe Town.

The Houſes of the *Europeans* here are ſpacious and magnificent, of which the *Engliſh* are thoſe who make the beſt Figure; and the Goods brought here for *Europe* are Cotton Thread, Wool, and Cloth; and of theſe latter are ſhipped both white and ſtained; many Sorts of Silk Stuffs, plain, ſtriped, *&c.* with and without Silver and Gold, painted and printed Linens, raw Silks, Indigo of three Sorts, Carpets of Silk and Wool, others all Silk, with Silver and Gold, Aloes, Sapan Wood, Coffee, Maldivian Cauries, ſo neceſſary for the *Guinea* Trade, Incenſe, Saltpetre, Borax, Gum Lack, Myrrh, Terra-Merita, Red Bole, Muſk, Bezoar, and ſometimes Ambergris, Pearls, Diamonds, and other leſs precious Stones.

The Commodities of this Place fit for the Trade to *Mocha*, the Coaſt of the *Red* Sea, and the *Arabia Felix*, are coarſe Linen, white, blue, and black. Thoſe for *Bender-Abaſſi*, and *Baſſora* in the *Perſian* Gulf, white Linens, coarſe and fine, with a few blue and black. Thoſe for *Sumatra*, and all the Kingdom of *Achem*, *Java*, and *Macaſſare*, Linens blue and black, of which many more fine than coarſe. For the *Philippines*, all Sorts of Linen, coarſe and fine, white and ſtained, Carpets, and Silk Stuffs. In Fine, Opium, for the Coaſts of *Malabar*, and the other Places in *India*, from whence the Pepper comes, as there is nothing better to truck againſt that Spice.

As the greateſt Part of the Merchants, Brokers, and *Indian* Manufacturers, are naturally given to cheating in ſeveral Ways, the *Europeans* who deal with them ſhould always be on their Guard, and carefully examine the Quality, Weight, Meaſure, *&c.* of every Thing they buy.

Two Ships ſail yearly from *Surat* for the Conveniency of the *Mahometans*, who go on Pilgrimage to *Mecca*, but they are commonly as much laden with Goods for the *Mogul's* Account, as the Pilgrims; and their Returns are ſo rich as to make Part of the Trade of the *Europeans*, for the Commodities of *Arabia Felix*.

The *Turks* of *Aden* and *Mocha* alſo ſend an annual Ship to *Surat*, whoſe Cargo is for Account of the *Grand Signor*. And it is at this Place that the *Engliſh* and *Dutch* commonly make their Ladings for *Perſia*, the *Red* Sea, and *Arabia Felix*; and here alſo the *Perſian* Merchants embark with their Goods for the ſame Places, on which they make great Profits.

Very conſiderable Negociations are made from hence and ſome other Parts of *India*, by Way of Exchange, and I ſhall therefore mention the Premiums they are commonly agreed at, with this Remark, that they are not ſo fixed, but that they occaſionally riſe and fall, as in *Europe*.

The Exchange from *Labor* to *Surat* is generally from 7 to $7\frac{1}{2}$ *per Cent.*

From *Janabat* and *Agra* 4 to 5.
From *Amadabath* 1 to 1¼.
From *Bengal*, *Patna*, *Caſembaſar*, and *Ougli*, 8 to 9.
From *Golconda*, and the neighbouring Parts, 5 to 6.
And for *Goa*, 4 *per Cent*.

Of AGRA.

BEFORE I quit the *Mogul's* Empire, it is proper I ſhould take Notice of this City, which is its Capital, and the Centre of its Trade.

It is ſituated in 28°, on this Side of the Line, on the River *Gemini*, or *Gemma*, which falls into the *Ganges*.

The Number of its Meidans, where the publick Markets are kept for all Sorts of Proviſions; of its covered Bazards, where each Merchant and Artificer have their Shops and Quarters, of which ſome are half a Quarter of a League long; and that of its Caravanſeras, above eighty in Number, ſuffices to demonſtrate both the Greatneſs of its Extent, and the Importance of the Commerce carried on here by Foreigners and its Inhabitants; which is maintained by ſeveral Caravans from *Amadabath*, *Surat*, and other Places, commonly compoſed of four or five hundred Camels, and by which Conveyance the *Engliſh*, *French*, *Dutch*, *Moors*, *Turks*, *Arabians*, *Perſians*, and other Nations ſend their Merchandizes to, and receive others from, this Capital, as may ſuit their Buſineſs.

Beſides the Indigo of this City, which is the beſt in the World, a large Quantity of Silk Stuffs and Linens are exported; theſe latter principally to the Weſt and North; and it is here that all the Merchandizes of *Boutan* and *Tartary* are brought, and where the Merchants of the interior Parts of *Indoſtan* alſo come.

Daman, *Baçaim*, *Diu*, and *Chaoul*, are four maritime Places in the Kingdom of *Guſurate*; but all four appertaining to the *Portugueſe*; they alſo were Maſters of *Bombay*, between *Daman* and *Chaoul*, but yielded it up to the *Engliſh* in the Year 1662, in Favour of the Marriage between King *Charles* II. and *Catharine*, Infanta of *Portugal*. It is a very good Port, and as ſecure a one as any on the Coaſt.

Daman is ſeated on the Peninſula, on this Side the *Ganges*, and on the Gulf of *Cambaye*, between *Surat* and *Baçaim*, from which it is equally diſtant; its Situation, and the Goodneſs of its Fortreſs, as alſo the Importance of the Trade carried on here, makes the *Portugueſe* regard it better than any other Place they have remaining in *India*, although the Buſineſs of *Baçaim* hardly yields to this; yet that of both the one and the other, as well as of *Diu*, is conſiderably decayed, ſince the *Engliſh*, *Dutch*, and other Nations of *Europe*, have brought *Surat* into ſuch Reputation; and the *Portugueſe* loſt, as one may ſay, the Empire of *India*, of which they had Poſſeſſion for an Age.

Diu, which has the Reputation of being impregnable, has always been, and ſtill is, the ſtrongeſt Place the *Portugueſe* have in theſe Parts; it was here that they formerly kept their Fleets; and it was alſo here that the *Mooriſh* Veſſels were viſited, and took their Paſſports to ſecure their Commerce; ſo that there was no Place from whence the King of *Portugal* drew a greater Revenue, either by the Cuſtom-houſe Duties, or the Produce of the Viſits and Paſſports.

Of the Trade of LASSA, *or* BOUTAN, *and* CHAOUL.

BOUTAN, an *Indian* Kingdom, bordering on the States of the *Grand Mogul*, is a Country very little known; though there is a Caravan of Merchants, who yearly ſet out from *Patna*, the greateſt City of *Bengal*, at the End of *December*. The Caravan arrives in eight Days at *Gorrochepour*, the laſt City of the *Mogul*, where the Merchants take Proviſions for the remaining Part of their Journey; from thence to the Foot of the *Naugrocel* Mountains, is eight or nine Days' painful Travel, which Mountains are eight or ten Days getting over; and as they are very rugged, the Inhabitants, who retire here, and are half Savages, come to offer themſelves to Paſſengers, for the Carriage of them and their Merchandize to the Foot of the Deſcent. The Proviſions and Goods are laden

on

on Oxen, which carry about an hundred and fifty Pounds Weight; and the Men paſs, ſeated on a Sort of Cuſhion, which theſe poor People fix on their Backs, and three Women commonly relieve one another in carrying a Man this little Journey; on leaving the Mountains there are Oxen, Camels, Horſes, and even Palanquins, for thoſe who chooſe them, which Travellers do not quit till their Arrival at *Boutan*.

A very great Trade in Muſk, is carried on in all the Conntry of *Boutan*; and it is here alſo, where the fineſt Rhubarb is found; here likewiſe grows the *Semen contra Vermis*, or Wormſeed, and the Country abounds greatly in Martens, ſo that very fine Furs are to be procured here, but little Gold is to be met with in the whole Kingdom; and that which is here is brought from abroad by the Merchants who come to trade. In Regard to Silver, it is believed here are ſome Mines, and that it is from the Products of the Country, that the King of *Boutan* ſtamps his Coin, which is of the ſame Weight and Value as the Roupies, of an octagon Shape, with Characters that are neither *Indian* nor *Chineſe*.

Their ſole Manufactures are coarſe Hempen or Cotton Linens, with which they clothe themſelves in Summer; and ill made Cloth, hardly better than Felt, ſerves for their Winter Clothing.

Chaoul, or *Chaul*, is a City, as I juſt now mentioned, belonging to the *Portugueſe*, which on their Arrival, and *Indian* Conqueſt, they took from the King of *Decan*; its Trade is very conſiderable, but much leſs than it has been formerly; it is, above all, famous for its Silks and Silken Manufactures, with which it almoſt entirely furniſhes *Goa*, as well as a great Part of *India*.

A great many *China* Ships come here, with the Products of that Country, and take Spices, which turn to a good Account. The other Fabricks carried on here, are all Sorts of Varniſh after the *Chineſe* Manner, and divers Works of Lack of all Colours, which nearly approach in Goodneſs to thoſe of *China*. Here are alſo Plenty of Oxen and Cows; all Sorts of Fruit, and the other Products of the Earth, except Grapes, Walnuts, and Cheſnuts.

Of the Commerce of the Coaſts of INDIA *and* MALABAR.

THAT Extent of Coaſt, which runs from the Frontiers of *Guſurate* to Cape *Comorin*, are called the *Indian* Coaſts, in which are found the Kingdoms of *Decan*, *Cuncan*, *Canara*, *Malabar*, which alone contains at leaſt eight or ten, and among them *Cananor*, *Calicut*, *Cranganor*, *Cochin*, *Porca* or *Porcati*, *Calicoulang* and *Coulan*. Of all which Coaſts the *Portugueſe* were for a long Time Maſters, it being from hence that they began their Diſcoveries and Conqueſts in the *Eaſt-Indies*; as *Calicut* was the firſt City where they landed, and *Cananor* the Place where they built their firſt Fortification, which was followed by others almoſt in every maritime City of thoſe little States; but when their Affairs began to fall into Decay in the Eaſt, they abandoned and razed that Part of them which they deemed indefenſible againſt the *Dutch*, who drove them out of the beſt, and among them *Cochin* and *Cranganor*, which theſe latter took in 1661, the *Portugueſe* having only been able to ſave *Goa*, and a few other obſcure Places.

Decan is the firſt Kingdom on this Coaſt after that of *Guſurate*, which for a long Time was a Province of the *Mogul* Empire, as well as the other, though at preſent it is only tributary. Its Sea-Ports, where ſome Trade is tranſacted, are *Geytapour*, *Rajapour*, *Carapatar*, *Dabul*, and *Sifardan*, which conſiſts in Silk Stuffs, and Cotton Cloths ſent by Sea to *Surat*, or what the Inhabitants of *Decan* tranſport by Land into the Territories of the *Mogul*, thoſe of *Golconda*, and as far as *Coromandel*; and in this Kingdom it is, where Pepper is firſt met with.

Rajapour is a City built in the Lands of *Sevagy*, that famous Rebel, who for a long Time buſied all the Forces of the *Great Mogul*, and the King of *Viſapour* his Maſter. It is about twenty Leagues from *Goa*, and produces Saltpetre, Linens, but above all Pepper, which is gathered here in Abundance.

Balagate, a Kingdom of *Aſia*, on the *Indian* Peninſula on this Side the *Ganges*, makes a Part of that of *Decan*, and produces a Quantity of Silk and Cotton; here alſo is found excellent Lack, as good as that of *Pegu*, Areque, Rice, Betel, in which the *Europeans* drive a conſiderable Trade. The Diamonds extracted from that which the *Portugueſe* call the old Mine are very much eſteemed, eſpecially thoſe to which they have given the Name of *Nayffex*, or dwarf Points, becauſe they are naturally brillianted: Here are alſo Amethyſts, Chriſolites, and thoſe Stones which the Lapidaries call Hematites.

Cuncan, which ſome make a Kingdom of itſelf, and others place among the Provinces of *Decan*, is noted for the City of *Goa* ſeated in it, beſides which it has alſo four others, *viz.* *Viſapour*, *Saliapour*, *Paranda*, and *Wingurla*, where ſome Traffick is eſtabliſhed, in all Things ſimilar to that of *Decan*.

Goa is the Capital of what the *Portugueſe* poſſeſs in *India*, taken from the King of *Decan* in 1520, by *Alphonſo Albuquerque*, and continued ever ſince in their Poſſeſſion, as they have always ſucceſsfully defended it againſt the moſt formidable Powers of this Part of *India*, and ſtill guard it with an extreme great Jealouſy againſt the Enterpriſes of the *Dutch*, who having taken from them almoſt all their other Places, found this at leaſt as convenient for the Trade of *Surat*, as all thoſe they poſſeſs on the Coaſts of *India* and *Malabar*. This famous City is ſeated in fifteen Degrees ſix Minutes Latitude, in an Iſle which the Rivers *Mandoüa* and *Guani* form at their Entrance, and is the Reſidence of a Viceroy, who had formerly five large Governments under his Juriſdiction, *viz.* thoſe of *Moſambique*, *Maſcate*, *Ormus*, *Ceylon*, and *Malacca*; at preſent his Authority hardly extends beyond *Goa*, and the Commerce which the *Portugueſe* carry on to *India*, is nearly reduced to that of this City; and even this is ſo trifling, that one Merchant tolerable rich, and in Credit, might with one Ship only maintain it to *Liſbon* and *India*.

So that *Goa* no longer ſupports its ancient Reputation, the *Banians*, who formerly carried on all the Trade, being moved to *Surat*, and by their Retreat having compleated the Ruin of that little Commerce which had eſcaped the Enterpriſes of the *Dutch*, the Cruizes of the *Malabar* Pirates, and, if one may be permitted to ſay ſo, the Slothfulneſs and Indolence of the *Portugueſe* themſelves; among whom, for a long Time paſt, have not been found ſuch valiant Men, as, under the *Gamas* and *Albuquerques*, had made all *Aſia* to tremble; nor thoſe able and enterprizing Merchants, who had carried their Commerce as far as the Arctick Circle.

Thoſe Traders who ſtill remain at *Goa*, continue to lade ſome Cargoes for *Perſia*, *Pegu*, *Manillas*, and *Macao*; but beſides that the Ships' Ladings commonly belong entirely to the *Indian* Merchants, there is hardly a *Portugueſe* rich enough to purchaſe a Cargo of two thouſand Pounds' Value, inſomuch that in all *India* they ſcarce trade for fifteen thouſand Pounds.

Their beſt Returns are thoſe from *Moſambique*, although very much diminiſhed, either by the Loſs of *Mombaze* and *Pate*, on the Coaſt of *Melinda* to the *Arabians*, or becauſe the Negroes do not bring Gold or Ambergris here in ſuch Quantities as formerly, through Fear of the ſaid *Arabians*, who ravage all the neighbouring Country.

The little Gold which the *Portugueſe* draw from *Moſambique*, is diſpoſed of at *Diu* and *Goa*, from whence it ſeldom goes out again, being here converted into a Coin nominated after *St. Thomas*, and worth about 5*s.* 6*d.* Sterling.

It is commonly believed that what has completed the Ruin of the *Portugueſe* Trade in *India*, which, with the Places they ſtill poſſeſs there, might yet revive, is each Governor's intereſting himſelf a Share in the Commerce of the Place he commands at; and that Merchants, no longer enjoying the Liberty they once did, dare not undertake any thing conſiderable in it.

There is, however, a Tribunal eſtabliſhed at *Goa*, to judge and determine the Affairs of a Company, which for a large Sum obtained ſome Years ago an excluſive Grant of the Trade from *Moſambique*, *Monbaz*, *Macao*, and other Places in *India*, appertaining to the Crown of *Portugal*, though I am ignorant how it proſpers, and it is to be doubted whether the ſaid Aſſociation has not done more Harm than Good to this Capital of the *Portugueſe* in the *Indies*; it is, however, from hence only that this Nation are permitted to lade for *Bengal* and *China*.

Baticala,

Baticala, the Metropolis of a little *Aſian* Kingdom in the Peninſula on this Side the *Ganges*, to which it has given its Name, carries on a very conſiderable Trade, almoſt all tranſacted by *Jews*; it conſiſts principally in Rice, which produces here two Crops yearly, diſtinguiſhed by no leſs than four different Sorts, of which the firſt and beſt is called *Gracateli*; the ſecond *Jambucal*; the third *Canacar*; and the fourth *Pacharel*, each of a different Value, according to its Quality. The other Commodities of this Place are, Powdered Sugar, Mirabolans, and Sweetmeats of all Sorts. The Rice and Sugar are exported by the Ships from *Ormus*; and the Mirabolans are ſent to *Perſia* and *Arabia*: A large Quantity of Copper alſo finds Vent here for the making Money, and Kitchen Furniture.

Of MALABAR.

I Have before obſerved that all this Part of *India*, which from a common Name is called *Malabar*, is divided into ſeveral ſmall States, with the Title of Kingdoms, which they almoſt all bear, though they have particular Names to diſtinguiſh them; of which I ſhall give ſome Account, or at leaſt of their chief trading Cities, where the *Europeans* have Settlements from *Goa* to Cape *Comorin*.

The Air is good on all the Coaſt of *Malabar*, and there is hardly a Country in *Aſia* more fertile; the black and white Rice, which makes a Part of its Trade and probably the moſt conſiderable one, is gathered here, as above mentioned, twice a Year; and, beſides a Quantity of excellent Fruits, which ſerve for the Shipping's Refreſhment, here may be laden a Quantity of Cardamoms, Cinnamon, Betel, white Areque, and red for Dying; but above all Pepper, of which vaſt Parcels are annually exported.

There are ſeveral other Parts in *India* where this laſt Commodity is produced, but it no where grows in greater Abundance, or of a better Quality than on this Coaſt, from *Viſapour* to Cape *Comorin*; the largeſt Berry comes from *Viſapour* and *Canara*; all other Places producing the Grain of a leſſer Size, though theſe are moſt eſteemed by the *Indians*, who come here to ſupply themſelves with it.

The Cardamoms are gathered in the Kingdom of *Cananor*, on a Mountain ſix or ſeven Leagues from the Sea, which it is believed is the only Spot in the World where they are found; a few of them are tranſported to *Europe* for medicinal Uſes, and the Reſt to *India*, *Perſia*, and *Arabia*; where the Rice is never thought good, till ſeaſoned with this agreeable Spice.

The Cinnamon is not near ſo good as that of *Ceylon*, and but little of it left, ſince the *Dutch* rooted up what grew at *Cochin*; and the Betel is only proper for the Eaſt.

Mirzeou, is the firſt Place of the Kingdom of *Canara*, near the Frontiers of that of *Viſapour*, about eighteen Leagues to the South of *Goa*; the *Portugueſe* had here one of their moſt ancient Fortifications, but the *Canarins* took it from them in 1662, after a Defence which neither did Honour to the Beſiegers or Beſieged.

Mangalor, which is eighteen Leagues from *Bilipatan*, and *Bacanor* nine Leagues from hence, are the two principal Places of *Canara*, as well for Trade as the Goodneſs of their Ports. Pepper, and black and white Rice, are the chief Merchandizes exported from theſe two Cities, the Trade of this Commodity being ſo great at *Mangalor*, as to lade fifty or ſixty Veſſels with it yearly.

Onor is a ſmall Kingdom of *Biſnagar*, where the *Portugueſe* have a Factory, and purchaſe almoſt all the Pepper gathered here, which has the Reputation of producing the beſt and heavieſt in all *India*. Here may be ſhipped off about eight thouſand Quintals yearly, bought of the King of *Baticala*, who is alſo Sovereign here, and muſt be paid for ſix Months before the Crop, otherwiſe the Factors will return without it. A Quantity of Rice is alſo extracted from hence for ſeveral Parts of *India*.

Cananor is one of the largeſt Kingdoms of *Malabar*, and though it yields to *Calicut* in Extent, it generally exceeds it in Trade and Number of Inhabitants. Its principal maritime Places are *Balipatam*, *Tramapatan*, and *Cananor* the Capital, to which it has given Name. The *Portugueſe* for a long Time preſerved here

the firſt Fort they built in *India*, but loſt it with *Cochin* in 1662; from which Time the *Dutch* who took it, remained in a manner Maſters of the Trade of this Part of *Malabar*, which has not leſs than twenty-five Leagues of Coaſt.

The Goods extracted from hence are, Sugar, Pepper, Ginger, Cardamoms, Areque, Elephants' Teeth, Caſſia, Honey, and Ambergris, found at Cape *Comorin*. Here is ſome Trade carried on in Jewels, as Granate, Sapphires, Hyacinths, Rubies, Topaſſes, and particularly a Stone nominated among the *Europeans* from the Place of its Produce, Cananor Stone, of ſome Uſe in Medicine with the *French*. It is aſſerted, that upwards of two hundred Veſſels come here yearly; and though a conſiderable Trade is carried on in the above-mentioned Commodities, it is certain that Rice, in which this Kingdom ſo much abounds, is the chief Lading of them.

Caola is a Village one League to the Southward of *Cananor*, where very fine Linens are made; but a little farther *Tramapatan*, renowned alſo for its Bazar, Merchants, and Linen.

Bilapatam is a City of *Cananor*, where the greateſt Pepper Trade is carried on; it is large, and inhabited by rich *Mahometan* Merchants, being ſeated on a ſmall River, three Miles from the Sea. The *Engliſh* have a Settlement here, and lade a chief Part of the Pepper they ſend to *Europe*.

Tilichery, called by the *French Tilceri*, is four Leagues from the laſt-mentioned Place, three from *Cananor*, though Mr. *Eachard* puts it down thirty Miles, and only one from *Tramapatan*. The *Engliſh* have a Fort here, and Prince *Onitri* gave the *French* Permiſſion in 1670 to tranſlate their Factory from *Bilapatan* here. Its Trade is the ſame as that of the above-mentioned neighbouring Places, with the Addition, that here is found ſome Sanders, and from this Kingdom is ſhipped a great deal of Pepper for *Perſia*, *Baſſora*, *Mocha*, and *Maſcati*, at which Places the ſmalleſt Grain is in the greateſt Eſteem.

Calicut, called formerly the Empire of *Samorin*, is the largeſt of all the Kingdoms on this Coaſt, and the Title of Emperor, which all other Princes give to its Sovereign, ſeems to acknowledge a Superiority; yet, in Reality, all the petty Kings of this Part of *India*, are wholly independent one of another.

This Kingdom extends from *Pudepattan* River to that of *Cranganor*, being about thirty Leagues of Coaſt, and was once a Place of the greateſt Trade in *India*, as well on Account of the Reſort here of foreign Merchants, as for the Commerce and Navigation that its Ships maintained with the moſt celebrated Cities of *Aſia*: But firſt *Goa*, and afterwards *Surat* carried away the Buſineſs from it; beſides, the Coaſt being bad, and Inundations very frequent, have not a little contributed to drive its *quondam* great Trade from hence, though here ſtill remains a tolerable one.

The *Engliſh*, *French*, and *Dutch* have Settlements here, and though it be the Capital of the *Samorin* Empire, yet the Court removed farther within Land, and thereby occaſioned a conſiderable Diminution to the before decayed Trade of this Place; its Bazar is nevertheleſs one of the handſomeſt of *Malabar*, it containing four or five Streets always full of rich Goods, of which the chief are Pepper; fine Linens; natural Saltpetre, that wants but little Purification, and which is found in Plenty all over the Kingdom, particularly on the Side of *Sirinpatan*; Sanders; excellent Rice, which here, as well as on all the Reſt of this Coaſt, is not one of the leaſt Objects of Trade.

The Sand of the Sea Shore on the Coaſt of *Calicut*, eſpecially at the River's-Mouth, is found mixed with Grains of pure Gold, by which many poor People find a comfortable Subſiſtence, though the Grains are commonly very ſmall.

Tanor is the chief trading Place of a very little Kingdom, from which it is denominated, and whoſe King, though his Dominions are hardly ten Leagues ſquare, is as much a Sovereign as the Emperour of *Samorin* himſelf.

This City, if it may be called ſo, is five Leagues to the Southward of *Calicut*; it has only an open Road without any River, and the Inhabitants of its Bazar are rich *Mahometans*; this Nation is at Enmity with the *Dutch*, but ſtrongly allied to the *Portugueſe*, and the *French* were well received by them in 1672.

Cranganor, detween *Tanor* and *Cochin*, is but a very ſmall Kingdom, where nevertheleſs the *Portugueſe* had a conſiderable Fort, which was called *Cranganor*

of

of the Portugueſe, to diſtinguiſh it from the *Cranganor of the Malabars*: The *Dutch* took it in 1662.

Cochin, another Kingdom which commences where the laſt-mentioned ends, had two Capitals diſtinguiſhed like thoſe of *Cranganor*, and *Cochin* of the *Portugueſe*, and was alſo taken by the *Dutch* in *January* 1667.

Porco, *Percatti*, or *Percats*, come next; and afterwards *Calecoulang*, and *Coulang*, which are the laſt Kingdoms of *Malabar*. The *Engliſh* and *Dutch* have their Factories in the chief and beſt Places of theſe petty Kingdoms; and the latter have Forts at *Coulang* and *Cochin*, to ſecure the Pepper Trade which is very conſiderable here, and which their Veſſels yearly lade in paſſing, continuing their Route to *Surat*, *Perſia*, and the *Red* Sea, where they diſpoſe of the major Part, in Exchange for many rich Merchandizes, that all theſe Places produce, and which they bring afterwards to *Batavia*.

The Traffick of theſe ſix ſmall Kingdoms is but little different from that of the Reſt of *Malabar*, though there are notwithſtanding ſome natural Productions, that are peculiar to each of them, and not to be found in the others; which in ſome Meaſure varies the Trade. In general the Exports from hence are Pepper, Cardamoms, Laque, Ginger, Tamarinds, Opium, Ambergris, Rice black and white, Kiſſeri, and Cayang, a Species of Peaſe, Sanders, Saltpetre, and Linens of divers Sorts, though neither ſo fine or well painted as thoſe about *Surat*, of which I have already ſpoke; nor thoſe of *Coromandel* or *Bengal*, of which I ſhall treat hereafter.

Coulang is a Kingdom in the Peninſula of *India*, on the Coaſt of *Malabar*, whoſe principal Trade conſiſts, like thoſe before deſcribed, in Pepper, which the *European* Ships and *Indian* Junks come here to lade; and there is on the Coaſt a Fiſhery for Pearls, pretty conſiderable, which belongs to the King.

Of the Coaſt of The PESCHERIE.

THIS Coaſt, properly that of *Madura*, called alſo the Pearl Coaſt, extends from Cape *Camori*, or *Camorin*, to *Negapatan*, or *Nagapatnam*, being the firſt Part of *Coromandel*. It has before it the Iſles of *Manar* and *Ceylon*, and it is in the Straits, which ſeparate them from the Continent, that the Pearl Fiſhery is carried on.

The inland Parts of this Country are arid and almoſt barren, where none of thoſe Vegetables or admirable Fruits are gathered that render Life ſo commodious in all *India*; except a little Rice, hardly ſufficient for the Inhabitants; ſo that it is only the Pearl Fiſhery that keeps the Natives here.

Tutucorin is deemed the Capital of this Coaſt, though leſs for its Grandeur and Beauty, than for the Fiſhery of Pearls carried on here, and becauſe its Inhabitants are the moſt expert in it; thoſe alſo of *Calipatnam* are in Eſteem, and theſe two Towns furniſh the greateſt Number of Boats. The *Portugueſe* ſettled here on their firſt Arrival in *India*, and the *Dutch* took it from them in 1658, and have kept it ever ſince, ſharing this marine Treaſure with the Sovereign of the Country; all the Oyſters taken being publickly ſold as ſoon as the Fiſhery is over.

Of the Coaſt of COROMANDEL.

THIS Coaſt begins at the Point of *Negapatam*, where that of the *Peſcherie* ends, and reaches to the River *Nagund*, and the City of *Maſulipatam*; though ſome give it a greater Extent, and continue it to *Bengal*.

The Trade carried on by the *Europeans* here, is very conſiderable, where they have all great Settlements, Forts, and Factories; having been invited thereto by the Goodneſs of this Port and Roads on this Coaſt, which are the beſt in *India*, and are a great Refuge to their Ships, when during the bad Mouſon, they are obliged to quit the Coaſt of *Guſurate* and *Malabar*, as they cannot remain there in Safety.

The

The chief Eſtabliſhments which the *Europeans* have on this Coaſt, are *Madras* or *Madraſpatnam*, *Pettepollee*, *Connimeer*, *Metchlepatam*, *Viſagapatam*, and *Maddapollam*, *N. B.* Patnam *means a City in all the* Peninſula *on this Side the* Ganges, belonging to the *Engliſh*; *Pondicherry*, appertaining to the *French*; *Negapatnam*, *Niſipatan*, otherwiſe *Portapouli*, *Teguenapatnam*, *Sadraſpatnam*, *Maſulipatnam*, *Datkeron*, *Bimilipatnam*, *Nagueruantze*, *Conjemere*, and *Paliacate*, poſſeſſed by the *Dutch*, and *Tranquebar* by the *Danes*. I might here introduce *St. Thomas*, as a *Portugueſe* Factory on this Coaſt, being the Place where they tranſact their Trade from *Coromandel*, but this Nation has no Fortification here, as others have at the Places afore-mentioned.

Madras is ſeated in the Latitude of thirteen Degrees, ten Minutes, Mr. *Charles Lockyer* ſays thirty Degrees North, and an hundred and two Degrees thirty Minutes of Eaſt Longitude, and after the *Dutch* had ſhut the *Engliſh* out from *Bantam*, became the Reſidence of one of the Company's two Preſidents in theſe Parts, and is now regarded as the Centre of its Trade, either with *Europe* or *India*.

From four to ſix Ships is the common Number that arrive here yearly, directly from *Europe*, and much the ſame in Return, laden with the Goods of the Country, and thoſe collected from their other Factories on this Coaſt, or what their Trade in *India* has brought here, which are Silk Stuffs, Silk and Cotton Handkerchiefs, Cotton in Thread and Wool, Indigo; all Sorts of Muſlins and Callicoes; *Maſulipatnam* Chints, reckoned the moſt beautiful made in the *Indies*, and the moſt eſteemed in *Europe*; Diamonds and other precious Stones from the Mines of *Golconda*, &c.

A Trade is carried on from hence by the Factory, to all Parts eaſtward of the Cape of *Good Hope*, as to *China*, *Manilla*, *Batavia*, the Coaſt of *Java*, *Jahore*, *Malacca*, *Queda*, *Pegu*, *Arracan*, *Bengal*, *Siam*, and all the *Coromandel* Coaſt, with *Achen*, *Priaman*, *Indrapore*, *Bencoolen*, *Bengal*, &c. though the *China* Voyage is the moſt deſirable one, on Account of the Returns in Gold and fine Goods; but the Company having for ſome Years paſt ſent Ships directly from *England* there, the Advantages of a Trade between that Country and *Madras* are greatly diminiſhed; and that to the *Manillas* is of two Sorts, the one carried on by the *Engliſh* Merchants ſettled on the *Coromandel* Coaſt, and the others by the Traders of the ſame Nation from *Europe*, but both muſt go under foreign Colours, thoſe from hence under *Iriſh*, and thoſe from thence under ſome *Pagan*, the *Spaniards* admitting all Nations whether from *Europe* or *India*, at the *Manillas*, in their own Ships, and under their own Colours, except the *Engliſh* and *Dutch*, who are denied this Privilege; the latter for their Attempts to take them, more particularly for their Enterprize againſt them 1649; though the Prohibition to the *Engliſh* is unmerited, at leaſt for any thing I ever heard.

Few or none of our Nation value themſelves on the *Iriſh* Enſign to go there directly, this Trade being regarded as illegal here, though permitted there, ſo that they are generally ſupplied with our Goods, by the other Method open to them; the Goods ſent from *Madras* there, are long Cloths, or white Cotton Cloths, of ſeventy-two Cobdes in Length, and two and a Quarter broad; others of the ſame Length and Breadth much finer; the ſame Species, common Blues; white common Salempoures; and the ſame blue; various Sorts of Percales, white and blue; common Cambayes of *Madras*, and *Bengal*; Mongonpous, *Bengal* Taffeties, of red and mixed Colours, Souſies, common and fine Belelaes, *Melchapatan* Sattins, Lampaſſes, and Chites, or painted Linens; Gueraſſes, and raw Silk of *Bengal*. Beſides which *Indian* Commodities, the *Engliſh* ſend a great many of the *European* ones; ſuch as Camlets, Cloths, Serges, Hats, worſted Stockings, Cryſtals, *Flanders* Lace, Perpetuanas, *&c*, and when a Cargo is intended for the *Manillas* from *Europe*, ſome good *Graves* Claret, and *Nantes* Brandy in Bottles ſhould be added, as this finds an advantageous Diſpatch among our Countrymen at *Madras*, or if carried on, among the *Spaniards* at the *Phillipines*. The Commodities brought back to our ſaid Settlements on Return of the Voyages, are Dollars, Brimſtone, Leaf Tobacco, *&c*. and ſometimes they touch at *China* in their Way Home, and there truck the Merchandize they got from the *Spaniards* againſt Gold, as this leaves a great Profit.

But

But lately the Gentlemen at *Madras* have ſent their largeſt Ships to *Mocha*, *Perſia*, and *Surat*, with *Bengal* and *China* Goods, calling at ſeveral Ports on the *Malabar* Coaſt in their Way, eſpecially at *Calicut* for Pepper, Cocoa Nuts, Coyr, Cardamoms, Nux Vomica, Turmerick, Coculus Indi, *&c.* and Rice is often a profitable Commodity in *Mocha* and *Perſia*, as I have before mentioned.

A Man with a fair Character may eaſily find Money here on his own perſonal Security at *Bottomree*, or *Reſpondentia*, to what Port ſoever he be bound, at the following Rates, *viz.*

To *China*, 20 or 25 *per Cent.* *China* and *Perſia* 40 to 45. *Bengal* 16 to 18. *Achen* 16 to 18. *Batavia* 20. *Pegu* 20 to 25. *Batavia* and *Surat* 35 to 40. *Manilla* 30 to 35. *Surat* 25 to 35. *Surat* and *Perſia* 35 to 40. And *Mocha* 30 *per Cent.*

Pondicherry is ſeated in the Territories of the Prince of *Gingy*, at twelve Degrees of Latitude, and an hundred and fourteen Longitude, where the *French* have a very ſtrong Fortification, and well garriſoned, as we lately experienced to our Coſt; their Warehouſes here are large, and the Goods with which they are commonly filled, deſtined either for *Europe*, or the Commerce of *India*, *Perſia*, and the *Red* Sea, are collected leſs from *Coromandel* than from *Bengal*, *Surat*, and the Coaſt of *Malabar*, where the *French* Company's Ships go to lade them; there is notwithſtanding a Quantity of Cotton Cloth made here, and in its Neighbourhood, both white and ſtained, with Muſlins, Silk, *&c.* all which Commodities they lade for *Europe*, and make their Cargoes to conſiſt of the ſame Goods as the *Engliſh*.

The *Coromandel* Trade is one of the moſt important to the *Dutch*, of any they carry on in *India*, as may be judged from the great Number of Settlements which they have on this Coaſt, and even in the Capital of *Golconda*, of which I have above mentioned the Chief; although a few Years preceding the End of the ſeventeenth Century it was become a Sort of an Expence inſtead of Benefit to them, by the great and continual Impoſitions of the *Mooriſh* Rajas, which ſeemed not to be diſapproved of by the King. This bad Uſage obliged them to arm for obtaining the Satisfaction which they thought due: They took *Maſulipatnam*, and by that obliged the King of *Golconda* not only to confirm their ancient Agreements, but to add thoſe that were more advantageous; and alſo to aſcertain in a better Manner the Cuſtoms on Imports and Exports, which the Rajas, who formed them of their own Government, only levied according to their Pleaſure, or exacted in Preſents, near as much as the Company could benefit themſelves, on the Goods they ſhipped or delivered there.

Three of the moſt advantageous Prerogatives that the *Dutch* now enjoy in the States of the King of *Golconda* are, firſt, that no Merchant with whom the Chief of the Factory is in Treaty about Buſineſs, ſhall be moleſted either in Perſon or Effects, even for the King's Affairs, till previouſly the Company be ſatisfied in all their Pretenſions on the ſaid Merchant. Secondly, that the Weavers, Painters, and other Workmen employed by the Company, ſhall not be interrupted in their Labours, although for the King's Service, till they have complied with their Contracts; and thirdly, that they ſhall have Liberty to employ what Brokers they pleaſe, without being obliged to take thoſe belonging to the King or Rajahs.

And they have likewiſe another Privilege which they enjoy in common with the other *Europeans*, and that is not to pay the Duty of *Chappadellallah*, that is making the Linens, which to the Natives amount to twelve *per Cent.*

The Goods which the *Dutch* carry to *Coromandel*, are principally Spices, Silver, and *Japan* Copper, Mine Gold, *Malacca* Pewter, Quickſilver, Lead, Vermillion, Camphire, Elephants' Teeth, Sanders, Siampan, *European* Cloths and Stuffs; for which they barter Linens, and all the other Commodities before ſpoken of.

Golconda, which I have ſo often mentioned in ſpeaking of the Trade tranſacted on this Coaſt, is the moſt conſiderable of all the Kingdoms in this Part of *India*, either for Extent, or the Buſineſs that Strangers negociate here, or that its Merchants carry into all Parts of *Aſia*.

Beſides the ancient Domains of the *Golcondan* Kings, it is encreaſed by a Part of *Biſnagar*, and *Orixa*, this confining on *Bengal*, and the other Neighbour to the *Mogul*, ſeparated by Mountains from *Malabar*.

This Kingdom is principally celebrated for two Things, *viz.* the Port of *Maſulipatnam*, and the Diamond Mines, which have been diſcovered for above two hundred Years, and produce great Quantities of thoſe precious Stones. The major Part of the Country of *Golconda* is ſo fertile, that it commonly produces two, and ſometimes three Crops of Rice in a Year, ſo that this Commodity makes one of the principal Articles of its Trade. The Cotton Cloths, and among others, the painted ones of *Maſulipatnam*; the Salempouris, Percalles, and the Betilles of *Golconda* and *Ragamandraca*; the Dongris of *Tatepaque*, called Dougrais of *Peta*, and the fine Betilles of *Naſapori*, and of *Condepouli*, are not the ſmalleſt Objects of Trade; and it is an inconceivable Quantity that is yearly tranſported to all *Aſia*, and of which too many are brought to *Europe*. The Commerce of theſe Linens paſſes entirely through the Hands of Pagans, Natives of the Country; though confined only to thoſe among them called the *Banians*, who compoſe the third Claſs or Tribe of thoſe Idolaters, and who are all Merchants, Brokers, Factors, or Exchangers. The Indigo of *Golconda* hardly yields in Quality to that of *Lahor*, though it is not ſo good as that of *Agra*; it is chiefly cultivated at *Condepouli*, *Maſulipatnam*, *Sadraſpatnam*, *Gelapoudi*, and *Eſcoines*, from whence the *Dutch* uſually fetch it to ſell at *Chaul* and *Dabul* to the North.

Cryſtal, Granates, Topaſſes, Agates, Amethyſts, Bezoar, Betel, Rice, Steel, Iron, and a Plenty of Refreſhment for Ships coming there to trade, do alſo conſtitute a Part of their Commerce, which is ſo advantageous here, and at the other Ports dependent on it, to the *Dutch*, as to induce them many Years to employ upward of three hundred thouſand Pounds in Goods, of which they ſend a Part to *Europe*, and diſtribute the Reſt in *India*.

Maſulipatnam is the principal Port of the Kingdom of *Golconda*, on the Coaſt of *Coromandel*, and called ſo from *Maſuli*, a Fiſh, and *Patnam*, a City, being a Name ſuited by the Natives to its Situation, which is upon a River greatly abounding in this agreeable Food, as its Road alſo does, being beſides the ſafeſt in all *India*. Theſe Advantages draw here the Merchants of all Nations, and is equally commodious to them, and thoſe of the Country, for ſending their Ships into almoſt all Parts of *Aſia*; the greateſt Number of thoſe bound for *Pegu*, *Siam*, *Aracan*, *Bengal*, *Cochinchina*, the *Red Sea*, *Madagaſcar*, and the *Manillas*, ſailing from thence; and though the Exports here are the ſame as thoſe from the Reſt of this Kingdom, it is principally for the Beauty of its painted Linens, that it is ſo well known in *Europe*, of which here are two Sorts, as at *Surat* and other Places in *India*, *viz.* the one painted with Pencils, and the other only ſtamped; and notwithſtanding the ſame Colours are uſed in both Species, thoſe painted greatly excel in Beauty: Theſe Colours, eſpecially the red, are fixed in with a Plant called Chay, only found in the Kingdom of *Golconda* along the *Coromandel* Coaſt; and the Advantage which it gives to the Linens wherein it is uſed, is, that they become more beautiful with waſhing; the Vivacity of the Colours augmenting by the Water, and laſting, as one may ſay, longer than the Stuff itſelf. At *Maſulipatnam* are alſo found, Salt, Serges, ſome other light Stuffs, and Rice in greater Abundance than in any other Place on the Coaſt.

Of the Kingdom of BENGAL.

THOSE who terminate the Coaſt of *Coromandel* at *Maſulipatnam*, call that the Coaſt of *Orixa* which continues to *Bengal*, and even ſome comprehend in this the City of *Pipeli*, though it really is in the Kingdom of *Bengal*.

Although the Kingdom of *Orixa*, which gives Name to this Coaſt, has many Ports, they are all ſo bad, that the *Europeans* carry on little or no Trade at them, ſo I ſhall paſs on to that of *Bengal*, one of the richeſt in the *Indies*.

Bengal is a Kingdom ſituated to the Eaſt of *Indoſtan*, towards the Sea; ſome formerly believed, and among them *Moreri*, that there had been a City called *Bengal*, which had given its Name to the Kingdom, of which it was the Capital. It is

certain that there neither is, nor ever was, a City ſo called in theſe Parts; and what is more, there is no City at all, ſeated at either of the *Ganges'* Mouths, as the ſaid Authors have aſſerted. If there is a Metropolis, it muſt be that where the Viceroy reſides, which was formerly at *Dacca* or *Decca*, but for a long Time paſt the Court has been kept at *Caſembazar*; the firſt of theſe two Cities is large, and ſituated on the *Oriental* Branch of the *Ganges*, near ſixty Leagues from its Mouth, and the other is upon the weſtern Arm of the ſame River, at ſixty Leagues above *Ougli*.

All the Maps of this Country are faulty, as well in the Form as Latitude of this Kingdom's Coaſt, they making the *Ganges'* Diſcharge into the Gulf of *Bengal*, to be at twenty-three Degrees of Latitude, when it is really at twenty-one Degrees fifteen Minutes; and are alſo very defective in the Situation of Places, which I thought proper to mention as not foreign to my Subject.

The Commerce carried on here, as well by Strangers as the Inhabitants, is very conſiderable; and in which here are concerned *Perſians*, *Abyſſinians*, *Arabians*, *Guzuratins*, *Malabars*, *Turks*, *Moors*, *Jews*, *Georgians*, *Armenians*, and in fine, Merchants from all Parts of *Aſia*. All the Chriſtian Nations eſtabliſhed in *India* ſend their Ships here, as it is the Merchandize of *Bengal* that makes a conſiderable Part of their Reladings for *Europe*, beſides thoſe they extract for their *Indian* Trade.

The moſt trading Cities, and where the *Engliſh*, *French*, and *Dutch*, have their moſt flouriſhing Settlements, are *Caſembazar*, *Ougli Ougeli* or *Hugueli*, *Pipeli*, and *Bellezoor*; to which may be added *Patna*; for although ſome place it without the Juriſdiction of *Bengal*, by making it the Capital of a petty Kingdom ſubject to the *Mogul*, yet as its Trade is all carried on through *Ougli*, I ſhall not ſeparate it from the afore-mentioned Cities.

The *Engliſh* have their Eſtabliſhments at *Ougli*, *Pipeli*, and *Bellezoor*, the *French* at the two firſt, and the *Dutch* in all the ſaid five Places.

Ougli is the City where all the Nations concur, who carry on the *Bengal* Trade, and where the richeſt Merchants of the Country reſide, whether *Moors* or *Pagans*. Its Warehouſes and Shops are always full of rich *Indian* Goods, but each Sect of the Natives have their particular Quarters in the Bezars, without ever mixing, as much for the greater Freedom in Trade, as out of a Principle of Religion, which hinders theſe ſuperſtitious People from having a too great Familiarity together.

The Lodge which the *Dutch* occupy at this Place, is very large and magnificent, having at once the Air of a Fortification and Palace. The Director lives here like a Prince; and next to *Batavia*, this is the Place where the Power and Splendor of the Company appears in their greateſt Luſtre.

Caſembazar is the Part of *Aſia*, from whence the *Dutch* draw the greateſt Quantity of Silks, which they bring down the *Ganges* to *Ougli*, and from thence ſend Part to *Japan*, and Part to *Europe*; it is for this Buſineſs that they maintain a conſiderable Factory here, though they beſides are furniſhed by it alſo with a Quantity of Taffeties plain and ſtriped, and the fineſt Linens that *Bengal* produces.

The Crop of Silks at *Caſembazar* may amount in a common Year to twenty-two thouſand Bales of a hundred Pounds each, of which the *Dutch* Company have Leave to buy only ſix or ſeven thouſand, the Reſt are divided between the *Tartars* and the *Mogul*'s Subjects, or remain in the Country for the Manufacturers.

At *Chiopera*, in the Diſtrict of *Patna*, are the beſt Refiners of Saltpetre, and it is there that the greateſt Purchaſes of this Commodity are made; and from whence the largeſt Quantity of it comes that is exported from *Bengal*; and it is for this Trade only that the *Dutch* have a Factory here.

It muſt be obſerved, that in Regard to the Merchandizes that are extracted from *Patna* and *Caſembazar*, they muſt be ready to be carried down to *Ougli* at the End of the rainy Seaſon, as the Canals by which they are conducted grow dry in two Months, after the fair weather Monſoon commences, and then the Land Carriage greatly augments the Expence.

The Merchandize proper for *Bengal*, are *Japan* Silver, Copper, *Malacca* Pewter, Vermillion, Alkermes, Quickſilver, Lead, Tables, Cabinets, and other Moveables

ables japanned, Porcelaine of *China* or *Japan*, Looking Glaſſes, Cloths, and all Sorts of *European* Merchandize, Pepper, Spice, Areque, Elephants of *Ceylon*, and their Teeth, Birds of Paradiſe, and *Ternate* Parroquets. The Goods of this Country's Growth, or that are brought there from the neighbouring Kingdoms, with which the *Europeons* uſually lade their Ships from the homeward bound Voyage, conſiſt of raw Silks, called *Tany* and *Mouta*, Cotton Wool and Thread, red Wood, various Boles, Coffee, Cowries, or Cauris, which ſerve for ſmall Money here; white and yellow Wax, Canes and Rattans, Gutta Gamba, *Bengal*, *Lahor*, *Coromandel*, and *Arga* Indigo, three Sorts of Lacque, Myrrh, various Perfumes, Salt, Rice, Saltpetre refined and unrefined, Terra Merita, Sugar, and Sugar Candy.

With theſe two laſt the *Dutch* lade ſeveral Ships entirely every Year; Part for their own Accounts, and Part on Freight for the *Mooriſh* Merchants, deſtined principally for *Perſia*.

There is likewiſe exported from *Bengal*, Borax, Opium, Grain, Gums, and Medicinal Roots, embroidered Counterpanes, Carpets, and Stuffs, ſent to *China*, *Japan*, *Camboya*, *Tonquin*, and ſeveral other Parts of *India*, and of which large Parcels come to *Europe*, Fruits, Butter, packed in Copper Pots, or Sacks made of Buffalo Skins, Honey, various Sorts of Sweetmeats, Diamonds, of which here is an ancient Mine in the Kingdom, and many other Species of precious Stones, Slaves, either of the Country, where the poor People ſell their Children to ſubſiſt, or thoſe of *Aracan*, a neighbouring Kingdom, whoſe Inhabitants exerciſe Piracy more than Trade, and whoſe principal Merchandize conſiſts in their unhappy Neighbours of both Sexes, reduced by them to Slavery.

Although all theſe Commodities make a rich Object of Trade to the Nations concerned therein, it muſt notwithſtanding be allowed that the Dimities, Tickings, Linens, and other Cotton Goods made here, are Commodities that the *European* Companies' Ships bring back in the greateſt Quantities, and with which the *Indian* Merchants alſo make a great Part of their Veſſels' Ladings. It is in this Kingdom only that the Herb grows of which many Sorts of Goods are made; and the Natives of the Country who carry on the inland Trade, and through whoſe Hands almoſt all the *European* Affairs paſs, are the *Banians*, who are all either Merchants, Brokers, Bankers, or Book-keepers, and among them many are concerned in the Marine Trade, either in their own Ships, or by thoſe they freight.

Of the Trade of ASEM, *or* AZEM.

THIS Kingdom, in the Great *Indies*, is one of the beſt Countries in *Aſia*, rich in the Mines of almoſt all Sorts of Metals, ſuch as Gold, Silver, Steel, Lead, Iron, *&c.* It alſo produces a large Quantity of coarſe Silk, and the beſt Lacque in all the World. All the Mines belong to the King, and the Gold is prohibited Exportation, though the Silver Coin makes an Article in Trade, and may be carried off by Strangers. Another Branch of Commerce, and that no ſmall one, conſiſts in Bracelets and Collars, for the Arms and Legs, of which they uſe great Quantities themſelves, and ſend as many to the Kingdom of *Boutan*.

Of the Trade of BENARES, *or* BANAROUS.

THIS is one of the greateſt Cities in the *Eaſt-Indies*, and ſeated to the Northward of the *Ganges* which waſhes its Walls; its Trade is very conſiderable, particularly in Silk Stuffs and Cotton Linen, both white and painted. The Caravanſeras here are many, and very commodious, in the principal of which are ſold the moſt valuable Goods, under two vaſt Galleries raiſed in the Middle of the Court; and as it is commonly the Artificers themſelves who come here to ſell their Goods, Strangers may have them at firſt Hand, and conſequently cheaper than in moſt of the other Cities of *India*, where the *Banians*, *Jews*, or *Armenians*, buy them to reſell.

Of

Of ARACAN *and* PEGU.

THESE two Kingdoms, which follow that of *Bengal*, and whereof the latter's Coaſt joins thoſe of *Malacca*, are better known in *India* by the piratical Courſes of the one, and the laſting Wars of the other with the King of *Siam*, for the famous white Elephant, than for the Largeneſs of their Commerce with the *Europaans*; the *Engliſh* and *Dutch* however preſerve ſome Correſpondence with *Aracan*, on Account of the Refreſhments which their Ships are ſometimes obliged to take there, yet without having any Settlements, although the King has often invited thoſe two Nations to an Eſtabliſhment in his Country.

In Reſpect to the Kingdom of *Pegu*, the *Dutch* ſend ſome Ships here yearly from their Settlements on the Coaſts of *Coromandel* and *Bengal*, laden with Linens of this Kingdom, from *Maſulipatnam* and *Meliapour*, better known under the Name of *St. Thomas*. The proper Linens for this Commerce are Lagias, or Alegias, Topities, and Corpi Pintadi; the *Peguans* preferring the Linens of *Meliapour* to all others, and it is with theſe that they clothe themſelves, without the Tailor's Aſſiſtance, each Piece making a complete Habit, in turning it many Times, and in many Manners about their Body; the Women cut them in four, and cover themſelves to their Knees. There is alſo brought them Opium, Pepper, Cinnamon, Nutmegs, Sanders, and Wood of Paradiſe.

The Exports from hence are Ginger, Gold, Silver, precious Stones, and Pearls, which two laſt are contraband, and here muſt be a Permiſſion from the King, for either buying or ſelling. This Kingdom alſo produces a Quantity of Rice, and it is from hence that the *Dutch* carry it to *Malacca*, beſides which the Exports are Elephants' Teeth, Pewter, Honey, Wax, Cardamom, Long Pepper, Cachou, *&c.*

Of MALACCA.

THIS City is ſeated at two Degrees and a half Latitude on this Side the Line in the Straits, to which it gives Name, and ſeparates the *Terra-Firma* from the Iſle of *Sumatra*. *Alphonſo Albuquerque* took it from the King of *Ihor*, or rather *Gohor*, in 1511, and it was unſucceſsfully attacked an hundred Years after by the *Dutch* though they were more fortunate in 1641, when they drove the *Portugueſe* out, after a Siege of ſix Months, and have remained Maſters of it ever ſince. Its Port is one of the beſt and ſafeſt in *India*, and may be entered at all Times of the Year, which is an Advantage that neither that of *Surat* or *Goa* enjoys, nor any others of *Guzurate* or *Malabar*, which are all ſubject to the Monſoons. Whilſt it remained in the Hands of the *Portugueſe*, it was one of the Staples for the *Indian* Trade, and as a Storehouſe to all the Eaſt, where the *India* Nations, accuſtomed to the marine Traffick, uſed to aſſemble.

It ſtill ſupports its Reputation, and its Commerce is yet very conſiderable, particularly in Linens from *Surat*, *Coromandel*, and *Bengal*, which find Vent here, at *Andra*, *Giery*, and in the Rivers of *Siaca* and *Piera*, and here are alſo found other Goods, of which a Part go by Land to *Siam* and *Pegu*.

The major Part of the Payments for theſe Linens, and other Commodities brought here by the *Dutch*, are in Gold and Pewter, on which large Profits are made in the other Parts of *India* they are ſent to. The chief Officer in Trade that the *Dutch* Company maintains here is called *Chabander*, an *Indian* Name, which ſignifies Super-Intendant, who is independent of the Governor, and has the ſole Direction of the Trade and the Cuſtoms.

The *Dutch* are here about two or three hundred Families; the other Merchants are *Malayans*, *Moors*, or *Chineſe*; theſe laſt only concerning themſelves in the Retail of Tea, Sugar Candy, Sweetmeats, *&c.* but the others have their Shops ever full of all Sorts of Goods, that the *Dutch* Ships bring here.

The Trade carried on at *Malacca* was the leaſt Motive to the *Dutch* for its Capture, or that now induces them to maintain and guard it with ſo much Care;

but its admirable Situation for that of *China* and *Japan*, beſides its commanding all the Straits in which it is ſeated, ſo that no Nation can paſs to the Eaſtward without their Permiſſion.

Ligor and *Tenaſſerin* are two petty Kingdoms in the Peninſula of *Malacca*, dependent on the King of *Siam*; the *Dutch* have Settlements here, and carry on a good Trade in Pepper and Pewter, of which I ſhall ſpeak in the following Section where I am to treat

Of the Trade of SIAM.

THIS Kingdom, ever ſince the Separation of *Tonquin* and *Cochinchina*, is one of the moſt powerful in *India:* Its preſent Bounds are *Cambaye* to the Eaſt, *Lahor* to the North, *Ava* and *Pegu* to the Weſt, and the Sea of the Gulf of *Siam*, to which it gives Name, to the South. Its Capital is *Seia-Juthaia*, of which the *Europeans* have made *Judtia*, *Judia*, *Judea*, and *Odia*, and the *Portugueſe* call it *Siam*.

This City is ſeated on the *Menam*, a great River that falls into the Gulf of *Siam* four Days' Journey from it; and which, like the *Nile*, regularly overflowing and drowning the whole Country at periodical Seaſons, renders it very fertile in all Neceſſaries of Life, particularly in Rice, of which Foreigners yearly export ſeveral Ships' Lading; though large Ships cannot get up the River, but are obliged to attend and take in their Cargoes below, whilſt ſmall ones may get up to *Bancock*, five or ſix Leagues above its Mouth, but only Barks and Junks can reach the Capital.

There is no Part of *Aſia* from whence Merchants are not ſeen at *Juthaia*, as they come here from *Japan*, *China*, the *Philippines*, *Tonquin*, *Cochinchina*, *Chiampa*, *Camboya*, the Iſles of *Sunda*, *Bengal*, the Coaſt of *Coromandel*, *Surat*, *Perſia*, and *Arabia*; and the *European* Nations that have Settlements here are the *Engliſh*, *Dutch*, and *Portugueſe*; the *French*, who had one alſo in 1686, were driven out from *Bancock* in 1688, and though they afterwards ſettled in another Part of the Kingdom, their Trade was ſo inconſiderable, that it may be juſtly ſaid they have ever ſince ſent more Miſſionaries than Merchants there.

It is only the *Europeans*, *Chineſe*, and *Moors*, that is, all the *Mahometans*, who are privileged to have Houſes in this City; the *Indian* Nations having them without, though their Quarters are all ſeparate, where they carry on their Trade, and exerciſe their Religion.

The *Dutch* carry on the greateſt Trade here, and the Houſe they built in 1634, is one of the handſomeſt they have in all the *Eaſt*; yet this Settlement is only reckoned the twentieth in the thirty-two principal ones they have in all, under the general Government of *Batavia*.

Trade is one of the chief Profeſſions of the *Siamois*, and it may be truely ſaid, that their King is the principal Merchant among them, whether for the Traffick at home or abroad.

His foreign Commerce is moſtly to *China*, where he annnally ſends five or ſix large Veſſels; to *Japan*, where there go two or three; to *Camboya*, *Tonquin*, and *Cochinchina*, the Deſtination is as many; and in Fine, to all the Coaſts of *India*, eſpecially *Surat*, and even to *Perſia*, where there are always ſome of his Ships, commanded commonly by Chriſtians, as his own Subjects are no great Sailors.

The inland Trade of the Kingdom, carried on by his Factors, does not only conſiſt in the valuable Commodities imported by his Shipping, of which his Warehouſes are always full, and ſold at the Prices he thinks proper; but alſo in the different Productions of his Dominions, whether they be the Tribute of his Subjects or what he cultivates in the Lands particularly belonging to him: So that only in Betel and Areque, green and dry, the King's Agents get upwards of ſix or ſeven hundred thouſand *French* Livres: and it is reported, that the Cuſtoms of *Bancock*, and the farming the circumjacent Gardens, produce him more than four Millions yearly. This Kingdom is rich in Mines of Pewter, Lead, Silver, and even Gold, though theſe laſt produce but little, and that of a very baſe

Alloy; the Pewter Mines of *Lagor* being the moſt conſiderable, whoſe Metal makes one of the beſt Branches of Trade that the *Dutch* carry on here; the Company having a Treaty with the King, which interdicts the Purchaſe of this Commodity by any others than themſelves.

It is with this Pewter that the *Dutch* ballaſt their Ships in returning for *Europe*, preſerving however enough of it for their *Indian* Trade, where in many Parts they truck it againſt other Commodities to a very great Advantage.

The other Merchandizes which *Siam* produces are Wood for building Ships of which the *Dutch* lade great Quantities for *Batavia*, Stags' Beeves' Buffaloes' and Tigers' Skins, of which latter, a ſtriped Sort eſteemed very valuable, more eſpecially for *Japan*, Gum Lacque, Lead, Sapan Wood, Calembeck, or Aloes Wood, Honey, Wax, Sugar, Betel, Areque, Pepper, Rice, Salt, Varniſh, various odoriferous Woods, Tea, that comes from *China* and *Japan*, Calin, ſuppoſed by ſome a Metal between Pewter and Lead, though by others only a Mixture of them, Ambergris, Linens of the Country, Elephants' Teeth, Saltpetre, Gum Gutta, Canes and Rattans, Cotton, Ivory, Aſphaltus Woods, Muſks, Benzoin and Silk; but theſe three laſt are brought here from *Lahor*, when that Kingdom is not at War with this of *Siam*.

The Goods proper for this Trade, and which are principally in Demand at *Siam*, are Silk Stuffs, Spices, all Sorts of *Chineſe* and *Japan* Commodities, ſuch as flowered Velvets, japanned Works, Porcelaine, Goldſmiths' Wares, divers *European* Commodities, Gold and Silver Bars; but the Goods that find the readieſt and ſureſt Diſpatch are the Linens from *Surat*, *Coromandel*, and *Bengal*; here are beſides imported red Coral, yellow Amber, Quickſilver, Sanders, and Cloths; Pepper alſo was once a good Commodity, but ſince its Plantation here the Natives have enough, and to ſpare for Exportation.

Of CAMBOYA.

THIS Kingdom, called alſo *Cambodia*, was formerly a Province of *Siam*, but at preſent only makes it the Acknowledgement of an annual Tribute, *viz.* of a Noſegay of golden Flowers. The Capital of this Kingdom, which the *Europeans* call by the ſame Name, and the Inhabitants *Rauveka*, is ſituated at ſixty Leagues from the Mouth of the River which falls into the Sea, to the Eaſt of the Gulf of *Siam*, and which, like the *Nile* and the *Menan*, overflows the Country regularly every Year. The *Portugueſe* had for a long Time this Trade to themſelves but it is now open to all thoſe who will engage in it; and here are *Engliſh*, *Dutch*, *Portugueſe*, *Chineſe*, *Japaneſe*, *Siamois*, *Cochinchineſe*, *Malayans*, &c. of which ſome come with the South, and return with the North Monſoon, and others quite the reverſe. The *Dutch* ſend Linens here from *Malacca*, of which the propereſt for this Market are *Bengal* Caſſas, white and red Betilles, Aſſortments of Seraſſes, and ſome Cotton Thread.

The Goods this Place produces for Exportation are Benzoin, Gum Lacque, Wax, Copper Baſons, Iron *Chineſe* Pans, Rice laden for *Quinam*, and a Quantity of Stags' Beeves' Buffaloes' and other Savage Animals' Skins, which here, as well as at *Siam*, are one of the beſt Articles in this Trade, and the eaſieſt ſold, by Means of the *Chineſe* and *Dutch* Traffick to *Japan*, the former being the moſt conſiderable Traders here of all the Eaſtern People.

Of COCHIN-CHINA.

THIS Kingdom is ſeated between thoſe of *Camboya* and *Tonquin*, on a Gulf bearing its Name; its Length is about an hundred and ten Leagues, and its Breadth in ſome Places, only ten, twenty, or twenty-five at moſt; and, notwithſtanding its ſmall Extent, it has the Kingdoms of *Chiampa* and *Thien* for Tributaries, where it carries on a very great Commerce.

Its chief foreign Trade is that of *China* and *Japan*, carried on by the *Chineſe* ſettled here, or thoſe of *Canton*. The *Europeans*, eſpecially the *Dutch*, lade many Merchandizes here; the *French*, as has been ſaid of *Siam*, have hardly any of their

their Nation here but Miſſionaries. The Commodities extracted of the Growth of the Place are Gold, which comes from the Mines, or Duſt collected in the Gravel from ſome Rivers, of Calembac Wood, which grows in the Kingdom of *Champoa*, from whence they can only bring it to *Cochin-china*, and which ſells for its Weight in Gold, even on the Spot; Pepper is alſo extracted from hence, and ſent to *China*; Silks gathered in ſuch Quantities, that even the Cordage of their Gallies and Fiſhermen's Nets are made of it: Taffeties, which are the only Stuffs made here; Sugar, ſhipped commonly for *Japan*; Wax, Areque, and Betel, Rice, with which many Ships are annually laden; in Fine, thoſe Birds' Neſts ſo much eſteemed by all the *Indians*, as a ſalutary Food, which ſerve them at once both for Aliment and Regale.

Of TONQUIN.

TONQUIN was for a long Time a Province of *China*, when *Cochinchina* and *Chiampa* were a Part of it; at preſent theſe two Kingdoms are ſeparated, and *Tonquin*, more compact than before, is bounded on two Sides by three Provinces of *China*, which are *Canton* to the Eaſt, and *Ivan* and *Quanſi* to the North; to the Weſt it touches on the Kingdom of *Brama*, and to the South on *Cochinchina*, and the Gulf to which this laſt has given its Name.

The *Tonquinois* did not till pretty lately renounce the Politics they had learned from the *Chineſe*, not to trade with any foreign Nation; but at laſt they are become more tractable, having at firſt permitted Strangers to come and trade with them, and were afterwards emboldened to go and traffick with others, as they now do at *Siam*, *Batavia*, and many other Places of *India*, they ſend Ships to.

The beſt Merchandize that the *Europeans* can carry to *Tonquin* are Gold and Silver, eſpecially Dollars, although they are not without them; as here comes a great deal of Gold from *China*, and a Quantity of Silver from *Japan*; beſides, ſome pretend that this Kingdom has Mines of both theſe Metals, though Mr. *Tavernier* denies it, and with a reaſonable Probability. Other Commodities brought here are Spice, Pepper, Quickſilver, Vermilion, Cloths, and yellow Amber. Theſe People are open and faithful in their Dealings, in which they are very different from their quondam Maſters the *Chineſe*, who pride themſelves in cheating Foreigners, and uſe a thouſand Chicaneries in their Purchaſes and Sales.

Silks are in ſuch Plenty at *Tonquin*, that both rich and poor equally clothe themſelves with ſeveral light Stuffs made of them in the Country; and the major Part of thoſe Things, which in other Places are made of Flax or Hemp, are compoſed here of this Material. The *Dutch* export great Quantities of theſe Silks for *Japan*, being more commodious than to fetch thoſe of *Perſia* and *Bengal*, as they did before their Trade was eſtabliſhed at *Tonquin*.

Here is alſo to be purchaſed Muſk, Tortoiſe-Shell, Aloes Wood, of which here is ſome worth near an hundred and thirty Pounds' Sterling *per* Pound, Sugar in Pound and half Pound Loaves, proper for *Japan*; Porcelaines, brought from abroad, Lacque, Rice, and thoſe Birds' Neſts mentioned in the Section on *Cochinchina*, which are found in five ſmall Iſlands of the Gulf, where both the *Tonquinois* and *Chineſe* go to ſeek them. It is alſo in five other neighbouring Iſles that they go to catch Turtles, or Tortoiſes, which come aſhore there in ſuch Quantities at certain Seaſons, as to render the Sale of their Shells and ſalted Fleſh one of the beſt Branches of Trade in this Kingdom. They have Oranges and Lemons here, as in all other Parts of *India*; but theſe latter are ſo ſour, as to become thereby uſeleſs for Refreſhments to the Ships, and are therefore only conſumed here inſtead of *Aqua Fortis*, to cleanſe Copper, Braſs, or Iron for Gilding, in the Dying of their Silks, and in the Lyes for their Linens, which makes them of a dazzling Whiteneſs.

Of

Of the Commerce of CHINA.

THIS vaſt Part of the Globe, and the Eaſternmoſt of *Aſia*, is equally famous for its Fertility, which furniſhes an Abundance wherewith to maintain an extenſive Commerce, and for the Genius of its Inhabitants, who, more than any other People of the World, underſtanding to employ in all Sorts of Manufactures and Works the many rich Products that grow, and are found in the fifteen Provinces of this great Empire; which is rendered more adapted to Trade than any other eaſtern Country, by the many Rivers and Canals that traverſe all its Diviſions, and thereby facilitate the Tranſport of its Merchandize; and for Exportation by the good Ports that ſix of its Provinces have, which are waſhed by the oriental Ocean.

The *Chineſe* Politics making them fear that a Communication with Strangers might corrupt their Laws, never gave theſe latter any Opportunity to attack their Liberty under a Pretence of Trade; but, for ſeveral thouſand Years, ſhut the Entrance to their Kingdom againſt all Nations whatſoever, and were content with the interior Trade carried on among themſelves; but at laſt the Emperor, having opened his Ports to all the World in 1685, the *Indians* and *Europeans* were equally forward to improve the Liberty of this new Trade, which they have carried on ever ſince.

The *Portugueſe* till then had been the only Nation of *Europe* who had carried on any Sort of Traffick directly to *China*, by Means of their Situation at *Macao*, of which I ſhall treat by and by, and the *Dutch*, deſirous of imitating them, when eſtabliſhed in the Iſle of *Formoſa*, having been chaſed from that Poſt in 1661, had renounced this Commerce, or at leaſt, like the *Engliſh*, only maintained it in the half deſerted Iſles, where the *Chineſe* Junks brought their Merchandize, and returned with what they got there from Foreigners.

It is true, that many *Indian* Nations; and the *Dutch* themſelves, were never without the Products of *China*, but it was what the *Chineſe* brought, who were permitted to go to other Parts, at the ſame Time that all others were ſtrictly forbidden coming among them; and the Places which the *Chineſe* Junks frequented moſt, and to which they ſtill continue the Trade, are *Japan*, the *Manillas*, *Cochinchina*, *Achin*, *Malacca*, *Camboya*, *Siam*, *Tonquin*, *Patana*, *Jambi*, *Andragiri*, in the Iſle of *Sumatra*, *Batavia*, and ſome others.

The Trade with Strangers in *China* was not only open by Sea, but the Caravans were alſo admitted here, as well from the eaſtern *Tartars*, who now govern this Empire, as the *Muſcovites*, who ſend yearly to *Pekin* a very numerous one from *Peterſburgh*.

China is ſeparated from the States of the *Grand Mogul*, by ſandy Deſerts abſolutely impaſſable, and other Provinces of *India*, by Mountains very difficult to get over, which hinders almoſt all Trade between theſe different Kingdoms, except a very ſmall one on the Frontiers, though it is very difficult to know in what even that conſiſts, as not one in a thouſand at the Capital knows any Thing of what paſſes without the City. It is true, the *Chineſe* have ſometimes gone to *Bengal*, the *Philippines*, *Batavia*, and even to *Goa*; but this by Stealth, and with the Connivance of the Mandarines, Governors of the Sea Ports, for a good Sum of Money, which the Court were Strangers to, notwithſtanding it is abſolutely forbidden to every Subject of the Empire, to go to any Foreign Part, on any Pretext whatſoever, without a Licence, or expreſs Order of the Government.

The greateſt Part of the *Chineſe*, ſpread in *India* to trade, are of the Poſterity of thoſe who eſcaped from *China*, when the *Moungalean Tartars* became Maſters of it; and they have only a clandeſtine Communication with the other *Chineſe* their Countrymen.

There is no Nation fitter for Trade, and that underſtand it better, than the *Chineſe*, ſo that it lets no Profit ſlip, which Commerce offers; trading in, and benefiting by all, with an admirable Dexterity and Skill, though not with that Fidelity, as is elſewhere regarded as the Soul of Trade; in one Word, the *Chineſe* are ſpread in *Aſia*, wherever there is any Thing to be got, with the Characteriſtick of Cheats, Uſurers, faithleſs, full of Complaiſance and Subtlety to manage a good Op-

portunity, and all this under the Appearance of plain Dealing and Honeſty, capable of deceiving the moſt attentive and ſuſpicious; and they commonly ſay proverbially, that all other Nations are blind in Reſpect of Trade, but themſelves and the *Dutch*, which latter have one Eye, but they two. As it has always been a Maxim in the *Chineſe* Government, to encourage a great Currency of Trade in all the Kingdom, it may be ſaid that all the People concern themſelves in it; here being hardly any of the Natives, even the Mandarins, who are not engaged in it, at leaſt in Partnerſhip with the Merchants, to whom they advance their Money, that it may increaſe, and not lie idle.

One of the principal Branches of Commerce in *China*, as well at home as abroad, conſiſts in Silk and Silk Stuffs, either plain or mixed with Gold and Silver, of which here is ſo great a Plenty that moſt of the People, and even Servants, commonly go clad in Sattin or Damaſk. Silkworms are bred in almoſt all the Provinces of the Kingdom; but *Nanquin* and *Chekiam*, eſpecially the latter, are thoſe where moſt is gathered, and where moſt Silk is manufactured, there not being one Year in which they do not ſend to *Pekin* near four hundred Barks laden with Cloth of Gold, or Tiſſues, Damaſks, Sattins, and Velvets, beſides thoſe made by the Emperor's Orders for Preſents to his Ladies, Princes, and all his Court; all the other Provinces alſo pay a Part of their Tributes in Silk and Silk Stuffs, which are generally reſold for the Emperor's Account, but when altogether are not near the half of what *Chekiam* furniſhes alone. It is in the Province of *Nanquin*, that the moſt beautiful Skins are made, and where moſt of the beſt Artificers come to eſtabliſh their Fabrick, though Foreigners hardly carry away any of theſe; but almoſt all the Skins that the *Europeans* ſhip, as well wrought as raw, are manufactured at *Canton*, or in the Province of which that City is the Capital, and gives its Name.

There is made in *China* all Sorts of Silk Stuffs, either net or mixed with Gold and Silver, as there is in *Europe*, and many other peculiar to themſelves; and they have Wools in many Provinces, of which they make ſome Serges, as they are ignorant in the Manufacture of Cloth, though they have theſe brought here, and very much eſteem them, more eſpecially thoſe from *England*, yet they buy but little, as the Cloths coſt vaſtly more than the very fineſt Silks that can be made here.

The *Chineſe* have alſo various Furs, even of the very fineſt, ſuch as Minevers, Ermines, and Martens, but they are all conſumed in the Country, in Linings for Men and Women's Clothes, of which one only often coſts above 250*l.* Caps, Saddles, and other Moveables.

The other Merchandize exported from *China*, beſides wrought and raw Silks are Cottons in Wool, Thread, and Linens made of them, Braſs in Plates, and Salmons, Toutenaque, Tea, Camphire, Muſk, Flax, Sugar, Salt, Ginger, Sweetmeats, Quickſilver, Vermilion, Lapis Lazuli, Vitriol, Ambergris, Rhubarb, Galangal, China, Mirabolans, China Ink, Horſes, Porcelaine, japaned Works, Potter's Works, proper for *India*; Camlets, Hemp, and Hempen Linens, fine Gold, Pewter, Iron, Steel, and many Inſtruments made of theſe Metals richly wrought; in fine, precious Stones, Pearls, beautiful Marble, Aloes, Roſe, Brazil, and Ebony Wood, Jeſuits Bark brought from the *Manillas*; yellow and reddiſh Amber. After the lacquered Works of *Japan*, thoſe of *Foiken* paſs for the beſt, and though there are good Artiſts in this Manufacture at *Pekin*, yet they fall ſhort of that Beauty and Perfection ſo conſpicuous in the Fabricks of *Japan* and *Foiken*, as much as they exceed any Thing of that Nature attempted in *Europe*.

In Regard to the Merchandize proper for the Trade of *China*, Plate is the Baſis, whether in Dollars, as they come from the *Manillas*, or in Bars, as the *Dutch* bring them from *Japan*; the *Chineſe*, who have none, eſteeming it greatly, and willingly truck their Gold and beſt Commodities againſt it. And whilſt I am on this Subject, it will be not improper to remark, or unprofitable to my Reader, that in this Traffick, the Difference between Gold and Silver is computed as one to ten, whereas the Difference in *Europe* is as one to fifteen, ſo that great Advantages are made by carrying the latter thither. Spice and Pepper alſo find a good Sale here, particularly this laſt, wherefore the *Dutch* always make it a Part of their Ladings; there are alſo brought here Linens of various

Silk Stuffs, Birds' Neſts, white Sugar, and Sugar Candy, and *Japan* Wood for ſtaining yellow.

Trade of CANTON *with* CAMBOYA.

THE *Chineſe* Veſſels, which carry on this Trade, ſail from *Canton* the Beginning of *January*, and ſpend in their Paſſage from fifteen to thirty Days, according as the Weather favours; their Return is commenced at the End of *June*, that they may arrive in *China* by the ſucceeding Month. The whole Commerce is contracted in the ſouthernmoſt Part of *Camboya*, near three hundred and fifty Leagues from the River of *Canton*. Every Ship, on Arrival, makes a Preſent to the King, and his four principal Officers, of three or four hundred Taels, and then have Liberty to trade with whom they pleaſe.

The Commodities commonly ſent here are only five, *viz.* Iron Anchor Flukes, Umbrellas, Rattan Mats, all Sorts of Fruit, and Porcelaine. The Returns are Sapan, or Brazil Wood, Elephants' Teeth, Lacque, Lounge for painting yellow, Birds, Buffaloes, Chameaux', Cows' and Stags' Skins, Buffalo and Cows' Horns, Peacock Feathers, and Taffouſia, a medicinal Drug.

Trade of CANTON *with* TONQUIN.

TONQUIN is two hundred and twenty-five Leagues from the River of *Canton*, which is commonly ſailed in ten or twenty Days, and the Return much the ſame; the Seaſons for departing and coming back, are the Beginning of *January* and *July*. The Preſents which theſe People make the King and ſeven of his Officers hardly amount to three hundred Taels, though all other Nations pay a great deal more: The Merchandizes carried thither, are *Canton* Caſches, Iron Kettles, ſmall Braſs Cannon, Pewter in Gilt Leaves; all Sorts of Drugs, at leaſt an hundred Species, ordinary Porcelaine, Cloves, Pouchoc, a Drug ſerviceable in Medicine, and for dying yellow Silk, or thin Taffeties, red Crape of *Canton*, Gauze of the third Sort, Glaſs Necklaces, Vermilion, Alum, Rupiedſy, a Drug for dying Black, and all Sorts of *Chineſe* Fruit. The Goods laden in Return are, yellow raw Silk, Mudis, or Stuffs made of a Tree's Bark, ſeveral Sorts of Taffeties, coarſe and fine Canques, or Cotton Linen, Brazil Wood, Cinnamon, not extraordinary good, Lacque, Aniſeeds, and Caramangee, a medicinal Drug.

Commerce of CANTON *and* SIAM.

THE Ships ſail from *Canton* to *Siam* about the 20th of *November*, and are thirty or forty Days in their Paſſage, and their Return is begun in *June*, that they may all arrive in the Month following; and the King here, as in *Cochinchina*, is the only one to trade with.

The *Chineſe* carry a large Quantity of all Sorts of Goods here, and bring no fewer back; the outward-bound Cargoes conſiſting of wrought and unwrought Iron, Toutenaque, Allum, white Sugar, wrought Copper, Latten and Iron Wire, Copper Baſons of different Sizes, caſt Copper Ciſterns, Iron Kettles, five within one another, all which Commodities ſerve as Ballaſt, Damaſks and Sattins of all Colours, ſtriped and common Taffeties, Gauzes, ſewing Silk, Marelle, a red Nanquin Paint, Chuangon, a Medicinal Drug, Figie-caque, a *Chineſe* Fruit, Sugar Candy, Raiſins, Prunes, dried Cheſnuts, Water Melon Seeds, Copper Drums, called Gans, Quickſilver, and three Sorts of Gold Wire. The Goods that compoſe their Cargoes in Return, are Elephants' Teeth, Lead, Pewter, Areque, Brazil Tafouſic, or Wood, Taffouſſa, a Medicinal Drug, all which ſerve for Laſtage, Lacque, Horſe, Cow, Buffaloe, and Stag Skins, Buffalo and Rhinoceros Horns, Myrrh, Loung, Birds' Neſts of three Sorts, Puchoc, Incenſe, Bird Skins with their Feathers, Peacocks' Tails, two Sorts of Stags' Nerves, and Caye-lac, an odoriferous Wood for burning in their Pagods.

Of the Trade between CANTON *and* BATAVIA.

BATAVIA is ſeven hundred Leagues from *Canton*, and Ships which go from the former to the latter ſail the Beginning of *December*, in Order to arrive in the following Month; and when they return ſet out on the ſecond or fourth of *June*, and get home in *July*. The Goods the *Chineſe* carry with them are, Toutenaque, Gold, fine and ordinary Porcelaines, ſeveral Sorts of Tea, Copper Baſons, Gold Wire of *Canton* and *Nanquin*, Sattins and Damaſks, the greateſt Part black, Taffeties, three Sorts of ſewing Silk, Aniſeeds, Quickſilver, Vermilion, Muſk, Borax, Iron Kettles, five or ſeven in one another, Rhubarb, Arcaſſoul, a Medicinal Drug, Copper like the *Japan*, very thin *Canton* Taffeties, of all Colours, *Canton* Glaſs, and *China* Root. The homeward bound Cargoes conſiſt of Lead, Pewter, Pepper, Incenſe, Puchoc, Caremangee, Camphire, Coral, Rattin and other Mats, Rattins, Nutmegs, Cloves, yellow Amber, Myrrh, Aſſa-fœtida, Azeboucq, a Medicinal Drug, *Guinea* Pepper, Birds' Neſts of two Sorts, and Sugar Candy.

Commerce from CANTON *to* JAPAN *or* JAPON.

AS I ſhall have Occaſion to treat amply of this Iſland, in the Chapter that will be dedicated to it, there will be no Room to enlarge on it here; ſo I ſhall only confine myſelf to that carried on by the *Chineſe*, in a large Number of Junks that they yearly ſend to this Place from *Canton*; that the Port of *Japan*, which their Buſineſs leads them to, is called *Langi-Aſakie*, ſituated in thirty-ſix Degrees ſix Minutes of North Latitude, and in an hundred and fifty-one of Eaſt Longitude.

In order to ſecure a ſucceſsful Paſſage, the Veſſels ſhould leave *Canton* the Beginning of *May*, that they may get to their intended Harbour in about twenty-five Days, as a timely Arrival is of the utmoſt Importance to the Sales of their Goods, a Preference being always given to the firſt Comers, when the Merchants or Captains demand it; and this Claim ſhould never be neglected, as the *Chineſe* ſend ſo many Junks in ſome Years, that ſeveral, which arrive laſt, are obliged to carry all, or at leaſt a Part of their Cargo back again.

On approaching the Harbour, the Veſſel muſt anchor at three Leagues' Diſtance, to give the Cuſtom-houſe Officers Time to viſit her, and take the Captain's Declaration, which muſt be in Writing, and contain his Name, that of the Junk, the Place he came from, and thoſe he touched at, the Number of his Crew, when he ſailed, the Condition of his Goods, the Size of his Veſſel, the Number of his Guns and ſmall Arms.

As ſoon as the Viſit is over, the *Japoneſe* Pilots and Sailors come aboard, and carry the Veſſel into Port, where, when anchored, the Lading is delivered into the Warehouſes, which the Director-General of Trade furniſhes, where the Sales are made on the Day, and at the Hour, appointed by him.

The Goods proper for this Voyage are, Coral in Grains, Agracaramba, an odoriferous Wood, Ultramarine, none but the King of *Japan* can buy theſe Commodities, Enamel of five different Colours, Alum, Iron, Toutenaque, white and brown Sugar, which five Articles ſerve for Ballaſt, Sattins, of which more than two Thirds are black, white Taffeties, of *Canton* and *Nanquin*, white and red Crape of *Nanquin*, *Canton* fiſhing Linens, Vermilion, raw Silk of *Nanquin*, Galanga, Legumen, yellow Lacque, as it diſtils from the Tree, Areque Bark, Ychitzee, a medicinal Drug, Caramangee from *China*, Folio Chiroze, a medicinal Drug, yellow Wax, *Chineſe* white Linen of ſeveral Sorts, green Alum, Honey, Chienfou, a medicinal Drug, Sugar Candy, Benzoin, Aloes Wood of three Sorts, Gum Sandrac, Tortoiſe-ſhell, Camphire of three Sorts, Pucohoc, Incenſe, Myrrh, Lounge, Muſk, Rhubarb, Cinnamon, Chuangon, a medicinal Drug, and a very bad Saffron. In Return the *Chineſe* take Lacque or Varniſh, Porcelaines, fine Pearls, Steel, wrought Copper, and a Sort of Camphire proper for *China*.

Trade from CANTON *to the* MANILLAS.

THESE Iſles are two hundred Leagues from the River of *Canton*, where the *Chineſe* Ships ſail for in the Month of *March* at lateſt, and depart from thence in *July*. All the Junks that go this Voyage make the Governor and Superintendant of the Cuſtoms at the *Manillas*, a Preſent on their Arrival, which at firſt was only voluntary, but the Continuance has made it become a Right.

This Trade was formerly very advantageous, but it is greatly decayed; in 1700 the Goods from *Canton* loſt 30 *per Cent.* at the *Manillas*, and though afterwards they grew ſomething better, yet nothing in Compariſon to the Value they once bore there. When the *Spaniards* go from their Iſlands to *Canton*, they carry a Parcel of Embroideries, and a little Muſk with them; and what a *Chineſe* Cargo for the contrary Voyage conſiſts of, is Toutenaque, Iron, Porcelaines of all Sorts, Canques of *Canton*, and others of *Nanquin*, very ordinary Sailcloth, ſeveral Sorts of Cloths called Nunna, flowered Damaſks, plain Sattins, various Species of Taffeties from *Canton* and *Nanquin*, white and red Crapes, plain and flowered Moeres, with raw and ſewing Silks. In Return, they bring *Brazil* Wood, Stags' Fleſh, ſalted or dried, Stags' Nerves, and Pearls.

Of the Trade from CANTON *to the* MALDIVES, *touching at* ACHEM.

FOR this Voyage a Ship of a hundred and fifty to two hundred Tons Burthen is the propereſt, navigated with five or ſix *Europeans* at moſt, and the Reſt of her Crew Laſquares or Laſcars. The Seaſon for ſailing is the End of *October*, to arrive at *Achem* between the firſt and tenth of *December* at lateſt, that they may depart for the *Maldives* in Time. The Lading of this Veſſel ſhould be compoſed firſt, with Merchandize proper for the *Moors* of *Achem*, who trade for *Surat*. Secondly, with thoſe convenient for the Natives there. And thirdly, with ſuch as may ſuit the *Maldivean* Market. The Goods for *Surat* are, fifty Ton of white Sugar, an hundred Pieces of *Japan* Copper, twenty to fifty Pieces of Sugar-Candy, two hundred Pieces of Toutenaque, twenty to forty Pieces of Quickſilver. The Goods for the Natives of *Achem* are, coarſe Porcelaine about five hundred Taels, Copper Baſons of different Sizes, twenty Pieces of *Chineſe* Tobacco in Pound and half Pound Papers, fifty Pieces of Gold *Canton* Thread of the third Sort, twenty Catis, the Ends muſt be of Silk, three or four Braces of fine Coffee, and Tea-Cups and Saucers, fifty Pieces of Taffeties ſquared, ſuch as are ſent to *Siam* for Womens' Petticoats, fifty Pieces of five threaded Damaſks, with red, blue, and yellow Flowers. The Returns make from hence are in Shells called Cauris, or Cowries, which ſerve as Money in many Parts of the *Eaſt-Indies*, as they do on the Coaſts of *Africa*, where the *Europeans* carry them, dried Fiſh, and the Bark of the Cacao Trees, prepared for Spinning to make Cables with. There may likewiſe enter into the *Canton* Cargo for *Achem*, ſeveral Species of *European* Goods, ſuch as all Sorts to Nails, Iron Anchors from three to fourteen Quintals Weight, Iron Guns from two or five Quintals, Wine and Brandy in Bottles, ſome Chiſſels, Spectacles, twenty Barrels of Pitch, Paper, Iron in flat broad Bars, Cordage from one to five Inches thick, Padlocks, and alſo ſome blue Linen for Women's Petticoats.

Of the Engliſh *Trade from* MADRAS *to* CANTON.

THE Ships ſail on their Voyage in the Month of *July*, and arrive there in *Auguſt* or *September*; ſometimes they loſe their Paſſage, in waiting too long for thoſe from *Europe*, to get Dollars, as without theſe they can do nothing in Trade to *China*. They ſail on their Return from *Canton* in *January* or *February*, and their Voyage either going or coming, is from forty-five to ſixty Days.

The Goods carried from *Madras*, are *Engliſh* Lead, Lead and Pewter from *Pegu*, *Malaccan* liquid Storax, Rattans from the ſame Place, Incenſe, Aſſa-fœtida,

Madras red Wood, Myrrh, Puchoc, and fine Pearls of all Sorts. The Goods in Return are Gold, Copper from *Japan*, and ditto from *Canton* like the other, Toutenaque, Allum, Quickſilver, Vermillion, ordinary Porcelaines for the *Moors'* Uſe, white Sugar, and Sugar-Candy from *China*.

Of the Trade from SURAT *to* CANTON.

THEY carry from *Surat* to *Canton* the ſame Goods as from *Madras*, beſides a Quantity of Cotton; and thoſe brought back from *Canton* are alſo the ſame, except the Gold. They ſail from *Surat* in the Month of *May* or *June*, in Order to arrive at *Canton* in *Auguſt*, and come from thence about the 15th of *December*, to finiſh their Voyage in *March*.

The Europeans *Commerce with* CANTON.

THE Ships which annually arrive here from *England*, *France*, *Portugal*, and *Holland*, commonly bring the following Goods, *viz.* Silver, in various Coins, all Sorts of fine Cloths, Camlets, Serges, and other Woollen Stuffs, fine Linens from *Holland*; Clocks and Watches, Looking-Glaſſes of all Sizes, Mathematical Inſtruments, *Engliſh* Etwees, Pencils, Paper of all Sorts, various Ornaments for both Sexes, ſome *European* Liquors, and eſpecially Wine; of all which Commodities a good Part is diſtributed in Preſents to the Mandarines in the Government of this Place, and the Merchants generally make a conſiderable Advantage of the Reſt. They employ the Silver they carry in the Purchaſe of divers Sorts of Goods, in Virtue of certain Agreements made before-hand, which are raw Silk, Damaſks wrought according to Patterns given; plain Silk, lacquered Wares, Green and Bohea Tea, Badianes, a Seed from the Anis Tree growing in *China*, ſo called from the ſmell which its Wood has, like that Aromatick in *Europe*, Canes and Porcelaine after the Models and Paintings directed. They alſo ſometimes buy Gold here, though but ſeldom, as they have it much cheaper in *India*. At *Canton*, ſome precious Stones, excepting Diamonds, are likewiſe to be met with, though never in any great Quantity.

It is at *Quantung* and *Foiken*, that the beſt *Chineſe* Brocade Silks are made, and of which a large Quantity are brought to *Europe*, all which Commodities are purchaſed with ready Money; and the Sales of *European* Goods are on the ſame Terms, as Strangers find a conſiderable Difference in their Diſfavour by Barter, and therefore maintain the Method of buying and ſelling for ready Money only.

In 1720, a Commiſſary from the *Miſſiſſippi* Company arrived at *Canton*, and obtained Liberty from the Court to reſide there; but on his propoſing to lade a Ship, he found ſo many inſurmountable Difficulties lying in his Way, that he thought beſt to decamp, and quit his uneaſy Reſidence; in the ſame Year alſo a Ship arrived under the Emperor's Colours at *Oſtend*; the Fate of which Company being ſo well known, I have no Need to enlarge about it.

Beſides what is before-mentioned, there are tranſported from *Europe* and *China*, and from *China* to *Europe*, a thouſand Trifles, which make a conſiderable Gain, though they are too numerous to be particularized; I ſhall therefore omit attempting it, and proceed to give ſome Account of the Trade carried on between the two Empires of *Ruſſia* and *China*, as it properly comes in here, and for which Mr. *Lange* has furniſhed me with Materials in his Journal, *&c.*

A State of the Trade between RUSSIA *and* CHINA.

OUR Commerce with *China*, ſays the above-mentioned Author, is at preſent in a pitiful Condition, and nothing in the World could have prejudiced our Caravans ſo much as the Commerce maintained at *Urga*, the Chan of the Weſtern *Moungales* Camp, tributary to *China*, for from thence arrive at *Pekin* Monthly, nay Weekly, not only the ſame Goods as our Caravans convey there, but of a better Quality, and carried in ſuch Quantities by the *Chineſe* Merchants, who are continually coming and going between *Pekin* and *Urga*, and thoſe which the *Lamas* or

or *Moungalean* Prieſts furniſh on their Part, that makes the Value amount to four or five Times as much as a Caravan going under her *Czariſh* Majeſty's Name; beſides, Particulars are able to bring theſe Commodities ſo much cheaper to Market, than the neceſſary Expences of a Caravan will permit the Commiſſary of it to do; and having not only the Advantage of travelling cheaper, but alſo quicker, they have an Opportunity to foreſtall the Market, and ſell their Goods before the Caravan can arrive; it is, therefore our Author's Opinion, that except the Trade between *Ruſſia* and *Urga* be prohibited, only with the Allowance of carrying their Cloths and *Ruſſia* Hides, the Ruin of the Caravans is certain and near, and which may in the End draw on that of all the *Muſcovite* Trade in thoſe Parts. The Goods commonly brought from *China* to *Ruſſia* are, ſmall ſtrung Pearls, fine Gold, various Sorts of raw Silks, Damaſks of different Goodneſs, plain and flowered Sattins, ſeveral Species of Silk Shagreen, ſpun Silk, Cotton Cloth, all Sorts of Green and Bohea Tea, which they might have in greater Perfection in *Ruſſia*, than in any other Part of *Europe*, as the Northern Provinces of *China* produce by far the beſt, and the *Muſcovites* have this by the Way of *Siberia*; ſo that, would they be careful in its Package, it would naturally retain a higher Flavour than that which comes by Sea from *Canton*; but their Indolence leading them to a Neglect of this Precaution, their Teas are generally tainted, and contract an ill Taſte, of which their Delicacy renders them greatly ſuſceptible, Badianes, before deſcribed, Porcelaines, Carpets, Silk Flowers ſtuck on Paper, and ſome Tobacco. The Commodities ſent from *Peterſburgh* to *China*, are Jewels of ſeveral Sorts, Sables, white and common Fox, Lynx, Beaver, Ermine, Minever, Badger, and Seal Skins, with ſome Teeth of this laſt Animal.

I might here add ſomething of the *French* Traffick to *China*, as I ſaid but little about it, in treating of that Nation's general Commerce; but I omit it now for the ſame Reaſons I did then, *viz.* becauſe both their outward and homeward-bound Cargoes, are in all Things ſo like thoſe I have mentioned in the *Engliſh* Trade, that a Repetition would be ſuperfluous.

Of MACAO.

ALTHOUGH the City of *Macao* is not to be reckoned amongſt the moſt conſiderable ones of *China*, either for Grandeur or Number of Inhabitants, yet it merits a particular Regard, on Account of the Reputation that it has always held among thoſe where the *Portugueſe* have been eſtabliſhed in the Eaſt, and ſtill poſſeſs there; as alſo becauſe it is the firſt where the *Europeans* opened the Trade of this great Empire, and which it enjoyed alone near two Ages, that they were permitted to come and trade in it.

This famous City is ſituated in a Peninſula of the *Oriental* Ocean, on the Coaſt of the Province of *Canton*, to which it is joined by a Slip of Land, at forty Leagues by Sea diſtant from its Capital, where the *Portugueſe* ſettled, the Beginning of the ſixteenth Century.

Before the *Chineſe* were familiarized with theſe new Comers, who, under Pretence of trading, were already poſſeſſed of the ſtrongeſt Cities of *India*, and their Fleets Maſters of the Eaſtern Seas, it was only permitted the *Portugueſe* to come annually with their Goods to the deſert Iſle of *Sanchan*, and there to open Shop in Huts, made in Haſte of the Boughs of Trees and Turfs, without being licenſed to build any Houſes. Their Credit increaſing, they advanced to *Macao*, ten Leagues from *Sanchan*, where they afterwards improved what Opportunities offered, to ingratiate themſelves, and obtained Permiſſion to build Houſes and Magazines, and to encompaſs their new Town with a ſingle Wall.

The *Dutch*, jealous of the *China* Trade, where they could not be received, attempted to drive theſe *Portugueſe* out a hundred Years after their Eſtabliſhment; but, having miſſed their Aim, their Enterprize only ſerved the better to ſecure their Enemy's Settlement, as the *Portugueſe* laid hold of this Occaſion to obtain the Liberty of fortifying their Habitation, which was granted, as they were better liked for Neighbours than the *Dutch*.

This Kingdom has from Time immemorial been tributary to the *Chineſe*, who treat it very ſeverely, not permitting it to have any Trade with Strangers, though the Inhabitants go clandeſtinely with their Goods by the Sea of *Japan*, in to the River *Amur*, and from thence by the *Naſunda*, to the City of *Naun*, to trade there with the *Moungales*, and indirectly with the *Ruſſians*. They go twice a Year to *Pekin*, *viz.* in the Months of *March* and *Auguſt*, to the Number of forty or fifty Perſons, as well to pay the Emperor his Tribute, as to carry on their Trade, which principally conſiſts of the following Particulars:

A Sort of thick large Paper made of raw Silk, which ſerves in *China* for Window Saſhes, inſtead of Glaſs; Gold and Silver figured Paper; all Sorts of large Fans, variouſly faſhioned; very fine Mats, which ſerve in Summer inſtead of Mattraſſes; ſmoaking Tobacco cut very ſmall, of which vaſt Quantities are conſumed in *China*, where it is better eſteemed by the Natives than their own; a ſtriped Cotton Cloth; a Sort of Skins which the *Ruſſians* call Chorky, which are found in great Abundance here, and for which there is a large Demand at *Pekin*; a dried Fiſh taken from ſome large Shells caught in the Sea of *Japan*; beſides which they carry there large Sums in Silver, and with them purchaſe the fineſt raw Silk and Cotton, Damaſks, a Sort of Stuff mixed with Silk for Linings, Tea, Porcelaine, all Sorts of Kitchen Furniture in white Copper, and Sables' Tails.

Trade of the Iſlands in ASIA.

THE trading Iſles of which I intend to treat, are the *Maldives*, *Ceylan*, the three Iſlands of *Sond*, *viz.* *Sumatra*, *Java*, and *Borneo*, the *Moluccas*, the *Philippines*, the *Ladrones*, and the moſt famous of all, the Iſles of *Japan*.

I might here alſo take Notice of the Iſle of *Amian* on the Coaſt of *China*, and that of *Formoſo*, where the *Dutch* built the Fort of *Zeland*; but this having returned in 1661 under the Dominion of *China*, and the *Europeans* carrying on no Trade to either, I ſhall content myſelf with having only mentioned them; and follow the ſame Method in treating of thoſe above mentioned, as I obſerved with the *Aſiatick* Continent, that is, to ſpeak of them as they lie in our Way, on advancing into the Oriental Sea, and ſo to run them over from the *Maldives*, which firſt preſent themſelves, to the Iſles of *Japan*, beyond which the *Europeans* carry on no Trade.

Of THE MALDIVES.

THESE Iſles, more famous for their Number than Grandeur, lie in the *Indian* Sea, at ſixty Leagues from Cape *Comorin*, extending from eight Degrees North to four Degrees South Latitude. Their Number is uncertain, and it daily decreaſeth, though they are computed to be at leaſt twelve thouſand, Part inhabited, and Part deſert, which are divided into thirteen Attolons, that is, thirteen great Parts, by pretty large Channels that ſeparate them, the Iſlands of each Attolon being ſo near to one another, that at Low-Water the Communication may be made on Foot, without being wet higher than the Knees. The greateſt Trade of theſe Iſles conſiſts in thoſe ſmall white Shells called Cowries, ſo often mentioned in this Work, and the *Dutch* are the People particularly concerned in it, whether to *India*, where they diſtribute a Share, or in *Europe*, where they ſell them to moſt other Nations, who trade to *Guinea*, *Juda*, and on the other Coaſts between Cape *Verd*, and that of *Good Hope*; beſides which the Iſlanders carry a large Quantity themſelves to *Ceylan*, and ſome other Places on the *Malabar* Coaſt, from whence a great many are ſent to *Surat*, and into the Dominions of the *Grand Mogul*.

The Goods given them in Exchange for their Shells, are coarſe Cotton Cloths, Rice, and ſome other Proviſions, that do not grow in their Iſles. The Cocoa Tree alſo furniſhes them with ſome Merchandize that they ſell to Strangers; though Dr. *Garcin* has exploded a vulgar Error, hitherto propagated by moſt Authors, who have deſcribed thoſe Trees as Natives of thoſe Iſles, accounting them the beſt of any in *India*, which I thought would not be unacceptable to my Reader, if I give it a Place here; the Doctor acknowledges, that here are Plenty of the common

mon Sort of Cocoas, though in nothing different from thoſe growing in the neighbouring Countries; but that Species to which the Preference is to be given, and whoſe Product theſe Iſles are ſo celebrated for, does not yield the edible Nut, but one only uſeful in Medicine, being eſteemed by the *Indians* very good againſt Poiſons, Cholicks, Fevers, and Affections of the Nerves, for which they come to ſeek, and purchaſe it at a very conſiderable Price.

Of CEYLAN.

THIS Iſland, called alſo by ſome *Ceylon*, is ſeated in the *Indian* Sea, at forty-five Leagues Eaſt from Cape *Comorin*. Its Length is about eighty Leagues, being between the ſixth and eleventh Degree of Latitude, its Circumference more than two hundred, and it is ſuppoſed to be the *Trapobana* of the Ancients.

The *Portugueſe* diſcovered it in 1506 or 1509, but they could only ſettle on the Coaſts, without having ever been able to penetrate into the Country; they enjoyed their Conqueſt, and the Cinnamon Trade, for more than a Century, when the *Dutch* having begun to make themſelves known in theſe Parts in 1602, ſoon after ſeized on *Gale* Point, and ſucceſſively made themſelves Maſters of all the other Forts, till they had chaſed the *Portugueſe* entirely from the Iſle in 1657, by the Capture of *Columbo*, the fineſt and ſtrongeſt of all their Cities, not only in *Ceylan*, but in all *India*. This Conqueſt was made with the Aſſiſtance of the King of *Candi*; and one Clauſe in the Treaty was, that this Place ſhould be put into his Hands; but the *Dutch* having thought it more for their Intereſt to keep it themſelves, were ſoon embroiled with their new Ally, and from that Time to this the Concord is nothing better between them, than it was before between the *Cingales*, or *Cingalais*, and the *Portugueſe*, the former being prohibited on pain of Death to have any Commerce with the *Dutch*, though this muſt be underſtood of the mountain *Cingales*, who belong to the King of *Candi*, and not the maritime Ones, and theſe are the *Hollanders'* Subjects.

The *French* in 1672 attempted an Eſtabliſhment in this Iſland, and the King of *Candi*, who would have been pleaſed to oppoſe them to the *Dutch*, as he had before done theſe againſt the *Portugueſe*, granted them by Treaty the Port of *Cottiar*, ſeated on the Bottom of *Trinquemale* Bay, in the eaſtern Part of the Iſle; but the Enterprize of *St. Thomas*, in which Admiral *Deſhayes* lightly engaged the *French* Squadron then under his Command, hindered his ſupporting this Settlement that he had begun, and the War which was then declared between *France* and the *States General*, having afforded Opportunity and Time to the *Dutch* for diſplacing the *French*, they remained in their firſt Poſſeſſion, that is, ſole Maſters of the Coaſts and Cinnamon Trade, but always ill with the mountain *Cingales*, who continually reproach them with their Infidelity.

The principal Places that the *Dutch* have on this Iſland's Coaſt, which they entirely poſſeſs, except ſome to the Weſtward, are *Colombo*, the Capital of them, and the Governor's Reſidence, *Negombo*, *Matura*, *Gale*, *Caliature*, *Batecalo*, and *Trinquemale*, two Forts to the Eaſt, beſides ſeveral Habitations.

They have alſo the Iſle of *Manan*, and the Kingdom, or large *Peninſula*, of *Jaffanapatnam*, both to the North. The Commodities commonly found in *Ceylan*, and which are collected with very little Trouble, are long Pepper, Cotton, Ivory, many medicinal and dying Roots and Drugs, Cardamoms, Silk, Tobacco, Ebony, excellent Wood for building, Lead, Betel, Areque, the beſt in *India*, Wild Honey, Muſk, Wax, Cryſtal, Saltpetre, Brimſtone, Sugar, Curcuma, a Root for Medicine and Dying, Rice, of which the *Dutch* carry large Parcels to the Coaſt of *Coromandel*, Iron, Steel, Copper, Gold, Silver, and all Sorts of precious Stones, except the Diamond, Cinnamon, and Elephants.

Though all theſe Commodities abound in the Uplands, ſubject to the King of *Candi*, the *Dutch* have them not in ſuch Plenty, and but few of them, except the Cinnamon, when the *Cingalais* do not dare to venture on a Breach of the Prohibition for their trading with the *Hollanders*; it is therefore principally with this Aromatick that the *Dutch* ſupport their Traffick here, and it is not the whole Iſle that produces it equally, here being many Places where but little grows, and more where

where there is none at all. That called the Cinnamon Field or Ground, and which belongs entirely to the *Dutch*, is from *Negambo* to *Galiettis*, a Village three Leagues to the East of Fort *Mature*, which comprehends a Part of the Western and Southern Coasts of the Isle. The best Cinnamon is that in the Neighbourhood of *Columbo* and *Negombo*; that of *Gale* Point is also very good, and the Rest but middling; it is distinguished into three Sorts, *viz.* the fine, middling, and coarse, of which the young Trees produce the fine, and of a worse Quality in Proportion to their Age, though the Bark must at least be two or three Years old. This Tree multiplies greatly, and almost without Culture, but the *Dutch* hinder their Increase, to make this precious Bark more scarce and valuable.

The Cinnamon Tree comes very near in Characters to the Laurel, that is, in Flower and Fruit, and the Natives suppose there to be nine different Sorts; some distinguished by their Smell and Taste, and others by their component Parts; among which is one that smells strong of Camphire, and another with a thorny Trunk and Branches. The Season for barking and getting in the Crop, is *June*, *July*, and *August*, and it lasts three Weeks or a Month, according to the Quality, gathered; between three or four thousand People are employed in it, all of them enrolled, and disciplined with as much Exactness as regular Troops, that they may perform their different Functions unconfused.

Next to the Advantage arising from this Commodity, the *Dutch* reap the greatest from Areque and Elephants, which the Natives cultivate and hunt for them, by transporting them to several Parts of *India*, where the first sell in Preference to any other, and the latter will fetch from fifty to eighty Pounds Sterling each.

Of SUNDA *or* SONDE *Islands.*

THESE are a great Body of Isles, lying in the *Indian* Sea, to the Westward of the *Molucques*, from the eighth Degree of North to the same of South Latitude, and between the hundred and thirty-eighth and hundred and fifty-eighth Degree of Longitude, of which the three principal ones are, *Java*, *Sumatra*, and *Borneo*, as well for their Extent as Commerce, of which I shall treat in the Order I hav ehere placed them.

Of JAVA.

JAVA, seated to the South of *Sumatra*, reaches from the Straits of *Sunda* to those of *Balemboang*, which is about two hundred and twenty four Leagues; and its Breadth being unequal, the Circuit may be near four hundred and eighty. The *Dutch* are at present the only *Europeans* established on it; having first iniquitously possessed themselves of the *English* Settlements at *Jacatra*, and afterwards that of *Bantam*, they have since hindered any others from coming here.

The *Javans*, jealous of their Liberty and Trade, did for a long Time refuse all *Europeans* Leave to settle in their Country, till the *English* towards the End of the sixteenth Century, landed, and were, by the Emperor of *Java*, permitted to build a small Fort at *Jacatra*, with Warehouses, and a Lodge for their Factors and Goods; and the King of *Bantam* also gave them Leave to establish a Factory in his Capital, in Order to share a foreign Trade with his Neighbours.

It was in 1617 that the *Dutch*, who till then had not had any fixed Trade at *Java*, came to establish there, but, according to their Practice in the *Indies*, at the Expence of others, having, in Sermon Time, surprized the *English* Fort at *Vacatra*, and plundered their Lodge and Goods, they afterwards built there the City of *Batavia*.

The *English*, well settled as they thought at *Bantam*, which was the Residence of the second President of their Company, continued to carry on as considerable a Trade as the *Dutch*; but were dispossessed of this Place also by their envious Neighbours, under a false Pretext and feigned Authority of the King, a Detail of which is too long to be inserted here.

Forces of the Emperor of *Maratan*, the moſt powerful Monarch of the Iſle. In 1619 it took the Name of *Batavia*, though it was not finiſhed and put in its preſent Condition till 1660.

This new City, which yields in nothing to the fineſt in *Holland*, either for the Length of its Streets, Magnificence of its Buildings, Conveniency of its Canals, and Beauty of the ever-green Trees planted on each Side, is defended by a Citadel with four Baſtions, founded on Piles, in which the Company always maintain a Garriſon of a thouſand regular Troops; beſides which Fortification there are divers advanced Poſts within Land, ſuſtained by Redoubts, or ſmall Forts, to cover the Soldiers from the Excurſions and Surprizes of the *Javans*.

The City is peopled with divers Nations, of which the *Dutch* make near half, and among them are ſome *Portugueſe*, though almoſt all of them Proteſtants, who have two Churches here, where the Miniſters officiate in their own Language; the *Malayans* have alſo one, and the other Inhabitants are permitted the free Exerciſe of their Religion: The Suburbs reach near half a League into the Country, and form a larger Town than *Batavia* itſelf, peopled with *Chineſe*, *Moors*, *Javans*, and *Malayans*, and alſo many *Dutch* Artiſans; the firſt are the principal Huſbandmen, who ſow Rice in the Grounds they cultivate round the City, and have brought it to ſuch Perfection as not to need any foreign Supplies: Sugar is alſo gathered here in Plenty, and there are many Mills on the River *Jacatra*, for bruiſing the Canes, and ſeveral others for making Paper, Gunpowder, and grinding Corn; but all theſe Advantages, though capable of making any City flouriſh, are nothing in Compariſon with thoſe that the Company's immenſe Trade brings here, where all Sorts of *European* and *Aſian* Commodities are amaſſed, and their Warehouſes well filled, either for lading their Ships bound Home, or thoſe deſtined for the Trade of *China*, *Japan*, all *India*, *Perſia*, *Arabia*, and the *Red* Sea; *Batavia* being the Centre where all the Company's Effects enter and go out, by a perpetual Circulation, and always with an inconceivable Advantage, though conſiderably diminiſhed by the indirect Gains of ſo many principal Directors, and their Subalterns, through whoſe Hands all the Affairs paſs, and who, in Places ſo diſtant, are apt to forget their Conditions, and think themſelves Maſters of thoſe Effects, of which they are only Depoſitaries.

The Council of *Batavia* has eight Governments ſubject to it, *viz.* that of *Ceylan* and *Coromandel*, in the occidental Peninſula of the *Ganges*; that of *Malacca*, at the Extremity of the oriental Peninſula; four on the *Molucca* Iſles, which are *Macaſſar*, *Amboina*, *Ternate*, and *Banda*; the eighth is that of the Cape of *Good-Hope*. After theſe Governments there are three Directions, each filled by a Chief with the Title of Director, the one in *Perſia*, the other at *Surat*, and the laſt at *Bengal*; the Director of the firſt reſides at *Gammeron*, and has the Lodges at *Iſpahan* and *Kerman* in his Dependance; that of *Surat*, where the Director reſides, has under it the Lodges of *Amadabat*, *Barochia*, or *Brochia*; and that of *Bengal*, which is very extenſive, has its principal Settlement at *Ougli*, where the Director reſides, and has under his Direction that of *Cazembazar*, *Bellaſor*, *Decca*, *Patna*, and *Chiopera*; *Pepeli* belonged to it formerly, but the Company have abandoned it for a long Time. Four well fortified Places ſerve to guard the Country, where are many Eſtabliſhments, the chief of which bear the Title of Commanderies; of theſe there are two in *Ceylan*, *viz.* Point *Gale*, and *Jaffanapatnam*; the other two are *Cochin* on the *Malabar* Coaſt, and *Samarang* on the Coaſt of *Java*.

The other Factories or Lodges are thoſe on the Coaſt of *Coromandel*, under the Governor of *Nagapatnam*; thoſe of *Java* ſpecified in this Section, under the Commander of *Samarang*; thoſe of *Sumatra*, which are *Palimbang*, *Jambi*, and *Padang*, are independent of all others but the Government of *Batavia*; in Fine, thoſe of *Siam* and *Japan*, which are *Judia* and *Ligor* for the firſt, and *Mangaſaky* for the ſecond; and three Lodges ſubject ſolely to the upper Regency, although their Chiefs have only the Rank of Merchant. They had formerly a Settlement at *Tonquin*, but they abandoned it in 1700; ſo that from the preceding Account may be gathered, that of Factories ſubject to Governors, Directors, and Commanders, which are the moſt conſiderable ones, there are fifteen, and of the other ſubaltern Settlements, ſmall and great, from fifty-three to fifty-five.

This

This Iſland is the moſt fertile and populous of any in the World; here grow an inexpreſſible Quantity of Rice, and Cocoa Nut Trees, which are the principal Food of the Natives. All Sorts of *Indian* Fruits are found here in Plenty; the Fountains and Rivers are numerous, and ſo equally and commodiouſly diſtributed, that nothing better or more convenient could poſſibly be deſired, which ſo fertilize the Lands, as to procure Abundance, and this the congregating of ſuch a Number of Inhabitants, who are naturally addicted to Trade, which the many navigable Rivers here greatly contribute to their carrying on. Wild and tame Fowl abound in an extraordinary Manner, a Hen being worth no more than a Penny Sterling. Here are Stags and wild Boars in Plenty, Rhinoceros and Tigers are frequent in the Woods, which are very thick on the Mountains that garniſh the Iſland, and theſe both ſmall and great are generally cultivated. The innermoſt northern Coaſt is the beſt, and the moſt populous, on Account of its great Fertility, being alſo rendered the moſt frequented by its convenient Situation for Trade and Navigation, which is very different from the ſouthern Coaſt that is the exterior Part, in Reſpect of the Iſles of *Sund*, and the great Sea; the Shores of this Coaſt are ſteep, full of Shoals, and Rocks, which render them difficult of Acceſs, and but thinly inhabited. The principal trading Places along the other Coaſt are firſt,

Bantam, already deſcribed, after paſſing the Straits of *Sunda*, which are twenty-eight Leagues long, and from them to *Bantam* are five Leagues more.

Batavia, likewiſe treated of, is twenty Leagues to the Eaſtward of *Bantam*: And

Cheribon, where the *Dutch* have a well fortified Factory, is a City diſtant from *Batavia* forty-eight Leagues by Sea, and compoſed of near eight thouſand Families, in as many Houſes, ſome of Stone, others of Wood, but the greateſt Part of Bamboes. This Place produces a good deal of Rice, Timber, Indigo, edible Bird's Neſts, *&c.*

Tagal is another City where the Company have a Fort and Lodge, twelve Leagues to the Eaſt of the laſt mentioned, than which it is a little bigger, and its Buildings much the ſame.

Samarang, twenty-two Leagues from *Tagal*, and about ſixty-eight from *Batavia*, is a City ſurrounded by a Plain, and croſſed by a River that receives Barks and ſmall Veſſels between its Mouth and the City; it is the biggeſt on the Coaſt after *Bantam*, and ſuppoſed to contain more than twenty thouſand Houſes; the Company have a Factory and Fort here, which commands all the others that are on the Coaſt, the Chief bearing the Title of Commander, and is the fourth that it has in *India*. The *Chineſe*, who have ſpread themſelves on all this Coaſt, as well as in the other Iſles, are very numerous in this Place, by whoſe Means the Company correſponds with the *Javan* Court kept at *Cartaſoura*, a good Way within Land, as the Emperor has for many Years quitted *Mataram* where he formerly reſided; it is reckoned four Days' Journey from *Samarang* to *Cartaſoura*, and *Mataram* is another Day's Travel farther to the South.

Torrabaya is a City on the River, a good League's Diſtance from the laſt treated of, with near ſix thouſand Houſes or Families; and at nine Leagues farther on the Coaſt is,

Japara, a large City waſhed by the Sea, that may contain about ten thouſand Families, where the *Dutch* have a Fort built on a River: And twelve Leagues from hence ſtands the City of

Javana, ſituated near the Sea, being full of People and Trade, with near ten thouſand Houſes.

Rambang, or *Rambam*, is four Leagues to the Eaſt, and may contain about ſix thouſand Houſes; I have befor mentioned that the Company have a Yard here for building Shallops and other ſmall Veſſels; and here is a great Trade carried on in Rice, *&c.*

Touban, lies thirteen Leagues farther, and is a City with about five thouſand Families, who alſo furniſh Trade with Plenty of Rice, and Ship Timber.

Cidaiou, three Leagues from *Touban*, is a fine old City, with above ſix thouſand Houſes, having formerly had a King of its own, and trades greatly in Rice, which grows here in Abundance.

Sourabaya

Sourabaya is a large City twenty Leagues from *Cadaiou*, ſeated in the Strait of *Madura*, and upon a River, a large League from the Sea. It has more than ten thouſand Houſes, of which a great Part are built with Stone, as the *Chineſe*, who are very numerous here, always build with this Material. Its Commerce in Rice is very great, ſo that it can ſupply Trade with between two and three thouſand Tons, and ſome Years double that Quantity; the *Dutch* have a fine Fort here with a Captain's Command.

Paoſſaroavan is a City fortified by the *Javaneſe*, with above ten thouſand Houſes. It is thirteen Leagues from the laſt mentioned Place, near a River, one League from the Sea, the *Dutch* having a ſmall Fort, at ſome Diſtance from it. The Trade in Commodities of the Country's Growth conſiſts in Carthame, or Baſtard Saffron, Cattle, Fowls, Rice, and Birds' Neſts, all in Abundance.

Panaroucan was once the Capital of a ſmall Kingdom, and is ſeated on a fine River, containing about five thouſand Families, with the ſame Trade as the two preceding.

Balamboang, is the laſt City ſituated at the Eaſternmoſt Part of *Java*, on a Strait formed by the Iſle of *Bali*, having about ten thouſand Houſes built almoſt all with Bambo, and abounds with Rice like the other Cities.

The Fertility of this Iſland is inconceivably great, not having its Equal in the World; all Things are brought to Perfection here with Eaſe, and but little Trouble; the Days and Nights are always equal, and the Heat, which is temperate, remains continually the ſame, ſo that *Fahrenheit's* Thermometer never varies above four or five Degrees; the Earth is better, not ſo marſhy, and leſs mountainous, than in its neighbouring Iſlands; ſo that the *Chineſe* are very fond of ſettling here, and ſome come for this Purpoſe almoſt every Year; they likewiſe render it more valuable by their Huſbandry and Trade, which the *Javaneſe* neglect, as they are more propenſe to Deceit and Cozenage than Labour. This Richneſs of Soil makes it ſo populous, that one may ſee the Roads ſwarm with People in a ſurprizing Manner; the Rivers alſo, which are numerous, have their Borders thick ſet with Villages; and beſides the Cities now deſcribed along the Shore, there are many within Land full as large and populous. It is reckoned that *Cartaſoura*, where the Emperor's Court is, has upwards of thirty thouſand Houſes, and that *Mataram*, which is the largeſt City of the Iſle, has ſixty thouſand at leaſt; in Fine, according to what the *Dutch*, who inhabit the principal Places on the Coaſt, have been able to diſcover, there are in this Iſle forty large Cities and forty-five hundred known Villages, beſides others yet undiſcovered by them; and by certain Memoirs it has been found, that theſe ſame Places ſome Years ago contained no leſs a Number of Inhabitants than near thirty-two Millions, including all Ages and Sexes; by which Calculation it may be ſeen, that this Iſland is three Times more populous than *France*, if the Difference of Territories be conſidered; as the Iſle of *Java* is not altogether equal in Bigneſs to the Moiety of that Kingdom, which yet does not contain above twenty Millions of Souls *.

Of SUMATRA.

THIS Iſland is about one hundred and ninety Leagues long, by ſixty broad, and ſituated in ſix Degrees of Southern Latitude, ten Leagues from the Peninſula of *Malacca*, and four or five from *Java*, the Separation between the two Iſlands being made by the Straits of *Sunda*.

Its principal Commerce conſiſts of Gold, Silver, Pewter, Copper, Iron, Diamonds and other precious Stones, Pepper, Wax, Honey, Camphire, Caſſia, Sanders, Tortoiſe-ſhell, Brimſtone, Rice, Sugar, Ginger, Benzoin, Ambergris, Jet, Dragon's Blood, and Rattans.

The Gold is found all over the Iſle, but more eſpecially between *Ticou* and *Maningcabo*, where the Inhabitants gather it in Lumps at the Foot of the Mountains after great Rains, or in the River Sands, where they get the greateſt Quantity, which the Collectors, who are Demi-Savages, give in Exchange for divers

* Memoir MS. of Dr. *Garcin*.

vers Commodities with their Neighbours, as they have no Trade with Strangers; thoſe of *Maningcabo* give in Truck Arms, Iron Tools, and Cotton Cloth; and thoſe of *Priaman*, Pepper, Steel, Salt, *Surat* Coverlids, *&c.*

Almoſt all the Iſland, except the middle Part, produces Pepper, but the Places where moſt is gathered are *Andaageri*, *Jambi*, *Palimbang*, and above all, *Indra-Poura*; though *Ticou*, *Sillebar*, *Maningcabo*, and *Barros* yield ſome, but of an inferior Quality; yet a large Quantity of both Sorts are annually ſhipped, as well for *Europe* as *India*. The Brimſtone is found at *Pedir*, where there is a Mountain of it; and near to this City it is that Reſin, called *Sumatra* Balm, is collected. The Diamonds and precious Stones come from abroad, particularly from *Borneo*. The other Drugs and Commodities grow and are cultivated in the Iſle, eſpecially in the inland Parts, Benzoin being the Product of *Barros*.

Beſides theſe Places before-mentioned, ſome Trade is carried on at *Achem*, *Pacem*, *Deli*, *Arou*, and *Campara*.

Achem, ſituated in the Northernmoſt Part of *Sumatra*, is the Capital of a large Kingdom, and almoſt of all the Iſle; being the moſt healthful Place, as the others have generally a bad Air, from the Waters and Lowneſs of the Lands; it is here that Foreigners tranſact the greateſt Buſineſs, and the Road is ſeldom without ſome *Engliſh*, *Dutch*, *Portugueſe*, *Daniſh*, *Chineſe*, *Guzarates*, *Arabian*, *Perſian*, *Abyſſin*, and other Ships, from many Places of *India* and *China*.

The Goods they bring here are Gold and Silken Stuffs, Muſlins, Painted Linens, Cotton, unſpun Silk, Fiſh, Butter, Oil, Arms, and Warlike Stores, Silver, and more eſpecially Rice, which the *Engliſh*, *Dutch*, *Danes*, and *Chineſe* bring in large Quantities, as this Part of the Iſle is entirely deſtitute of it, white, red, and blue Salampours, Percaſſes, Spices, and Opium, brought from *Bengal*.

The *Dutch* have four or five Forts and Factories in the Dominions of the King of *Achem*, and thoſe of ſome other petty Princes; among which are *Padang* on the Weſtern Coaſt; and *Palimbang* and *Jambi*, on the Eaſtern, a little within Land, which in a Manner renders them Maſters of the Pepper and Gold Trade.

Jambi, which is one of the beſt *Dutch* Settlements, is upon a River of the ſame Name, twenty-five Leagues from the Sea, from whence may be extracted above two thouſand Tons of Pepper yearly, that comes from the Mountains; Cotton Cloths and Handkerchiefs are proper for this Trade, as are alſo Dollars, *&c.*

Sillabar, a City on the Weſt Coaſt, about thirty Leagues from the Straits, belongs, as before obſerved, to the King of *Bantam*, and is famous for its Manufacture of *Cris*, or Poniards worn by the *Javans* and the major Part of the *Indians*, being in great Eſteem, and a large Trade carried on in them.

Of BORNEO.

THIS Iſland being nearly Circular, and near two hundred Leagues Diameter, it muſt conſequently have a Circumference of about ſix hundred. It has the Iſle of *Celebes* to the Eaſt, *Java* to the South, *Sumatra* to the Weſt, and the *Philippines* to the North. Only a Part of the Coaſts, eſpecially thoſe of the Kingdom of *Borneo*, are known, the Barbarity and Infidelity of the Iſlanders having diſguſted the *Europeans* ſo as to hinder their eſtabliſhing among them, or indeed to continue their Trade.

The *Dutch* firſt arrived there in 1609, and ſettled ſome Factories at *Borneo*, *Sambas*, and *Succadana*; but beſides their not being able to obtain an Excluſion of all other Nations from trading here, as they for a long Time ſollicited, they ſo often proved the Ferocity of theſe Savages, who daily ſought freſh Pretexts to plunder their Warehouſes, and kill their Factors, that they at laſt forced them to abandon the Iſle, and leave its Merchants to bring their Goods to *Batavia*, if they had a mind to maintain their Commerce; which principally conſiſts of Diamonds, Gold, Pearls, Bezoar, Aloes, Wood of different Sorts, Wax, Pepper, Camphire, Benzoin, Dragon's Blood, and Rattans. The Gold is found at *Pehang*, *Sey*, *Calantan*, *Scribas*, *Catra*, and *Melanougua*, and is more abundant than is commonly imagined; but the Sloth and Knavery of the Inhabitants make them live

in extreme Poverty, amidſt immenſe Riches, which their valuable Mines, and fertile Soil, would abundantly produce them, at the Expence of very little Labour; as their Lands would yield any of the *Indian* Fruits, and Spice in particular would flouriſh here to a Miracle, as Experience demonſtrates in its preſent Growth of Clove and Nutmeg Trees, found here with every requiſite Quality.

Sambas and *Succadana* are the Places for the Purchaſe of Diamonds, of which the Mine is farther within Land, and may produce about ſix hundred Carats yearly; here is alſo ſome of Iron, Copper, and Pewter, and whatever elſe *Sumatra* yields may be found here; whoſe Imports alſo are ſimilar to thoſe of that Iſland.

CRIMATI, *or* CRIMATIA

IS a ſmall Iſland in the *Indian* Sea, about four or five Leagues diſtant from *Borneo*, where is a Diamond Mine, and ſome Pearls are found on its Coaſts, both which Commodities the Inhabitants carry to ſell at *Malacca*; and they are ſo jealous of theſe Jewels, as to deny any Foreigner Admittance among them.

Of the MOLUCCA, *or* MOLUCQUE ISLANDS.

THESE Iſles are Part of the *Oriental Archipelago*, and indeed compoſe a particular one themſelves of more than an hundred and thirty Iſlands. They are divided into the great and ſmall *Moluccas*, and theſe laſt again parted into thoſe properly ſo called, and them of *Banda*. Some Authors placing alſo the Iſle of *Amboyna* among them.

All theſe Iſlands, of which I ſhall ſpeak according to this Diviſion, were diſcovered by the *Portugueſe* in 1511, and their Poſſeſſion for ſome Time diſputed by the *Spaniards*, in Virtue of the famous Diviſion made by the Court of *Rome*, then the acknowledged Arbitrator in the Partition of the *Eaſt* and *Weſt Indies*; however, by the Treaty of 1420 between thoſe two Nations, the *Moluccas* were ceded to the former, who occupied them till 1601, when the *Dutch* newly arrived in *India* began to moleſt them in their Poſſeſſion, and finally chaſed them out of all theſe Iſlands, commonly called the Spice Iſlands, on Account of the Growth of Nutmegs, Mace, and Cloves in many of them, and as Mr. *Savary* ſays, not in any other Part of the World, though Dr. Green informs us of their being produced in *Borneo*, as juſt now mentioned.

Of the Great MOLUCCA ISLES.

THESE are among others *Celebes*, *Gilolo*, *Ceram*, and *Bouton*, to which *Timor* and *Arou* ought to be added. The firſt is the moſt conſiderable of all, being two hundred Leagues long, by an hundred broad, which muſt be underſtood, not of one ſole Iſle, but of a Cluſter ſo near to one another, that they ſeem to compoſe but one only. It encloſes many Kingdoms, of which that of *Macaſſar* occupies the greateſt Part of the Southern Coaſt, *&c.* This Kingdom is alſo the moſt fertile of any, and almoſt the only one where the *Europeans* have any Trade.

The Capital, celebrated for its Grandeur, Number of Inhabitants, and the Beauty of its Buildings in the *European* Taſte, is ſituated in the Southern Part of the Iſle, at five Degrees ſix Minutes from the Line, where the *Portugueſe* formerly carried on, almoſt alone, one of the greateſt Trades in *India*. The *Dutch* ſucceeded them, and by Conſent of the *Macaſſarian* King, who ſeemed tired of the Servitude in which the former held him, built here *Panakoke* and *Samboupo* Forts to ſecure their Trade, and, as they would make the *Macaſſars* believe, the Liberty of their Country. But theſe new Gueſts not being more tractable in Point of commercial Concerns than their Predeceſſors, but endeavouring to become Maſters of *Macaſſar*, to the Excluſion of all other Nations, the *Portugueſe* regained their Credit, and the *Dutch*, being near driven out, prevented the Deſigns of their Enemies, which they had foreſeen, by appearing before *Maoaſſar* in 1660, with a Fleet of thirty-three Sail, and after having been equally victorious at Sea, where they took, burnt, or ſunk ſix large *Portugueſe* Ships, richly laden, and on Shore, where in a Deſcent

a Deſcent they forced Sword in Hand two Forts within Gunſhot of the City, they ſo intimidated the King and his People, altho' the braveſt in *India*, that they obliged him by a Treaty concluded at *Batavia* the ſame Year, never to admit the *Portugueſe* again into any Part of the Kingdom, and to leave the *Hollanders* in Poſſeſſion of their Forts and Trade: It was not, however, till 1669, that they could entirely ſubdue their reſtleſs and ſavage Nation, who, notwithſtanding the Treaty in 1660, and another in 1667, continually interrupted their Spice Trade, by ſending ſmall Veſſels to traffick with the Inhabitants of *Banda* and the *Moluccas*, in Cloves and Nutmegs, which they afterwards ſold to the *Engliſh*, and maintained as the *Dutch* gave out, a Correſpondence with their Enemies, to take from them *Amboyna*, one of their eight great Governments in *India*. And notwithſtanding ſo conſiderable an Expence was made, and ſo much Blood ſpilt, they have not been able to eſtabliſh an excluſive Trade at *Macaſſar*, the Port and City having remained open to all the Nations of *India* and *Europe*, excepting the *Portugueſe*, who notwithſtanding may now come and Trade like the others, ſince their Imbecility in the *Indies* no longer affords the *Dutch* any Jealouſy.

The principal Commodities exported from hence are Rice in a vaſt Quantity, and the beſt in *India*; Gold, Ivory, a great deal of Brazil Wood, and ſome Sanders, Cotton, Camphire, various Sorts of Hard-Ware, Arms proper for the *Indies*, Ginger, long Pepper, and Pearls fiſhed here. The Imports conſiſt of Scarlet Cloth, Gold and Silver Stuffs, *Cambaye* Cloth, Pewter, Copper, Iron, Soap, and Aſſa-fœtida, which two laſt come from *Surat*.

Gilolo has the ſecond Rank among the great Iſles of the *Moluccan Archipelago*. Some make it two hundred Leagues, and others but an hundred and fifty Leagues in Circuit. The beſt Merchandize extracted from hence is Sagou, or Sago, for making Bread, without which the Inhabitants of the *Leſſer Moluccas* and *Randa*, could not ſubſiſt in the Want of Rice, with which they can only be ſupplied from *Macaſſar*, &c. It is made of the Pith of a Tree like a Cocoa-Tree, and is now in great Eſteem in *Europe*, as a flouriſhing Food for weak and valetudinarian Conſtitutions.

Ceram is not leſs than *Gilolo*, a Part of whoſe Coaſt has for a long Time appertained to the King of *Ternate*, and was the Occaſion of a tedious War between him and the *Dutch*, on Account of the Cloves cultivated here; ſince the Peace made between them in 1638, this Place has ſhared the Fate of *Ternate* and the other Iſles belonging to it. The Clove Trees have been rooted up, and the *Dutch* have built Redoubts and Forts in many Places, to impede all foreign Trade where they now have made themſelves Maſters. Of which more hereafter, in treating of *Ternate*.

Bouton is the laſt of the four *Great Molucca* Iſles, and may have about eighty Leagues Circumference. This produces no Rice, but carries on a great Trade in Slaves, and has a ſmall Quantity of Ambergris of a middling Quality. Its beſt Buſineſs is that of Tamettes, a Sort of Linen made here, proper for the *Moluccas*, where the *Dutch* carry a large Quantity yearly.

Of the Little Molucca Isles.

THE Iſlands properly called the *Moluccas* are only five, *viz. Ternate*, *Tidor*, *Machian*, or *Makiam*, *Moter*, and *Bachian*, which compoſe one of the ſeven great *Dutch* Governments in *Aſia*. The Land of theſe Iſles lies very high, each being an entire Mountain, which begins from the Coaſts, and have their Summits run to a great Elevation. They are all very ſmall; *Ternate*, which is the Principal, not having above ſeven Leagues, *Machian* near ſix, *Moter* only four, and *Batchian* twenty in Circuit; but this laſt is half Deſert, and very full of Sago Trees. All theſe Iſles are near the Line, *Machian* is directly under it, and *Moter* more to the North. The King of *Ternate* reigned formerly, not only over theſe five Iſles, but over the greateſt Part of the *Moluccan Archipelago*, and his ſubjects were then obliged to bring their Spice to his Capital; and it was there that the foreign Merchants, whether *Javans*, *Malayans*, *Chineſe*, and the *Portugueſe*, at firſt, came to buy it; but a little after theſe latter were arrived

in

in *India*, this great Power of the *Ternatois* began to ſhake, and the Inhabitants of *Macaſſar*, *Tidor*, and many other Iſles having revolted and confederated, went to attack their King.

The *Portugueſe*, always attentive to what might enlarge their Empire, and extend their Conqueſts in the *Indies*, ſoon mixed in the Quarrel, and improved ſo favourable a Conjuncture to their own Advantage, obtaining thereby an Eſtabliſhment in *Ternate*, even with the King's Conſent; and afterwards by Right of Conqueſt in *Tidor*, *Machian*, *Amboyna*, *Banda*, *Timor*, and *Solor*; where they built Forts, which made them Maſters of the Spiceries. In 1605, the *Dutch* appeared at *Ternate*, and the *Portugueſe Ternatois* received them, and permitted their Building the Fort of *Tolucco*, one of the firſt they had in *India*.

This Change of Maſters having in nothing ſweetened the *Ternatois'* Servitude, who to the *Portugueſe* Yoke had now added that of the *Dutch*, they endeavoured ſeveral Times to ſhake off this laſt, but always unſucceſsfully; and were obliged to make various Treaties in 1609, 1612, and 1613, which finiſhed the Loſs of the little Liberty they had remaining, and entirely excluded all Foreigners from the *Moluccas*, ſecuring to the *Dutch* only all the Trade of the Cloves, which grew in thoſe Iſles. This Treaty, which confirmed all preceding ones and reſtored to the King of *Ternate* all the Places that the *Dutch* had ſeized in the laſt War of 1638, agreed, that all the King's Subjects ſhould quit *Amboyna*; and that this Prince ſhould for ever renounce his Right to that Iſle in Favour of the *Dutch*, with many other Articles to rivet their Slavery, and exclude all Strangers. It ought, however, to be remarked here, that this Peace was in ſome Sort bought by the *Dutch*, for although victorious, and Maſters of one Part of the King's Territories, who, with his Grandees, and brave Troops, had retired into inacceſſable Places, they choſe rather to ſubmit paying them a Kind of an annual Tribute, than to riſk the Clove Trade, of which they were, and are yet ſo jealous; as they alſo did in Favour of the *Onimas* and *Oroncais*, to whom they likewiſe yearly pay a Sort of Penſion to recompence their rooting up all the Clove Trees in their Lands, and not to permit their Vaſſals planting any for the future; and, ſince the Treaty of 1638, the *Dutch* have abſolutely remained in Poſſeſſion of the five ſmall *Molucca* Iſles, but by various Diſputes which have happened ſince, the Company has been obliged ſeveral Times to augment the different Penſions they paid, for the Deſtruction of the Clove Trees in all the Iſles, as they found they had ſufficient in thoſe which grew in *Amboyna*. Theſe Augmentations were made in 1652, 1682, and laſtly in 1713, when it was finally agreed that they ſhould pay, yearly,

To the King of *Ternate*	6600 Rix-Dollars.
To the King of *Tidor*	2400
To the King of *Bachian*	700
To the King of *Moter*	150
To the King of *Machian*	2000
To the Grandees of *Ternate*	600
In all	12450 Rix-Dollars.

None of theſe Iſles are fruitful except in Cloves, and conſequently furniſh nothing elſe to Trade: That of *Ternate* yielded formerly in a common Year between four and five hundred Bahares, of five hundred and fifty *Dutch* Pounds each, of Cloves, and near one thouſand in the grand Crop, which happened every ſeven, or, as others ſay, every four Years; *Tidor* three hundred Bahares, and twelve to thirteen hundred in the good Seaſon; *Moter* only an huſdred; *Machian* three hundred; *Bachian* little more than *Moter*; but theſe three augmented proportionably in the good Year; *Moter* and *Bachian* yielding near four hundred, and *Machian* fifteen or ſixteen hundred; but no Cloves grow there ſince the aforeſaid Treaties. From *Ternate* a ſmall Quantity of Tortoiſeſhell is exported, and a large Trade carried on there of coarſe Linen, and ſome others with Handkerchiefs, called

Tamettes, from *Bouton*, many Stuffs, and other Merchandize from *Europe*, for the *Dutch* in Garriſon, or ſettled there.

Of the Isles *of* Banda.

THESE Iſlands, the only Places in the World where the Nutmegs and Mace grow, according to Mr. *Savary*, though denied by Dr. *Garcin*, as hinted at in the Introduction to the *Moluccas*, make a Part of the ſo often mentioned *Archipelago*, and are in the Number of thoſe called the *Little Moluccas*. They are ſix, every one with its own Name under the general one of *Banda*, viz. *Lonthor*, *Neira*, *Gounong-Api*, *Poulo-Ay*, *Poulo-Rhon*, and *Rouſinguein*, as Dr. *Garcin* writes them; though Mr. *Echard*, in his *Gazetteer*, calls them *Lanton*, *Nera*, *Genapi*, *Pulloway*, *Palerni*, and *Baffingen*.

Lonthor is the largeſt, higheſt, and fulleſt of Nutmeg Trees; it was once called *Bandan*, by the Natives of the Country, and it is from thence that theſe Iſles are denominated *Banda*. But after that the *Dutch* had a Factory here called *Lonthor*, which was that of a City deſtroyed in the ancient Wars, this Iſle was called ſo likewiſe.

Neira is two-thirds leſs, and is where the Governor of the Iſlands reſides; it is furniſhed with two Forts, the one called *Naſſau*, and the other *Belgick*. This on a little Mountain towards the Middle of the Iſland, the other on the Straits, a Muſket-Shot in Length, and over againſt the Iſle of *Lonthor*.

Gounong-Api is about the Size of the preceding one, and not above a Stone's throw diſtant from it to the Weſt; it has a large Mountain in the Middle, which occupies almoſt the whole Iſle, and is a Volcano that burns continually ever ſince the End of the ſixteenth Century, and gives Name to the Iſland, as *Gounong* in *Malayan* ſignifies Mountain, and *Api*, Fire.

Poulo-Ay, is a ſmall Iſle to the Weſt of the three preceding ones, of which the Land is pretty plain, and very good. The Company have a Fort here called *Ravenche*, and this is as fertile in Nutmegs as *Lonthor*, if not more.

Poulo-Rhon and *Roſinguein*, the other two Iſles, are the ſmalleſt of all, very barren, and but thinly inhabited, each having a little Redoubt guarded by ſome inferior Officers.

Banda, which is the ſixth of the eight great Governments that the *Hollanders* have in *India*, lies in four Degrees and a half of South Latitude, four hundred and fifty Leagues from *Batavia*. This was one of their firſt Eſtabliſhments in *India*, and Fort *Naſſau* in the Iſle of *Neira*, before mentioned, was the firſt they built.

Among the ſix Iſles of *Banda*, there are but three where the Nutmegs are cultivated, *viz.* *Lonthor*, *Neira*, and *Poulo-Ay*, the others being too mountainous and barren; the firſt is the largeſt, and furniſhes the greateſt Quantity of Fruits, it having twenty-five Nutmeg Orchards, which in the beſt Year produce all together about 570,000 Pounds of Nutmegs, and 140,000 Pounds of Mace, growing on a Superficies of 140,000 Yards of Land. The Iſle of *Neira* yields in a good Year 8000 Pounds of Nutmegs, and 2000 Pounds of Mace, from a Spot of 10,800 Yards: The Iſle of *Poulo-Ay*, although very ſmall, is in Proportion the moſt fertile of all, having ſix Orchards containing a Surface of 28,760 Yards, which produce in a favourable Seaſon 120,000 Pounds of Nutmegs, and 30,000 Pounds of Mace. The Proprietors of theſe Orchards in the three Iſles want the Aſſiſtance commonly of twenty-ſix thouſand Slaves for their Cultivation and getting in the Fruit.

Of Amboyna.

THE Iſle of *Amboyna* is ſituated in four Degrees twenty Minutes from the Equinoctial Line, at forty Leagues' Diſtance from the Iſle of *Banda*, or thirty-four from *Poulo-Rhon*, the Weſternmoſt of this Cluſter, and conſequently the neareſt. Some Authors place it among the Number of the *Great Moluccas*, although it has not above twenty-four Leagues Circumference. It is divided in two, ſo that the Iſthmus, which ſeparates the two Parts, being very narrow, it

ſeems to form two Iſles. The largeſt of theſe two Parts is called *Hitou*; and the other not above half as big, on the Southern Side, *Leytimor:* The firſt is twelve Leagues long, and two and a half broad; and the other five Leagues in Length, and one and a half in its greateſt Breadth. The two ſmall Peninſulas of this Iſland, form a narrow Gulf between them, of a Parallel Length with *Leytimor*, and ſomething better than a League wide, both at its Entrance and in the Middle. Beſides this great Iſle of *Amboyna*, there are ten ſmall ones very near, *viz.* *Ceram*, *Ceram-Laout*, *Bouro*, *Amblau*, *Manipa*, *Kelang*, *Bonoa*, *Orna*, *Honimoa*, and *Nouſſa-Laout*; theſe laſt three bearing the Name of *Uliaſſers*, which, with *Amboyna*, are the only four Iſles where Cloves are cultivated, the Trees in all the others, being grubbed up, as theſe produce ſufficient to ſerve the whole Globe. The Company have Redoubts and Settlements in all the Iſlands, as well to reſtrain the Inhabitants from planting, as to hinder any contraband Trade from being carried on. At *Amboyna* the *Dutch* have ſeveral Forts, in one of which the Governor reſides, this being the fifth of the Company's great Governments in *India*.

When the *Dutch* firſt became Maſters of this Iſle, there were very few Clove Trees in it, but they have ſince made ſuch Plantations, that it now produces more than all the *Moluccas* put together. The greateſt Crops are gathered at *Hitou*, *Louhou*, *Campbelle*, *Leſſide*, *Nau*, *Caylol*, *Cabaau*, *Larike*, *Vaccaſihou*, *Ourien*, and *Aſſaloulo*, Part in the ſmall, and Part in the great Iſles. All the Iſle is divided into ſeveral Villages, and each Village into many Orchards equally cultivated by the *Dutch* and Natives, who are each obliged to plant ten Clove Trees yearly, which has been the Occaſion of ſo great a Multiplication, as not to leave Room for the Culture of other Fruits, Pulſe, and Greens for common Uſe, but they are brought from abroad, eſpecially *Batavia*. The Clove Trees of *Amboyna* and its Neighbourhood have, from one Year to another, a good and a bad Crop, which is different from the other *Moluccas*, where the other good Crop only comes every fourth Year, and ſometimes every ſeventh. They have tried to plant Nutmeg Trees in the Iſle, and have ſome few growing in Gardens, though they thrive very poorly. At *Victoria* there are Magazines always full of Stuffs. ready made Cloths, Cotton Cloths, and other Merchandize of *India* and *Europe*, where the Inhabitants go to furniſh themſelves with what they want, on which the Company make large Gains. The Proviſions, Stores, and Commodities from *Batavia* are brought here yearly by two of the Company's Veſſels, who on their Return lade entirely with Cloves, which ſome Years are produced in ſuch Quantities, that they are obliged to burn, or throw Part of them into the Sea, proceeding from the Obligation the *Dutch* have laid themſelves under to take all that the Seaſon yields, at a Price agreed on with the Owners.

It is ſuppoſed that there are more than ſixty thouſand Inhabitants, of which the leaſt Part are *Dutch*, ſo that theſe are forced to maintain large Garriſons to awe the Natives, in Caſe they ſhould be diſſatisfied at the Reception of their Cloves. And it may be ſeen at what an Expence both of Blood and Money the Company have ſecured to themſelves this Branch of Buſineſs; and yet after all their Care and Precaution, it never has, nor ever will be, in their Power to hinder the Extraction of the Spices entirely, and in the Manner they endeavour to guard againſt, with ſo much Jealouſy: I mean by partly falling into the Hands of Foreigners, through the Connivance of their own Officers and Servants. The total Number of the Clove Trees growing in all the Places before-mentioned are ſuppoſed to be about two hundred and fifty thouſand, *extra* of the young Plants rearing, to ſupply the old ones' Decay; and as their Fecundity is uncertain, and greatly varying aecording to the different Seaſons, I here add the Products of ſeven ſucceſſive Years, that my Reader may thereby calculate the Average, *viz.* in 1705, two thouſand and ſix Bahares, of five hundred and fifty Pounds, as before-mentioned; *Anno* 1706, twenty-ſix hundred and ſixty-one Bahares; *Anno* 1707, ſeventeen hundred and ninety-eight Bahares; *Anno* 1708, ſix hundred and two and a half Bahares; *Anno* 1709, twenty-nine hundred and fifty-nine Bahares; *Anno* 1710, nine hundred and thirty ſix Bahares; and *Anno* 1711, thirteen hundred Bahares.

Timor and *Solor* are alſo two Iſles of the Eaſtern *Archipelago*, between the Cape of the Iſle of *Celebes*, and the Iſle of *Flores*, where the *Dutch* have ſome Trade and Forts. At *Timor* a Commerce is maintained in Slaves, Wax, and Sanders, of which latter here may be collected yearly near two thouſand Bahares, of five hundred and ſixty Pounds, and *Solor* produces the ſame Commodities, though in much leſs Quantities.

Of THE PHILIPPINES, *or* MANILLAS.

THESE Iſles were diſcovered by the famous *Magellan* in 1520, though not ſettled till 1564, under the Reign of the *Spaniſh* Monarch *Philip* II. from whom they received their new Name. They lie in the *Indian* Sea, between *China* and the *Moluccas*, at about an hundred Leagues diſtance from the Coaſts of *Camboya* and *Champaa*, and two hundred from the *Mariannes* Iſlands; they compoſing one of the five *Archipelagos* in the *Oriental* Ocean, and by ſome are numbered in eleven hundred, though others count them as many thouſands, which is undoubtedly an Exaggeration, greatly exceeding the Truth.

The Iſland *Manilla*, ſo called from its Capital, is the moſt conſiderable of all thoſe poſſeſſed by the *Spaniards*, and the Centre of their Trade, which they extend on one Side as far as *China*, and on the other to the *American* Coaſts, or the *South* Sea. This Iſle, though ſeated under the torrid Zone, as well as the Reſt of the *Philippines*, enjoys a healthful temperate Air, notwithſtanding its firſt bad Reputation. It is the Northernmoſt of all theſe Iſles, and is not leſs than four hundred Leagues in Circumference.

Mindanao, which on the contrary is the Southernmoſt Iſle, hardly yields in Grandeur to the foregoing, but the Inhabitants in ſome Sort carry on a diſtinct Commerce, either with the *Spaniards*, when not at War with them, to *China*, *Borneo*, or the other Iſles of *Sonda*, where they carry ſeveral of their Products, and return with the Commodities they want. They had alſo a ſettled Trade with the *Moluccas*, before the *Portugueſe* and *Dutch* became Maſters of them. The Merchandize which theſe People carry to all the ſaid Places, are Gold, which they gather in their Mountains and Rivers, particularly in that of *Batuam*, Wax, Rice, Sago, Stuffs, made of a Tree's Bark, Cocoa Nuts, Seſame, Oil, Iron, Steel, and baſtard Saffron. The *Spaniards* alſo extract from hence Timber for building their Galleons, which are larger than thoſe of the *European* Conſtruction; and this Iſle alſo affords many thouſand Skins; eſpecially of Stags and Buffaloes, which are proper for the *Japan* Trade; and we might reckon among the Commodities of its Growth, Nutmegs, Cloves, Betal, Cacao, and Pepper; but the Natives omit the Cultivation of more than they want of the two firſt, for Fear that if they increaſe their Plantations, it might invite the *Dutch* among them, and put them on endeavouring to become Maſters of that Buſineſs here, as they had done at the *Moluccas* and *Banda*.

Almoſt all the Trade the *Spaniards* tranſact, is managed, as before obſerved, in the City of *Manilla:* This Capital, the Reſidence of the Archbiſhop and the Viceroy, is ſituated in fourteen Degrees fifteen Minutes of Latitude, in the moſt Southern Part of the Iſle; its Harbour is very good, ſpacious, and ſecure; and it is here where the two Galleons that lade at *Acapulco* in *New Spain* yearly arrive, and from whence they return with the ſucceeding Monſoon to the ſaid Place of their Departure. It is alſo here that the *Chineſe* and *Japaneſe* Veſſels are continually arriving, with a great Part of the immenſe Riches thoſe two Empires are poſſeſſed of, to truck them againſt thoſe of the new World, of which this City is a Sort of Depoſitary for the Eaſt. The Time of theſe People's Negociations is commonly from *December* to *April*, during which Term, thirty or forty of their largeſt Veſſels are always ſeen in the Road, and in the remaining Part of the Year, four or five hundred of all Sizes, which belong to the *Spaniards* and the *Chineſe* ſettled in the Iſles, with others trading to this *Archipelago*. The *Portugueſe* alſo carry on a good Trade here, and it is in this only that they make any conſiderable Gains, ſince they loſt that of *Japan*; though of all the Nations who traffick here, the *Chineſe* are thoſe who carry on the greateſt

greateſt Commerce, and the Number of them reſiding here may amount to at leaſt two thouſand. The Goods which they, and other Strangers, bring here, are Silk and Cotton Stuffs of all Colours, raw and ſpun Silk, Cotton Wool and Thread, Gunpowder, Brimſtone, Iron, Steel, Quickſilver, Copper, Wheat Flour, Walnuts, Cheſnuts, Biſcuit, Dates, Porcelaine, Cabinet, Eſcrutoires, lacquered Trunks, Rice, all Sorts of Drugs, Saltpetre, Cotton Cloth, white and coloured, Ribbon Head-dreſſes for the Women's Veils after their Faſhion, Pewter and other Houſehold Furniture made of it, Silk Fringes, and Thread ones of various Sorts; in fine, divers Merceries and Hardware, of *China* and *Europe*, and ſeveral Sorts of Glaſs Beads, which are proper for the Iſle of *Mindanao*.

The Exports from the *Philippines* conſiſt of the Products of the Country, and thoſe brought there from *America*; the firſt are Gold from *Mindanao*, Wax, Honey, Tobacco, and Sugar, tranſplanted from the *Weſt-Indies*, and which flouriſhes here perfectly well, Stags', and other Animals' Skins, both wild and tame, Timber, as well for Houſes as Ship Building, Plantain Cloth and Thread, ſeveral Oils, Civet, and the Animals that produce it, Palm-Wine, Baſtard Saffron, Cocoa Nuts, and all the Commodities which that wonderful Tree produces; and in fine, Sago, which ſerves the Natives in the ſame Manner that it does the *Moluccans*. The Merchandizes from *America*, are the Products and Manufactures of *Peru* and *Chili*, and of all the *Spaniſh* Coaſts in the *South Sea*, brought to *Manilla* by the Annual Galleon from *Acapulco*, but principally in Gold and Silver, which the Mines of *Potoſi* and *Chili* furniſh the Eaſt with in Abundance, notwithſtanding the vaſt Quantity that the Flota and Galleons yearly tranſport to the Weſt.

Of the LADRONES, *or* ISLES *of* THIEVES.

MR. *Savary* ſays theſe Iſlands were diſcovered in 1520, and Mr. *Echard* in 1552, by *Magellan*, after paſſing from the North to the South Sea by the celebrated Straits bearing his Name; he called them the Iſlands of *Thieves*, in *Spaniſh*, *Iſlas de Ladrones*, on Account of the petty Larceny the Natives were guilty of, in ſtealing a few Nails and Bits of old Iron from him, and the *Iſlands of Sails*, from the vaſt Quantity of Canoes that at once ſurrounded his Ship on his Arrival; they were afterwards named *Mariannas*, from *Mary Anne of Auſtria*, Queen of *Spain*, who ſent Miſſionaries there in 1665, after their being taken Poſſeſſion of for that Nation. They are at the Extremity of the Eaſt, or upon the utmoſt Eaſt bound of our Hemiſphere, in that vaſt Expanſe of Waters, that lie between *Japan*, the *Philippines*, and *Mexico*, or in other Words, between the *Oriental* and *Pacifick* Ocean; there are only fourteen, or as ſome ſay, fifteen of them known, although they are much more numerous: *Gnahans* and *Saypan* are the moſt conſiderable and populous, having, as Mr. *Savary* ſays, more than thirty thouſand Inhabitants each, although the largeſt of them is not forty Leagues in Circumference, which muſt be a Miſtake in the ſaid Gentleman, either in the Number of the Inhabitants, or Extent of the Iſles. Some have believed that they had always a Commerce with the *Tartars*; but it is certain that, before *Magellan's* Arrival, they thought themſelves the only Inhabitants of the Earth, ignorant even of the Uſe of Fire, which they took at firſt for a devouring Animal, to whom an Approach was dangerous. Since the *Spaniards* have been eſtabliſhed here, thoſe of the *Philippines*, diſtant only two hundred Leagues, maintained ſome Trade here, and the annual *Acapulco* Ship always touches for Refreſhments, which they truck againſt Linens, Iron, Merceries, and Hard-Ware; but this Trade is ſo inconſiderable, as would have induced me to paſs it without Notice, had it not been to avoid neglecting the Memento of theſe Iſles, which, by their Situation between *Aſia* and *America*, may very much favour thoſe, who carry on a Marine Traffick from the South to the Eaſt.

Of the Iſles of JAPAN, *or* JAPON.

THESE Iſles lie in the Sea of *China*, between thirty-one and forty Degrees of Latitude, about two hundred and eighty Leagues diſtant from the Continent in ſome Places, though in others not above ſixty. The three principal ones are *Niphon*, in which is ſeated *Meaco*, the moſt important City of the Iſles for Trade, *Ximus*, or *Ximo*, and *Xicocon*, or *Xicoco*. A great Number of ſmall circumjacent Iſles ſurround them, though but little known to the *Europeans*, except thoſe of *Firando*, where the *Dutch* had at firſt ſome Settlements, and that of *Bongo*, called *Cikoko*, where *Nangaſaki* is built, the Seat at preſent of the *Dutch* Trade, and which was formerly that of the *Portugueſe*, before their Expulſion from *Japan*.

It has been for a long Time controverted, whether *Niphon*, the largeſt of theſe Iſles, and ſome others to the North of this vaſt Empire, do not join with *Great Tartary* or to *Jeſſo*, that Land newly diſcovered, and as yet but little known; ſome modern Relations however ſeparate it by the Straits of *Sangaar* from any Continent, and more eſpecially the Obſervations of that fine Chart, which the deceaſed Czar, *Peter the Great*, had made, to inform the Publick of this Truth, and to delineate the Lands ſubject to his Dominion, ſhow that northward they are very near to *Japan*, or at a Diſtance which places the one or the other, by a Strait, within Sight. That Land which lies to the North of *Japan*, is called *Jeſſo* by the *Japaneſe*, which they take to be an Iſland, though it is aſſerted by Dr. *Garcin*, to be a Peninſula joined by its northernmoſt Part to *Great Tartary*.

One Emperor is the ſole Monarch of this vaſt Empire, and notwithſtanding it has many Kings, theſe are more Titles of Honour than Enſigns of Sovereignty; thoſe bearing them having no more Authority than Governors of Provinces, or Viceroys. This Country has always carried on a very conſiderable Trade, either by Strangers coming here with their Goods, or that the *Japaneſe* have gone to fetch them, and carried thoſe of their own Growth for Barter.

The Commerce of the *Chineſe* with *Japan* is almoſt as ancient as the two Empires, and the *Siameſe* and *Camboyars* did not carry on an inconſiderable one, till the *Dutch* became Maſters of it, to the Downfall of that of the other three. The *Japaneſe* trade to *Cochinchina*, *Siam*, *Camboya*, and the *Manillas*, their principal Returns being in Silk.

The *Portugueſe* were the firſt *Europeans* who had any Knowledge of theſe Iſles, either, as ſome ſay, by Relation from the *Chineſe*, or *Siameſe*; or, as others report, that they were driven on them by a Storm in 1534, or 1543, going to *China*. The firſt Place they ſettled at was on the Coaſts of *Sarunga*, pretty near the City that gives Name to the Iſle; but the Shores not being good and holding, they four or five Years after, paſſed to the Iſle of *Quiſna*, near *Nangaſaki*, a Poſt that the *Dutch* now enjoy, and carried on a yearly Trade to the Value of two hundred and forty thouſand Pounds Sterling.

A Jealouſy in Trade, rather than a true Intereſt of State, drove the *Portugueſe* out of this Empire in 1636; and with them all other Chriſtians, who were reckoned to be four hundred thouſand in 1620, and the Chriſtian Religion, which *St. Francis Xavier* had begun to preach there in 1549.

Before the Edict, which bars the Entrance to *Japan* againſt the Chriſtians, the *Engliſh* were well received here, and had many Privileges granted them; but the *Dutch* found Means, by Miſrepreſentations, to get them among all other Chriſtians excluded, and to continue in Poſſeſſion of the Trade themſelves, for which indeed they are the fitteſt, as moſt of the Products of *Japan* are ſold in their other Settlements, and the Products of them brought here; though the *Dutch* were included in the general Expulſion, but had taken ſuch Meaſures as to procure a Re-eſtabliſhment in about three Years, when they returned, though not to *Firando* their former Settlement, but to *Nangaſaki*, or rather *Diſma*, where the ſame Habitation was given them as had formerly belonged to the *Portugueſe*, and where the Company's Preſident has reſided ever ſince 1641.

Nangaſaki, Capital of the Iſle of *Bongo*, or *Cikoko*, is ſituated in the thirty-third Degree of northern Latitude, before which lies a ſmall Iſle, ſeparated by an Arm

of the Sea, only forty Feet wide; and for a Communication between it and the City, there is a Bridge an hundred and fifty Paces long, by fifty wide; at one End of it there is a Draw-bridge, in the Hands of the *Japaneſe*, which the *Dutch* are prohibited to paſs, without leave from the Governor of the City, on Pain of Death; neither are any of the *Japaneſe* permitted to enter, except the Interpreters and Factors, with whom the Officers and Commiſſioners of the Lodge may only have Communication.

The whole Iſland is palliſadoed round, for the Security of the Company's Warehouſes; four long Streets divide it, which are croſs cut by ſome public Places; on each Side are a Number of Magazines, though the principal one is at the Gate of the Bridge, where the Goods are ſold. There is another Port to the Sea Side, which is where they lade and unlade their Veſſels.

The Impoſitions on them are very extraordinary, and what no Nation could ſubmit to, leſs wedded to their Intereſt than the *Dutch*; but theſe patiently bear every Innovation and Inſult, for the enchanting Premium of an hundred and fifty *per Cent.* that they are ſuppoſed to make by this lucrative Commerce, and which it is reckoned leaves the Company an annual clear Profit of five Millions. The two Ships that the *Hollanders* ſend to *Japan*, carry their Returns to *Batavia*, where the Repartition of the Goods brought there is made, according to their Propriety, for the different Markets in *India*, *Aſia*, and *Europe*, that the Company trade to.

The Merchandizes of *Europe*, *India*, and *China*, fit for the Trade of *Japan*, are Scarlet and other lively coloured Cloths; Camlets of various Sorts; red Serges, Burats, a coarſe woollen Stuff, Gold and Silk Brocades; Damaſks; black and coloured Armoiſins; Gauzes, and other Silk Stuffs; whitened and raw Silks; Cotton Thread and Wool; Embroideries; Carpets, Linens; Silk Night-Gowns ready made; *Flanders* Pack Cloth; Glaſs and Earthen Bottles; Lead, Pewter, Steel; different Sorts of Aloes and Brazil Wood; white and *Muſcovado* Sugar; *Cambodian* Nuts; the Skins of a Fiſh like a Thornback; Allum; red Leather; Capoc, a Sort of very fine Cotton, Wax; a mixed Metal called Calin; Sublimate, Caſſia, Verdigris; Tea; Colours for Porcelaine; Camphire, Muſk, Paper, Pepper, Spices, Elephants' Teeth, Hemp, red Wool, medicinal Drugs, Borax, Quickſilver, *China* Porcelaines; and Mercеries of all Sorts from thence and *Nuremberg*; red Coral, and Stags' Skins, with thoſe of other Animals; of which Green Hides the *Dutch* carry yearly to *Japan* two hundred thouſand of Stags, and an hundred thouſand of Beeves, moſtly procured from *Siam*; and of which the Iſland of *Formoſa* furniſhed them a Quantity whilſt they remained Maſters of it.

Almoſt all the Goods are paid for in ready Money, and a large Profit is to be made by carrying them to *China* and *Bengal*.

From *Japan* the Exports are, all Sorts of Houſehold Furniture of painted lacquered Wood, Fans, Porcelaine, Medicinal and Dying Drugs of the Country's Growth; Copper, ſome Minerals, Goats' Skins, Silk and Floſs; of which the *Japaneſe* often ſell a Part, and get foreign Silks for their own Uſe, eſpecially thoſe of *China*, inſtead of them.

Of the Trade of JESSO.

THE Country of *Jeſſo*, *Yedſo*, *Yeco*, *Jedio*, or *Eſo*, makes only one Continent with ſome of the *Japan* Iſles, although there have been both Navigators and Geographers, who have thought it ſeparated by an Arm of the Sea, which the *Japaneſe* alſo affirm. Its Inhabitants and Trade were for a long Time unknown to the *Europeans* frequenting the *Aſian* Seas, and it is only ſince 1643, that there has been any Advices about it; gained by the Return of a *Dutch* Ship called the *Caſtricum*, that diſcovered it. The Natives of the Country, which is very mountainous, are moſtly Savages, both in Form and Manners, being entirely without Religion, and almoſt covered with long Hairs like Bears, eſpecially the Mountaineers, though the Inhabitants of Towns are a little more poliſhed, and all equally under the Dominion of one Prince or Governor, who acknowledges the King of *Japan* for his Sovereign, and pays him yearly a Sort of Tribute, which he perſonally preſents, and it conſiſts commonly of Silver and Oſtrich Feathers.

The

The Trade which they carry on with the *Japaneſe* is not inconſiderable, and theſe were the only People they knew till the *Dutch* appeared among them. The Commodities which they truck with the *Japaneſe*, are Whales' Fat, and their Tongues ſmoked and dried, Furs, ſeveral Sorts of Feathers, and other Products of their Lands and Game, beſides ſome Hemp which they ſpin, by holding it between their Teeth, and twiſting it with the Palms of their Hands. The *Japaneſe* Merchants viſit them once a Year, and carry them Rice, Sugar, Silk Clothes, and others of a blue Stuff called *Kangan*; Copper, Tobacco Pipes, and Boxes, Cups, varniſhed Pots, and other ſmall Kitchen Utenſils, Silver Pendants, and Copper Ear-rings, Hatchets, Knives; and in fine, all that they have comes from *Japan*. Theſe People, notwithſtanding their natural Savageneſs and Barbarity, are however very ſubtle and intelligent in their Trade, wherein they are truly juſt and faithful, without any Inclination to Theft; in general they moſtly eſteem Iron, and more eſpecially thoſe under the forty-ſixth Degree prefer it in their Traffick with Strangers, to all other Commodities whatſoever.

This finiſhes my Account of the *Aſiatick* Commerce, in which I have been as conciſe as the Nature of the Subject would permit; conſcious of having already exceeded my propoſed Limits, though I hope neither unneceſſarily, nor unprofitably to my Reader, whoſe Information I have ever ſtrictly conſulted, rather than any Eaſe or Advantage to myſelf.

Of the Commerce of AMERICA.

AMERICA was diſcovered in 1492, by *Chriſtopher Columbus*, a *Genoeſe*, though *Americus Veſpucio*, a *Florentine* Merchant, who went there in 1497 and 1499, had the Honour to give it its Name: It is divided into two great Parts, that form a Peninſula each, and are joined by an Iſthmus, hardly ſeventeen Leagues wide. Both are denominated from their Situation; that to the North being called *Northern America*, and that to the South *Southern*. This laſt is alſo named *Peruvian*, and the other *Mexican*, from *Peru* and *Mexico*, the two greateſt Empires that the *Spaniards* conquered in this new World; whoſe Diſcovery having been made at the Expence of *Ferdinand* and *Iſabella*, King and Queen of *Caſtile* and *Arragon*, the *Spaniards* have always pretended, that theſe new found Lands ought to belong to them only; but other Nations not attending the Diſcuſſion of this unjuſtifiable Claim, have each taken Poſſeſſion of what ſuited their Conveniency in the one and the other Part; ſo that the *Portugueſe* at preſent ſhare the Empire of *Peru* with its pretended Owners; and the *Engliſh*, *French*, *Dutch*, and *Danes*, are Maſters of the greateſt Parts of *Mexico*, and the Northern Iſles.

America is almoſt environed by the Sea, and is denominated either *North*, or *South*, America, according as the Coaſts it waſhes are ſituated towards either of thoſe two Points of the Heavens; the South, being alſo called the *Pacifick* Sea. In the one and the other Sea, joined by the Straits of *Magellan*, *Maire*, and *Browes*, are ſeveral Iſles, though many more in the North than in the South, this having none that are conſiderable; whilſt the North has the *Bermudas*, *Lucayes*, *Antilles*, and the large Iſles of *Cuba*, *St. Domingo*, or *Hiſpaniola*, *Jamaica*, *St. John de Porto Rico*, *Terra Nueva*, *Cape Breton*, or *Louiſbourg*, and ſome others of leſs Importance, and uninhabited.

The Diviſion of this new diſcovered Quarter of the Globe is as follows, *viz.*

The *Spaniards*, who were its firſt Conquerors, and who are alſo the beſt ſettled here, poſſeſs on the Continent all Southern *America*, except *Brazil*, belonging to the *Portugueſe*, and ſome Places in *Chili*, *Magellan*, and the Iſthmus of *Darien*, where they never have been able to ſubdue the *Indians*, who are therefore called *Indios bravos*, brave *Indians*.

Spain alſo occupies the beſt and richeſt Part of the Northern Diſtrict to *Miſſiſſipi*, *New Albion*; and the Iſles belonging to them are, *Hiſpaniola*, otherwiſe called *St. Domingo*, which the *French* ſhare with them, *Cuba*, *Porto Rico*, *Margarita*, *Lucayes*, and ſome others of leſs Note, that the *Spaniards* only ſometimes viſit, without having any Colonies on them.

Next to the *Spaniards* the *Engliſh* have the moſt flouriſhing Settlements in *America*, as well for the Number of Inhabitants, and the Quantity of Ships ſent there yearly, as for the valuable rich Commodities they produce.

The *French* have in *Terra Firma*, *Miſſiſſippi*, *Cayenne*, and ſomething towards the River *Surinam*. Their Iſles are, *Martinico*, *Guadaloupe*, and *Santa Croix*, among the *Antilles*. They have beſides the Southern Part of *St. Domingo*, and the little Iſle of *Tortuga* near to it.

The *Portugueſe* only poſſeſs in *America*, the Coaſts of *Brazil*, extending from the River of the *Amazons*, to that of *St. Gabriel*, near the River of *Plate*; this Coaſt is divided into fourteen Commanderies, of which the beſt known in *Europe* are *Fernambouc*, the *Bay of all Saints*, and *Rio Janeiro*.

The *Dutch*, ſo well ſituated in the *Eaſt-Indies*, are bad enough off in the Weſt, where all their Colonies are reduced to thoſe of *Saba*, *St. Euſtatia*, and *Walkeren*, all the ſmalleſt Iſles of the *Carribbees*; but to make them ſome Amends, they poſſeſs thoſe of *Bonaire*, *Aruba*, and *Curaçoa*, which lying pretty near to *Carthagena*, and *Porto Bello*, furniſh them with frequent Occaſions of carrying on a very beneficial contraband Trade, againſt which the *Spaniſh* Governors uſually ſhut their Eyes.

Surinam, at the Mouth of the River with the ſame Name, on the Coaſt of *Guaiana*, belongs alſo to the *Dutch*, as does *Bamrom*, *Aprouvace*, and *Berbice*, all theſe in *Terra Firma*, and are, as one may ſay, ſeparated by *Cayenne*, appertaining to the *French*.

In fine, the *Danes* are ſettled in the little Iſle of *St. Thomas*, where the *Hamburghers* have alſo a Factory. This Iſland is not very diſtant from *Porto Rico*, and they have another ſmall one among thoſe called the *Virgins*.

Theſe are the only Nations ſettled in *America*, and having ſpoke of their Poſſeſſions, I ſhall now proceed to treat of their Trade, beginning firſt with that of the *Spaniards*, as Maſters of a larger Share of thoſe Parts than all the Reſt put together.

The Iſle of *Cuba* is the largeſt of the *American* North Sea, after *St. Domingo*, which however it greatly ſurpaſſes in its Riches and Commerce. It lies Eaſt and Weſt from twenty to twenty-three Degrees of North Latitude; it is about four hundred Leagues in Circumference, and is almoſt cut in two by a Chain of Mountains, from whence iſſue ſeveral Brooks and Rivers, whoſe Gravel contains ſome fine Gold, a plain Indication of the neighbouring Mines being impregnated with that Metal, though hitherto they have remained unwrought, as well as thoſe of Copper and Silver, ſuppoſed to be within three Miles of *St. Jago*, the Capital of the Iſle; but its chief Riches are the vaſt Number of Hides cured here, taken from the Infinity of both its tame and wild Cattle; beſides which it produces, Sugar, Tobacco, Tallow, dry Sweetmeats, Ginger, Caſſia, Maſtic, Aloes, Sarſaparilla, and a great Quantity of Tortoiſe-ſhell.

Hiſpaniola, more commonly called *St. Domingo*, from the Name of its Capital, is ſeated between the eighteenth and twentieth Degree of North Latitude, near the Middle of *Cuba*, *Jamaica*, and *Porto Rico*; from which latter it is only ſeparated by a very narrow Strait. The principal Commodities that the *Spaniards* trade in from their Part, are Hides, Tallow, Sugar, Ginger, Cocoa, Wax, Honey, ſome Ambergris, *Brazil* and *Guayac* Woods, which grow here, and that of *Campeche* brought from Abroad; in fine, Lemons, Oranges, and many other Fruits, ſold freſh, and of which moſt excellent Sweetmeats are made, both wet and dry: Here are alſo ſome Gold Mines, but ſince the entire Deſtruction of the Natives, they remain unknown, and the preſent Poſſeſſors have no more of this Metal, than what is found among the Gravel of the Rivers.

The City of *St. Domingo*, ſeated in the Southern Part of the Iſle, at the Mouth of the River *Oſano*, is the Capital of the *Spaniards'* Share in *Hiſpaniola*, and the Staple of their Goods, either Native or Foreign; the Inhabitants of the other Towns coming here to furniſh themſelves with theſe from *Europe*, and the Continent of *America*, brought here in the Ships of that Nation, at the ſame Time leaving their's for Embarkation. The Salt-ponds of the Iſle are almoſt equally divided between the *Spaniards* and the *French*, there being many in the Northern

Part, where the latter inhabit, and not fewer in the Southern, where the former have their chief Eſtabliſhments: The moſt abundant, and from whence the beſt Salt is extracted, are thoſe of the Bay of *Ocoa* and *Corodou* to the South; and them of *Caracol*, *Limonade*, and *Monte-Chriſto*, to the North-Eaſt. Here are alſo found ſome Mountains of Sal Gemme, but they are neglected, as well as ſome other Minerals, which might become, with a proper Care and Application, a conſiderable Object of Trade.

Porto Rico is ſituated fifteen Leagues to the Weſtward of *Hiſpaniola*, being from thirty to thirty-five Leagues long, by twenty broad, and was named, either from the Port of its Capital, which is one of the moſt ſpacious, commodious, and ſecureſt in *America*, or from the Quantity of Gold, at that Time extracted from the Mines of this Iſle.

There is now but little of this precious Ore appears in the Commercial Tranſactions of the Iſle, the Mines having been either exhauſted, or neglected for Want of Workmen; here is, however, always ſome little collected in the River-Sand, and particularly in the Torrents that fall from the Mountains, and moſt abundantly in thoſe of *Mantanabow* and *Cecubo*.

The chief Trade carried on here, conſiſts of Sugar, Ginger, Hides, Cotton, Wool, and Thread; Caſſia, Maſtick, Guayac, Mays, Salt, of which here are excellent Ponds, Oranges, and Lemons, freſh or preſerved, and all Sorts of Cattle. Its principal Cities are, *Porto Rico*, the Capital, *St. Germain*, *Arezibo*, and *Guddiamila*, though the firſt is where all the Buſineſs of the Iſle is carried on.

Margarita, or *Pearl* Iſland, on the Coaſt of *South America*, at eleven Degrees of North Latitude, was for a long Time famous for the Fiſhery of Pearls, but has been deſerted ever ſince the Middle of the ſeventeenth Century, and this Buſineſs transferred to *La Rancheria*, in the River of *La Hacha*, where the *Spaniards* ſent ten or twelve Barks yearly from *Carthagena*, convoyed by a Man of War of twenty-four Guns, with proper Divers for the Oyſters.

Of the Trade on the Coaſt of SPANISH AMERICA *in the* NORTH SEA.

IT would undoubtedly be too long, and an unprofitable Attempt, to enter into an exact Detail of all the Maritime Towns, where any Trade is carried on, in this Part of the *Spaniſh* Dominions; I ſhall therefore deſcribe thoſe Places which ſerve as Staples, or publick Storehouſes, and where the Flota, Galleons, and Regiſter Ships, come to deliver their *European* Goods, and relade thoſe of *America*.

The Chief of theſe Cities in the *North* Sea, are *Porto Bello*, for *Peru* and *Caſtile d'Or*, or *New Caſtile*; *Carthagena*, for *New Grenada*, and Part of *Guatimala*; *Vera Cruz*, for all *Mexico*; *Porto Cavallo*, for the *Honduras*, and the other Part of *Guatimala*; *Maracaibo* for *Venezuela*, and the neighbouring Provinces; *Buenos Ayres*, for *Paraguai* and *Chili*; and ſome others of leſs Conſequence.

Porto Bello is no ancient City, having been built in 1584, to ſerve as a Retreat for the Galleons, inſtead of *Nombre de Dios*, ſeated leſs advantageouſly, and where bad Air expoſed both the *Europeans* and the *American* Merchants to many Diſorders, when their Traffick obliged them to meet at this unhealthful Place; though the former is but ſmall, and almoſt as unwholeſome as the other.

It is here that the Fair is held, for a Month or ſix Weeks, while the Galleons ſtay, when the principal Dealers return to *Panama*; where they reſide all the Reſt of the Year. The Concourſe is ſo great at *Porto Bello*, during the Fair, that the ſmalleſt Shop often lets for a thouſand, and a middling Chamber for an hundred and twenty Dollars, only for the ſhort Time it laſts; Proviſions alſo augment proportionably, and commonly two thouſand Mules are employed in bringing the Goods from *Panama*, and returning with thoſe from *Europe*, the Diſtance between the two Places being about eighteen or twenty Leagues; the chief of what they bring from *Panama* on the ſaid two thouſand Mules, is Gold and Sil-

ver, which is delivered at the Place of the Fair, and after being there weighed, and marked by the proper Officers, is thrown by with as much Neglect, till embarked, in the Corner of ſome Warehouſes, as Pigs of Lead are in the Countries where they abound.

I have already mentioned, under the Article of the *Spaniſh* Trade, what Commodities were proper for the *Weſt-Indies*, and ſhall now add, that the Returns from *Porto Bello* are in the aforeſaid precious Metals, Indigo, Cochineal, Cacao, now brought only by the *Caraccas*, or *Guipuſcoa* Company, Sugar, Tobacco, Hides, *&c.* The King's Revenues, being one-fifth of all Gold and Silver, are generally ſent home by the Galleons, as well as what appertains to Particulars, and which is delivered theſe latter at *Cadiz*, after Payment of ſuch Duties as the King thinks proper to impoſe.

Carthagena is one of the four Provinces of *New Caſtile*, whoſe Capital, with the ſame Name, is ſeated on the *North* Sea, though very diſtant from *Porto Bello*, to which it is hardly inferior for its Trade, and greatly exceeds it in Grandeur, Populouſneſs, and Riches. It is one of the beſt Ports in the World, and therefore made Uſe of by the Galleons for Wintering, when they are obliged to paſs that Seaſon in theſe Parts, and where they often call on theſe Occaſions; beſides which, this Place maintains a great Trade with almoſt all the Provinces of *Mexico* and *Peru*, and no ſmall contraband one with *Jamaica* and *Curaçoa*. It is here alſo, that the Revenue of his Catholick Majeſty, and the Effects of Particulars, are brought from *New Caſtile*, and the other three Provinces of that Kingdom, to be ſent Home by the Galleons; theſe Commodities are Gold, Silver, Drugs, Medicinal Plants, Spices, and all others mentioned to be ſhipped from *Porto Bello*, beſides ſome Emeralds from the Mines, near the City of *St. Fé de Bogatto*.

Vera Cruz, called alſo *St. John de Ulhua*, from the Name of its Port, is ſituated at the Bottom of the Gulf of *Mexico*, in the Nook formed by the *Yucatan*; and is in ſome Manner a City of the greateſt Trade in all the *Spaniſh America*, either on the one, or the other Sea; its Merchants ſending their Ships in all the Northern Ocean, and to the Iſles of *Cuba* and *St. Domingo*, to *Jucatan*, *Porto Bello*, *Carthagena*, and all other *Spaniſh* Places where any Trade is carried on: And though ſo extenſive a Traffick might ſuffice to enrich a much larger City than this, it is however the leaſt Object of its Inhabitants' Commerce, as it is here, if I may be allowed the Expreſſion, that all the Riches of the Old and New World unite; thoſe of the firſt brought annually in from the *Manillas*, and *Eaſt-Indies*, by the Way of *Acapulco*; and from *Europe*, by the Flota; and the Products of the latter, collected here from all Parts of *Mexico*, to be forwarded to *Old Spain*. The Number of Inhabitants is not very conſiderable, as they hardly exceed three thouſand; but theſe are all Merchants, or Factors to thoſe of *Mexico*, among which are many who have three or four hundred thouſand Dollars to employ.

The Fair begins on the Flota's Arrival, and laſts as long as it ſtays here, when the Concourſe is very great; and in Caſe its Detention is all the Winter, which ſometimes happens, this is the Place it remains at; though it generally lades in *April*, and departs in *May*, if the Weather permits; if not, continues here till *Auguſt*, according as Winds and other Circumſtances are favourable, or otherwiſe.

Porto Cavallo is the Place where all the Trade carried on between *Spain* and the *North* Sea with *Guatimala*, a large Province of *Mexico* in the *South* Sea, is tranſacted. Its Inhabitants are almoſt all Factors to the Merchants of *Guatimala*, and their Houſes Magazines for the Reception of their Goods, being a Port of greater Commerce than any in the Gulf of *Honduras*, at whoſe Bottom it is ſeated pretty near to *Rio-Dulce*, called alſo the River of *Guatimala*. The *Spaniſh* Ship that brings the *European* Merchandize here, is one of the Regiſters, commonly of ſeven or eight hundred Tons' Burthen, laden, as I have formerly mentioned, with Iron, Steel, Paper, for writing and print, Linens, fine Cloths, Silks, Saffron, Oil, Serges, Ribbons, Thread, and ſome ſmall Hard-Wares, Merceries, and Glaſs Beads for the *Indians*.

The Goods which come from *Guatimala*, are Gold, Silver, Cochineal, Indigo, Hides, Sarſaparilla, Jalap, Mechoacam, Cotton, Balm, a Specie of Petrole Oil, *&c.*

Maracaibo is the Name of a great Lake, at the Extremity of the Bay of *Venezuela*, as alſo of the principal Town that the *Spaniards* have on it; which, though but ſmall, is well built in the modern Taſte: It has a moſt excellent Harbour, and its Merchants are ſo rich, as to build, fit out, and lade their own Veſſels for all Parts of *America*, and ſend them even to *Spain*. This City has the Privilege of a yearly Regiſter-Ship to lade the Products of the Country, and bring thoſe from *Europe* fit for this Market. It is alſo the Depoſitary for the Goods from *Merida*, and of ſome other Places on the Frontiers of *New Granada*, and *Venezuela*, eighteen, or as others will have it, forty Leagues from *Gibraltar*, a large Town on the Lake, where the chief Merchants of *Maracaibo* have their Eſtates. It is from *Merida* that all the Gold, Silver, and precious Stones, are brought to *Maracaibo*; and from *Gibraltar*, the beſt Tobacco, and the moſt excellent Cacao, that all the Continent of *America* produces.

The Commodities proper for the Bay of *Venezuela*, and the Lake of *Maracaibo*, are Linens, Silks, Wines, Tools for Agriculture, ſome Hard Ware, and ſmall Mercery, and many other of thoſe I have formerly mentioned.

Buenos Ayres, ſituated in the thirty-fifth Degree of South Latitude, is built on the Southern Bank of the great River of *Plate*, on the Declivity of a little Hill, at the Mouth of a ſmall River, falling into the great one. It contains near four thouſand Houſes, all Earth, except fifty Bricks; its Inhabitants are rich, and owe their Riches to the great Trade they drive, both at Home and Abroad.

Its inland Trade is with *Paraguay*, *Chili*, and *Peru*; and the foreign one, firſt, with *Brazil*, where the Merchants ſend their Ships, although they will admit no *Portugueſe* into their Ports. Secondly, with the *Spaniards* of *Europe*, who lade ſeveral Regiſter Ships, to bring here all ſuch Goods as I have mentioned to be fit for *Porto Bello*. Thirdly, with the *Engliſh* when the *Aſſiento* Trade ſubſiſted; and fourthly, here come many Veſſels from ſeveral Parts of *Spaniſh America*.

The chief Commodities exported from *Buenos Ayres*, are Hides, of which vaſt Quantities are ſhipped here, Cochineal in ſmall Cakes, and *Vigonean* Wool, both from *Peru*, *Coquimbo* Copper, *Paraguay* Herb Tobacco, Loaf and Muſcovado Sugar, Cotton Thread, yellow Wax, and what elſe the Cities of *Paraguay* and *las Corrientes* produce; in Truck of which the Inhabitants of thoſe two Places take Knives, Sciſſars, Ribbons, Taffeties, Linens of *Bretagne*, flowered ditto of *Rouen*, Silk Stockings, *Engliſh* coloured Flannels, grey Caſtor Hats, Silk Stuffs, Cloth, and *Peru* or *Quito* Flannels, as no Caſh ever comes from or goes to either of the ſaid Cities.

The Bay of *Campeche*, and the Coaſt of *Caraccas*, ought alſo to have a Place among the trading one of *Spaniſh America* in the North Sea, as the firſt abounds with Logwood, the Dying Wood, ſo much eſteemed in *Europe* for Blacks, and Violets. The City of *Campeche*, which is the Capital of the Country, is ſeated in twenty-nine Degrees of Latitude, and the only one that there is, from Cape *Catoche* to *Vera Cruz*. The Goods extracted from hence, beſides the aforeſaid Woods, are Timber for Building, Wax, Sugar, Caſſia, Sarſaparilla, and Hides.

The *Caracca* Coaſt is fruitful in that Sort of Nut, wherewith Chocolate is made, and though it ſeems a long Chain of Mountains, yet it has many Vallies, where the Inhabitants of *Caracca*, Capital of the Country, maintain their Slaves to cultivate the ſaid Nut Trees which produce the Cacao leſs in Size than what is gathered in other Parts, yet this is eſteemed the beſt in Quality of all that *America* yields.

This Coaſt affords little Trade beſides this Fruit, though here are ſome Hides and Silver, but theſe are contraband Commodities; and the Goods moſt vendible here, are ſeveral Sorts of Linens from *Europe*, and Calicoes from *India*, Brandy, Earthen Ware, and ſeveral other Manufactures of *England*, *France*, and *Holland*.

Of the Commerce of the SPANISH AMERICAN *Coaſts in the* SOUTH SEA.

THAT Part of the Ocean, entered from the *North* Sea, by the Straits of *Magellan*, *Maire*, and *Bowers*, and which waſhes the Meridional Coaſts of *America*, from the ſaid Straits to the Iſle of *California*, is called the *South* Sea; it is alſo called the *Red* Sea, the *Pacifick* Sea, the Sea of *California*, and the Sea of *Jeſſo*; but this is only when a Part is to be ſpecified, the Name of the *South* Sea comprehending the whole, when ſpeaking in general.

The principal Cities which the *Spaniards* poſſeſs on theſe Coaſts, and where they carry on the greateſt Trade, going up them from *Chili* to *New Spain*, are *Baldivia*, the *Conception*, *Valparaiſo*, *Arica*, *Lima*, and *Callao* its Port, *Panama*, *Acapulco*, and *La Navidad*; beſides which principal Places, here are a Multiplicity of ſmall Ports between them, that either ſerve for lading Places to ſome inland Cities, or for carrying on a coaſting Trade, with the Products of each particular Diſtrict; the chief of which are *Auroca*, *Lavelia*, *Guiarme*, *Paita*, *Rio-Tomba*, *Selaques*, the *Trinity*, *St. Michael*, *Tomaco*, *Sanſonnat*, *Sagno*, *Naſca*, *Piſca*, *Pachacama*, *Barbacoa*, *Tecoantepeque*, *Nicoya*, *Chiricito*, and ſome others.

Baldivia, *La Conceptione*, and *Valparaiſo*, are ſituated on the Coaſt of *Chili*, and it is in their Ports that all the Trade of this Kingdom with that of *Peru* is tranſacted, as the Way by Land, although ſhorter, is both more difficult and dangerous, on Account of the Mountains to be croſſed, which are almoſt all deſert, and ſo difficult of Acceſs, by the extreme Cold always reigning here, that there are but few Merchants who care to run the Hazards of them; and the other Road by the Deſart of *Datacama*, notwithſtanding it is the ſhorteſt, is not leſs difficult through the Want of freſh Water.

Baldivia is the firſt City found on the Coaſt, after paſſing the Straits of *Magellan*, and is ſeated two Leagues from the Sea, in the fortieth Degree of Latitude, between the Branches of two Rivers, which at their Mouth form one of the fineſt and ſecureſt Ports on all this Coaſt. The Gold Mines, which are not very diſtant, and more abundant and rich than any other of *Chili*, rendered it formerly very famous, but the Revolt of the *Arauco Indians*, who invaded and took it in 1599, and whom the *Spaniards* have not been able to ſubdue ſince, has greatly diminiſhed its Reputation and Trade, although theſe latter are re-eſtabliſhed here, and maintain a Garriſon of two hundred Men. Its principal Trade by Sea is to *Lima* the Capital of *Peru*, where they yearly ſend eight or ten Veſſels of four or five hundred Tons, laden with all the Products of the Country, among which are Beef and Goats' Skins, Tallow, Salt Meat and Wheat. And the Returns made by theſe Ships are in Wines, Sugar, Cacao, Spiceries, and all Sorts of *European* Merchandize, that arrive from *Porto Bello* to *Lima*, by Way of *Panama*. Its Inland Commerce is to *St. Jago*, Capital of *Chili*, through which it receives from *Buenos Ayres* the various Commodities mentioned in treating of the Trade of that famous City.

La Conceptione, reckoned the ſecond City of *Chili*, counting *Baldivia* for the third, and *St. Jago* for the firſt, is ſeventy Leagues from this laſt, and ſixty from the other. Its Port, in Form of a Horſe-ſhoe, and from thence called by the *Spaniards Herradura*, is five Leagues from the City, to which light Veſſels go up by the River *Andalien* which croſſes it. The Mines of *Quilacoya*, and *Quilacura*, are only four Leagues diſtant, and the principal waſhing Places of the Kingdom much about the ſame; it is here that on ſeparating the Earth from the Metal by this Lotion, that thoſe Lumps of Gold are diſcovered, which are of the greateſt Purity, and ſo much enrich the fortunate Finders: And which, as well as all that is extracted from the Mines, is carried to the Mint at *St. Jago*, to pay the King's one fifth, which is ſent with the Reſt of the Royal Revenue to *Lima*. The Natives breed a great Quantity of large Cattle and Goats, the Skins of which laſt they make into Cordovans, and ſend theſe with the other Hides to *Lima*, from whence, by *Panama* and the River *Chagre*, they are tranſported to the North Sea. The other Commodities in which they trade being much the ſame as thoſe of *Baldivia*, with the Exception of Wool and Cloth, and other

Stuffs made in the Country, and the Ships which the Inhabitants ſend Yearly to *Peru*, being ten or twelve, bring with little Difference the ſame Returns as thoſe of the other aforeſaid City do.

Valparaiſo is ſeated in a Bay of the ſame Name, at the Mouth of the River *Topocalma*, and ſerves as the Port to *St. Jago*, the Capital of *Chili*, built on the ſame River, fifteen Leagues from the Sea. This Port is one of the ſafeſt and moſt commodious of thoſe on the South Coaſt, and is where all the King's Revenue of *Chili* is embarked for *Peru*, as alſo the Effects of Particulars deſtined for the North Sea, conſiſting eſpecially of Gold, drawn from the Mines near *Baldivia* and the *Conception*, or thoſe of *Tiſtil*, which are between *Valparaiſo* and *St. Jago*. There are alſo carried to *Lima* Turquoiſes, which are found in an excellent Rock, opened in the Valley of *Copiapo*, in the Northern Part of *Chili*.

Quintero and *Coquimbo* are alſo two maritime Cities of *Chili*, where ſome Buſineſs is tranſacted, eſpecially at this laſt, in whoſe Neighbourhood is a Copper Mine, producing Metal with which all the Artillery of *Peru* and *Chili* is caſt.

Arica, although it is the leaſt conſiderable City in *Peru*, for the Number of its Inhabitants, and Beauty of its Buildings, there is ſcarcely any Place which, in ſo ſmall a Time, tranſacts ſo rich a Commerce, its Warehouſes being, for fifteen Days, the Depoſitaries of all the Treaſures from *Potoſi*; and the Silver Fleet, which yearly ſails with the King's Revenue, and the Mines' Produce for *Lima*, to be afterwards forwarded by the Way of *Panama* to *Porto-Bello*, in the North Sea, for the Galleons. This Treaſure is brought from *Potoſi* to *Arica* in *March*; and in *June* the *Lima* Ships come to lade it. The City is ſituated in eighteen Degrees forty Minutes of Latitude, ſeventy Leagues from the City of *Potoſi*, to which it however ſerves for a lading Place, as before-mentioned.

The Merchandizes which are brought from *Lima*, and other Ports of *Peru*, to *Arica* for *Potoſi*, are *European* Cloths and Serges, with others from *Quito*, where the beſt Woollen Manufactures are of all *Peru*. Gold, Silver, Silk, and Cotton Stuffs; theſe made in the Country, and the others coming from *Spain* by the Galleons, Flour, Wheat, Maiz, or *Indian* Wheat, Acicoca, an Herb ſerving inſtead of Paraguay, *Ariquipa* Wines, the beſt of *Peru*, where the King of *Spain* permits the planting Vineyards, Oil, Olives, Butter, Cheeſe, Sugar, Salt, Quickſilver, Sweetmeats, Syrups, and all Sorts of Hard-Ware, and Iron Utenſils for the Service of the Houſe and Mines; all which are paid for in the latter's Argentine Produce; as the City of *Potoſi*, called alſo an imperial City, being ſeated in a Country ſo barren and unfruitful, would furniſh nothing to Trade, if its Mountains did not cover thoſe inexhauſtible Silver Mines they do.

It is alſo owing to the Richneſs of its Mines that this City is the fineſt, moſt populous, and abundant in all Things, of any one in *Peru*; its Inhabitants amounting to more than ſixty thouſand, among which are at leaſt ten thouſand *Spaniards*. And its Markets, Warehouſes, and Shops, are ever full of all Sorts of Fruits, Sweetmeats, Wines, Stuffs, Jewels, *European* and *Indian* Curioſities, with an Infinitude of other Merchandizes and Wares, to gratify both the Taſte and Sight, ſubſerving as well to Pleaſure and Uſe as Ornament; although, as has been ſaid, none of theſe Things grow, or are the natural Products of the Country.

Lima, called alſo by the *Spaniards Ciudad de los Reyes*, is the Capital of *Peru*, and ſeated two Leagues from the South Sea, being a Place of the greateſt Trade in all this Part of *America*. The Riches of *Peru* and *Chili* are brought here from the Ports of *La Conceptione* and *Arica*, where they are collected; and the greateſt Part of the Goods that arrive from *Europe* at *Porto-Bello*, and *La Vera Cruz*, are alſo brought here from the one by the Ships of *Panama*, and from the other by thoſe of *Acapulco*. The Inland Commerce of this City is not leſs than its foreign one; and if it maintains this latter with all the Places on the South Sea Coaſts, from *Chili* to *New Spain*, its home Traffick is equally extenſive, as it does not only ſpread to all the Provinces that compoſe the Empire of *Peru*, but to all the other Kingdoms of Southern *America*, even to *Buenos Ayres* and *Carthagena* on the North Sea.

The Trade of *Lima* is carried on, partly by *Spaniards*, and partly by *Indians*, theſe latter having more Liberty here than in any other Place of the King of

Spain's Dominions, on Payment only of a ſmall Tribute twice a Year. It is theſe that do all the ſervile Work, and are the ſole Mechanicks and Huſbandmen, the *Spaniards* thinking it beneath them to ſtoop to ſuch Offices, and only engaging in the more valuable Branches of Trade, ſuch as Gold and Silver, Silks, *European* Cloth, *&c.* with which, and indeed with every other Conveniency of Life, this City is ſo well ſupplied, as would induce a Belief, that this Plenty could only be the Product of the Country. The Gold comes here from *Chili*, *New Caſtile*, *Cuſco*, and ſome other Provinces of *Peru*; the Silver from the Mines of *Potoſi*, and thoſe of *Oruco*, *Tarapaca*, and *Chocolocora*; and the Quickſilver from *Europe* and *Juancabeluca*, forty Leagues from *Lima*. They get the Country Stuffs from *Quito*, and from the Mountain Towns, which are in the Neighbourhood of their Capital. The Wines are brought them from *Arequipa*, *Yca*, *Ciſca*, and *Naſca*; as the Cattle are from *Xaxra*, *Cuſco*, *Caneto*, and *Guemangua*. The Sugars, Sweetmeats, Syrups, and Preſerves, are made at *Jamanga*, and *Gnara*. The Wheat, Flour, and Maize, come from this ſame Place, *Varancas*, and the Villages near to *Lima*; Dry Fiſh from *Pieta*; Carpenter's Wood from *Guyaquil*, though cut on the Side of *Gallo*, near to it; and Salt from the Ponds of *Gnara*, &c. Oil and Olives from almoſt all the Ports of the Coaſts between *Arica* and *Lima*.

Pearls are brought from the Pearl Iſlands in the South Sea, and Part from *Panama*, of the Fiſhery of *Rancherie*, alſo formerly of *Margarita*, in the North Sea; and precious Stones are found in many Rocks, Mines, and Rivers of *Peru*.

All the Gold and Silver Mines are ſo rich and abundant, that, as it is aſſerted, the King of *Spain* has in leſs than fifty Years received for his one-fifth, of only thoſe of *Potoſi*, one hundred and eleven Millions of Dollars.

Calao, as before-mentioned, the Port to *Lima*, is two Leagues from the City, ſpacious and very ſecure, without Rocks or Shallows. It has two Channels, the one for large Ships, on doubling the Iſle of *Lobos* that covers it; and the other for Barks, or ſmall Veſſels, by a Strait between the Continent and the Iſland. The City lies along the Bank, and all its Inhabitants, above two thouſand, are either *Lima* Factors, Carriers, Sailors, or Inn-keepers, as its Buildings are Warehouſes for the Reception and Depoſit of the Goods that arrive from *Acapulco*, *Panama*, *Arica*, and the *Conceptione*, or Inns to accommodate the Merchants who arrive from all Parts, when the Fleets come here to lade or diſcharge. Two Fleets, both called the ſame, Plate Fleets, are annually fitted out in this Port, the one for *Arica*, and the other afterwards for *Panama*. The firſt ſails towards the End of *Febuary*, and after having laden the Silver of the *Potoſian* Mines, returns to *Lima* in about a Month, or by the Beginning of *April*, near the ſame Time that the Veſſels from *Valparaiſo* bring here the Revenues of *Chili*. As ſoon as this Fleet is returned, and the *Chili* Veſſels are arrived, they unlade the Goods, to wait a proper Seaſon for the Voyage to *Panama*; the leaſt valuable are put in Warehouſes, and the Gold and Silver, with what elſe is precious, ſent to *Lima* in Carts, or on Beaſts of Burthen, with which the Road from *Calao* to that City, is nearly full during the whole Year, more eſpecially in the three or four Months of the Fleet's Arrival and Departure. Alſo in the Months of *March* and *April* there arrive at *Lima* by Land, Gold, Silver, and the Merchandize of all the Provinces of *Peru*, that are deſtined for *Porto Bello*, and which muſt be ready for the Sailing of the *Panama* Fleet.

The Departure of this ſecond Fleet is always at the Beginning of *May*; and it is commonly two-thirds bigger or ſtronger, both in Merchant Ships and Men of War, than the other; becauſe, beſides the Riches of *Potoſi*, which the Fleet of *Arica* only brought, that for *Panama* carries alſo all the Revenues of the King and Particulars' Effects from *Chili*, *Peru*, and a great many of the other Kingdoms of *South America*. And it is by Return of this Fleet, that all the Goods deſtined for *Peru* and *Chili* are brought; and from thence ſent either by Sea or Land to the Places they are conſigned to.

Beſides the Fleets before-mentioned, there is yearly equipped at *Calao* a Twenty-Gun Ship for *Acapulco*, a famous Port in *New Spain*, by which the *Spaniards* of *Mexico* maintain a great Trade with the *Philippines*, and receive a large Quantit of

of Goods from *India* and *China*. This Veſſel arrives at *Acapulco* a little before *Chriſtmas*, and carries there Cacao, Dollars, and Quickſilver; in Return of which ſhe brings back Spice, Silks, Chints, Callicoes, and a few other *Indian* Commodities; though this Trade is prohibited to all others but to thoſe concerned in the ſaid Ship; the Court of *Spain* having interdicted it to all the Reſt of *Peru*, under very ſevere Penalties, for Fear of hurting that which *South America* carries on with *Spain* by Way of *Panama* and *Porto-Bello*.

This was the Situation of *Calao* before the Earthquake, which with an Inundation of the Sea, that happened at the ſame Time, deſtroyed every Perſon in the Town, except one Man, who crept up the Flag-Staff, and dropped from thence into a Canoe, which floated under it. As this happened before the Peace of *Aix-la-Chapelle*, it is not doubted but the Damage is repaired in ſome Meaſure, but it is ſo difficult to get Accounts from that Country, that nothing can be ſaid with Certainty.

The chief Places with which the *Spaniards* maintain a regular Commerce on this vaſt Extent of Coaſt, are *Leon*, *Guayaquil*, *Truxillo*, *Leſparſo*, *Lavillia*, *Nicoya*, *Chiriquita*, *Paita*, *Sagna*, *Naſca*, *Piſca*, and *Pachacama*, of which the firſt produces Sugar, Cattle, Hides, Pitch, Reſin, and excellent Cordage, beſides Plenty of Timber for Ships, whereof more are built here than at any Place in the South Seas, except that I am juſt going to mention.

Guayaquil, in the Province of *Quito*, whoſe Products are Gold, precious Stones, Cacao, Green Hides, Tallow, Sarſaparilla, Woollen Stuffs of the Country Make, Saltpetre, Brimſtone, and Wood, worked up in the Ship-Yards of this Place; it alſo produces Cacao in ſuch Plenty, that there is hardly a Year in which thirty thouſand Bales, of eighty-one Pounds each, are not ſhipped off, and ſometimes the Quantity is doubled. The Goods imported here from *Lima* are Wine, Oil, Spice, and other *European* Commodities.

Truxillo is ſix Leagues from the South Sea, having a Port called *Guanchaco*, the moſt difficult to enter, and the moſt unſafe of any on the Coaſt. Its chief Trade conſiſts in Wheat, Flour, Wine, Sugar, Sweetmeats, eſpecially Quince Marmalade in Caſks, Cattle, Horſes, Mules, *&c.*

Leſparſo is ſituated in the Bay of *Caldaria*, two Leagues from the Sea; it is the Port to *Carthage*, a City of *South America*, in the Province of *Quimbaia*, twenty-four Leagues diſtant from it, and formerly had a good Trade, but it is now reduced to ſome Sugar, Hides, and Proviſions, for *Lima*.

Panama; of all the Cities I have hitherto treated that trade with *Lima*, none have ſupplied it with other Commodities than thoſe of their own Growth and Manufactures except *Acapulco*; but a quite different Commerce is tranſacted from *Panama*. Before this City was taken, pillaged, and burnt, in 1673, by Sir *Henry Morgan*, it was ſeated on the Shore of the South Sea, at nine Degrees of North Latitude; but the new one is built at four Leagues diſtance from the Ruins; more magnificent, better fortified, and with a greater Number of Inhabitants. It gives Name to a large Bay in which it is built, and to the Iſthmus, that, ſeparating the two Seas, joins the Meridional to the Septentrional *America*, and is equally famous for its Land Trade with *Porto-Bello*, on the North Sea, and its maritime Negociations with *Lima* on the South Sea, collecting in its Warehouſes all the Goods that the Galleons bring from *Europe*, as well as all the Riches of *Chili* and *Peru*, which come by the Plate Fleet; and although it at all Times carries on a very conſiderable Commerce, and has its Road always filled with a great Number of Veſſels; it is, nevertheleſs, on the Plate Fleet's Arrival, and with the Goods by the Galleons, that the greateſt Concourſe of Merchants meet here, and the Trade is moſt flouriſhing, being then that the Fair is held, which attracts both the Nobility and Commonalty of the Neighbourhood to aſſemble and increaſe the Throng.

As ſoon as the Galleons touch at *Carthagena*, where they remain ſome Time before they proceed to *Porto-Bello*, a Courier is diſpatched to *Lima*, and on the Receipt of this Advice, the Viceroy orders the Plate-Fleet afore-mentioned to be laden and diſpatched, under Convoy of four or five Men of War; whilſt the Preſident of *Panama*, on his Part, directs the providing Mules for the Carriage of

a Part

a Part of the Treaſure by Land, and Barks for the Conveyance of the Remainder by the River *Chagre* to *Porto-Bello*, that no Time may be loſt, as the Galleons only remain there about a Month, during which Time every Negociation muſt be tranſacted. It is computed that the King's Effects laden on the Galleons, commonly amount to three Millions of Pieces of Eight in a common Year; and that the Merchants' regiſtered Effects are three or four Times as much, *extra* of what is ſhipped clandeſtinely. All the Galleons muſt be ready to ſail the thirtieth Day after Arrival, otherwiſe they run a Riſque of being left behind; however, the Admiral commonly grants an Addition of eight Days, which is of great Relief to the Merchants, and nothing diſadvantageous to himſelf, as this Benefit is always procured by the Intervention of a conſiderable Preſent. The Goods proper for this Voyage have been already deſcribed in the Article of the *Spaniſh* Trade, ſo I ſhall only add here, that all Iron Inſtruments, ſuch as Hoes, Axes, Hatchets, Anvils, &c. Spice, Wine, Oil, Laces, and Gold and Silver Stuffs, are likewiſe proper Objects of this Trade.

The maritime Towns, where, next to *Lima*, the Merchants of *Panama* carry on their Trade, are *Lavillia*, which furniſhes it with Hogs, Poultry, ſalt Beef, and Sirops; *Paita*, or rather *Piura*, to which the other is the Port, whence are exported Wine, Oil, Flour, Sugar, Soap, and Goat Skins, made into Cordoans; *Realegio*, yielding Brandy, Sugar, Oil, Flour, and Wine; *Galio*, *Tomago*, and *Chiloe*, three Iſlands producing yearly a large Quantity of Timber and Boards; *Piſca*, fruitful in excellent Vineyards; *Truxillo*, abundant in Wheat, Flour, and Sugar; *Oicoya*, where are Plenty of Shipwrights and Yards, as alſo a Quantity of Cattle, Hides, Wheat, and Red Wood, or Nicaragua. There are alſo ſome *Panama* Barks, which go yearly to fiſh for Pearls at the Iſle of *Gorgona*; this being the only Place where they are found in the South Sea; thoſe called the Pearl Iſlands, within twelve Leagues of *Panama*, now producing none.

Tecoantepeque, *La Trinidad*, *Vatulco*, and *Realejo*, are Places alſo on this Coaſt between *Panama* and *Acapulco*, which ſerve for Ports, where all the Traffick of *Guatimala*, *Leon*, *Quaxaca*, *Necaragua*, and ſome other Provinces of *New Spain* is tranſacted, which conſiſts in Cacao, Vanillas, Achiolt or Rocou a Dying Herb, Indigo, Cochineal, Hides, Wheat, Maiz, Wool, Sugar, Cotton, Salt, Honey, Caſſia, Wax, and in ſome other of the Products of *Mexico*.

Acapulco is next to the Port of *Tecoantepeque*, and ſeated ſeventeen Degrees North of the Line. It is the Weſtern Port to the City of *Mexico*, as *Vera Cruz* is the Northern; and the principal Places of its Trade are *Peru*, the *Philippines*, and the Coaſts neareſt to *Mexico*; the Commerce of which latter is entirely negociated through the laſt four mentioned Places, and ſome other ſmall Harbours, where the Merchants of *Acapulco* ſend their Goods on light Veſſels, to extract Proviſions and Refreſhments, although they receive large Parcels by Land on Mules, particularly Flour, Chocolate, ſmall Cheeſe, Salt Meat, and all Sorts of ſuch Proviſions, for which they have daily a Market; and the Cattle they want comes the ſame Way. I have alſo treated of the Trade between *Acapulco* and *Peru*; and though that between the Northern and Southern *America* is open and free, yet the Inhabitants of this City make but little Uſe of it, their Commerce being only extended to the Places on the Coaſt, ſo that what is tranſacted between this and the *Manillas*, is what gives it Reputation, and which is carried on, in only two Ships of eight hundred or a thouſand Ton each; whereof one is always in lading at the *Philippines*, and ſails on its Return, as ſoon as its Twin Veſſel arrives, a Convoy being aſſigned them, of a twenty-eight Gun Ship, and they mounting forty each. Their Cargo from *Acapulco* conſiſts partly of *European* Merchandize, brought to *Mexico* from *La Vera Cruz*, and partly of the Products of *New Spain*, both ſent to the South Sea on Mules. The Relading back is compoſed of whatſoever *Aſia* produces, that is either rich or valuable, even Pearls, precious Stones, and Gold Duſt, with which theſe Ships are ſo fully ſtowed, as to render their between deck Guns unſerviceable in Caſe of an Attack.

Of the Trade of FRENCH AMERICA.

I SHALL begin with the Iſles which the *French* poſſeſs in this Part of the World; and firſt with the *Antilles* or *Carribee* Iſlands, of which this Nation are Maſters of ſeven out of the twenty-eight; ſhared that of *St. Chriſtoper's* with the *Engliſh*, till the Treaty of *Utrecht*, in 1713 gave it wholly to the latter; but during the preſent War they have recovered it.

Martinico is the chief of them, the others are *Grenada*, *Dominica*, *Tobago*, *St. Vincent's*, *Guadaloupe*, and *St. Croix*. Above two hundred Ships are employed in the Trade of theſe Iſlands, and it is not uncommon to ſee eighty Merchantmen lading at *Martinico* together. Tobacco was formerly the Staple Commodity here, but the Cultivation of that Plant has been long neglected for Sugar, more eſpecially at *Martinico*, which alone is ſuppoſed now to yield in a common Year, between five and ſix Millions of Pounds Weight; *Grenada* and *St. Croix*, four or five hundred thouſand between both: *St. Lucia*, taken by the *Engliſh* in the preſent War, grows only Tobacco, with ſome Pulſe and Greens: Though, beſides theſe Commodities, the Iſlands produce among them Indigo, Cocoa, Rocou, Cotton, Ginger, Caſſia, Guinea Pepper, ſome Medicinal Gums, Hides, Tortoiſeſhell, Dying Woods, *&c.* The Commodities ſent there from *France*, are very Neceſſary for Proviſions and Clothing, Houſehold Furniture, and Tools for various Uſes, eſpecially for Agriculture.

St. Domingo, divided as I formerly mentioned between the *Spaniards* and *French*, carries on a very conſiderable Trade, of which the chief Places aſſigned the latter are *La Grande Ance*, *Leogane*, *La Grande Terra*, *Port de Paz*, *Port Margot*, *Lancon Louiſa*, *Trou Charles Morin*, *Lemodada*, *Cape François*, and the *Little Goave*. Beſides this Diſtribution of *St. Domingo*, the *French* poſſeſs the ſmalleſt Iſle of *Tortuga*, about three-fourths of a League from the other, and the Products of both are Tobacco, Sugar, Indigo, Ginger, Rocou, Cotton, Cocoa, Hides, Braziletto, yellow Sanders, Fuſtick, Cedar, Grenadillo, and ſome other Woods for the Dyers' or Cabinet Makers' Uſe. The Ships' Cargoes proper for theſe Iſles are much the ſame as thoſe for the *Antilles*, excepting the Salt Meat, which is not here wanted, *St. Domingo* having it in ſo great Plenty, as even to ſupply the other Iſles with large Quantities: Here are about four thouſand Families eſtabliſhed in the whole Settlement, which more than double thoſe of the *Spaniards*, though theſe latter are near a Century more ancient here than the others.

On the Continent of *North America* the *French* poſſeſſed *Louiſiana*, called alſo *Miſſiſſippi*; and in the Southern *America*, *Cayenne*, and ſome other Habitations on the River *Surinam*. They have been ſometimes alſo Maſters of *Nova Scotia*, as formerly hinted, and they were once ſo of *Newfoundland*; but theſe having been ceded to the *Engliſh* by Treaties, I ſhall only remark here, that with Reſpect to the latter, the *French* are, in Conſequence of the thirteenth Article of that of *Utrecht* in 1713, permitted during the Fiſhing Seaſon to build themſelves Stages and Huts, and whatever elſe is neceſſary for Curing and Drying their Fiſh, though this Privilege only to extend from Cape *Bona Viſta* to the Northern Extremity of the Iſle, and from thence Weſterly to Cape *Riche*; but they are to build no Houſes, much leſs Fortifications, nay, are not ſo much as to anchor here, only in the aforeſaid Seaſon.

Louiſiana, or *Miſſiſſippi*, is a vaſt Extent of Country of more than one hundred and eighty Leagues, lying in *North America*, between *Canada*, *Carolina*, *Mexico*, and the Ocean. It is in theſe newly diſcovered Lands that the famous Colony is eſtabliſhed, which after the Year 1717 engroſſed the Attention of all *Europe*, and ſet the major Part of it a madding after their Example, to the Ruin of many thouſand Families; however, I ſhall here conſider it in its preſent Situation, and give an Account of the real Trade that is here ſubſiſting; regardleſs of the chimerical and ideal Advantages ſome of its moſt ſanguine Adventurers at firſt propoſed from it. The chief Settlement of this Colony, or more properly ſpeaking the Capital of all the Country, and Centre of its Commerce, is the City to which the Name *New Orleans* was given, to preſerve the Memorial of the Re-

gency of that Prince, under whoſe Protection and Auſpices it was founded. Its Situation is on the Side of a River, near enough the Sea to have the Conveniency and Facility of lading and unlading the Ships that import, and at a ſufficient Diſtance to avoid its bad Air and Neighbourhood, when irritated. The Trade carried on here is much the ſame as at *Canada*; and ſome *Indians* have aſſured the *French*, that high up in the Country are found Mines of Gold, Silver, Copper, Iron, and Steel. Theſe Mines are, however, undiſcovered, but the true Riches of the Country conſiſt in that great Quantity of Cattle with which the Plains and Foreſts of *Louiſiana* are filled, *viz.* Horſes, Aſſes, Bulls, Cows, Sheep, Goats, and Hogs, of which the *Indians* make a great Slaughter in their Excurſions, and bring both Fleſh and Skins to the Colony, and there Exchange them for Trifles. The ſupplies from *France*, proper for this Colony, are the ſame as has been directed for the Iſlands; with the Exception, that to what the Country produces towards the Support of its Inhabitants, muſt be added, ſome Flour, Corn, Rice, Pulſe, and all that can contribute to ſuſtain ſo numerous a Colony; and the Merchandizes fit for the Trade with the *Indians*, are coarſe Woollen Blankets, ſerving for Clothes, *Limbourg* Cloths, white and red, and Cloaks ready made of them; ordinary Hats, Knives, Hatchets, and Pick-Axes, ſmall Mirrors, Glaſs Beads, and Virmillion.

The Ports, Poſts, and Eſtabliſhments, which the *French* at preſent occupy are ſixteen, *viz.* the Iſle *Aux Vaiſſeaux*, *Biloxi*, or Fort *Louis*, *New Orleans*, *Manchac*, *Matches*, *Natchitoches*, *Yaſous*, *Illinois*, *Oubache*, *Iſle Dauphine*, *Fort de Conde*, *Alibamons*, the Bay of *St. Bernard*, the River *Aux Cannes*, *Padoucas*, and *Miſſoures*. This Country produces Rice, Indigo, Cotton, Tar, Pitch, but moſtly Tobacco.

By the VIIth Article of the Treaty of Peace 1763, all that Part of *Louiſiana* lying on the Eaſt Side of the River *Miſſiſſippi*, with the free Navigation of that River, was reſigned to the *Britiſh* Crown. And, in 1769, the *French* ceded *Louiſiana* to the Crown of *Spain*.

Cayenne is the only Settlement the *French* have in *South America*, except ſome Habitations that they poſſeſs on the Coaſt of *Surinam*, and the River of *Amazons*, which form a Sort of Government of more than a hundred Leagues.

The Iſle of *Cayenne* that gives Name to this Government, and takes it from a River whoſe two Branches ſeparate it from *Terra Firma*, lies in the Latitude of four Deg. forty Min. a hundred Leagues from the great River of the *Amazones*; It is ſeventeen Leagues in Circuit, of which five are bathed by the Sea, and the Reſt by the two Branches of the River aforeſaid: And has been ſucceſſively poſſeſſed by the *Engliſh*, *French*, and *Dutch*, though the *French* have finally remained Maſters of it ever ſince 1677. Its chief Products are Sugar, Rocou, Indigo, Cotton, and Vannillas; and the Commodities ſent here from *France*, are principally Flour, Wine, Brandy, Linens, Stuffs, Quickſilver, Hard-Ware, and above all Salt Meat; the Inhabitants, excluſive of the Soldiers and Slaves, are about twelve or fifteen hundred Men, ſpread in the different Habitations above-mentioned, of which the Chief, compoſing a ſmall Town of two hundred Houſes, with three hundred and fifty Whites, is below *Fort Louis*, where the Warehouſes are kept.

Commerce of the PORTUGUESE *in* AMERICA.

THIS Nation's Poſſeſſions in *America* have been many Years ſince reduced to the *Brazils* only, though this is a Part of the New World ſo vaſtly extenſive, fertile, and rich, that they have no Room to complain of their preſent Share. This Country reaches from the *Amazon* River to that of *Plate*, and has its Coaſts curved into a Semi-Circle of about twelve hundred Leagues Extent, though the *Portugueſe* do not occupy the Whole, having no Habitations beyond *Rio Janeiro*, which is two hundred Leagues from the River of *Plate*, its Southern Boundary. The inland Country is yet unknown, as the *Portugueſe* have never penetrated it above eighty Leagues, by Reaſon thoſe vaſt Regions which ſeparate it from *Peru* are inhabited by innumerable Nations of *Indians*, who, loving Liberty, diſpute the Acquiſition of their Lands, Inch by Inch, as they regard foreign Settlements only as Uſurpations. The *Portugueſe* have divided their Eſtabliſhments into fourteen Captainſhips, or Commanderies, *viz. Tamaraca*, *Bahia de todos los Santas*, *Pernambuco*, *Paras*, *Maraghan*, *Ciara*, *Rio Grande*, *Paraiba*, *Ceregippe*, *Los Iſleos*, *Porto*

Porto Segure, *Spirito Sancto*, *Rio Janeiro*, and *St. Vincent*; of whoſe Commerce I ſhould now treat; but having already done it in the Section on the Trade of *Portugal*, any further mention here would be ſuperfluous.

I might here alſo very properly add, an Account of the Trade which ſome other Northern Powers carry on in *America*; but having as yet given no Deſcription of their *European* Commerce, I ſhall join them both together, by reciting the general Traffick of each particular Potentate, and begin firſt with the *Dutch*.

Of the Trade of HOLLAND.

NOTHING gives a greater or more magnificent idea of this Commerce, than the flouriſhing Condition it has always ſupported the States in, notwithſtanding the many long and expenſive Wars it has for a Century paſt been ſo frequently engaged in. Three Things more eſpecially ſupport this immenſe Traffick; the one is the great Credit of the Bank of *Amſterdam*, whoſe Treaſure is ſuppoſed by ſome to be three thouſand Tons of Gold, of an hundred thouſand Guilders each; the ſecond Thing ſo advantageous to the Trade of *Holland*, is the incredible Number of Ships, continually going out and coming in; and the third, is the Safety with which its Trade is carried on, by the Government's Protection in Time of War, or when any Cruizers or Pirates make it neceſſary. And though this Commerce is ſo extenſive, it is kept up by a People, whoſe Country contributes hardly any Products towards it; as the *Dutch* have nothing more of their own than ſome Butter, Cheeſe, Earthen-Ware, and ſome few other Trifles that they can ſpare; very little Wheat growing in *Holland*, and no Wine at all; the few Sheep here, have a Wool coarſe and harſh; the Land produces very little Flax or Hemp; one of its beſt Qualities being its Propriety, in ſeveral Parts, for Fuel, ſo that the Inhabitants, for Want of other, are reduced to the Neceſſity of burning the Earth that bears them; but its fat Paſtures nouriſh great Herds of Cattle, producing the prodigious Quantity of Milk, that ſuffices for the daily Want of a People peculiarly fond of a lacteal Diet, and for making Abundance of Butter and Cheeſe, of which they eat more than any Nation in the World. Their Manufactures are many, and very conſiderable, though almoſt all the Materials for them are brought from other Countries. I have already mentioned the Particulars of their Trade with us, with *France*, *Spain*, *Portugal*, and *Italy*, and blended it with that of the other *Europeans* on the Coaſt of *Barbary*, *Africk*, and *Aſia*: I ſhall therefore only add here, the State of it with their Septentrional Neighbours. The Trade carried on neareſt Home, and the moſt convenient for the Safety of the concerned, is that which they maintain with a Part of *Germany*, by Means of the Rivers running through the Country, or on the Borders of it; ſuch as the *Rhine* and *Maeſe*, which bathe their States; the *Weſer*, *Ems*, and *Elbe*, not very diſtant from the *German* Ocean. The Traffick of the *Rhine*, and with it that of the *Moſelle* and *Maine*, is very conſiderable. *Cologn* is properly the Centre of the Commerce carried on here, where the Merchandize of *Lorraine*, and the Archbiſhoprick of *Treves* are collected; ſuch as Wood, Iron Bars, Cannons, and Bullets of the ſame Metal. It is likewiſe by the *Rhine* that the Products of *Mentz* and *Franconia*, waſhed by the River *Maine*, are conveyed to, and ſold in the celebrated Fairs held twice a Year at *Francfort* or *Nuremberg*: The *Rhine* alſo ſerves the *Dutch* in bringing them the Flax, Threads, and Linens from the Duchies of *Juliers* and *Berges*.

The *Maeſe* facilitates the Trade of *Holland* with *Leige* on that River, as it does that of *Aix-la-Chapelle*, not very diſtant; and of which almoſt all the Trade is tranſacted in the firſt of theſe two Cities. The Extracts from *Leige* are Serges, Slates, Coal, Lead, Iron, Bullets, and Braziery made at *Aix-la-Chapelle*, &c. The *Weſer*, which has its Source in the Mountains of *Turing*, waters one Part of the *Lower Germany*, and after having paſſed through the Country of *Heſſe* and *Brunſwick*, falls into the *Germanick* Ocean. *Bremen*, ſeated fifteen Leagues from its Mouth in the Peninſula that it forms with the *Ems*, is the Depoſit of all the Merchandize of thoſe Parts; and it is in this City that the *Dutch* buy up the Carpentry Wood, Cheeſe, Wools, ſeveral Metals, and Beer, that are brought here

from *Lower Saxony*, *Heſſe*, *Brunſwick*, &c. *Embden*, Capital of *Eaſt Frieſland*, at the Mouth of the *Ems*, is the Staple of all the Commerce of that Part of *Germany* which traverſes this River. The City is governed by its Magiſtrates; and the *Dutch* their Allies, or one may ſay their Maſters, by the great Credit they have there, draw hence all the Merchandiſe of *Weſtphalia*, and eſpecially of the Biſhopricks of *Paderborn* and *Munſter*, which conſiſts principally in Timber, Cloths, Wools, and Linens; it is alſo from thence that thoſe Hams come, ſo generally eſteemed in *Europe*; *Eaſt Frieſland* alſo furniſhes *Holland* with Cattle and Horns. In fine, the Trade of the *Elbe* is one of the moſt conſiderable that the *Dutch* tranſact in the *Germanick* Sea. This famous River has its Source in *Bohemia*, towards the Frontiers of *Sileſia*; from thence traverſing many rich Provinces, and amongſt them the States of *Saxe*, *Brandenburgh*, and *Brunſwick*, paſſes to *Hamburgh*, the City which for its Trade has merited the Appellation of the *Amſterdam* of the North, from whence in about twenty Leagues it falls into the Sea, ſwelled by all the Rivers of *Bohemia*, *Saxe*, &c. that it has received during ſo long a Courſe.

The *Dutch* commonly tranſact their Buſineſs of *Lower Germany* at *Hamburgh*, though they often go up to *Harburgh* and *Magdeburgh* for Wine and Wood, buying in thoſe Parts even entire Foreſts which they ſell, and fill large Magazines with this Commodity, to be in Readineſs when they want, or think proper to vend or utter it. The Goods that the *Dutch* carry to *Germany* by the five Rivers aforeſaid, are Silk and Woollen Manufactures, Mercery, Spice, Drugs, Dying-Woods, Sugar, Cheeſe, Herrings, Copper, and Ribbons.

Anvers, *Bruſſels*, and *Malines*, furniſh the *Dutch* with Thread and thoſe Laces, bearing this latter's Name; *Ghent* and *Bruges* with Linen, Hemp, and Baſons; *Bruſſels* and *Oudernade* with Tapeſtry; and *Liſle*, Capital of *French Flanders*, with Cambricks, Laces, and Baracans; the Returns are made in Woollen and Silk Stuffs, Drugs, Spices, *&c.*

The Traffick of the *North* and *Baltick* is one of the moſt important that the *Dutch* carry on; in other Branches of Trade, it ſeems as if they only worked for the other Parts of *Europe*; but in this almoſt all regards themſelves; and it is from thence that they fetch the Grain which ſupports them, and the Things neceſſary to their Navigation; without which neither the State, nor Particulars, could ſubſiſt.

Although *Sweden*, *Denmark*, and ſome other States, ſeated on the *Baltick* Sea, are comprehended under the general Word North, yet *Norway*, *Archangel*, and ſome of the moſt Septentrional Provinces of *Ruſſia* and *Denmark*, merit more particularly this Title; and it is with theſe that I ſhall commence the general Northern Trade.

Before the Year 1553, the Trade of *Muſcovy* was carried on by the Way of *Narva* and *Revel*, Cities of *Livonia*, at the Bottom of the *Baltick* Sea; but the Port of *Archangel* having been diſcovered by the *Engliſh*, all the Trade of this vaſt Empire was transferred thither, being much more convenient than any of the others, eſpecially on Account of the Paſſage of the *Sound*, which took away, or at leaſt reſtrained, the Freedom of the Trade of thoſe two Places; and there now ſail annually from the Ports of *Holland*, particularly from *Amſterdam*, near forty Ships for *Archangel*, from two to four hundred Tons, always divided in two Squadrons; the one only of five or ſix Sail, which departs in *June*, and returns in *September*; and the others of thirty or thirty-two Ships, whoſe ſailing is fixed in *July*, and its coming back in the End of *October*. Theſe two Squadrons have always a Convoy, even in the midſt of the profoundeſt Peace; and carry with them Silk and Woollen Stuffs, Linens, Caſtors, from *Canada*, Paper, Mercery, Hard Ware; Cannons, and other Arms, Powder, Brimſtone, Copper, Lead, Pewter, Brandy, Wine, Oil, Vinegar, Sweetmeats, dried Fruit, Saffron, Sugar, Spice, Pepper, Herrings, Incenſe, Copperas, White Lead, Indigo; Woods for dying the *Ruſſia* Hides; Laces, Gold, and Silver Wire, and of this latter Metal in Specie.

The Trade to *Norway* employs yearly upwards of three hundred *Dutch* Veſſels from four to five hundred Tons, the greateſt Part from the Villages of *Frieſe*, or thoſe in the Neighbourhood of *Amſterdam*. *Berghen*, the moſt conſiderable Port in

in the Kingdom of *Norway*, is where the *Dutch* drive their principal Trade, though they carry on ſome with *Drontheim*, *Copperwich*, and a few other Places, in Spice, Salt, *Spaniſh* Wine, Vinegar, Brandy, Cheeſe, rolled Tobacco, and ſome Clothes. And as Timber for Ship-building is what the *Flemings* moſtly bring back, they have made ſeveral Treaties from Time to Time with the King of *Denmark* concerning Wood, *&c.*

The Commodities which the *Dutch* lade in the *Baltick* being bulky, oblige them to employ a large Number of Ships, a thouſand to twelve hundred, yearly, in this Trade, which they ſend leſs than half laden, though they always return with an entire Cargo; and as the Balance of Trade is in their Diſfavour, by the Produce of their Goods ſent being inſufficient to pay for the Reladeings, they are always obliged to accompany theſe Voyages with a Parcel of Rixdollars, to make the Deficiency good. The Commodities proper for *Sweden* and *Denmark*, are Spice, Drugs, *Portugal* and *Spaniſh* Salt, thoſe from *France* not being in ſo much Eſteem here, Sugar, Wine, Brandy, Linen, with Silk and Woollen Stuffs. For *Pomerania*, Cloth, Wine, Cheeſe, Salt, Tobacco, Spice, Iron, Lead, Pewter, and old Rixdollars. For *Dantzick*, a Quantity of Silks of all Sorts and Faſhions; a great many Clothes; Dying Woods, ſcraped or ground; Madder, large Parcels of Spice, Drugs; *Italian* Cremor Tartari, Sugar, Oil, Paper; divers Sorts of Wine, Brandy, and *French* Salt, fit only for *Pruſſia*. In fine, they ſend to *Riga*, *Revel*, *Narva*, and *Pernau*, Cities of *Livonia*, Salt, Spice, Sugar, Tobacco, *French* Glaſs, and above all, a Quantity of old Rixdollars, with which they pay for Goods not only of this Province belonging to *Sweden*, but alſo thoſe that are tranſported here, from *Muſcovy*, *Poland*, and *Lithuania*.

Their Whale Fiſhery, is very advantageous, occaſioning a yearly Employ of near two hundred and fifty Ships, with between four and five thouſand Men, but that of the Herrings ſo infinitely exceeds it, as almoſt to ſurpaſs the Degree of Compariſon; above twenty thouſand Men, and three thouſand Buſſes, find an annual Occupation in it; and it is aſſerted, that they take and ſell more than 300,000 Tons, one Year with another, which at two hundred Guilders *per* Ton, as a *Dutch* Author computes them, amount to ſixty Millions, from which muſt be deducted near twenty-three Millions, for the Charges of Outſet, *&c.* and there remains nett Profit 370,000,000 of Guilders, or about 340,000*l.* Sterling.

Although the *Dutch* have no great Settlements in the *Weſt-Indies*, ſince they were obliged to quit the Conqueſts they had made on the *Portugueſe*, they notwithſtanding carry on a very conſiderable Trade here; which is not a little augmented by the contraband Commerce for which their Colony at *Curaçoa* adminiſters them frequent Opportunities. *Surinam*, *Aprowacq*, *Berbice*, and *Boron*, ſeated in *South America*; *Bonnaire*, *Aruba*, and *Curaçoa*, among the *Soto-vento*, or *Leeward Iſlands*, and *Saba* and *St. Euſtatia*, two of the ſmalleſt *Antilles*, are the only Colonies the *Dutch* poſſeſs at preſent in the *Weſt-Indies*.

The four Colonies of *Terra Firma* take their Name from four Rivers of the Province of *Guiana*, along which they are eſtabliſhed. Sugar, which grows here in Abundauce, is the principal Object of their Trade, though they alſo cultivate Indigo, Tobacco, Ginger, and Cotton. The Merchants of *Amſterdam* carry on the greateſt Part of this Trade, and have their Warehouſes here always well filled with all Sorts of Goods that the *Europeans* uſually ſend to *America*.

Of the *Antilles*, where the *Dutch* are eſtabliſhed, neither of them is very conſiderable; *St. Euſtatia* is the biggeſt, and *Saba* the ſmalleſt; theſe two are little better than Rocks, though the few Inhabitants reſiding here have found ſufficient Earth diſtributed to raiſe a Support, and ſome Tobacco for Exportation; this is a Commodity common to them all.

The *Dutch* have ſeveral trading Companies eſtabliſhed in *Holland*, ſuch as the *Eaſt* and *Weſt-Indian*, that of *Surinam*, the *North*, the *Levant*, the *Baltick*, and the *Nova Zembla* and *Greenland* fiſhing Companies, all of conſiderable Advantage both to the State and Particulars.

Though however rich the Trade of theſe are, or whatever elſe is tranſacted by private Merchants with the other three Parts of the World, it is certain, that *that* which their *Eaſt-India* Company has carried on in all the Kingdoms of *Aſia*, for little more than a Century paſt, is of a much greater Conſequence, and infi-

nitely ſurpaſſes it, both in Profit and Reputation. But as I have already given an Account of it, in my Deſcription of *Aſia*, I ſhall here cloſe my Narrative of this Nation's commercial Tranſactions.

Concerning the Trade of the NORTH, *and the* BALTICK SEA.

THERE is comprehended under this Name, not only what is encloſed within the Compaſs of this Sea, but alſo ſome Cities ſeated on the Rivers which fall into the *Germanick* Ocean that are near: And all that are more Northwardly, as *Norway*, *Daniſh*, *Swediſh*, or *Muſcovitiſh Lapland*; *Archangel*, *Boronday*, *Siberia*, *Greenland*, and *Nova-Zembla*.

Hamburgh, an Imperial and Hanſeatick City, is the moſt conſiderable of all of them ſituated on the *German* Ocean. Here is carried on, not only the whole Trade of the *Elbe*; but it is alſo by Means of its Merchants, that the greateſt Parts of the Remiſſes are made, and Bills negociated, with all the Cities of the North; an Advantage that it only ſhares with *Amſterdam*.

This famous Hanſeatick City is more than twenty Leagues from the *Elbe's* Mouth; though Ships go up this River within two or three Leagues of it, and are there obliged to lighten, being barred a nearer Approach by a Bank of Sand, with a whole Cargo. The Goods proper for this Place, are ſome *French* Salt, White Wine, to the Amount of ſix or ſeven thouſand Barrels yearly, and of Brandy about four thouſand, a little Vinegar, Cloths, wrought Silks, Spice, Drugs, Mercery, Prunes, and other dry Fruits, with a large Quantity of Paper. And the Goods exported from thence are, Grain, Wood for Ship-building, Pipe Staves, Lattin, and white Iron Wire made in *Saxony*, and all Sorts of Copper Pots and Kettles. Here are alſo found the many various Species of Goods that the *North* and *Baltick* produce, though not ſo cheap, being at ſecond Hand. It carries on a great Trade with *France* and *Spain* in its own Shipping, though much more in foreign Bottoms, and its Engagements with *Holland*, *&c.* are already ſpoken to. I have alſo deſcribed its Bank, and ſhould now ſay ſomething about its Coin, that has occaſioned ſuch Embroils between this State and the Crown of *Denmark*; but a nice Deduction of the Motives to, and Particulars of theſe Diſputes, would be too prolix for the Space I have left, and a curtailed Account muſt be unſatisfactory; I ſhall therefore excuſe adding any Thing on this Subject.

Bremen on the *Weſer* is in good Repute for its Trade, though much inferior to *Hamburgh*. Large laden Veſſels can only go within four Leagues of the City, and ſmaller ones to the Diſtance of a League and a half. The Imports are much the ſame here as the laſt mentioned Place, except *French* Salt, of which none is conſumed. The Wood extracted from hence is the beſt in the *North*, but it is likewiſe the deareſt; and here is alſo exported Wheat, Wool, ſome Metals, and *Brunſwick* Mum, of which that of *Bremen* is nothing inferior.

Denmark, *Sweden*, *Muſcovy*, *Poland*, *Courland*, and ſome Provinces of *Lower Germany*, environ on all Sides this Part of the Ocean that forms a Sort of great Gulf, named the *Baltick* Sea, which can only be entered by two Paſſages, the one called the *Belt*, difficult and dangerous, and the other the *Sound*, of which the King of *Denmark* is Maſter, by poſſeſſing the Fortreſs of *Kronemburgh*, near *Elſineur*.

This Sea has a large Number of excellent Ports or Cities at but a little Diſtance, where a great Commerce is carried on; the principal of which are *Lubeck*, *Copenhagen*, *Elſineur*, *Stockholm*, *Roſtock*, *Stralſund*, *Stetin*, *Colberg*, *Dantzick*, *Elbing*, *Konigſberg*, *Riga*, *Revel*, *Pernau*, *Narva*, and *Viſbourg*, from which Places and Sea more Goods are in general exported and imported, excepting at *Dantzick*, where the Conſumption is very great; this famous City being as a Magazine of all Neceſſaries to *Poland*.

Lubeck, an imperial City, and at the Head of the *Hans* Towns, ſeated in *Lower Saxony*, on the River *Traves*, which at ten Leagues from thence falls into the *Baltick* Sea, has a better Trade than *Bremen*, but a great deal worſe than *Hamburgh*. Here may ſell yearly two thouſand Laſts of *French* Salt, which the Natives refine, four thouſand Barrels, or a thouſand Ton of Wine, as many hundred Barrels of Brandy, and one hundred and fifty of Vinegar; Paper alſo finds a good Sale here; and

and the *French* beſides Sugar, Mercery, and ſome Silks, the *Engliſh* and *Dutch*, bring their Cloths, dying Drugs, and Pepper, to which theſe latter add Nutmegs, Mace, and Cinnamon. The Goods exported are Hemp, Flax, *Ruſſia* Hides, from *Muſcovy*, Iron wrought and unwrought, particularly Ships' Anchors, Wood, Grain, and Wools. Laden Merchant-Ships can only go to *Travemunde*, a ſmall Village, three Leagues diſtant from the City, where they are obliged to lighten to the Draft of eight Feet Water, in which Condition they may ſwim up quite to *Lubeck*.

Of the Trade of DENMARK.

THE Port of *Copenhagen*, Capital of the Kingdom, is not only the fineſt in the *Baltick*, but one of the moſt convenient and ſafe in all *Europe*; it is alſo here that the chief Trade of *Denmark* is tranſacted, though ſome Buſineſs is likewiſe done at *Elſineur*; but neither at the one nor the other any thing in Compariſon with the Negociations of the Reſt of this Sea. The Goods that ſell beſt in *Denmark*, are *Spaniſh* and *Portugal* Salt, except their Conſumption has been affected by the Mine diſcovered at *Oldefloe* in 1730, *French* Wines and Brandies, Paper, Gold and Silver Stuffs, *Engliſh* and *Dutch* Woollens, Spice, Medicinal Drugs, and Pepper, Tallow, Hemp, Cod, Stockfiſh, Wheat, from the little Iſle of *Zealand*, and Rye from *Zealand*, are almoſt all the Merchandizes ſhipped from hence, the Extraction of Carpenters' Wood being excepted. The *Dutch* alſo tranſport from the Country of *Jutland*, a Quantity of lean horned Cattle yearly, which they fatten in their Paſtures, and reap therefrom a conſiderable Advantage.

After *Copenhagen*, the moſt trading Cities of *Denmark* are, *Uſted*, *Chriſtianſtadt*, *Carlſcroon*, *Salſbourgh*, *Carelſhaven*, and particularly *Elſinore*, or *Elſineur*, from which the Extracts are, ſome ſmall Maſts, Deal Boards, Tar, Tallow, Beeves' and Goat-Skins. The major Part of which Trade, and indeed that tranſacted with all the Places in this Kingdom, except the Capital, is by Way of Barter, or the Intervention of Rix-dollars, brought here by the Dealers for that Purpoſe.

The other Iſles next to *Zeeland*, or *Siæland*, in which *Copenhagen* ſtands, are *Fubnan*, *Laland*, *Langeland*, *Falſter*, *Mune*, *Samſoe*, *Arroe*, *Bornholm*, and *Amack*; of which the firſt is nothing inferior to the principal Iſland, either in Extent or Goodneſs: It abounds in Wheat, Hogs, Lakes, and Wood; though it produces nothing for Exportation but Horſes, the Fruits being all conſumed at Home.

Laland yields Abundance of all Sorts of Corn, eſpecially Wheat, from whence the Metropolis and other Parts of the Kingdom are ſupplied, beſides which the *Dutch* export a good deal yearly.

Falſter, *Langeland*, and *Mune*, are numbered among the fertile Iſlands, and the two firſt yield ſome Grain, for annual Tranſportation. *Arroe* and *Alſen* abound in Aniſeeds, which the Natives ordinarily uſe to ſeaſon their Victuals, and even mix it with their Bread. *Bornholm*, *Samſoe*, and the other Iſles, breed Cattle, and produce a Sufficiency of Corn for the Inhabitants, but that of *Amack* deſerves to be examined apart. This little Iſland is very near to *Copenhagen*, from whence it is ſeparated only by a ſmall Arm of the Sea, which is paſſed by a Drawbridge, and this Spot is the moſt fruitful of any other Territory in *Denmark:* It was many Years ago given to ſome *Hollanders*, tranſported here to manage the Dairy, in making Butter and Cheeſe for the Court; they had great Privileges granted them, of which they enjoy ſome to this Day, but others have been curtailed, and it is to be feared, that by little and little they will come to be placed on the Footing of other Subjects; the Induſtry and Diligence of the Inhabitants of this Iſle have made it, as one may ſay, the Kitchen Garden of *Copenhagen*, and nothing in the whole Kingdom is to be found of the Sort that exceeds what this produces, and has growing here.

Jutland makes the greateſt Part of *Denmark*; it is a fertile Country, abounding more eſpecially in Cattle, but defective in good Ports on the Side of the Ocean; nevertheleſs this does not hinder the *Dutch* from making an annual Extraction of a large Quantity of meagre Cattle, as has been before mentioned. The Horſes and Hogs are excellent, and very numerous, and the Corn ſufficient for the Inhabitants. The Land is moſt fruitful near the Sea Coaſts; and in a Word, is the beſt that the King of *Denmark* has.

The Duchy of *Sleeſwick*, or South *Jutland*, is in general a very good Country; the Conveniency of its Situation between two Seas, the Ocean and the *Baltick*, gives it great Advantages for Trade, although the Conveniences for Tranſportation are not many. It furniſhes its Neighbours with Wheat, Cattle, Horſes, and Fuel Wood, beſides what it retains for the Natives' Uſe.

Holſtein is very abundant and very agreeable; it is perfectly well ſeated for Trade, like the preceding, between two Seas, and has beſides the Advantage to be near the *Elbe* and *Hamburg*, which being a free City, and conſequently rich, is of no ſmall Advantage to the Territories which the King and Duke of *Holſtein* have in its Neighbourhood.

Stormar and *Dithmar*, or *Ditmarſh*, are two Diſtricts neareſt the *Elbe*; this Country is for the moſt Part low and rich, of a fat Soil like many Places in *Holland*, and ſimilar to thoſe alſo in its Fertility and Embelliſhments; theſe Countries likewiſe are benefited by the Neighbourhood of *Hamburg*, and the River they lie near.

The Country of *Oldenburgh* abounds in Cattle, and raiſes a great Number of Coach Horſes, very much ſought after for their Colour, which is yellowiſh, though otherwiſe their Qualities are not extraordinary.

In general, though *Denmark* be of great Extent, it notwithſtanding yields but in ſmall Quantities the Neceſſaries of Life, few Products for the Merchants, and till lately no Manufactures at all; but, to remedy this long continued Neglect, and ſtir up the People to an Imitation of their induſtrious Neighbours, by an Ordinance of the King's, of the 28th *November*, 1727, all Merchants were prohibited to ſend to *Iceland* any other Cloths than thoſe made at *Copenhagen*. There are alſo eſtabliſhed ſome Fabricks of Linens at *Zwelck*, *Blank*, and *Lubſch*, which are ſufficient to ſupply all the Provinces of the Kingdom, inſomuch that the Chamber of Finances and Trade forbid, by the King's Order in *September* 1728, the Entrance of foreign Linens. In a Council held *February* 1725, it was reſolved to raiſe a Tax or Impoſt on all the Cities, both of *Denmark* and *Norway*, and to employ the Produce in eſtabliſhing a Fiſhery in *Greenland*.

The thirteenth of *January* 1727, his Majeſty interdicted the Entry of any foreign Goods into the Kingdom by the Way of *Bremen* and *Lubeck*; and, for a ſtill greater Encouragement to Trade, the King, in *February* 1730, publiſhed an Ordinance to lower the Duties on the Entry of Goods, that the Merchants his Subjects ſhould introduce directly from foreign Countries, which however ſhould not take Place on thoſe brought into the Kingdom by Strangers.

In *Auguſt* the ſame Year, an Edict was proclaimed, by which that Monarch enjoined all his trading Subjects, not to ſend any Ships to *Portugal* or *Spain*, with a leſs Force than eighteen Guns, and a proportionable Crew, to defend themſelves againſt the *Barbary* Corſairs, in Caſe of Need. And, in *January* 1631, *Chriſtian* VI. ſuppreſſed the Farm on the Cuſtoms on Wine, Brandy, Salt, and Tobacco, permitting both the *Danes* and *Norwegians* to trade in them.

Concerning THE SOUND.

THE Paſſage, or Straits called the *Sundt*, or *Sound*, ſo famous in all the Northern Countries, is between the Iſle of *Siæland*, and the *Terra Firma* of *Scania*. On the *Swede's* Side is the City of *Helſinburgh*, with a ruined Caſtle, between which and *Elſinore* all the Ships which trade to the *Baltick* paſs and repaſs, ſo that it may juſtly be ſaid, that, after the Straits of *Gibraltar*, this is the moſt important and frequented one in *Europe*. The Loſs of the Province of *Schonen*, which, with the three adjoining, were given to the *Swedes* by Treaty in 1658, was very conſiderable to the *Danes*, in Regard to this celebrated Paſſage, as they were Maſters of the one, whilſt they continued Poſſeſſors of the other; it is true, that by Treaties, the Right they had is expreſsly reſerved to them, and, in Virtue thereof, they make all Ships pay the Impoſt at paſſing, excepting the *Swedes*, who were excuſed till 1720, when the Treaty of *Stockholm*, ſigned the 14th of *July*, between the Kings of *Denmark* and *Sweden*, re-united and confirmed the Sovereignty of the Toll to the firſt of theſe Crowns for ever; to which the *Swede* Ships have always ſince ſubmitted like thoſe of other Nations,

yet they cannot judge their Right to be as firm and ſecure, as if they were Maſters of both Coaſts, as formerly; for they may have the Title as formerly, but not the Power to ſupport their Claim, in Caſe of any Diſagreement with the *Swede*, which, whilſt they poſſeſſed the other Shore, was uncontrollable. The Cuſtoms have been various, according as Times, and the Intereſts of Princes, have ſuited, and the levying them has given Birth to many Diſputes, too long to be recited here; however, I ſhall juſt mention the ſuppoſed Origin of this Toll, which, it is aſſerted, took Riſe from a general Conſent of Merchants trading to the *Baltick*, readily to contribute a ſmall Sum for the Raiſing and Support of ſome Lights on the Coaſt, to ſerve, in dark and tempeſtuous Nights, as Guides to the diſconſolate Sailors: By this Means the Paſſage of the *Sound* ſoon became frequented, to the entire Neglect and Diſuſe of the *Great Belt*. But as many diſputed the Payment of the aforeſaid trifling Contribution, and nothing had been regulated to decide the Difference that ought to be made in the various Sizes and Burthens of the Ships ſubject to its Payments, the *Danes* began in Succeſſion of Time to conſtitute themſelves Maſters of the Affair, and to exact more or leſs, according to the Force or Weakneſs of thoſe with whom they had to deal, or proportionably to their Situation with the Princes or States to which the Ships belonged; which induced the Emperor *Charles* V. to fix the Toll for his Subjects of the ſeventeen Provinces, by a Treaty concluded with the King of *Denmark*, and ſigned at *Spire* on the *Rhine*, at two Nobles, a Gold Coin valued at ſix Shillings and eight Pence *Engliſh*, for each Ship of two hundred Tons, or under, on entering or coming out of the *Sound*, and for all Ships above two hundred Tons, three. This Treaty remained in Force, till the *Dutch* ſhook off the *Spaniſh* Yoke; but as their Contentions with that Crown expoſed them to the Impoſitions of the *Danes*, theſe laſt taking Advantage of the Conjuncture, raiſed this Tax to an exceſſive Heighth, which Abuſe the *Dutch* had not Leiſure to think of redreſſing, at a Juncture when their Wars and Troubles engaged their whole Attention; however, in the Year 1600, they combined with the *Lubeckers*, jointly to oppoſe ſo exorbitant a Duty, as was equally laid on the Subjects; from which Time the *Dutch* paid more or leſs, according to their good or bad Fortnne; but in general they paid but little. *Denmark* and the *United Provinces*, as Sovereigns, made the firſt Treaty about this Toll, as Mr. *Savary* ſays, in 1647, by which they ſubmitted to pay a certain Sum for each Veſſel paſſing the *Sound*; and as this Treaty was only for forty Years, it conſequently expired in 1687, when a proviſional one was concluded, according to the ſaid Author, for four Years longer; in the Expectation of adjuſting at Leiſure, a more durable and ſolemn Agreement of the many Diſputes ſubſiſting between the contracting Powers about this and ſeveral other Affairs. Mr. *Jean Pierre Ricard*, in his Book intitled, *Le Negoce d'Amſterdam*, printed in 1772, ſays p. 435. that the above-mentioned firſt Treaty was concluded on the thirteenth of *Auguſt* 1645, and renewed for twenty Years, the fifteenth of *June* 1701, with a Regulation what Ships and Sorts of Goods belonging to that Nation, are to pay *Sound* Duty. *La Martiniere* is alſo agreed in the Year, and adds, that it was likewiſe adjuſted by this Treaty, that the Subjects of the *United Provinces* ſhould pay Toll at the Rate of Four *per Cent.* on all Merchandizes, which with the Complaiſance of our King *James* I. in Favour of the *Danes*, to the Produce of his own Subjects, out of Regard to the Princeſs of *Denmark*, whom he had married, confirmed that King's uſurped Title, to what was otherwiſe precarious; and as Time and Treaties have now rendered it a Sort of Due, I ſhall conſider it in this Light, and give an Account of it on the Footing it is at preſent.

The *Engliſh* Treaties with the Crown of *Denmark* are founded on thoſe the *Dutch* have made with it; the firſt in 1667, but this ſpeaks nothing of the *Sound*, ſo the ſubſequent one in 1670, is that wherein the Conceſſion of the Paſſage Duty is made; it contains forty-two Articles, expreſſing, that a perfect Peace and Friendſhip ſhall commence and be eſtabliſhed between the two Crowns; of which neither ſhall conſent to any Thing prejudicial to the other. That they ſhall not aſſiſt each other's Enemies, if Aggreſſors, but *England* to aſſiſt *Denmark* if invaded. Each Party to be comprehended in any Treaty made with others, and a Freedom of Trade to be carried on between the two Kingdoms; *Engliſh* not to

come to prohibited Ports without Licence, or Streſs of Weather, nor the *Danes* to any of the *Britiſh* Colonies. *Danes* may import all Things of their own Growth or Manufacture, and ſuch as come from any Part of the River *Elbe*, into *England*, *Scotland*, and *Ireland*; and the *Engliſh* have the ſame Liberty for introducing all the Products of his *Britannick* Majeſty's Dominions into any Part of *Denmark* or *Norway*, except Ports prohibited; though in Caſe any Strangers have hereafter Liberty to bring all Sorts of Goods into prohibited Ports, both Parties reſpectively ſhall have the ſame Privilege. Neither to pay any greater Duties than other Strangers, excepting the *Swedes* in *Denmark*. Both Nations have Leave to bring all Goods into any Port, where he is not bound, nor, being forced in, obliged to unlade or ſell any Part of his Goods. Though prohibited Timber be laden on an *Engliſh* Ship, ſhe ſhall not be ſearched after it is aboard, nor ſhall the Ship, or any *Britiſh* Subject, be arreſted or moleſted for it, *&c.* *Engliſh* Ships paſſing the *Sound*, to have the Benefit of deferring Payment of the Cuſtom till their Return, on bringing with them Certificates under the Seal of their proper Officers, teſtifying that the Ships belong to *Britiſh* Subjects, and likewiſe that before their Paſſage they give Security to pay it at their Return, and if they ſhall not return, in three Months at fartheſt. Goods landed at *Elſinore*, with an Intention to tranſport them elſewhere, ſhall pay no Duties but what the *Dutch*, or any other Strangers, pay. *Britiſh* Ships and Subjects to be diſpatched immediately on their Arrival at *Elſinore*, without a Preference to any other Nation, except the Inhabitants of certain Places, who have anciently held a Privilege to that Purpoſe, and ſtill do. The Subject of either Prince dying in the other's Dominions, ſhall have his Eſtate preſerved for the Uſe of the right Heir, *&c.* The Subjects of either of the Confederates may trade with Enemies of the other, unleſs in beſieged Places, or with contraband Goods. A Merchant may freely reſide where he trades, and Duties only to be paid according to printed Tariffes. *Engliſh* Ships trading to *Norway* ſhall be re-meaſured, that thus Commerce may be better regulated than hitherto. That the Freedom of Navigation during the War, which either Party may have with any other, may be obſerved, Paſſports and Certificates ſhall be given to the Allies' Ships, and the Ship bearing ſuch Certificate ſhall not be ſearched, on producing it. *Engliſh* Ships paſſing by *Gluckſtadt*, and other Places ſubject to the King of *Denmark* on the *Elbe*, ſhall be free from all Cuſtoms and Search. Any Injury done to either Party's Subjects in the other's Territories, ſhall be puniſhed according to the Laws of the Country. No Ships, or Goods laden on Ships, belonging to either Party, ſhall be adjudged Prize, but by due Form of Law. Juſtice to be adminiſtered according to the Laws of each Country reſpectively. In Caſe of Shipwreck, the Goods, *&c.* ſhall be preſerved for the Owners of Ships. Commanders of Ships, Goods, *&c.* not to be arreſted or ſeiſed, but for the Defence of the Kingdom, and in Caſes of Debt. Merchants, Mariners, *&c.* to have the Liberty of wearing, or carrying Arms. Ships ſteering the ſame Courſe, ſhall have the Benefit of each other's Convoys. Pirates ſhall not be protected by either Party. The Subjects of either Party ſhall have free Acceſs at all Times to each other's Ports; but Men of War not to exceed Six in Number, except forced in, and then to give Notice to the Magiſtrate. Neither Subjects ſhall take Letters of Mart from any Prince or State in War with the other. Ships taken in Port by a third Party ſhall be reſtored, and Seamen taken on board any Prize, that are the Subjects of either Crown, ſhall be ſet free. If a Ship laden with prohibited Goods is taken, no Bulk ſhall be broken till an Inventory be made in the Admiralty. No Men of War to injure the Subjects of the other Prince; and in Caſe they do, they ſhall be liable to make Satisfaction, as it ſhall be adjudged on Trial in the Courts of Admiralty, or by Commiſſioners appointed by the contracting Kings reſpectively. Sentence concerning Prizes ſhall be given according to Juſtice, and upon Complaint of any Sentence, the Cauſe ſhall be reheard. No Goods ſhall be ſold before Sentence but by mutual Conſent, and to prevent periſhing. Conſuls to be appointed. No private Injury to break this Treaty, nor Repriſals to be granted, but upon Denial or Delay of Juſtice. The *Engliſh* to enjoy all Privileges enjoyed by any Strangers in *Denmark*, the *Swedes* only excepted. Former Treaties, not contrary to this, confirmed, and the Ratifications to be exchanged within three Months.

The

The afore-mentioned Treaty, made between the *Danes* and the *Dutch*, under the 15th of *June*, 1701, for twenty Years, and another between *Denmark* and *France*, dated at *Copenhagen* the 23 of *Auguſt*, 1742, for fifteen Years, being much the ſame in Subſtance as the preceding with us, I omit giving the Particulars of them, for Fear of incurring the Cenſure of Prolixity; but ſhall proceed to communicate the Rules for ſtriking to the Caſtle at *Cronenburg*, near *Elſinore:*

I.

Ships from the North, as ſoon as they get the higheſt Church Spire, (*N. B.* It is blown down, and the Steeple covered with Boards) and the northernmoſt Steeple in *Cronenburg* to bear in one S. W. and by W. muſt lower their Top-Gallant or Topſails, and continue ſo until they are paſt the Caſtle, and have the two northernmoſt Steeples of *Cronenburg* to bear in one W. and by N. and then may again hoiſt them.

II.

Ships from the South muſt have lowered before they get the two North Steeples of *Cronenburg* W. and by N. and continue ſo until the Church Spire and North Steeple of the Caſtle bear in one S. W. and by W. They who neglect in theſe two Articles, may be fired at from the Caſtle.

III.

Such Ships as carry ſtanding and flying Top-Gallant Sails ſhall lower them down to the Cap, and if they have but one Top-Gallant Sail, muſt at the ſame Time lower their Fore-Top Sail half Maſt down; if no Top-Gallant Sails, then both Topſails half Maſt down. All Veſſels who have no Caps, muſt lower their Topſails entirely down. Ships who have only low Sails are exempted from lowering.

IV.

Ships turning to Windward, with a ſcant or little Wind, and the Current ſo ſtrong againſt them that it would force them aſtern in Caſe they lower, then it is not required, but on a Flag being hoiſted from the Caſtle, are excuſed, and may do their beſt.

V.

In Caſe a Ship is fired at from the Caſtle, and the Maſter and People will make Oath that he lowered, as in the firſt and ſecond Article, or could not do it to prevent driving aſtern by Wind or Current, he is free from paying the Shot; but if his People refuſe to take ſuch Oath, he muſt pay. If the Maſter ſails without paying the Perſon who clears him at the Cuſtom-Houſe, he muſt pay the Money, when it is proved who the Maſter was: Charge one Guinea; to the Boat one Shilling.

The 9th of *April*, 1687, the King iſſued a Placard, ordering the following Fees to be paid at the *Sound*.

	Rix-dollars.
To the Director of the Cuſtoms	½
To the four Chamberlains	1
To the Seal Preſſer, for ſtamped Paper, and his Trouble	½
To the Toll Inſpector, for himſelf and three Boatmen	1

By another Placard of *June* 15, 1701.

	Rix-dollars.
To the Director of the Cuſtoms	½
To the four Chamberlains	1
To the Seal Preſſer, for ſtamped Paper, and his Trouble	½

The Tranſlator extorts eight Stivers for each Cocket.

Such of the above Fees as are now taken, ſome of the Commiſſioners charge in Crown Money, which is apprehended to be an Abuſe, as they ought only to be charged in current Money.

The following are the *Sound* Duties on ſuch Goods as are commonly carried from, or brought to, *England*, which I thought would be ſufficiently ſatisfactory to my Reader, without ſwelling the Account, by an Amplification of what all other Nations pay on the Commodities that compoſe their Trade.

	Rix.	Sti.
Ale or Beer, the 8 Hogſheads, at $4\frac{1}{2}$	0	36
Alegar	0	36
Allum, the Schippont	0	12
Almonds, the 100lb.	0	9
Apples, the Laſt of 12 Barrels	0	12
Apothecaries' Drugs, the Lieſpond, valued at 36 Rix-dollars	0	18
Anniſeeds, the 100lb.	0	9
Antimony, the Schippont	0	12
Anchor and Locks the Schocks of 60	1	0
Argol, the Schippont	0	6
Arſenick, ditto	0	12
Aſhes, Weed, the Laſt of 12 Barrels, or 12 Schippont	0	12
Pot, ditto, ditto,	1	0
Auri Pigmentum, the 100lb.	0	9
Bacon, the Schippont	0	6
Balks, great, of Oak, the Piece	0	3
Fir, 4 ditto	0	6
Small ditto, 20 ditto	0	15
Bays, the ſingle Piece	0	3
Double	0	6
Beef, ſalted, the Laſt of 12 Barrels	0	36
Books, printed, the 100lb. valued at 36 Rix-dollars	0	18
Braſs, or Braſs Wire, the Schippont	0	24
Wrought, the 100lb. valued at 36 Rix-dollars	0	18
Brimſtone, the laſt of 12 Schippont	1	0
Brandy, *French* or *Spaniſh*, the Hogſhead	0	24
Corn, the Barrel	0	6
Rheniſh, the Auln	0	24
Bay Berries, the 200lb.	0	9
Biſcuit, or Bread of Wheat, the 4 Barrels	0	6
Rye	0	4
Butter, the Barrel	0	5
Brazil Wood, the 500lb.	0	15
Briſtles, the Schippont, valued at 36 Rix-dollars	0	18
Cables, Cordage, or Cable Yarn, the Schippont	0	6
Calicoes, the 8 Pieces	0	15
Capers, the Pipe, or two Hogſheads	0	18
Cards, for playing, or for Wool, the 10 Dozen	0	6
Copper, the Schippont	0	24
Wrought, the 100lb. valued at 32 Rix-dollars	0	6
Cheeſe, the Schippont	0	4
Cork, the 30 Bundles	0	36
Copperas, Calamin, or Cremor Tartari, the Schippont	0	6
Cotton Wool, the 100lb.	0	18
Cardamoms, Cinnamon, Cloves, or Cochineal, the 100lb.	0	36
Corn, Barley the Laſt of 20 Barrels	0	24
Beans, Peaſe, Oats, or Buck-Wheat, the Laſt of 12 Barrels	0	12
Malt, the Laſt of 20 Ditto	0	18
Rye, ditto 20	0	12
Wheat, ditto 20	1	0
Coriander and Currants, the 200	0	9

Caſques,

	Rix.	Sti.
Caſques, the 50 Pieces	0	6
Cloth, of Silk, the Piece	0	9
Fine, or ſhort Cloths, or double Dozens, the two Pieces	0	9
Coarſe, or long Cloths, or Dozens, the 4 Pieces	0	9
Canvas, or Cambricks, the 4 Pieces	0	15
Camlet, the 4 Pieces	0	10
Camels' Hair, the 25lb.	0	15
Calamancoes, the 8 Pieces	0	10
Campeachy Wood, the 500lb,	0	18
Carraway Seeds, the 100lb.	0	9
Canary Seed, the Caſk	0	6
Cheſnuts, the 36 Sacks	0	36
Cyder, the Hogſhead	0	12
Cavear, the Schippont, valued at 18 Rix-dollars	0	9
Coffee, the 100lb.	0	24
Clockwork, the 100lb. valued at 36 Rix-dollars	0	18
Crooked Wood, or Timber, 25 Pieces		
Deals, of Oak or Fir, above 20 Feet the Schock	1	0
Carlſhamn Deals, under 20 Feet	0	24
Pruſſia	0	36
Common, 10 to 14 Foot the 1000	0	36
Diaper, or Drilling, the 20 Pieces	0	30
Dates, the 100lb.	0	9
Damaſk, of Silk, the Piece	0	12
Linen, 4 Pieces	0	10
Woollen, 8 Pieces	0	10
Druggets, 2 Pieces	0	9
Down, the Schippont	0	36
Eels, the Laſt, of 12 Barrels	0	30
Elephants' Teeth, the Piece	0	36
Fiſh, Cod, the Laſt, of 12 Barrels	0	12
Stock, the Laſt, 12 Schippont, or 1000 Fiſh	0	30
Salmon, the Barrel	0	5
Salted Herrings, ditto	0	2
Red ditto, the Laſts of 20 Straes, or 20,000	0	12
Feathers, coarſe, the Schippont	0	6
Flannels, 8 Pieces of 25 Ells each	0	10
Flax dreſſed, the Schippont	0	36
undreſſed, as fine clean *Narva*, *Maulenburgh*, *Heilin*, *Eſtmiſh*, *Podolick*, *Rakitzker*, and *Pater-noſter*, the 4 Schippont	1	0
coarſe, half clean, *Farken*, *Raſſen*, *Courland*, *Pruſſia*, *Raſſets*, *Memels*, *Marienburgh*, the 6 Schippont	1	0
Tow, the 5 Schippont	0	18
Figs, the 18 Baſkets, 800lb.	0	18
Fernambuck Wood, 1000lb.	0	30
Flounders, dry, 20,000	0	12
Frieze, the Piece	0	6
Flour of Wheat, 200lb.	0	9
Barley, or Rye, the Laſt of 12 Barrels	0	12
Gauls, or Gum, the 200lb.	0	9
Gadza, 12	0	30
Glaſs for Windows, *Engiſh*, *French*, *Lubeck*, and *Dantzick*, the 8 Cheſts	0	30
Venice, Drinking ditto, the Cheſt	0	9
Bottles, the Ton, 4 Hhds. and 30 Schocks	0	30
2 Pipes	0	12
Quart Bottles, 100 Doz. 50 Rix-dollars	0	24
Grains of Guinea, 50lb.	0	15
Ginger 100	0	12
Green 50	0	12

	Rix.	Sti.
Gun-Powder, 100lb.	0	6
Gloves, *Pruſſia*, or *Courland*, 250 Pair	0	9
Leather, 1 Doz. Value 2 Rix-dollars	1	0
Hats, Felt, the Caſk	0	12
Beaver, the Doz. Value 48 Rix-dollars	0	24
Caſtor 24	0	12
Honey, the Hogſhead	0	7½
Hops, the Schippont	0	6
Horſes, the Pair	0	36
Hair, Camels' or Coneys', the 50lb.	0	30
Hemp, the Schippont	0	8
Tow, 10 ditto	0	36
Haberdaſhery Ware, 100lb. valued at 36 Rix-dollars	0	18
Hides, Elks, Harts, Bucks, or *Ruſſia*, the Decker	0	9
Salted ditto	0	6
Dry, the 5 ditto	0	18
Ruſſia, the Schippont	0	36
Handſpokes, the 500	0	8
Iron, Wire, or Pans, the 100lb.	0	4
Stoves, Plates, or Pots, the Schippont	0	6
Bars, Bats, Bolts, Hoops, Anchors, and Guns, the Schippont	0	4
Wrought, 100lb. valued at 24 Rix-dollars	0	12
Old, the Schippont	0	3
Oſtermunds, the Schippont	0	2
Indigo, the 100lb.	0	36
Iſinglaſs, the 100lb.	0	6
Juniper Berries, 200lb.	0	9
Kerſies, the 8 Pieces	0	10
Lace, Silk, or Ferret, the 4lb.	0	10
Thread, Wool, Cotton, Hair, the 10lb	0	6
Gold and Silver, the Pound	0	5

Yarn, Tow, the 4 Schipponts	0	36
Sail, 1 Schipp.	0	36
All Sorts of Woollen, the 50lb.	0	36

I ſhould here have added to the preceding an Account of the Cuſtoms on Goods in *Denmark*, but I omit inſerting them as I have thoſe payable in all other Kingdoms, to avoid ſwelling the Work to too great a Bulk; however, I ſhall give my Reader a Liſt of the Commodities prohibited by his *Daniſh* Majeſty, and note ſome other Particulars, neceſſary to the Information of ſuch Perſons as are concerned in that Trade.

Brimſtone is forbid Importation by a Placart of 29 *December*, 1727; and Buckram to be brought into *Copenhagen* and the Iſland of *Siæland*, by Order from the Chamber of Finances, dated 10 *Sept.* 1728. Cloth, Corn, and Earthen Ware of all Sorts, are prohibited by a Placart of 25 *Feb.* 1717; dried Fiſh, or ſalt Cod, from foreign Parts, prohibited by a Placart of 23 *March* 1729; Flannel, and Iron in Bars, prohibited by a Placart of 8 *Sept.* 1730, but allowed on Oplag, which is a Privilege granted to *Copenhagen* and *Elſinore*, where all foreign Goods may be landed and exported Duty free within a Year, for Exportation; Kerſies forbid to be imported; Oil of Linſeed, Hemp, and Rape Seed, prohibited by a Placart of 22 *Nov.* 1704; Mohair twiſted, forbid by a Placart of 18 *July* 1708; Woollen Stuffs of all Kinds, and Stockings, prohibited; Brandy, Salt, Tobacco, and Wine, may not be brought into any Port in *Denmark* but *Copenhagen:* Wool Cards, not importable into *Siæland* by a Placart of 15 *Sept.* 1727, but admitted any where elſe.

To the Port Charges before-mentioned, payable in the *Sound*, ſhould be added:

		Laden	in Bal.
Light Money for Ship and Cargo, in Crowns	Rixd.	5 3	2 25⅓
Paſs, Seal, Writing Money, and Fees		2 12	2 12
Guard Ship both Ways, 4 Sti. each Time British Poor upwards of 24 Sti. Commiſſion		0 24	0 24

Add 3 Sti. on each Rixd. Crowns, to make it current Money, and obſerve that in this and all the preceding Duties, 48 Stivers make the Rix-dollar.

N. B. All Maſters are allowed 4 *per Cent.* out of the Duties paid on their Cargoes both upwards and downwards.

At *Copenhagen* a Bank was eſtabliſhed a few Years ago, whoſe Notes are current through all *Denmark*; and the King's Orders, the 21ſt of *March*, 1705, concerning ſtranded Ships and Goods, are very excellent, though they have not been ſo well obſerved lately as they ſhould be in *Jutland*, where ⅓ Salvage has been recovered, in Direct Contradiction to the aforeſaid Ordinance; but in *Norway* a better Regard is paid to it.

Beſides the *Sound*, the *Baltick* has an Entrance by the great and ſmall *Belt*; the former being a ſafe Paſſage, when well known, for large Ships, which pay the Duties thereof at *Nybourg* in the Iſle of *Fuhnen*, where the *Danes* have a fortification, oppoſite to *Korſoer* the Ferry Place in *Siæland*, and where all Paſſengers for *Jutland*, *Holſtein*, &c. from *Copenhagen* land.

The *Little Belt* is at *Frederica* in *Jutland*, where ſmall Ships can only paſs, and muſt pay *Sound* Duties, and *Sophia Odde* in *Fuhnen*, both Places being fortified. And as *Norway* is ſubject to his *Daniſh* Majeſty, I ſhall now treat of it, though it makes a Break in my propoſed Method of deſcribing the Trade of the Nations bordering on the *Baltick* all together.

Of the Trade of NORWAY.

THIS Kingdom is ancient, and was governed by its own Princes till 1397, when it became a Province of *Denmark*. Its Northern Borders at *Wardhuus*, lie in the Lat. of 70 Deg. 50 Min. and its South-Eaſt at *Frederichſhald* in 59 Deg. 20

Min. its South-West Limits being the *Naze*, in 57 Deg. 50 Min. and the inland Frontiers are in many Places ſeparated from *Sweden* by a Range of Mountains, which continue to the North Sea. The Country is very barren, not producing a Sufficiency either of Corn or Cattle for the Inhabitants' Support, although it is in general very thinly peopled, proportionate to its vaſt Extent, containing only two hundred ninety-one Pariſhes, with nine hundred thirty-nine Churches and Chapels of Eaſe; it differs from all other of his *Daniſh* Majeſty's Dominions, in producing many more Commodities for Exportation than they all put together; its Natives being active, laborious, induſtrious, and honeſt.

Copper is one of its principal Products, and of this the chief Works are at *Roraas*, *Silboc*, *Quikne*, *Meldahl*, or *Lyckens*, *Faadahl*, and *Aardahl*. The firſt of theſe Mines yields about three hundred and fifty Tons yearly, on which the King hath two Rix-dollars *per* Ton Exciſe, a Tenth in Kind, and a Duty on Exportation of 8*l*. 15*s*. *per* Ton, which brings near one-fifth of its Value into the Revenue.

It is moſtly ſhipped for *Holland*, and the Proprietors of this Mine have it divided into one hundred and ſeventy-two Shares, each worth about 500*l*. Sterling, as in a Medium of twenty Years paſt, it hath yielded twenty *per Cent*. annually, after having been worked about one hundred and ten Years. It lies about one hundred and eight *Engliſh* Miles E. S. E. from *Drontheim*.

Quickne Mine is more ancient than this now mentioned, lying three hundred and ſixty Miles to the S. W. of it, and produces about fifty Tons yearly.

Meldahl is the third, and has been wrought with various Succeſs, having ſometimes rendered the Proprietor fifty *per Cent*. and at others nothing: The Medium Quantity is computed to be near fifty Tons yearly.

Silboc had been given over for fifty Years, but wrought again for fifteen paſt by the Boors; is two hundred and forty Miles from *Drontheim*.

Faadahl hath been wrought about three Years, though it had been given over for ſeveral before; it now affords great Hopes of being the ſecond Mine in *Norway*, and is about ſix hundred Miles W. from *Drontheim*.

Aardahl, eighty Miles S. S. E. from *Bergens* was rented by the *Engliſh* Charitable Corporation about the Year 1731; but whether through the Stubbornneſs of the Ore, Ignorance of the People ſent over, ſome Iniquity of the Managers, or all together, ſeveral thouſand Pounds were ſunk, and after one or two Cargoes had been ſhipped for *Newcaſtle*, the Company ſtopped Payment, and the working the Mine has been ever ſince diſcontinued. About three Millions *Wincheſter* Buſhels of Charcoal, and many thouſand fathoms of Billet Wood, are yearly conſumed at the ſeveral different Melting-Houſes, which latter beginning to grow ſcarce, makes it probable that the Drain of a few Years more, will oblige the Artificers to have Recourſe to *Britain* for a Supply of her Mineral Coal.

The five laſt Mines are exempted from any Payment to the Revenue on Account of their Property; and in that of *Quickne* is a Well, whoſe Water turns Iron into Copper in three Years ſoaking. At *Konigsburgh*, four Miles above *Stromſoe*, are alſo Mines of Silver, which, in *May* 1731, were let out to farm, after a Prohibition to all Strangers had been iſſued in the preceding *February*, not to take any Intereſt therein. And at *Drontheim* is a Pearl Fiſhery, whoſe Revenue the King granted to the Queen in the ſaid Year. Its other Products are Iron, Pitch, Tar, Fiſh, Skins, Tallow, Butter, Aſhes, and above all Maſts, Boards, and Timber.

About the Year 1738, an Allum Work was erected near *Chriſtiana*, where is an inexhauſtible Rock of Slate, which is burnt into Aſhes, and theſe being ſteeped in Water, and afterwards boiled, produce Allum, though my Author is uncertain whether any Urine or Kelp is uſed in the Operation. Carraways alſo grow very plentifully in this Country, and large Parcels of them are annually exported. Of Cryſtal a good deal may be got a few Miles above *Chriſtiana*, but a Sample of it having been ſent here to *London*, its Quality was diſeſteemed. In *Iceland* is the famous Volcano *Hecla*, from whoſe Mountain great Quantities of Brimſtone are procured, which occaſions this Commodity to be prohibited Importation here, and the Wool of this Iſland is very fine and long; it was peopled from *Norway* in about 950, is governed by a grand Bailiff, hath two Biſhops, and thirty-ſeven Pariſhes.

The Imports are Spice, Wine, Brandy, Vinegar, Cheeſe, Tobacco, Woollens of all Sorts, Salt, Beer, Bottles, ſalt Beef, black Lead, Braſs, Buckrams, Butter, Callicoes,

licoes white and painted, Candles, Caps, Silk, and Worſted, Canvas, Coals, Copperas, Cork, Coriander Seed, Cotton, Coverlets, Currants, Cyder, Dimity, dry Fiſh, Corn, and Flour, Glaſs, Glue, Gunpowder, Hats, Herrings, Indigo, Lead, Leather, Linen, Mead, Muſtard Seed, Mercery, Nuts, Pewter, Quickſilver, Raiſins, Rice, Saffron, Salmon, Steel, Stockings, Sugar, Sweetmeats, Tea, Tin, Silks, Verdigris, Vitriol, Wax, Wire, and many other ſmall Commodities too numerous to be inſerted.

About twelve Years ago, *Joachim Friederic Baron Beurt*, a *Bohemian*, erected as Director General, at the King's Expence, a Salt Work at *Areſund*, near the *Færder* Iſland, with a great Pile of Buildings; and the Water there being much freſher than in the North Sea, is pumped up to the Top of the Grader Houſe, from whence it is conveyed by a great Number of Spouts, and falls upon many Hurdles, with the Bark taken off, in Order to diſſipate the freſh Particles of the Water, and prepare the Remainder for the Pan, to which the Houſe being left open on all Sides, that the Air may have a free Paſſage, is intended to contribute, and by this Method they endeavour to imitate the Salt of *France* and *Portugal*, though the Quality is much inferior, and will not keep in damp Places.

This Kingdom has many good Ports, but the following ones only are appointed for the landing or ladeing Merchandize, from or to foreign Parts, or thoſe of the King's other Dominions, whoſe Trade I ſhall briefly particularize, having already ſpoke of it in general.

Ahrendal. The uſual Exports of this Place are ſhort Timber, and a few coarſe ſawn Deals.

Bergen was once a firſt Rate Hans-Town, and the Seat of a Biſhop and Grand Baily, though its Trade has for ſome Time gone very much to Decay; at preſent its principal Exports are Tar, ordinary nine or ten Feet Deals, ſalt Cod, Stockfiſh, Herrings, and Salmon; here all Sorts of Corn may be imported, on paying a Cuſtom of twelve Sti. Specie *per* Barrel.

Chriſtiana is a City about a hundred and thirty-ſeven Years old, the Reſidence of a Viceroy, Biſhop, Grand Bailiff, and is the High Court of *Norway*; from hence are ſhipped the greateſt Quantity of the beſt Deals in this Country; and beſides it has an Allum, and a Stuff Manufacture.

Chriſtianſand, built about an hundred and twenty Years ago, is the Seat of a Biſhop, and Grand Bailiff; its chief Exportation Timber, and a few Deals moſtly ill ſawn.

Chriſtianſund was called *Faarſund* until 1732, when the late King gave it its preſent Name; its yearly Exports are about two thouſand Barrels of Tar, ſome bad Pitch, of which they have little in *Norway*, Stockfiſh, 10,000 Barrels of Cod and Ling, 48,000 Barrels of Herrings, ſome few Deals, Train Oil, and Salmon.

Drammen is a general Name for *Bragnees*, *Copperwyk*, and *Stromſoe*; it exports great Quantities of Deals and Timber. It lies about four Miles diſtant from *Konigſberg*, where the Silver Mines are, and by a Placart, dated *May* the 4th, 1706, all Ships going to *Drammen* in Ballaſt, are directed to caſt it out near the Cuſtom-houſe, for Preſervation of the Ground whereon it is built.

Drontheim, called alſo *Trundheim*, is an ancient City, and was formerly the ſeat of the *Norway* Kings; though now become the Reſidence of a Grand Bailiff, and Biſhop, whoſe Cathedral is the moſt magnificent of any in the Country, being built with a coarſe black Marble, which a neighbouring Quarry produces. Its Exports are fourteen Feet three Inch Fir Deals; great Quantities of nine to ten Feet one and half Inch ditto; red and white Deals, in all ten to eleven hundred thouſand; Tar, and near five hundred Tons of Iron, moſtly for *Amſterdam*.

Molla, a ſmall Port, which only affords ſome Tar and Fiſh.

In 1748 the above three Ports were farmed by ſeveral of the Inhabitants for ten Years, at the annual Rent of 32,000 Rix-dollars, which has produced them very great Profits by the yearly Income of 40,000 Rix-dollars from *Drontheim* 20,000 from *Chriſtianſund*, and 6000 from *Molla*.

Flekkefiara, whoſe chief Exports are Salt Fiſh, Herrings, and Stockfiſh.

Frederichſhald is the eaſternmoſt Town in *Norway*, and was built about a hundred and twenty-eight Years ago; it is ſeparated from *Sweden* by a Ford two *Engliſh* Miles broad; and its Exports are confined principally to Deals, with a few Balks

and Spars: Its Oplag occaſions the Importation of all Goods in their own Ships, beſides Iron from *Sweden*, under any Colours.

Friderichſtad roſe on the Decline of *Sarpſburg*, lying a Mile and a Quarter up the River *Glommen*, about a hundred and ſeventy Years ago; from hence many Maſts, Load Balks, Deals, Spars, ſmall Balks, *&c.* are annually exported: It is the beſt fortified Town in *Norway*; but as ſeveral of the Fortifications are built on a Clay Ground, with a Boggy Bottom, the Foundations frequently give Way and ſink.

Holmſtrand, a ſmall Town, that exports a few Deals, Balks, and Sparwood. It lies in the Earldom of *Jarlſburg*; and on the Iſland called *Long Oe*, near to it is a very great Quarry of grey Marble.

Krageroe is another ſmall Town, yielding ſome Deals, Balks, Spears, and Spars; and ſome Years ago it produced the beſt fourteen Feet Deals in *Norway*.

Langeſund, a ſmall Place; ſubject to the Cuſtom-houſe of *Porſgrund*, affords ſome ſmall Balks; but moſtly Sparwood.

Laurvi, a ſmall Town in the Earldom of the ſame Name, within *Stavern*, where the Earl has a fine Iron Work, produceth chiefly that Sort of Deals called *Schirven*, which are commonly eſteemed the beſt.

Mandhall, a little Place lying two Miles on the Eaſt Side of the *Naze*, yields ſome ſhort Timber, and a few low priced Deals.

Moſs, a ſmall ancient Town, whoſe chief Exports are Sparwood, and a few Deals; though it has a fine Iron Work, and ſeveral Saw Mills.

Porſgrund has the Cuſtom-houſe for itſelf, *Brevig*, *Lonſound*, and *Scheen*; the two firſt exporting very good large Timber, eſpecially the Sort called *Bratſburgh* Spears, Sparwood, and ſome Deals; at the laſt Place are ſawn the Cloiſter Deals from twelve to eighteen Feet long; the beſt in thoſe Parts.

Romſdahal, a ſmall Town, whoſe Exports uſually are ſome Fiſh, and a little Tar.

Rus-oer, commonly called *Eaſt-Ries*, produceth chiefly ſhort Balks, Spars, and ſome few coarſe ill-ſawn Deals.

Sand lies on the Weſt of *Chriſtiana* River, though the Ships chiefly lade on the Eaſt Side, at *Drobark* and *Wenebeck*; its Exports are great Quantities of white Wood Balks, and Spars, principally for the *Hollanders*.

Stavanger, a very poor Place, moſtly inhabited by Shipmaſters, who are chiefly employed in carrying Fiſh from *Bergen*, and the adjacent Ports, coaſtwiſe, and ſome ſmall Matter to the *Belt*.

Sandefiord, a ſmall Place between *Laurvig* and *Tonsberg*, whoſe chief Produce is Spars for *Denmark*, as there are few Inſtances of Foreigners lading here.

Sundhard, a ſmall Town N. W. of the *Naze*, ſhips a little Fiſh and ſome Tar.

Tonsberg is deemed the oldeſt trading Town in *Norway*, and has the Ruins of an ancient Stone Building, ſuppoſed to be the Relicts of a Palace, where one of their Kings reſided; it is now a poor Place, and the Exports reduced to a few white Deals, Balks, and Sparwood.

Two or three Ships are ſent yearly from *Copenhagen* to *Finmark*, which lade with Fiſh and Oil, moſtly for *Holland*; and one or two likewiſe go from the ſame Place, chiefly with Proviſions for the Garriſon at *Greenland*, and to carry Miſſionaries, as the Inhabitants want but few Neceſſaries, or ſeem to have no Care for more than the preſent.

Wardhuus, or *Wardhuys*, is the northernmoſt Fort in *Norway*, where the King of *Denmark* keeps a ſmall Garriſon: It lies in 70 Deg. 45 Min. Latitude, and its Longitude from the Meridian of *London* is 27 Deg. 50 Min. Near it the River *Tanne* takes its Riſe, and runs through *Lapland*; from the different Ports of which, and *Finland*, ten or twelve Ships, of about two hundred Ton, lade yearly with Fiſh for *Copenhagen*, and from the latter many to *Bergen* and *Drontheim*.

The Havens of this Country are very numerous, and moſt of them very ſafe, but many of them abound with the Worm ſo prejudicial to Ships' Bottoms; no one is permitted to go into or out of them without a Pilot, as *per* Placart *March* 5, 1725; where the

1ſt Article is, That all Ships going into Harbour, either to lade there, or deſtined to other Countries, ſhall pay Pilotage conformable to this Regulation, and not be allowed, whilſt a Pilot is to be got, by themſelves, People, or any ſave ſworn Pilots,

Pilots, to carry their Ship in or out of Harbour, or to follow other Ships, for if they do, they are liable to pay Pilotage at the Cuſtom-houſe.

2dly, One Tenth is to be deducted out of the Pilotage for the Captain, who is Chief over all the Pilots, and the remaining nine Tenth to the Pilot.

3dly, The Summer Pilotage, viz. from the 16th of *March* to the 16th of *October*, from Sea, is to be for a Ship drawing

	Rd.	Ro.	s.

Ships of 4 to 6 Feet, each Ft.	0	1	8
6 to 8	0	1	12
9 to 10	0	1	16
11 & 12	0	1	20
13 & 14	0	2	0
15 & 16	0	2	8
17 & 18	0	2	16

Flat built Ships pay $\frac{1}{3}$ more; above this Depth 1 Rixdollar more for each Mile; if the Pilot carry a Ship above four Miles, he is to receive $\frac{1}{4}$ Part leſs, but if nine or twelve Miles incluſive, $\frac{1}{3}$ leſs for each Mile. Winter here to receive $\frac{1}{4}$ Part more alſo, for Pilotage in and out.

Whilſt the Pilot is aboard, the Ship Maſter muſt provide him free Meat and Drink, but if obliged by contrary Winds to keep the Sea, one, two, or more Days, the Maſter, excluſive of the Pilotage, muſt pay the Pilot two Rixoorts daily.

N. B. Nothing to be paid the Pilot for Attendance whilſt the Ship is in Harbour, nor can he demand Proviſions.

4. The Pilots muſt not, on Forfeiture of their Place, take more Pilotage than what this Placart allows, except in ſtormy Weather, where Hazards are run, or more Perſons employed for the ſaving People, Ship, and Cargo, or when ſhe hath loſt Maſts, Sails, or Rudder; the Pilot may in ſuch Caſe agree above the common

Rate. If the Maſter refuſe to agree, the Pilot notwithſtanding muſt do his Duty, and the Pay be ſettled by the *Oldermand* and two diſintereſted Perſons; but if either Party be diſſatisfied, the Magiſtrates may attempt it; if their Determination be alſo diſliked, it may be appealed to the Court of Admiralty in *Copenhagen*.

5. As ſoon as the Pilot ſees a Ship in the Offing, with her Colours out as a Waſt, he ſhall go with his Boat without the outer Rock, and continue on board her until ſafely moored. If in clear Weather a Ship put out a Show for a Pilot, being in ſome Danger, and no Pilot appears, they ought to attend in that Neighbourhood; and having no reaſonable Excuſe, ſhall forfeit two Rixdollars each to the Poor. And the Oldermand, for not keeping better Order among the Pilots, ſhall forfeit four Rixdollars for the firſt Neglect, five for the ſecond, and loſe his Office for the third.

6. A Ship having brought to for a Pilot with his Colours out, and none near at hand, the Fiſhermen who have been uſed to officiate as Pilots, may then take Charge of the Ship and carry her in, recovering full Pilotage for their Trouble, without any Deduction, though none but Pilots may carry a Ship to Sea, except Fiſhermen appointed by the Oldermand.

7. That the Pilot-Boats may be known, they ſhall carry a red Cloth in the Middle of their Main-Sail, but when they cannot uſe it, ſhall ſhew a white Cloth at the End of their Sprit; and on Neglect to ſhew theſe Marks, they ſhall each Time forfeit two Rixdollars to the Oldermand, and two ditto to the Poor. Fiſhermen uſing ſuch Signs ſhall forfeit four Rixdollars each Time.

8. When a Maſter hath got a Pilot on board, he ſhall not be obliged to take another on his coming into another Pilot's Diſtrict, if the Pilot he has is acquainted and willing to proceed farther; though if the Oldermand order another Pilot, the former muſt quit, to prevent the Harbour's being left deſtitute; but if the Pilot engages to go farther than he is acquainted, and a Damage happens, he ſhall pay it, as the Law directs. *Code* IV. B. I. Cap. v. A.

9. When a Maſter has any reaſonable Cauſe to complain that his Pilot has not done proper Duty, and the Weather permitting, Colours were put on to ſhew the Want of a Pilot, the Maſter ſhall in this Caſe take the Pilot and Oldermand, and in Preſence of two Sea-faring Shipmaſters, whom the Magiſtracy ſhall appoint, make an Atteſtation thereof, and the Maſter ſhall have Credit for Law Charges until a Deciſion, each Party obliging themſelves to be ſatisfied therewith; and a Pilot, having Reaſon of Complaint, is entitled to the ſame Liberty.

10. The Pilots are to have Blanks in the Maſter's Language, for him to ſign, notifying what he has paid him, as ſhall the Pilot for what he has received.

11. Wind and Weather permitting a Pilot to conduct a Ship into a convenient Harbour, he muſt not on any Account carry her into one where the anchoring Ground is too deep, eſpecially late in the Year, or in Winter, except in Caſes of Neceſſity; and then the Pilot ſhall before-hand acquaint the Maſter with the Circumſtances, and muſt however anchor in the moſt convenient Place, on Penalty of four Rixdollars; and the ſame Sum on neglecting to take an Atteſtation that it was not his Neglect. A Pilot conducting a Ship through dangerous Places, or altering the Land Marks, ſhall be impriſoned for Life in *Bremerholm*, or ſuffer Death if he deſerves it.

12. As the Captain is allowed one Tenth of the Pilotage, the Oldermand of the Pilots ſhall have three Stivers on each Rixdollar, both of them to be deducted out of the ſtipulated Rates; and if Pilots carry in and out of Harbour, which do not lade or deliver in that Country, the Captain's Salary ſhall be only one twentieth Part.

13. Forfeitures to be diſtiributed among poor Sailors.

14. The Collectors of the Cuſtoms are to aſſiſt the Pilots in getting their Pilotage, and not clear the Ships until they are ſatisfied, or have the Oldermand's Atteſt what Draught of Water ſhe drew in and out, but muſt deduct the Salaries, if the Maſter has paid them to the Oldermand.

15. A Maſter ſailing before he hath paid his Pilot, ſhall, when met with in *Norway*, pay the Debt, and the like Sum to the Poor, beſides the Law Charges: And a Maſter uſing a Pilot ill ſhall forfeit as the Law directs.

16. As

16. As Pilots are always obliged to keep a Look out, they ſhall have Reſerves of others.

17. If the Magiſtrates' or Admiralty's Deciſions in Law Suits between Maſters and Pilots are diſliked, either Party may appeal to the King.

18. Ships bound to any Port within the *Fæder*, and ſtop, with a fair Wind, in any out Harbour to ſmuggle, the Pilot ſhall immediately inform the neareſt Officer of Juſtice; and the Maſter, on due Proof made againſt him, muſt pay the two hundred Rixdollars, as directed in the Book of Rates; the ſame to be alſo obſerved North of the *Naze:* And a Pilot neglecting to give ſuch Information ſhall loſe his Place.

19. The King commands all his Military Officers to be aſſiſting herein, and to keep theſe Orders as a Law.

Maſters of Ships muſt make a true Report at the Cuſtom-Houſe, within twenty-four Hours after their Arrival; and, if required by the Collector, muſt produce authentick Bills of Lading. The not reporting within this Time limited, incurs a Penalty of twenty Rixdollars daily; if they neglect to report all their Cargoes, they muſt pay twenty *per Cent.* on the Value of that Part omitted, except he will make an Oath it was an Error, without any ſiniſter Intent to ſmuggle them. If they belong to Maſter or Mate, they are confiſcable and liable to double Duty.

Maſters muſt be careful not to ſail without their *Told-Zedel*, which is a Paſſport given them from the Cuſtom-houſe, containing a Liſt of the Cargo, and that the Laſtage, Teinde, or tenths, a Cuſtom, and Lights are paid; otherwiſe being found without it, and the Cargo is diſcovered not to be duly entered, treble Duty muſt be paid, and the Maſter condemned to Chains for Life in *Bremerholm*; if the Ship be only in Ballaſt, the Puniſhment is to pay ten Rixdollars, and the producing falſe Paſſports, with an Intent to defraud the Revenue, incurs a Forfeiture both of Ship and Goods.

The Lights in this Province are the *Fæder*, built on a high Rock at the Entrance of *Chriſtiana* Fiord, and two on the *Naze* Point; in *Denmark*, they have the *Schaw*, and *Anholt* in the *Cattegat*; that on the Sand Bank called *Scagen*, at the Point of *Jutland*, was ſome Time ago waſhed away, and I believe not yet reſtored.

The Sea Marks here, are the Cow and Calf near *Mandahl*. Off *Merdoe* Iſland, the *Trom* Hills, and *Trom* Church, with a new built whitened Steeple, and the above-mentioned Light-houſes.

The *Daniſh* trading Companies, are that of the *North*, the *Iceland* Company, and the *Eaſt-India* Company. The firſt was eſtabliſhed at *Copenhagen*, in 1647, by *Frederick* III. which has not only very conſiderable Settlements in *Norway*, but they ſend their Ships alſo to the Port of *Varanger*, at the Bottom of the Gulf of the ſame Name; from whence their Commiſſaries penetrate by Land, both into the *Daniſh* and *Muſcovite Lapland*, on Sledges drawn by Rein-deer.

They alſo extend their Trade to *Borandia* and *Siberia*, where their Factors advance even to *Panigorod*, the Capital of this Part of the Czar's Dominions; and the Goods they carry are Rixdollars, Tobacco, Brandy, and Linen, which they truck againſt a Variety of Furs, the only Products of theſe Parts.

The *Iceland* Company alſo owe their Charter to the ſaid Monarch *Frederick* III. who granted them his Letters patent in the ſame Year the Northern Aſſociation obtained their's. It is the Ships of this Company only that are permitted to trade with this Iſland, which lies in ſixty-five Degrees forty-four Minutes of Latitude, and thirteen Degrees and thirty Minutes of Longitude. The Inhabitants, although at preſent Chriſtians, are notwithſtanding almoſt as much Barbarians, as before this Religion was profeſſed among them. They neither buy, nor ſell, or know the Uſe of Money; ſo that all their Trade conſiſts in Barter, either with Strangers, or between one another; this Iſle became ſubject to *Denmark* at the ſame Time with *Norway*; and their chief Traffick conſiſts in Beeves, Sheep, and Horſes, and the Skins of theſe Animals, dry or ſalted, dry Fiſh, Butter, Tallow, Brimſtone, and the Furs of Foxes, Bears, Wolves, *&c.* Among the Sheep they have a very extraordinary Sort, being large, with eight Horns, which the Natives are obliged to ſaw off, for fear of their wounding the other Cattle, as they are

difficult to tame; their Wool is thick and fine, which recommends it to a good Sale.

The *Danes* carry to theſe Iſlanders, in Exchange for Commodities, Tobacco, Linens, Flour, Beer, Wines, Brandy, Iron, Cloth, ſome Hard-Ware, *&c.* all conveyed to *Kirkebar*, a large Town, or ſmall City in the Iſland, where the Merchants and Factors reſide; and though the Trade to *Groenland* has nothing to do with the Company's Charter, yet as it ſtill lies farther North than *Iceland*, I ſhall ſpeak of it here, as in its proper Place.

This Country, in a Manner unknown, and its Limits yet undiſcovered, has hitherto hindered the Learned from determining whether it is a Continent joining to that of *America*, or *Tartary*, or whether it is ſeparated from both, and is an Iſland. The Smallneſs of its Products are ſuited to the Paucity of its Inhabitants, as it affords nothing but Whale-Fat and Oil, Seal Skins, and the Teeth of a Fiſh called *Towak*, more valuable than Ivory for its Whiteneſs; which they truck with the Whale-Fiſhers, who land here to boil their Blubber, againſt Knives, Sciſſars, Needles, Looking-Glaſſes, *&c.* And as I have no where taken Notice of the Value and Importance of this Fiſhery, which now begins to be regarded here, as it is encouraged by the Government, and the Succeſs of our late Attempts in it; I preſume it may not be diſagreeable to my Readers, to be adviſed of what may annually be taken in that Sea. I ſhall therefore give a Liſt of the Ships which fiſhed there in the Year 1737, with the Fortune they each had in their Enterprize.

The *Dutch* then ſent into the *Groenland* Sea an hundred and ſix Ships, which caught three hundred and fifty-five Whales. The *Hamburghers* ſeventeen Ships, that took thirteen Whales and a half. *Altena* ſent five Ships, and got ſeven Whales; and *Bremen's* ten Ships caught eleven Whales; theſe were all *extra* of the Adventurers to *Davis's* Straits, whoſe Engagements were yet more conſiderable.

The *Danes* began late to engage in long Voyages, at leaſt to the *Eaſt-Indies*, and it was not before the Middle of the ſeventeenth Century, that their Colours were ſeen in the Gulf of *Bengal*, and on the Coaſt of *Pegu*. At preſent they carry on a pretty good Trade to thoſe Parts, by a Company eſtabliſhed in 1612, and whoſe Privileges were enlarged, and its Commerce extended by a Grant from his *Daniſh* Majeſty in *January* 1728, which made them in a Manner a new Aſſociation; and for a Fund they opened Books to take in Subſcriptions, at *Altena*; but this new Company being ſtrongly oppoſed by the Maritime Powers, which undoubtedly had an Influence on the intended Subſcribers, the Thing dropped, and the Company remained on its primitive Footing; but the late King, in Order to aſſiſt and encourage their Undertakings, advanced them a hundred thouſand Crowns in 1740, that they might puſh their Trade with more Vigour.

The Iſle of *St. Thomas*, ſeated in the North Sea, at fifteen Leagues Diſtance from *Porto-Rico*, is the only Colony that the *Danes* have in the *Weſt-Indies*. The *Hamburghers* have alſo a Factory here, from whence they carry on ſome Trade with the *Antilles*.

The Products of this Iſle are but little, for though ſome Sugar and Indigo are gathered here, they would not be capable alone to ſupport the Inhabitants, if they found not in their Situation, a Reſource elſewhere, from whence to procure, not only a Support, but to ſet forward an advantageous Commerce, conſiſting principally in the Negro and contraband Trade carried on with the *Spaniards:* their having made their Iſle a free Port likewiſe greatly contributes to their Benefit, as it attracts the Buſineſs of all the illicit Traders in thoſe Parts. But now to return to the *Baltick*.

Of the Trade of COURLAND, PRUSSIA, *and* POMERANIA.

THE ſmall State of *Courland* has properly but one Port in the *Baltick* Sea, which is *Libaw*. *Memel*, at the Entrance of the Gulf of *Courland*, although it belongs to Ducal *Pruſſia*, I inſert it here, as it is between theſe two Cities that all the Trade of this Country is tranſacted, of which Wood and Grain make the moſt conſiderable Part. Linſeed ſhipped from hence in great Quantities is the moſt

moſt eſteemed of any in the North, whereof large Parcels are uſed in *Holland* for extracting its Oil, and in *France* and *Flanders* for ſowing; and this Trade is ſufficient to employ twenty-five Ships yearly in it from *Holland* only.

Konigſberg is the Capital of Ducal *Pruſſia*, ſeated on the *Pregel*, that falls into the *Triſchef*, called by ſome the *Hac*, a Sort of Lake that communicates with the Sea; but it is at *Pilau*, a conſiderable Fortreſs at the Entrance of this Lake, that the Veſſels at firſt arrive in their Way to *Konigsberg*, which is more than eight Leagues diſtant, and cannot be gone up by Ships drawing more than ten Feet Water. This Inconveniency, which occaſions great Expences, is followed by two others, *viz.* Strangers may not houſe their Goods in Order to wait a favourable Opportunity for their Sales; neither is the diſperſing them within Land by the Canals permitted, nor their Sales ſuffered to be made to any other tha n the Inhabitants of the City.

Beſides the Products of the Province, the *Pregel*, which has its Riſe in *Lithuania*, ſerves for Tranſportation to *Konigsberg* of that Country's and *Poland's* Products; ſuch as Pipe-ſtaves, Deal Boards, Wheat, Rice, Barley, Millet, Hides, Furs, Hemp, inferior to what is got from other Parts of the North, Flax, Wax, Honey, Tallow, Pot-Aſh and Wood Aſh; the Imports there are Woollens, Salt, moſtly from *France*, of which near eight thouſand Laſts are ſold here annually for the Conſumption of *Pruſſia* and *Lithuania*. The other Goods proper for this Commerce are Iron, Lead, Pewter, about one hundred Barrels of Wine, one hundred ditto of Brandy, and the ſame Quantity of Vinegar; Butter, Cheeſe, Sugar, Tobacco, chiefly *Clerac* and *Martinico*, of which a hundred thouſand Pounds may be uſed here yearly, Spice, and, as in all the Reſt of the *Baltick*, Rix-dollars.

Dantzick is, of all the Cities ſeated on the *Baltick* Sea, that where the greateſt Buſineſs is tranſacted. The *Viſtula*, on whoſe Borders it is built, near a League from its Mouth, conveys to it all the Merchandizes of *Poland*, whoſe richeſt Palatinates this River waſhes for more than one hundred Leagues in its Courſe, and ſerves to tranſport in Return thoſe foreign ones with which its Warehouſes are always well ſtocked. Ships drawing more than eight Feet Water cannot get up to the Canal, running from the *Viſtula* to the City, ſo that if they draw more, they muſt be lightened in the Road, which is an excellent one, and carry the Part of the Cargo ſo taken out in Boats.

The Magazines for Grain eſtabliſhed at *Dantzick* in an Iſland, partly formed by the *Viſtula's* Channel, are very famous in all *Europe*, and they certainly deſerve it, if there is no Exaggeration in the aſſerting, that they annually ſupply Foreigners with eight hundred thouſand Ton of Wheat. It is a Privilege of the Burghers, that they only are permitted to purchaſe the *Polanders'* Wheat, when once brought into their City; but on the other Hand they are obliged to take all that comes in, at a Price fixed by the Magiſtrates. Strangers here are ſubject to the Inconvenience, as at *Konigsberg*, of being debarred the Liberty to ſend their Goods within Land, or ſelling them to any others than the Citizens; but the Hardſhip is ſomething alleviated here, by the Permiſſion to houſe them till a favourable Opportunity offers for their Diſpoſal.

The Ladings of the *Engliſh*, *French*, and *Dutch* Ships for this City conſiſt of a Quantity of Cloths and Silks, Spice, Dying Woods, Drugs for that Uſe, and Medicines, *Italian* Cremor Tartari, Sugar, Oil, Paper, all Sorts of Hides, Salt, Wine, and *French* Brandy.

Wheat and other Grain, I have already obſerved, are the principal Exports from *Dantzick*; here are however many other Goods, that this Place furniſhes Trade with, of which the moſt conſiderable are Ships' Maſts, Oak and Deal for Carpentry, Flax, Pot-aſhes, Weed-aſhes, Honey, Wax, Tallow, Steel, Iron, Copper, Lead, Saltpetre, Pitch, yellow Amber, Beeves Hides, Skins, Wool, and *Poland* Salt, when the *Engliſh* and *Dutch* cannot have this Commodity from *France*.

Stettin, which is the Capital of Lower *Germany*, has the greateſt Share of the Trade of it, altho' it has other Ports, as *Stralſund*, *Wolgaſt*, and *Colberg*, this laſt in the Territories of his *Pruſſian* Majeſty, where ſome is tranſacted, yet but little in Compariſon with that of the firſt mentioned City; which is ſeated in the four Branches of the River *Oder* that preſerve its Name, and which falls into the *Baltick* about eight or ten Miles from it. Ships cannot go up to the City, but

are generally unladen at *Stenwert* or *Wolgaſt*, from whence the Goods are carried in Boats.

At *Stettin* are to be met with, not only the Products of *Pomerania*, but alſo thoſe of *Sileſia*, and the Marquiſate of *Brandenburgh*, brought there by the *Oder*, which partly croſſes them, and conſiſts chiefly in Grain, Ships' Maſts, Woods, Hides, coarſe Wool, Honey, Flax, and *Sileſia* Linens: Their Imports are Spice, Silks, Woollens, a large Quantity of Sugar, many Herrings, twelve to fifteen hundred Laſts of *French* Salt, a few Wines, leſs Brandies, and elſewhere, a good Fund of Rix-dollars.

Of the Trade of LIVONIA, *and its principal Cities.*

THE Poſſeſſion of this vaſt Province was a long Time diſputed between the *Muſcovites*, *Polanders*, and *Swedes*; but by the Treaty of *Oliva*, in 1660, it was divided between the two laſt Powers, to which a third may be added, *viz.* the Dukes of *Courland*, who enjoyed a Share of it, under the Protection of *Poland*. But the laſt War in the North, begun in 1699, diſpoiled the *Swedes* of it, after divers Events equally glorious to *Charles* XII. King of *Sweden*, and to *Peter* I. commonly called *Peter the Great*, Emperor of *Ruſſia*; though more fortunate in the End to this laſt, who remained in the Poſſeſſion of all *Swediſh Livonia*, and it is now Part of the *Ruſſian* Dominions.

The Peace concluded after the Death of *Charles* XII. killed at the Siege of *Chriſtianſtadt*, having adjudged *Livonia* to the Emperor, thereby in a Manner rendered him Maſter of the Trade of the *Baltick*, in opening to him the Ports of *Riga*, *Revel*, *Narva*, and *Pernaw*, whoſe Commerce is of ſo much the more Importance, as not only the Goods of the Country, but a large Quantity beſides, are brought here from *Ruſſia* and *Poland* in the Summer, by the Rivers on which three of theſe Cities ſtand; and in the Winter by Sledges.

Riga, Capital of the Province, is built on the *Dwina*, which, after traverſing a Part of *Lithuania* and *Livonia*, falls into the *Baltick* Sea, two Leagues below the City, where their Ships may get up to, if their Draught of Water does not exceed twelve Feet, otherwiſe they muſt be diſburthened.

The fitteſt Time for this Trade is that of the two Fairs, held yearly in *May* and *September*, where moſt Purchaſes are made in Rix-dollars, though ſome in Exchange for Goods brought there; but this Buſineſs is ſomething troubleſome to Strangers, as they are not ſuffered to unlade their Ships, till after having ſold their Cargoes to the Burghers; and would be much more ſo, where it not that this Law is often evaded by the Goods being cloaked under borrowed Names, lent, for the Lucre of a Commiſſion.

The few Goods laded for *Riga* conſiſt of *Rheniſh* and *French* Wines, hardly four hundred Barrels of the latter, Spice, Salt, of which from five to ſix thouſand Laſts ſell here yearly, Sugar, Tobacco, Vinegar, Paper, ſome Fruit, and Mercery Ware, though all theſe in ſmall Quantities. The Returns which the *Engliſh*, *French*, and *Dutch* get from hence are very conſiderable, the principal being Furs, of which there is annually brought down the *Dwina* more than a thouſand Boat loads, beſides what comes in the Winter on Sledges.

The Maſts from *Livonia*, which are very valuable, alſo Oak Plank for Shipping, Ton and Pipe Staves, in great Abundance, Deal Boards, Wheat, Hemp, Flax, and their Seeds, eſpecially the laſt for ſowing, and Oil, Pitch, Tar, Wax, Tallow, and excellent Aſhes for Glaſs or Soap.

Revel is almoſt equidiſtant from *Riga* and *Narva:* It was for ſome Time among the Number of the *Hanſeatick* Towns, but renounced their Alliance in 1550. Its Trade is always very great, but not like what it was before the *Engliſh* had diſcovered the Port of *Archangel* in the *White* Sea, and when it was the Magazine of the greateſt Part of the *Ruſſian* Products. Its preſent Exports and Imports are near the ſame with thoſe of *Riga*; to which I beg my Reader will be referred.

Narva, upon a River of the ſame Name, not leſs than the *Elbe*, has enjoyed for a long Time the Privilege of the *Hanſeatick* Cities; having been almoſt

ruined, and its Trade ceaſed for near a Century, it did not begin to recover its Credit till after the Middle of the ſeventeenth. *Olearius* remarks, that in 1654, they imported here at leaſt ſixty *Dutch* Veſſels, which laded more than the Value of five hundred thouſand Crowns in Goods; ſince which Time it has conteſted a Superiority in Trade with *Riga* itſelf, and carried it againſt *Revel*.

The Neighbourhood of *Novogorod* and *Pleſkou*, trading Cities of *Ruſſia*, from which laſt *Narva* is hardly forty Leagues diſtant, makes that of all this vaſt Empire eaſy to it; and it is the Paſſage by which almoſt all the Merchandizes which go even to *Moſcow* are tranſported.

The Commodities proper for *Narva*, or thoſe in which Foreigners inveſt their Returns, are the ſame as at *Riga* and *Revel*, and therefore need no Repetitions.

Pernaw, a ſmall City on a River of the ſame Name, was formerly occupied in no other Commerce than that of Wheat, which drew here ſome foreign Veſſels to lade it; but ſince the Means have been found of bringing down the River a Quantity of Maſts, not leſs valuable than thoſe of *Norway*, and a good deal of other Wood, its Trade is greatly increaſed; and ſince 1680, the *Dutch* have annually ſent here more than ſixty Ships inſtead of five or ſix, that they conſigned here before. Few Goods are wanted here, and almoſt all the Trade is carried on by the Intervention of old Rix-dollars.

Of the Commerce carried on at ARCHANGEL *and other Parts of* RUSSIA.

THE Trade of *Archangel* alſo comprehends that which may be tranſacted as far as *Moſcow*, by Means of the *Dwina* on which this City is built, or other Rivers with which this vaſt Empire abounds. Beſides the *Engliſh* and *Dutch*, who alone carry on more Trade here than all other Nations put together, the *French*, *Swedes*, *Danes*, *Hamburghers*, and thoſe of *Bremen*, have their Magazines and Correſpondents at *Archangel*. The Commodities fit for this Place may be ſeen in the Deſcription of the Trade of *Holland*, to which may be added *Bourdeaux* and *Anjou* Wines, three Quarters Red, and one Quarter White, Syrops, whitened Linen, Fuſtians, coarſe Cloth, and other light Woollen Stuffs, Ribbons, Hats, Jewels, Houſehold Stuff, and Artificers' Tools.

But of all the Merchandize there is none whoſe Sale is ſo ſure, or that turns to better Account than the Caſtor from *Canada*, which often ſells for ready Money, though this is ſeldom the Caſe with any others.

Furs are, as one may ſay, the Foundation of the Trade carried on with *Ruſſia*, and the Chief of its Exports; and although they do not differ in Quality from thoſe of *Lapland*, *Borandai*, and *Siberia*, of which I have already treated, yet they are to be found here in greater Quantities, on better Terms, and with leſs Riſque. The *Ruſſia* Leather, dry or ſalted Hides, Goat, Bear, or Wolf Skins; Hemp, Flax, Hogs' Briſtles, Fiſh Oil, Caviar, Tallow, Tar, Wax, ſalted Salmon, *&c.* are Commodities that *Muſcovy* yields, and of which the general Staple is eſtabliſhed at *Archangel*, which, ſince its being frequented by the *Engliſh*, and afterwards by other Nations, has carried away a great Part of this Trade from the *Baltick*, and particularly from *Revel*.

Of all theſe Products and Goods, the moſt eſteemed are the Hides of *Jeroſlaw*, the Honey and Wax of *Pleſkow*, the Tallow of *Fologda*, the Oil in the Neighbourhood of *Volga*, the Flax and Hemp of the great *Novogorod*, the Pitch of *Dwina*, and the Sables and other Furs of *Siberia*.

Aſtracan, a City under the Dominion of the *Ruſſian* Emperor, is ſeated at the Mouth of the *Volga* in the *Caſpian* Sea; the principal Merchants trading here are *Muſcovites*, *Tartarians*, *Armenians*, and *Indians*. All Sorts of Merchandizes may be ſold in the Morning at the Bazar or Market of the *Tartars*, where other Nations have the Liberty of carrying their's. After Noon the *Ruſſian* Bazar is held where the *Armenians* are equally admitted, and the *Indians* tranſact all their Buſineſs in their own Caravanſera.

Bratoffiena is a Village near to *Moſcow*, on the Side neareſt to *Archangel*, where Commiſſioners are eſtabliſhed to examine all Goods deſtined for *Moſcow*, which after

after being ſearched, and the Lead here put on them, are no more diſtributed till their Arrival at that City.

Burates, a Nation of *Muſcovite Tartary*, which inhabit along the River *Angara*, and the Lake of *Bekal*. They are rich in Cattle, particularly in Beeves and Camels, with which the *Muſcovite* Caravans that go to and from *China* are commonly provided here, paying their Hire in Goods, and not in Money, of which theſe People make no Account.

The Merchandize proper for this Place are black Sables, Pewter, or Copper Baſons; *Hamburghers'* red Cloths, Otter Skins, *Perſian* Silks of all Sorts of Colours, and Gold and Silver Ingots. The largeſt Ox hardly comes to four or five Roubles, and the ſtrongeſt Camel to ten or twelve, the Rouble on the Footing of five Guilders as in *Ruſſia*.

Jeroſlaw, a *Muſcovite* City on the River *Vologda*, where one of the greateſt Trades of all *Ruſſia* is negociated, principally conſiſting in Hides, Tallow, Linens, and Bruſhes.

Mokaira, a great Monaſtery, with a Village of the ſame Name, ſeated on the *Kerſimie* that falls into the *Volga*, a great River of *Muſcovy*.

This Place is famous for its annual Fair held here in the Month of *July*, and which laſts for fifteen Days. The Majority of the *Ruſſia* Merchants uſually attend it either to buy or ſell; and, for the Conveniency of Trade, here is a wooden Caravanſera built, where they lodge and retire their Goods.

Solowitzjoda is a *Muſcovite* City, celebrated for its Trade, where are many good ſubſtantial Merchants, and excellent Artificers, particularly in Works of Silver, Copper, and Ivory: It has alſo in its Neighbourhood many Salt Ponds, producing a great deal of that Commodity for Tranſportation to *Vologda*, and ſeveral other Places, even as far as *Archangel*.

Tomſkoi, ſubject to the *Czar's* Dominion, is a City ſeated on the River *Tom*, in *Muſcovite Tartary*; a great Trade is carried on from hence to *China*, by the *Cham* of *Buſuchtu*, and the *Buchares*, among which ſome *Ruſſian* Merchants mix. This Journey is made in three Months, and the ſame Time expended in their Return, but with an inexpreſſible Trouble, as every Thing muſt be tranſported on Camels, even Wood and Water in ſome Places; and it would be impoſſible for the *Ruſſians*, or any other foreign Nations, to perform this Peregrination alone, the Country being full of Robbers, who pillage all Paſſengers, except they are well accompanied or guarded.

I ſhall ſay nothing here of the Trade which the *Ruſſians* do, or might carry on by the *Volga* and *Caſpian* Sea to *Perſia*; by *Tartary* to *China*; and by the *Black* Sea to the Dominions of the *Grand Signor*, as the other Nations of *Europe* are but little concerned therein, except to account for the Riſe of *Peterſburgh*, a modern, and now very flouriſhing City.

Peter the Great, having formed an Idea of the vaſt Advantage his Empire might reap from ſecuring to it the Silk Trade of *Perſia*, in the Year 1722 appeared more confirmed than ever in his determined Endeavours to make himſelf Maſter of this Branch of Commerce, and in Order thereto, he took Poſſeſſion, as one may ſay, of the *Caſpian* Sea, and ordered a nice Chart to be made of it, where the Ports and Roads were very regularly deſcribed, particulary the Coaſts of thoſe Countries where Silk grew in the greateſt Plenty, ſuch as *Quilan*, *Schirvan*, and the Neighbourhood of *Schamachi*: In Effect, he accompanied an Expedition on that Sea, ſeized the City of *Andreof*, in the Province of *Dagheſtan*, and laid the Foundation of another large Harbour near *Derbent*, at the Bottom of the *Baltick*, in the Gulf of *Finland*, to which he gave the Name of *Peter's-Haven*, better known by that of *Peterſburgh*, reducing the Inhabitants of *Derbent*, to have Recourſe to him for Protection, and ſubmit to his Laws; and though his Project has partly failed, yet this Settlement, having been frequently benefited by the Court's Preſence and Encouragement, is in a few Years grown to be a conſiderable City, though not correſponding to the apparent Exaggeration of an anonymous Author, who ſaid, ſome Years ago, that it was likely to become as magnificent as *Verſailles*, as ſtrong as *Dunkirk*, and more flouriſhing in its Trade than *Amſterdam*.

However, through the great Encouragement given by the reigning Empreſs Catharine II. to Arts, Manufactures, and Commerce, the Splendour, Popularity, and Affluence of this City is daily increaſing; and, by her Attention to maritime Affairs, all Parts of her Dominions are in a State of Improvement, that muſt render the *Ruſſians* a formidable and flouriſhing People.

Shipmaſters, on their Arrival at *Cronſtadt*, have a printed Book of Directions given them, for their Regulation; and they are allowed the Duty of ten Rix-dollars, or what they will amount to, under that Sum, on ſuch Goods as are their own Property.

The Ton here in Freight, is 46 Poods on Leather, and on other Goods 36 Poods, 120 Pieces of Drillings, 60 Pieces of Sail or Raven Duck, Linens, 6, 8, to 10,000 Arſchins, *per* Ton, as in Fineneſs.

Of the Commerce of SWEDEN.

ALTHOUGH this Kingdom has always furniſhed *Europe* with its ſuperfluous Products, it was nevertheleſs regardleſs of its Trade, till Queen *Chriſtina* both protected and encouraged it, by the Advantages ſhe granted to, and procured for, this Nation; which till her Reign, ſeemed entirely to neglect Commerce, either by having its Attention drawn off, through its natural Propenſity to War, or the Effects of Sloth and Ignorance, which it would not be at the Pains of removing; but the Cruelty of the Duke of *Alva* made many to eſcape from the *Low Countries*, and take Sanctuary here, to which Fugitives *Sweden* owes the major Part of the Knowledge it has acquired in Trade; and their Eſtabliſhment was ſo ſucceſsful, as to encourage a great Number of *Walloons* to tranſport themſelves here, whoſe Language and Religion ſtill ſubſiſts in thoſe Places where they firſt ſettled.

They erected Forges and other Conveniences for caſting of Cannon, as alſo for the manufacturing of Iron Wire, and other Works of this Metal, Copper and Braſs, which their Deſcendents continue to this Day; but, notwithſtanding all this, the Navigation of the *Swedes* was but trifling, till their aforeſaid Princeſs, on concluding a Peace with *Denmark* in 1644, obtained from that Crown a Conceſſion, that all the Ships, and other Effects of her Subjects, ſhall pay nothing on paſſing the *Sound*; ſince which the *Swedes* have greatly increaſed in Shipping, and in the late War were the principal Carriers of *Europe*. The chief Articles of *Sweden's* Exports conſiſt of Copper, Iron, Pitch, Reſin, Maſts, Boards, &c. In Exchange of which, it takes from foreign Parts, Salt, Wine, Brandy, Draperies and other Stuffs,: Tobacco, Sugars, Spice, Paper of which they hardly conſume yearly two thouſand Reams in all the Country, Linen, Vinegar, Fruits from *Provence*, ſome Mercery, and divers other Commodities.

The Trade, which the *Swedes* have with *Portugal*, is that which they can leaſt be without, as the Kingdom chiefly ſupplies them with the great Quantities of Salt they uſe; though their Commerce with *England* yields them much more Profit in taking off near half their Products, and bringing them almoſt two-thirds more of their Value, in Silver than in Goods. The leaſt is that tranſacted with *France*, as this rather ſerves to feed their Vanity, than ſupply their Needs, and conſumes but very little of the Country's Manufactures or Growth.

It is at *Stockholm*, that almoſt all the Traffick of *Sweden* is negociated; Foreigners not having the Liberty to trade in the *Bothnic* Bay, nor the Subjects of his *Swediſh* Majeſty, to bring their Goods only to this the Capital, whoſe Port is deep and ſecure, though the coming in, and going out, long and dangerous.

The *Swedes* themſelves tranſport the beſt Part of their Commodities, in their own Ships, to *Holland*, *Spain*, and *Portugal*, and ſome few proceed to *France*, to lade Wine, Brandy, and Salt. But the *Engliſh* and *Dutch* are the People who carry on the greateſt Trade with this Country; the firſt by their Woollens, and the latter with their Spices: though that of the *Dutch* is however the moſt conſiderable, eſpecially ſince they have in ſome Meaſure rendered themſelves Maſters of the Copper Mines, and of the Pitch and Tar made there, by the great Loans they advance to the Farmers of the former, and to the Merchants of the other

Materials ſo neceſſary to Navigation, inſomuch that theſe Commodites are to be met with almoſt as cheap at *Amſterdam* as *Stockholm*.

Strangers are permitted to deliver their Goods at *Stockholm* without paying any Cuſtoms but in Proportion as they go ſelling, and may, if they find no Vent here, relade them for another Market, on the Payment only of Half *per Cent.* Duty. I have already mentioned, in the Section of this Country's Trade with us, the Merchandize we import from thence, and ſhall only add a Remark here concerning Copper, whoſe Purchaſe is always made with ready Money; that it is better effected in Winter than Summer, as in this laſt Seaſon it is only to be had at ſecond Hand, ſo that conſequently in the former it may be procured beſt and cheapeſt.

The cultivated Lands of this Kingdom are fertile enough, though the major Part have but little Depth; barren Soils manured with the burnt Aſhes of the Trees that grow here often produce a very abundant Crop, without any other Tilling or Improvement than the bare covering of the Seed. If the Inhabitants were induſtrious beyond what mere Neceſſity forces them to, it would not be difficult for them to raiſe a Sufficiency of Grain, at leaſt to ſupply their Wan s; but by their Miſmanagement they cannot ſubſiſt without Supplies from *Livon a*, and other Parts of *Germany* bordering on the *Baltick*, which however are of no Service to the poor People, who live diſtant from theſe commercial Reliefs, and are obliged, in a Dearth, to grind the Grain of Beech Trees' Bark, and make it into Bread.

The Wool which their Sheep produce is extremely coarſe, and can only ſerve to make Clothing for the Peaſants; their Horſes are ſmall, eſpecially in the Duchy of *Finland*, but they are hardy, ſtrong, and vigorous; here are a Quantity of ſavage Animals, of which the Natives hunt and eat the Bears, Elks, Deer, &c. and take the Wolves, Foxes, wild Cats, and ſome others, for their Furs.

The principal Lakes of *Sweden*, are the *Weter*, *Wener*, and the *Meler*, which, with many others, are not ill provided with Fiſh, ſuch as Salmons, Pikes, Perch, Tench, Trout, Eels, and ſeveral other Sorts unknown elſewhere; here is, above all, an infinitude of *Streamlings*, a Fiſh ſmaller than a Herring, which are ſalted in Barrels, and diſtributed all over the Country: And beſides theſe the *North-Bottom*, or the Bay that ſeparates *Sweden* from the Duchy of *Finland*, is ſo abundant in Seals, that a large Quantity of Oil is extracted from them, and tranſported to divers Places. In the Lakes of *Finland*, vaſt Nnmbers of Jack are taken, of which, ſome are ſalted, and others dried, and afterwards ſold to very good Advantage.

Among the Mines of this Kingdom there is one of Silver, which is about one hundred and forty-five Braces deep, and yields, after great Labour and Trouble, near the Value of twenty thouſand Crowns of fine Silver yearly; though this is not above Four *per Cent.* Profit. The Profundity of the Copper Mine does not exceed eighteen Braces; it is of a very great Extent, but ſubject to Damage from Time to Time, by the falling in of the Vault, which however is not all Loſs, as the Minerial procured from this Rubbiſh makes ſome Amends, though the Detriment of this Occurrence is always conſiderable. The Copper that is annually extracted from this Mine produces about two hundred thouſand *French* Livres, of which the King has one fourth Part, beſides twenty-five *per Cent.* on all the Ore carried away uncleanſed; and he has the Preference of all the Silver to take it at one-fourth Part leſs than its Worth.

The Mines and Forges of Iron are here alſo very numerous, eſpecially in the mountainous Parts, where there are commodious Water-falls to turn the Mills, ſo that, beſides the Iron uſed in the Country, there is yearly exported for near the Value of three hundred thouſand Livres. At *Stockholm*, and the Caſtle of *Jencopingh*, near the Frontiers of *Denmark*, are large Magazines filled with this Metal, brought from *Oerbro* in *Nerva*, as Opportunities offer, and of which they are continually making all Sorts of Fire-Arms. For what regards theſe Mines, there is beſides the Inferior-Courts, and Officers eſtabliſhed in many Places, a general one, called the *College of the Mines*, which has its Seſſions, or Aſſemblies, at *Stockholm*, of which the Preſident of the Treaſury is generally the Chief, aſ-

ſiſted by a Vice-Preſident, and other Aſſeſſors; the Laws are in this more exact and circumſtancial, than thoſe for any other Affairs, and Juſtice is commonly adminiſtered here with a great deal of Care.

This Nation has no Settlements in *America*, though the Great *Guſtavus Adolphus* had projected a Company for the other *Indies*; and his Letters Patent given on this Occaſion, the 14th of *June*, 1626, are yet extant, by which he invited his Subjects to an Engagement in it; but the Wars which rendered him ſo famous, and wherein he ſacrificed his Life in the Arms of Victory, hindered the Execution of his Scheme, which died with him, as it is not known that any of his Succeſſors followed it; at leaſt it was never till lately put into Execution; it is true, that in the Reign of *Chriſtina* his Daughter, ſo known and celebrated for her Love of the *Belles Lettres* and her Abdication of the *Swediſh* Crown, her Subjects attempted ſome Settlements in the *Weſt-Indies*, where they ſent a Colony, and called their Eſtabliſhment *New Sweden*, and the City they built there *Chriſtina*; but this laſted not long, as they were driven out by the *Dutch*; and no other Eſtabliſhments have been made, or Charters granted, either in *Aſia* or *America*, till the 4th of *June*, 1731, when his *Swediſh* Majeſty founded a Company, by Letters Patent in Favour of *Henry Koning*, and his Aſſociates, whoſe chief End was to commence and regulate a Navigation and Trade to certain Parts and Places in the *Eaſt-Indies*, where the other Powers of *Enrope* had not acquired any Juriſdiction or particular Right of Trade. This Patent gives the ſaid Company a Liberty to ſail to, and trade in all Places beyond the Cape of *Good-Hope*, where other Nations have a free Commerce, for the Space of fifteen Years, but they are not to extend their Trade to any Port belonging to other *European* Princes or States without their Leave. The Ships employed in this Trade ſhall always ſail from *Gottenburgh*, and return there to unlade; and the Company ſhall pay the King and Crown, during the ſaid fifteen Years, *a hundred Dalers Silbermunt per Laſt*, for every Veſſel they employ and lade for the ſaid Traffick, according to their Size; for which Purpoſe they ſhall be meaſured before their Departure from *Gottenburgh*, and this Impoſt to be laid in *Carolins* in Specie, ſix Months after their Return; and the Company ſhall alſo pay for the Goods they ſhall bring from the *Eaſt-Indies*, *two Dalers Silbermunt per Laſt*, in Lieu of the City Duties. The Company may fit out what Number of Ships they think proper, on Condition that they be bought or built in *Sweden*, and furniſhed there with all the neceſſary Materials, provided ſuch Ships and Materials are to be had there; but, if not, the Company has Liberty to procure them where moſt convenient; only to regard benefiting the Fabricks, Products, and Manufactures of *Sweden* all poſſible. The ſaid Ships ſhall carry the *Swediſh* Merchant Colours, and be provided with Commiſſions ſigned by his Majeſty, and Paſſports from *Algiers*. The Company may employ in their Trade what Funds they judge convenient, and raiſe them either by Subſcription, or otherwiſe, as they think proper; they may alſo put aboard their Veſſels what Guns and Ammunition they ſhall want; all Sorts of Merchandize, and Products, Silver coined, or otherwiſe, excepting the Specie of the Country, bearing the Arms of his Majeſty of *Sweden*; and in like Manner may bring back, unlade, and ſell, whatever Goods they will. The Ships not to be ſtopped from ſailing, or hindered coming into Port on their Return on any Pretext whatſoever. The Wood and Materials which the ſaid Company ſhall tranſport from one Part of *Sweden* to another, or from any foreign Place, for the Conſtruction or Refitting of their Ships, ſhall be exempt from all Duties, as their neceſſary Proviſions and Stores ſhall be, provided that after their Declaration at the Cuſtom-houſe, and put under Lock and Key at the Company's Warehouſes, till the Time of their embarking, they pay the Cuſtom-houſe one-eighth *per Cent*. Recognition. But for the Products and Fruits of *Sweden*, wherewith the Ships may be laden from *India*, they ſhall pay the cuſtomary Duties, according to the Tariff, as alſo thoſe of the City. The ſtopping of the Goods brought home, on carrying from the Ships to the Magazines, or from one City to another, is prohibited after Payment of thoſe before ſtipulated to the King. The Captains ſhall, for the Diſcipline of the Sailors and Soldiers, have the ſame Authority as Commanders of the King's Ships, though they ſhall conform to the Company's

Company's Inſtructions in every Particular relative to their Navigation and Trade, provided they are in nothing contradictory to this preſent Grant. None of the Equipage of the ſaid Ship ſhall be forced into the King's Service, nor that of any other whatſoever: But it is not permitted to employ other Soldiers or Sailors who have deſerted his Majeſty's Service. They have a Faculty to arreſt, by the Magiſtracy of the Place, all Soldiers or Sailors who ſhall have run away, before the Time elapſed that they had engaged for. The Ships having delivered and ſold their homeward-bound Cargoes, the Purchaſers ſhall pay no Exports, or any other Duties, whether they ſend the Goods to ſome other Port in *Sweden*, or directly to a foreign one, except one-eighteenth *per Cent*. called Recognition. The Direction of the Company ſhall always conſiſt of at leaſt three Perſons of Experience and Probity, who are to be either born or naturalized in *Sweden*, and Reſidents there; and the ſaid Company may make ſuch Regulations as they ſhall judge convenient, provided they are not contradictory to the Articles of this preſent Privilege. The Company may appoint what number of Supercargoes, Officers, Sailors, Soldiers, *&c.* they ſhall deem neceſſary, whether Natives or Foreigners, which latter ſhall enjoy the ſame Privileges as *Swediſh* Subjects. To the Stock of Strangers, or others intereſted and engaged in the ſaid Company, ſhall not be arreſted on any Pretence whatſoever; and his Majeſty will naturalize all ſuch as ſhall apply for it, according to their Quality and Condition. If it happens that the Company, or thoſe employed by them, be moleſted, ill uſed, or hindered in their Trade by any one, or in any Part of the World whatſoever, his Majeſty grants them full Power to obtain Satisfaction, and do themſelves Juſtice by every convenient Means, and to repulſe all Violence; regarding thoſe as Pirates and publick Enemies who offer it, his Majeſty willing that the ſaid Power be expreſsly inſerted in all the Commiſſions he ſhall ſign; and if, contrary to all expectation, the ſaid Ships ſhould be attacked or taken, his Majeſty, after having examined the Injury done them, and found that they had in nothing acted contrary to the firſt Article of this Charter, will grant them his Protection, and ſufficient Power to obtain Juſtice, and an entire Indemnity, either by Way of Repriſals, or in the ſpeedieſt Manner poſſible. All other Subjects are prohibited, during the ſaid Term, to carry on any Trade to the *Eaſt-Indies*, on Penalty of his Majeſty's Diſpleaſure, and Confiſcation of their Ships, Effects, *&c.* His Majeſty promiſes to change or augment the Privileges contained in the preſent, if it ſhall be found neceſſary, for the Promotion of the ſaid Commerce. Given at *Stockholm* at the Senate, *&c.*

Of the Commerce of SWITZERLAND *and* GENEVA.

THE *Swiſs*, ſo famous for their Candour, Fidelity, and Bravery, are alſo equally celebrated for the Trade which the principal Cities of their Cantons tranſact with Strangers. The Situation of their Country between *France*, *Germany*, and *Italy*, joined to the profound Peace they have always enjoyed, and to the Facility of Tranſportation, by Means of the Rivers *Rhine* and *Rhône* that flow from their Territories, occaſions their Traffick with thoſe States, and the *Low Countries*, to be very conſiderable, eſpecially in Time of War, between the Powers who poſſeſs them. By the *Rhine*, *Switzerland* has a Communication with the Ocean; by the *Rhône* with the *Mediterranean*; and it may be ſaid, that it even makes the Communication of the two Seas; ſince that of the *Rhine* may be gone up as far as *Seyſſel*, ſeven Leagues from *Geneva*, where the Goods embarked for *Morges* are tranſported to *Yverdun*, and from thence go by Water even to *Holland*; there being a Canal of Communication between *Morges* and *Yverdun* begun, and which may be finiſhed at a ſmall Expence.

Within Land, the Tranſportation of Goods from one Place to another is eaſily performed by Means of the Rivers with which it abounds, notwithſtanding the Mountains croſs the Country in many Places.

Switzerland is in no Lack of any Commodity neceſſary to the Support of Life; Wood, Corn, Wine, Cattle, Sheep, whoſe Wool may be employed in making

Clothing, and Flax, are here in great Abundance; ſo that Salt in Part is their only Want; but the *Tirol*, *Franche-Compté*, and *Bivaria*, are forward to furniſh it, ſo that this Article is not an Object of Commerce, being one of the Revenues of the State, who alone manage this Buſineſs, and ſell this Commodity at a very moderate Price: Some Time ſince a Mine of Rock Salt was diſcovered near *Aigle*, in the Canton of *Berne*, on the Frontiers of *Valay*; but this, at moſt, can only furniſh one-third of what is neceſſary for the Country of *Vaud*.

France furniſhes towards the general Imports of this Country, Salt from *Franche-Compté*; Wine from *Burgundy*; Gold, Silk, and Silk Manufactures from *Lyons*; and many light Woollen Stuffs, made in the Provinces bordering on the Cantons.

It has from *Germany* all Sorts of Mercery, and particularly from *Nuremberg*, a great Quantity of Hard-ware; and Hides from *Francfort*.

Italy, eſpecially *Piedmont*, ſends it ordinary Silks, Organzines, and Fleurets, ſpun, unſpun, or raw. And *Holland* ſupplies it with Cloth, Serges, Flannels, Calimancoes, painted Linens, Muſlins, Cambricks, Cotton, Ivory, Dying and Medicinal Drugs, Spice, Tea, Chocolate, Whalebone, *Ruſſia* Hides, and *India* Silks.

If we examine what *Switzerland* imports from foreign Parts, eſpecially from *France*, it will be found that it is Luxury more than Neceſſity obliges it to have Recourſe there; ſo that ſome Cantons, convinced of this Truth, and perſuaded that good Magiſtrates ought to endeavour as much as is dependent on them to eradicate this Vice, have enacted ſumptuary Laws, prohibiting Jewels, and the Uſe of all Gold and ſilver in their Furniture, or in their Clothes; Silks of an exceſſive Price, and even the Entry of foreign Wine, is very ſeverely forbidden in the Canton of *Berne*, which Laws are regarded as a Means to hinder the Coin from going out of the Country.

The Commodities which either the Growth or Manufactures of *Switzerland* produce, are various, according to the different Genius of the Natives in their reſpective Situations, which I ſhall deſcribe, and begin firſt with *Zurick*, Capital of the chief Canton, which is ſeated on a fine Lake very abundant in Fiſh, from whence the *Limmat* flows, that divides the City into two Parts, whoſe Communication is by two fine Wooden Bridges. Although *Zurick* has but few Bailliages, it is one of the richeſt Cantons, by the Trade and Fabricks which its Inhabitants have attracted and ſet up among them, and which have flouriſhed beyond their moſt ſanguine Expectation. It is certain, that the *Zurickers* have a Genius that qualifies them for Imitation, and the Peaſants a Patience and Attachment to Labour, which aſſiſts them marvellouſly in it; and as they work cheap, it is a conſiderable Advantage to them, and recommends their Goods to a ready Sale: Thus, though the Merchant and Artificer gain but little, *Zurick* poſſeſſes great Riches, a plain Indication of the good Effects that Manufactures, and Diligence in them, produce.

Commerce is, properly ſpeaking, the Buſineſs of *Zurick*, the particular Object of its Induſtry, and the determined ruling Taſte; the moſt conſiderable Men of the City do not diſdain to intereſt themſelves in Trade, but apply to it with the ſame Diligence as the inferior Citizens; and their great Riches never render their Aſſiduity, Patience, and neceſſary Labour, to augment their Manufactures, andperfect their Works, irkſome; this is what makes their Republick flouriſh, andthat has raiſed it to the Degree of Power it at preſent poſſeſſes.

The Silks and Organzines which the *Zurickers* buy yearly in the *Trentin*, *Italy*, and *Piedmont*, to twiſt or throw, employ a great many People, and the Sale which they afterwards have for them in *England*, *France*, *Holland*, and elſewhere, is very conſiderable; they alſo employ great Quantities of Silk in their own Manufactures, wrought ſeparately in ſeveral Stuffs, Handkerchiefs, Crapes, *&c.* mixed with Worſted, Cotton, Thread, or Ferret; large Parcels of Cotton are alſo ſpun here, for the aforeſaid Fabricks; Cotton Linen is made for Printing, as are Stockings and Handkerchiefs of the ſame Material, the fineſt being wrought into Muſlins; and towards the End of the laſt Century, the Art of drawing Gold and Silver Wire was introduced here.

Winterthour is a privileged City of the aforeſaid Canton, whoſe various Manufactures have brought it into great Reputation and Trade; here are made Muſlins, Cravats, Handkerchiefs, Cotton, Cloth, Woollen Crapes, Callimancoes, Sattins, Damaſks, and Camlets, in Imitation of the *Engliſh*. The Cotton is ſpun here, where they alſo dye well.

Zurzach is rendered noted for its two Fairs held here at *Pentecoſt* and *St. Verena*, at the End of *Auguſt*, which attract a great Number of Merchants from divers Countries: And

Schaffhouſe is the twelfth Canton, and the Staple for Steel, Copper, Lattin Wire in Rolls and Bands, which the *Swiſs* get from *Stiria*, *Salzbourg*, *Hungary*, &c. many Things are caſt here, and a Variety of Works eſtabliſhed, of Buttons, Trimmings for Bridles, Coach Harneſſes, and Cottons printed; though its Trade is very different from that of *Zurich*, except in the aforeſaid Articles, as it furniſhes but little to the other Cantons. It is not large, but the Soil very good and fertile in Wheat and Fruits, abundant in Paſturage, and produces excellent Wines.

Berne; for to give ſome Idea of the Trade of this City and Canton, which is the biggeſt of all, it will not be improper to repreſent to my Reader its Fertility in Grain Wine, Paſturage, Rock Salt, and Iron Mines.

The Commerce of Horſes and other Cattle, brings in here large Sums of Money: That of Grain is a principal Article: The White Wines of the Coaſt and the *Vaud* are very much eſteemed; of which the Cantons of *Fribourg*, and *Soleure*, conſume a great deal. Its Manufactures conſiſt in the ſpinning of Silk Ferret, which employs more than four thouſand Perſons; in Linens and Hempen Cloths of all Sorts, Dimities, Cotton Cloth for printing, Silk Stuffs, and others with Silk and Cotton, Flannels, Cotton and Wool, Cotton and Thread, Silk, Worſted, Cotton, and Thread Stockings, Ferrets, Tapes, and fine Paper. The greateſt Part of theſe Manufactures owe their Eſtabliſhment to the *French*, who in the Capital found an Aſylum from their Perſecution, and Succours beyond their Hopes. The Ferret and Thread find a Vent in *France*, *Germany*, and other Parts of *Switzerland*; the Linens and Table-cloths, of which here is made a prodigious Quantity, ſell in *England*, *France*, *Spain*, and *America*; theſe being the fineſt and beſt of any wrought in all the Cantons. The Dimities are very like thoſe of *Holland* and *Flanders*; many of the Cotton Cloths are printed in ſeveral Fabricks, as well in the City, as other Places of the Canton, and the Reſt are ſold for the ſame Uſe to *Geneva*, *Neufchatel*, *Morat*, and *Bale*.

The Stocking Weavers get their Wools from *Leipzig*, which they have ſpun in the Manner as to make Stockings of two, three, and four Threads, ſold chiefly in *Italy*, where their Beauty and Goodneſs has brought this Fabrick into great Eſteem. The Silks manufactured here ſerve principally for the Conſumption of the Cantons, among whom it ſtands the ſecond in Rank, though in Bigneſs it is one-third of the whole. It has many conſiderable Towns and Places ſubject to it, where divers Manufactures are eſtabliſhed, or ſome Trade carried on; the Chief of which I ſhall juſt mention.

Bourgdorff is a Town engaged in a pretty conſiderable Traffick with Linen, Thread, and Hemp. Its Markets are frequent, and it abounds in Whitſters, having beſides ſeveral good Fabricks of Cutlery Ware.

Langtall, is a large Village, famous for its Sales of Linens, Thread, Hemp, and Flax. The *Swiſs* Merchants make very conſiderable Purchaſes here of Linen, as they come out of the Looms, Tape and Laces.

Araci, a fine Town ſeated on the *Aar*, has ſome Manufactures of Worſted Sattins, and Camlets, knit Stockings, Cotton Handkerchiefs, Cutlery Ware, and Horn Combs. Hides and Skins are alſo prepared here for various Uſes; and its Neighbourhood furniſhes a Quantity of Hempen and Cotton Cloth.

Lintzbourg, a Town in the Neighbourhood of *Arau*, is ſituated on a little River, and has a Manufactory for printing Linens; Cotton is ſpun here, and a large Quantity of Cloth made of that Commodity in this Bailiwick, which is one of the richeſt, and the moſt conſiderable in the Canton; where is alſo a Fabrick of Hats, and Woollen knit Stockings.

Zoffingue is a tolerable large Town, with many Privileges, and furniſhes Trade with ſeveral Articles from its Fabricks, ſuch as Flannels, Silk Ribbons, and Ferrets, various Sorts of Cloth made with Cotton and Wool, ſeparate and mixed; Cutlery Ware; and here are alſo very good Linen Printers and Dyers.

Bruck, a Town on the *Aar*, is one of the great Paſſes for Goods both by Land and Water; the River here is very deep, and ſhut in above the Town among Rocks, that render its Courſe extremely rapid, forming an Elbow called the *Fall of Bruck*, which was formerly eſteemed very dangerous, but now the Boatmen do not regard it as ſuch: In the Town and Neighbourhood ſome Woollen Stockings are knit, and here are alſo ſeveral Looms for weaving them.

Beſides the Towns dependent on *Bern* afore-mentioned, ſeated in the Country of *Allemand*, there are others in the Country of *Vaud*; the moſt noted of which I ſhall now add.

Lauſanne, the capital Place of the *Vaudois*, near the Lake *Leman*, is more celebrated for the Nobility who reſide here, and for the Learned, who have adorned and ſtill adorn its Academy, than for the Extent of its Trade. There are but few Parts, that in equal Limits encloſe ſo much Gentry: And Commerce would flouriſh here, as it is one of the fineſt and moſt fertile Countries in *Europe*, if the Nobility had not imbibed the falſe Notion, of its being derogatory to their Honour.

At this Place, however, are made ſome Ratines, wove Stockings, fine Earthen and Delft Ware; but above all the Bookſeller's Trade, and Printer's Art, flouriſhes here in a great Degree, and is daily improved.

Ouchy, on the Borders of the Lake, half a League from *Lauſanne*, and which ſerves for its Port, is the Landing Place for Goods coming from *Milan* and *Valais*, by *Vevay*. Here are Halls built purely for the Reception of Merchandize, which may alſo be brought here from *Geneva*, if deſtined for *Switzerland*.

Vevay, a pleaſant Town, ſeated on the Lake *Leman*, half a League from the *Alps*, maintains an extenſive Commerce with *Valois*, *Savoy*, *Piedmont*, and the *Milaneſe*, from whence it gets a good deal of Rice. This is the Staple of the Merchandizes that come from thoſe Countries, or that *Switzerland* ſends thither; here is a Fabrick of Hats, Woollen Stockings, and ſome Works of Horology. Its Fairs are very frequent by the Reſort of *Savoyers*, *Valaiſans*, and *Montagnards*, and are above all conſiderable for the Sale of Cheeſe, from whence *Geneva* and *Lyons* are partly ſupplied. *Vevay* is at preſent rich and populous, and its Inhabitants enjoy the Franchiſe in *France* granted to the *Swiſs* Nation: In its Neighbourhood are Quarries of fine Marble, and they have eſtabliſhed there Water Saws, which greatly facilitate the Works, ſo that ſix may operate at the ſame Time on one Block, which has put the Undertakers in a Condition to furniſh very cheap Marble, for inlaying Porticoes and Halls, according to the modern Taſte, and alſo to compoſe Chimney Pieces, *&c.* which they do in a very great Manner.

Morges, a Town alſo ſituated on the Borders of the ſaid Lake, two Leagues from *Lauſanne*, is well built, and has a good incloſed Port. This is the Receptacle of Goods from divers Countries, that arrive here by Water and Land; the *Genevan* Barks tranſport here weekly the Merchandize that the *Swiſs* get from *Italy*, *Piedmont*, *Savoy*, *Dauphiny*, *Lyons*, *Languedoc*, *Provence*, and *Bourdeaux* by the Capital of *Languedoc*, and relade thoſe which are arrived from *England*, *Holland*, the *North*, *Germany*, and *Switzerland*, deſtined for *Geneva*, *Piedmont*, *Italy*, *Spain*, and the *Southern* Provinces of *France*.

Nyon, built in the ſame Manner as the two preceding Places on the Banks of the Lake *Leman*, is a great Paſs for Goods that this Town, *Valais*, and the *Milaneſe*, export from ſeveral Provinces of *France*. Its Soil is as proper for Vines, as that Part of the Country of *Vaud*, bordering on the ſaid Lake, which produces thoſe good Wines on the Coaſt and *Vaud*, that are ſo much eſteemed; of which the Trade of theſe latter in *Switzerland*, and thoſe of the Coaſt in foreign Countries is very conſiderable.

Copet, a ſmall Town two Leagues from *Geneva*, is noted for Clockwork, and its large Fiſhery.

Yverdon, a very agreeable Town, on the Weſtern Extremity of the Lake of *Neufchatel*, is a conſiderable Staple, or Depoſit for Wine, Salt from *Roche* and *Savoy*, and other Merchandize, for whoſe Reception here are large Halls built, which ſerve for no other Purpoſe. Its chief Trade however is that of Wine, and Delft Ware made here.

Avenches, on a Hill near the Lake *Morat*, was the Capital of the Country of the *Helvetians*; it has a moſt delightful Situation, and here are found ſome good Remains of Antiquity. It is a great Paſs, and ſome Years ſince, the Natives have made ſome Plantations of Tobacco, which, with thoſe of *Payerne*, and its Neighbourhood, very nearly furniſh a Sufficiency for the Canton's Conſumption, and produce a conſiderable Revenue to the Inhabitants, whoſe Soil being very fertile, is likewiſe abundant in Grain and Fruits.

Payerne, a Town of the Country of *Vaud*, ſeated on the *Broie*, between *Avenches* and *Moudon*, is a very large Paſs. Its Territory is very fertile in Grain and Fruits, and here are fine Plantations of Tobacco, out of which the Inhabitants prepare the Rappee, after the Secret of *Clerac*, which is in Eſteem both at Home and Abroad.

Moudon is an ancient Town built on the aforeſaid River *Broie*, fruitful in Corn, and a very conſiderable Paſs for Merchandize by Land.

Morat, ſituated on the Lake of the ſame Name, is the Staple for all the Wine of the Country of *Vaud*, ſent to *Berne*, and a great Paſs for Goods, both by Land and Water. Linens are printed here, and the Town is dependent on *Berne* and *Fribourg*.

Granſon, ſeated on the Borders of the Lake of *Neufchatel*, at a League from *Yverdon*, is alſo under the Dominion of *Berne* and *Fribourg*, and is the Staple of Salt from *Franche-Compté* for *Switzerland*, in whoſe Neighbourhood is a good Paper Fabrick at a Place called *La Mothe*.

Lucerne is a Town built to the North of the Lake, at the Port where the *Ruſs* iſſues, which enters the *Aar*, below Bruck, in its Way to the *Rhine*; here are divers Manufactories of Hempen, Flaxen, and Cotton Cloths, Fuſtians, Cotelines, Woollen knit Stockings, and ſpinning of Cotton throughout all the Canton, which abounds in Grain and Paſturage. It alſo breeds large Herds of Cattle, with which the Natives drive a great Trade, as they do in Cheeſe for the *Milaneſe*, from whence the *Swiſs* receive in Return large Parcels of Rice.

This Town has an advantageous and convenient Situation, as being on the grand Route to *Italy*, by Way of *Monte St. Godard*. And the Goods which have croſſed the *Alps* are tranſported from hence, by the Lake and River *Ruſs*, to the *Rhine*, which conveys them to the Ocean. The ſmall Cantons that want Corn, provide themſelves here with great Facility, the Lake waſhing thoſe of *Uri*, *Schwitz*, and *Underwald*.

Uri is a Canton in the Vallies of the high *Alps*, and abounds in excellent Paſtures; its principal Revenue conſiſts in Cattle, and its Cheeſe finds a ready Sale in *Lombardy*. At *Altorf*, a chief Borough of the Canton, is eſtabliſhed a Fabrick for cutting and poliſhing Cryſtal, of which here are very fine Mines, and the Canton produces ſeveral Sorts of Linen for various Uſes.

Schwitz; in this Canton are made Linens of Hemp and Flax, but Cattle and Cheeſe are the two great Branches of their Trade.

Underwald has a Revenue and Trade ſimilar to the laſt-mentioned, with the Addition, that here the Natives ſpin the Thread they uſe in manufacturing their Linen.

Zug is one of the moſt agreeable of the ſmall Cantons, and its principal City with the ſame Name is well built, ſtanding on the Lake called alſo *Zug*. The Country produces Corn, Wine, a great many Cheſnuts, and has excellent Paſtures; beſides which here are Manufactures of Linen and Woollen Stuffs.

Glaris, the capital Town of the Canton, furniſhes green Cheeſes, renowned for their Goodneſs and medicinal Virtues given them by a certain inſerted Herb, which alſo produces their Colour, and they are called by the Inhabitants *Schabziguer*. Its Slate Quarries are reputed the fineſt in *Europe*, and furniſh the Tops of Tables of a ſurpriſing Bigneſs. This Canton is rich in Cattle, and the Inhabitants very laborious; here is a great deal of Cotton ſpun; Part ſold, and the Remainder employed

employed in the Manufactures of *Switzerland*; and ſome Linens and Stuffs are made here according to the Cuſtom of the Country.

Baſil is a City built on the *Rhine*, which divides it into two unequal Parts; it is one of the moſt conſiderable of *Switzerland*, although properly out of it, and drives a Trade unequalled by any in that Country. Its Situation procures it the Paſſage of the Goods that come from *England*, *Holland*, the *North*, and *Germany* for the Cantons and *Geneva*, and for thoſe which the *Swiſs* and *Genevans* ſend to thoſe Countries; the Trade of the Wools of *Germany* and *Poland*; that of Cloth and other Stuffs, Drugs and Spiceries, Metals and Furs, is very conſiderable here, as are the Engagements in Exchanges: The Activity and Penetration of its Inhabitants have long ſince rendered it noted for Trade, particularly for Linens, whoſe Fabricks are in a flouriſhing Condition. It has alſo ſeveral Manufactures of flowered Ribbons, which employ a great Number of Workmen, and are ſpread through *Germany*, *Sileſia*, *Hungary*, and *Bohemia*. The Fabricks of wove Stockings, Silk ditto, and worſted, ſet a great Number of Looms to Work, whoſe Products are ſent very diſtant to be diſpoſed of. The Manufacture in Imitation of Chintz is brought to great Perfection, and does not only ſupply the neighbouring Merchants, but many others much farther off. The Paper of this City has been long noted for its Goodneſs; and here are Letter-Founders, not only of the Characters of the living Languages, but alſo of *Greek* and the *Oriental* Tongues, which are uſed all over *Switzerland*, in *France*, *Germany*, and elſewhere; Printing is likewiſe a conſiderable Part of the Buſineſs of the Inhabitants, among whom are alſo found Gold-Beaters, very expert in their Art, Fabricators of Tobacco, excellent Dyers, both of Silk and Wool, Whitſters, *&c.*

St. Gall is a fine large City ſeated two Leagues from the Lake *Conſtance*, in a narrow barren Valley, whoſe Soil produces nothing but Graſs, notwithſtanding which, moſt of the Inhabitants are rich, at leaſt very few of them ſtraitened in their Circumſtances; their Wealth flowing in with their great Trade, which chiefly conſiſts in Linen, whoſe Conſumption is very extraordinary all over *Switzerland*, and abroad. This Buſineſs is ſo conſiderable as to place the Weavers in ſome Reſpects on a Level with the Nobility; as they with the Gentry make the firſt of the twelve Tribes, of which this City is compoſed. The Manufactures of Woollen Stuffs are here alſo in a flouriſhing Condition; beſides which, this City being ſo near the afore-mentioned Lake, and on the Road from *Germany* to *Italy*, it ſerves as a Channel of Communication between them; and its Halls are the Warehouſes for Goods that go and come.

Fribourg is a pretty large City, and Capital of the Canton bearing the ſame Name, ſeated on the River *Sane*. Its Factories are extenſive, and the Country very fine, being, next to *Lucerne*, the moſt powerful of the Roman-Catholick Cantons; the Goodneſs of its Paſtures, and the Fertility of its Soil, yield a very conſiderable Income to the Inhabitants, whereby they are placed at Eaſe, and are not ſo laborious as their Neighbours; ſo that, with the Exception of the Cheeſe Trade, they bring little to it, beſides a few Hempen Linens, and ſome Hats made here. There is a Fabrick of Paper in the Neighbourhood, and a Printing-Office in the City.

Gruiere, is a ſmall Town in the Canton of *Fribourg*, noted for its excellent Cheeſes in all *Europe*; and of which the Trade is ſo very conſiderable, as to induce ſeveral Merchants of this Canton to ſettle Houſes at *Lyons*, for negociating their Sales.

Soleurre, the capital City of the Canton with the ſame Name. has very fine Fortifications, and is ſeated in a Country extremely pleaſant; the *Aar* dividing the City into two unequal Parts. It ſerves as a Depoſit for the Goods imported to *Switzerland*, by Way of *Schaffhouſe* and *Baſil*, and which are laden for *Yverdon* by the Lake of *Bienne*. At *Olten*, a ſmall Town on the *Aar*, and dependent on *Soleurre*, beſides other Parts of the Canton, are made a Quantity of Woollen knit Stockings, and ſome Hats, and Cutlery Ware.

Apenzel is the principal Town of the Canton named therefrom, which is very rich in Meadows and Paſturage, fitly adapted to the Breeding of many Cattle, in which this Territory abounds: they alſo grow here a great Deal of Hemp and

Flax, which ſerves the Inhabitants for a Winter's Employ in making Linens, ſold afterwards at *St. Gall*, but little diſtant therefrom.

Bienne, a Town ſituated at ſome Diſtance above the Lake of this Name, between *Soleurre* and *Neufchatel*, dependent on the Biſhop of *Baſil*, carries on a great Trade in Deal Boards, commonly twenty-two or twenty-four Feet long, as alſo in other Wood for Building; here are alſo made Variety of Ribbons and Ferrets, and it has good Tanneries, and a fine Earth for Delft Ware.

Porentree, a City and Caſtle ſerving for the Reſidence of the Biſhop of *Baſil*, where is made fine Earthen Ware, Gloves, and Woollen Stockings knit and milled.

Mulhauſin is built on the River *Ill*, five Leagues from *Baſil*, and allied with the *Swiſs*. It is ſeated in a very fertile Plain; abundant in Grain and Wine, having more than ſixty Manufactures of Cloth and Druggets; here is alſo made a Quantity of Woollen knit and coarſe Silk wove Stockings, and Blankets; beſides which, the Place affords very good Dyers and Tanners, who have ſufficient Occupation in their different Employs.

Neufchatel, is a *Swiſs* City, Capital of the Principality of this Name; it is ſeated on the Borders of a Lake, which communicates with thoſe of *Morat* and *Bienne*, and diſcharges itſelf that Way into the *Aar* and the *Rhine*; which extremely facilitates its Trade, not only with the Reſt of *Switzerland*, but alſo with *Germany* and *Holland*, for which Places Veſſels depart twice a Year with Goods and Paſſengers; it is a very pleaſant Voyage, and is generally performed in fifteen Days. All the Subjects of this Sovereignty are exempt from Tolls, Impoſts, and other Duties, as well for the Goods they bring in, as thoſe they export on their own Accounts; neither are they obliged to declare the Contents of their Bales, or Caſes, at entering or going out when the Merchandize belongs to them. Here are three Fairs in the Year, at which the Merchants pay no Cuſtoms on Imports and but a Trifle on Extracts. Their Trade is pretty extenſive, and here are Magazines, where Traders of the neighbouring Places may purchaſe the various Commodities from *India*, *England*, *Holland*, *France*, and *Germany*, at reaſonable Prices.

The chief Fabricks of the Country are printed Cotton, in Imitation of Chintz, puſhed to a great Degree of Perfection, the Beauty and Vivacity of the Colours, equalling thoſe of the beſt *Aſiatick* Performances; here are alſo manufactured Thread and Cotton Stockings, of which a great Conſumption is made in *Italy*, *France*, *Spain*, *Portugal*, the *American* Iſles, and even in *Holland*, notwithſtanding the fine Fabricks of *Harlem*; the *Dutch* Merchants having diſtinguiſhed the Goodneſs of the Thread and Work, beſides a conſiderable Difference in Price. The Glovers' Trade has been long in Repute, and the Thread is ſpun finer here than in *Holland*, to above the Value of forty-five Shillings Sterling *per* Pound Difference. The Manufacture of Lace is ſpread through the whole Canton; the common Sort are wrought in great Quantities in the Mountains, and a prodigious Sale is made of them abroad; in the City, the Perfection of this Commodity is puſhed to a Degree of Equality with thoſe of *Flanders* for Beauty, and to ſurpaſs them a great deal in Quality; here are alſo made Linens and Tapes, and the Chamois of *Neufchatel* is in great Eſteem, it being ſent to *Italy*, *France*, and *Germany*.

The Village of *Serrierres*, dependent on this City, and which on Account of its Proximity might be regarded as one of its Suburbs, is conſiderable for the many Wheels which the little River bearing its Name turns, without ever having the leaſt Interruption from the rougheſt Winters or drieſt Summers; among which are grinding Mills, Saws, Poliſhers, Forges, Founderies, and Battery Works, for Copper, Iron, and Paper; here are alſo made Variety of Hard-ware, but the Iron Wire and Cards of this Place are, above all, in great Eſteem.

The Medicinal and Vulnerary Herbs found here in great Abundance, its vaſt Herds of Cattle and Plenty of Corn and Wine, with every other Neceſſary of Life, proclaim the Fertility of the Country; in which a Reſidence is rendered ſtill more agreeable by the Wholeſomeneſs of the Laws, which ſecures the Property and Liberty of the Subject.

Of GENEVA.

THIS City is celebrated for its Antiquity, for its advantageous Situation, for the Number of its Inhabitants, and particularly for its great Trade, which however was yet much more conſiderable before the Removal of its Fairs to *Lyons*. It is ſeated in one of the moſt delightful Countries of *Europe*, at the Extremity of the Lake bearing its Name; and which facilitates a Commerce, that the Induſtry of its Inhabitants has rendered very extenſive. In Reſpect to whoſe interior Part, this City may, with proper Limitations, be regarded as one of the Storehouſes of *France*, a Part of *Germany*, *Switzerland*, *Piedmont*, and *Italy*, which Countries it ſupplies with all Sorts of Linens, Muſlins, Chintz, Drugs, Spice, *Engliſh*, *French*, and *Dutch* Cloths, Porcelaines, Tea, Hard-Ware from *Germany* and *Foreſt*, Scythes, Sickles, Iron and Lattin Wire, Gold and Silver Galloons and Laces, Stockings, Hats, Jewels true and falſe, all Sorts of Clockwork, Variety of Files, Steel of its own Growth and from *Germany*, Tin, wrought Copper, and Books on all Subjects.

Independent of which Traffick, the diligent Inhabitants have carried it to the moſt remote Countries, by intereſting themſelves in Voyages to *America*, and the Iſles; but I ſhall add a ſhort Detail of what I have ſaid above of their Products and Manufactures, as due to a City numbered among the moſt celebrated ones of *Europe*.

Its Territories, though they are not the moſt fertile, do nevertheleſs yield excellent Corn, and Wine both white and red of good Quality; it has alſo Paſtures ſufficient for the breeding and Support of its Cattle; and the *Rhoſne* furniſhes it with Trout, of which ſome of above thirty Pounds Weight are exported, and carried even as far as *Paris*.

Horology is however the moſt conſiderable Manufacture, which alone eaſily ſubſiſts near a quarter Part of the Men, Women, and Children dwelling here, who are all profitably employed in the different Branches of this Art, and have brought it ſuch Perfection, as to yield, I believe, only to *England* in it.

Gilding is alſo in a flouriſhing Condition here, where Silver Wire is drawn Gilt, as alſo with the deceitful Appearance of its being ſo made only by ſmoaking; Gold and Silver Galloons, and Laces, are made of all Sorts and Qualities, Embroideries of Silk in Variety of Shades and Colours, all of which are ſent into *Germany*, *Italy*, *Portugal*, *Spain*, and from thence to the *Indies*.

Another very conſiderable Fabrick is that of painted Linens, in Imitation of thoſe performed by the *Engliſh* and *Dutch*; which for Beauty of Deſign, and Vivacity of Colours, are only inferior to thoſe of the ſaid two Nations.

The Bibliothecal and Printing Buſineſs is alſo very great here, and a material Object of Trade, as the Liberty of the Preſs extends to all Sorts of Works, provided they contain nothing againſt Religion in general, Princes, and good Morals; ſo that no Objection is made againſt Printing the Writings of the *Romaniſts* againſt *Proteſtantiſm*, but it is performed with the greateſt Exactneſs and Fidelity; and beſides the Books printed here, the Libraries are aſſorted with all thoſe that daily appear in *France*, *Italy*, *Holland*, and *Germany*.

There is no Place of its Size, where more Jewels are compoſed, both true and falſe, than here; and in general there reigns in this Sort of Work ſo good a Taſte, that Trade, which it attracts, cannot but engage the ingenious Artiſt, to maintain the Reputation he has already acquired.

The Fabrick of Silk Stockings goes on improving, and is got into ſome Reputation, as is that of Velvets; and I ſhould do Injuſtice to the Arts, and thoſe who exerciſe them, ſhould I paſs them over in Silence, as here are Machiniſts, Engravers, Deſigners, and Mathematical Inſtrument Makers, who practiſe all theſe Employs with Succeſs and Credit; not forgetting thoſe celebrated Medaliſts, Meſſrs. *Daſſier*, who will tranſmit to lateſt Poſterity the Delicacy and Grandeur of their excellent *Burin*.

I ſhall finiſh this Article with the Deſcription of two Manufactures lately eſtabliſhed in the Country of *Dardagny*, dependent on the Sovereignty of *Geneva*. Of which the firſt is a Fabrick of Steel in Bars of any Size, that equals in Quality

lity moſt others made elſewhere, and which has for Offspring a Manufacture of Files and Raſps of all Sorts and Sizes.

The other is a Fabrick of Copper, producing all Aſſortments that can be deſired in this Commodity, ſuch as Bands, Cups of all Sizes, Plates, Chaldrons, and an Alloy of Metals for all Uſes, and this on cheaper Terms than elſewhere.

The Correſpondence between the Merchants of this City and thoſe of *Marſeilles* and *Amſterdam*, and the little Way there is by Land, for the Tranſportation of their Goods to the *Rhine* and *Rhoſne*, facilitates that of the two Seas, ſo that there is hardly a Place, howſoever diſtant, where the other Nations of *Europe* ſend their Ships, that ſome of the *Genevans* are not ſeen as Partners, or Principals in the Voyage.

While the Independency of this Republick was maintained, its Trade continued in a flouriſhing Condition, but ſince its Connection with the Court of *Verſailles*, the *French*, under the Title of Guardians of the Peace of the Republick, interfere in their Civil Government, and occaſion Parties in it, which threaten Diſſolution. In the Moment of writing this Article, conſiderable Emigrations of their moſt ſkilful Artiſts are taking Place, and *Ireland* is the Kingdom likely to be benefited by this Revolution.

An Account of the WEIGHTS, MEASURES, *and* COINS, *in all Parts of* EUROPE.

THE Weights in common Uſe throughout *Great-Britain*, are Troy and Avoirdupois; the former conſiſting of Grains, Pennyweights, Ounces, and Pounds, whereof 24 Grains make a Pennyweight, 20 Pennyweights, an Ounce, and 12 Ounces a Pound, by which Bread, in Corporation Towns only, Gold, Silver, and Apothecaries' Medicines are weighed; and to this Weight Corn Meaſures are reduceable, as 8lb. Troy makes a Gallon, 16lb. a Peck, and conſequently 64lb. a Buſhel; Liquid Meaſures are alſo dependent on it, as their Concavities correſpond in their different Sizes thereto, from a Pint conſiſting of 12 Ounces, or a Pound, up to a Ton, containing 252 Gallons, and weighed 2016lb. or 1890lb. Avoirdupois; 2 Pints make a Quart, 4 Quarts a Gallon, containing 231 Cubical Inches, 63 Gallons a Hogſhead, 42 a Tierce, 126 a Pipe, and 252 a Ton of Brandy, Cider, Wine, *&c.*

Refiners and Jewellers alſo make Uſe of this Weight in Part; the former calling their ſmalleſt Fractions Blanks, of which 24 make a Perit, 20 Perits a Droite, 20 Droites a Mite, 20 Mites a Grain, and then as above. The Jewellers divide the Ounce into 152 Parts or Carats, and theſe into Grains, whereof four make a Carat.

By Avoirdupois Weight, all Groſs Goods and Baſe Metal are weighed, ſuch as Grocery, Reſin, Pitch, Tallow, Soap, Butter, Cheeſe, Iron, Lead, Copper, Allum, *&c.* its component Parts are Drams, Ounces, *&c.* of which 16 Drams make an Ounce, 16 Ounces a Pound, 28 Pounds a Quarter of a hundred Weight, or 112 Pound, and 20 hundred Weight or 2240 Pound a Ton; but beſides this hundred Weight there is another called the Stannary Hundred by which Tin, *&c.* is weighed to the King. The Avoirdupois Ounce is lighter than the Troy Ounce, by near a twelfth Part, 51 Ounces Troy being equally to 56 Avoirdupois; but the Avoirdupois Pound is heavier than the Troy, 17 Pounds of this latter being equal to 14 Pounds of the other.

Wool is generally ſold by the Tod, or Clove, allowing 7 pounds to the Clove, 14 Pounds to the Stone, 28 Pounds to the Tod, 128 Pounds to the Wey, 364 Pounds to the Sack, and 4368 Pounds to the Laſt.

Lead is bought by the Fodder, which at *London*, *Newcaſtle*, &c. weighs 19½ Hundred Weight of 112 Pounds; but at *Hull* 19½ Stannary Hundred of 120 Pounds; and at *Cheſter*, &c. it is ſtill different.

In *Eſſex*, Butter and Cheeſe are weighed by the Clove, or half Stone, being 8 Pounds, of which 32, or 256 Pounds is a Wey; but in *Suffolk* 42 Cloves or 336 Pounds are allowed to the Wey. Of Butter a Firkin muſt weigh 56 Pounds, and that of Soap 60 Pounds, and 4 Firkins of either make a Barrel.

A Stone of Beef at *London* is 8 Pounds, but in the Country it is commonly 14 Pounds; Horſe-Racers alſo reckon 14 Pounds to the Stone; and it is the ſame with Iron, Shot, or Wool, double the Quantity of Iron and Shot being called a Quarter, though a Stone of Sugar, Cinnamon, Nutmegs, Pepper or Allum, is but $13\frac{1}{2}$ Pounds.

A Faggot of Steel is 120 Pounds, and a Burden of Gad Steel 180 Pounds.

A Barrel of Gunpowder is 100 Pounds, and 24 Barrels make a Laſt.

A Seam of Glaſs is 24 Stone, of 5 Pounds each, or 120 Pounds.

A Truſs of Hay 56 Pounds, and a Load or Ton of it 36 Truſſes.

Raw Silk is ſold here by the Pound of 24 Ounces, or more properly one Pound and a half Avoirdupois; but Organzines, Trames, *&c.* by the common Pound of 16 Ounces.

In *France*, *Holland*, and moſt other Places in *Europe*, the Pound is termed Mark Weight, by reaſon that 2 Marks of 8 Ounces compoſe it, ſo that in all Places where this Pound is uſed, it conſiſts of 16 Ounces, as with us; and as moſt Authors who have calculated the Correſpondency of theſe different Weights have taken thoſe of *Paris* for a Standard, I ſhall follow their Example, as it is eaſy to reduce any not mentioned in the following Table by the Rule of Three, and I ſhall only take Notice of ſuch as are not inſerted therein; or that make Uſe of more Weights than one.

Coningsberg reckon their Weights by Schipponds, conſiſting of 400lb. divided into 10 Steens of 40lb. each, 100lb of *Paris* makes 125lb. of *Coningsberg*, and 100lb. of *Coningsberg* makes 80lb of *Paris*, ſo that the *French* Hundred of Salt yields near 10 Laſts, which is little more than 40,000lb. at this Place.

Dantzick's Schippond conſiſts of 320lb. containing 20 Lieſpond of 16lb. each, of which 100lb. makes $88\frac{8}{9}$lb. at *Paris*; and on the contrary, 100lb. of this laſt City makes 112lb. at *Dantzick*. The Hundred of *French* Salt produces $11\frac{1}{2}$ to 12 *Dantzick* Laſts, the Laſt of that Salt being 18 Ton, though the Laſt of this Commodity from *Lunenbourg* and *Haran* is only 12 Tons.

Elbing's Weights are the ſame with thoſe of *Dantzick*.

Stetin's Schippond contains 180, and its Pierre 21lb. the 110lb. making 100lb. of *Paris*. The Hundred of Salt from *France* yields here 10 Laſts.

Lubeck, the Schippond here is 300lb. divided into 20 Lieſponds of 15lb. each; and 100lb. of this Place makes $95\frac{1}{4}$lb. of *Paris*, and 100lb. of *Paris* 105lb. of *Lubeck*.

Breſlaw, 100lb. of this Place makes 80lb. at *Paris*, and 100lb. *Pariſian* makes 125lb here.

Bremen's 100lb. is reckoned equal to 97lb. of *Paris*, and 100lb. of *Paris* is eſteemed 103lb. of *Bremen*.

Naumbourgh make Uſe of the ſame Weights as *Leipſick*, calculated in the Table.

Erfort computes 100lb. to equal 92lb. of *Paris*, and that 100lb. of *Paris* makes 108lb. here.

Bergne, the 100lb. here is computed to make 90lb of *Paris*, and the 100lb. of *Paris* to make 111lb. of theſe.

Cologne's 100lb. makes 96lb. at *Paris*, and 100lb. of *Paris* is equal to 104lb. here.

Ghent, *Bruſſels*, *Malines*, *Bruges*, } correſpond exactly in Weights with *Antwerp*.

Liſle, 100lb. of this Place makes $88\frac{3}{4}$lb. of *Paris*, and 100lb. of *Paris* makes 114lb. here.

St. Malo is commonly ſuppoſed to have its Weights equal with thoſe of *Paris*, though by ſome reckoned to be 2 *per Cent.* leſs.

Bayonne had its Weights equal to thoſe of *Paris*; and at *Lyons* two Sorts of Weights are in Uſe; thoſe of the City, by which all Species of Groſs Goods are ſold, and whoſe Pound, conſiſting of 16 Ounces, only makes 14 Ounces Mark Weight; the other for Silk only, containing 15 Ounces the Mark, ſo that 100lb. of Silk makes 108lb. City Weight.

Genoa; this City has five Sorts of Weights, the firſt called the *Great Weight*, uſed in the Cuſtom-houſe; the ſecond *Caſh Weights*, for Plate and Coin; the third *Cantaro*, or the common Quintal, by which are weighed Groſs Goods that are ſold; the fourth called the *Great Balance*, by which Raw Silks are weighed; and the fifth is called the *Small Balance*, that ſerves for weighing fine Goods.

90⅘ Rotoli or Pounds, *Great Weight*
100 Rotoli *Caſh Weight*
100 Rotoli *Common Weight*
145 lb. *Great Balance*
153 lb. *Small Balance*
} make 100lb. of *Paris*.

Rome, 100lb of this City, makes within a Trifle 71½lb. at *Paris*, and 100lb. of *Paris* make 140lb. of *Rome*.

At *Leghorn*, they make Uſe of two Sorts of Weights, *viz.* great and ſmall.

93lb. great Weight
140lb. ſmall Weight
} of *Leghorn*, makes 100lb. of *Paris*.

The Quintal is reckoned variouſly, according to the Species of Goods ſold here by it, *viz.* the Quintal of *Roman* Allum, or Poorjack, dried or Pickled Herrings, and Salted Salmon, is ſold here by that of 150lb. The Quintal for Sugar 151lb. and for Wool and Fiſh 160lb.

Florence has the ſame Weight as at *Leghorn*.

Lucca has likewiſe two Sorts of Weights, *viz.*

Great Weight, of which 94⅓ Rotoli, or Pounds
Small Weight, of which 141⅓ Rotoli, or Pounds
} make 100lb. of *Paris*.

Palermo in *Sicily* two Sorts of Weights, of which,

100 Rotoli, Great Weight
100lb. Small Weight
} make a Trifle leſs than { 141⅔lb. / 65 lb. } of *Paris*.

At *Venice* the Weights are likewiſe different, the Pound of the ſmall Weight conſiſting only of 12 Ounces, and the Pound of the great Weight 18⅔ of the ſame Ounces; or it is otherwiſe reckoned that

100lb. great Weight makes 158 lb. ſmall Weight, and
100lb. ſmall Weight 63½lb. great Weight;
100lb. great Weight
100lb. ſmall Weight
} making { 95½lb. / 90 lb. } of *Paris*.

And 100lb. of *Paris* makes at *Venice* { 104 lb. great Weight, / 166 lb. ſmall Weight. }

Bologne, 100lb. of this Place makes 66lb. at *Paris*, and 100lb. of *Paris* makes 151½lb. of *Bologne*.

Bergame, like *Venice* has two Sorts of Weights, *viz.* great and Small; this latter has only 12 Ounces to the Pound, and the great has 30 Ounces or 2½ ſmall Pounds. The ſmall ſerves for weighing Silk, Cochineal, Indigo, Wax and other Drugs; and the great for Wool and other Groſs Goods.

100lb. ſmall Weight
100lb. great Weight
} of *Bergame*, makes { 59 lb. / 147½lb. } of *Paris*, and

100lb. of *Paris*, makes { 169lb. ſmall Weight / 68lb. great Weight } of *Bergame*.

The Weights of *Naples* are the ſame with thoſe of *Bergame*.

Smyrna uſes the Canta, or Quintal, with its Fractions, for the Weight of Goods.

The Quintal weighs 45 Oques, or Okkes, or 100 Routels.
The Batmen makes 6 Oques.
The Sechie 2 Ditto
The Routel makes 180 Dragmes
The Oque 400 Ditto.

The Quintal of 100 Routels or 45 Oques as above, is equal to 114lb. of *Paris*; on which Footing 100lb. of *Paris* makes about 87⅘ Routels of *Smyrna*.

It is reckoned that the Oque weighs a Trifle more than $2\frac{1}{4}$lb. of *Paris*, but this is according to the Goods weighed by it.

Conſtantinople has the heavieſt Weights in all the *Levant*, though they are diſtinguiſhed as at *Smyrna*. The Quintal conſiſts of 45 Oques, and the Oque of 400 Dragmes, correſponding to $2\frac{9}{16}$lb. of *Paris*.

It is reckoned that the Quintal of *Conſtantinople* weighs { 112¾lb. of *Paris*, 181 lb. of *Venice*, 160 lb. of *Leghorn*.

Being divided into Rottels, Oques, Batmens, &c. as at *Smyrna*.

At *Aleppo* they make Uſe of divers Sorts of Weights, *viz.*

The Quintal, or Cantar, of 100 Rottels, each conſiſting of 720 Dragmes.

The Surlo, which is $27\frac{1}{4}$ Rottels.

The Rottel with which moſt Goods are weighed containing, as above, 720 Dragmes, which make $4\frac{8}{13}$lb. of *Paris*.

The Rottel for weighing the Silks growing in the Neighbourhood, is of 700 Dragmes, and weighs $4\frac{10}{13}$lb. of *Paris*.

The Rottel for weighing *Perſian* Silks, Legi de Burma, Ardaſſe, and Ardaſſete, contains 680 Dragmes, and weighs $4\frac{4}{19}$lb. of *Paris*.

The Damaſſin Rottel, with which, Braſs, Lattin Wire, Amber, Camphire, Benzoin, Spikenard, Balm of *Mecca*, and Aloes Wood are weighed, contains 600 Dragmes, and makes $3\frac{16}{78}$lb. of *Paris*.

The Ok, or Oque, weighs 400 Dragmes.

The Metical, with which Pearls and Ambergris are weighed, is $1\frac{1}{2}$ Dragme.

1lb. of *Paris*.
1lb. ſmall Weight of *Venice*
1lb. great Weight of D° } make at *Aleppo* { 156 / 98 / 112 } Dragmes.

The Quintal of *Tripoli* makes $1\frac{1}{4}$ Quintal of *Aleppo* of 720 Dragmes.

At *Seyda*, the ancient *Sidon*, two Sorts of Weights are in Uſe, *viz.*

The Rottel Damaſſin, or Damaſquin, by which all Sorts of Silks and Cotton Thread are ſold; it is reckoned 600 Dragmes, which make $3\frac{3}{4}$lb. of *Paris*.

And the Acre by which moſt of the Groſs Goods are ſold, equal to $4\frac{4}{5}$lb. of *Paris*.

Alexandria makes Uſe of a Cantar or Quintal for the weighing of Goods, which varies according to the different Species weighed by it, as for ſome it conſiſts only of 100 Rottels, and for other, 105, 110, $112\frac{1}{2}$, 115, 120, 125, 130, and 133.

The Rottel Farfarin is 144 Dragmes, 100 of which Rottels are reckoned equal to 125lb. of *Leghorn*.

The Rottel Gerouin is 312 Dragmes.

The Okke, or Oque is 400 Dragmes.

The Cantal, or Quintal of 100 Rottels, is ſuppoſed equal to 120lb. of *Paris*.

Roſetto has its Weights the ſame as thoſe laſt mentioned of *Alexandria*.

Grand Cairo makes Uſe of the Quintal, or Cantar of 100 Rottels, for the weighing moſt of its Goods, reckoned equal to 88lb. of *Paris*; though a Quintal of Coffee yields 95lb. at *Amſterdam*, which is, as has been obſerved, the ſame with thoſe of *Paris*.

Theſe are all, or at leaſt the principal Places of Trade, whoſe Weights are not mentioned in the ſubſequent Table; ſo that I have nothing more to add on this Subject.

A TABLE

A TABLE of the AGREEMENT which the WEIGHTS of the PRINCIPAL PLACES in *EUROPE* have with each other.

N. B. As the Weights of *Amſterdam*, *Paris*, *Bourdeaux*, *Straſbourgh*, *Beſançon*, and ſeveral other Places have but the minuteſt Difference, they are all comprehended under that of *Amſterdam*, as thoſe of *Nuremberg* are under *Frankfort*, and others in the ſame Manner.

Are equal to	Of *England*, *Scotland*, and *Ireland*.	Of *Amſterdam*, *Paris*, &c.	Of *Antwerp*, or *Brabant*.	Of *Rouen*, the Viſcounty Weight.	Of *Lyons*, the City Weight.	Of *Rochelle*. By Means of this TABLE may be eaſily ſeen, the Agreement which the Weights of one Place have with thoſe of another; *as for Example*; if it is wanted to be known how many Pounds 100 *Engliſh* make at *Amſterdam*, look for *England*, &c. in the firſt Column, and from thence along the Line to the Column under *Amſterdam*, and it will there be found, that 91lb. 8oz. *Dutch*, correſpond with 100 *Engliſh*; and ſo with any other Weight ſought for, and *vice verſâ*; noting that the above Calculations are in Pounds, and Ounces of 16 to the Pound.

Mr. John Peter Ricard, having furniſhed us in his Book entitled *Le Negoce d'Amſterdam*, and ſeveral other Authors in their different Works, with a Calculation of the Agreement, which the ſeveral Corn Meaſures of *Europe* have, with thoſe of that City, I herewith dedicate it to my Readers' Service, in Hopes it may be uſeful to many of them in their ſeminal Negotiations; but, previous thereto, I ſhall give ſome Account of the Fractions of the different Meaſures mentioned therein, and of thoſe that are not there inſerted.

The dry Meaſures at *Amſterdam* for Corn are,

The Laſt containing 27 Muddes, or 36 Sacks.
The Mudde, containing 4 Schepels.
The Sack, containing 3 Schepels; and Retailers ſtill divide
The Schepel into 4 Vierdevat, and
The Vierdevat into 8 Kops.

The Laſt { of Wheat commonly weighs from 4600 to 4800lb. / of Rye - - - - - 4000 to 4200lb. / of Barley - - - - 3200 to 3400lb. } Mark Weight.

The Laſt of *Monnikendam*, *Edam*, and *Purmerent*, is equal to that of *Amſterdam*.

The Laſt { of *Hoorne* / of *Enkhuyſen* / of *Muiden* / of *Naarden* / of *Weſop* } is of 22 Muddes, or 44 Sacks, and the Sack of 2 Schepels.

The Laſt of *Haarlem* is of 38 Sacks, and the Sack of 3 Schepels; 4 Schepels making 1 Hoed of *Rotterdam*, and 14 Sacks, 1 Hoed of *Delft*.

The Laſt of *Alkmaar* is of 36 Sacks; the Hoed 4 Schepels; but the Hoed is 5-8ths bigger than that of *Rotterdam*.

The Laſt of *Leyden*, is of 44 Sacks, and the Sack of 8 Schepels.

The Laſt of *Rotterdam*, *Delft*, and *Schiedam* is compoſed of 29 Sacks, and the Sack of 3 Schepels, of which 10 2-3ds make an Hoed; the Laſt of theſe Places being 2 *per Cent*. bigger than that of *Amſterdam*, and this Laſt for Hemp-Seed is alſo of 29 Sacks, and for Linſeed 24 Tons or Barils.

The Laſt of *Dort* or *Dordrecht* is of 24 Sacks, the Sack of 8 Schedels, and 8 Sacks make 1 Hoed. All Grains are bought and ſold here by the Hoed, which make 8 Barils or 32 Schepels, counting 4 Schepels to the Baril; and 3 Hoeds make 1 Laſt of *Amſterdam*.

The Laſt of *Gouda*, or *Tergouw*, is of 28 Sacks, and the Sack of 3 Schepels; 32 Schepels making 1 Hoed.

Four Hoed of *Oudewater*, *Heuſden*, *Gornichem*, and *Leerdam*, make 5 Hoed of *Amſterdam:* 2 Hoed of *Gornichem* make 5 Achtendeelen, or Huitiemes, and 1 Laſt, and 4 Hoed, make 5 Hoed of *Delft*.

Twenty-eight Achtendeelen or Huitiemes, of *Aſperen*, make 32 Huitiemes of *Rotterdam:* 26 Huitiemes of *Worcum*, alſo make 32 Huitiemes of *Rotterdam*.

The Laſt of *Breda*, for hard Grain, ſuch as Wheat, Rye, Barley, and the like, is of 32 1-half Veertels, or Quartieres: and the Laſt of Oats is of 29 Veertels; 13 Veertels of hard Grain making 1 Chapeau of *Delft*, and 14 Veertels of *Antwerp*.

Corn Meaſures of the Provincc of *Utrecht:*

The Laſt of *Utrecht* conſiſts of 25 Muddes or Sacks; 6 Muddes making 5 Mouwers, and 10 1-half Muddes or Sacks, 1 Hoed of *Rotterdam*.

The Laſt of *Ammerfort*, is of 16 Muddes, or of 64 Schepels; 6 Muddes making 1 Sack, or 1 Hoed of *Rotterdam*.

The Laſt of *Montfort* is of 21 Muddes, the Mudde making 2 Sacks, and the Hoed containing 4½ Huitiemes more than that of *Rotterdam*.

The Laſt of *Yſelſteyn* contains 20 Muddes, each Mudde 2 Sacks, and the Hoed 3 Huitiemes more than that of *Rotterdam*.

The Laſt of *Vianen* is alſo of 22 Muddes, the Mudde of 2 Sacks, and the Hoed contains 2 Huitiemes more than that of *Rotterdam*.

Corn Measures in the Province of *Friſe:*

The Laſt { of *Leeuwauden* / of *Haarlingen* / of *Groninguen* } is of 33 Muddes, of 18 Tons or 36 Loopers, which make 3 Hoed of *Rotterdam*.

Corn Measures of the Province of *Gueldre:*

The Laſt of *Nimeguen* is of 21¼ Mouwers, and that of *Arnhem* and *Doeſbourg* of 22 Mouwers; the Mouwer is 4 Schepels, and 8 Mouwers make 1 Hoed of *Rotterdam*.

The Laſt of *Thiel* conſiſts of 21 Muddes; the Hoed of *Rotterdam* being an Achteling or Huitieme bigger.

The Laſt of *Roermonde* is of 68 Schepels, or Achtelings; 100 Veertel, or Quartieres, making 1 Hoed of *Rotterdam*.

The Laſt of *Bommel* is of 6 Achtendeels, or 18 Muddes greater than that of *Rotterdam*.

At *Harderwyk* it is reckoned that 11 Muddes make 10 of *Amſterdam*.

Corn Measures of the Province of *Over-Yſſel:*

The Laſt of *Campen* contains 24½ Muddes for Wheat, of which 9 make 1 Hoed of *Rotterdam*.

The Laſt of *Zwoll* is of 26 Sacks, or 9 Muddes, which make 1 Hoed of *Rotterdam*.

The Laſt of *Deventer* is of 36 Muddes, counting 4 Schepels to the Mudde.

Corn Measures of the Province of *Zeeland*.

The Laſt of *Middlebourg* is reckoned 41 Sacks and 1 Achtendeel; reckoning 2 Achtendeels to the Sack.

The Laſt of *Vliſſingen* or *Fleſſingue*, and that of *Veer* or *Terveer* is of thirty Sacks.

The Laſt of *Zirickzee*, *Ter-Goes*, *Bommene*, *Tertolen*, *Stavenes*, and *Duyvelant* is of 37¼ Sacks.

The Laſt of *Sommelſdyk*, *Dirkſlaud*, *Middleharnes*, *Oeltieſplaat*, *Pays de l'Utitien*, and *La Brille*, is of 38½ Sacks; but all theſe aforeſaid Measures are reducible, and near equal to the Laſt of *Middlebourg*, becauſe 2½ Achtendeels make the *Zeeland* Sack, or the *Middlebourg* Sack of 2 Achtendeels, as above-mentioned.

Corn Measures for the Province of *Brabant:*

The Laſt of *Antwerp* for Wheat is of 37½ Verteels or Quartieres, and that for Oats of 37. The Verteel being divided into four Mukens, and 14 Verteels making the Hoed of *Rotterdam*.

At *Bruſſels* 25 Sacks are reckoned for an *Amſterdam* Laſt of Wheat.

The Laſt at *Malines* is of 34½ Verteels; the 100 Verteels making 108 of *Antwerp*, and 12 Verteels making 29 Achtendeels of Delft.

The Laſt of *Louvain* is of 27 Muddes, and the Mudde of 8 Halſters.

The Laſt of *Breda* for Wheat is of 33½ Verteels, and of 29 for Oats; the 13 Verteels making 18 Sacks, or 1 Hoed of *Rotterdam*.

The Laſt of *Steenbergen* is of 35 Verteels.

The Laſt of *Bergen-op-zoom* is of 36 Siſters for Wheat, and 28½ for Oats.

The Laſt of *Boiſleduc* is of 21½ Mouwers, of which 8 make 1 Hoed of *Rotterdam*.

Corn Measures of *Flanders:*

The Laſt of *Ghent* contains 56 Halſters for Wheat, and 38 for Oats; 12 Halſters making 1 Mudde, or 6 Sacks, ſo that each Sack is 2 Halſters, and Corn is bought and ſold here by Muddes or Halſters.

The Laſt of *Bruges* is of 17½ Hoed for Wheat, and 14½ for Oats, which makes one Laſt of *Amſterdam*, and one Hoed of this Place yields 4 2/3 4/5 Achtendeels of *Delft*.

The Laſt of *St. Omer* is of 22½ Raziers.

The Laſt of *Dixmude* for Wheat is reckoned to be 30½ Raziers, and 24 Raziers for Oats; the Razier making 2 Schepels of *Rotterdam*.

The Laſt of *Liſle* conſiſts of 38 Raziers for Wheat, and 30 Raziers for Oats, the Razier making 2 Schepels of *Rotterdam*.

Eighteen Raziers of *Dunkirk* make 1 Hoed of *Rotterdam*; Sea Meaſure is 9 Raziers, which weigh 280 to 290lb. Mark Weight each, but the Land Razier only weighs 245lb. of the ſaid Weight.

At

At *Gravelines* 22 Raziers is reckoned to the Laſt of Wheat, and 18¼ for Oats.

Corn Meaſure of the Country of *Leige:*

The Laſt of *Leige* is 96 Setiers, and the Setier conſiſts of 8 Muddes.

The Laſt of *Tongres* for Wheat is 15 Muddes, and for Oats 14.

Corn Meaſures of *Great-Britain* and *Ireland:*

The Laſt of theſe Iſlands contains 10½ Quarters; the Quarter is 8 Buſhels and each Buſhel 8 Gallons, or 4 Pecks; the Laſt being equal to that of *Amſterdam.*

Corn Meaſures of ſeveral Places in the *North:*

The Laſt of *Dantzick* is equal to that of *Amſterdam,* it being reckoned commonly to weigh 16 Schipponds of 340lb. each, making 5440lb. *per* Laſt, *Dantzick* Weight, for Wheat; though the Laſt for Rye is only counted 15 Schipponds, or 5100lb.

The Laſt of *Coningſberg* is equal to that of *Amſterdam,* and Corn is brought and ſold here by the Guilders and Gros of *Peland.*

The Laſt of *Riga* contains 46 Loopens, which make a Laſt of *Amſterdam;* Corn ſells here for Rix-dollars of 3 Guilders, or 90 Gros.

The Laſt of *Copenhagen* is of 42 Tons, or 80 Schepels, though it varies according to the different Sorts of Grain, even as far as to 96 Schepels.

In *Sweden,* the Laſt is reckoned 23 Tons.

The Laſt of *Hamburgh* contains 90 Schepels, 12 of which Laſts make 13 of *Amſterdam.*

The Laſt of *Lubeck* is 85 Schepels, of which 95 make a Laſt of *Amſterdam.*

The Laſt of *Embden* conſiſts of 15¼ Tons. And

24 Laſts of *Bremen* make 23 of *Amſterdam.*

Corn Meaſures in ſeveral Parts of *France:*

The chief Meaſure for Grain is called at *Paris,* and in many other Cities of that Kingdom, a Muide, which is divided into 12 Setiers, and the Setier into 12 Boiſſeaux, or Buſhels; the Setier for Wheat is again divided into 2 Mines, the Mine into 2 Minots, and the Minot into 3 Boiſſeaux. The Setier of good Wheat ought to weigh from 244 to 248lb. Mark.

The Setier of Oats is divided into 24 Boiſſeaux, the Boiſſeaux into 4 Picotins, the Picotin into 8 Demi-quarts, and the Demi-quart into 2 Litrons.

The Muid, or 12 Setiers of *Paris,* makes 17 Muddes of *Amſterdam,* and 19 Setiers the *Amſterdam* Laſt.

The Muid of *Rouen* contains 12 Setiers, making 40 Setiers of *Paris,* which Muid ought to weigh 3360lb. Mark Weight of Wheat, as the Setier weighs about 280lb. which is divided into 2 Mines, and the Mine into 4 Boiſſeaux; 4 Muids are equal to 3 Laſts of *Amſterdam,* 6 Setiers making 10 Muddes, or 1⅓ Muid an *Amſterdam* Laſt.

The Muid of *Orleans* ought to weigh 600lb. it is divided into 12 Mines, and makes 2½ Setiers of *Paris,* 5 Boiſſeaux of *Bourdeaux,* or 3⅔ Muddes of *Amſterdam.*

The Meaſure for Corn uſed at *Lyons* is called an Aſnée, which is divided into 6 Bichets, or Boiſſeaux, and makes near 1⅓ Setier of *Paris,* or 3⅔ Boiſſeaux of *Bourdeaux;* ſo that 4 Aſnées make 7 Muddes of *Amſterdam.*

8 Boiſſeaux of *Roan* make on Setier of *Paris,* or 1½ Mudde of *Amſterdam.*

3 Aſnées of *Macon* make 7 Muddes of *Amſterdam.*

5 Boiſſeaux of *Avignon* make 4½ Muddes of *Amſterdam.*

The Setier of *Montpelier* is of 2 Emines, and the Emine of 2 Quarts; the Setier weighs from 90 to 95lb. *Montpelier* Weight, and 3 Setiers make 1½ Muddes of *Amſterdam.*

The Setier of *Caſtres* in *Languedoc* conſiſts of 2 Emines, the Emine of 4 Megeres, and the Megere of 4 Boiſſeaux; the Setier weighs near 200lb. of this Place, which make 170lb. Mark, ſo that 100 Setiers make 4 Laſt of *Amſterdam.*

38 Boiſſeaux of *Bourdeaux* make 1 Laſt of *Amſterdam,* or 12 Setiers, of *Paris:* the ſaid Boiſſeaux ought to weigh from 122 to 124lb. Mark, when the Wheat is good.

4⅔ Setiers of *Amiens* make 1½ Mudde of *Amſterdam;* the Setier is here divided into four Piquets, and ought to weigh 50 or 52lb.

8 Setiers of *Bologne*, in *Picardy*, make 13 Muddes of *Amſterdam*, and ought to weigh 270lb. ſmall Weight.

12 Setiers of *Calais*, make 18½ Muddes of *Amſterdam*: the Setier weighs about 260lb. 12 whereof making thirteen at *Paris*.

19 Setiers of *St. Valery*, make 1 Laſt
18 Mines of *Dieppe*, make 17 Muddes
5¼ Boiſſeaux of *Havre de Grace*, make 1½ Mudde
14 Boiſſeaux of *Amboiſe*, make 1½ Mudde
19 Setiers, of *Saumur*, make 1 Laſt
14 Boiſſeaux of *Tours*, make 1½ Mudde
20 Boiſſeaux of *Blois*, make 1½ Mudde
5 Boiſſeaux of { *Aubeterre*, *Barbeſieux*, *Perigueux* } make 1½ Mudde
} of *Amſterdam*.

49 Setiers of *Arles*, make a Laſt of *Amſterdam*, each Setier weighing 93lb. Mark, and the Charge is reckoned 300lb. of that Place.

48 Setiers of *Baucaire*, make a Laſt of *Amſterdam*, and the Charge here is 2 *per Cent.* bigger than that of *Arles*.

The Charge of *Marſeilles*, is of 4 Emines, the Emine of 8 Sevadiers; and the Charge is alſo computed at 300lb. *Marſeilles* Weight, which makes it equal to 1½ Mudde of *Amſterdam*.

Forty-eight Charges of *St. Gilles*, make a Laſt of *Amſterdam*; the Charge here is alſo of 300lb. but heavier by 18 to 20 *per Cent.* than that of *Arles*.

Fifty-one Charges of *Taraſcon* make a Laſt of *Amſterdam*; the Charge here is likewiſe of 300lb. 2 *per Cent.* heavier than that of *Arles*.

Three Emines of *Toulon*, make 2 Muddes of *Amſterdam*; the Charge is here reckoned to conſiſt of three Setiers, and the Setier containing 1½ Emine, 3 of which make 2 Setiers of *Paris*.

Four Boiſſeaux of *Auray*, make 1½ Mudde
The Ton of *Audierne*, *Breſt*, *Morlaix* } make 13½ Muddes
} of *Amſterdam*.

83½ Boiſſeaux of the ſaid *Morlaix* have yielded at *Rotterdam* a Laſt, and 15 Sacks of 29 to the Laſt; on which Footing the 83½ Boiſſeaux make very near 1½ *Amſterdam* Laſts.

The Ton of *Hannebon* and *Port Louis* makes 17½ Muddes of *Amſterdam*.

The Ton of *Quinpercorantin*, makes 13 Muddes of *Amſterdam*.

The Ton of *Nantz*, makes 13¼ Muddes of *Amſterdam*; it is compoſed of 16 Setiers, and the Setier of 16 Boiſſeaux: The Ton ought to weigh from 2200 to 2250lb. heaped Meaſure, which is 18 or 20 *per Cent.* more than ſtriken Meaſure.

The Ton of *Rennes* and *St. Maloes* makes 14 Muddes of *Amſterdam*, and ought to weigh about 2400lb.

The Ton of *St. Brieux* makes 15½ Muddes of *Amſterdam*, and ought to weigh about 2600lb.

The Ton of *Rochelle* and *Marans* contains 42 Boiſſeaux, which makes 13 Muddes of *Amſterdam*.

Corn Meaſures of *Spain*.

At *Cadix*, &c. Corn is ſold by Fanegas, or Hanegas, of which 5 make an *Engliſh* Quarter, or 52 to the Laſt of *Amſterdam*.

In the Kingdom of *Valencia*, the Corn Meaſure is a Cahiz, conſiſting of 12 Barchillas, and three hundred Cahizes make 25 Laſts of *Amſterdam*.

Corn Meaſures of *Portugal*.

216 Alquieres, or 4 Muids of *Liſbon*, make a Laſt of *Amſterdam*, the Muid being 54 Alquieres; though the Muid is divided into 15 Fanegos, and the Fanego into 4 Alquieres.

The Alquieres of *Oporto* have always been reckoned 20 *per Cent.* bigger than thoſe of *Liſbon*, at which Computation 180 make an *Amſterdam* Laſt; but I find that an *Engliſh* Quarter commonly yields there 16 Alquieres, at which Rate only 164 go to the Laſt of *Amſterdam*.

At

At the *Azores* Islands, belonging to the King of *Portugal*, and in that of *St. Michael*, 60 Alquieres is reckoned to the Muid, and 240 make an *Amsterdam* Last, though Corn transported from *St. Michael* to the Island of *Madeira*, yields 4 Alquieres Benefit on the 60; that is the 60 of *St. Michael* produce 64 at *Madeira*; being $6\frac{2}{3}$ *per Cent.*

Italian Corn Measures.

Corn is sold at *Genoa* by the Mine, with an Exemption from Duties to the Seller, and 25 Mines are reckoned a Last of *Amsterdam*.

At *Leghorn*, 40 Sacks make a Last of *Amsterdam*, and 2 Sacks of Wheat make the *Marseilles* Charge of 300lb. less 4 *per Cent.*

Wheat is sold at *Venice* by the Staro, or Setier, 2 Staro making one *Marseilles* Charge, or $1\frac{1}{2}$ Mudde of *Amsterdam*.

This may suffice to show the chief Corn Measures of the principal Parts in *Europe*, to which my Reader may have Recourse, for a more ample Explication of their different Divisions, than could conveniently be inserted in the following Table; though this contains a greater Number of Places, and shews at one Glance, the Agreement between the Measures of every City, with those of *Amsterdam*, *Paris*, and *Bourdeaux*; the Name of the Place being sought in the first Column, whose Measure is wanted, they being all ranged for this Purpose in an Alphabetical Order, and all trifling Fractions left out as their Insertion would have interrupted the Regularity of the Table, without adding any Thing to the Instruction of my Reader.

A TABLE *of the Agreement of divers* MEASURES *with those of* AMSTERDAM, PARIS, *and* BOURDEAUX.

To the foregoing Table, I shall here add the Weights of *Flanders* and *Germany* Measures, in hopes it may be useful to my Readers; though I must accompany it with this Remark, that the Ponderosity of the several Sorts of

Grains therein mentioned are rendered ſo uncertain by the Change of Weather, and other Accidents of Humidity or Dryneſs, that no Exactneſs is to be depended on from ſuch a Computation; however, it may occaſionally prove of ſome Service, at leaſt to thoſe intereſted in the Corn Trade, and therefore I give it a Place,

An Abſtract of the Correſpondent Weights and Meaſures of the different Species of Corn in FLANDERS *and* GERMANY.

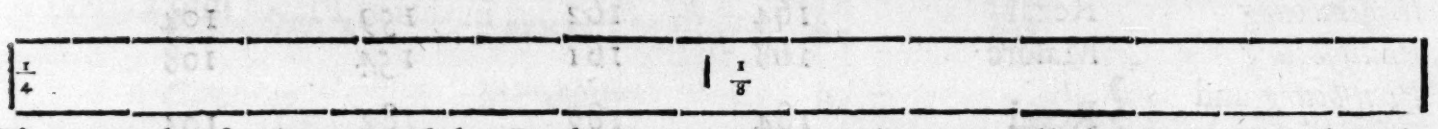
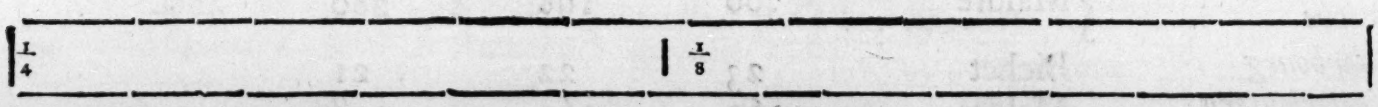
Next to the Dry, I proceed to the Long or Applicative Measures, of which our's in *Great-Britain*, are the Yard and Ell, the former for measuring all Silks, Woollens, *&c.* the latter used only for Linens. The Yard consists of three Feet, and the Foot of twelve Inches; the Ell being a Yard and a Quarter. I may also here add, that a Geometrical Pace is reckoned five Feet; a Fadom, or Fathom, six; a Rod, Pole, or Perch sixteen and a half; and of these forty make a Furlong, and eight Furlongs an *English* Mile, which by a Statute of *Henry* VIII. ought to be 1760 Yards, or 5280 Feet, that is, 280 Feet more than the *Italian* Mile.

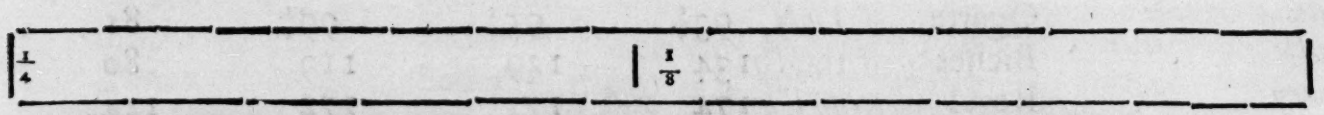
The Measures in other Parts of *Europe* are very different both in Name and Extent, tho' most of them founded on the Geometrical Foot, which, varying in Length, has occasioned the fixt Measures of Places to vary also from one another; and before I say any Thing of this Difference, I shall in Part shew it to my Reader by a Print of some Fractions of Aunes, *&c.* of several of the chief Trading Cities, which will confirm the Calculations I shall afterwards give in a general Table.



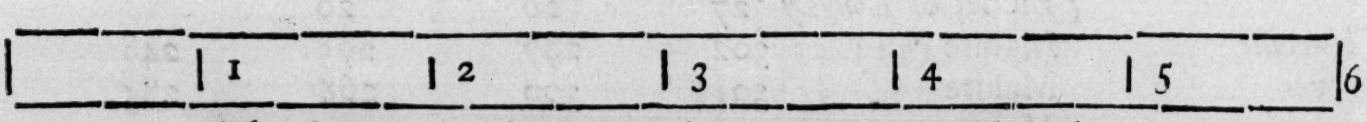
The Length of a Quarter of the *Brabant*, or *Antwerp* Aun or Ell, having 6 *French* Inches and $4\frac{1}{2}$ Lines.



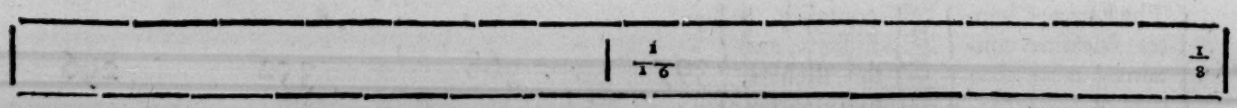
The Length of a Quarter of the *Amsterdam* or *Dutch* Ell, containing 6 *French* Inches and 3 $\frac{1}{2}$ Lines



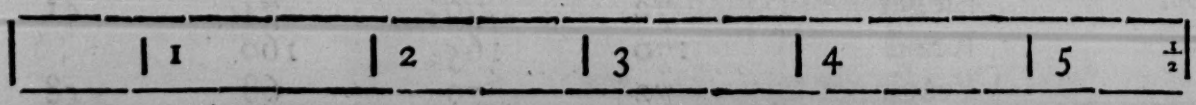
The Length of a Quarter of a Brasse at *Venice*, for measuring Woollens, *&c.*



The Geometrical half *French* Foot of 12 *French* Inches.



The Length of $\frac{1}{8}$ and $\frac{1}{16}$ of the *Paris* Ell or Aun, containing 5 Inches $5\frac{1}{2}$ Lines, or $65\frac{1}{2}$ Lines.



The Length of the half Foot of *Amsterdam*, the whole being 11 *French* Inches.

An

An Aun of *Denmark* or *Copenhagen* is reckoned one-third leſs than the *Engliſh* Yard, but with more Exactneſs, it is $24\frac{5}{11}$ Inches *Engliſh*.

The Aun of *Meinden* contains 15 *French* Inches, and two Lines; ſo that
100 Aunes of *Amſterdam* make a Trifle leſs than 166 Aunes of *Meinden*, and
200 Aunes of *Meinden* make 60 Aunes of *Amſterdam*.

At *Genoa*, four Sorts of long Meaſures are uſed, *viz.*
The Cane of 9 Palmes for Woollens,
The Cane of 10 Palmes for Linens,
The Braſſe of near $2\frac{1}{3}$ Palmes,
The Palme for Silks and Velvets.

The Palme is a common Span, making 8 Inches, and is a Meaſure uſed in moſt Parts of *Italy*.

The modern Palme of *Genoa* is 9 Inches 2 Lines, of which 4 Palmes is a Trifle leſs than the *Lyons* Ell.

Eight *Genoa* Canes make 15 Aunes of *Lyons*, and $3\frac{3}{4}$ Palmes of 9 to the Cane, make an *Engliſh* Yard.

100 Aunes of *Amſterdam* make a ſmall Matter more than 30 Canes at *Naples*; and
100 Canes of *Naples* make a Trifle more than $333\frac{1}{3}$ Aunes of *Amſterdam*.
17 Canes of *Naples* are counted equal to 32 Aunes of *Lyons*.

The Cane of *Sicily* makes $8\frac{1}{4}$ Palmes, *Marſeilles* Meaſure, on which Footing any larger Quantity may be regulated. The *Neapolitan* Palme is 8 Inches and 7 Lines.

100 Canes of *Barcelona* make $239\frac{1}{2}$ Aunes of *Amſterdam*, with a Trifle over; and
100 Aunes of *Amſterdam* make $41\frac{3}{4}$ Canes of *Barcelona*.

108 Varas of *Cadiz* are equal to 100 *Engliſh* Yards.

At *Peterſburgh* 8 Verſchocks, are 1 Arſchin, or 28 *Engliſh* Inches, and 1 Saſchine makes $7\frac{1}{4}$ *Engliſh* Feet, ſo that 100 Saſchines make $241\frac{2}{3}$ *Engliſh* Yards, and 100 *Engliſh* Yards make $41\frac{3}{8}$ Saſchines, a Trifle leſs.

100 Aunes of *Riga* make very near 130 Aunes of *Amſterdam*; and
100 Aunes of *Amſterdam* make 77 Aunes of *Riga*.

100 Aunes of *Revel* make $128\frac{8}{19}$ Aunes of *Amſterdam*; and on the contrary, 100 Aunes of *Amſterdam* make 78 Aunes of *Revel*.

The Aune of *Coningſberg* is near $\frac{1}{4}$ Part ſhorter than that of *Amſterdam*, ſo that 100 Aunes of this laſt, make about 120 of *Coningſberg*; and 100 Aunes of *Coningſberg*, about 80 of *Amſterdam*.

Elbing has the ſame Meaſure with *Dantzick*, which may be ſeen in the Table.

The Foot of *Stetin* is equal to that of *Amſterdam*.

100 Aunes of *Lubeck* make $83\frac{1}{3}$ Aunes of *Amſterdam*, and
100 Aunes of *Amſterdam* make 120 Aunes of *Lubeck*.

100 Aunes of *Bremen* are reckoned equal to $83\frac{1}{2}$ Aunes of *Amſterdam* and
100 Aunes of *Amſterdam* to make 120 Aunes of *Bremen*.

100 Aunes of *Erfort* make 61 of *Amſterdam*, and 100 of *Amſterdam*; make 164 of *Erfort*.

6 Aunes of *Langenſaltz* make 5 of *Amſterdam*, ſo that 100 Aunes of *Langenſaltz* make $83\frac{1}{3}$ of *Amſterdam*; and 100 of *Amſterdam* make 120 of *Langenſaltz*.

100 Aunes of *Leige* are reckoned 80 of *Amſterdam*; and
100 Aunes of *Amſterdam* make 125 Aunes of *Leige*.

The Aunes of *Malines*, *Ghent*, and *Bruges*, are equal to thoſe of *Antwerp*.

100 Aunes of *Liſle* make $103\frac{1}{4}$ Aunes of *Amſterdam*; and
100 Aunes of *Amſterdam* make $96\frac{3}{4}$ Aunes of *Liſle*.

100 Aunes of *Dieppe* make 171 of *Amſterdam*; and 100 Aunes of *Amſterdam* make $58\frac{1}{4}$ Aunes of *Dieppe*.

33 Canes for Linens
100 Canes for Woollens
$374\frac{1}{2}$ Palmes
107 Braſſes of $3\frac{1}{2}$ Palmes
} of *Rome*, make 100 Aunes of *Amſterdam*.

At *Florence* and *Leghorn*, the following Meaſures are uſed for Silks and Woollens, *viz.*

For Woollens { Palmes of which $349\frac{2}{9}$ / Braſſes of 2 Palmes, whereof $116\frac{3}{8}$ / Canes of 8 Palmes, whereof $29\frac{7}{9}$ } make 100 Aunes of *Amſterdam*.

For Silks { Palmes, of which $238\frac{2}{7}$ / Braſſes, of 2 Palmes, of which $119\frac{1}{7}$ / Canes, of 8 Palmes, whereof $29\frac{1}{14}$ } make 100 Aunes of *Amſterdam*.

At *Lucca*, two Sorts of Braſſes are in Uſe,

Of which { $114\frac{2}{7}$ for Woollens / $119\frac{1}{7}$ for Silks } make 100 Aunes of *Amſterdam*.

800 Palmes, or 100 Canes of *Naples*, make a Trifle leſs than 310 Aunes of *Amſterdam*.

100 Aunes of *Amſterdam* make $258\frac{1}{8}$ Palmes, or $30\frac{1}{8}$ Canes of 8 Palmes, which Palme exactly agrees with $\frac{3}{4}$ of an Aune, and 4 Lines of a *French* Foot at *Amſterdam*; and the Cane yields there $3\frac{1}{8}$ Aunes leſs 6 Lines of the ſaid Foot.

At *Palermo*, 100 Canes of Palmes make a Trifle more than $287\frac{3}{4}$ Aunes of *Amſterdam*; and

100 Aunes of *Amſterdam* make $33\frac{9}{25}$ Canes of *Palermo*.

At *Venice*, two Sorts of Braſſes are uſed, the one to meaſure Woollens, and the other for Linens, and Gold or Silver Stuffs; and that for the Woollens conſiſts of 2 Feet 8 Lines, or 296 Lines of the *French* Feet, and is longer by $6\frac{1}{4}$ *per Cent.* than the Braſſe for the Gold and Silver Stuffs; ſo that

100 Braſſes for Woollens make $106\frac{1}{4}$ for Gold and Silver Stuffs, *&c.* and

100 Braſſes for Gold and Silver Stuffs, make $94\frac{2}{17}$ Braſſes for Woollens.

100 Braſſes for Woollens } of *Venice*, 98 / make 92 $\frac{4}{17}$ } Aunes of *Amſterdam*.
100 Braſſes for Gold and Silver Stuffs }

100 Aunes of *Amſterdam* { 102 Braſſes for Woollens / $108\frac{1}{2}$ Braſſes for Gold, *&c.* Stuffs } of *Venice*.

100 Pies of *Smyrna* and *Seyde*, are computed to be 97 Aunes of *Amſterdam*.

100 Aunes of *Amſterdam*, make 103 Pies of *Smyrna*, *&c.*

100 Pies of *Conſtantinople*, make $97\frac{1}{3}$ Aunes of *Amſterdam*.

100 Aunes of *Amſterdam*, make $102\frac{5}{7}$ Pies of *Conſtantinople*.

100 Pies of *Aleppo*, are reckoned to make 98 Aunes of *Amſterdam*.

100 Aunes of *Amſterdam*, make 102 Pies of *Aleppo*.

100 Pies of *Alexandria* and *Roſette*, make 97 Aunes of *Amſterdam*.

100 Aunes of *Amſterdam*, make 103 Pies of *Alexandria*, &c. and the Correſpondency of all the other Meaſures in *Europe* are to be found in the following Table.

A TABLE

A TABLE of the AGREEMENT and CORRESPONDENCE which the LONG MEASURES of the PRINCIPAL PLACES in *EUROPE* have with each other.

The Aunes, or Ells of *Amsterdam*, *Haerlem*, *Leyden*, the *Hague*, *Rotterdam*, and other Cities of *Holland*; as also that of *Nuremberg*, being all equal, are comprehended under that of *Amsterdam*. As those of *Osnabrug* are under those of *France*; and those of *Berne* and *Basil* are equal to those of *Hamburgh*, *Franckfort*, and *Leipsick*.

Make	Aunes of *England*.	Aunes of *Holland*, or *Amsterdam*.	Aunes of *Brabant*, or *Anvers*, *Brussels*, &c.	Aunes of *France*, or *Paris*.	Aunes of *Hamburgh*, *Franckfort*, *Leipsick* and *Cologn*.	Aunes of *Breslaw* in *Silesia*.	Aunes of *Dantzick*.	Aunes of *Bergue* and *Drontheim*.	Aunes of *Sweden*, or *Stockholm*.	Aunes of *St. Gall*, for Linens.	Aunes of *St. Gall*, for Cloth.	Aunes of *Geneva*.	Canes of *Marseilles* and *Montpellier*.	Canes of *Toulouse*, *Albi*, *Castres*, &c.	Canes of *Genoa* of nine Palms.	Canes of *Rome*.	Yards of *England*, or *London*.	Varas of *Spain*.	Varas of *Portugal*, or *Lisbon*.	Cavidos of *Portugal*, or *Lisbon*.	Brasses of *Venice*. By Means of the above TABLE may be seen, *viz.* that 100 Aunes of *Holland* make 98¾ of *Brabant* or *Anvers*, and 58½ Aunes of *France*. And the same in Respect of the Agreement of all other Measures therein mentioned, which may be easily found, by going along the Lines, to the Column of the Measure sought: For Example; if it is wanted to be known how many Canes of *Marseilles* or *Montpelier*, make 100 Aunes of *France*, look for this latter in the left Hand Column, and from thence trace the Line to the Column which has at the Head, *Canes of Marseilles and Montpelier*, and it will be found, that 59⅘ Canes make the 100 Aunes, and so for the Rest.

The following are the Meaſures of France *and other Countries reduced into Feet, Inches, and Lines, of which* 12 *Lines make an Inch, and* 12 *Inches a Foot, which may in ſome Meaſure illuſtrate the preceding Table.*

	Feet.	In.	Lines.	
The Aune of *Paris* contains	3	7	8	little more
The Cane of *Provence*, *Avignon*, and *Montpelier*	6	0	9	
The Cane of *Toulouſe*, and the Varra of *Arragon*	5	5	6	
The Yard of *England*	2	9	11

The Foot of *Liſbon*	917
The Foot of *Copenhagen*	965
The Foot of *Dantzick*	944
The Foot of *Riga*	1831

The ſame receptive dry Meaſure as is uſed for Corn ſerves alſo in *England* for Salt, Lime, Coals, *&c.* they being all meted by the *Wincheſter* Meaſure, tho' the firſt is now generally ſold from the Pits by Weight, reckoning 7lb. Avoirdupois to the Gallon, or 56lb. to the Buſhel; in Freight-Computation 42 Buſhels is accounted a Ton, 5 Buſhels is a Sack, and 4 Cwt. a Quarter. When ſold by Meaſure this Commodity and Coals muſt be heaped, or elſe five ſtricken Pecks are allowed to the Buſhel, and of the latter 36 Buſhels make a Chaldron. In other Parts of *Europe*, Salt, which is a more ſtaple aud current Merchandize than almoſt any other, is bought and ſold by different Meaſures, according to the ſeveral Places of its Diſpatch. For at *Amſterdam*, where vaſt Quantities are imported, it is ſold by the *Cent.* of 404 Meaſures, or Scheppels, which *Cent.* is reckoned to be ſeven Laſts or 14 Tons, and the Laſt to weigh 4000lb. ſo that the ſaid ſeven Laſts or 14 Tons make 28000lb. called the *Cent* of Salt, which alſo contains 208 Sacks, tho' ſome of this Commodity is much heavier than others. Salt is carried to *Amſterdam* and all the Cities of *Holland*, *Flanders*, *Brabant*, *Zealand*; other Places of the *North*, and up the *Baltick*, from *Marans*, *Brouage*, *Sude*, the Iſles of *Rhé* and *Oleron*; *Meche*, *Rochelle*, and other Places of *Saintonge*, and the Country of *Aunis*; from *Poliguen*, *Croiſil*, *Guerand*, the Bay of *Bouaneuf*, and other Parts of *Bretagne*; from *St. Ubes* in *Portugal*, and from *Cadiz*, *Alamat*, and *Ivica* in *Spain*.

In the Cities and other Parts of *France*, Salt is ſold by the Muid, whoſe Size varies, according to the different Places of its Manufacture and Diſpatch: At *Paris* this Meaſure is reckoned to contain 12 Setiers, or 48 Minots, which Minot is alſo divided into leſs Fractions.

The *Cent.* of Salt, from *Marans*, *Brouage*, *Sude*, the Iſles of *Rhé*, *&c.* contains 28 ſtricken Muids, and each 24 Boiſſeaux; which yields at *Amſterdam* 11½ Laſts or 23 Tons, a little more or leſs, according to the good or bad Metage made at the Ponds, or its Waſte in the Voyage. The Salts of the Iſle of *Rhé* and *Brouage* are deemed heavier than thoſe from *Oleron*, *Marans*, *Mornac*, &c. And the *Cent.* of theſe weighty Salts yields at *Hamburgh* 11¼ to 11½ Laſts, which are 45 to 46,000lb.

In *Denmark*, or *Copenhagen*, the ſaid *Cent.* only renders 9½ Laſts, the Laſt being reckoned here equal to 18 Tons, and the 50 Laſts to correſpond with 52 of *Coningſberg*; at which Place the *Cent.* produces about 10 Laſts, or 40,000lb.

At *Riga* the ſaid *Cent.* yields the ſame Meaſure as at *Coningſberg*, and about 6¼ Laſts of *Riga* make the great *Cent.* of *Amſterdam*.

The ſaid French *Cent.* produces at *Dantzick* 11½ to 12 Laſts that Meaſure, of which Laſts 7¼ to 7½ make likewiſe the great *Cent.* of *Amſterdam*.

At *Stetin* in *Pomerania*, the *French Cent.* yields 10 Laſts, making 40,000lb. Meaſure and Weight of the ſaid Place.

In *Portugal*, Salt is bought by the Muid, of which four make a Laſt, and ſeven the *Cent.* of *Amſterdam*, containing, as above, 404 Scheppels.

At *Alamat* and *Ivica* it is ſold by the Modin, which weighs from 27½ to 28 Cwt. *Engliſh*, and at both Places the Quantities made are prodigious, being all for the King's Account.

Of Liquid Meaſures in *Great-Britain*, the ordinary ſmalleſt one is called a Pint, with its Fractions, of which two make a Quart, two Quarts make a Pottle, two Pottles make a Gallon; eight Gallons make a Firkin of Ale, and nine a Firkin of Beer; two Firkins a Kilderkin, and two Kilderkins a Barrel; one Barrel and half a Hogſhead, two Hogſheads a Pipe or Butt, and two Pipes a Ton.

The *Engliſh* Wine Meaſures are ſmaller than thoſe of Ale and Beer, and are proportioned as 4 to 5; ſo that four Gallons Beer Meaſure are almoſt five Gallons of Wine Meaſure; of which latter a Gallon is 231 Cubical Inches, and eight Pounds one Ounce, and 11 Drams Avoirdupois of Rain Water. Of theſe Gallons a Rundlet of Wine holds eighteen, half a Hogſhead 31½ Gallons, a Tierce 43 Gallons, a Hogſhead 63 Gallons, a Puncheon 84 Gallons, a Pipe or Butt 126, and a Ton 252 Gallons, or 2016 Pints; by which Meaſure is ſold Wine, Brandy, Vinegar, Cyder, *&c.*

Foreign Veſſels for containing Wine, Vinegar, *&c.* have various Denominations, according to their different Sizes, and Places of their Fabrication.

The Wœders of *Germany*, for holding Rheniſh and Moſelle Wines, are different in their Gauges; ſome containing 14 Aumes *Amſterdam* Meaſure, and others more, or leſs.

The Aume is reckoned at *Amſterdam* for eight Steckans, or 20 Verges or Veertels; or for $\frac{1}{6}$ of a Ton of two Pipes; or four Barrels of *France* or *Bourdeaux*, which $\frac{1}{5}$ is called at this latter Tierçon, becauſe three of them make a Pipe, or two Barrels, and fix the ſaid Ton.

The Steckan is 16 Mingles, or 32 Pints; and the Verge or Veertel is in reſpect of ſaid *Rheniſh* and *Moſelle*, and ſome other Sorts of Wine, of ſix Mingles; but in meaſuring Brandy, it conſiſts of ſix $\frac{1}{6}$ Mingles. The Aume is divided into four Anckers, and the Ancker into two Steckans or 32 Mingles.

The Ancker is taken ſometimes for $\frac{1}{24}$ of a Ton, of four Barrels; on which Footing the *Bourdeaux* Barrel ought to contain at *Amſterdam*, when the Caſk is made according to the juſt Gauge, 12$\frac{1}{2}$ Steckans, or 200 Mingles, Wine and Lees; or 12 Steckans or 192 Mingles racked Wine; ſo that the *Bourdeaux* Ton of Wine contains 50 Steckans or 800 Mingles, Wine and Lees; and 48 Steckans, or 768 Mingles, of pure Wine.

The Barrels or Poinçons of *Nantes*, and other Places on the River *Loire*, contain only 12 Steckans *Amſterdam* Meaſure. The Wine Ton of *Rochelle*, *Cognac*, *Charente*, and the Iſle of *Rhé*, differs very little from the Ton of *Bourdeaux*, and conſequently from the Barrels and Pipes.

A Ton of Wine of *Chaloſſe*, *Bayonne*, and the neighbouring Places, is reckoned 60 Steckans, and the Barrel 15, *Amſterdam* Meaſure.

The Muid of *Paris* contains 150 Quarts, or 300 Pints, Wine and Lee, or 280 Pints clear Wine; of which Muids three make a Ton, and the Franctions are,

The Muid	containing	36 Setiers
The Setier		4 Quarts
The Quart		2 Pints
The Pint		2 Chopins
The Chopin		2 Demi-Setiers
The Demi-Setier		2 Poiſſons

The Muid is alſo compoſed of Pipes, Poinçons, Quarteaux, Queues, and Demi-Queues. Theſe Poinçons of *Paris* and *Orleans* contain about 15 Steckans, *Amſterdam* Meaſure, and ought to weigh with the Caſks, 666lb. a little more or leſs.

In *Provence* they reckon by Milleroles. The Millerole of *Toulon* weighs about 130lb. Mark, and ought to contain 66 *Paris* Pints, which is nearly equal to 100 Pints of *Amſterdam*.

In Lower *Languedoc*, as at *Montpelier*, &c. the Muid contains 18 Setiers, and the Setier 32 Pots or Peckez, ſo that the Muid makes 576 Pots, and yields at *Amſterdam* 35 Steckans, or 560 Mingles; ſo that the Pot or Peche of *Montpelier* is leſs than the Mingle: But the Caſks of *Montpelier* are never of an equal Gauge, ſome Muids containing more than others.

The Butts or Pipes from *Cadiz*, *Malaga*, *Alicant*, *Benicarlo*, *Saloe*, and *Mataro*, in *Spain*, and from the *Canaries* ſubject to that Crown, from *Liſbon*, *Oporto*, and *Fayal* in *Portugal*, are very different in their Gauges, though in Affreightments are all reckoned two to the Ton.

Vinegar is meaſured as the Wine; but as the Meaſures for Brandies are different, I ſhall now give an Account of them.

Theſe Spirits from *France*, *Spain*, *Portugal*, &c. are generally ſhipped in large Caſks, called Pipes, Butts, and Pieces, according to the Places from whence they are exported, and differing in their Contents, not only from one another, but even among thoſe embarked at the ſame Place.

In *France* Brandy is ſhipped in Caſks, called Pieces at *Bourdeaux*, and Pipes at *Rochelle*, *Cognac*, the Iſle of *Rhé*, *Nantes*, and other neighbouring Places; which contain, as before obſerved, ſome more and ſome leſs, even from 60 to 90 *Amſterdam* Verges, or Veertels, according to the Capacity of the Veſſels, and the Places they come from, which being reduced into Barrels, will ſtand as follows, *viz*

At

At *Rochelle*, *Cognac*, the Iſle of *Rhé*, and the County of *Aunis*	27 Veertels
At *Nants*, and ſeveral Place of *Bretagne* and *Anjou*	27 Veertels
At *Bourdeaux* and different Parts of *Guienne*	32 Verges
At *Amſterdam* and other Cities of *Holland*	30 Veertels
At *Hamburgh* and *Lubeck*	30 Verges
At *Embden*	27 Verges

In *Provence* and *Languedoc* Brandy is ſold by the Quintal; the Caſks included, and at *Bruges* in *Flanders* the Verges are called Seſters, of 16 Stops each, and the Spirits ſold at ſo much *per* Stop.

The Mingle of Brandy at *Amſterdam* weighs 2lb. 4 oz. Mark Weight, and the Verge or Verteel 14lb. a little more or leſs; at which Rate the 30 Verges muſt weigh 420lb.

The Pieces of Brandy ſold at *Bourdeaux* commonly contain from 50 to 80 Verges, and 32 Verges is reckoned, as has been mentioned, to a Barrel; the Verge contains $3\frac{1}{2}$ Pots, or a little leſs, and the Barril near 110 Pots, *Bourdeaux* Meaſure.

Olive Oil is alſo ſhipped in Caſks of various Sizes, according to the Cuſtom of the Places where it is embarked, and for the Conveniency of Stowage. *Gallipoly*, *Leghorn*, *France*, *Majorca*, and ſeveral other Parts of *Spain*, *Portugal*, &c. ſupply the northern Parts of *Europe* with this Commodity, as well for Eating, as cleanſing of Woollens, and making of Soap. In *England* it is ſold by the Ton of 236 Gallons, and at *Amſterdam* by the Ton of 717 Mingles, or 1434 Pints; the Caſks it is imported in contain from 20 to 70 Steckans, at 16 Mingles *per* Steckan, the Mingle weighing 2lb. and 2, 3, or 4 Ounces, according to the Place of the Oil's Growth.

It is reckoned that the Barrel of Oil at *Genoa* weighs near $187\frac{1}{2}$lb. Nett Weight, which is equal to 125lb. at *Amſterdam*, and 14 of theſe Barrels or thereabouts make the ſaid 717 Mingles, which ought to weigh 1750lb. at the laſt mentioned Place.

At *Leghorn* the Barrel of Oil weights 85lb. which a little exceeds 59lb. at *Amſterdam*, and is more frequently ſhipped in Jars and Flaſks than Caſks.

In *Provence* it is ſold by Millerols of 66 *Paris* Pints, which make about 100 Pints of *Amſterdam*.

From *Spain* and *Portugal* it is brought in Pipes or Butts of different Gauges; at the firſt it is ſold by Roves, of which about 40 go to the Butt, and at the latter by Almoudas, whereof 26 make a Pipe; the Almouda contains 12 Canadors, and the Canador makes near a Mingle at *Amſterdam*.

Train Oil is ſold in *England* by the Ton; and at *Amſterdam* by the Barrel of 12 Steckans.

Honey is ſold with us by the Pound, though in *Amſterdam*, where great Quantities are imported from *Bourdeaux*, *Bayonne*, *Bretagne*, *Provence*, *Hamburgh*, *Bremen*, and ſeveral other Places, it is ſold by the Ton, or Barrel.

Beer at *Amſterdam* is commonly put in Tons or Barrels, half, quarter, and half-quarter of Barrels, and ſometimes in Pipes, Butts, and other ſuch large Caſks for their *Eaſt* and *Weſt India* Proviſions. The Ton or Barrel ought to contain 1 Aume, or 8 Steckans, making 128 Mingles, and the other Veſſels in Proportion.

Of COINS, both real and imaginary.

IN *England*, the Copper ones are a Farthing and Half-penny, the latter being two of the former.

In fine Silver of the Standard of 11 oz. 2 dwt. called Sterling, the ſmalleſt Piece is one Penny, others of two Pence, three Pence, four Pence called alſo a Groat, and ſix Pence, a Shilling, or 12 Pence, a Half-Crown, or two Shillings and ſix Pence, and a Crown, or five Shillings.

In fine Gold of 22 Carats, called alſo Sterling, a Guinea, now worth 21 Shillings, half a Guinea, ſome few two and five Guinea Pieces, and fewer $\frac{1}{4}$ ones.

Accounts are kept in Pounds, Shillings, and Pence, the firſt and laſt imaginary, and Exchanges are calculated in one of theſe two.

In *France*, the Gold Species are Louis, with its Diminutions of $\frac{1}{2}$ and $\frac{1}{4}$, and its Augmentations of double and quadruple.

Of

Of Silver the Crown or Ecu, with its Fractions, which at preſent paſſes for 3 Livres, though it has been up to more than 7 Livres.

Of Silver and Braſs mixed, the Sol. And

Of Copper the Liard, which is $\frac{1}{4}$ of a Sol, or 3 Deniers. A Double 2 Deniers. And a Denier or $\frac{1}{12}$ of a Sol.

Accounts are kept throughout the Kingdom in Livres, Sols, and Deniers, of which 12 Deniers make a Sol, and 20 Sols a Livre; their Exchange is by the Crown of 3 Livres or 60 Sols.

In *Holland*, the Gold Coins are

Ducatons, Ducats, Souverains, Roſe-Nobles	worth	15	Guilders, and 15 Stivers
		5	—— 5
		15	
		11	, though of theſe very few are ſeen.

Silver Coins.

Ducatons	worth	3	Guilders and 3 Stivers
Drie-Guilders		3	
Rixdollar or Patacon		2	10
Croons		2	Of this Coin very few to be met with
Dollars		1	10
Goud Guilders, or Golden Guilders		1	8
Guilders		1	

Here are alſo $\frac{1}{2}$ and $\frac{1}{4}$ Rixdollars; Schellings, of which ſome are worth 6, and others only 5 Stivers; here are alſo Stivers, of which 20 make a Guilder, divided into 2 Deniers de gros, or 8 Duytes, or 16 Penins, though theſe two laſt Denominations are imaginary.

Here are beſides ſeveral other Coins, particularly ſome ſmall ones, of 2, 3, 4, 8, and 12 Stivers.

Accounts are kept at *Amſterdam* and *Rotterdam*, the two chief trading Places, in Guilders, Stivers, and Penins; ſo that although Goods are ſold for other Species, ſuch as Livres de gros, *&c.* yet all are reduced to the above Denominations for the Entries into their Books. The Exchanges are made with us in ſo many Schellings to a Pound Sterling, though to moſt other Places in Deniers de gros.

Foreign Coins are very many, both of Gold and Silver, but are not current here at any fixed Price, but, as other Commodities, riſe and fall according to their Plenty or Scarceneſs.

In *Ruſſia*, 3 Coppecks is an Altin, 10 Coppecks 1 Grieve, 25 Coppecks is a Polpoltin, 50 Coppecks is a Poltin, 64 Coppecks is a Dollar, and 100 Coppecks or 19 Grieves is a Rouble; an *Engliſh* Crown paſſes there by Weight, for 120 to 130 Coppecks.

Accounts are kept in the trading Places of this Empire, in Roubles, Grieves, and Moſcoſques, 2 of which make a Coppeck; or in Roubles and Coppecks. Their Exchange is only on *Holland*, and negociated in either Roubles or Coppecks.

In *Norway*, a Rixdollar is ſix *Daniſh* Marks, a Mark ſixteen Shillings, and at *Cooperwyk*, *Laarwyk*, *Mardou*, *Vlekeren*, *Jedder*, *Stafanger*, *Romſdal*, and *Drontheim*, the Rixdollar is worth 4 Oorts, an the Oort 24 *Daniſh* Schellings.

In *Denmark*, the Rixdollar is worth 4 Oorts, or ſix *Daniſh* Marks, the Oort 24 Schellings, or $1\frac{1}{2}$ Mark, the Mark 16 Schellings, and the Schelling three Penins; 2 *Daniſh* Marks make 1 Mark Lubs, and at *Bergen*, Accounts are kept in *Daniſh* Rixdollars, Marks, and Schellings. But little is done in Exchanges from this Kingdom, and the few that are tranſacted from *Copenhagen*, are in *Daniſh* Rixdollars of ſix Marks for current Rixdollars of *Amſterdam*.

In *Stockholm* and the Reſt of *Sweden*, the Dollar is worth 4 Marks, and the Mark 8 Oorts, or Runſticks, which is an imaginary Specie; 2 Marks make a Mark Lubs, and here are Copper Rixdollars of 6 Dollars or 24 Marks; here is alſo Silver Money called Silvergelt, or Silvermunt, and one Mark Silver Money is reckoned worth $2\frac{1}{2}$ Copper. The Silver Dollar is divided into 3 Marks, and the Mark into 3 Oorts; though they have no ſuch Coin as a Runſtic, or Rontſtuken, yet they reckon two of their Copper Farthings to a Runſtic, 3 Runſtics to a Witton, $10\frac{2}{3}$ Wittons to a Copper Dollar.

Accounts are kept in this Kingdom in Dollars, Marks, and Oorts, and the Exchange is made between a Copper Rixdollar of 24 Marks of *Stockholm*, and a current Rixdollar of 50 Stivers of *Amſterdam*.

At *Cracow* in *Poland*, their common Coins are, Gros, of which 18 make 1 Oort, and 30, one Guilder; a Specie Dollar is 40 Gros, and worth about two Shillings Sterling. A Rixdollar is 5 Oorts, or 90 Gros; a Gold Ducat is 6 Guilders. A Croſs, and a Specie Dollar, paſs at uncertain Value from 3 to 4 Guilders, as there is a Premium upon them that ſometimes amounts to 10 and 15 *per Cent*. Accounts are kept here in Guilders, Gros, and Deniers, of which latter 18 make a Gros, and 30 Gros a Guilder, or in Rixdollars and Gros, reckoning 90 of the latter to the former.

At *Riga* the Rixdollar is 90 Gros, and divided alſo in 15 *Riga* Marks, and into 3 *Poliſh* Guilders; the *Poliſh* Guilder muſt therefore conſequently make 5 *Riga* Marks, and is alſo divided into 30 *Poliſh* Gros; a Gros is 3 Whittons, or 6 black Ditto. A Voirding is 1½ Gros, or 41½ Whittens, or 9 black Ditto.

Accounts are here kept in Rixdollars and Gros, and it is in the former of theſe Species that Exchanges are made with Rixdollars current of *Amſterdam*.

At *Revel* and *Nerva*, the Rixdollars conſiſt of 64 Whittens or 90 Gros: Accounts are kept in theſe two Places in Rixdollars and Whittens, where they have likewiſe Copper Plate Dollars, which they uſe in Exchange.

At *Coningſberg*, *Elbing*, and *Dantzick*, the Rixdollar is divided into 90 *Poliſh* Gros, or into 3 *Poliſh* Guilders, and the Gros into 18 Penins or Deniers.

At theſe Places Accounts are kept in Rixdollars and Gros, or in *Poliſh* Guilders, called alſo Timpfhen, Gros and Deniers or Penins. They exchange on *Amſterdam* in *Poliſh* Gros, for a Livre de Gros of 6 Guilders current Money of *Amſterdam*, and on *Hamburgh* for the Rixdollar.

At *Stetin*, 36 Stivers, or Schellings Lubs, make a Rixdollar, and Accounts are kept here in thoſe Species, and Remiſſes made in them.

At *Lubeck*, the Rixdollar is worth 3 Mark Lubs, or 48 Schelling Lubs; the Mark being divided into 16 Schellings, and the Schelling into 12 Penins or Deniers. Accounts are kept here in Marks, Schellings and Deniers or Penins Lubs, in which their Exchanges are made.

At *Breſlaw* the Rixdollar is worth 30 Silver Gros, and the Gros 12 Fenins. It is alſo divided into 90 Creutzers, and the Creutzer into 4 Fenins, and the ſaid Rixdollars are called imperial Mony, augmented by 17 Creutzers.

Accounts are kept at this Place in Rixdollars, and Silver Gros and Penins, in the firſt of which Species Exchanges are made on *Amſterdam* for a certain Number of Stivers, Bank Money, and on *Hamburgh* for Rixdollars of *Breſlaw*, againſt Rixdollars of *Hamburgh* Bank.

At *Hamburgh*, the Mark, or Mark Lubs, is divided into 16 Stivers Lubs, and the Setiers into 12 Deniers Lubs. The Rixdollar is 48 Stivers Lubs, or 3 Mark Lubs, beſides which many foreign Species are current at this Place, ſuperfluous to be mentioned here, as they will be taken Notice of where they are coined.

Here Accounts are kept in Marks, Schellings, and Deniers Lubs Bank Money by thoſe who have Caſh in the Bank; but by thoſe who have not, their Books are generally kept in Rixdollars, Schellings, and Deniers current Money. This is a great Place of Exchanges, in which it negociates with moſt Parts of *Europe*. I ſhall therefore be a little particular in their Currency.

Hamburgh gives to

London, from 32 to 38 Schellings Flemiſh *per* Pound Sterling.

Holland, Slech Dollar for 30 to 35 Stivers, and often Rixdollars for Rixdollars with a Premium.

Berlin, Rixdollars for Rixdollars, with a Benefit of ſo much *per Cent*.

Leipſick and *Dantzick*, ditto.

Flanders, Mark Lubs, for *Flanders* Stivers.

Sweden, the Rixdollar, for Copper Marks, and ſometimes at a Premium of ſo much *per Cent*.

Muſcovy, the Rixdollar for an uncertain Number of Coppecks.

Franckfort, the Sletch Dollar, againſt ſome Creutzers of Exchange, or Rixdollar for Rixdollar at ſo much *per Cent*.

Nuremburgh, the Merchant's Dollar, for current Creutzers, and Rixdollar for Rixdollar, with a Premium.

France, a Number of Schellings Lubs, for the *French* Crown of three Livres.

Spain, Ditto, for the Ducat of 375 Maravedies.

Portugal, a Number of Deniers, for the Cruſade of 400 Reas.

Geneva, the ſame as with *Paris* and *Lyons*; and it is a Cuſtom to draw Bills upon *Lubeck* payable in *Hamburgh*; the Term Lubs being derived from the former of theſe Places, once the Capital of the *Hanſe* Towns, as it is here that the Schellings Lubs are coined.

Venice, a Number of Groots, for a Ducat of 24 Soldi Banco.

At *Bremen*, the current Coins are a Rixdollar, divided into $1\frac{1}{2}$ Double, or 3 ſingle *Bremen* Marks, or 24 double Schellings, or 6 Head Pieces, or 72 Gros, or 360 Swaar. A double Mark is 48 Gros, 4 Head Pieces or 240 Swaar. A double Schelling is 3 Gros or 15 Swaar. A Gros is 5 Swaar, and a Swaar is a Penin.

At this Place Accounts are kept in Rixdollars and Gros, and it exchanges on *Amſterdam* Rixdollars of 72 Gros, for Rixdollars of 50 Stivers Banco.

At *Leipſick*, and *Naumbourgh*, a Rixdollar is 24 Gros, and the Gros 12 Fenins. Said Dollar is likewiſe $1\frac{1}{2}$ Rix Gould or Rix Guilder, and this Piece is worth 16 Gros. A Ducat is 4 Guilders, or $2\frac{2}{3}$ Rxidollars; beſides which they have 8, 4, 2, $1\frac{1}{2}$ and $1\frac{1}{4}$ Gros Pieces, and ſome ſtill ſmaller, of 9, 8, 6, 4, and 3 Fenings.

Theſe two Places keep their Accounts in Rixdollars, and Crowns, Gros, and Fenings, and their Exchange Money is worth 10 to 20 *per Cent.* more than the current. If Bills are made payable here in current Money, they are diſcharged $\frac{3}{4}$ of their Amounts in Pieces of 4 Gros, and the other $\frac{1}{4}$ in Gros Pieces; but if they are drawn to be paid in Exchange Money they muſt be ſatisfied in Rixdollars, often termed Crowns in Exchange.

At *Brunſwick* and *Oſnaburg* the Rixdollar is divided into 36 Mariengros, and the Mariengros into 8 Penins, in which Specie their Exchanges are alſo negociated.

At *Berlin*, the Rixdollar is worth 3 Guilders or 90 Gros, about 4*s.* 6*d.* Sterling, a Guilder 20 Brummers, or 30 Gros, 18 Gros an Oort, and 5 Oorts the Rixdollar. A Brummer or Abraſe is $1\frac{1}{2}$ Gros, 1 Groſs is two Polchen or 18 Penins, and 1 Schelling is 6 Penins or Deniers.

In this City and the Kingdom Accounts are kept in Guilders, Gros, and Penins, and the Exchanges made in Rixdollars, for *Amſterdam*, *Hamburgh*, *Augſburgh*, *Nurembergh*, *Breſlaw*, *Switzerland*, and *London*, when any Thing is done direct here, though this is very ſeldom, as Tranſactions of this Nature commonly paſs through *Amſterdam* and *Hamburgh*.

At *Zurich*, the Rixdollar or Ducat is worth 28 Batz and 2 Schellings of this Money, which are worth more than the *Switz* Batz, and leſs than thoſe called good Batz; the Guilder of *Zurich* called the good Guilder, is 16 Batz, or 40 Schellings of this Place. The Batz is worth $2\frac{1}{2}$ *Zurich* Schellings; the Schelling 6 Anſters, or $1\frac{1}{5}$ Creutzer, of which latter 4 make the Batz.

At this Place Accounts are kept in Rixdollars, Creutzers, and Hellers; their Exchange is commonly made in *Zurich* Money; reckoning their Rixdollars, worth about 4*s.* 6*d.* Sterling, at 108 of their Creutzers.

At *Zurzach*, moſt of the *Switz* Coins are current; and

At *Schafhouſe*, the Rixdollar is worth 27 good Batz, the Guilder of *Zurich* is worth here 15 ditto. The good Batz makes 10 Baps, or 4 Creutzers.

At *Berne*, the Rixdollar is worth 30 common *Switz* Batz. The good Guilder of *Zurich* is worth 16 Batz, and 2 Schellings *Switz*; and the Batz is worth 4 Creutzers, or $2\frac{1}{2}$ Schellings.

At *St. Gal*, the Rixdollar is worth $25\frac{1}{2}$ Batz, or 102 Creutzers. The Guilder is 15 Batz, or 60 Creutzers. The Schelling is 6 Creutzers or $1\frac{1}{2}$ Batz. The good Batz is 5 Creutzers. The common Batz 4 Creutzers. The Creutzer 4 Hellers or Penins.

In this Canton, Accounts are kept in Guilders, Creutzers, and Penins, *St. Gal* Money, or under the ſame Denominations, in the Coins of the Empire. It gives in Exchange to *Vienna*, *Nurembergh*, *Augſburgh*, and *Bolſano*, a Number of its

Guilders, for others of ſaid Places; the ſame to *Venice* for Ducats Banco; ditto to *Geneva* for Crowns of that Place; and the like to *Lyons* for the *French* Crown.

At *Baſil*, the Rixdollar conſiſts of 27 good Batz, the good Guilder 15 good Batz, or 60 Creutzers. The good Batz is 10 Raps, or 4 Creutzers. The Guilder of the Empire is here worth 25 Schellings or Plapperts, or 20 Gros; the Gros $7\frac{1}{2}$ Raps; and the Plappert 6 Raps.

Accounts are variouſly kept in this Canton, ſome in Rixdollars, Schellings and Deniers, ſome in Livres, Schellings and Deniers, ſome in Rixdollars, Creutzers, and Penins, and ſome in Guilders, Creutzers, and Penins; they exchange as *Zurich* does, and their Rixdollar is worth about 4*s*. 6*d*. Sterling.

At *Straſburgh*, the Rixdollar is valued at $1\frac{1}{2}$ Guilders, or 15 Schellings, 90 Creutzers, 3 Livres or 60 Sols. A Guilder is 10 Schellings, or 60 Creutzers, or 2 Livres, or 4 Sols. A Livre is 20 Sols, 5 Schellings, or 30 Creutzers. A Schelling is 6 Creutzers, or 4 Sols. Exchange from hence is tranſacted with moſt Places in the Silver of *Alſace*, which is the ſame with the Silver of *France*: the Rixdollar being here reckoned at 3 Livres *Tournois*, the Agio being commonly from 1 to 2 *per Cent*.

At *Geneva* the Gold Coins are Piſtoles, worth 40 Florins 3 Sols, or 11 Livres 10 Sols *Tournois*. Ducats worth 22 Florins, or 6 Livres, 6 Sols, or ſomething better, though few of theſe Coins are now met with. The Silver Monies are Crowns, worth 10 Florins 6 Sols, or 3 Livres. Pieces worth 1 Florin 9 or 10 Sols *Tournois*. Pieces of 10 Sols 6 Deniers, or 5 Sols *Tournois*. The Copper are, Pieces of 6 Sols, 3 Sols, 1 Sol, and 6 Deniers, 9 Deniers, and 6 Deniers of *Geneva*; beſides which there are Silver Pieces of 2 Florins, and 1 Florin, though of theſe there remain but few. The *Geneva* Florin is worth 5 *per Cent*. leſs than 6 Sols *Tournois*. The Exchanges are in Crowns of 3 Livres *Tournois*, called alſo by ſome Rixdollars, and almoſt all the foreign Coins of *Europe* are current there.

At *Cologn* the Rixdollar, computed at 4*s*. 6*d*. Sterling, is divided into 78 Albuſſes; the Albus into 12 Deniers, or 2 Creutzers, and the Creutzers into 4 Hellers. The Dollar is worth here 52 Albuſſes. The Guilder 24 Albuſſes. The Blaſſart 4 Albuſſes; and Accounts are kept in Rixdollars, Albuſſes, and Penins, and their Exchanges with *Amſterdam* are Rixdollars of 78 Albuſſes, for Rixdollars current Money there at a fluctuating Premium.

At *Frankfort ſur Maine* and *Hanaw*, the Rixdollar is 90 Creutzers, and the Creutzer 4 Hellers; but as the current and exchange Money is ſo very different, and not readily to be calculated, I herewith add a Computation made by Monſieur *John Peter Ricard*, in Hopes it may, at leaſt to ſome, be both agreeable and uſeful.

100 Guilders of 65 Creutzers exchange Money, make
108 Guilders, 20 Creutzers of 60 Creutzers exchange Money.
87 Rixdollars, 62 Creutzers, of 74 Creutzers ditto.
81 Rixdollars, 6 Creutzers, $3\frac{1}{4}\frac{3}{1}d$. of 90 Creutzers current Money.
132 Guilders, 6 Creutzers, or $3\frac{1}{4}\frac{3}{1}d$. of 60 Creutzers current Money.

100 Guilders of 60 Creutzers exchange Money, make
92 Guilders, 20 Creutzers of 65 Creutzers exchange Money.
81 Rixdollars, 6 Creutzers of 74 Creutzers ditto.
81 Rixdollars, 27 Creutzers $\frac{1}{4}\frac{3}{1}d$. of 90 Creutzers current Money.
121 Guilders 57 Creutzers $\frac{1}{1}\frac{3}{4}d$. of 60 Creutzers ditto.

100 Guilders of 60 Creutzers current Money, make
75 Guilders, 45 Creutzers of 65 Creutzers Exchange Money.
82 Guilders of 60 Creutzers, ditto.
66 Rixdollars, 36 Creutzers, of 74 Creutzers, ditto.
66 Rixdollars, 60 Creutzers, of 90 Creutzers current Money.

100 Rixdollars of 74 Creutzers Exchange Money, make
113 Guilders, 55 Creutzers, of 65 Creutzers exchange Money.
123 Guilders, 20 Creutzers of 60 Creutzers ditto.
100 Rixdollars 24 Creutzers $1\frac{1}{4}\frac{3}{1}d$. of 90 Creutzers current Money.
150 Guilders, 24 Creutzers $1\frac{1}{4}\frac{3}{1}d$. of 60 Creutzers ditto.

100 Rix-

100 Rixdollars of 90 Creutzers current Money, make
113 Guilders, 35 Creutzers, of 65 Creutzers exchange Money.
123 Guilders of 60 Creutzers, ditto.
99 Rixdollars, 54 Creutzers, of 74 Creutzers ditto.
150 Guilders of 60 Creutzers current Money.

N. B. 1 Guilder of 60 Creutzers is reckoned worth about 3*s.* Sterling.

At this Place Accounts are kept in Rixdollars and Crutzers, and the Difference of the Exchange Money from the current, is ſhewn in the preceding Calculation.

At *Vienna* many foreign Coins have a Currency, but their own is the Imperial Ducat of 4 Guilders, the Rixdollar in Specie of 2 Guilders. The imaginary Rixdollar of 1½ Guilder, or 90 Creutzers, the imaginary Guilder of 60 Creutzers. The Schelling of 7 Creutzers and 2 Deniers. A Gros is 3 Creutzers, 2 Deniers. A Patre, is 4 Creutzers. A Penin and Denier is the ſame; and 3 Deniers are a Dreyer. Accounts are kept here in Guilders, Creutzers, and Penins, reckoning 8 Penins to a Creutzer. This Place exchanges with *London* a Rixdollar for an uncertain Number of Pence, commonly between 4 and 5 Shillings. With *Holland* the ſame for an uncertain Number of Stivers. With *Nuremberg* and *Augsberg*, Rixdollars for Rixdollars with an uncertain Premium. With *Venice* an uncertain Number of Rixdollars for 100 Ducats Banco. And with *St. Gal* 100 Guilders of 60 Creutzers, for an uncertain Number of thoſe Guilders.

At *Embden*, the Money moſt in Uſe are Rixdollars, valued at 2 Guilders, 14 Stivers; and their Exchange is almoſt confined to *Amſterdam*, between Rixdollars and Rixdollars, and ſometimes Guilders againſt Guilders, both with a Premium of ſo much *per Cent*.

Bolzano is a Place conſiderable in Exchanges with ſeveral Parts of *France*, *Italy*, *Switzerland*, and *Germany*. The Species moſt current here, are the *German* Rixdollars and Dollars, the former worth 90 and 93 Creutzers; the Guilder of 60 Creutzers is likewiſe in Uſe here. It exchanges with Lyons an uncertain Number of Creutzers for a *French* Crown. With *Rome* the ſame for a Crown. With *Florence* Ditto for that Crown of 7½ Livres. With *Bergam* the Rixdollar of 93 Creutzers for an uncertain Number of *Soldi*. With *Venice* the ſame, for a Number of *Soldi* Banco. With *Ancona*, the Guilder of 60 Creutzers for an uncertain Number of Bajoches. With *Bologne* ditto, for a Number of Soldi. With *St. Gal* 100 Guilders for an uncertain Number of Dittos that Money. With *Frankfort* an uncertain Number of Rixdollars of 90 Creutzers, for 100 Rixdollars of that Place; and with *Augsberg* and *Nuremberg* the ſame.

At *Nuremberg* and *Augsberg*, the Guilder is 15 Batz, 20 Imperial Gros, or 60 Creutzers; the Creutzers four Hellers, and the Rixdollar is 1½ Guilder, or 90 Creutzers; near 4*s.* 6*d.* Sterling, 22½ Batz, or 30 Imperial Gros; a thick Dollar is 1½ Guilders, or 25 Batz, or 100 Creutzers; a Gros is 3 Creutzers or 12 Deniers, and a Batz is 4 Creutzers, or 16 Deniers.

Accounts are kept here in Guilders, Creutzers, and Hellers, and the Exchanges on *Amſterdam* and *Leipſick* are in Rixdollars for Rixdollars, with a Premium. On *Venice* in Guilders for Ducats de Banco; and on *Vienna*, *Prague*, and *Breſlau*, in their Guilders, for other Imperial Money.

At *Leige*, a Livre is 20 Schellings, and the Schelling 16 Fenins. The Crown or Rixdollar of this Place, is worth 4 Livres, which are reckoned on a Par with the Rixdollars of 50 Stivers current Money of *Amſterdam*.

Here Accounts are kept in Livres, Sols, and Deniers; and Exchanges made in Livres for Guilders of current Money in *Amſterdam*.

At *Antwerp*, *Bruſſels*, *Malines*, *Ghent*, and *Bruges*, the Livre de Gros is 20 Schellings de Gros, and the Schelling 12 Deniers de Gros; called here, at *Amſterdam*, and in all *Brabant* and *Flanders*, Pounds, Schellings, and Groots *Flemiſh*; and at *Antwerp*, as well as in *Brabant* and *Flanders*, are two Sorts of Money, or rather one Sort with two different Values, for the ſame Species are variouſly reckoned in their Currency, or by Exchange. For Exchange, the Patagon or Rixdollar is here reckoned for 8 Schellings, or 48 Stivers in Exchange-Money, though for 56 Stivers current Money; and the Schelling de Gros, which is 6 Stivers in

Exchange, paſſes for 7 Stivers in the Currency; ſo that there go 119$\frac{2}{3}$ Guilders or Livres de Gros Currency to 100 Ditto Exchange; 100 Livres de Gros, Bank Money at *Amſterdam*, is commonly worth 2 to 4 *per Cent.* more than 100 Livres de Gros Exchange Money at *Antwerp*.

In *Spain*, the Gold Coins are the ſame all over the Kingdom, *viz.* the four, two, and ſingle Piſtole Pieces, as alſo the $\frac{1}{2}$ Piſtole. The ſilver Coins are the *Weſt-India* Dollars, with its Fractions of $\frac{1}{2}$, $\frac{1}{4}$, or two Rials, one Rial, and $\frac{1}{2}$ Rial of Plate, now worth 10$\frac{5}{8}$ Rials of Plate, whereas ſome years ago, its Value was no more than 8 of the ſaid Rials; and the Piſtole then worth but 32 Rials that is now current at 40 Rials; theſe Dollars all come milled from *Mexico*; but from *Peru* they ſtill come unmilled as formerly, being the ſame in Value as the others, with this only Difference, that of theſe no leſs than Dollars and half-Dollars are current, the leſſer Fractions having been cried down above 20 Years ago. When the late Emperor was in Poſſeſſion of *Spain*, he coined a pretty large Quantity of Peſtareens, or $\frac{1}{4}$ Dollars, which being of a baſe Alloy, King *Philip* V. lowered their Value 20 *per Cent.* on his coming to the Crown, ſo that inſtead of four, five of them went to the Dollar, and the ſaid King coined many Dollars with their Fractions during his Reign. The Copper Money is very various, and almoſt Provincial; that at *Cadiz* and in *Caſtile*, are double and ſingle Quartos and Ochavos, of which two Ochavos make a Quarto, and two ſingle Quartos make a double one: 17 Quartos make 2 Rials Vellon, which is now an imaginary Coin, though formerly it was the principal one of the Kingdom. A Maravedie is alſo another imaginary Specie, of which 17 are reckoned to a Rial Vellon. The Ducat is alſo a fictitious Coin of 11 Rials of Plate in Purchaſes, Sales, and all other mercantile Tranſactions, except in Exchanges, when it is valued at 11 Rials of Plate and 1 Maravedie, or 375 Maravedies. In the Kingdom of *Valencia*, the Copper Coin is peculiar to it, being called Dineros, of which 30 make a Rial of Plate, and 24 a Rial current, being an imaginary Coin, of which 10 were reckoned of equal Value with 8 Rials of Plate, and 2 to be the ſame as 3 Rials of Vellon; here are alſo ſome few Pieces of 3 and 6 Dineros, much about the Size of our Half-pence and Farthings; and as the Currency of this Coin is very conſiderable, though confined to the Kingdom of *Valencia* only, they are made up into Papers of 2 and 3 Dollars each, and ſo received and paid unopened, very often to the Value of ſeveral thouſand Dollars; but in Caſe of any Suſpicion they are weighed. At *Barcelona*, their Copper Money is again different, and 14 Rials Ardites are there reckoned to the Dollar; ſo that I cannot help taking Notice of the Errors all Authors that I have ſeen run into, by making the Coins and the Entries in Accounts the ſame all over *Spain*; and where any one has varied under a pretended Correction of his Predeceſſors, he has done it, in ſo erroneous a Manner, as to leave the Account worſe than he found it. At *Cadiz*, Accounts are kept in Rials of Plate, and its Fractions; in *Caſtile* in Maravedies, in *Valencia* in Livres or Dollars, Sueldos or Dineros, of which latter 12 make a Sueldo, an imaginary Specie, and 20 Sueldos, a Livre or Dollar. In *Catalonia* in the Species above-mentioned of Ardites; and ſo in ſeveral other Parts of the Kingdom, which I thought proper to mention, as neceſſary to rectify the Miſtakes made in this Matter.

This Kingdom exchanges with *London*, a Dollar or Piece of Eight for an uncertain Number of Pence. With *Brabant*, *Flanders*, *Holland*, *Zealand*, and *Hamburgh*, its Ducat of 357 Maravedies, for a Number of Groots; with *France* for ſo many Maravedies againſt the *French* Crown, or the Piſtole for ſo many Livres, *&c*; with *Portugal*, the Ducats for Cruſades, or a Piſtole for the Number of Reas; with *Novi*, an uncertain Number of Maravedies for the Crown Mark; with *Venice* the ſame, for a Ducat Banco; with *Florence* Ditto for the Ducat of 7$\frac{1}{2}$ Livres; with *Leghorn* the ſame for the Dollar; with *Milan* the ſame for the Ducat of 115 Soldi; with *Naples* the ſame for the Ducat of 10 Carlins; and Ditto with *Palermo* and *Meſſina* for the Florin of 6 Tarins.

In *Portugal*, the current Coins are many, *viz.*

In Gold:

The Piece of 25 Mil, 600 Reas, worth in Sterling Money	*L*7	4 0
The Piece of 24 Mil, or 5 Moidores	6	15 0

100 Rixdollars of 90 Creutzers current Money, make
113 Guilders, 35 Creutzers, of 65 Creutzers exchange Money.
123 Guilders of 60 Creutzers, ditto.
99 Rixdollars, 54 Creutzers, of 74 Creutzers ditto.
150 Guilders of 60 Creutzers current Money.

N. B. 1 Guilder of 60 Creutzers is reckoned worth about 3*s.* Sterling.

At this Place Accounts are kept in Rixdollars and Crutzers, and the Difference of the Exchange Money from the current, is ſhewn in the preceding Calculation.

At *Vienna* many foreign Coins have a Currency, but their own is the Imperial Ducat of 4 Guilders, the Rixdollar in Specie of 2 Guilders. The imaginary Rixdollar of $1\frac{1}{2}$ Guilder, or 90 Creutzers, the imaginary Guilder of 60 Creutzers. The Schelling of 7 Creutzers and 2 Deniers. A Gros is 3 Creutzers, 2 Deniers. A Patre, is 4 Creutzers. A Penin and Denier is the ſame; and 3 Deniers are a Dreyer. Accounts are kept here in Guilders, Creutzers, and Penins, reckoning 8 Penins to a Creutzer. This Place exchanges with *London* a Rixdollar for an uncertain Number of Pence, commonly between 4 and 5 Shillings. With *Holland* the ſame for an uncertain Number of Stivers. With *Nuremberg* and *Augsberg*, Rixdollars for Rixdollars with an uncertain Premium. With *Venice* an uncertain Number of Rixdollars for 100 Ducats Banco. And with *St. Gal* 100 Guilders of 60 Creutzers, for an uncertain Number of thoſe Guilders.

At *Embden*, the Money moſt in Uſe are Rixdollars, valued at 2 Guilders, 14 Stivers; and their Exchange is almoſt confined to *Amſterdam*, between Rixdollars and Rixdollars, and ſometimes Guilders againſt Guilders, both with a Premium of ſo much *per Cent*.

Bolzano is a Place conſiderable in Exchanges with ſeveral Parts of *France*, *Italy*, *Switzerland*, and *Germany*. The Species moſt current here, are the *German* Rixdollars and Dollars, the former worth 90 and 93 Creutzers; the Guilder of 60 Creutzers is likewiſe in Uſe here. It exchanges with Lyons an uncertain Number of Creutzers for a *French* Crown. With *Rome* the ſame for a Crown. With *Florence* Ditto for that Crown of $7\frac{1}{2}$ Livres. With *Bergam* the Rixdollar of 93 Creutzers for an uncertain Number of *Soldi*. With *Venice* the ſame, for a Number of *Soldi* Banco. With *Ancona*, the Guilder of 60 Creutzers for an uncertain Number of Bajoches. With *Bologne* ditto, for a Number of Soldi. With *St. Gal* 100 Guilders for an uncertain Number of Dittos that Money. With *Frankfort* an uncertain Number of Rixdollars of 90 Creutzers, for 100 Rixdollars of that Place; and with *Augsberg* and *Nuremberg* the ſame.

At *Nuremberg* and *Augsberg*, the Guilder is 15 Batz, 20 Imperial Gros, or 60 Creutzers; the Creutzers four Hellers, and the Rixdollar is $1\frac{1}{2}$ Guilder, or 90 Creutzers; near 4*s.* 6*d.* Sterling, $22\frac{1}{2}$ Batz, or 30 Imperial Gros; a thick Dollar is $1\frac{1}{2}$ Guilders, or 25 Batz, or 100 Creutzers; a Gros is 3 Creutzers or 12 Deniers, and a Batz is 4 Creutzers, or 16 Deniers.

Accounts are kept here in Guilders, Creutzers, and Hellers, and the Exchanges on *Amſterdam* and *Leipſick* are in Rixdollars for Rixdollars, with a Premium. On *Venice* in Guilders for Ducats de Banco; and on *Vienna*, *Prague*, and *Breſlau*, in their Guilders, for other Imperial Money.

At *Leige*, a Livre is 20 Schellings, and the Schelling 16 Fenins. The Crown or Rixdollar of this Place, is worth 4 Livres, which are reckoned on a Par with the Rixdollars of 50 Stivers current Money of *Amſterdam*.

Here Accounts are kept in Livres, Sols, and Deniers; and Exchanges made in Livres for Guilders of current Money in *Amſterdam*.

At *Antwerp*, *Bruſſels*, *Malines*, *Ghent*, and *Bruges*, the Livre de Gros is 20 Schellings de Gros, and the Schelling 12 Deniers de Gros; called here, at *Amſterdam*, and in all *Brabant* and *Flanders*, Pounds, Schellings, and Groots *Flemiſh*; and at *Antwerp*, as well as in *Brabant* and *Flanders*, are two Sorts of Money, or rather one Sort with two different Values, for the ſame Species are variouſly reckoned in their Currency, or by Exchange. For Exchange, the Patagon or Rixdollar is here reckoned for 8 Schellings, or 48 Stivers in Exchange-Money, though for 56 Stivers current Money; and the Schelling de Gros, which is 6 Stivers in

Exchange, passes for 7 Stivers in the Currency; so that there go 119$\frac{2}{3}$ Guilders or Livres de Gros Currency to 100 Ditto Exchange; 100 Livres de Gros, Bank Money at *Amsterdam*, is commonly worth 2 to 4 *per Cent.* more than 100 Livres de Gros Exchange Money at *Antwerp*.

In *Spain*, the Gold Coins are the same all over the Kingdom, *viz.* the four, two, and single Pistole Pieces, as also the $\frac{1}{2}$ Pistole. The silver Coins are the *West-India* Dollars, with its Fractions of $\frac{1}{2}$, $\frac{1}{4}$, or two Rials, one Rial, and $\frac{1}{2}$ Rial of Plate, now worth 10$\frac{5}{8}$ Rials of Plate, whereas some years ago, its Value was no more than 8 of the said Rials; and the Pistole then worth but 32 Rials that is now current at 40 Rials; these Dollars all come milled from *Mexico*; but from *Peru* they still come unmilled as formerly, being the same in Value as the others, with this only Difference, that of these no less than Dollars and half-Dollars are current, the lesser Fractions having been cried down above 20 Years ago. When the late Emperor was in Possession of *Spain*, he coined a pretty large Quantity of Pestareens, or $\frac{1}{4}$ Dollars, which being of a base Alloy, King *Philip* V. lowered their Value 20 *per Cent.* on his coming to the Crown, so that instead of four, five of them went to the Dollar, and the said King coined many Dollars with their Fractions during his Reign. The Copper Money is very various, and almost Provincial; that at *Cadiz* and in *Castile*, are double and single Quartos and Ochavos, of which two Ochavos make a Quarto, and two single Quartos make a double one: 17 Quartos make 2 Rials Vellon, which is now an imaginary Coin, though formerly it was the principal one of the Kingdom. A Maravedie is also another imaginary Specie, of which 17 are reckoned to a Rial Vellon. The Ducat is also a fictitious Coin of 11 Rials of Plate in Purchases, Sales, and all other mercantile Transactions, except in Exchanges, when it is valued at 11 Rials of Plate and 1 Maravedie, or 375 Maravedies. In the Kingdom of *Valencia*, the Copper Coin is peculiar to it, being called Dineros, of which 30 make a Rial of Plate, and 24 a Rial current, being an imaginary Coin, of which 10 were reckoned of equal Value with 8 Rials of Plate, and 2 to be the same as 3 Rials of Vellon; here are also some few Pieces of 3 and 6 Dineros, much about the Size of our Half-pence and Farthings; and as the Currency of this Coin is very considerable, though confined to the Kingdom of *Valencia* only, they are made up into Papers of 2 and 3 Dollars each, and so received and paid unopened, very often to the Value of several thousand Dollars; but in Case of any Suspicion they are weighed. At *Barcelona*, their Copper Money is again different, and 14 Rials Ardites are there reckoned to the Dollar; so that I cannot help taking Notice of the Errors all Authors that I have seen run into, by making the Coins and the Entries in Accounts the same all over *Spain*; and where any one has varied under a pretended Correction of his Predecessors, he has done it, in so erroneous a Manner, as to leave the Account worse than he found it. At *Cadiz*, Accounts are kept in Rials of Plate, and its Fractions; in *Castile* in Maravedies, in *Valencia* in Livres or Dollars, Sueldos or Dineros, of which latter 12 make a Sueldo, an imaginary Specie, and 20 Sueldos, a Livre or Dollar. In *Catalonia* in the Species above-mentioned of Ardites; and so in several other Parts of the Kingdom, which I thought proper to mention, as necessary to rectify the Mistakes made in this Matter.

This Kingdom exchanges with *London*, a Dollar or Piece of Eight for an uncertain Number of Pence. With *Brabant*, *Flanders*, *Holland*, *Zealand*, and *Hamburgh*, its Ducat of 357 Maravedies, for a Number of Groots; with *France* for so many Maravedies against the *French* Crown, or the Pistole for so many Livres, *&c*; with *Portugal*, the Ducats for Crusades, or a Pistole for the Number of Reas; with *Novi*, an uncertain Number of Maravedies for the Crown Mark; with *Venice* the same, for a Ducat Banco; with *Florence* Ditto for the Ducat of 7$\frac{1}{2}$ Livres; with *Leghorn* the same for the Dollar; with *Milan* the same for the Ducat of 115 Soldi; with *Naples* the same for the Ducat of 10 Carlins; and Ditto with *Palermo* and *Messina* for the Florin of 6 Tarins.

In *Portugal*, the current Coins are many, *viz.*

In Gold:

The Piece of 25 Mil, 600 Reas, worth in Sterling Money	*L*7 4 0
The Piece of 24 Mil, or 5 Moidores	6 15 0

The Piece of 12 Mil, 800 Reas	£.	3	12 0
The Piece of 12 Mil Reas, or 2½ Moidores		3	7 6
The Piece of 6 Mil, 400 Reas		1	16 0
The Piece of 4 Mil, 800 Reas, or a Moidore		1	7 0
The Piece of 3 Mil, 200 Reas		0	18 0
The Piece of 2 Mil, 400 Reas, or the ½ Moidore		0	13 6
The Piece of 1 Mil, 600 Reas		0	9 0
The Piece of 1 Mil, 200 Reas, or the ¼ Moidore		0	6 9
The Pieces of 8 Teſtoons, or 800 Reas		0	4 6
The Silver Coins are,			
The Crown, or Cruzade Piece of 400 Reas		0	2 3
The $\frac{1}{10}$ of a Moidore, being 480 Reas		0	2 $8\frac{1}{2}$
The 12 Vinten Piece, or 240 Reas		0	1 $4\frac{1}{4}$
The 5 Vinten Piece, or 100 Reas		0	0 $6\frac{3}{4}$
The 2 ½ Vinten Piece, or 50 Reas		0	0 $3\frac{3}{8}$
In Copper:			
The Vinten, or 20 Reas		0	0 $1\frac{3}{8}$
The ½ Vinten, or 10 Reas		0	0 $0\frac{3}{8}$
The ¼ Vinten, or 5 Reas		0	0 $0\frac{5}{10}$

Beſides which, there are ſome few Copper Coins of leſs Value, current in that Kingdom.

Accounts are kept there in Reas, making a Separation at every hundred Thouſand, *&c.* and it exchanges with *London* 1000 Reas, or a Mil Rea, for an uncertain Number of Pence; with *Hamburgh*, *Holland*, and all the *United Provinces*, a Cruſado for ſome Pence *Flemiſh*; with *Spain* an uncertain Number of Reas for the Ducat or Dollar; with *France* the ſame for a *French* Crown; with *Florence* Ditto for that Crown of 7½ Livres; with *Genoa*, the ſame for a Scudi; with *Leghorn*, the ſame for a Dollar of 6 Livres.

At *Genoa* and *Novi*, many Species of foreign Coins are current, but their own are the Dollar, of 5 Livres, the common Dollar or Ducat of 4 Livres; 12 Denaris make 1 Soldi; 4 Soldis a Chavelet; and 5 Chavelets, or 20 Soldi, a Livre.

Accounts are kept in theſe Cities in Livres, Soldi, and Denari, or in Dollars of 100 Soldis exchanging on *London* the Dollar of 5 Livres for a certain Number of Pence; on *Amſterdam*, and *Antwerp*, ditto for a Number of Groots; on *Spain* the ſame for ſo many Maravedies; on *Portugal* the ſame for Reas; on *Geneva* the ſame for a Crown with a *Premium*; on *Venice* the imaginary Crown of 90 Soldi, for an uncertain Number of *Venetian* Soldi; on *Milan* ditto for a Number of Sols of the Empire; on *Rome* an uncertain Number of Soldi for that Crown; on *Paris* the Dollar for an uncertain Number of Sols: on *Leghorn* an uncertain Number of Soldi, for the Dollar of ſix Livres; on *Naples* the ſame for the Dollar of nine Carlins.

At *Milan*, many Sorts of money are current as at *Genoa*, but their own Species are Livres, Soldis, and Denari, to be counted like Pounds, Shillings, and Pence, *viz.* 12 Denaris make a Soldi, *&c.* and Accounts are kept here in thoſe Species. This is a conſiderable Place of Exchange; and gives to *London* a Ducat for an uncertain Number of Pence; to *Spain* Ditto for a Number of Maravedies; to *Venice* the ſame, for a Number of Soldi; to *France*, an uncertain Number of Soldi for a Crown *Tournois*; to *Florence* ditto, for that Crown of 7½ Livres; to *Genoa* the ſame, for the Dollar of five Livres; to *Novi*, the ſame for a Crown Mark; to *Rome* 100 Crowns for an uncertain Number of ſtamped Crowns. Beſides which it exchanges with many other Places.

At *Rome*, the Crown is worth 10 Julios, and the Julio 10 Bajoches. The Crown is alſo divided into 20 Soldi d'Or, and the Soldi d'Or into 12 Denari.

Accounts are kept here in Crowns, Julios, and Bajoches, or Grains and Quartrins; and it exchanges with *London*, a ſtamped Crown for an uncertain Number of Pence; with *Genoa*, the ſame for ſome Soldi; with *Bergam* and *Bologne*, Ditto for Ditto; with *Ancona* 100 Ditto, for a Number of their Crowns; with *Spain* one Ditto, for an uncertain Number of Maravedies; with *Blozamo* the ſame for ſome Creutzers; with *France* an uncertain Number for 100 *French* Crowns; with *Venice*, the ſame for 100 Ducats Banco; with *Leghorn*, the ſame for 100 Dollars;

with *Novi* ditto for 100 Crowns: with *Lucca* 100 ditto for an uncertain Number of thoſe Crowns of ſeven Livres.

At *Leghorn* the Dollar is worth ſix Livres, or 20 Soldi, and the Soldi 12 Denari, and the Ducat is worth 7 Livres.

At this Place Accounts are kept generally in Dollars, Soldi, and Denari; and the Exchanges are made on *London* by giving a Dollar of 6 Livres for an uncertain Number of Pence; on *Holland* the ſame for a Number of Groots; on *France* the ſame for a Number of Sols; on *Portugal* the like, for a Number of Reas; on *Florence* the ſame for ſome Soldi; on *Genoa*, ditto for ditto; on *Venice*, an uncertain Number of Dollars, for 100 Ducats Banco; on *Naples*, 100 Dollars for a Number of Ducats of 5 Tarins; on *Novi* ditto, for the like Number of Crowns, with a *Premium*; on *Rome* ditto, for an uncertain Number of Crowns; on *Geneva* ditto for ditto; and beſides, it exchanges with many other Places, in the ſame Manner as its Capital *Florence* does.

At *Florence*, 5 Quartrins make a Craca or Grain, 8 Grains a Julio or Paulo, 12 Grains a Livre, and $7\frac{1}{2}$ Livres, or 150 Soldi, a Crown.

They here keep their Books and Accounts in Crowns, Soldi, and Denari; Picoli, or Current; and exchange the Crown of $7\frac{1}{2}$ Livres with *London*, for an uncertain Number of Pence; with *Spain* the ſame for Maravedies; with *Portugal* ditto for Reas; with *Milan* ditto for Soldi; with *France* an uncertain Number of ditto for 100 Crowns *Tournois*; with *Novi* ditto for 100 Crowns of that Place; with *Venice* ditto for 100 Ducats Banco; with *Naples* 100 ditto for an uncertain Number of Ducats; with *Leghorn* an uncertain Number of Soldis, for the Dollar of 6 Livres; with *Lucca* 100 Crowns for an uncertain Number of Crowns of $7\frac{1}{2}$ Livres; with *Rome* ditto for an uncertain Number of *Roman* Crowns; with *Amſterdam*, *Antwerp*, and *Genoa*, the ſame as from *Leghorn* to thoſe Places.

At *Lucca* the Crown is worth 7 Livres 10 Soldi, the Livre 20 Soldi, and the Soldi 12 Denari, all d'Or, and they keep their Accounts therein.

At *Naples*, ſeveral Coins are current, but their own is the Ducat, which makes 10 Carlins; a Tarin 2 Carlins; a Carlin 10 Grains; a Grain 3 Quartrini: a Carlin is worth about 5*d*. Sterling.

Accounts are kept here in Ducats, Tarins, and Grains; and Exchanges made with *Spain*, by giving a Ducat of 10 Carlins for an uncertain Number of Maravedies; with *Genoa* the Dollar of 9 Carlins for ſome Soldi; with *Palermo* the Ducat of 10 Carlins for a Number of Ponti; with *Leghorn*, *Florence*, *Venice*, *Rome*, and *France*, for 100 Dollars, Crowns, Ducats, ſtamped Crowns, and Crowns *Tournois*, 100 *Neapolitan* Ducats with a *Premium*.

In *Sicily*, the Coins are like the preceding; 8 Pichili make a Ponti, 6 Pichili a Grain, 10 Grains a Carlin; a Tarin is 2 Carlins, 12 Carlins is a Florin, 13 Tarins a Ducat, and 12 Tarins a Current Crown, which is about 5*s*. Sterling.

Accounts are kept in this Iſland as at *Naples*; and it exchanges with *Spain* the Florin for an uncertain Number of Maravedies; with *Florence* an uncertain Number of Carlins for the Crown of $7\frac{1}{2}$ Livres; with *Novi* the ſame for the Crown; and with *Naples* an uncertain Number of Ponti, for the Ducat of 5 Tarins.

At *Venice* both the current and Bank Ducat make 24 Soldi, or ſix Livres and 4 Soldi. The *Venetian* Piſtole 29 Livres; the Chequin 17 Livres; the Teſtoon two Livres 14 Soldi; $\frac{1}{2}$ Ditto or a Julio, 18 Soldi; a Soldi 12 Denari; a Livre Picoli is 20 Soldi, and about 9*d*. Sterling. Accounts are kept here in Livres, Soldi and Denari, Picoli or current; but the Bank Entries are in Livres, Soldi, and Groſſes. It deals very conſiderably in Exchanges, and gives to *London* a Ducat of 24 Grains Banco, for an uncertain Number of Pence Sterling; to *France* an uncertain Number of Ducats, for 100 Crowns *Tournois*; to *Spain*, one Ducat for a Number of Maravedies; to *Holland*, *Brabant*, and *Hamburg*, a Ducat for a Number of Groots; to *Novi*, an uncertain Number of Ducats for 100 current Crowns; to *Naples*, 100 Ditto for an uncertain Number of Ducats, of 10 Carlins; to *Leghorn*, 100 Ditto for a Number of Dollars of 6 Livres; to *Lucca* 100 Ditto for an uncertain Number of Crowns of $7\frac{1}{2}$ Livres; to *Rome* the ſame, for an uncertain Number of Crowns; to *Genoa*, an uncertain Number of Soldi Banco for the Crown of four Livres: to *Milan* the ſame, for a Crown of five Livres 15 Soldi;

to

to *Franckfort*, *Nuremburg*, and *St. Gal*, 100 Ducats, for an uncertain Number of Guilders of 60 Creutzers.

At *Bologna* Accounts are kept in Livres, Soldi, and Denari, the Livre being 20 Soldi, and the Soldi 12 Denari. The Money is a Crown worth four Livres five Soldi, or 85 Boulonins. Here is likewiſe a Teſtoon valued at one Livre 10 Soldi; a Jules at 20 Quartrins, and the Soldi Bayock, or Boulonin, at ſix Quartrins. Many Coins of the Empire, *France*, and *Spain*, paſs current here, and it exchanges with *France* an uncertain Number of Soldi for one Crown *Tournois*; with *Naples* the ſame, for the Ducat of 10 Carlins; with *Venice*, the Crown or Dollar of 85 Soldi, for an uncertain Number of Soldi; with *Rome* an uncertain Number of Soldi, for the Crown of 10 Julios; with *Lucca* the ſame for the Crown of $7\frac{1}{2}$ Livres; with *Florence* ditto for the Ducat of ſeven Livres.

At *Bergam* many foreign Coins are current, and their Accounts are kept in Livres, Soldi, and Denari, of which 20 Soldi make a Livre, and 12 Denari one Soldi. The Ducat or Crown of Exchange is reckoned at 7 Livres, and of theſe it gives to *Novi* an uncertain Number for 100 Crowns of that Money; to *Milan* the ſame for the Ducat of 5 Livres and 15 Soldi; to *Lyons* ditto for a Crown *Tournois*; to *Rome* ditto for a ſtamped Crown; and to *Venice* a Crown for an uncertain Number of Soldi.

At *Parma* Accounts are kept in Crowns of 20 Soldi, and one Soldi is 20 Denari. The Merchants' Crown is reckoned 4 Livres, with an unſettled Premium.

At *Modena* Accounts are kept in Lires, Soldi, and Denari; they have alſo a Ducat of 5 Livres, with many other foreign Coins current here.

Mantua has the ſame Species and the ſame Way of Reckoning as the laſt mentioned Place.

And at *Ferrara* and *Ancona* Accounts are kept, and the Species the ſame as at *Rome*.

In the Iſland of *Sardinia*, Accounts are kept, as in moſt Parts of *Italy*, in Livres, Soldi, and Denari; the Dollar or Piece $\frac{8}{8}$ is worth $9\frac{1}{5}$ Rials, and the Rial 15 Soldi, *Sardinian* Money, and the Livre 20 Soldi; ſo that the Dollar is valued at 6 Livres, 18 Soldi, or 138 Soldi, that Iſland's Currency.

At *Placentia* Accounts are kept in Crowns, Soldi, and Denari of *Maak*, of which 12 Denari make a Soldi, and 20 Soldi the Crown. This Place always gives in Exchange an entire Sum, *viz.* a whole Crown, or 100 Crowns, *&c.*

In the Iſland of *Malta* Accounts are kept, and Money is the ſame with that of *Sicily*, being Silver, Copper, or Braſs, of which the latter are the current Species; and in Negociations of Purchaſes, or Sales, it is always ſtipulated whether Payment ſhall be made in Silver or Braſs Money, the former being eſteemed 50 *per Cent.* better than the other. Six Pichili make a Grain, 10 Grains a Carlin, two Carlins a Tarin, and the Deci Tarini 10 Tarins, beſides which many foreign Coins are current on the Iſland.

In *Savoy* and *Piedmont*, the Species are Madonines or Piſtoles of *Savoy*, worth 13 Livres; Ducatoons worth 7 Florins, or 84 Soldi; the *Savoy* Crown, worth 3 Livres, 12 Soldi; the Livre worth 20 Soldi; and the Soldi worth 4 Quartrins or Liards. Accounts are kept here in Livres or Lires, Soldi, and Quartrins; their Exchanges are in Ducatoons.

In the Iſland of *Candia*, the ſame Coins are in Uſe, and the ſame Method of Accounts practiſed as at *Venice*. In their Meaſuring two Picos are uſed, the one for Silk, and the other for Woollens; 100 of the former making about $61\frac{1}{2}$ Yards *Engliſh*, and 100 of the others four Yards more. The Weights of this Iſle are alſo two; the Suttle and great Weight; 100lb. of which latter very nearly correſpond with 118lb. Avoirdupois; and the 100 Suttle make about 76lb. Ditto.

In the *Morea*, Accounts are kept as in *Venice*, or *Turkey*, according to which of theſe Powers the Place is ſubject, though they generally reckon in their Dealings by the Dollar of 80 Aſpers. In computing their Weights, they reckon $11\frac{1}{9}$ Drams to an Ounce, 12 Ounces to the Pound, 3lb. to the Oque, 132lb. to a Quintal, of about $117\frac{1}{2}$lb. *Engliſh*, though in weighing Raw Silk, they count 15 Ounces to the Pound. Oil is ſold here by a Meaſure called the Lever, weighing about $7\frac{1}{2}$lb. of which 10 make near 15 *Engliſh* Gallons, or $112\frac{1}{2}$lb.

Corn

Corn is ſold here by the Bochel, of which 9$\frac{1}{2}$ make 8 Buſhels *Wincheſter* Meaſure, and their Wine is ſold by the Loder, containing about 8 Gallons *Engliſh*; which Weights and Meaſures I mention here, as they were omitted in their proper Place.

At *Conſtantinople*, the current Coins are golden Sequins, worth 243 Aſpers. The Piece reckoned at 120 Aſpers. The Paras or Medins worth 3 Aſpers, and the Aſper worth a Trifle more than a Farthing Sterling. Many foreign Coins paſs here, ſuch as *Spaniſh* Dollars, if weighty, at 108 to 110 Aſpers, and in Porportion for what they are light; Caragrouſchs, Money of the Empire, for 120 Aſpers, the Aſſelanis, Abouquels, and Lion Dollars of *Inſpruck* and *Holland* worth 116 Aſpers; the *Poliſh* Abras, the Turks, Izelotes, *Venetian* and *Hungarian* Zekins, *&c.*

At *Smyrna* they uſe for current Money the Aſſelanis, and Abouquels, worth 80 Aſpers, the Scherifs of this Place being Pieces of Gold worth 2$\frac{1}{4}$ Dollars.

At *Alexandretta*, or *Scanderoon*, as well as at *Aleppo* and *Seyda* the current Coins are the Dollar worth 80 Aſpers, and under theſe Denominations all Accounts are kept in theſe Parts.

At *Alexandria*, *Roſetta*, and *Grand Cairo*, the current Dollar is worth 33 Medini, and the Abouquel, or Lion Dollar, 30 Ditto; the Aſſelani worth 32 Medini, and the *Spaniſh* Dollar about 70. The Gold Coins are the Sultani, Xeriff, and Chekeens, being each worth about 9*s.* 4*d.* 5*d.* or 6*d.* Sterling.

The Places mentioned in the three laſt Articles ſhould not have been inſerted here had their Connexion being leſs with *Conſtantinople* than it is, as their Situation is not in *Europe*, to which Part of the World I propoſed to confine the preſent Section of Meaſures, Weights, and Coins, which I have now finiſhed with all the Accuracy I have been able; and though the greateſt Part of the preceding Tables and Computations are collected from ſeveral Authors, and their Errors, which were many, corrected, wherever I perceived them: yet I have not ſtopped here, but alſo very conſiderably enlarged them, by the Addition of many principal trading Places, that had been omitted by the Compoſers of the aforeſaid Calculations, who have generally copied from one another, and thereby propagated the Miſtakes and Overſights of the firſt Inventors, which are here, at leaſt in ſome Meaſure, rectified and improved.

I ſhall next endeavour to give the beſt Account I can of the Weights, Meaſures, and Coins of the other trading Parts of the World, with which I ſhall conclude the Work.

At *Caffa* in the Black Sea, many foreign Coins are current, but thoſe in moſt Eſteem are the weighty *Mexican* and *Sevilan* Dollars, which are always worth here 10 *per Cent.* more than the Aſſelani, being centinually bought up by the *Armenians*, and ſent to *Perſia*. The Aſſelani paſſes from 90 to 100 Aſpers; the *Venetian* Zekin for 2$\frac{1}{2}$ Aſſelanis, as at *Conſtantinople*; the Abros paſſes for $\frac{1}{4}$ of an Aſſelani; the Izelot for $\frac{2}{3}$ of Ditto, and the Turk for $\frac{1}{3}$. The Ocque or Ok of *Caffa* is the ſame with that at *Conſtantinople:* And they have two Sorts of Long Meaſures, the one for Woollens and Silks, and the other for Linens, Cottons, *&c.* both are called Pics, but the firſt for Diſtinction Pic-arſem; the Linen Pic is 30 *per Cent.* bigger than that of *Conſtantinople*.

At *Killy*, or *Killia*, the Money conſiſts in Aſſelanis, worth ſometimes 115 or 116 Aſpers, as at *Conſtantinople*, their Price being generally governed by that of the laſt City: The Izelot is received here for $\frac{2}{3}$ of the Dollar. The Sevilan and the Caragrouſch have here the ſame Currency as at *Conſtantinople*, and other Species at a proportionable Value.

At *Prevat*, all Trade is carried on in Aſſelanis, Abras, Turks, Izelots, *Venetian* and *Hungarin* Zekins, Cheriffs, Aſpers and Paras; theſe Species being commonly 15 *per Cent.* higher than at *Conſtantinople*, as they are at *Synope*, *Nicopolis*, and *Caſtamboli*.

At *La Maſtre* the current Coins are only the Aſſelanis, Quarts, Turks, Izelotes, and Aſpers, the Sevilan and Caragrouſch Dollars not being ſo much as known here.

At *Salonica*, in the *Archipelago*, the Sevilan is worth 212 Aſpers, and the Sequin Rouſpi 412. The Meaſure called the Guilot makes near half a *Leghorn* Sack, as the Ocque does 3$\frac{1}{4}$lb. of that City, and the Pic is near a *Dutch* Ell.

In *Barbary* the greateſt Part of the Money uſed is foreign: Here are, however, ſome Coins ſtruck by the Kings or Deys in their different Territories, though the general Currency in theſe Parts are *Spaniſh* Dollars, *French* Crowns, *Hungarian* Ducats, and the *Turkiſh* Golden Sultanins.

The Metecals are a Sort of Gold Ducats made at *Morocco* by the Jews at their Pleaſure, ſo that their Standard is very uncertain; the Blanquiles are ſmall Silver Pieces worth $2\frac{1}{2}$ *French* Sols, and the Felours are Copper, of which 8 go to a Blanquile. Dollars, Halves, and Quarters are almoſt the only foreign Coin current in *Morocco*, where the *Engliſh*, *French*, and *Dutch* Gold and Silver, or the *Spaniſh* Piſtoles are not received.

There is alſo coined at *Tunis* ſome Species of Gold and Silver. The Sultanins are of the former Metal, but heavier by $\frac{1}{3}$ than thoſe of *Europe*. The Navare are of Silver, cut nicely ſquare; the Doublas and Burbas coined here are the ſame in Value with thoſe of *Algier*.

The long Meaſure of *Mequinez* is the Palme, which is 8 *French* Inches, or $\frac{2}{3}$ of the *Paris* Foot: And the long Meaſure of *Santa Cruz* in the Kingdom of *Morocco*, is called a Coude, of which 100 *Paris* Ells make 225; the 100 Aunes of *Holland* 133; 100 *Engliſh* Yards about 175; and a Cane of *Provence* $3\frac{3}{4}$ Coudes. The real Coins are the Flux, Blanquille, and golden Ducat; the Flux is of Copper, and 16 go to the Blanquille, of which 4 make an Ounce, and 10 Ounces or 40 Blanquilles make a Silver Ducat; the Golden one has no fixed Courſe, but the Price of it varies according to its Scarceneſs or Plenty, from $12\frac{1}{2}$ to 15 Ounces. A weighty Dollar yields a Trifle more than $7\frac{1}{4}$ Ounces, given into the Mint for making Blanquilles; their Weights are 5 *per Cent.* heavier than the Mark Weights, and it has been found by Experience, that 100 *Marſeilles* Pounds, produce at *Santa Cruz* 97lb. and 100 of *Santa Cruz* yield 125 or 126 at *Marſeilles*.

At *Algier* the current Money made there, is golden Sultanines and Aſpers; Burbas, of which 6 go to an Aſper. The Doubla is Silver, and worth a Trifle more than the *French* Crown; the Rubick, Median, and Zian, are all Gold Coins; the firſt worth 35, and the laſt 100 Aſpers; but theſe three Species are particularly ſtruck at *Tremecen*. The foreign Coin that paſs here, are the Sultanines of *Morocco*, the *Portugal* Golden Pieces, the *Venetian* Sequins, the *Spaniſh* Piſtoles and Dollars of all Weights. The Value of theſe Species is not here fixed, but varies, though not much, according as it ſuits the Government; not but the *Patique Chique*, ſmall Dollar, or the Aſper Dollar, which is an imaginary Coin, is fixed and always worth 232 Aſpers; the $\frac{1}{3}$ of a current Dollar, commonly called the great Patique, which ordinarily weighs $2\frac{1}{2}$ Piſtoles, but is ſometimes altered by the Dey. In 1725, the Sultanin of *Algier* and that of *Morocco*, were worth 2 current Dollars and 4 Rials; the *Venetian* Sequin, 2 Dollars 6 Rials; the Cruſade of *Portugal* 7 Dollars; the *Spaniſh* Piſtole four Dollars and 4 Rials; the *Sevil* and *Mexican* weighty Dollars 20 to the Pound, 3 ſmall Patiques and 7 Temins; the weighty *Leghorn* Dollar, 3 current Dollars, and 6 Rials; ditto of *Tunis* 3 Dollars, and 4 Rials; the great Pataque or current Dollar of *Algier*, 3 ſmall Pataques, or 696 Aſpers; the Temin is a ſmall Rial, or $\frac{1}{8}$ Part of the little Pataque, that is 29 Aſpers; the Caroube is half a Temin or $14\frac{1}{2}$ Aſpers.

The common *Algier* Quintal is 133lb. of *Marſeilles*, or 106lb. de Marc; the Pound is generally compoſed of 16 Ounces, except in weighing Chocolate, Tea, and ſimilar Commodities, when it is only 14 Ounces; the Pound of Dates, Raiſins, &c. is 27 Ounces.

The Meaſure for Woollens and Linens is the *Turkey* Pic, of which 2 make 1 Aune and 2 Inches *Paris* Meaſure; but Gold and Silver Stuffs and Silks are ſold by the *Moreſco* Pic, three of which only make $2\frac{1}{3}$ of that of *Turkey*.

Though a conſiderable Trade is carried on to the prodigious extenſive Coaſts of *Africk*, and though theſe are peopled by numerous different Nations, yet Coins are unknown among them, and all their commercial Tranſactions are carried on by Way of Barter, they having no other Money in Uſe, than ſome Shells for the Purchaſe of ſmall Matters, in moſt Places; and in *Abyſſinia*, or the Empire of *Preſter John*, ſome Bits of Rock Salt only; ſo that this great Part of the World

affords me nothing to remark on the Subject I am at preſent engaged in, till we come to the Iſle of *Madagaſcar*; where, though Money is uſeleſs, yet they have ſome Weights, though only for Gold and Silver, and the biggeſt of theſe not exceeding a Dragme, or the Gros, they have no Notion of Ounces or Pounds, nor Terms in which to expreſs them. The Gros is here called *Sompi*; the Demi-gros, *Vari*; the Scruple or Pennyweight *Sacare*; the Demi Scruple or Obuley *Nanqui*, the ſix Grains *Nanque*; the Grain unnamed among them. And all other Merchandize are exchanged according to their Value, and not Weight. They have likewiſe here long Meaſures, and thoſe of Continence, the latter like Buſhels are called *Troubahouache*, or Moncha, that hold ſix Pounds of huſked Rice. The *Voule*, not containing above half a Pound, and the *Zatou*, with which unhuſked Rice is meaſured, and contains 100 Voules, being near 25 Pounds; they have but one long Meaſure called Refe, which is very near an *European* Braſſe, and they are not unacquainted with the Span, but open their Hand to deſcribe it.

I ſhould here have proceeded to deſcribe the Weights, Meaſures, and Coins of *Aſia*, &c. as they are in Uſe at every Place, but as this would occaſion Repetitions, I ſhall give them alphabetically to avoid ſwelling this Article unneceſſarily.

Abagi or *Abaſſia* is a *Perſian* Silver Coin, worth 2 Mamoudis or 4 Chayes; the Chaye reckoned to be equal in Value to a Trifle more than 4 Sols, 6 Deniers of *France*, ſo that the Abagi is 18 Sols. This Specie is current through all *Perſia*; and at *Teflis* and in all *Georgia*, it is worth 22 Sols *Tournois*; 4 Chaouris, or Sains, make here an Abagi; 1 Uſaltou, a half Abagi or 2 Chaouris; 40 Aſpers or Carbequis make alſo an Abagi, and the *Venetian* Sequin is worth ſix Abagis and three Chaouris.

Abas, a *Perſian* Weight for Pearls, being $\frac{1}{8}$ lighter than the *European* Carat.

Abucco, *Abocco*, or *Acochi*, a Weight uſed in the Kingdom of *Pegu*, conſiſting of $12\frac{1}{2}$ Teccalis; 2 Abuccos make the Agito or Gizo; 2 Gizos make 1 Demi-Biza, and the Biza weighs 100 Teccalis, about 2lb. 5 Ounces of the heavy, and 3lb. 9 Ounces of the light Weight of *Venice*.

Acre, or *Lacre*, an *India* Money.

Almene an *Indian* Weight of about 2lb. ſerving to weigh Saffron in many Parts on that Coaſt.

Arah, an imaginary Money in the States of the *Grand Mogul*, particularly at *Amadabath*, of which 4 make 1 Crou; a Crou worth 100 Lacks or Laques; and the Lac 100,000 Roupies, or Rupees.

Baat, in *Siameſe*, and Tical in *Chineſe*, is both a Weight and Coin current in the two Empires; the Weight is 4 Mayons, in *Siameſe* Seling, the Mayon 2 Fouangs, the Fouang 4 Payes, and the Paye 2 Clams; here are alſo Sompayes, in Value $\frac{1}{2}$ of a Fouang. All theſe Weights are alſo Coins, or at leaſt Bits of Silver that paſs in Lieu of them, as well in *China* as *Siam*. The Tical weighs 3 Gros and 23 Grains, which, reckoning the Ounce of Silver at $3\frac{1}{2}$ Livres *Tournois*, is 32 Sols and 4 Deniers that Money, as it weighs near $\frac{1}{2}$ an Ounce.

Bahar, *Bahaire*, or *Barre*, is a Weight uſed at *Ternate*, *Malacca*, *Achem*, and ſeveral other Places in the *Eaſt-Indies*. There are two ſorts of them, the one called the great *Bahar*, and the other the little one. By the firſt Pepper and all other Spice is weighed; it is compoſed of 200 Catis; the Catis of 26 Taels, or $38\frac{1}{2}$ Ounces *Portugueſe*, each Tael being reckoned $1\frac{1}{2}$ Ounce that Weight; ſo that the *Bahar* is 550lb. of *Portugal*, or 481lb. 4 Ounces of *Paris*, *Straſbourg*, *Amſterdam*, &c. The ſmall Bahar, by which is weighed Quickſilver, Vermillion, Silk, &c. alſo conſiſts of 200 Catis, but each Catis is only 22 Taels, or $32\frac{1}{2}$ Ounces *Portugueſe*; ſo that this Bahar only makes 458lb. 13 Ounces of *Portugal*, and theſe near 401lb. 7 Ounces of *Paris*,

The Bahir of *China* is 300 Catis, but theſe only make 200 of *Malacca*, each *Chineſe* Catis containing no more than 16 Taels, one of which weighs $1\frac{1}{2}$ Pieces $\frac{3}{8}$ and conſiſts of 10 Maſmace or Maſes, and each Mas 10 Condorins. The Bahir of *Mocha* in *Arabia*, weighs 420lb. containing 15 Traſſels, the Traſſel 10 Mauns, the Maun 40 Tuckea, and the Tuckea 10 Coffila.

Baruth

Baruth, an *Indian* Meaſure containing 17 Gantans, that is 50 to 56lb. of Pepper, *Paris* Weight, of 16 Ounces to the Pound, ſo that the Gantan ought to hold near 3lb.

Baſeruco, a ſmall *Indian* Coin of two Sorts, the one termed good and the other bad, which latter are $\frac{1}{6}$ leſs than the other; 3 good Baſarucos make two *Portugueſe* Reas, 15 a Vintain, and 375 a Pardao-xerafin.

Batman, a *Perſian* Weight, of which there are two Sorts, the one called Batman de Cahi, being the King's Weight, and the other the Batman de Tauris, from the Name of a principal City in *Perſia*; that of Cahi ſerves to weigh as well the Neceſſaries of Life, as the Loads of the Beaſts of Burden. It weights $12\frac{1}{2}$lb. of *Paris*, of 16 Ounces. That of *Tauris* only uſed in Affairs of Trade weighs $6\frac{1}{4}$lb. or half of the other, though by ſome it is ſuppoſed only to weigh 5lb. and 14 Ounces, at which Computation it conſiſts of 6 Rattles, each a Trifle leſs than a *Pariſian* Pound; the Derhem or Dragme, which is the fifth Part of a Pound; the Meſcal $\frac{1}{2}$ of a Derhem; the Dung of the 6th Part of a Meſcal, and is equal to 6 Grains, Carat Weight; and the Barley Corn, which is $\frac{1}{4}$ of the Dung; beſides which Diviſions the *Perſians* have that of the Vakie, about a *French* Ounce, and the Sahcheray, conſiſting of 1170 Derhem.

Beſorch, a current Coin of *Ormus*, very near in Value with the Liards of *France*, 10 of them make 1 Pais; 4 Pais 1 Soudis; 10 Pais 1 Chay, with four *Dutch* Stivers; 20 Pais 1 Mamoudi; 2 Mamoudis 1 Abbaſſi; 25 Pays 1 Larin; 5 Larins the Real or Rixdollar; and 100 Mamoudis 1 Toman. They reckon in *Ormus* by Tomans, the ſame as in *Holland* by Livres de Gros.

Biis, both a Weight and Meaſure uſed on the Coaſt of *Coromandel* in the *Eaſt-Indies*. It is the $\frac{1}{5}$ of the Maun containing 5 Ceers, and 1 Ceer, 24 Tol. See *Maun*.

Biſa, *Biza*, or *Bize*, is a Money of *Pegu*, with the ſame Currency as a half Ducat. *Biza* or *Piza* is alſo a Weight in the ſame Kingdom for weighing of Merchandize; it is about 2lb. 5 oz. heavy weight of *Venice*, or 3lb. 9 oz. the ſuttle or light Weight of that City; it likewiſe weighs 100 Tecalis; beſides this the ſmalleſt Weights are the Abucco, weighing $12\frac{1}{2}$ Tecalis; the Agito, weighing 2 Abocchis, and 2 Agiti the Demi-Biza, that is 50 Tecalis.

Biſti, a ſmall *Perſian* Money, which ſome good Authors place among the current Silver Coins of *Perſia*, and make it worth 1 Sol, 4 or 6 Deniers *Tournois*; but others probably more credible, and among them Sir *John Chardin*, only reckon the Biſti as an imaginary Coin; it is true, they call it Dinar-Biſti, which they make to be worth 10 ſingle Dinars; ſo that on this Footing, of 10,000 ſingle Dinaries that go to a Toman, another imaginary Specie, there muſt be only 1000 of thoſe called Biſti.

Cabeer, a Money uſed for Accounts at *Mocha*, of which 80 are reckoned to a *French* Crown.

Canan, a liquid Meaſure of the Kingdom of *Siam*, which the *Portugueſe* call Choup; it contains near a Pot, or near 2 Pints of *Paris* $\frac{1}{4}$ of the Canan is called Leing, the ſame as the *French* Chopine.

Candul, or *Bandile*, a Meaſure of Continence uſed in *India*, at *Cambaya* and *Bengal*, for Rice and other Grain; it contains 14 Boiſſeaux, and weighs near 500lb. and the Gauge of Ships is reckoned here by the Candül, as it is by the Ton in *Europe*; ſo that when it is ſaid, a Veſſel is 400 Candüls Burden, it is to be underſtood ſhe can carry 200,000lb. or 100 Tons.

It is alſo a Weight uſed in *China* and at *Galanga*, of which there are 2 Sorts; the ſmalleſt being 16 Mauns; the other, which is the heavieſt, conſiſts of 20 Mauns; the firſt makes 3 Chintals good Weight, and the laſt 3 Chintals and 3 Rubis; the Rubis making 32 Rotolis.

Cando, *Candi*, or *Condi*, a long Meaſure uſed in ſeveral Parts of *India*, and particularly at *Goa*, where it correſponds with 17 *Dutch* Aunes, $\frac{7}{8}$ *per Cent.* bigger than the Aunes of *Babel* and *Baſſora*; and $6\frac{1}{2}$ more than the Varre, or Aune of *Ormus*; Silks and Woollens are meaſured by the Varre, but Linens by the Cando; which Meaſure in the Kingdom of *Pegu* is equal to the Aune of *Venice*.

Cas, *Caxa*, *Cayas*, *Cache*, *Caſſe*, and *Caſie*, is a ſmall Money of Lead, and the Scum of Copper mixed; its principal Currency is at *Bantam*, and the Reſt of the Iſle of *Java*, and in ſome neighbouring Iſlands; this Money made at *Chincheu*, a City in *China*, is a little thinner than a Double of *France*, and has a Hole bored in the Middle, by which many of them are ſtrung together; this String, called a Santa, has 200 Caxas, which are worth 9 Deniers; 5 Santas tied in a Bundle, make 1000 Caxas, called a Sapacou, which make 3 *Dutch* Stivers and 9 Deniers. There is nothing more brittle than this Money, ſo that if it falls it certainly breaks in many Pieces; and if it lies but one Night in Salt Water, they ſtick ſo cloſe together, that more than half is broke in their Separation; the *Malayans* call them Cas; but in the Language of *Java*, they are named Pitis. There are two Sorts of them, great and ſmall; the latter are thoſe I have been ſpeaking of, whoſe Value is ſo ſmall, that 300,000 of them are only worth about 56 Guilders, and 5 Stivers of *Holland*; the biggeſt are the old ones, of which 6000 are worth a Piece of Eight, and are very little different from the Caches of *China*, and the Caſſies of *Japan*.

Caſava, *Gaſava*, or *Gazana*, is an *Eaſt-Indian* Silver Coin, and one of the Roupies current in the Dominions of the *Grand Mogul*, eſpecially at *Amadabath*.

Caſbeque, *Kabeſque*, or *Cabeſque*, is a ſmall Copper Coin, only made, and current in *Perſia*; it is worth about 6 Deniers Tournois, and the Demi-Cabeſque one half. *Pul*, is the common Name of all Copper Money in *Perſia*.

Cati, *Catti*, or *Katti*, is a *Chineſe* Weight, particularly in Uſe on the Side of *Canton*. It is divided into 16 Taels, each Tael making 1 Ounce, 2 Gros of *France*; ſo that the *Cati* is 1lb. 4 oz. Mark; 100 Catis make a Pic, which is a large *Chineſe* Weight, like the 120lb. of *Paris*, *Amſterdam*, *Strasbourgh*, *&c.* The Cati is alſo the only Weight at *Japan*; it is likewiſe uſed at *Batavia*, and other Parts of *India*, where it is lighter or heavier, according to the Number of Taels it conſiſts of; for Example, at *Java* it is worth only 20 Taels, and at *Cambaya* 27.

Cati is alſo a ſmall Weight which the Eaſtern Lapidaries uſe, for weighing Emeralds, being only 3 Grains. It is likewiſe an Account Money uſed in *Java*, and other neighbouring Iſlands, being near in Value to 19 *Dutch* Guilders, and 100,000 Caxes of *Java* go to the Cati.

Cavan, uſed in ſome of the *Philippine* Iſlands, and eſpecially at *Manilla*, for meaſuring Rice, and other Corn and Pulſe, containing 50 *Spaniſh* Pounds of the firſt.

Chaye, *Shair*, or *Chay*, is the ſmalleſt Silver Coin that is made or current in *Perſia*; ſome pretend that this is the Biſti, which according to their reckoning makes 1 Sol and 6 Deniers Tournois, although it ſeems certain, that the Biſti is not a real, but imaginary Specie. The Chaye is worth juſt 4 Sols, 7 Deniers, and 1 Maille of *France*.

Cheda, a Pewter Coin, made and current in the Kingdom of that Name, lying in the *Eaſt-Indies*, and in the Neighbourhood of the *Great Mogul*'s Dominions. There are two Sorts of this Money; the one of an Octagon, and the other a round Figure; the firſt weighing $1\frac{1}{2}$ Ounce, and paſſes in the Country for the Value of two Sols Tournois, although, on the Footing of 14 Sols *per* Pound of Pewter, it ought not to be worth more than 1 Sol and 3 Deniers.

The round Cheda worth 4 Deniers, has 80 Cawries, or *Maldivian* Shells given for it; both are received in the Kingdom of *Pera*, of which the King of *Cheda* is alſo Maſter.

Cheraſis, or *Tela*, are Golden Medals ſtamped in *Perſia*, erroneouſly ſuppoſed by ſome to be a current Coin, but the *Perſians* make none of Gold; ſo that all the Money paſſing in that Empire of this Metal is foreign, and not coined there.

Cheray, or *Chahy*, a *Perſian* Weight uſed in Trade; that is what is otherwiſe called the civil or common Weight, and is double that named the legal Weight.

Cherif, a ſmall Gold Coin made current in *Egypt*, worth about 4*s.* Sterling.

Clam, a ſmall Weight, and imaginary Coin of *Siam*.

Cobile, *Cobil*, or *Coude*, a long Meaſure uſed in ſeveral Parts of *India*, being unequal and varying as the Aune does in *Europe*. At *Surat*, Monſ. *Tavernier* makes it 2 Feet and 16 Lines, King's Meaſure, and it is divided into 24 Taſots, each Taſot a Trifle more than an Inch.

Cokein, an imaginary Specie, uſed in *Japan*, in Accounts, like the Piſtole in many Parts of *Europe*, being in Value about 10 Livres *Carolus* of the Low Countries.

Coffila, a Weight of *Mocha*.

Cohi, a large dry Meaſure uſed in the Kingdom of *Siam*, for Corn, *&c.* It contains 40 Seſtes, and the Seſte 40 Sats; ſo that reckoning the Sat at a Trifle more than 3lb. Marc, and the Seſte 100 Catis, or 125lb. that Weight, the Cohi muſt weigh exactly 5000lb.

Coiang both a Weight and Meaſure of *Cambaye* in the *Eaſt-Indies*, of which 5 make a Laſt.

Commaſſe, or *Connuaſſe*, a ſmall Money current at *Mocha*, and the only one made there; it has no fixed Value, but is dependent on the Governor's Caprice for it; 60 Commaſſes and 80 Caveers, or Cabeers, in which Accounts are kept, make a *French* Crown.

Compan, a Silver Money current in ſeveral Parts of *India*, particularly at *Patane*: It is worth about 9 Sols, *French* Money, though it riſes and falls; and is near the ſame in Value and Alloy with the Mainoudi of *Cambaye*.

Condorin, a Sort of ſmall Weight, which the *Chineſe*, eſpecially thoſe of *Canton*, uſe for weighing the Silver received and paid in Trade; it is worth about 3 Farthings Sterling, 10 of them make 1 Mace, and 10 Mace 1 Talc, or Tael.

Conduri in *Malayan*, or *Laga* in the *Japan* Language, is a ſcarlet Bean with a black Spot on its ſide, which thoſe two People uſe for weighing Gold and Silver.

Conodis, a ſmall Coin uſed at *Goa*, and in all the Kingdom of *Cochin*.

Cotta, a Sort of a Meaſure uſed in the *Maldives*, for meaſuring of Cauris, or Cowries, a ſmall Shell that ſerves as Money in ſome Parts of *Aſia*, and the greateſt Part of the Coaſt of *Africk*; it contains 12000 of thoſe Shells.

Couit, called alſo *Guz*, a Sort of Aune uſed at *Mocha*, for meaſuring Linens and Silks, of about 24 Inches long.

Coupant, an oval Piece of Silver or Gold of *Japan* of various Sizes. The Biggeſt of the Gold ones weigh $1\frac{3}{4}$ Ounce, which at 63 Shillings Sterling *per* Ounce come to 5*l.* 10*s.* 3*d.* others about $\frac{1}{3}$ as big both in Size and Weight, are worth 1*l.* 16*s.* 9*d.* The Silver weigh about $7\frac{1}{2}$ Penny-weights, and all theſe Pieces are not properly Coin, but are taken by Weight as ſuch.

Coupan is alſo a ſmall Weight uſed in the Iſle of *Borneo*, for weighing Diamonds, 10 of them making between 30 and 40 Carats.

Couron, more properly a Sum, than any particular Species of Money, being uſed at the Court of the *Grand Mogul* to expreſs the great Sums in the Finances of that Sovereign, near the ſame as in *France*, and other *European* Courts, where theſe are reckoned by Millions. It has been falſely called by Monſ. *Savari*, Couroure, Courou, and Crou, for its proper Expreſſion is Couron, being in Accounts 10 Millions of Rupees, or 100 Lakes, or Lacks, the Lack making 100,000 Rupees; 100 Courons make one Padan, and 100 Padans one Nil, though theſe two laſt run up ſo high as to be almoſt out of Uſe.

There was never an Occaſion to have the Value of Courons ſo well known or conſidered either in *Europe* or *Aſia*, like the Occurrence at the Beginning of 1739, by the rapid and unheard-of Expedition of the famous *Thamas Kouli-Kan*, Schach-Nadir of *Perſia*, againſt the City of *Dehly*, Capital of the Great Mogul's Dominions, of which an exact Relation arrived to us in 1740, by Way of *Conſtantinople*, and made the Booty taken there amount to 111 Courons, which, valuing the Rupee at 3 *French* Livres, or 30 *Dutch* Stivers, makes 3330 Millions of Livres *Tournois*, or 1665 Millions of Guilders; a Sum and Capture ſo immenſe, as to ſtand unexampled in Hiſtory; and what makes it the more ſurprizing is, that almoſt all theſe Riches were taken in the City of *Dehly* only. And the laſt would ſeem incredible, if it was not known, that the Silks, Cottons, and other Goods, the Manufactures and Growth of this vaſt Empire, attract and bring in here Plate from moſt Parts, both of *Aſia* and *Europe*, by the many Ships that come yearly to purchaſe their Ladings with this Metal, *Indoſtan*

doſtan being an Abyſs for it, where all that which *America* yields is ſooner or later ſwallowed up by falling into the Hands either of the Prince or his Rajas, who never let the Value of a Shilling return. *Thamas Kouli-Kan* having reſtored the Empire he had conquered to the Mogul, impoſed on him, by the Treaty, an annual Tribute of 3 Courons, or 30,000,000 of Rupees; which I ſuppoſe he has been able to ſhake off ſince the Troubles in *Perſia*. I hope this little Hiſtory will not be diſagreeable to my Reader, to whom I have been tempted to offer it, by the extraordinary and uncommon Circumſtances of the Affair, and under the Suppoſition that ſo punctual a Detail of it may not have fallen into every one's Hand.

Daezajie, a Silver Coin, current in *Perſia*, being worth 5 Maimoudis; and 2 of them make the Haſaer Denarie.

Dank or *Danek*, a ſmall Silver Coin current in *Perſia*, and ſome Places of *Arabia*; it weights $\frac{1}{6}$ of a Dragme, and has its correſpondent Value. Dank is alſo a ſmall Weight uſed by the *Arabians*, for precious Stones, and Drugs employed in medicinal Compoſitions; it is $\frac{1}{6}$ Part of the *Arabian* Dragme, or 8 *French* Grains.

Derhem, a ſmall *Perſian* Weight $\frac{1}{5}$ of a Pound.

Dinar, a *Perſian* Word, ſignifying ſometimes all Sorts of Gold Coins, and at other Times a ſmall imaginary Specie, worth 1 Denier.

Dinar Cheray, a *Perſian* Weight of the Value of a Dollar, or Golden Ducat.

Ding, a general Name for all Weights at *Siam*, in particular; they have ſcarcely any others ſeparate from their Coins, though this is only to be underſtood of the Silver ones, Gold having no Currency here as Money, but is bought and ſold as a Merchandize, and is worth twelve times as much as Silver.

The Weights of *Siam*, that have the ſame Name with their Money, are the *Cali* or *Schang*, the Mayon or Seling, the Foüan, Sompaye, Paye, and the Clam.

Doudou is a Copper Money, current in ſome Parts of the Eaſt, particularly at *Suratte* and *Ponticherry*; it is worth a Trifle leſs than 2 *French* Liards, ſo that there go 14 to the Gold Fanon of thoſe Places, or about 6 Sols *Tournois*; and 1 Doudou is worth 2 Caches.

Dung, a ſmall *Perſian* Weight, $\frac{1}{6}$ of a Meſcal, and of which about 3600 go to the ſmall Batman of *Perſia*, called the Batman of *Tauris*, and near 7200 to the great, or King's Batman. Beſides the Dung, here is the Grain of Barley, reckoned $\frac{1}{4}$ of it, ſo that the Batman of *Tauris* conſiſts of near 14,400 Grains of that Corn, and the King's Batman as many again. Dung is alſo a Silver Coin, made and current in *Perſia*, weighing 12 Grains.

Fano, a ſmall Weight uſed at *Goa*, and ſome other Places in the *Eaſt-Indies*, for weighing Rubies, being 2 *Venetian* Carats.

Fanon, or *Fanos*, a Coin current on the Coaſt of *Malabar*, *Coromandel*, in the Iſle of *Ceylon*, and ſeveral other Parts of *India*; there are of them both Gold and Silver; the former not the ſame in all Places, either in Goodneſs or Weight, which makes a great Difference in their Value: The heavieſt are not worth above 5*d*. to $5\frac{1}{2}d$. Sterling, and the lighteſt little more than 5 Farthings; they weigh ſeven Grains, but the Gold is of ſo baſe an Alloy, that 22 of them hardly make half a Crown; theſe are made at *Aſem*; and thoſe of *Pegu* are of the ſame Weight, but being of a better Standard, 15 are equal in Value to the aforeſaid 22. There are likewiſe Golden Fanons at *Ponticherry*, worth about $3\frac{1}{2}d$. They are made like the half of a Pea, and nothing bigger; 12 Doudous are given for this Fanon, and 2 Caches for the Doudou.

The Silver Fanos are not worth at moſt above 2*d*. Sterling, 20 of them going to the Pardo, a *Portugueſe* Money made at *Goa*.

Faratelle, a Weight made Uſe of in ſome Parts of *India*, equal to 2lb. of *Liſbon*, of 14 oz. Marc, or $1\frac{3}{4}$ of *Paris*.

Fayalle, an imaginary Coin, valued by ſome as the Piſtole of *France*, *viz*, 10 Livres, and by others $12\frac{1}{2}$ Livres; which Difference apparently proceeds from the firſt Valuation being made on the *French* Livre of 20 Sous, and the other on the Livre or Guilder of *Holland*, worth 25 Sous.

Forle, or *Fulle*, a Copper Coin, made and current in *Egypt*, it is alſo called Bulbe or Bulba, this Specie is about the Size of a *French* Double, though a little thicker

thicker, and is worth a Liard, or 3 Deniers that Money: Eight Forles make a Meidin, and there are half Forles; the *Turks* call it Mangour.

Fouang, or *Foang*. Vide *Baat*.

Fun, called a Money by *Gemelli*, an *Italian*, the only one that ſpeaks of it, though he leaves its Value and Metal unexplained. The Journal of the Sieur *Lange* to the Court of *China* in 1721, ſays, the *Chineſe* Weights are diivded into *Laen*, *Tzin*, and *Fun*, of which 10 Tzins make a Laen, and 10 Funs a Tzin. A Laen of *China* has ſomething more in Silver than the *Ruſſian* Rouble. 16 Laens make 1 Gin, which a little exceeds the *Dutch* Pound of 16 Ounces. 4 Funs make near 30 Zſchoſſes, or Tizüns, a ſmall Braſs Coin. One Laen of the fineſt Silver is, according to its juſt Value, worth 1000 Zſchoſſes. The Price of this Money is commonly ſo ſubject to vary, that it regularly riſes and falls weekly; and from what is ſaid above, we may reaſonably conclude that the Laen is the ſame as is called by ſome the Laem, explained to be a Piece of Silver paſſing by Weight, and called by the *Portugueſe* Tael.

Gallo, a Silver Money of the Kingdom of *Camboya*, in the *Eaſt-Indies*, weighing 1 Mace, 5 Condorins *Chineſe*. Its Standard was once 80 Tocques, but in the Year 1718 it fell to 60.

Gantan, a Weight uſed at *Bantam* in the Iſle of *Java*, and ſome other Parts of the *Eaſt-Indies*, weighing near 3 *Dutch* Pounds.

Gantan is alſo a Meaſure for Pepper, containing exactly 3lb. *Vide* Baruth. *Nic. de Graaf* ſays, that the Inhabitants of *Batavia* call the Meaſures they uſe for Rice, Gunting, containing near 15lb. Weight, and though the Names of Gantan and Gunting are very much alike, their Contents greatly differ.

Ganzas, or *Gauzas*, a Money made of Copper and Pewter by Particulars in the Kingdom of *Pegu*, and not in the Royal Mints. The Value of theſe are not fixed, but riſe and fall according to the Times of Payment, for the Goods of the Country, though they are commonly worth between 2 and 3 *French* Sous.

Gari, a Sort of an imaginary Specie, or rather the Denomination of a Sum, uſed in many Parts of the *Eaſt-Indies*, and particularly in the Dominions of the Great Mogul; 1 Gari of Roupees is worth near 4000 Roupees.

Gazana, or *Gaſava*, is a Silver Coin, and one of the Roupees current in the *Great Mogul's* Territories, particularly at *Amadabath*, worth $1\frac{1}{2}$ Livre *Tournois*.

Gaze, a ſmall Copper Money made and paſſing in *Perſia*, worth near 2 *French* Liards; ſome confound this with the Kabeſqui, and others eſteem it the Demi-Kabeſqui, or *Perſian* Liard.

Ge, or *Je*, a long Meaſure in the Empire of the Great Mogul, though it is not real but imaginary, and comes to about $34\frac{1}{2}$ *Dutch* Aunes.

Geden, a Meaſure of Continence, that the *Indians* uſe for their Grain, and contains near 4lb. of 16 oz. Weight of Pepper.

Goltſchut, a Sort of Money, or rather a ſmall Ingot of Gold that comes from *China*, and is regarded there rather as a Commodity than a current Specie; the *Dutch* gave it this Name, ſignifying in their Language a golden Boat, becauſe it is in this Shape, through other Nations call them gold Cakes.

As neither in all *China* or *Tonquin*, any Gold or Silver Money is ſtruck, the Natives cut thoſe two Metals into Bits of diverſe Weights, calling the Silver ones Taels, and the Gold ones Goltſchuts, of which I am ſpeaking; theſe ſerve in large Payments, when the Taels and Copper Money are inſufficient. Here are of two Sorts, the one of $32\frac{1}{7}$ Oucces, and the other but half as much. When the *Chineſe* tranſport their Goltſchuts into different Parts of *India*, where they trade, the Merchants they deal with commonly cut them in Halves, as the *Chineſe* are ſo diſhoneſt, as often to line theſe Gold Cakes with either Copper or Silver to $\frac{1}{3}$ of their ſuppoſed Value.

The *Japaneſe* have alſo their Goltſchuts, though only of Silver; which, being of various Weights, are conſequently of different Values.

Grimelin, a ſmall Silver Coin, made and current at *Tripoli* in *Barbary*, in Value a little more than four Sols *Tournuois*.

Gueſte, a long Meaſure uſed in ſome Parts of the *Mogul's* Dominions, being about $1\frac{1}{2}$ *Dutch* Aune.

Gueze, ditto of *Perſia*, for meaſuring Stuffs, Linens, &c. Of this Meaſure there are two Sorts in that Kingdom, *viz.* the Royal Gueze, called alſo Gueze Monkelſets; and the Gueze Racourcie, called ſimply Gueze; this laſt being only $\frac{2}{3}$ of the other. The Gueze Monkelſet contains 2 Feet 10 Inches, and 11 Lines of *Paris*, or $\frac{4}{5}$ of that Aune, ſo that 5 Gueze make 4 Aunes.

In *India* is alſo uſed a long Meaſure called Gueze, which is near 6 Lines ſhorter than that of *Perſia*, or about $\frac{1}{10}$ of an Aune leſs, though as the Difference is ſo ſmall it is ſeldom regarded.

Guppas, Weights uſed in ſome Towns in the Straits of *Malucca*, particularly at *Queda*. 4 Guppas make the Guantas; 16 Guantas, 1 Hali, or Nali; and 15 Halis the Bahar of 450lb. Marc.

Haſaer Menarie, a Silver Coin current in *Perſia*, worth 10 Mamoudis.

Jerun Chrochen, a Money coined in the Dominions of the *Grand Signor*, current for half a Ducat.

Keer, or *Ceer*, Weights uſed in ſome Cities of the *Great Mogul*, particularly at *Agabar* and *Ziamger*, in the firſt of which Places it weighs 36 ſmall Weights of $1\frac{1}{4}$lb. Marc, and in the other 36 of $1\frac{1}{2}$lb.

Ken, a Sort of an Aune uſed at *Siam* not quite 3 Feet, 2 Kens making 1 Voua, which is a *French* Toiſe leſs 1 Inch; the Ken likewiſe makes 2 Socks, the Sock 2 Keubs, the Keub 12 Nious, and there go 8 Grains of unhuſked Rice to a Niou, which makes 9 *French* Lines.

Kepath, a ſmall Weight uſed by the *Arabians*; it is $\frac{1}{2}$ a Danck, or Dank, that is the Grain; 12 Kepaths make the Dirhem or Dragme of *Arabia*, and ſome have thought that the Word Karat comes from this of Kepath.

Khatovat, a long Meaſure uſed in *Arabia*, and is the Geometrical Pace of the *Europeans*, it contains three Akdams or Feet, and 12000 Khatovats make the Paraſange.

Kiſle, a liquid Meaſure alſo of *Arabia*, though Authors differ about its Contents, ſome making it equal to a Septier, others to a Pint or Bottle, and ſome only to a Poiſſon, or $\frac{1}{4}$ of a Septier of *France*.

Lack, or *Lake*, 100 of which make a Couron of Roupees, and this Roupee reckoned worth a *French* Crown of 3 Livres, $1\frac{1}{2}$ *Dutch* Guilders, or 2*s*. 6*d*. Sterling. *Vide* Couron.

Larres, a Money uſed in the *Maldives*, of which 5 make a Dollar.

Mamoudi, a Silver Coin current in *Perſia*, and many Parts of the *Eaſt-Indies*; the *Perſian* Mamoudi is in Size and Shape like the *French* 5 Sol Piece, and is worth 2 Chayes or Schaes; 2 Mamoudis make an Abaſſi, and 100 a Toman, which is the largeſt Account Money in *Perſia*. The *Indian* Mamoudis, called alſo Mamedis, have no certain Value. In the Province or Kingdom of *Guzurate* the Mamoudi is worth 12 *French* Sols, ſo that five of them make a Crown *Tournois*, and the ſmall Mamoudis bear a proportionable Value, that is 6 Sols at *Guzurate*, and more or leſs at *Bengal* and other Places, according to their Riſe and Fall.

Man, *Maun*, *Maud*, *Mem*, *Mao*, or *Mein*, Weights uſed in the *Eaſt-Indies*, eſpecially in the Dominions of the *Grand Mogul*, and its ſeveral Names undoubtedly proceed from the different Pronunciation of the many various Nations that Trade draws here, both *Aſiaticks* and *Europeans*: There are two Sorts of Mauns, the one called the King's Maun or Weight, and the other only a Maun. The King's Maun ſerves for weighing Neceſſaries, and Things for Carriage, and is compoſed of 40 Serres, and each Serre exactly a *Paris* Pound; ſo that 40 *Pariſian* Pounds are equal to one King's Maun. Though the Sieur *Tavernier*, in his Obſervations on the *Eaſt-India* Trade, ſeems to diſſent from this Calculation, and ſays that the Maun of *Suratte* comes out to only about 34lb. of *Paris*, being compoſed of 40, and ſometimes 41 Serres, but that the Serre is near $\frac{1}{7}$ lighter than the aforeſaid Pound. He likewiſe ſpeaks of a Maun uſed at *Agra*, the *Great Mogul's* Capital, which is half as heavy again as that of *Suratte*, and which on the Footing of 60 Serres whereof it is compoſed, makes 51 to 52 *Paris* Pounds. The 2d Sort of Maun is that uſed in Trade compoſed alſo of 40 Serres, but each of theſe Serres is reckoned only 12 Ounces or $\frac{3}{4}$ of a *Paris* Pound. In the *Eaſt-Indies* there is yet

a third Diſtinction of the Maun, in common Uſe at *Goa*, conſiſting here of 24 Rotolis, each 1½lb. *Venetian*, or 13 Ounces 1 Groſs of *Paris*, the *Venetian* Pound being only 8 Ounces 6 Gros of *Paris*, ſo that the *Goa* Maun weighs 36lb. of *Venice*, and 19lb. 11 Ounces of *Paris*. In fine, the Maun is a Weight that alters according to the Places and Sorts of Goods it is uſed in. At *Suratte*, another Author ſays, it makes 42 Ceires, or Serres, but is either greater or leſs, according to the Commodities weighed with it. It is of 34lb. in the Sales of Cotton, Gum-Lacque, Benzoin, Vermillion, Quickſilver, Copper, Pewter, Sandal Wood, Areque, Ivory, or Elephants' Teeth, *Spaniſh* Wax, *&c.* which is alſo agreeable to what Mr. *Tavernier* ſays. It is 35⅝lb. for weighing Indigo at *Suratte*, and but 34½lb. at *Amadabat*. It is 36½lb. on the Sales of Camphire, Spice, Tea, dry Pulſe, or Wheat, Siampan Wood, *&c.* but at *Amadabat* the Maun in Regard of theſe Goods, is 38½lb. It is 38lb. for *Cachou*, and 40lb. for Aſſa-Fœtida. At *Bengal* the Maun is 40 Ceirs, and weighs 64lb. for Spice, and 68lb. for Pewter, Copper, Quickſilver, Lead, and moſt Sorts of Drugs; and 64⅘lb. for Silk. On the Coaſt of *Coromandel* the Maun is 68lb. as at *Bengal* on moſt Goods; it likewiſe weighs 40 Ceirs, and the Ceir 1 1/70lb. Maun, or more commonly Batman is a *Perſian* Weight. *Vide* Batman.

Maun is yet a Weight of *Bandaar-Gameron*, in the *Perſian* Gulf, of 6lb. the other Weights are the Maun-cha weighing 12lb. and the Maun Surats weighing 30lb. The Maun at *Mocha* weighs a little leſs than 3lb. and 10 of them make 1 Traſſel, 15 Traſſels 1 Bahart, and the Bahart is 42lb.

Mangalis, a ſmall *Eaſt-India* Weight, of near 5 Grains, only ſerving to weigh Diamonds, Emeralds and other precious Stones being weighed by Catis of three Grains each.

Mangelin is alſo a ſmall Diamond Weight at the Mines of *Raolconda* and *Pani* otherwiſe *Coulers*. The Mangelin of theſe two Mines weighs 1¾ Carats, that is 7 Grains; there are alſo in the Kingdoms of *Golconda* and *Viſapour*, Mangelines that weigh 1⅜ Carat. The Mangelines of *Goa*, in uſe among the *Portugueſe*, only weigh 5 Grains; and though they are commonly called Mangalis, theſe two are different Weights, as this Account of them plainly demonſtrates.

Mangours, a ſmall Coin current in *Egypt*, whoſe true Name is Forle, which ſee.

Manſia, Weights uſed in ſome Places of *Perſia*, particularly in the *Schirvan* and in the Neighbourhood of *Tauris*: It weighs 12lb. or a little leſs.

Man-Surats, this Word conſtrued is, *Suratte* Weights, of forty Ceirs. *Vide* Maun.

Marco, a Weight uſed at *Goa*, of 8 Ounces *Portugueſe*, that is a Demi Rotoli.

Mas, or *Mace*, a Sort of ſmall Weight uſed in *China*, eſpecially on the Side of *Canton*, for weighing Silver. *Vide* Condorin.

Maures, a Gold Coin current at *Suratte*, and in ſome other Parts of the *Mogul's* Dominions.

Memceda, a Liquid Meaſure uſed at *Mocha* in *Arabia*, it contains 3 Chopines of *France*, and 40 Memcedas make 1 Teman.

Merigal, a Species of Gold Coin current at *Sofala*, and in the Kingdom of *Monopotam*; it weighs a little more than a *Spaniſh* Piſtole.

Meſcal, a ſmall *Perſian* Weight, making near the hundredth Part of a *French* Pound of 16 Ounces; this is the Demi-Derhem, or Demi-Dragme of *Perſia*. 300 Derhems, or 60 Meſcals make the Batman of *Tauris*, which weighs 5lb. 14 Ounces *French*. *Vide* Batman.

Metecal, a Sort of Gold Ducat, ſtruck at *Morocco*, and in ſome other Cities of that Kingdom and *Fez*. This *Metecal* is different from the Metecal of *Fez*, only worth 20 *Dutch* Stivers; the old Metecals excel the new ones both in Weight and Fineneſs; theſe are of different Goodneſs, and conſequently of various Values, which occaſions no ſmall Difficulty in Trade.

Metkal, or *Mitkal*, a ſmall *Arabian* Weight, of which 12 make an Ounce.

Metricol, or *Mitricol*, a ſmall Weight 1/6 Part of an Ounce, which the *Portugueſe* Apothecaries and Druggiſts uſe in the *Eaſt-Indies*; beſides which they have the Metricoli, which only weighs 1/8 of an Ounce.

Minaltoun,

Minaltoun, an imaginary Specie made Uſe of in ſome Parts of *Perſia*, making 10 Yonſaltoun, 2 Yonſaltouns make 1 Abaſſi, and 5 Abaſſis the Minaltoun. The Yonſaltoun is alſo called Mamoudi-Lacze.

Moncha, or *Monka*, a Sort of Boiſſeau or Corn Meaſure uſed by the Inhabitants of *Madagaſcar*, for meaſuring huſked Rice. *Vide* Troubahouache.

Moroedje, a Silver Money current in *Perſia*, particularly at *Iſpahan*, of which 7 make a *Dutch* Crown.

Murais, or *Morais*, a Meaſure for Rice and other dry Pulſe uſed by the *Portugueſe* at *Goa*, and in their other Colonies, containing 25 Paras, and the Para weighing 22 *Spaniſh* Pounds.

Nali, an *Eaſt-Indian* Weight. *Vide* Hali and Guppas.

Nanque, is the ſmalleſt Weight of the five, uſed among the Inhabitants of *Madagaſcar*, for weighing Gold and Silver; it is equal to 6 Grains, and beſides this, here are the Sompi, Vari, Sacare, and the Nanqui. *Vide* Sompi.

Naſara, a Silver Money cut ſquare, ſtruck at *Tunis*.

Nevel, a ſmall Coin of a baſe Alloy, current on the Coaſt of *Coromandel*, 8 or 9 of which make a Fanon, and 15 Fanons a Pagode; the Nevel is worth from 3 to 6 Caſſes.

Oubang, is a Gold Money of the largeſt Sort at *Japan*; its Figue is oval, nearly reſembling in Form and Size the Sole of a Shoe, and its Value is 10 Coupangs, or Coupans, which are Pieces of Gold of the ſame Figure, but ten times leſs in their Weight, or $\frac{1}{5}$ leſs in their Surface; the Oubang is worth 100 Rixdollars in *Indid*, and the Coupang ten.

Paenſzajie, Silver Money current in *Perſia*, worth $2\frac{1}{2}$ Mamoudis; 2 Paenſzajies make 1 Daezajie, and 2 Daezajies the Hazaar Denarie.

Pagoda, is a Gold Coin common on all the Coaſts of *Coromandel*, and almoſt the only one in Uſe in the Trade carried on there; large Payments being always made in theſe gold ones. The *Engliſh* make of them at Fort *St. George*, of the ſame Standard and Weight with thoſe of the Country, and which paſs for the ſame Value. The *Dutch* alſo ſtamp ſome at *Palaiacata*, ſays my Author, though I believe he miſtakes it for *Negapatnam*, of the ſame Weight with the *Engliſh*, though 2 to 3 *per Cent.* better in Fineneſs, and conſequently are more ſought after.

At *Narſingua*, *Biſnagar*, and the neighbouring Parts, they make Silver Pagodes of divers Standards and conſequently of various Values; the ſmalleſt are worth 8 Tangas, reckoning the Tanga at 90, or 100 *Indian* Baſarucos. *Vide* Baſaruco.

Para, a Meaſure that the *Portugueſe* uſe in *India* for Pulſe, weighing 22lb. *Spaniſh*, and is $\frac{1}{2\frac{1}{5}}$ of the Mourais.

Pardao, or *Pardo Kerafin*, a Silver Money of a baſe Alloy, which the *Portugueſe* ſtamp in *India*, current at *Goa*, and on the Coaſt of *Malabar*; they are worth near 300 Reas, or 20 Fanons; there are alſo $\frac{1}{2}$ and $\frac{1}{4}$ Pardaos, and ſome ſay there are likewiſe double ones. And as no Money is more eaſily counterfeited than this, the *Indians* make many falſe ones up in the Country, and bring them down to paſs in Trade, which they would eaſily do, were it not for ſome of the Chriſtian Natives, who are employed to examine them, and are ſo expert in their Office, that they will readily and certainly detect the Falſity only by feeling.

Pardaos de Reales, is a Name given to the *Spaniſh* Dollars, the only Specie of that Nation current in *India*, which have a certain Value fixed on them, from which they never lower, but often riſe as they are wanted.

Pardos, a Piece of Silver Money current at *Moſambique*, and along the Coaſt of *Africk*, worth 200 Reas.

Pau, a long Meaſure uſed at *Loango de Boaire*, and in ſome other Places on the Coaſt of *Angola* in *Africk*. There are three Sorts of *Paus* at *Loango*. That of the King and his favourite prime Miniſter; that of his Princes and Captains; and that of Particulars. The King's Pau, is 28 Inches long, that of the great Men 24 Inches, and that of Particulars only $16\frac{1}{2}$.

Pecha, or as it is wrote by ſome, *Peſſa*, and by others *Peyſes*, is a ſmall Copper Money current in many Places of *India*, eſpecially in the maritime Provinces of the *Great Mogul*, and more particularly in the Kingdom of *Guzarate*, whoſe principal Cities are *Surate*, *Baroche*, *Cambaya*, *Bondra*, and *Amadabad*; 26 make 1 Mamoudi,

Mamoudi, and 54 a Rupee; ſo that the Pecha is worth near 8 Deniers. In thoſe Parts of *India*, where the Cowrie Shells are current, 50 or 60 of them are given for the *Pecha*, and where the *Caramania* Almonds paſs for ſmall Money, 40 or 44 of them.

Pic, *Pick*, or *Picol*, the *Chineſe* Quintal of 100 lb. their Weight, or 125 lb. Marc.

This Weight is alſo in Uſe at *Siam*, *Malacca*, and in the Iſles of *Sonde*, though at the firſt of theſe it conſiſts of double the Number of *Siameſe* Catis, to what it does of the *Chineſe*, as the former Cati is only half of the latter.

Picol, is alſo another Weight uſed in *China* for Silk, containing only 66¾ Catis; ſo that three of theſe Picols make as much as the Bahar of *Malacca*, that is 200 *Indian* Iſles, weighing near 20 *Dutch* Pounds.

Pole, a Copper Money ſtruck at *Boghar*, an ancient Province of *Perſia*, at preſent governed by its own Prince, 120 of which go to the Silver Coin of the Country, worth about 12 Sols *Tournois*, though this Value is not always certain, as it riſes or falls as the Prince pleaſes.

Pont, or *Punt*, a long Meaſure uſed in *China*; of which ten go to 1 Cobre, and the Cobre is about 13⅓ *French* Inches.

Ratis, a Weight uſed for Diamonds, at the Mines of *Soumelpour* in the Kingdom of *Bengal*; and in all the *Great Mogul's* Empire for Diamonds and Pearls it is ⅞ of a Carat of 3½ Grains.

Refe, a long Meaſure uſed at *Madagaſcar*, near what is called the Braſſe in *Europe*. They alſo uſe the Demi-Refe, or Span.

Rize, the Name given to a Sack with 15000 Ducats, in the Territories of the *Grand Signor*, ſo that it may paſs as a Sort of a reckoning Money, like a Ton of Gold in *Holland*, or a Million in *France*.

Roe-neug; this is the largeſt Meaſure for Lengths and Diſtances uſed in the Kingdom of *Siam*, being the *Siameſe* League, of near 2000 *French* Toiſes. There go to it 20 Jods, 4 Sens to the Jod, 20 Voua to the Sen, and 2 Ken to the Voua; the Ken is the *Siam* Aune.

Rotolo, or *Rotoli*, a Weight ued in *Sicily*, ſeveral Parts of *Italy*, *Portugal*, *Cairo*, and other Places in the *Levant* and *Egypt*, *Goa*, *&c.* is very different in moſt of theſe Parts mentioned, as has been already ſhewn; therefore as a Weight I have nothing to add about it; and ſhall only ſay it is alſo a liquid Meaſure in ſome Cities and States of the *Barbary* Coaſts, 32 of them at *Tripoli* making a Matuli. another Weight alſo uſed in this City of 32 Rotolis, and 42 of theſe Rotolis make a Mataro or Matara of *Tunis*.

Roup, beſides being a Coin of *Poland*, is alſo one made and current in ſome Provinces of the *Turkiſh* Empire, particularly at *Erzerum* in *Armenia*, being worth ¼ of a *Spaniſh* Dollar.

Rupee, a current Coin in the Empire of the *Great Mogul*, and in many other Places and Kingdoms in the *Eaſt-Indies*. There are both Gold and Silver of this Denomination, though thoſe of the firſt Metal are ſcarce and in little Uſe, weighing 2¾ Drachmes and 11 Grains; there are alſo it's Fractions of Halves and Quarters. The Silver Rupee is of ſo unequal a Value, as to be with Difficulty fixed on any certain Footing, its Worth varying according to its Quality and the Place of its Fabrication; there are 5 Sorts of them, *viz.* the Rupee *Siccas*, worth at *Bengal*, 39 Sols *Tournois*, thoſe of *Suratte* 34, and thoſe of *Madras* 33, all of the new ones, thoſe called Arcates, and the laſt Petch. The new ones are round, and many of the old ones ſquare, though they are both of the ſame Weight; and beſides theſe Diſtinctions of new and old, the Indians make the other five abovementioned; and it may in general be remarked, that all theſe Sorts are in higher Value at the Places of their Make than elſewhere; and that the new are always worth more than the old; the Reaſon of which Difference proceeds from the Love the Natives have of Silver, which induces them for its Preſervation to hide it carefully in the Earth, as ſoon as they get a few Rupees together. To prevent which Diſorder, that drains the Countries where it is practiſed of their current Species, the governing Prince and Rajas ſtamp new ones annually, with an Augmentation in Value, without any Increaſe of Weight, and theſe conſequently grow diminiſhing in Worth as they

grow old. The Silver Rupee is the moſt current Money in Trade, both at *Suratte* and *Bengal*; but on the Coaſt of *Coromandel*, the Gold Pagodes, worth 2 Rixdollars or $3\frac{1}{3}$ Rupees, are the moſt in Uſe.

It is from the *Madras* Rupee that the Value of all others is proportioned, and that varies according as certain Circumſtances occur; and theſe different Sorts of Rupees have not an equal Currency in every Place, as may be ſeen by the above Valuation of them. The Rupee uſed in Accounts is only an imaginary Specie, as well at *Suratte* as *Bengal*, to which the Value of the old Rupee is often reduced, and is worth $\frac{2}{15}$ leſs than that of *Madras*. All Sorts of Rupees are divided into a ſmaller Money, called Ana, of which 16 go to the Rupee; but it muſt be obſerved that the Ana is worth more or leſs in Proportion to the Value of that Kind of Rupee of which it is a Part. Some Anas are made at *Madras*, but ſo few that they are rarely ſeen to paſs, ſo that this Specie is rather a reckoning Money than a current one. The ſmalleſt Coin, and that in greateſt Uſe, among the common People, and in the Markets, are the Cowries, 80 of which are counted a Pouni, according to the Cuſtom of *Bengal*; ſo that a Rupee is divided into Anas, Pounis, and Cowries, according to which the following is the Value of all Rupees as they paſſed at *Bengal* in 1726.

The Rupee of *Madras* was worth	38	Pounis, or	3040 Cowries.
The Sike, or Sicca Rupee	$39\frac{1}{2}$		3160
The Rupee, Arcate	37		2960
The Rupee, Petch	$36\frac{1}{2}$		2920
The Current, or Old Rupee	34		2720

Beſides which there are yet two other Species of Money in Accounts, called the Heys and Gandan, the firſt worth 95 Cowries, and the other 4. The current Rupee is that uſed in the Revenues of the *Great Mogul*, and was in 1726 and 1727, worth $1\frac{1}{2}$ *Dutch* Guilders, or, which was the ſame Thing, a *French* Crown in 1741.

Rubie, a Gold Coin, current in all the Kingdom of *Algiers*, and in thoſe of *Congo* and *Labex*, worth 35 Aſpers; it is eſpecially ſtruck at *Tremecen*, which has the Privilege of making theſe, as well as the Medians and Zians.

Sacare, a ſmall Weight uſed in *Madagaſcar*, for Gold and Silver, being equal to an *European* Scruple.

Sat, a Meaſure at *Siam* for Corn, Seeds, Pulſe, and ſome dry Fruits; it is a Sort of a Buſhel made of Bambou, and 40 of them make a Seſte, and 40 Seſtes the Cochi; it is difficult to reduce with any Certainty theſe Meaſures to thoſe of *Europe*, as ſome reckon the Seſte 100 Catis, and the Cati, as has been already obſerved, not being of the ſame Weight in all Parts of *India*, the Seſte or Sat cannot be aſcertained; but if 100 Catis be eſteemed 125lb. Marc, the Sat will be near 3lb. and the Cochi 5000lb.

Schan, or *Schang*, in *Chineſe* Cati, is a Weight uſed in the Kingdom of *Siam*; the *Chineſe* Cati is worth 2 *Siameſe* Scans; ſo that the *Chineſe* being 16 Taels, the *Siameſe* muſt be only 8, though ſome reckon that of *China* at 20 Taels, and the other half. The Tael weighs 4 Baats or Ticals, each of near half an Ounce; the Baat 4 Selings, or Mayons; the Mayon 2 Fouangs; the Fouang 4 Payes, the Paye 2 Clams; the Clam weighs 12 Grains of Rice, ſo that the Tical or Baat weighs 768 of thoſe Grains.

It is to be obſerved, that the greateſt Part of theſe Weights paſs alſo for Money, either real or in reckoning, as Silver is a Merchandize, and ſold by Weight.

Scharaſi a golden Coin, that was formerly made in *Egypt*, worth the ſame as a Sultanin, that is, near a golden Crown of *France*; the *Arabians* call it Dinar, or Methcal-aldhegal, the Scharafi at preſent ſcarce, and ſome believe them to be the ſame Specie as what the *Greeks* name Golden Bezans.

Scherefi, a Gold Coin current in *Perſia*, worth 8 Larins, at the Rate of 2 *Spaniſh* Dollars *per* Larin; the *Europeans* call them Golden Seraphin.

Scherif, otherwiſe called Sultanin, and very commonly Sequin; it is a Gold Coin current in all the *Grand Signor's* Dominions, though it is hardly ever made at any Place but *Cairo*, and is the only Gold Specie ſtruck in *Turkey*.

Schuite d' Argent, a Sort of Account Money at *Japan*, on which Payments in Trade are eſtimated, being worth 12½ *Dutch* Guilders, that is 5 Rixdollars, or Crowns of the United Provinces; and otherwiſe it is reckoned equal to 4 Taels, 6 Mace, and 5 Condorins; the Value of them varying a little according to the Year.

Sompaye, is the ſmalleſt Silver Coin current at *Siam*; it was worth 2 Sols and Demi-pite *French* Money, when the Ounce of Silver was only valued at 3½ Livres. It is the half of a Fouang, and 12 to 13 Siameſe Catches are given for 1 Sompaye, or 400 Cowries. The Sompaye is divided into 2 Payes, the Paye into 2 Clams; but theſe two Sorts of Money are only imaginary, and not current Specie; the Sompaye and its Diminutions ſerve alſo for Weights; the Clam weighing 12 Grains of Rice, and the other riſing in Proportion.

Sompi, a ſmall Weight, which the Inhabitants of *Madagaſcar* uſe for Gold and Silver; it weighs but 1 *Paris* Dragme, and yet it is the heavieſt Weight theſe Iſlanders have; they not knowing what the Ounce or Pound is, nor have any thing anſwering to them; the Diminutions of the Sompi, are the Vari, or Demi-gros, the Sacare or Scruple, the Nanqui or Demi-ſcruple, and the Nanque, equal to 6 Grains.

Sordis, a ſmall Money current at *Ormus* in the *Perſian* Gulf, being worth 4 Payes, and the Paye 10 Beſorchs. *Vide* Beſorch.

Tael, called by the *Chineſe*, Leam, is a ſmall Weight of *China*, equal to 1 Ounce and 2 Dragmes. *Vide* Cati, Mace, and Condorin.

Tamling, a *Siameſe* Name to this Specie of Money and Weight, which the *Chineſe* call Tael; the Tael of *Siam* is more than half lighter than than of *China*. *Vide* Cati, Baat, *&c.*

Tanga, an Account Money uſed in ſome Parts of the *Eaſt-Indies*, particularly at *Goa*, and on the Coaſt of *Malabar*; there are two Sorts of this Coin, the one called the good, and the other the bad Alloy; it being very common in *India* to reckon by Money of good and bad Alloy on Account of the vaſt Quantity of different Specie current there that are either falſe or altered. The Tanga of good Alloy is ⅓ heavier than that of a bad Alloy, ſo that if 5 of the former Tangas are given for 1 Pardao-Xerafin, there muſt be 5 of the others. 4 Vintins of a good Alloy make 1 Tanga of the ſame Standard; and 15 good Barucoes go to the Vintin; the good Baruco, on the Footing of the *Portugueſe* Reas; but when the Barucos are of a baſe Alloy, three of them only make 2 Reas.

Tare, or *Tarre*, Money of the *Malabar* Coaſt, is a Silver Coin worth 6 Deniers *Tournois*; 16 of them make 1 Fanan, which is a ſmall Piece of Gold worth 8 *French* Sols.

Tela, a Sort of Money, or rather a Gold Medal ſtruck by every King of *Perſia* at his coming to the Crown, which are diſtributed among the People; they are in Weight like the *German* Gold Ducat, but have no Currency in Trade, nor among the Merchants.

Teman, a liquid Meaſure uſed at *Mocha* in *Arabia Felix*, containing 10 Memcedas.

Tiboſe, an *Eaſt-Indian* Coin, being one of the Rupees current in the States of the *Grand Mogul*, and worth double the Gaſana Rupee.

Tol, this is the ſmalleſt Weight and Meaſure uſed on the Coaſt of *Coromandel*, of which 24 make a Ceer; 5 Ceer the Büs; 8 Büs the Maun; and 2 Mauns the Candi, which is the heavieſt Weight in this Part of *India*.

Toman, by ſome called Tumein, is an Account Money uſed by the *Perſians* in keeping their Books, and to facilitate the Reduction of large Sums in Payments. It is compoſed of 50 Abaſſis, or 100 Mamoudis, or 200 Chayes, or 10,000 Dinars, being near 43, or 46 *French* Livres, valuing the Abaſſi at 18 Sols and 6 Deniers; the Mamoudi for 9 Sols, 3 Deniers; the Chaye 4 Sols, 6 Deniers, and 1 Maille; and the Dinar for the Denier *Tournois*. The Toman is alſo a Weight uſed in *Perſia* for weighing Money, which in large Payments is always received in this Manner and never counted; the Toman weighs 50 Abaſſi.

Toque, a Sort of reckoning Money uſed at *Juda*, and ſome other Parts of the *African* Coaſt, where the Bouges or Cowries are current; one Toque of Bouges is compoſed of 40 of thoſe Shells; and 5 Bouges make 1 Galline.

Troubahouache, called alſo Moncha, or Monka, a Meaſure uſed by the Inhabitants of *Madagaſcar*, for their huſked Rice, containing near 6lb. of that Grain; but for their unhuſked Rice they have another Meaſure named Zatou.

Val, a ſmall Weight uſed in *India* for Dollars or Pieces of Eight, each of which ought to weigh 73 Vals. It alſo ſerves for weighing Gold Ducats, which muſt weigh 9 Vals and $\frac{3}{16}$ of an *Indian* Carat, and whatever is wanting of theſe Weights in either, the Vender is obliged to make good.

Vari, a ſmall Weight in Uſe among the ancient Inhabitants of *Madagaſcar*, weighing near half a Dragme Marc; here is likewiſe the Sompi, Saccare, Nanqui, and Nanque; none of which are uſed, only for weighing Gold and Silver.

Voule, a ſmall Meaſure uſed by the Natives of *Madagaſcar*, in retaling their huſked Rice; it contains near half a Pound of Rice, and 12 of them make the Troubahouache or Monka, and 100 the Zatou.

Zaciües, a ſmall Silver Money current in *Perſia*, being a half Mamoudi. *Vide* Mamoudi.

Ziangi, a Silver Money at *Amadabath*, that is likewiſe current in other Places of the *Mogul's* Territories; it is among the Number of the Rupees, and worth 20 *per Cent.* more than thoſe called Gaſana, and is about 36 *French* Sols, the Value of which laſt Coin is to be underſtood through this whole Calculation, except where it is expreſſed otherwiſe, to be as it was current at the Time of making it, *viz.* 13 Livres, 6 Sols, and 8 Deniers for a Pound Sterling.

A MODERN

A

MODERN UNIVERSA

OF THE

REAL AND IMAGINARY MONIES OF

Divided into FOUR PARTS, *viz.*

EUROPE, ASIA, AFRICA, and

And Subdivided into the moſt Capital Places of each. The Species of Money are ſpecified; a
Figures ſtanding under the Denomination of each Foreign Piece, is the *Engliſh* intrinſick Value th
of the *Tower of* LONDON.

EXPLANATION.

By *Real Money*, is underſtood an effective Specie, repreſenting in itſelf, the Value denominated thereby, as, a GUINEA,
* This Mark is prefixed to the *Imaginary Money*, which is generally made uſe of in keeping Accompts, ſignifying a fictitiou
= This Mark of Alligation and Dependence is the Sign of Equality, ſignifying *is*, *make*, or *equal to*.
☞ This Mark is ſet under each Line, to lead the Eye to the intrinſick Value in Sterling of each Foreign Piece ſtanding ov

Reſpectfully Dedicated to the MERCHANTS of the *BRITIS*

[To follow Page 943.]

Of the CUSTOMS; *of their Adminiſtration, and of Cuſtom-Houſe Officers.*

CUSTOMS are properly the Tribute or Toll paid by Merchants to the King, for carrying Merchandize out, or bringing it in; or in other Words *Duties*, payable to the Crown, for Goods exported and imported; and theſe are due to every Prince or State, both of common Right, and by the Law of Nations, as a Matter inherent to their Prerogatives; they being Guardians and abſolute Commanders of their Harbours and Ports, where Commodities are landed and laden: Though in *England*, the Prince's Power is more reſtrained than in arbitary and deſpotic Governments, as he can lay no Impoſition on any Sort of Merchandiſe, though never ſo ſuperfluous or unneceſſary, whether native or foreign, or upon Merchants, Strangers, or Denizens, by his abſolute Power; without Aſſent of Parliament, either in Time of War, or under the greateſt Neceſſiy or Preſſures that may be.

Cuſtoms are ſatisfied in different Manners, according to the various Uſages of the ſeveral Countries where they are levied: In ſome, they are paid in Money, and in others, in Kind; which Merchants ſhould endeavour to be acquainted with, and govern themſelves according to the Laws, Conſtitutions, and Proceedings uſed in all Kingdoms reſpectively, whereby they are ſecured and defended in their Traffick and Commerce; for by Non-obſervance thereof they expoſe themſelves to the Riſque of Mulcts, Fines, Loſs, and Forfeiture of their Goods and Ships.

The Word *Cuſtoms* comprehends *Magna & Antiqua Cuſtuma*, payable out of our own native Commodities; as for Wool, Woolfells, and Leather; and *Parva Cuſtuma*, which are Cuſtoms payable by Merchants, both Strangers and Denizens, which began in the Reign of *Edw.* I. when the Parliament granted him three Pence in the Pound, on all Merchandizes exported and imported. *Dyer* 165.

But that which is granted by Parliament, is properly called a Subſidy; and is ſometimes granted to the King for Life, of which there are ſeveral Sorts; as *Tonnage*, a Duty granted out of every Ton of Wine imported, which was firſt granted by Parliament to *Edw.* III. and *Poundage*, a Subſidy granted for all Goods exported and imported, except Wines, *&c.* and is uſually the twentieth Part of the Value of the Goods, or twelve Pence in the Pound; and this was firſt given to *Hen.* VI. for Life. 1 *Nelſ.* Abr. 583, 584.

In the Reign of *Edw.* III. the greater Charter for free Traffick was confirmed; and *Anno* 6 *Edw.* III. it was enacted, that no new *Cuſtoms* could be levied, nor ancient increaſed, but by Authority of Parliament. 2 Inſt. 60.

In the ſubſequent Reigns, ſeveral other Duties were laid on foreign Goods and Merchandize, and the abovementioned of *Tonnage* and *Poundage*, granted by 12 *Car.* II. for Life to that Prince, have been continued in the ſame Manner to his royal Succeſſors, down to his preſent Majeſty King *Geo.* III.

As theſe Duties increaſed under every Reign, more particularly, from the Commencement of the preſent Century, owing to the Neceſſity of increaſing this Branch of the Public Revenue, to provide for the Intereſt, or Annuities, annually to be iſſued and paid to the public Creditors, on Account of an increaſing National Debt, which in the preſent Day, we have ſeen augmented to an almoſt incredible Sum; and alſo to defray other Expences of Government, ſuch as the civil Liſt, *&c.* the Mode of collecting the Cuſtoms, from the Number, and Variety of Denominations of the Duties impoſed by the Legiſlature at ſundry Times, and appropriated to particular Purpoſes, became ſo intricate and perplexed that the oldeſt Merchant in *London* was unable to calculate the Sums he had to pay on the Goods and Merchandizes he either Imported or Exported. Such Alterations likewiſe, were liable to take Place every Seſſion of Parliament, that no Book of Rates,

though many were publiſhed, could ſerve as a certain or permanent Guide. Neither could the Merchant go to the Cuſtom-Houſe and enter his Goods immediately, by paying down the Sum ſpecifically ſtated; but was under the Neceſſity to ſubmit to injurious Delays, until all the uſual Computations on the old Subſidy, the new Subſidy, the one third Subſidy, the *Five per Cent*, additional *Five per Cent*, &c. &c. &c. were exactly and ſeparately calculated. So that, beſides great Anxiety of Mind, the Merchant was obliged to ſacrifice a great Deal of his own Time, or of that of his Clerks, and was put to much Trouble and Expence. This public Grievance called aloud for Redreſs: our beſt commercial Writers, and all ſenſible Foreigners repeatedly complained of the mal-Adminiſtration of the *Britiſh* Cuſtoms; but in vain, no Miniſter liſtened to their friendly Admonitions; though a conſiderable Increaſe of Revenue was pointed out as the certain national Advantage to be derived from a Reform. At Length, a great Commercial Revolution, a Treaty of Commerce with FRANCE, forced upon the *Britiſh* Miniſtry, a Meaſure which had been unaccountably delayed; though it had been partly arranged, and was intended to be brought forward, towards the Cloſe of Lord *North's* Adminiſtration. Under the former Mode of regulating the Cuſtoms it was totally impoſſible for the Original Author of LEX MERCATORIA or the Editor of the laſt Edition, to inſert any Table of Duties, compoſed with ſuch Accuracy that Merchants might rely upon the Calculations in their reſpective Commercial Concerns: at preſent, that Difficulty being removed by the Conſolidating Act of 1787, great Pains have been taken to examine and compare the Books of Rates, ſince publiſhed; and after expunging a great Number of uſeleſs Repetitions, to exhibit as conciſe a View as the Nature of the Subject would admit, of the Duties on *Importation* and *Exportation*; of the *Drawbacks*, Bounties and other Allowances, as they are eſtabliſhed by the ſaid Act; and which cannot well undergo any conſiderable Alterations during the exiſting Treaty with *France*, the Term of which will not expire until the Year 1798.

The Merchant, by referring to any one or more Articles in the following correct Tables, will know for a Certainty what Sums of Money are required for clearing them at the Cuſtom-Houſe; and will be enabled to provide accordingly. This muſt be acknowledged on the Face of it, to be no ſmall Advantage, and in Addition to this, they will give him a more general Knowledge of the Commerce of *Great-Britain*.

An ALPHABETICAL LIST *or* TABLE, *of the ſundry* GOODS, WARES, *and* MERCHANDIZE, IMPORTED *into, and* EXPORTED *from* GREAT BRITAIN; *with the* NET DUTIES *payable thereon at the* CUSTOM-HOUSE, LONDON, *&c. Extracted from the* SCHEDULES *annexed to the* Conſolidating Act *of* 1787.

Ditto, from *June* 24, 1793, to *June* 24, 1800, per ton -	4	0	0
Raw Silk, of the Growth of the *Britiſh* Colonies in *America*, imported directly from thence into the port of *London*, under the regulations required by law, for every 100*l.* value, from *Januaay* 1, 1784, to *January* 1, 1791 - -	15	0	0
See 9 *Geo.* III. cap. 38.			
Tobacco, damaged, for every pound weight cut off -	0	0	$0\frac{1}{2}$
See 9 *Geo.* I. cap. 21.			
Wines, damaged or corrupt, or unmerchantable, if the Importer ſhall refuſe to pay the duties thereon, the Commiſſioners of the cuſtoms may cauſe ſuch wines to be received into the cuſtody of the proper officers, and to be publickly ſold, in order to be diſtilled into Brandy, or made into Vinegar; the produce of ſuch ſale to be paid to the importer, but not to exceed the following Allowances:			
Of the Growth of *Germany*, or which pay duty as ſuch, the ton	4	0	0
—— of *France* -	4	0	0
—— of *Spain*, *Portugal*, or elſewhere -	8	0	0
But no Allowances to be made for any Wines, unleſs imported in caſks on board a merchant's Ship, directly from the place of the Growth, or the uſual place of ſhipping, except as to ſhips ſtranded.			

THE Merchant being thus enabled to aſcertain and prepare the Sum requiſite for the Acquittal of the Duties, his next Care muſt be to appoint a proper Perſon to report the Ship's Arrival, and to make the Entries in the Long Room up-ſtairs at the Cuſtom-houſe; and the Manner of tranſacting this Buſineſs follows here in order.

Form of ENTRIES inwards.

WHEN a Ship arrives, on which a Merchant has any Goods, it is uſual for him to apply to ſome Clerk in the Long Room at the Cuſtom-houſe to make the Entry, who computes the Duties, and directs him where to pay them in, for which his Charge is very ſmall; however, if one has a Mind to avoid it, he muſt draw out a *Bill of Entry* in the following Manner, *viz.*

London, October the 25th, 1791.

In the *Union*, *Thomas Richardſon* a *Alicant*.

		S. T.
S. T. No. 1 *a* 10, Ten Bales of Almonds,	containing 60 *Cwt.* 2*q.*	34 4 4-20
per Cwt. £ 103 : 1		

of which the Merchant muſt make ſeven, the one written in Words at length which is to paſs, and called a Warrant; and in the others, the Contents may be expreſſed in Figures, which are all delivered to the proper Clerks in the Long Room, who attend for that Purpoſe, from Ten in the Morning till two in the Afternoon; and having paid the Cuſtoms into the Treaſury, a Receipt is given for them, and Officers appointed ſo ſoon as others concerned in the Cargo have taken the ſame Steps.

But previous to this Entry, the Ship muſt be reported, the Method of performing which I ſhall add for the Sake of thoſe who may be as well Owners as Merchants.

On the Ship's Arrival in the River, the general Practice is to nominate a Perſon to act as a Ship's Huſband, except an Owner has a Mind to perform this Part himſelf, who muſt take an exact Account of her Lading from the Captain's Manifeſt, and report the ſame at the Cuſtom-houſe; which he does by making two Copies, the one on a blank Sheet of Paper, and the other on a Paper with the Oath to be taken by the Maſter of the Ship, printed on it, given by the Uſher of the Cuſtom-houſe, who generally attends at the upper End of the Long Room, to adminiſter Oaths, *&c.* And the Report is to be made in the ſubſequent Form, *viz.*

To report a Ship.

After exactly copying the Manifeſt on the two Sheets of Paper, as beforementioned, you muſt go to the Comptroller, or to the Deputy Comptroller, in the Long Room of the Cuſtom-houſe, accompanied by the Maſter, and read the two Manifeſts over with him, of which he retains that written on the plain Sheet; and the other with the printed Oath, you muſt return to the Uſher from whom you received it, who, after examining the Maſter concerning the Ship, and this latter has ſworn to the Manifeſt, the Uſher directs you how, and to whom you muſt pay for entering the Ship, and your next Buſineſs is to ſee, whether thoſe principally concerned in her Cargo have made their Entries, that if they have not, you may apply for their doing it, in Order to ſet the Ship to work, and begin her Diſcharge

Omiſſions in a Report.

When upon the Delivery of any Ship, it appears that any Part of the Cargo has been omitted in the Maſter's Report, and he applies to the Collector to amend the ſame; though the Officers have not any Reaſon to believe, but that ſuch Omiſſion was through Inadvertency, and without any Deſign of Fraud, yet the ſame ſhall not be permitted as the Law ſtands; but the Honourable the Commiſſioners

ſioners are to be acquainted with a true State of the Caſe, and if they are ſatiſfied, and are pleaſed to give Leave, then the Goods ſo omitted, may be added to the Report, after the following Manner:

Third Day of *March*, 1791—Added by the Commiſſioner's Leave of the 8th ultimo.

D. S.—4—1 Caſe—Linen—*David Smith.*

A. B. Maſter.

And then the Report is ſworn to *de novo*, inſerting the particular Days underneath that, when ſwore to before.

Directions how to proceed after the Report is made.

The Perſon directed by the Owners to take an Account of every Merchant's Goods as they are delivered, called the Ship's Huſband, having got the Land-waiter's Name, who is appointed for the Ship, he applies to him for Information of what Merchants have made their Entries, and for a Copy of his Warrant, which he ſigns, and ſends aboard the Ship to the Officers there, that they may commence their Work, which they ſoon after do, and ſend a Hoy or Lighter to the Quays.

And againſt the Lighter's Arrival, the Ship's Huſband has prepared a Book, ruled in the ſame Manner as the Waiter's; on one Side of which he places the Number or Quantity of Goods he judges the Lighter may contain, as in the Margin, and oppoſite thereto, he ſets down the Marks and Numbers of each Parcel as they are landed; and as ſoon as the Lighter is delivered, he takes a View, or gets the Surveyor to give him an Account of the Damage, if any, upon the Goods.

1	A B No.	4

3	E F	5
4	G H	9
5		
6		
7		
8		

When the Goods are weighed or meaſured, and the Merchant has got an Account thereof, and finds his Entry already made too ſmall, he muſt make a Poſt-Entry for the Surpluſage in the ſame Manner as the firſt was done.

And as a Merchant is always in Time to make his Poſt, he ſhould take Care not to over-enter, to avoid as well the Advance as the Trouble in getting the Overplus back; however, if this is the Caſe, and an Over-Entry has been made, and more paid or bonded for Cuſtoms than the Goods really landed amount to, the Land-waiter and Surveyor muſt ſignify the ſame, upon Oath made, and ſubſcribed by the Perſon ſo over-entered, that he, or any other Perſon to his Knowledge, had not any of the ſaid Goods over-entered on board the ſaid Ship, or any where landed the ſame without Payment of Cuſtom; which Oath muſt be atteſted by the Collector and Comptroller, or their Deputies, who then compute the Duties, and ſet down on the Back of the Certificate, firſt in Words at Length, and then in Figures, the Sums to be paid; which Certificate and Endorſement are as follows:

The CERTIFICATE.

Theſe are to certify, that *J. F.* did pay his Majeſty's Duties inward in the *Dolphin*, *Thomas Wheeler*, Maſter, from the *Sound*, the 9th Day of *May*, 1791, for 124 Ton of Iron, 35 hundred and a half of Copper in Plates, and 800 hundred Clap-Boards; and we the Officers underwritten did examine the ſame at the Delivery thereof out of the ſaid Ship, and found no more than 118 Tons of Iron; 33 hundred Weight of Copper, and 763 hundred Clap-Boards: And for further Manifeſtation of the Truth hereof he made Oath, that neither he, nor any other Perſon, to his Uſe or Knowledge, had any of thoſe Goods over-entered on board the ſaid Ship, or in any Place landed them without paying Cuſtoms. Dated at the *Cuſtom-houſe*, *London*, the 14th Day of *May*, 1791.

W. B. Surveyor.
H. S. Landwaiter.

Jurat. J. F. that the Contents of the above-mentioned Certificate are true.

J. F.

As the Difference is very great between the Duties paid by Britiſh Subjects, and thoſe paid by Aliens, it is neceſſary in this place to obſerve, with Reſpect to the making and ſubſcribing of Merchants' Entries at the *Cuſtom-houſe*, that any Britiſh Man may cuſtom, in his own Name, the Goods of another Britiſh Man; ſo may one Merchant Stragner enter the Goods of another Merchant Stranger: but he that ſo enters the Goods of another Perſon, whereby the King loſes his Duty, forfeits the Goods to the King, *&c.* and likewiſe all his own Goods and Chattels for ever. 1 *Eliz.* Cap. 11. S. 6.

Bills of Sight.

When Goods come conſigned to any Merchant, and he has not received any Invoice, Bill of Lading, or other Advice, from his Correſpondent, or happens by any other Cauſe to be ignorant of the real Quantities and Qualities of the ſaid Goods, ſo that he is not capable of making a perfect Entry of the ſame, he muſt acquaint the Collector and Comptroller thereof, and deſire a Bill of Sight, or View, in Order to have them brought on Shore and examined; who, upon the Merchant's making Oath to the Truth of his Allegiations, and depoſiting ſuch a Sum of Money in the Collector's Hands, as may be conjectured to be ſufficient to anſwer the Duties, will grant ſuch Bill. The Form thereof, and the whole Method of Execution muſt be as follows:

January 23, 1791.

In the *Britain* of *London*, *Jonathan Dael* Maſter, from *Oſtend*.

Edward Hague.

Sight
A. F.
N°. 1 to 5. { 2 Caſes, 1 Bale, 2 Packets } of Merchandiſe, Quantity and Quality unknown.

Andrew Fountain maketh Oath, that neither he, nor any other Perſon for his Uſe, has received any Invoice, Bill of Lading, or other Advice, or doth know the Contents of any of the Goods above mentioned, ſo as to be capable of making a true and perfect Entry thereof, without having them firſt examined by the Officers of the Cuſtoms.

Jurat. 23 *die Januarii*, 1791. Signed *Edward Hague*.

Sufficient Money being depoſited to ſecure the Duties, you may permit the Goods above mentioned to be landed under your Care, and to be brought to his Majeſty's Warehouſe, to be there viewed, examined, *&c.* by the Surveyor and the Land-Waiters, who are to endorſe the particular Quantities and Qualities on the Back hereof, and return the ſame to us immediately, that a perfect Entry may be made: but the Goods are not to be delivered till ſuch perfect Entry be made, and his Majeſty's full Duties be paid.

Depoſited one hundred Pounds.

R. M. Collector, *T. W.* Cuſtomer, *I. L.* Comptroller.

To { *E. B.* Surveyor. *W. A.* Tide-Surveyor. *C. R.*, *M. P.* } Land-Waiters.

Time allowed to export by Certificate.

The Merchants are allowed, for their ſhipping off Tobacco, Sugar, Ginger, Pepper, Bugles *alias* Beads, Caſt and Bar Iron, dying Wood, all dying Wares and Drugs, eighteen Months to *Britiſh*, and fifteen Months to *Aliens*, to have their Drawback; and all other Goods, twelve Months to *Britiſh*, and nine Months to *Aliens*. 2, 3 and 9 *Ann.*

Amber Beads. rough Amber, Coral Beads, and poliſhed Coral, and all Cowries, may draw the Impoſt 16$\frac{2}{3}$ exported in three Years. 4 and 5 *W.* and *M.*

No Duties or Cuſtoms are to be taken for Prize Goods, conſiſting of any Military or Ship Stores.

Wines which, at the Time of landing, ſhall be damaged, corrupt, or unmerchantable, and which ſhall be given up to the Officers of the Cuſtoms, to be publickly ſold, in Order to be diſtilled into Brandy, or to be made into Vinegar, in Manner directed by the Act of 12 *Geo.* I. *for the Improvement of his Majeſty's Revenues of Cuſtoms, Exciſe, aud Inland Duties*, are not chargeable with the Duty of 3*l.* per Ton.

Almoſt all Goods and Merchandize imported, pay Duties, and are to be delivered either by *Tale*, *Weight*, *Meaſure*, or *Gauge*.

Thoſe which pay Duty by *Tale*, are, at the Delivery, to be tallied at one, ten, twenty, *&c.* according to the Nature of them; and as the Merchant cannot, generally, have any Pretence for a ſhort Entry in Goods by *Tale*, therefore it is ſuppoſed that, in Strictneſs, no Poſt-Entry ſhould be admitted of.

Goods paying Duties by *Weight*, are to be brought to the King's Beam, and weighed, in Order to adjuſt the true Quantity for which his Majeſty's Duties ought to be paid; for, in Conſideration of the different Proportion which foreign Weights bear to the *Britiſh*, the Waſte, *&c.* which may happen during the Voyage, and the Draughts and Tares to be allowed on the Landing, it cannot be expected that a perfect Entry can be made at firſt; but to enable the Merchant to make the neareſt Eſtimate of the true nett Weight to be entered, he will be furniſhed in the Progreſs of this Work with a Table of the Proportion which all foreign Weights bear with our's, and alſo with the particular Draughts, Tares, *&c.* on all Goods imported; abſtracted from Mr. *Crouch's* Account of them.

At landing the Goods, the Weigher is to call out the full and true groſs Weights in the Scale, which, the Landwaiters, and Ship's Huſband, are to enter in their Books, and ſhould check with one another every Day, and from the Total of the ſaid Groſs Weight is to be deducted an Allowance in Conſideration of

DRAUGHT, according to the following reſpective Weights, *viz.*

On all Goods imported, weighing under 1 *Cwt.*			1 *lb.* Dra.
From 1 to 2			2
2 to 3			3
3 to 10			4
10 to 18			7
18 to 30		or upwards	9

9 *Geo.* I. C. 21. S. 15. Except Tobacco of the *Britiſh* Plantations, which is to be allowed eight Pounds Draught only, for every Hogſhead of 350*lb.* or upwards.

Theſe Allowances for *Draughts*, the Landwaiters may, when they are very different, inſert in their Books, oppoſite to each reſpective Draught, or, when they are not very different, compute the ſame, by counting the Number of the Draughts at each ſeparate Allowance.

The Allowance for Draught being deducted, there is, in moſt Caſes, a farther Allowance to be made out of the remaining Weight, called

TARE, being a Conſideration for the outſide Package that contains ſuch Goods which cannot be unpacked without Detriment: or for the Papers, Threads, Bands, *&c.* that incloſe or bind any Goods which are imported looſe; or, though imported in Caſks, Cheſts, *&c.* yet can be unpacked and weighed nett.

Several Sorts of Goods have their *Tares* aſcertained, and thoſe Tares are not to be altered or deviated from, in any Caſe within the Port of *London*, unleſs the Merchant, or the Officers of the Crown, thinking themſelves prejudiced by ſuch *Tares*, ſhall deſire that the Goods may be unpacked, and the nett Weight taken; which may be done either by weighing the Goods in each reſpective Caſk, *&c.* nett, or, as is practiſed in the *Eaſt-India* Goods particularly by picking out ſeveral Caſks, *&c.* of each Size, and making an Average, and ſo computing

computing the reſt accoordingly. But this muſt not be done without the Conſent of two Land-Surveyors, atteſted by their Hands in the Landwaiter's Books; and in the Out-Ports, not without the Conſent of the Collector and Surveyor: And as to thoſe Goods which have not their *Tares* aſcertained, two Land-Surveyors in *London*, and the Collector and Surveyor in the Out-Ports, are to adjuſt and allow the ſame in the like Manner.

Sometimes the Caſks, *&c.* are weighed beyond Sea before the Goods are put in, and the Weight of each reſpective Caſk, *&c.* marked thereon, as is uſual for moſt Goods imported from the *Britiſh* Plantations, or elſe inſerted in the Merchant's Invoice; in which Caſe, if the real Invoice be produced, and the Officers have ſatisfied themſelves, by unpacking and weighing ſome of them, that thoſe Weights are juſt and true, they do then, after having reduced them to *Britiſh* Weight, if not ſo before, eſteem them to be the real *Tares*, and paſs them accordingly; though ſometimes the *Tares* on the Caſk, *&c.* are wholly diſregarded, and the real *Tares* taken.

But the unpacking Goods, and taking the nett Weight, being ſuppoſed the juſteſt Method, both for the Crown and Merchant, it is uſually practiſed in the Port of *London*, in all Caſes where it can be done with Conveniency, and without Detriment to the Goods.

Goods, delivered by *Meaſure*, are under three different Rtgulations:

1. Such as Linens particularly; which are meaſured by running Meaſure, being no more than taking the Length of the Piece from one End to the other.

And as in the *Holland*, *Flanders*, and ſome Sorts of *German* Linens, the Contents in *Britiſh* Ells are often annexed to, or marked on each Piece, and likewiſe inſerted in the Merchant's Invoice; therefore there will not be any Difficulty in making a perfect Entry: So that no Poſt-Entry will be admitted in this Caſe.

And for ſuch Linens as are contented in foreign Meaſures, the Table, which will hereafter be inſerted, proportioning them to the *Engliſh*, will enable the Merchant readily to find their Contents in *Britiſh* Yards or Ells, according as the Nature of the Entry ſhall require.

But thoſe *German*, or Eaſt-Country Linens, which are not contented, by reaſon the ſeveral Pieces of each reſpective Sort are generally about the ſame certain Lengths, may be entered, by computing the whole Quantity at ſuch uſual Lengths, and delivered by the Officers, by meaſuring ſome of the Pieces, and computing the reſt accordingly.

2. Such as Pictures, Grave and Paving Stones, and Marble Tables particularly, which are meaſured by ſquare and ſuperficial Feet.

Such as Marble Blocks, and Timber particularly, which are meaſured by ſolid or cubical Meaſure.

Goods delivered by *Gauge*, are Wines, *&c.* and all exciſeable Liqnors, whoſe Quantity to be entered may be pretty nearly determined by conſidering the Size of the Caſks, and what accidental Leakage, or other Diminution, may have happened during the Voyage.

Before any Goods are delivered by Virtue of any Warrant, the ſame muſt be copied into the Landwaiter's Books, as a Foundation for the Delivery, diſtinguiſhing the Date and Number of the Entry, the Merchant's Name, the total Duties paid, the particular Packages, with the Marks, Numbers and Quantities of the Goods, for which the Duties have been paid.

And at the Delivery of the Goods, underneath the ſaid Copy of the Warrant, muſt be inſerted the particular Manner of the Delivery, as the Tale, Weight, Meaſure or Gauge, with the reſpective Allowances, for Draught and Tare, where the ſame are to be allowed, from the Total; wherefrom the Quantity firſt entered being deducted, the Remainder is the Quantity, for which a Poſt or additional Entry is to be made; and when the ſame is made, the Date and Number of ſuch Entry muſt be inſerted, oppoſite to the ſaid ſhort Entry, as will be illuſtrated by three or four Examples annexed.

In

In making Entries it is uſual for Merchants to include all the Goods they have on board the ſame Ship in one, though ſometimes they may happen to be of twenty ſeveral Denominations, or more; and as it is enacted by 12 *Car.* II. *Cap.* 4. *Sect.* 4. to which ſubſequent Acts have had Reference, That if any Goods, or Merchandize, be brought from Parts beyond the Seas into this Realm, by way of Merchandize, and unſhipped to be laid on Land, Cuſtoms, and other Duties thereof, not paid, or tendered to the Collector, *&c.* nor agreed with for the ſame in the Cuſtomhouſe, then the ſaid Goods and Merchandizes ſhall be forfeited; therefore there was ſome Years ago a Reſolution of the Court of Exchequer, that, to admit of Poſt or additional Entries, where Goods are ſhort entered, the Goods ſo ſhort entered being laid on Land before Payment of Duty, is a Matter of Favour and Indulgence, to prevent ſuch Goods from Forfeiture; and though, in Goods delivered by Weight and Gauge, it is almoſt impoſſible to make a perfect Entry before Landing, yet in Goods delivered by Tale and Meaſure there cannot be any Excuſe or Pretence for a ſhort Entry, and therefore, as has been before remarked, it ought not to be allowed,

Examples of the Examination and Delivery of Foreign Goods imported.

Note, It is ſometimes imported in ſingle, and ſometimes in treble Serons of about the ſame Weight.

Of Landing and Lading.

The Merchants of *London* are allowed to unlade their Goods at any of the lawful Keys and Places for landing Goods, between the *Tower of London* and *London-Bridge*, between the Sun-riſing and Sun-ſetting, from the 10th of *September* to the 10th of *March*, and between the Hours of *ſix* of the Clock in the Morning and *ſix* in the Evening, from the 10th of *March* to the 10th of *September*, giving Notice to the proper Officers appointed to attend the lading and unlading Goods; and ſuch Officers as ſhall refuſe, upon due Calling, to be preſent, ſhall forfeit for every Default 5*l*.

It may be lawful for any Perſon to ſhip or lade into any Ship or Veſſel, on the River of *Thames*, bound over Seas, Horſes, Coals, Beer, ordinary Stones for building, Fiſh taken by any of his Majeſty's Subjects, Corn, or Grain, the Duties being paid, and Cockets, and other lawful Warrants, duly paſſed for the ſame.

So likewiſe Deal Boards, Balks, and all Sorts of Maſts, and great Timber, may be unſhipped, and laid on Land, at any Place between *Limehouſe* and *Weſtminſter*, the Owners firſt paying or compounding for the Cuſtoms, and declaring at what Place they will land them before they unſhip them; and upon Licence had, and in the Preſence of an Officer, they may unlade them; otherwiſe they incur a Forfeiture.

Form of Sufferances for landing Goods at an unlawful Key.

Though foreign Goods and Merchandizes have been entered, and his Majeſty's Duties duly paid, and a Warrant be thereupon granted for the Delivery thereof; yet, if the Merchant, for his Conveniency, is deſirous to land them

at any other Place than the lawful Keys appointed by his Majeſty's Commiſſion out of the Court of Exchequer, a ſpecial Sufferance muſt be granted for that Purpoſe, after the following Manner:

In the Aldolphus of *Stockholm*, *Hans Carvel*, from *Sweden*.
Edmund Boehm.

Three thouſand five hundred Bars, containing ſixty Tons of *Swediſh* Iron, two hundred and fifty Barrels, containing twenty Laſts of Tar. A Warrant having been paſt by us for Delivery of the above mentioned Goods, and the Importer having ſignified to us, the Inconveniency that would attend the bringing the ſame to the lawful Key, we have granted this ſpecial Sufferance for landing the ſame at——

You are therefore to permit the ſame to be unladen into Lighters, and afterwards landed at the ſaid Place, in like Manner, and with like Care, Examination, and Inſpection, as is uſual at the lawful Key: For which this ſhall be your Voucher.

Dated at the Cuſtom-houſe, *London*,
the 20th of *May*, 1791.
A. B. Collector, *B. C.* Cuſtomer, *C. D. Comptroller*.

To { *D. E.* Surveyor, / *E. F.* / *F. G.* } Landwaiters.

Every Merchant making an Entry of Goods, either inwards or outwards, ſhall be diſpatched in ſuch Order as he cometh; and if any Officer or his Clerk ſhall, either for Favour or Reward, put any Merchant or his Clerk, duly attending and making his Entries as aforeſaid, by his Turn, to draw any other Reward or Gratuity from him than is limited in the Act of *Tonnage* and *Poundage*, and the general Books of Value, if the Maſter Officer be found faulty herein, he ſhall, upon Complaint to the chief Officers of the Cuſtom-houſe, be ſtrictly admoniſhed of his Duty; but if the Clerk be found faulty therein, he ſhall, upon Complaint to the ſaid chief Officers, be preſently diſcharged from his Service, and not permitted to ſit any more in the Cuſtom-houſe.

Every Merchant ſhall have Liberty to break Bulk in any Port, and to pay Cuſtom for no more than he ſhall enter and land, provided that the Maſter of ſuch Ship, make Declaration upon Oath, before two principal Officers of the Port, of the Content of his Lading; and ſhall declare upon Oath, before the Cuſtomer, Collector, Comptroller, or Surveyor, or two of them, at the next Port where his Ship ſhall arrive, the Quantity and Quality of the Goods landed at the other Port, and to whom they did belong.

The Officers who ſit above in the Cuſtom-houſe of *London*, ſhall attend their ſeveral Places from nine to twelve in the Forenoon, and one Officer or Clerk ſhall attend with the Book in the Afternoon, during ſuch Time as the Officers are appointed to wait at the Water-ſide: All other the Officers of the Out-Ports ſhall attend every Day in the Cuſtom-houſe between the Hours of nine and twelve in the Morning, and two and four in the Afternoon.

The Officers of *Graveſend*, having Power to viſit any Ship outward bound, ſhall not without juſt Cauſe detain her, under Colour of ſearching, above three Tides, under Pain of Loſs of their Office, and rendering Damage to the Merchant and Owner of the Ship. And the Officer in any of the Out-Ports ſhall not without juſt Cauſe detain any ſuch Ship above one Tide, after the Ship is fully laden and ready to ſail, under Pain of Loſs of Office, and rendering Damage.

Of Entries Outwards.

When the Goods you intend to export are made up in the Packages you think proper, whether in Bales, Bags, Boxes, Caſes, or in any other Manner, you muſt carry the true Contents to the Cuſtom-houſe, by a Bill of Entry like the following one, *viz.*

In the Mary, Joſeph Thomas, *for Liſbon*.

T. S.

T. S. Two Caſes of Hats, *viz.*
N°. 1 qt. 90 Doxen.
2 — 18

Caſes 2 — 108 Dozen.

T. S. Two Trunks of Stockings.
N°. 1 qt. 82 Dozen.
2 — 32

Trunks 2 — 114 Dozen.

Of theſe Bills you muſt write ſeven, and act with them as directed for the Bills inwards; and on having ſatisfied the Cuſtoms, you will have a ſmall Piece of Parchment called a Cocket, which teſtifies your Payment thereof and all Duties for ſuch Goods; and having marked and numbered your Goods, you endorſe the ſame on the back of the Cocket, and of your ſhipping Bill, mentioning the true Contents of each Bale, *&c.* This Cocket and ſhipping Bill you muſt give to the Searcher with his Fee; and after paying the Wharfage and Porterage of your Goods, you may ſhip them off; and take Care that you remind the Perſon who carries them on board, to bring you the Mate's Receipt for them, which you deliver to the Captain when he ſigns your Bills of Lading.

The Form of a COCKET.

KNOW ye, that *T. S. Ind.* for 108 Dozen of Hats, and 114 Dozen of Stockings, in the *Mary*, *Joſeph Thomas* Maſter, for *Liſbon*, paid all Duties. Dated *Auguſt* 30, 1791.

Ind. or *Indigenus*, ſignifies natural-born.

On the Back of the Cocket write the Marks, Numbers, and alſo the Quantity of the Goods contained in the Cocket: Thus,

N°.	1	1 Caſe qt. 90 Dozen of Hats.
	2	1 Caſe qt. 18 Dozen of Hats.
T. S.	1	1 Trunk qt. 82 Dozen of Hoſe.
	2	1 Trunk qt. 32 Dozen of Hoſe.

If ſeveral Sorts of Goods are exported at once, of which ſome are free, and others pay Cuſtoms, the Exporter muſt have two Cockets, and therefore muſt make two Entries, one for the Goods that pay, and the other for thoſe that do not pay Cuſtom.

But to export Goods by Certificate, which muſt be foreign Goods formerly imported, and on which a Part of the Cuſtoms paid on Importation is drawn back, provided they are exported in the Time limited by Act of Parliament, it is not ſufficient only to mention the Marks, Numbers, and Contents, as commonly practiſed in the Entries outwards, but alſo the Name of the Ship in which the Goods were imported, the Importer's Name, and Time of Entry inwards; andmake Oath, that the Entries for thoſe Goods were paid, or ſecured to be paid, as the Law directs. After you have made an Entry in this Manner, you are to carry it to the Collector and Comptroller, or their Deputies, who, after examining their Books, will grant a Warrant, a Specimen of which is here annexed, which muſt be given to the Surveyor, Searcher, and Landwaiter, for them to certify the Quantity of Goods; after which the Certificate muſt be brought back to the Collector and Comptroller, or their Deputies, and Oath made, that the ſaid Goods are really ſhipped, and not landed again in any Part of *Great-Britain*.

Britain. This done, they ſet down, in Words at length, on the Back of the Debenture, and then in Figures on the ſame Side, the Sum of the Duties, and ſubſcribe jointly to the Whole. By Virtue of this Debentute, the Exporter may, in one Month after the Ship's Departure from *Great-Britain*, demand his Drawback; and if the Collector has not Money in his Hands to pay the Debenture, he is to certify the ſame on the Back of the Debenture, that the Exporter may have Recourſe to the Commiſſioners, who are then to pay him. Suppoſe that *H. V.* Merchant of *London*, exports 23 Dozen of Napkins, Holland's making, and 232 Ells of Holland, which he imported before from *Amſterdam*; he makes his Entry in the following Manner, *viz.*

London, May 7, 1791.
In the Goodfellow, Samuel Johnſon, *for* Barbadoes.
H. V.

H. V. One Box, containing twenty-three Dozen of Napkins, Holland's making, and one Bundle, containing two hundred thirty-two Ells of Holland, imported the 20th of *April* laſt, in the *Dragon*, of *London*, *Samuel King*, Maſter, from *Amſterdam*; the Cuſtoms Inward being paid by the ſaid *H. V.* the 20th of *April* laſt. *H. V.*

The Collector and Comptroller, or their Deputies, give a Warrant of the ſame Tenor, ſigned by them, and directed to the Surveyor and Landwaiter; after which you have a Cocket in the following Manner:

London,

KNOW ye, that H. V. *Merchant, for twenty-three Dozen Napkins, Holland's making, and two hundred thirty-two Ells of Holland, paid all the Duties inwards the* 20th *of* April *laſt, out of the* Dragon *of* London, Samuel King *Maſter, from* Amſterdam, *late unladen, and now in the* Goodfellow, *of* London, Samuel Johnſon *Maſter, for* Barbadoes. *Dated tho* 7th *of* May, 1791.

A. R. Collector.
C. D. Comptroller.

And on the Back of the Cocket is endorſed as follows; The Contents of the Goods ſhipped, two-hundred thirty-two Ells of *Holland*, twenty-three Dozen Napkins, Holland's making.

E. V. Surveyor.
A. L. Searcher.

The DEBENTURE *runs in the ſubſequent Form.*

H.V. Ind. did enter with us, the 20th of *April* laſt, in the *Dragon*, of *London*, *Samuel King* Maſter, from *Amſterdam*, tweney-three Dozen Napkins, Holland's making, and two hundred thirty-two Ells of Holland; the Cuſtoms being paid inwards, by *H. V.* Merchant, the 20th of *April*, 1791, as doth appear by the Certificate of the Collector inwards; and for further Manifeſtation of his juſt Dealing herein, he hath alſo taken Oath before us for the ſame. *Cuſtom-houſe*, *London*, the Day and Year above written.

A. R. Collector.
C. D. Comptroller.

Jurat. H. V. that the two hundred thirty-two Ells, and twenty three Dozen Napkins above mentioned in this Certificate, were really ſhipped, and have not been ſince landed, nor are intended to be relanded, in any Port, or Creek in *Great-Britain*. The 7th of *May*, 1791.

A. R. Collector. *H. V.*
C. D. Comptroller.

The twenty three Dozen Napkins, and two hundred thirty-two Ells of Holland, were ſhipped off at *Dice-Key*, *May* 7th, 1791.

E. V. Surveyor.
A. L. Searcher.
I. K. Landwaiter.

When the money is received on this Debenture, a Receipt may be given in the following Form, *viz.*

RECEIVED, June *the* 12*th,* 1791, *of the Honourable Commiſſioners of his Majeſty's Cuſtoms, by the Hands of* A. R. *Collector, the Sum of eleven Pounds, and three Pence, for the above Debenture.* *Per* H. V.

Of Goods, re-imported or returned.

FOREIGN.

WHEN foreign Goods, which have been regularly imported, have been afterwards exported, and are, for Want of Sale, or the great Scarcity of ſuch Goods, *&c.* deſired to be returned, or to be again imported into any Port of *Great-Britain,* notwithſtanding there is not any Law for ſuch Re-importation, yet, upon Payment of the like Duties that were due upon the firſt Importation though perhaps the Goods were exported out of Time, and conſequently were not intitled to any Drawback, it is the Practice to indulge the Merchant in ſuch Re-importation, although ſuch Goods may be prohibited to be originally imported from the Place from which the Ship now returns, upon Performance of the following Requiſites; The firſt whereof is, to ſignify to the Searcher, *&c.* the Time when, and the Ship in which they were exported; who thereupon will have Recourſe to their Books, and in Caſe they find that ſuch Entry outwards was duly made, will grant a Certificate, or Duplicate thereof, as follows:

In the *James* of *Liverpool, John Williams,* for *Peterſburgh,*
Edward Ellis.

One thouſand Pounds of *Virginia* Tobacco, the Duties inwards whereof were paid, and the other Duties ſecured by *George Jones,* the tenth Day of *Auguſt,* 1790. Dated the fourth of *April,* 1791.

The Goods above mentioned were regularly ſhipped off, but five hnndred Pounds of the ſaid Tobacco *, for which a Debenture hath paſſed, being Part of the above Entry, are now returned in the † *Sea-Horſe, Jacob Peters* Maſter, from *Peterſburgh,* as the Merchant is ready to make Oath. Dated at the Cuſtom-houſe, *London,* the 20th of *Auguſt,* 1791.

R. W. Searcher.
L. M. Landwaiter.

If the Goods were entered outwards at any other Port, this Certificate muſt be granted by the Officers of that Port; But if the Cocket whereby they were ſhipped be produced, I apprehend that will fully ſerve the ſame Purpoſe. And on the Back of the aforeſaid Certificate, Proof muſt be made, by the Oath of the Merchant, that the Goods then returned are the ſame therein mentioned. The Form of which Proof muſt be as follows:

20th of *Auguſt,* 1791. No. 4.

In the *Sea-Horſe, Jacob Peters* Maſter, from *Peterſburgh.*

Returned
L. M. No. 1 *a* 50 } Fifty Boxes, containing five hundred Pounds Weight of *Virginia* Tobacco.

Edward Ellis maketh Oath, that the Tobacco above-mentioned is now returned as Part of the Entry outwards within mentioned, which was formerly exported from hence, and not ſold, nor the Property changed beyond Sea; but he verily believes it to be the ſame Tobacco which was exported as aforeſaid, and no other.

(Signed) *Edward Ellis.*

Jurat 20 *Die Auguſtus,* 1791,
Coram me R. B. Collector.

* To be omitted, if exported out of Time.
† Or the ſame Ship and Maſter.

Thereupon an Entry muſt be made, as for other Goods imported, and the Duties paid, or ſecured, being inſerted underneath the Merchant's Oath; the Collector, Cuſtomer, and Comptroller, are to ſubſcribe their Names thereto, and direct it to the Surveyor and proper Landwaiter, as a warrant for their Delivery of the Goods.

British Goods Returned.

When Goods of the Product or Manufacture of *Great Britain*, which have been exported to foreign Parts, are, for Want of Sale, or any other Occaſion, deſired to be returned into any Port of *Great-Britain*, a Bill of Store may be granted for the landing and delivering the ſame: As a Foundation for which, the Searcher, *&c.* muſt be applied to, for a Certificate, or Duplicate of the Entry outwards, in like manner as before directed for foreign Goods.

Whereupon an Entry muſt be made in the Book inwards, as for foreign Goods imported; and the Collector, Cuſtomer, and Comptroller, having ſubſcribed their Names underneath the Merchant's Oath, the ſame is to be directed to the Surveyor and proper Landwaiter, as a Warrant for their Delivery of the Goods. But as it may ſometimes ſo happen, that the Entry outwards cannot be fixed upon, by Reaſon of the Diſtance of Time, the Loſs of Papers or Accounts, or ſeveral other Accidents: Therefore, in that Caſe, as there cannot be any Proof, the Oath of the Merchant only muſt be deemed ſufficient, and may be taken as follows:

In the *Good-Luck* of *Briſtol*, *John Darby* Maſter.

Richard White.

T. L. } Bales
No. 1, 2, 3. } Containing fifty Pieces of Woollen Cloths of *Britiſh* Manufacture.

Richard White maketh Oath, that the Cloths above-mentiond are ſent to him, this Deponent, as Part of a large Quantity formerly exported from hence, *I. G.* and that, according to the beſt of his Knowledge and Belief, they are all of the Manufacture of *Great-Britain*.

(Signed) *Richard White.*

Jurat. 25° *Die Martii*, 1701,
Coram me C. L. Collector.

An Entry muſt be made in the Books inward, and this Oath muſt be ſubſcribed and directed as a Warrant for the Delivery of Goods, in like Manner as when the particular Entry is proved.

Form of a Sufferance, *for Exporting Corn.*

In the Race-Horſe, *of* Harwich, William Tims, *for* Dublin.

I. G.

Two hundred fifteen Quarters of Wheat, to be ſhipped, but not exported till further Orders.

To the Surveyor, Searcher, and Landwaiter.

A. R. Collector.
C. D. Comptroller.

On the Back is to be endorſed, by the Surveyor and Landwaiter, the Quantity ſhipped off, *viz*,

In Bulk——215 Quarters of Wheat, *Wincheſter* Meaſure.

E. V. Surveyor.
I. K. Landwaiter.

The ENTRY *and* CERTIFICATE.

London, June 19, 1791.

In the Sea-Horſe, *of* Harwich, William Tims, *for* Dublin.

I. G.

Two hundred fifteen Quarters of Wheat, *Wincheſter* Meaſure, *Britiſh* Growth, Cuſtom free.

Theſe are to certify, that I. G. *Merchant of* London, *hath ſhipped two hundred and fifteen Quarters of Wheat, on board the abovementioned Ship for* Dublin, *and that the Price of the Wheat of the Meaſure aforeſaid, in the Port of* London, *the laſt Market-Day, did not exceed forty-four Shillings per Quarter.*

I. G

Jurat. I. G. and *P. B.* that the Contents of the abovementioned Certificate are true.

I. G.
P. B.

Note, There muſt always be one joined with the Exporter in giving Bond and making Oath for Exporting Corn.

The WARRANT.

In the Race-Horſe, *of* Harwich, William Tims, *for* Dublin.

I. G.

Two hundred fifteen Quarters of Wheat, *Wincheſter* Meaſure.

To the Surveyor and Searcher.

The DEBENTURE.

London.

THESE are to certify, I. G. *Merchant,* Ind. *did on the* 19*th Day of* June, 1791, *enter, and have ſhipped for* Dublin, *in the* Sea-Horſe, *whereof* William Tims, *Maſter, and two-thirds of the Mariners, are his Majeſty's Subjects, two hundred fifteen Quarters Wheat,* Wincheſter *Meaſure; and that the Price of the Wheat of the Meaſure aforeſaid, in the Port of* London, *laſt Market-Day, did not exceed forty-four Shillings* per *Quarter. Witneſs my Hand this* 19*th Day of* June, 1791.

I. G.

Jurat. I. G. That the Contents of the aboveſaid Certificate are true.

Concerning Sufferances of Baggage.

Paſſengers' Baggage, containing their Wearing-Apparel, *&c.* are permitted to be landed by a particular Sufferance directed to the Surveyors and Landwaiters appointed to the Ship, who, after Examination, are, on the Back thereof, to return a particular Account of each Paſſenger's Baggage to the Commiſſioners in the Port of *London,* and to the Collector in an Out-Port; who will order ſuch Part as appears to be worn, to be delivered without Entry, provided they are not made of Goods prohibited to be worn in this Kingdom; but ſuch Clothes, or ſmall Parcels, *&c.* as have not been worn, and are cuſtomable, will be ordered to be entered, and thoſe that are prohibited, to be proſecuted.

Suppoſe a Sufferance for

3 Trunks,
1 Box,
2 Portmanteaus,
} containing Wearing-Apparel, Linen, and Woollen.

The

The Examination to be endorſed on the Back of the Sufferance; thus:

27 *June*, 1791.

Examined, 3 Trunks, 1 Box, 2 Portmanteaus, containing 4 Suits of old Wearing-Apparel, 16 Shirts much worn, Papers and Books of Accounts, 20 pounds of printed *Dutch* bound Books, 1 *India* Damaſk Nightgown, 2 Pounds of Tea, 3 Pounds of Chocolate, 2 Remnants, containing 20 Ells plain *Holland's* Linen, under 1 $\frac{1}{5}$ Ell wide.

A. B. Surveyor.

C. D.
D. E. } Landwaiters.

The Bound Books and Linen to be entered; the Nightgown, Tea, and Chocolate to be proſecuted, and the reſt delivered.

F. G.
G. H.
H. I.
I. K. } Commiſſioners.

The whole Proceedings to be entered in the Landwaiter's Books, with the Date of the Order for Delivery, *&c*

And to finiſh this Subject, when the Landwaiters to each Ship have made true Enteries of the Delivery of all Goods in their Books, and perfectly adjuſted them, they are, before they deliver them to the Jerquer, or Surveyor in thoſe Parts where there is no Jerquer, to certify the ſame under their Hands, after the Entry of the laſt Article, thus:

This Ship is regularly diſcharged, and all Poſt-Enteries duly made.

A. B. Landwaiter.

The FEES, and ALLOWANCES that are *due* and *payable* to the Officers of his Majeſty's Cuſtoms in the Port of *London*, &c. are as follow.

For every Ship to the *Eaſt Indies*	10	0
For all other Ships in Foreign Parts	4	0
For every Stranger's Ship or Bottom	8	0
For every Ship having a Coaſt Cocket	0	4
For Paſſengers outwards, not being Merchants or Mariners	0	6

No Officer, belonging to any Cuſtom-houſe, ſhall receive any other Fee than ſuch as ſhall be eſtabliſhed by the Commons in Parliament; if any Officer ſhall offend contrary to this Order, he ſhall forfeit his Office, and be incapable of any Office in the Cuſtom-houſe.

All Fees appointed to be paid to the Cuſtomer, Comptroller, Surveyor, or Surveyor-General in the Port of *London*, for any Cocket outwards, ſhall be paid in one Sum to that Officer from whom the Merchant is to have his Cocket above in the Cuſtom-houſe; and after the Merchant hath paid his Cuſtom and Subſidy, and other Duties above in the Cuſtom-houſe, he is to keep his own Cocket until he ſhall ſhip out his Goods, when he is to deliver the ſame to the Searcher, with the Mark and Number of his Goods.

FINIS.

APPENDIX

APPENDIX.

No. I.

TO Laws and Regulations reſpecting the *Corn* Trade, *See* Page 41.

Since this important Article was printed off, upon the Repreſentation of the Lords of the Committee of Council, appointed for the Conſideration of all Matters relating to Trade and Foreign Plantations, a new Bill was framed for regulating the *Exportation* and Importation of Corn. It paſſed into a Law, 31 Geo. III. Cap. 30; and took place from the 15th of *November*, 1791.

By this Act, all the preceding Acts, commencing with 1 Jac. II, c. 30, are either repealed in Part, or altered and amended ſo as comprize what it has been thought proper to retain, in one Act of Parliament. It is has therefore been the Buſineſs of the Editor carefully to compare the old Regulations, with the new contained in the preſent Act; and the Reader is requeſted to refer from Page 41 to 44, for each ſeparate Regulation altered and amended by the following Clauſes in the new Act.

A Bounty of 1s. 3d. *per* Hundred Weight is granted on the Exportation of Wheat-meal; and of 1s. 6d. *per* Hundred Weight on Wheat-flower and Biſcuit made of Wheat; ſubject to the old Regulation of the Bounty-Price of Wheat.

A Bounty of 10d. *per* Hundred Weight is granted on Barley-meal, and Beer- Sect. 2.
meal, and Big-meal, ſubject to the old Regulation of the Price of Barley. The Bounty on Oatmeal is altered to 12d. *per* Hundred Weight.

Oath to be made that Biſcuit for Exportation is made of *Britiſh* Wheat; and Sect. 4.
no Bounty to be allowed for a leſs Quantity than upwards of one Hundred Weight for every Mariner or Paſſenger on board any Ship, nor for leſs than two Tons Weight in each Ship; over and above the Ship's Stores, or Allowance for each Mariner or Paſſenger for her Voyage.

Bond ſhall be given by the Exporters, and the Maſters of Ships, for the due Sect. 5.
Exportation.

Exportation *prohibited*, when Wheat is at or above 46s. the Quarter, not only Sect. 7.
of Wheat, but likewiſe of Meal, Flour, Malt, Bread, or Biſcuit, made of Wheat.

Of Rye, Peaſe, or Beans, when the Price is at or above 30s. *per* Quarter; and of Meal, Flour, Bread, or Biſcuit, made thereof.

Of Barley, Beer, and Bigg, when the Price is at or above 23s. *per* Quarter; and of Meal, Flour, Bread, or Biſcuit, made thereof.

Of Oats, when the Price is at or above 15s. *per* Quarter; and of Meal, Flour, Malt, Bread, or Biſcuit, made of Oats.

Corn, exported contrary to this Act, to be forfeited, together with the Ship, Sect. 8.
Veſſel, or Boat, wherein the ſame is laden, with all their Furniture, Apparel, Tackle, *&c.* and the Exporter ſubjected to a Penalty of 20s. for every Buſhel of Grain, Meal, *&c.* ſo exported.

The Veſſel not to be forfeited if ſatisfactory Proof be made from the Smallneſs Sect. 9.10.
of the Quantity, that any ſuch Corn, *&c.* was on Board without the Privity of the Owner or Maſter.

Corn, *&c.* begun to be ſhipped outwards, or ſuch Part thereof as ſhall be ſhipped within twenty Days from the Entry, may be exported, though the Prices ſhould, in the mean Time, riſe to the Rates at which Exportation is prohibited.

This Act not to extend to Corn, *&c.* for the Suſtenance of the Crews of Ships; nor to the Victualling of his Majeſty's Navy; nor to Beans exported to the *Britiſh* Forts and Settlements in *Africa*; nor to Corn carried Coaſtwiſe upon Sufferance; nor to the following Quantities allowed to be exported annually, *viz.*

To Gibraltar from the Port of *London* of all Kinds of Corn, Flour, *&c.* not above - - - - 2,500 Quarters.

To *Guernſey*, *Jerſey*, and *Alderney*, from *Southampton*, 9,800 Quarters.

To the *Iſle of Man* from { *Whitehaven*, - 1,000 Quarters. / *Liverpool*, - 1,000 Quarters. / *Kircudbright*, - 500 Quarters.

To *St. Helena*, *Bencoolen*, and the Company's Settlements in the *Eaſt-Indies* - from *Great-Britain* by the *Eaſt-India* Company. 1,500 Quarters.

To the *Britiſh* Forts, Caſtles, or Factories, in *Africa* - By the Committee of the *African* Company. Wheat-Flour 33 Tons. / Biſcuit - 15 Tons.

The Quantities allowed to be ſent to ſundry other Places, are enumerated in Tables too long to be inſerted here; and being likewiſe ſubject to the proviſional Orders of the Lords of his Majeſty's Privy Council, appointed for the Conſideration of all Matters relating to Trade and Foreign Plantations, the Merchants and others concerned in the Exportation to the *Weſt-India* Iſlands, *&c.* muſt be governed by Circumſtances; the ſaid Lords of the Privy Council being directed by this Act, to regulate the Proportions to be exported from different Ports to each Iſland reſpectively, every three Months; on this Account therefore, they cannot abſolutely rely on the Quantities allowed to each Port, as inſerted in the preſent Tables.

Sect. 12. The Inhabitants of *Guernſey*, *Jerſey* and *Alderney*, may tranſport directly from thence to *Newfoundland*; the Wheat, or other Grain allowed to be imported into thoſe Iſlands by 9 *Geo.* III. C. 28.

Sect. 13. Corn, *&c.* may be exported to *Ireland*, during an Embargo on the Exportation thereof from that Kingdom.

Sect. 14. In Times of War, his Majeſty in Council, when the Parliament is not ſitting, may allow greater Quantities of Corn, *&c.* than thoſe ſpecified in the Tables to be exported; but the additional Quantity is not to exceed 5000 Quarters of each Kind of Grain; and 2000 Tons of the ſeveral Sorts of Ground-Corn, and Biſcuit in any one Year.

Sect. 15. After *November* 15, 1791, the Duties on the *Importation* of Foreign Wheat, *&c.* to be regulated according to the Prices ſpecified in the following Table, marked D.

			s.	*d.*
WHEAT when the Price is under 50*s.*	per Quarter	High Duty	24	3
—— if at, or above 50*s.* but under 54*s.*		Firſt Low Duty	2	6
—— if at or above 54*s.*		Second Low Duty	0	6
Importation of Wheat-meal and Flour to be governed by the Price of Wheat as follows		High Duty per Cwt.	6	6
		Firſt Low Duty	1	6
		Second Low Duty	1	0

N. B. Malt of all Kinds of Grain prohibited.

BARLEY, Beer or Bigg when the Price is under 25*s.*	per Quarter	High Duty	ditto	22	0
—— at or above 25*s.* but under 27*s.*		Firſt Low Duty	ditto	1	3
—— if above 27*s.*		Second Low Duty	ditto	0	3
Importation of *Indian* Corn or Maize to be governed by the Price of Barley as follows,		High Duty	per Quarter	22	0
		Firſt Low Duty	ditto	1	3
		Second Low Duty	ditto	0	3
RYE, Peaſe, Beans, when the Price is under 34*s.*	per Quarter	High Duty	ditto	22	0
—— if at, or above 34*s.* but under 37*s.*		Firſt Low Duty	ditto	1	6
—— at, or above 37*s.*		Second Low Duty	ditto	0	3
OATS, when the Price is under 17*s.*	per Quarter	High Duty	ditto	6	7
—— if at, or above 17*s.* but under 18*s.*		Firſt Low Duty	ditto	1	0
—— at, or above 18*s.*		Second Low Duty	ditto	0	2

A ſeparate Table marked E. regulates the Importation from *Ireland*, proviſionally, when an Act of the Parliament of that Kingdom ſhall permit the Importation from *Great-Britain*, under the Regulations mentioned in the ſaid Table. It extends the Conditions of this Table likewiſe to Importations from *Quebeck*, or other *Britiſh* Colonies or Plantations in *North America*. Sect. 16.

On Importation of Corn as the Growth of *Ireland*, *Quebeck*, &c. the Maſter of the Ship is to bring a Certificate thereof, from the Officers of the Port where it was ſhipped, expreſſing likewiſe the Quantity. Sect. 17.

No Corn, *&c.* to be carried Coaſt-wiſe, from any Port, where the Exportation is not allowed at the Time of ſhipping; but may be landed or unſhipped at any other Port of *Great-Britain*, from whence the ſame, according to the Regulations of this Act, may then be exported. Sect. 21.

Veſſels with Foreign Corn, *&c.* arriving at Ports of *Great-Britain*, where the high Duties are payable, or where Importation is prohibited, may depart to Ports where the ſame may be imported on the low Duties. Sect. 25.

Foreign Corn may be brought directly to *Grangemouth*, in the County of *Stirling*, or to *Greenock*, in the river *Clyde*, in order to be conveyed from thence reſpectively, by or through the Canal called the *Forth* and *Clyde* Canal Navigation, in Lighters; to any Port or Creek at which Foreign Corn, *&c.* may then be imported. And from *Greenock* to the Eaſt Coaſt of *Scotland*; as well as from *Grangemouth* to the Weſt Coaſt; Corn, *&c.* may be tranſported in manner above mentioned to any Port or Creek, where the ſame may be then landed upon Payment of the low Duties, ſubject to the Regulations of this Act. The Certificates, Bonds, and Securities, required muſt be given within three Days after unlading the ſaid Foreign Corn, *&c.* otherwiſe both the Corn, and the Ship, or Lighter, ſhall be forfeited. Sect. 26. 29.

The maritime Counties of *England* ſhall be divided into twelve Diſtricts, See 44; and *Scotland* into four. The Exportation to be regulated in the firſt Diſtrict, by the Prices at the Corn-Exchange at *London*. See p. 44. And the ſeveral Proprietors of the ſaid Corn-Exchange, or the major Part of them are authoriſed to appoint an Inſpector of the Corn returns, who is to deliver his Commiſſion within one Week after his Appointment into the Hands of the Lord Mayor, and enter into a Bond to the Corporation of *London* with two ſufficient Sureties, to be approved by the Lord Mayor, for the faithful Execution of his Office, and ſhall alſo take the Oath preſcribed by this Act. An Office ſhall be appointed for him in ſome convenient Place within the Corn Exchange. Sect. 31, 32, 34.

In Caſe the Proprietors of the Corn Exchange, upon the Death or Removal of any Inſpector of Corn Returns, ſhall neglect to appoint another within a Week; the Lord Mayor and Court of Aldermen are authoriſed to appoint a fit and proper Perſon to the ſaid Office. And no Inſpector ſhall be removeable, but by the Lord Mayor and Court of Aldermen. In caſe of Sickneſs a Deputy Inſpector may be appointed. Sect. 35. 36.

The Oath required to be taken by Corn Factors, See p. 43, is by this Act, changed to a ſimple Declaration. Sect. 38.

The weekly Returns made by the Factors and other Dealers in Corn, *&c.* ſhall be entered by the Inſpector in a Book kept for that Purpoſe, but they ſhall not be ſhewn to any Perſon whatever, without an Order in writing under the Hand and Seal of the Lord Mayor, or any two of the Aldermen; under a Penalty of Ten Pounds. Sect. 39.

The Inſpector to make up weekly Accounts of the Average Quantity and Price of each Sort of *Britiſh* Corn, *&c.* ſold in *London*, and to tranſmit the Average Prices every *Friday* to the Receiver of the Corn Returns appointed by this Act, who is to tranſmit a Certificate thereof to the Collectors of the Cuſtoms at *London*, and the Ports in *Eſſex*, *Kent* and *Suſſex*, as the Guide for *Exportation*. And the ſaid Inſpector ſhall make up, and tranſmit the like Accounts of the Average Prices to the Receiver of the Corn Returns, who is to tranſmit a Certificate thereof, to the Collectors of the Cuſtoms at *London*, &c. as the Rule for *Importation*. Sect. 41. 42.

Inſpector to deliver a Copy of the Average Prices without Delay, to the Lord Mayor and Aldermen, at their next Seſſions of the Peace; to be publiſhed by them Sect. 43, 44

them in the *London* Gazette, once in each of the four Weeks immediately ſucceeding ſuch Seſſion. Factors to pay to the Inſpector for *Britiſh* Corn brought into the Thames *Eaſtward* of *London* Bridge, and ſold, 1d. *per Laſt*, and for Foreign Corn 2d. and to deliver to him an Account of the Quantity, *&c.*

The Appointment of Inſpectors, and other Regulations reſpecting the Weekly Returns, *&c.* for the other *Eleven Diſtricts* of *England*, are only Repetitions of the Rules to be obſerved in the firſt Diſtrict, which includes the Ports of *London*, *Eſſex*, *Kent* and *Middleſex*; it is therefore needleſs to inſert them as they can be of no Uſe to the Merchants, or other Perſons concerned in the Corn-Trade in general, whoſe Tranſactions will be conformable to the Regulations of the firſt Diſtrict already given.

The Regulations for the Importation and Exportation of Corn in *Scotland*, differ not materially from thoſe of *England*, except in the Appointment and Denominations of the Officers. The Sheriff, or Steward-depute, or Subſtitute, is to tranſmit the weekly Account of Prices, which are to be fixed by the Meaſures and Weights uſed in each County, to the Receiver of Corn Returns at *London*. Sheriffs, *&c.* not cauſing the Prices to be fixed and determined as the Act directs, ſhall forfeit twenty Pounds.

Sect. 70, 71. When the Parliament is not ſitting, if the Average Price of any Sort of Corn, *&c.* ſhould be higher than that at which the ſame Sort of Foreign Corn may be imported at the low Duties; the King in Council may prohibit Exportation. But the Prohibition not to extend to Foreign Corn already imported and warehouſed.

Sect. 82. All Corn ſhall be meaſured and computed by the *Wincheſter* Buſhel; and a *Quarter* ſhall be deemed to conſiſt of *Eight* of ſuch Buſhels. The Mayor or chief Officer of every City or Town in each Diſtrict from which Corn Returns are directed to be made by this Act, and the Sheriffs in the reſpective Diſtricts of *Scotland*, ſhall cauſe a Standard *Wincheſter* Buſhel to be provided and kept in each City and Town, and the Meaſures commonly uſed in any City or Town, and differing in Quantity from it, ſhall be compared and computed by the Standard *Wincheſter* Buſhel, the only Meaſure to be deemed legal.

When Corn is ſold by Weight, *Fifty-ſeven* Pounds Averdupoiſe of Wheat ſhall be deemed equal to a *Wincheſter* Buſhel, and all Computations by Meaſure for the Purpoſes of this Act, are to be made by the *ſtricken* and not by the *heaped* Buſhel. *Fifty-five* Pounds Avoirdupoiſe of Rye ſhall be deemed equal to every ſuch Buſhel of Rye. *Forty-nine* Pounds of Barley, and *Forty-two* Pounds of Beer or Bigg, ſhall be deemed equal to every ſuch Buſhel of Barley, Beer or Bigg. *Thirty-eight* Pounds of Oats ſhall be deemed equal to every ſuch Buſhel of Oats. *Fifty-ſix* Pounds Averdupoiſe of Wheat-meal, and *Forty-five* Pounds of Wheat Flour, ſhall be deemed equal to every *Wincheſter* Buſhel of unground Wheat. *Fifty-three* Pounds of Rye-meal ſhall be deemed equal to every ſuch Buſhel of unground Rye. *Forty-eight* Pounds of Barley-meal ſhall be deemed equal to every ſuch Buſhel of unground Barley. *Forty-one* Pounds of Beer or Bigg-meal ſhall be deemed equal to every ſuch Buſhel of unground Beer or Bigg. *Twenty-two* Pounds of Oat-meal ſhall be deemed equal to every ſuch Buſhel of unground Oats. The Quantity of ground Corn in Sacks to be determined by weighing two Sacks out of Twenty.

The other Regulations of this Act regard the Collecting of the Duties, Payment of Bounties, paſſing Accounts between the Cuſtom-houſes and the Treaſury, *&c.* *&c.* *&c.* none of which convey mercantile Information. We ſhall therefore cloſe this important Article with an Obſervation which may afford great Comfort to the numerous Inhabitants of the very populous and daily increaſing City of *London*. It appears to the Editor, that the wiſe Meaſures taken by the Legiſlature in this Act, are admirably calculated to prevent any great Advance in the Price of that neceſſary Part of our Food *Bread*; unleſs a real Dearth, which God in his Mercy forbid! ſhould at any future Time, afflict not only this, but moſt of the Corn Countries of *Europe*, at one, and the ſame Period.

No. II.

To Bills of Exchange.

Minet & Fector v. *Gibson & Johnson.* B. R. Trin. Term. 1789.

Gibson & Johnson Appellants *Minet & Fector* Respondents. H. of Lords. *Feb.* 1791.

This great Cauſe, the final Deciſion of which was moſt anxiouſly waited for by all Perſons concerned in the Negociation of Bills of Exchange, is ſtated at large from Page 466 to 470, where it is noticed as being referred on certain Points of Law to the twelve Judges. They accordingly delivered their Opinions in the Houſe of Lords on Friday *Feb.* 11th, 1791, after which their Lordſhips were pleaſed to *affirm*, the Law Term, for confirming the Judgement given by the Court of King's-Bench.

A Reference to the *ſeven* ſpecial Counts ſtated in the Declaration on the Bill, *See* p. 466, and to the Points propoſed to the Judges for their Opinion, p. 470, renders any Repetition in this Place, totally unneceſſary. But a very conciſe Statement of the Caſe, as it affected *Gibſon* and *Johnſon*, is requiſite, to render the final Deciſion, and its Conſequences to the mercantile World ſtill more explicit.

Liveſay and *Hargrave*, Copartners, living at *Mancheſter*, drew a Bill of Exchange upon *Gibſon* and *Johnſon* of *London*, payable to *John White or order*, when in Fact the Drawers knew no ſuch Perſon; and this fictitious Name they indorſed on the Bill, to make it negociable, their own Credit being on the Decline; in this State it came into the Hands of *Minet* and *Fector*, and was ſent to *Gibſon* and *Johnſon* in the uſual Manner for Acceptance: they did accept it, but when it became due refuſed Payment. *Minet* and *Fector* then brought an Action againſt them, which was tried, and the Jury found a general Verdict for the Plaintiffs upon the Ground of the *fifth* Count, which conſidered it as a Bill payable to Bearer. Againſt this Deciſion the Plaintiffs in Error, appealed to the Houſe of Lords.

The Judges were unanimouſly of Opinion, that there was no Ground to charge the Drawers, who were likewiſe the Indorſers of the fictitious Name *John White*, with Forgery, or even intentional Fraud; a Point which had been ſtrongly inſiſted upon, in Order to annul the Bill, and thereby ſet aſide the Verdict. On the ſecond Article, whether the Court had a Right to conſider the Bill as payable to *Bearer*, a great Difference of Opinion took Place; and *ſix* of the Judges delivered their Sentiments that the Bill might be deemed *in Law*, a Bill payable to Bearer: *viz.* The Lords *Kenyon* and *Loughborough*, Juſtice *Gould*, and the Barons *Hotham*, *Thompſon* and *Perryn*. The Lord Chancellor, The Chief Baron *Eyre*, and Mr. Juſtice *Heath*, were of Opinion that the Judgement of the Court of King's Bench could not be ſupported on any of the Counts; and the Chief Baron very forcibly inveighed againſt the Conſequences of converting Bills payable *to Order* into Bills payable to Bearer; for he juſtly obſerved, that the Practice of ſupporting Credit by the Kind of Bill in Queſtion was of ſo alarming a Nature as to require an immediate Interference; and he expreſſed his Apprehenſion that affirming the Deciſion of the Court of King's-Bench would increaſe the Evil, inſtead of checking it, and deeply injure the Intereſts of Commerce, which depended on the Support of *fair*, and the Diſcouragement of *falſe* Credit.

The Lord Chancellor could not diveſt his Mind of the Idea of Fraud in the Tranſaction. The Reaſon for making the Bill payable to the Order of *John White*, was to give it a greater Degree of Credit, and a more extenſive Circulation. It was to give Countenance to a Thing that was unreal, which in his Opinion muſt be deemed a Fraud.

His Lordſhip forewarned the Judges in the Court of King's-Bench, that the very next Caſe which came before them would oblige them to decide, whether the putting the Name of *John White*, or any other fictitious Name, on a Bill of Exchange, was not a Forgery within the Statute. He wiſhed it had been ſtated, and he thought the Judges who were of Opinion that there was neither Forgery nor Fraud in the Tranſaction, had confined themſelves too cloſely to the *ſpecial* Verdict. It muſt be decided ſaid his Lordſhip, whether thoſe who call themſelves Merchants ſhall be permitted to put fictitious Names, or the Names of any other Perſons, not their own, on Bills, and write thoſe Names themſelves. It is a Queſtion, My Lords, which demands a Solution—how far ſuch an Inſtru-

ment as this, is or is not to be conſidered as having been made for the Purpoſe of obtaining Money under falſe Pretences.

His Lordſhip pathetically lamented the Hardſhips of the Caſe with Reſpect to the Holders of the Bill, *who had paid a valuable Conſideration for it, having diſcounted it*; but he thought the Criminality of the Act ought to have prevented Holders of it from maintaining an Action upon it.

With Reſpect to the Queſtion, whether this was a Bill payable *to Bearer*, his Lordſhip differed totally from thoſe learned Judges who ſaid it ought to be ſo conſidered; and he very properly aſked, at what Period of Time it became a Bill payable to Bearer, ſince it was originally drawn payable to Order, and the Holders had taken it as ſuch—did the Change take Place before or after it was accepted; this ought to be determined—for as a Meaſure of general Policy, it was of extreme Importance, that Tranſactions of this Kind ſhould be ſtopped. Fictions on Bills would be the conſtant Courſe, if their Lordſhips made ſuch Bills payable to Bearer.

The Cuſtom of Merchants was pleaded in vain, by Lord *Loughborough*; for it by no Means applies to the preſent Caſe, and the Lord Chief Baron was perfectly right in ſaying that no ſuch Regulation was to be found in any of our Books: As to the Cuſtom of Brokers who are Agents to foreign Merchants reſiding at a vaſt Diſtance from this Country, to prevent ſending back a *foreign* Bill of Exchange, which might be highly prejudicial to the Merchant here, it is a Caſe widely different; here is no Intention to raiſe Money by a fictitious Credit, and if ſuch a foreign Bill were found by a Stranger without any Indorſement, it would be no better to him than waſte Paper.

But the Editor, with great Deference to the Opinion of the learned Judge, is extremely apprehenſive that the final Deciſion, which in his humble Opinion ſeems to have followed the general Rule of Parliament, in adhering to the Opinion of the Majority—he means, *the Majority of the Judges*, has eſtabliſhed a Precedent, which will facilitate the raiſing of artificial Capitals for opening new Country Banks, in almoſt every Market Town in *Great-Britain*; and will increaſe the Fabrication of Accommodation-Bills, for the Pupoſe of ſupporting rotten Credit, to the great Injury of fair commercial Credit, which ought to be protected and ſecured by the Laws of the Land, againſt all Attempts to undermine it by the Circulation of fraudulent Paper.

Maſter and others v. *Miller* K. B. *Trin.* Term 1791.

In this Caſe, an Alteration of the Date of a Bill had been made after Acceptance; and it was decided, that any Alteration of the Date of a Bill of Exchange after Acceptance, whereby the Payment would be accelerated, avoids the Inſtrument, and no Action can be afterwards brought upon it, even by an innocent Holder for a valuable Conſideration given by him for it. On this Occaſion Lord *Kenyon* and Judge *Buller* in their Arguments, quoted *Beawes' Lex Mercatoria* as an unqueſtionable Authority. See p. 429.

N°. III.

To Bankruptcy.

Special Caſes of Debts that cannot be proved under the Commiſſion. *See* page 566.

Ex parte Smith, in the Matter of Lewis and Potter.

In Chancery Sitt. before *Mich.* Term. 1789.

This Petition prayed that a Debt proved by Sir *James Eſdaile* and Co. under the Commiſſion againſt *Lewis* and *Potter*, on certain Notes and Bills, which had been indorſed by the Bankrupts, might be expunged, on Account of the Holders' having, ſince the Proof of the Debt, diſcharged the Acceptors of the Bill, and Drawers of the Notes, without Notice to the Indorſers, or their Aſſignees. The firſt Note which was included in the Prayer of this Petition, was a Promiſſory Note made by *Barber* to *Powell*, and endorſed by *Powell* to *Lewis* and *Potter*, who, having Occaſion to diſcount it, endorſed it to *Eſdaile* and Co. *Lewis* and *Potter* became Bankrupts before the Note became due. The Note not being honoured when it fell due, Sir *James Eſdale* and Co. proved the Amount in *June* 1788, under

the Commiſſion againſt *Lewis* and *Potter*, after which they proceeded at Law againſt *Barber* and *Powell*, to Judgement, and then, there having been a Propoſition on the Part of *Barber* to pay 15s. in the Pound, to all his Creditors, in full Diſcharge of their Debts, *Eſdaile* and Co. accepted the ſame, and gave a full Diſcharge to *Barber* for the Amount of this Note, without the Conſent and Privity of the Aſſignees of *Lewis* and *Potter*.

Againſt the Petition, it was argued; that the Rule, which prevailed where he Drawer or Indorſer were Solvent, could not prevail where the Indorſer wa a Bankrupt; the Meaning of that Rule, which requires immediate Notice to be given to the Drawer, was, that the Drawer, upon taking up the Bill, might recover from the Acceptor, the Amount of thoſe Effects, ſuppoſed to be in his Hands, in Reſpect to which the Bill was drawn; and ſo, in the Caſe of a Promiſſory Note, where the Drawer did not pay at the Time, Notice was required to be given to the Indorſer, in Order that he may take it up, and recover over againſt the Drawer; and the Conſequence is, that if the Holder of the Note or Bill, inſtead of giving Notice to the Drawer or Indorſer, will compound with the Acceptor of the Bill, or the Drawer of the Note, and diſcharge him in Reſpect thereof, he precludes the Drawer or Indorſer from this Advantage; and therefore ſhall not afterwards call upon them for Payment. But where the Indorſer is a Bankrupt, as in the preſent Caſe, ſuch Notice cannot be neceſſary, nor can it be neceſſary to have the Conſent of the Aſſignees to accept a Compoſition, when it appears to be a *bonâ fide* Tranſaction; for the Indorſer being a Bankrupt, it is impoſſible he ſhould take up the Note himſelf, which is the only Reaſon of the Notice being neceſſary. It would be a very unreaſonable Rule, which required the Holder of a Bill or Note to accept, at his Peril, a fair Compoſition from the Acceptor, which was the beſt that his Circumſtances would allow, and which was made upon a full Inveſtigation of his Affairs——that if any Fraud appeared in the particular Tranſaction, and that, in Fact, the Compoſition taken, was not the beſt Bargain that the Holder could make, this would be an Anſwer in the Particular Caſe; but that the general Rule, as between Solvent Perſons, ought not to apply generally, where the Party to whom Notice was expected to be given was a Bankrupt.

Lord Chancellor Thurlow, I have before decided that the Doctrine of Notice, which holds amongſt Solvent Perſons, does not apply as between Bankrupt Eſtates; but, here, the Indorſer only was Bankrupt, the Maker and the Payer of the Note were not. The Debt proved by Sir *James Eſdaile* was undoubtedly well proved at the Time, and the Queſtion is, whether the ſubſequent Conduct of the Creditor has deſtroyed that Intereſt which he acquired by ſuch Proof. By the Compoſition he has made with the Drawer of the Note, which goes to the Length of diſcharging of the Drawer, he, certainly, has prevented the Aſſignee of the Indorſer from coming on the Drawer of the Note for Payment of what his Eſtates ſhall pay in Conſequence of the Proof; and yet, on the other Hand, it does ſeem a ſtrong Thing to ſay that, where there are many Names on a Bill, one of whom is Inſolvent, though not Bankrupt, and the other Bankrupt, and the Holder proves under all the Commiſſions, and then makes a Compoſition *bonâ fide* with the Inſolvent Perſon, and obtains from him all that he poſſibly can; that he ſhall thereby be deprived of the Benefit of all the Proviſion made by him under the Commiſſions againſt the other Parties who ſtood on the Bill poſterior to the Party compounded with. And I am well ſatisfied, in this Caſe, Sir *James Eſdaile* did, in Fact, make the beſt Terms he could with the Drawer of the Note, by taking 15s. in the Pound of him in full. And whatever Difficulty I may find in making a Precedent which allowed of ſuch a Compoſition, without giving Notice to the Aſſignees of the Indorſer, I am convinced that the Juſtice of this Caſe, if it ſtood alone, would not require me to expunge this Debt. The Caſe made, does not impute any Fraud to the Tranſaction of this Compoſition; but, on the contrary, the Holders uſed all their Diligence at Law againſt the Drawer of the Note and the Payer, and then made the beſt Terms they could with the Drawer; though at the ſame Time, they have gone to the Extent of acquitting him altogether in Reſpect of the Note. However, whatever may be the Circumſtances of the preſent Caſe, I think, in Point of Precedent, it may be dangerous to ſay,

that

that, after ſuch an Acquittal, the Holder may reſort to the Indorſer's Eſtate. It is certainly open to this Sort of Fraud, that when the Holder ſees that in one Way or the other, he is ſure of his 20*s.* in the Pound, he may favour an Acceptor, at the Expence of the Indorſer; by compounding with the Acceptor for juſt ſo much as he conceives will be the Deficiency under the Indorſer's Commiſſion. In this View, it may be a dangerous Precedent; and I cure this Danger, by ſaying generally, that the Holder of the Paper ſhall not compound with the prior Names on the Bill, but with the Conſent of the Aſſignees of the poſterior Party. And it is not an Anſwer to ſay, that if any Fraud is practiſed in the Compoſition, that ſhall take it out of the general Rule. It is much better, and more convenient in Practice, to have a preciſe Rule to go by; and Juſtice will, in general, be better done to all Parties. It is not that Notice is ſtrictly neceſſary, but I go upon this; the Debt is well proved againſt the Indorſer's Eſtate; this gives his Aſſignees a Right of Action againſt the Acceptor or Drawer, for the Amount paid out of the Indorſer's Eſtate; but this Right is cut away by the Compoſition and Diſcharge given to the Acceptor by the Holder. Therefore, it is better to ſay, let the Aſſignees either take the whole, or permit the Holder to make the moſt of it he can againſt the Acceptor. I think therefore, the Debt muſt be expunged.

A few Days afterwards, this Cauſe was mentioned again; when his Lordſhip ſaid, he had conſidered it a good Deal, and had converſed on the Subject with ſome of the Judges; and he was ſatisfied that the Holders muſt get the Conſent of the Aſſignees of the Indorſer, before they can diſcharge the Acceptor without diſcharging the Indorſer's Eſtate at the ſame Time. *Reports of Caſes argued and determined in the Court of Chancery.* By William *Brown*, Eſq; *of the Temple.* Vol. II. 1789.

Ex parte HARRISON, in the Matter of LEWES and POTTER.

This Caſe aroſe on an Engagement, by *Lewis* and *Potter* to warrant the Payment of the Bill of Exchange in Queſtion in like Manner as if they had indorſed it. This Engagement was in writing, but the Bill did not become due till after the Bankruptcy of *Lewis* and *Potter*.

Lord Chancellor ſaid, certainly, a Party may warrant the Payment of a Bill of Exchange, by other Means than by endorſing it; but in Order to enable the Holder to prove his Debt under the Statute of Rebate 7 *Geo.* I. he muſt make himſelf a Creditor by Endorſement: There is no Debt proveable under the Proviſion of that Statute, but what ariſes upon the Face of the Inſtrument.

Therefore refuſed to order proof of the Debt. *Ibid.* Vol. II.

Ex Parte *Batſon* and others, in the matter of *Gooch* and *Cotton* Bankrupts; Lincolns Inn Hall 10th *Auguſt*, 1791.

This Cauſe came to a hearing on the Prayer of the Petition to the Lord Chancellor, that the Right of the Petitioners to the Ship therein mentioned, and the Money ariſing therefrom, might be declared and eſtabliſhed to them.

The Caſe was briefly this—A Mortgage of the Ship *Nautilus* was made when ſhe was in the Port of *Dublin*, and a Delivery of the Munitions: The Mortgagee inſured her there, and made a ſecond Mortgage; the ſecond Mortgagee took Poſſeſſion, as ſoon as he was informed ſhe was in an *Engliſh* Port: This is a ſufficient Poſſeſſion to take it out of the Statute of 21 Jac. C. 19. See *Bankruptcy*, Page 536.

Gooch and *Cotton*, original Owners of the ſaid Ship, being indebted in the Courſe of Trade to *Lindegreen* and Co. in certain Sums of Money, mortgaged, or aſſigned her over, by Deed, dated *Auguſt* 20th, 1783; and by another Deed or Indenture of Leaſe and Releaſe, bearing Date 17th and 18th of *September*, 1783, a ſecond Mortgage or Aſſignment for the ſame Cauſe was made by *Lindegreen* and Co. to the Petitioners. The Ship remained at *Dublin* until the 14th of *September*, when ſhe ſailed for *Cadiz*. In the following Month, both the *firſt* and *ſecond* Mortgagees became Bankrupts: The ſimple Queſtions therefore were; whether the Aſſignees of *Lindegreen* and Co. had a Right to the ſaid Ship, her Munitions, *&c.* not having taken Poſſeſſion of her in the Port of *Dublin*, though ſhe remained there a ſufficient Time for that Purpoſe; and whether the Poſſeſſion taken by the Petitioners, of the ſaid Ship as ſoon as ſhe arrived in a Port of *Great-Britain* from her Voyage, was not ſuch a Poſſeſſion as deprived the Aſſignees of *Lindegreen* and Co. of all Right whatever to the ſaid Ship, or to the Recovery of the Money ariſing therefrom.

The Arguments of Mr. *Mansfield* and Mr. *Cooke*, on the Part of the Petitioners; and of the Sollicitor General and Mr. *Campbell* on the Part of the Aſſignees, are given at large in *Brown*'s *Reports*, Vol. III.

The former contended that the Poſſeſſion taken by the Petitioners, on the Return of the Ship to *Great-Britain*, was ſuch a Poſſeſſion as took it out of the before-cited Statute.

The latter, that Poſſeſſion ſhould have been taken before the Ship left *Dublin*; and in Default thereof, they inſiſted that the Property remained veſted in the Aſſignees of *Lindegreen* and Co.

THE LORD CHANCELLOR ſaid; if the Ship had been chartered from *Dublin* to *Cadiz*, with Liberty to touch at a Port in *England*, has it ever been held that the Mortgagee was obliged to give Notice. If there had been a new Voyage commenced under the Authority of *Gooch* and *Cotton*, that would have made the Caſe different; but here the Inſurance was for a Voyage beginning from *Dublin*, where the Ship was chartered, and the Voyage begun, it would be difficult to take Poſſeſſion. A Notice to the Captain would be to ſtop the Voyage.

His Lordſhip, therefore, granted the Prayer of the Petition.

Brown's Rep. Vol. III.

APPENDIX.

No. IV.

An ACCOUNT of the Amount of the PUBLIC DEBTS, as they ſtood on the 5th Day of January, 1791; with the Annual Intereſt and other Charges payable thereon.
